PROCEEDINGS AND DEBATES OF THE SEVENTIETH CONGRESS FIRST SESSION

SENATE

SATURDAY, *May 19, 1928*

(Legislative day of Thursday, May 3, 1928)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

EXECUTIVE NOMINATIONS REFERRED

Mr. CURTIS. Mr. President, as in open executive session, I ask unanimous consent that all Executive nominations shall be referred to the proper committees.

The VICE PRESIDENT. Without objection, it is so ordered.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Barkley	Gerry	McNary	Sheppard
Bingham	Gillett	Mayfield	Shipstead
Black	Glass	Metcalf	Shortridge
Blaine	Goff	Moses	Simmons
Blease	Greene	Neely	Smoot
Borah	Hale	Norbeck	Steck
Bratton	Harris	Nye	Steiwer
Brookhart	Harrison	Oddie	Stephens
Broussard	Hayden	Overman	Swanson
Bruce	Heflin	Phipps	Thomas
Capper	Howell	Pine	Tydings
Caraway	Johnson	Pittman	Tyson
Couzens	Kendrick	Ransdell	Vandenberg
Curtis	King	Reed, Mo.	Wagner
Cutting	La Follette	Reed, Pa.	Walsh, Mass.
Deneen	Locher	Robinson, Ark.	Walsh, Mont.
Fess	McKellar	Robinson, Ind.	Warren
Fletcher	McLean	Sackett	Waterman
George	McMaster	Schall	Watson

Mr. CURTIS. I was requested to announce that the senior Senator from Nebraska [Mr. NORRIS] is detained in committee.

Mr. GERRY. I wish to announce that the Senator from New Jersey [Mr. EDWARDS] is detained from the Senate by illness in his family, that the Senator from Delaware [Mr. BAYARD] is detained by a death in his family, as also is the Senator from Montana [Mr. WHEELER], and that the Senator from Arizona [Mr. ASHURST], the Senator from Washington [Mr. DILL], and the Senator from Missouri [Mr. HAWES] are absent on official business.

The VICE PRESIDENT. Seventy-six Senators having answered to their names, a quorum is present.

POSTAL RATES—CONFERENCE REPORT

Mr. MOSES. Mr. President, I ask unanimous consent to proceed to the consideration of the conference report on the postal rates bill.

Mr. SMOOT. Does the Senator think it is going to lead to any discussion?

Mr. MOSES. The purpose in bringing the report before the Senate at this minute is in order that the Senate may agree to the few agreements which the conferees have reached and that I may ask for a further conference.

Mr. SMOOT. Then it will not lead to any discussion?

Mr. MOSES. I will say to the Senator that if the discussion of the measure is to eat into the time allotted to the tax bill I will withdraw the request.

Mr. LA FOLLETTE. Mr. President, will the Senator be kind enough to make a brief statement about the report?

Mr. MOSES. I intend to do so.

The VICE PRESIDENT. Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report, which was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12030) to amend Title II of the act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 9, 24, and 25.

That the House recede from its disagreement to the amendments of the Senate numbered 21, 22, 23, and number 8 with amendments, so as to make the amendment read as follows:

"That section 202, Title II, act of February 28, 1925, is amended by the addition of a paragraph 4, to read as follows:

"(4) *Provided*, That in the case of duplications entered as second-class matter when the number of individual addressed copies or packages to the pound is more than 32 and not in excess of 48, the rates of postage thereon shall be double the rates prescribed in paragraphs (1), (2), and (3-a) of the act of February 28, 1925; when the number of individual-addressed copies or packages to the pound is more than 48 and not exceeding 64, the rates of postage shall be three times the regular rates, and for each additional 16 individually addressed copies or packages or fractional part of such number of copies or packages there may be to the pound the rates of postage shall be correspondingly increased over the regular rates."

And the Senate agree to the same.

The committee of conference have not agreed on amendments 1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, and 20.

GEO. H. MOSES,
L. C. PHIPPS,
Managers on the part of the Senate.

W. W. GRIEST,
C. W. RAMSEYER,
THOS. M. BELL,
Managers on the part of the House.

Mr. MOSES. Mr. President, the conference report so far as the conferees have been able to agree is with reference to rates for library books, and one provision contained in the amendment adopted in the Senate on the motion of the Senator from South Dakota [Mr. MCMASTER] to provide for an executive officer for the parcel post. The reasons why the conferees were moved to agree on the elimination of that item were two: First, that complete authority already exists in the Post Office Department for the appointment of a director of parcel post. The department is now setting up a committee of executives within the department to consider the matter of producing an executive officer for the parcel post. In addition to that the conferees felt that it was wholly an administrative matter, and would better go on the regular appropriation bill than on a bill which is devoted solely to the regulation of postal rates.

Mr. MCMASTER. Mr. President, may I say to the Senator from New Hampshire that I understand from the statement from the Post Office Department that they acknowledge the fact that the business to-day is being run in a haphazard manner, and that they ought to have some executive committee in order to give it more administrative efficiency? Am I to understand, then, that that is acknowledged on the part of the department?

Mr. MOSES. I am not prepared to make any concession about the Post Office Department.

Mr. MCMASTER. The department admits, however, that they are appointing a sort of executive committee in the Post Office Department for the purpose of giving the parcel post more efficient attention.

Mr. MOSES. Attention; yes, Mr. President.

Mr. MCMASTER. Then the adoption of that amendment would not do any harm, except to direct the attention of the Post Office Department to the fact that Congress is in favor

of their taking some drastic action to bring about a more efficient administration of the parcel post.

Mr. MOSES. I think I can assure the Senator from South Dakota that the executives of the Post Office Department who appeared before the conferees are fully aware of the temper of Congress in that regard.

Mr. LA FOLLETTE. Mr. President, I did not hear the explanation of the Senator from New Hampshire as to what has been done with regard to library books. I am very much interested in that subject.

Mr. MOSES. We have reduced the rates on books which are sent out from central State libraries or from county libraries, so that the circulation of books of that character within a State will be facilitated by a very greatly reduced rate.

Mr. LA FOLLETTE. The Senator will remember that the Senator from Wisconsin offered an amendment reducing the rate to 1 cent a pound additional. Was that amendment retained?

Mr. MOSES. Yes. The questions in disagreement, Mr. President, between the conferees relate to second-class matter and to fourth-class matter.

Mr. KING. Mr. President——

Mr. MOSES. I yield to the Senator from Utah.

Mr. KING. I did not hear the last part of the Senator's sentence.

Mr. MOSES. The items in disagreement relate to the rates on second-class matter and fourth-class matter. With reference to second-class matter, the House bill reduces the rate to a point where the postal revenues will suffer an estimated loss of $3,860,000. The amendment put on the bill by the Senate would increase that reduction in revenue to $7,610,000. In the course of the conference the conferees on the part of the Senate proposed a compromise to the conferees on the part of the House which would strike a mean between the two figures which I have just quoted, and would result in a reduction in revenue of $6,600,000.

On fourth-class matter the House continued the service charge as it now stands of 2 cents for the first three zones and reduced it to 1 cent for all the others. The Senate wholly wiped out the service charge.

The reduction in postal revenues resulting from the House bill provision would be $2,200,000. The reduction in revenues resulting from the rate as proposed by the Senate would be $14,640.000, a difference of $12,440,000.

On those two items, Mr. President, the Senate conferees and the House conferees find themselves in violent conflict. The House conferees seem to be adamant; their attitude apparently with reference to these amendments is exactly that which they exhibited with reference to the District of Columbia appropriation bill. I have been apprehensive that we might not be able to secure any legislation for the relief of the users of the mails because of the entirely resistant attitude of the conferees on the part of the House. Therefore I am now asking, Mr. President, that the Senate may agree to the conference report as presented, and that the Senate ask for a further conference with the House on the items in disagreement.

Mr. McKELLAR. Mr. President, I desire to ask the Senator from New Hampshire if he will not accept an amendment to his motion to the effect that the Senate insist on its amendments and ask for a further conference?

Mr. MOSES. I think that is involved in my motion, or, at any rate, it is implied in my request for a further conference.

Mr. McKELLAR. If it is, then, all right, but I should like to have the Senate go on record to that effect.

Mr. PHIPPS. Mr. President, will the Senator from New Hampshire yield to me?

Mr. MOSES. I yield.

Mr. PHIPPS. I merely want to ask whether the first motion should not be on the adoption of the conference report?

Mr. MOSES. I think that question should be put, and then I shall submit the request for a further conference.

Mr. KING. Mr. President, I desire to submit a motion at the appropriate time under the parliamentary procedure that the Senate recede from its amendments in disagreement to which reference was made by the chairman of the committee, the Senator from New Hampshire [Mr. MOSES]. I shall base that motion upon the fact that the Senate amendments, if adhered to, would materially increase the deficit resulting from the operations of the Post Office Department. Even the bill as it came from the House will result in a deficit, and the Senate amendments would increase the deficit. It does seem to me, in view of the possibility of a deadlock, that, perhaps, it would be far better for the Senate to recede, and I shall submit that motion at the proper time.

Mr. McKELLAR. Mr. President, I have just a few words to say about this matter.

Mr. MOSES. Will not the Senator from Tennessee let us agree to the conference report as submitted?

Mr. McKELLAR. No; I wish first to be heard. To be frank about it, Mr. President, I find myself in disagreement not only with the House conferees but with a majority of the Senate conferees in reference to this bill.

There were three amendments adopted by the Senate which are of material importance. One restored the so-called 1920 rates on second-class matter; the second reduced the rate on circulars and third-class matter from 1½ cents to 1 cent; and the third proposed to strike out the surcharge on parcel-post matter.

The amendments that have been agreed to, other than the one as to third-class matter, by a majority of the Senate conferees are wholly immaterial. There are but three amendments that are of a material nature. As I have said, one has reference to second-class rates, another to third-class rates, and the third to the surcharge upon parcel-post matter.

The House conferees refused to consider any one of those three amendments. All conferees agreed to the other small amendments, but I could just as cheerfully agree to the House provisions on the same subjects, because they were really immaterial. However, the three amendments to which I have referred are material.

First, let me refer to the amendment in regard to third-class matter. The conference report provides that we shall accept the House amendment which imposes a pound rate on third-class matter. That is for the benefit of the big users of this branch of the mail service, but it affords little relief to the smaller users of third-class matter. It does another thing: Under the law as it now stands, and under the law if this amendment shall be adopted, and the pound rate goes through, Great Britain, Canada, and other foreign countries may send third-class matter through our mails at 1 cent while we will charge our own citizens 1½ cents. I am utterly opposed to this condition of affairs concerning these rates.

Mr. MOSES. The Senator, in all fairness, should say that that is because of the postal conventions, and we can not remedy that by legislation, unless we establish a lower rate.

Mr. McKELLAR. We can not regulate postal conventions by legislation, but we can regulate these rates by law, and that is what we ought to do and what I propose to do. I want to say to the Senate that I think this report ought not to be agreed to for that very reason. We have the remarkable situation of sending enormous quantities of third-class matter of foreign nations through our mails at 1 cent for each 2 ounces, while we charge our own citizens under this proposed law a cent and a half and under the pound rate considerably over a cent. It is indefensible; it ought not to be tolerated for a moment.

I wish to say to my friend from Utah [Mr. KING], who thinks that the revenues of the Post Office Department will be decreased by the proposed reduction, that it will not bring about any such result. When in 1925 we raised the rate on third-class matter from 1 cent to 1½ cents, there were taken out of the mails by this rate some 800,000,000 pieces of third-class matter. Although we had the same overhead and provided for increased clerk hire by the act of 1925, yet there were taken out of our own mails that enormous quantity of mail matter. Therefore the revenue of the Post Office Department was reduced, and I have not the slightest doubt that if we decrease the rate to the same figure that is now charged to foreign countries, the same rate formerly charged, we will increase the postal revenues enormously, because the greater part of the tremendous quantity of mail matter of this class which was lost to the mails will be restored to the mails. So much for that. Therefore I am going to vote against the motion of the Senator from New Hampshire. I did not sign this limited conference report now before the Senate for that reason. I do not think it ought to be adopted, and I hope the Senate will vote it down.

I come next to second-class matter. The rates on second-class matter have been raised to such an extent that, no doubt, perhaps literally hundreds of thousands of tons of mail matter have been kept from the Post Office Department. The increase in the rates has decreased the postal revenues, in my judgment, rather than increased them, and the result of the 1925 act shows that fact, because we have a deficit now. That deficit, however, in my judgment, will be reduced if, with the same overhead, we so arrange the rates that there will result an increased business in this class of matter in our mails.

Every line of proof which has been taken—and we have had a joint commission working on this question for years—goes to show that enormous quantities of second-class matter will be restored to the mails if we restore the 1920 rates. The Senate has gone on record three separate times by an aye-and-no vote in favor of the 1920 rates. It would be better for the Congress to adopt those rates; they would bring more

revenue to the department and at the same time they would be better for the users of the mails throughout the country. I hope, therefore, that the Senate will insist upon its amendment and have this question thus determined.

Now, I come to fourth-class matter. In 1925 we had a so-called surcharge on parcel-post packages, the idea being that as there were about 1,000,000,000 parcel-post packages passing through the mails by the imposition of 2 cents on each parcel we would increase the revenue something like $20,000,000. The result has shown that that expectation of the department has not been realized. The fact is that last year only 742,000,000 packages went through the mails. The anticipated increase did not come. There was some increase, but the increase that it was claimed would follow did not follow. Why? Because it is an unjust and an unscientific method of raising postal revenue. It ought not to have been adopted. We ought to insist upon the Senate amendment to do away with the service charge. As I have said, it is an unscientific charge; it does not bring additional revenue to the Government, and it is a great hardship upon the users of the mails, and especially to the farmers and country people. The truth of the matter is that when we increased the rates in 1925 we did it in a wholly unscientific manner, and it ought never to have been done. I voted against that provision at the time. The revenues have been decreased, in my judgment, instead of being increased by the passage of that measure.

That is all I desire to say, Mr. President. I think I have explained to the Senate exactly what the real issues are. I think this partial report, carrying as it does a rate of a cent and a half on third-class matter for matter sent by Americans through the mail, while it is well understood that foreigners—Canada especially, Great Britain to a large extent, and other foreign users of the mail—pass the same matter through the mail at 1 cent for every 2 ounces, is unfair and unjust to American merchants and to American business. The report ought not to be adopted, and I hope it will not be adopted.

Mr. MOSES. I ask for the adoption of the report.

Mr. BROOKHART. Mr. President, I merely wish to say that I concur in every word the Senator from Tennessee has said. I think we ought to stand for our amendments beyond any question.

Mr. McKELLAR. I ask for the yeas and nays on the adoption of the report. I hope the Senate will vote down this partial conference report, because it contains this provision that gives to foreign governments and foreign users of our mail a rate of one-half cent less than that paid by our own people for 2 ounces of third-class matter.

Mr. NEELY. Mr. President, before the Senator from Tennessee takes his seat, will he yield to me?

Mr. McKELLAR. Yes.

Mr. NEELY. Will the Senator inform us whether the 2-cent charge on parcel-post packages which do not originate on rural routes is still in the bill as it is now before the Senate?

Mr. McKELLAR. That part of it is not before the Senate. The majority of the conferees have not made any report in reference to second-class and fourth-class matter, except that they are in disagreement about it. That is the only report that has been made; and, of course, the rates on those classes of mail are not before the Senate. What is before the Senate is a proposal to tax the American user of the mail 1½ cents for every 2 ounces of third-class matter, as compared with charging Canada and other foreign users of the mail only 1 cent.

Mr. NEELY. Mr. President, if the Senator will yield further, I venture to express the hope that the conferees on the part of the Senate will insist upon the Senate's action in eliminating the 2-cent charge on parcel-post packages.

Mr. GEORGE. Mr. President, may I ask the Senator from Tennessee a question before he takes his seat?

Mr. McKELLAR. Certainly.

Mr. GEORGE. Does the present proposal involve the rates on second-class matter?

Mr. McKELLAR. Not at all, except to report that there is a disagreement between the two Houses.

Mr. GEORGE. I meant this particular matter that we are now about to vote on.

Mr. McKELLAR. It does not affect it. If the Senate votes down the conference report, all that it does is to say that we ought to charge our own users of third-class matter the same as we do the foreign users of third-class matter in our own mails.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. McKELLAR. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. REED of Pennsylvania (when his name was called). I have a general pair with the Senator from Delaware [Mr. BAYARD]. I transfer that pair to the Senator from Massachusetts [Mr. GILLETT] and will vote. I vote "yea."

Mr. SWANSON (when his name was called). I am paired with the senior Senator from Washington [Mr. JONES], who is unavoidably detained from the Senate. If I were at liberty to vote, I should vote "nay."

Mr. BRUCE. Mr. President, I have just come into the Chamber, and I should like to know just what is involved in this proposition. I desire to know, first of all, whether the postal rates are involved in which the business mailing houses of the country are interested?

Mr. SMOOT. I call for the regular order.

Mr. MOSES. Mr. President, a point of order. Debate is out of order.

The VICE PRESIDENT. Debate is out of order under the rule. The Secretary will continue the calling of the roll.

Mr. BROOKHART. Mr. President, there is some confusion about the proposition on which we are voting. I wish we could get a statement——

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. SHIPSTEAD. What is the conference report?

Mr. BROOKHART. Yes; what is the conference report?

Mr. ROBINSON of Arkansas. Mr. President, I make the point of order that it is not in order to interrupt the roll call for discussion.

SEVERAL SENATORS. Regular order!

The VICE PRESIDENT. The regular order is demanded. The Secretary will continue the calling of the roll.

Mr. WALSH of Montana (when his name was called). I have a pair with the Senator from Vermont [Mr. DALE]. In his absence, I withhold my vote.

The roll call was concluded.

Mr. RANSDELL. I have a pair with the junior Senator from Maine [Mr. GOULD]. Therefore I withhold my vote.

Mr. SWANSON. I transfer my pair with the senior Senator from Washington [Mr. JONES] to the junior Senator from Washington [Mr. DILL] and will vote. I vote "nay."

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from New Hampshire [Mr. KEYES] with the Senator from New Jersey [Mr. EDWARDS];

The Senator from New Jersey [Mr. EDGE] with the Senator from New York [Mr. COPELAND]; and

The Senator from Indiana [Mr. WATSON] with the Senator from South Carolina [Mr. SMITH].

Mr. BINGHAM. I have a general pair with the Senator from Wyoming [Mr. KENDRICK]. I do not know how he would vote on this question. I transfer that pair to the junior Senator from Oregon [Mr. STEIWER] and will vote. I vote "yea."

Mr. GERRY. I wish to announce that the Senator from New Jersey [Mr. EDWARDS] is detained from the Senate by illness in his family; that the Senator from Delaware [Mr. BAYARD] is detained by a death in his family, as also is the Senator from Montana [Mr. WHEELER]; and that the Senator from Arizona [Mr. ASHURST], the Senator from Washington [Mr. DILL], and the Senator from Missouri [Mr. HAWES] are absent on official business.

The result was announced—yeas 26, nays 42, as follows:

YEAS—26

Bingham	Goff	Metcalf	Smoot
Borah	Greene	Moses	Tydings
Curtis	Hale	Phipps	Vandenberg
Cutting	Hayden	Reed, Pa.	Warren
Deneen	Howell	Robinson, Ind.	Waterman
Fess	King	Sackett	
Fletcher	McLean	Shortridge	

NAYS—42

Barkley	Gerry	Mayfield	Shipstead
Black	Glass	Neely	Simmons
Blaine	Harris	Nye	Steck
Blease	Harrison	Oddie	Stephens
Bratton	Heflin	Overman	Swanson
Brookhart	Johnson	Pine	Thomas
Broussard	La Follette	Pittman	Tyson
Bruce	Locher	Reed, Mo.	Wagner
Caraway	McKellar	Robinson, Ark.	Walsh, Mass.
Couzens	McMaster	Schall	
George	McNary	Sheppard	

NOT VOTING—26

Ashurst	Dale	Edwards	Gould
Bayard	Dill	Frazier	Hawes
Capper	du Pont	Gillett	Jones
Copeland	Edge	Gooding	Kendrick

Keyes	Ransdell	Trammell	Wheeler
Norbeck	Smith	Walsh, Mont.	
Norris	Steiwer	Watson	

So the conference report was rejected.

Mr. MOSES. I move that the Senate ask the House for a further conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. MOSES, Mr. PHIPPS, and Mr. MCKELLAR conferees on the part of the Senate at the further conference.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a resolution adopted by the executive committee of the American Legion, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

INDIANAPOLIS, IND., *May 18, 1928.*

Hon. CHARLES G. DAWES,

President of United States Senate, Washington, D. C.:

National executive committee of the American Legion to-day adopted the following resolution:

"Whereas the hospital construction bill advocated by the American Legion and presented to the Congress at the last session was passed by the House and in the closing days of the session failed enactment in the Senate because of the filibuster; and

"Whereas during the present session of Congress this hospital-construction program, of vital interest to the disabled veterans of the World War, and providing 4,000 additional beds in new, fireproof sanitary modern hospitals, was passed by the House on April 16 and sent over to the Senate, where it has been before the subcommittee of the Finance Committee in charge of veterans' matters, has not been favorably reported to the Senate; and

"Whereas the indications are that Congress will adjourn very shortly with a great deal of legislation still pending in the Senate: Now, therefore, be it

"*Resolved*, In order to avoid the possibility of this legislation again becoming involved in a Senate filibuster the national executive committee of the American Legion, meeting in Indianapolis this May 17 and 18, having taken cognizance of this situation, requests the Senate Finance Committee and the chairman of the subcommittee, the Hon. DAVID A. REED, to give the hospital construction bill immediate consideration, in order that it might be passed at once and thereby provide these long-needed hospital beds for our disabled comrades; and

"*Provided further*, That a copy of this resolution be telegraphed to the President of the Senate and every member of the Finance Committee at once."

EDWARD E. SPAFFORD,
National Commander the American Legion.

Mr. VANDENBERG presented petitions of sundry citizens of Detroit, Mich., praying for the passage of the so-called Copeland-Wainwright bill, providing proper maintenance for the survivor and dependents of the other men who underwent experiments in connection with the control of yellow fever in 1900, etc., which were ordered to lie on the table.

HON. BURTON K. WHEELER

Mr. MCNARY. I ask unanimous consent to have printed in the RECORD a letter written to W. L. Stockton, president Montana State Farm Bureau, by George N. Peek, chairman administrative committee of the North Central States Agricultural Conference, commending the junior Senator from Montana [Mr. WHEELER] for his excellent service in connection with farm legislation.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NORTH CENTRAL STATES AGRICULTURAL CONFERENCE,
EXECUTIVE COMMITTEE OF 22,
Washington, D. C., May 4, 1928.

W. L. STOCKTON,

President Montana State Farm Bureau, Clarkston, Mont.

DEAR MR. STOCKTON: The farmers of America are now engaged in the most momentous struggle in their history or at least since the war of 1861–1865.

It is the age-old struggle for economic equality. It is the kind of a struggle that makes or breaks political parties. Therefore, the question is bigger than partisan politics. Farmers have followed the practice since 1924 of rewarding their friends in Congress by their support and of defeating their enemies by their opposition, and this regardless of partisan politics.

This is as it should be, so in this connection you must know who are your friends in Congress. Hon. BURTON K. WHEELER, United States Senator from your State, has loyally supported the farmers in their fight and should have farmers' support for reelection.

I have written letters similar to this to farmers in other States on behalf of both Republican and Democratic Members of Congress, so it can not fairly be said that my motives are partisan. If farmers are to secure and retain their proper place in our complicated economic scheme of things, they must place their economic interests above partisanship and stay by their friends.

I am glad to have this opportunity of writing you this letter on behalf of Senator WHEELER, who has been of great assistance in the fight for farm equality, and I will cheerfully answer any questions you may ask, if I can.

Sincerely yours,

GEORGE N. PEEK.

REPORTS OF COMMITTEES

Mr. SHEPPARD, from the Committee on Military Affairs, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 3736) for the relief of soldiers who were discharged from the Army during the World War because of misrepresentation of age (Rept. No. 1212);

A bill (S. 4315) authorizing and directing the Secretary of War to sell 3,304.8 square feet of the Fort Brown Military Reservation, Brownsville, Tex., to the Gateway Bridge Co. (Rept. No. 1213);

A bill (H. R. 1931) for the relief of Daniel Mangan (Rept. No. 1214); and

A bill (H. R. 12624) to amend section 17 of the act of June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended (Rept. No. 1215).

Mr. SHEPPARD also, from the Committee on Commerce, to which was referred the bill (H. R. 13069) granting the consent of Congress to the State of Minnesota to construct, maintain, and operate a free highway bridge across the Mississippi River at or near Aitkin, Minn., reported it without amendment and submitted a report (No. 1244) thereon.

He also, from the same committee, to which was referred the bill (S. 4450) authorizing the Ripley Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ripley, Ohio, reported it with an amendment and submitted a report (No. 1240) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally with amendments and submitted reports thereon:

A bill (S. 4451) to amend the act entitled "An act granting the consent of Congress to Roy Clippinger, Ulys Pyle, Edgar Leathers, Groves K. Flescher, Carmen Flescher, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Wabash River," approved May 1, 1928 (Rept. No. 1241);

A bill (S. 4456) granting the consent of Congress to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across the Santa Rosa Sound in the State of Florida (Rept. No. 1242); and

A bill (S. 4457) authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay, at or near Innerarity Point, in Escambia County, Fla., to the mainland of Baldwin County, Ala. (Rept. No. 1243).

Mr. BLAINE, from the Committee on Military Affairs, to which was referred the bill (H. R. 802) to correct the military record of Curtis P. Wise, reported it without amendment and submitted a report (No. 1216) thereon.

He also, from the Committee on the District of Columbia, to which was referred the bill (H. R. 10869) amending section 764 of Subchapter XII, fraternal beneficial associations, of the Code of Law for the District of Columbia, reported it with an amendment and submitted a report (No. 1230) thereon.

Mr. LOCHER, from the Committee on Military Affairs, to which was referred the bill (S. 2462) to amend the military record of John F. Walker, reported it with amendments and submitted a report (No. 1220) thereon.

He also, from the same committee, to which were referred the following bills, reported adversely thereon:

A bill (H. R. 4654) for the relief of Kennedy F. Foster; and

A bill (H. R. 9002) for the relief of Clarence G. Stonestreet.

Mr. REED of Pennsylvania, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 10649) providing for the transfer of a portion of the military reservation known as Camp Sherman, Ohio, to the Department of Justice (Rept. No. 1221); and

A bill (H. R. 12953) to authorize the Board of Managers of the National Home for Disabled Volunteer Soldiers to accept title to the State camp for veterans at Bath, N. Y. (Rept. No. 1222).

Mr. REED of Pennsylvania also, from the Committee on Military Affairs, to which was referred the bill (S. 4461) to provide for the policing of military roads leading out of the District of Columbia, reported it with an amendment and submitted a report (No. 1245) thereon.

He also, from the same committee, to which was referred the bill (H. R. 8589) for the relief of Thomas F. Nicholas, reported adversely thereon and moved that the bill be indefinitely postponed, which was agreed to.

Mr. McMASTER, from the Committee on Military Affairs, to which was referred the bill (H. R. 7268) for the relief of John Hervey, reported it without amendment and submitted a report (No. 1223) thereon.

He also, from the same committee, to which was referred the bill (H. R. 2296) to amend the military record of Robert Zink, reported adversely thereon and moved that the bill be indefinitely postponed, which was agreed to.

Mr. FLETCHER, from the Committee on Military Affairs, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 2272) for the relief of William Morin (Rept. No. 1224);

A bill (H. R. 13598) for the relief of Robert W. Miller (Rept. No. 1225); and

A bill (S. 3866) authorizing the appointment of H. P. Milligan as a major of Infantry in the Regular Army (Rept. No. 1226).

Mr. FLETCHER also, from the Committee on Commerce, to which was referred the bill (H. R. 13383) to provide for a five-year construction and maintenance program for the United States Bureau of Fisheries, reported it with an amendment and submitted a report (No. 1239) thereon.

Mr. BLACK, from the Committee on Military Affairs, to which was referred the bill (H. R. 4954) for the relief of Thomas Purdell, reported it without amendment and submitted a report (No. 1227) thereon.

He also, from the Committee on Claims, to which was referred the bill (H. R. 12063) for the relief of the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased, reported it without amendment and submitted a report (No. 1234) thereon.

Mr. PHIPPS, from the Committee on Banking and Currency, to which was referred the joint resolution (S. J. Res. 142) authorizing the erection of a Federal reserve bank building in the city of Los Angeles, Calif., reported it without amendment and submitted a report (No. 1228) thereon.

Mr. WAGNER, from the Committee on Military Affairs, to which was referred the bill (H. R. 2472) for the relief of Emile Genireux, reported it without amendment and submitted a report (No. 1229) thereon.

Mr. HOWELL, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 3971) for the relief of the owners of the schooner *William Melbourne* (Rept. No. 1231); and

A bill (H. R. 10014) for the relief of A. F. Gallagher (Rept. No. 1232).

Mr. STEPHENS, from the Committee on Claims, to which was referred the bill (H. R. 9380) for the relief of Frank E. Shults, reported it without amendment and submitted a report (No. 1233) thereon.

Mr. STECK, from the Committee on Military Affairs, to which was referred the bill (S. 4107) for the relief of James Aloysius Manley, reported it without amendment and submitted a report (No. 1235) thereon.

Mr. STEIWER, from the Committee on Claims, to which was referred the bill (S. 2989) for the relief of John B. Moss, reported it with an amendment and submitted a report (No. 1236) thereon.

Mr. BROOKHART, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 7708) for the relief of John M. Brown (Rept. No. 1237); and

A bill (H. R. 8742) to authorize the Secretary of War to convey to the city of Baton Rouge, La., a portion of the Baton Rouge National Cemetery for use as a public street (Rept. No. 1238).

MARKER FOR REVOLUTIONARY SOLDIERS BURIED AT LITITZ, PA.

Mr. REED of Pennsylvania. From the Committee on Military Affairs I report back favorably, by unanimous vote, House bill 8546, authorizing the erection of a marker at a cost of $2,500 at Lititz, Pa., to commemorate the burial place of 110 soldiers of the Revolution who were buried at that place. They were injured at the Battle of Brandywine.

As it is desired to have action upon the matter immediately, I ask unanimous consent for the immediate consideration of the bill.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 8546) authorizing an appropriation of $2,500 for the erection of a tablet or marker at Lititz, Pa., to commemorate the burial place of 110 American soldiers who were wounded in the Battle of Brandywine and died in the military hospital at Lititz, which was read, as follows:

Be it enacted, etc., That the sum of $2,500, or so much thereof as may be necessary, is hereby authorized to be appropriated, to be expended under the direction of the Secretary of War, in the erection of an appropriate tablet or marker at or near the spot in or near the borough of Lititz, in Pennsylvania, where 110 American soldiers of the Revolution, who were wounded in the Battle of Brandywine and were cared for in the military hospital at Lititz, lied buried: *Provided*, That the site on which the proposed tablet or marker is to be erected shall be acquired by the borough of Lititz.

SEC. 2. The design of said marker or tablet shall be the work of an artist who is a citizen of the United States.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ADMISSIONS OF FOREIGN NATIONALS TO WEST POINT

Mr. REED of Pennsylvania. From the Committee on Military Affairs, I report back three joint resolutions authorizing the acceptance at West Point of certain young men from China, Siam, and Venezuela. They are in the usual form, and I ask for their immediate consideration, because it is necessary to take these young men in this month.

Mr. ROBINSON of Arkansas. How many are to be admitted?

Mr. REED of Pennsylvania. We have had seven Chinese so far. These joint resolutions authorize the admission of two Chinese, two Siamese, and one Venezuelan.

Mr. ROBINSON of Arkansas. That is in accordance with an international arrangement?

Mr. REED of Pennsylvania. Exactly.

The Senate, as in Committee of the Whole, proceeded to consider the joint resolution (S. J. Res. 155) authorizing the Secretary of War to receive for instruction at the United States Military Academy at West Point, Jose J. Jimenez, a citizen of Venezuela, which was read, as follows:

Resolved, etc., That the Secretary of War be, and he hereby is, authorized to permit Jose J. Jimenez to receive instruction at the United States Military Academy at West Point: *Provided*, That no expense shall be caused to the United States thereby, and that Jose J. Jimenez shall agree to comply with all regulations for the police and discipline of the academy, to be studious, and to give his utmost efforts to accomplish the courses in the various departments of instruction, and that said Jose J. Jimenez shall not be admitted to the academy until he shall have passed the mental and physical examinations prescribed for candidates from the United States, and that he shall be immediately withdrawn if deficient in studies or in conduct and so recommended by the academic board: *Provided further*, That in the case of said Jose J. Jimenez the provisions of sections 1320 and 1321 of the Revised Statutes shall be suspended.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. J. Res. 40) (Rept. No. 1219) authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Siamese subjects to be designated hereafter by the Government of Siam, which was read, as follows:

Resolved, etc., That the Secretary of War be, and he is hereby, authorized to permit two Siamese subjects, to be designated hereafter by the Government of Siam, to receive instruction at the United States Military Academy at West Point: *Provided*, That no expense shall be caused to the United States thereby, and that the said Siamese subjects shall agree to comply with all regulations for the police and discipline of the academy, to be studious, and to give their utmost efforts to accomplish the courses in the various departments of instruction, and that the said Siamese subjects shall not be admitted to the academy until they shall have passed the mental and physical examinations prescribed for candidates from the United States, and that they shall be immediately withdrawn if deficient in studies or in conduct and so recommended by the academic board: *And provided further*, That in the case of the said Siamese subjects the provisions of sections 1320 and 1321 of the Revised Statutes shall be suspended.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. J. Res. 39, Rept. No. 1218) authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Chinese subjects, to be designated hereafter by the Government of China, which was read, as follows:

Resolved, etc., That the Secretary of War be, and he is hereby, authorized to permit two Chinese subjects, to be designated hereafter by the Government of China, to receive instruction at the United States Military Academy at West Point: *Provided*, That no expense shall be caused to the United States thereby, and that the said Chinese subjects shall agree to comply with all regulations for the police and discipline of the academy, to be studious, and to give their utmost efforts to accomplish the courses in the various departments of instruction, and that the said Chinese subjects shall not be admitted to the academy until they shall have passed the mental and physical examinations prescribed for candidates from the United States, and that they shall be immediately withdrawn if deficient in studies or in conduct and so recommended by the academic board: *And provided further*, That in the case of the said Chinese subjects the provisions of sections 1320 and 1321 of the Revised Statutes shall be suspended.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NEW ORLEANS QUARTERMASTER INTERMEDIATE DEPOT UNIT NO. 2

Mr. BLACK. Mr. President, I report back from the Committee on Military Affairs Senate Joint Resolution 120, which provides for the lease by the Government of certain property in New Orleans to the New Orleans Association of Commerce for the purpose of having an international trade exhibition in this building, and I submit a report (Rept. No. 1217) thereon. This is reported favorably and urged by the War Department, and it is a unanimous report from the committee. I ask for its immediate consideration.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (S. J. Res. 120) authorizing the Secretary of War to lease to the New Orleans Association of Commerce New Orleans quartermaster intermediate depot unit No. 2, which was read, as follows:

Resolved, etc., That the Secretary of War is authorized to lease for a period of three years, to run from September 16, 1927, without consideration or on such terms or conditions as he deems it advisable, to the New Orleans Association of Commerce (a nonprofit corporation organized under the laws of Louisiana), its successors and assigns, the New Orleans quartermaster intermediate depot unit No. 2 for general exhibition purposes in respect of fabricated and raw products of the United States and similar products of foreign countries; but if such corporation, its successors or assigns, shall cease to use and occupy the depot for such purposes the lease shall become null and void: *Provided*, That the United States may void the lease any time within the lease period by giving 30 days' notice to the lessees.

SEC. 2. That the New Orleans Association of Commerce, under regulations prescribed by the Secretary of War, may, without expense to the United States, make such alterations in respect to such depot as may be necessary for the purposes for which the building is leased and in so far as may be compatible with the public interest.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PRIMARY CAMPAIGN IN NEW JERSEY

Mr. CARAWAY. Mr. President, I have a letter from former Senator Frelinghuysen, of New Jersey, setting forth his reply to a letter that was written to him by former Governor Stokes. He thought possibly the statement made did not quite do him justice, and I ask to have the letter printed in the RECORD.

The VICE PRESIDENT. Is there objection?

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NEW YORK, *May 18, 1928.*

Hon. T. H. CARAWAY,
United States Senate, Washington, D. C.

MY DEAR SENATOR CARAWAY: I notice a statement attributed to you as being made from the floor of the Senate in regard to the expenditures made in the United States senatorial contest in New Jersey.

Referring to Ex-Governor Stokes's letter to the other candidates, you said: "The other candidates did not see fit to answer him, and I think a Senate inquiry pertinent."

Immediately upon receipt of Governor Stokes's letter I sent the following addressed to him:

"I am in receipt of your personal letter to me of May 9, in which you inclose a copy of your open letter to Mr. Hamilton F. Kean regarding a public accounting of campaign expenses.

"While your open letter is not addressed to me, I am happy to take advantage of the opportunity you have thus afforded to say publicly that I am heartily in favor of all the candidates for nomination or election opening their books for inspection by anyone at any time, showing all contributions received and pledged and all expenditures made. For myself, you know that I did not announce my candidacy for nomination for United States Senator until December 5 last. I did not spend a dollar in aid of my candidacy before that date. Since that date I have spent less than the statute permits. I have not spent a dollar for any illegal purpose.

"I have not bought the support of a single individual nor of any organization. I am perfectly willing to open my books for inspection, and they will show that whatever money I have spent has been for the absolutely necessary expenses of a political campaign, such as the maintenance of headquarters, printing, advertising, and reasonable compensation for my workers.

"Permit me to say that should the Republicans of this State favor me with the nomination, I can accept it with a clear conscience and with the knowledge that it was a gift of the people and not a purchase by

"Yours very truly."

In order to straighten the record, particularly with you, my old friend, I am sending you this copy.

Sincerely yours,

J. S. FRELINGHUYSEN.

REPORTS OF THE COMMITTEE TO AUDIT AND CONTROL, ETC.

Mr. DENEEN. I ask unanimous consent to submit four reports from the Committee to Audit and Control the Contingent Expenses of the Senate, and I ask unanimous consent for their immediate consideration.

The PRESIDENT pro tempore. Without objection, the reports will be received. Is there objection to their present consideration?

SEVERAL SENATORS. Let them be read.

Mr. SMOOT. I shall not object, provided the resolutions do not lead to debate.

Mr. DENEEN. They will lead to no debate.

CONTROL OF AIRCRAFT FOR SEACOAST DEFENSE

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred the concurrent resolution (S. Con. Res. 11), submitted by Mr. BINGHAM February 23, 1928, reported it with an amendment striking out the preamble, and it was considered by unanimous consent and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That a joint committee of Congress, to consist of five Senators, to be appointed by the President of the Senate, and five Members of the House of Representatives, to be appointed by the Speaker of the House of Representatives, is authorized and directed to make a full investigation of the problem of the control of aircraft for seacoast defense, and to recommend to Congress as soon as practicable such legislation concerning aerial coast defense as it shall deem necessary or proper.

For the purpose of this resolution such committee is authorized to hold hearings, to sit and act at such times and places, to employ such experts and clerical, stenographic, and other assistance, to require by subpœna or otherwise the attendance of such witnesses, and the production of such books, papers, and documents, to administer such oaths, and to take such testimony and make such expenditures as it deems advisable. The expenses of the committee, which shall not exceed $2,000, shall be paid one-half from the contingent fund of the Senate and one-half from the contingent fund of the House of Representatives.

The preamble was stricken out.

INVESTIGATION RELATIVE TO UNEMPLOYMENT

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred the resolution (S. Res. 219) submitted by Mr. LA FOLLETTE May 2, 1928, reported it without further amendment, and, by unanimous consent, the Senate proceeded to its consideration.

The amendments of the Commitee on Education and Labor, to which the resolution had been previously referred, were, on page 1, line 4, after the word "concerning," to insert "the causes of unemployment and the relation to its relief of"; on page 2, line 4, after the word "private" and the semicolon, to insert "(d) curtailed production, consolidation, and economic reconstruction;"; at the end of line 5 to strike out "(d)" and insert "(e)"; in line 7, after the word "and," to strike out "(e)" and insert "(f)"; in line 9, after the word "and," to strike out "(d)" and insert "(e)"; in line 20, after the word "of," to insert "$15,000"; and in line 25, after the word "advisable," to strike out "at the beginning of the second regular session of the Seventieth Congress" and insert "on or before February 15, 1929," so as to make the resolution read:

Whereas many investigations of unemployment have been made during recent years by public and private agencies; and

Whereas many systems for the prevention and relief of unemployment have been established in foreign countries, and a few in this country; and

Whereas information regarding the results of these systems of unemployment, prevention, and relief is now available; and

Whereas it is desirable that these investigations and systems be analyzed and appraised and made available to the Congress: Therefore be it

Resolved, That the Committee on Education and Labor of the Senate, or a duly authorized subcommittee thereof, is authorized and directed to make an investigation concerning the causes of unemployment and the relation to its relief of (a) the continuous collection and interpretation of adequate statistics of employment and unemployment; (b) the organization and extension of systems of public employment agencies, Federal and State; (c) the establishment of systems of unemployment insurance or other unemployment reserve funds, Federal, State, or private; (d) curtailed production, consolidation, and economic reconstruction; (e) the planning of public works with regard to stabilization of employment; and (f) the feasibility of cooperation between Federal, State, and private agencies with reference to (a), (b), (c), and (e). For the purposes of this resolution such committee or subcommittee is authorized to hold hearings and to sit and act at such times and places; to employ such experts and clerical, stenographic, and other assistants; to require, by subpœna or otherwise, the attendance of such witnesses and the production of such books, papers, and documents; to administer such oaths and to take such testimony and make such expenditures as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of such committee, which shall not be in excess of $15,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman. The commitee or subcommittee shall make a final report to the Senate as to its findings, together with such recommendations for legislation as it deems advisable, on or before February 15, 1929.

The amendments were agreed to.

The resolution as amended was agreed to.

The preamble was agreed to.

FEDERAL OFFICES IN GEORGIA

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred the resolution (S. Res. 193) submitted by Mr. GEORGE and Mr. HARRIS on April 9, 1928, reported it with an additional amendment.

The first amendment of the Committee on Post Offices and Post Roads, to which the resolution had been previously referred, was, on page 1, after the word "*Resolved*," to strike out "That a special committee of three Senators to be appointed by the President of the Senate is authorized and directed (1) to make a full and complete investigation of the barter of Federal offices in the State of Georgia, and particularly the facts with respect to any payment of money or anything of value, or promise to pay money or anything of value, before, upon, or after the appointment, to party officials or organizations or their agents or representatives, for the purpose of influencing appointments to such offices, and (2) to report thereon to the Senate as soon as practicable, with such recommendations for necessary legislation as it deems advisable" and to insert:

That the Committee on Post Offices and Post Roads, or a subcommittee thereof to be appointed by the chairman, is authorized and directed to make a full and complete investigation of the circumstances surrounding the choice of postmasters in presidential offices and carriers, particularly with respect to any payment of money or anything of value, or promise to pay money or anything of value, before, upon, or after such appointment, to party officials or organizations or their agents or representatives, for the purpose of influencing appointments to such offices or of influencing the retention of appointees to such offices, and to report thereon to the Senate as soon as practicable with such recommendations for necessary legislation as may be deemed advisable.

The amendment was agreed to.

The next amendment was, on page 2, line 18, after the words "per hundred words," to strike out "the expenses of such committee, which shall not exceed $——, shall be paid from the contingent fund of the Senate."

The amendment was agreed to.

The next amendment was, on page 2, at the end of line 20, to insert "The cost of conducting this investigation shall be paid from the contingent fund of the Senate upon proper vouchers of the chairman of the Committee on Post Offices and Post Roads, or of such subcommittee as may be named under the provisions of this resolution," to which the Committee to Audit and Control the Contingent Expenses of the Senate proposed an amendment, to insert, after the word "investigation," the words "shall not exceed $5,000 and."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The resolution as amended was agreed to, as follows:

Resolved, That the Committee on Post Offices and Post Roads, or a subcommittee thereof to be appointed by the chairman, is authorized and directed to make a full and complete investigation of the circumstances surrounding the choice of postmasters in presidential offices and carriers, particularly with respect to any payment of money or anything of value, or promise to pay money or anything of value, before, upon, or after such appointment, to party officials or organizations or their agents or representatives, for the purpose of influencing appointments to such offices or of influencing the retention of appointees to such offices, and to report thereon to the Senate as soon as practicable with such recommendations for necessary legislation as may be deemed advisable. For the purposes of this resolution such committee is authorized to hold hearings, to sit and act at such times and places, to employ such experts and clerical, stenographic, and other assistance, to require by subpœna or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony and make such expenditures as it deems advisable. The cost of stenographic service to report such hearings shall not be in excess of 25 cents per hundred words. The cost of conducting this investigation shall not exceed $5,000 and shall be paid from the contingent fund of the Senate upon proper vouchers of the chairman of the Committee on Post Offices and Post Roads, or of such subcommittee as may be named under the provisions of this resolution.

APPOINTMENTS AND DISMISSALS IN THE CIVIL SERVICE

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred the resolution (S. Res. 154) submitted by Mr. HEFLIN on February 20, 1928, reported it with amendments, which were, on page 3, line 7, after the word "advisable," to strike out "The cost of stenographic service to report such hearings shall not be in excess of 25 cents per hundred words"; and in line 9, after the dollar mark, to insert "2,500," so as to make the resolution read:

Whereas William C. Deming, president of the Civil Service Commission, admitted in an article published in the Washington Post of March 6, 1927, that the Civil Service Commission had appointed in excess of quotas over 10,000 persons from the District of Columbia, Maryland, Virginia, and other States; and

Whereas many legally appointed civil-service employees from States whose quotas are in arrears, and many ex-service men and women, have been illegally separated from the service, and much suffering and hardship caused thereby, terminating in some cases in commitments to St. Elizabeths Hospital and in other cases in suicide; and

Whereas the morale and efficiency of many of the executive departments and independent establishments of the Government have been completely broken down by the injustice, discrimination, intimidation, and illegal dismissals in the civil service and much loss to the Government caused by the resulting maladministration of the laws: Therefore be it

Resolved, That there is hereby created a special committee of the Senate, to consist of five Members appointed by the President of the Senate, three of whom shall be from the majority party (including one progressive Republican) and two of whom shall be from the minority party. The committee is authorized and directed to investigate illegal appointments and dismissals in the civil service since July 1, 1919. The committee shall meet and organize within five days from the date of appointment, and immediately thereafter shall begin hearings upon this resolution. Within 60 days after the adoption of this resolution the committee shall report to the Senate concerning such illegal appointments and dismissals in the civil service, and shall include in its report such recommendation for legislation and suggested action for the removal from office of any parties to such illegality as it deems advisable to correct abuses in appointments and dismissals in the civil service.

For the purposes of this resolution the committee is authorized to hold such hearings, to sit and act at such times and places, to employ such experts and clerical, stenographic, and other assistants, to require by subpœna or otherwise the attendance of such witnesses and the production of such books, papers, and documents, including the records of the Civil Service Commission, the Bureau of the Budget, the Bureau of Efficiency, the Personnel Classification Board, and the several executive departments and independent establishments, to administer such oaths and to take such testimony and to make such expenditures as it deems advisable. The expenses of the committee shall not exceed $2,500, and shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

The amendments were agreed to.

The resolution as amended was agreed to.

The preamble was agreed to.

INVESTIGATION RELATIVE TO NATIONAL PARKS

Mr. NYE, from the Committee on Public Lands and Surveys, reported a resolution (S. Res. 237), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate, as follows:

Resolved, That the Committee on Public Lands and Surveys, or any subcommittee thereof, be, and it is hereby, authorized and directed to investigate the advisability of establishing certain additional national parks and the proposed changes in, and boundary revisions of, certain other national parks. For the purpose of carrying out the provisions of this resolution, such committee or subcommittee is hereby authorized to sit, act, and perform its duties at such times and places as it deems necessary or proper; to require, by subpœna or otherwise, the attendance of witnesses; to require the production of books, papers, documents, and other evidence; and to administer such oaths and to take such testimony and make such expenditures as it deems advisable. The cost of stenographic service to report such hearings shall not exceed 25 cents per 100 words. The expenses of such committee or subcommittee, which shall not exceed the sum of $3,500, shall be paid from the contingent fund of the Senate. The committee or subcommittee shall make a report as to its findings at the second regular session of the Seventieth Congress, together with recommendations for such legislation as it deems necessary.

LANDS WITHIN THE RAINY LAKE WATERSHED, MINN.

Mr. McNARY, from the Committee on Agriculture and Forestry, reported a resolution (S. Res. 239), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate, as follows:

Whereas on April 4, 1928, there was introduced in the Senate a bill (S. 3913) to promote the better protection and highest public use of lands of the United States and adjacent lands and waters in northern Minnesota for the production of forest products, and for other purposes; and

Whereas the preamble to said bill emphasizes the importance of protecting and conserving the area covered by the Rainy Lake watershed, lying in Ontario and Minnesota, and the adjacent lands and waters, out of international, historic, recreational, scenic, and economic and esthetic considerations; and

Whereas said bill contemplates the development of a uniform plan of treatment and protection for this entire region; and

Whereas said bill provides for the withdrawal from entry or appropriation of certain public lands of the United States situate in such region and for the conservation and protection of the natural features of such region in an unmodified state: Therefore be it

Resolved, That the Committee on Agriculture and Forestry, or any duly authorized subcommittee thereof, is authorized to investigate the matters recited in the preamble to Senate bill 3913 and consider the protective measures proposed to be adopted by said bill, with a view to determining the advisability and practicability of carrying out the principles therein set forth or determining what other plan for the development and protection of the region therein specified may be adopted, and to report thereon to the Senate as soon as practicable, with such recommendations for legislation as it deems advisable. For the purposes of this resolution such committee or subcommittee is authorized to hold hearings, to sit and act at such times and places in the United States and Canada, to employ such experts and clerical, stenographic, and other assistance, to require, by subpœna or otherwise, the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony and make such expenditures as it deems advisable. The cost of such stenographic service to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of such committee or subcommittee, which shall not be in excess of $——, shall be paid from the contingent fund of the Senate.

ENROLLED BILLS PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that that committee presented to the President of the United States the following enrolled bills:

On May 18, 1928:

S. 2463. An act to amend an act entitled "An act for the purchase of a tract of land adjoining the United States target range at Auburn, Me.," approved May 19, 1926.

On May 19, 1928:

S. 2148. An act to fix standards for hampers, round stave baskets, and splint baskets for fruits and vegetables, and for other purposes; and

S. 3057. An act authorizing the Secretary of War to transfer and convey to the Portland Water District, a municipal corporation, the water pipe line, including the submarine water main connecting Fort McKinley, Me., with the water system of the Portland Water District, and for other purposes.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. THOMAS:

A bill (S. 4502) granting a pension to Coral Mahr; to the Committee on Pensions.

By Mr. BINGHAM:

A bill (S. 4503) authorizing the Secretary of War to convey the Fort Griswold tract to the State of Connecticut; to the Committee on Military Affairs.

By Mr. CARAWAY:

A bill (S. 4504) granting the consent of Congress to the State of Arkansas, through its State highway department, to construct, maintain, and operate a toll bridge across White River at or near Augusta, Ark.; to the Committee on Commerce.

By Mr. BROOKHART:

A bill (S. 4505) to incorporate the Army and Navy Union of the United States of America; to the Committee on the Judiciary.

By Mr. WALSH of Massachusetts:

A bill (S. 4506) to reimburse the Commonwealth of Massachusetts for expenses incurred in compliance with the request of the United States marshal, dated December 6, 1917, to the Governor of Massachusetts, in furnishing the State military forces for duty on and around Boston Harbor under regulation 13 of the President's proclamation; and

A bill (S. 4507) to reimburse the Commonwealth of Massachusetts for expenses incurred in protecting bridges on main railroad lines and under direction of the commanding general Eastern Department, United States Army, and the commandant navy yard, Charlestown, Mass.; to the Committee on Claims.

By Mr. McKELLAR:

A bill (S. 4508) for the relief of Edgar C. Campbell; to the Committee on Military Affairs.

By Mr. REED of Pennsylvania:

A bill (S. 4509) to authorize the Secretary of War to sell to the Fishers Island Corporation a tract of land comprising part of the Fort H. G. Wright Military Reservation, N. Y.; to the Committee on Military Affairs.

By Mr. SACKETT:

A bill (S. 4510) granting an increase of pension to Angelina Naper (with accompanying papers); to the Committee on Pensions.

By Mr. McNARY:

A bill (S. 4511) granting a pension to Henry E. Heppner; and

A bill (S. 4512) granting a pension to Henry Grant Guild; to the Committee on Pensions.

By Mr. ROBINSON of Indiana:

A joint resolution (S. J. Res. 157) providing for the observance and commemoration of the one hundred and fiftieth anniversary of the death of Brig. Gen. Casimir Pulaski and establishing a commission to be known as the United States Pulaski sesquicentennial commission; to the Committee on the Library.

AMENDMENTS TO TAX REDUCTION BILL

Mr. HOWELL submitted two amendments intended to be proposed by him to House bill 1, the tax reduction bill, which were ordered to lie on the table and to be printed.

AMENDMENT TO BOULDER DAM BILL

Mr. PHIPPS submitted an amendment intended to be proposed by him to the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, which was ordered to lie on the table and to be printed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the bill (S. 4401) authorizing Elmer J. Cook, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Bear Creek at or near Lovel Point, Baltimore County, Md., with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

AMENDMENTS TO THE DEFICIENCY APPROPRIATION BILL

Mr. CURTIS submitted amendments intended to be proposed by him to House bill 13873, the second deficiency appropriation bill, which were referred to the Committee on Appropriations and ordered to be printed, as follows:

At the proper places in the bill to insert the following:

"TABLET AT MEDICINE LODGE, KANS.

"For the erection of a tablet or marker at Medicine Lodge, Kans.; to commemorate the holding of the Indian peace council at which treaties were made by the United States and the Kiowa, Comanche, Apache, Cheyenne, and Arapahoe Indians in October, 1867, $2,500.

"To enable the General Accounting Office to furnish such data, reports, etc., as may be required by the Committee on Indian Affairs of the Senate in accomplishing the survey and investigation authorized and directed by Senate Resolution 79, Seventieth Congress, first session, to remain available until expended, which shall be available for the employment in the District of Columbia and elsewhere of the necessary personnel without regard to civil service laws and regulations, $45,000."

"Construction of sewage-disposal system, Haskell Institute, Lawrence, Kans.: For the construction of an adequate septic sewage-disposal system at Haskell Institute, Lawrence, Kans., $18,000, to remain available until June 30, 1929."

"Replacement of buildings, material, and equipment destroyed and repairing damages caused by fire, Haskell Institute, Lawrence, Kans.: For the replacement of buildings, material, and equipment, and for necessary repairs to adjoining buildings and light poles destroyed and damaged by fire at Haskell Institute, Lawrence, Kans., on March 27, 1928, $8,000, to remain available until June 30, 1929."

Mr. BRATTON submitted an amendment proposing to appropriate $70,000 for payment of damages sustained by reason of the overflow of the Rio Grande River at or in the vicinity of Hatch and Santa Teresa, N. Mex., etc., intended to be proposed by him to House bill 13873, the second deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BINGHAM submitted an amendment proposing to appropriate $31,870, to remain available until June 30, 1929, for an additional amount for the payment of traveling expenses of diplomatic, consular, and Foreign Service officers incurred in connection with leaves of absence, intended to be proposed by him to House bill 13873, the second deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing that for carrying out the purpose and provisions of Title III, construction loan fund, section 302, merchant marine act, 1928, the United States Shipping Board be authorized to incur obligations by entering into contracts to make loans from the construction loan fund to the extent of $125,000,000, in addition to the amount now standing to the credit of that fund, etc., intended to be proposed by him to House bill 13873, the second deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

BRIDGE ACROSS BEAR CREEK, BALTIMORE COUNTY, MD.

Mr. TYDINGS. Senate bill 4401 is now on the desk, with a small amendment made to it in the House. It is a bridge bill and the amendment is only a verbal correction, inserting a plural for the singular. I ask that it be laid before the Senate.

The PRESIDING OFFICER (Mr. JOHNSON in the chair) laid before the Senate the amendment of the House of Representatives to the bill (S. 4401) authorizing Elmer J. Cook, his heirs, legal representatives, and assigns to construct, maintain, and operate a bridge across Bear Creek at or near Lovel Point, Baltimore County, Md., which was, on page 2, line 25, to strike out the word "interest" and insert "interests."

Mr. TYDINGS. I move that the Senate agree to the amendment of the House.

The motion was agreed to.

RESERVE OFFICERS' DIVISION OF THE WAR DEPARTMENT

Mr. REED of Pennsylvania. Mr. President, I send to the desk a letter signed by Gen. Roy Hoffman and Gen. G. A. Fraser, representing, respectively, the Reserve Officers' Association and the National Guard Association of the United States. These gentlemen have come to an agreement on their difficulties regarding the bill to create a Reserve Division in the War Department. I think it is important that the fine position they have both taken should be known to the country. Therefore, I ask that their letter and a proposed amendment be printed in full in the RECORD, and I ask also that the proposed amendment may be printed and lie upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GEORGE. May I inquire of the Senator the nature of the amendment?

Mr. REED of Pennsylvania. The amendment they have agreed upon removes from the jurisdiction of the Reserve Division the Reserve Officers' Training Corps and the Citizens' Military Training Corps.

Mr. GEORGE. I think that will remove all obstacles to the bill.

Mr. REED of Pennsylvania. They have agreed upon approving the passage of the bill with that amendment.

Mr. FLETCHER. What about the National Guard?

Mr. REED of Pennsylvania. The letter is signed jointly by General Hoffman, president of the Reserve Officers' Association of the United States and General Fraser, president of the National Guard Association of the United States.

The letter and proposed amendment are as follows:

WASHINGTON, D. C., *May 19, 1928.*

Senator DAVID A. REED,
Chairman Senate Military Affairs Committee,
United States Senate, Washington, D. C.

DEAR SIR: At a meeting of the National Guard Association of the United States, held in this city during the past two days, bill No. S. 3458, introduced by you, was carefully studied and considered, it being the understanding that you and other Members of Congress desired to know whether or not the National Guard and reserve officers could agree upon the provisions of this legislation.

It was found that certain features of the bill were not satisfactory to the National Guard Association and after a conference over this bill with representatives of the Reserve Officers' Association, both groups have agreed to recommend, and hereby do recommend to Congress the attached bill, in the draft of which the wording of bill No. S. 3458 has been followed, except that the changes which both associations have agreed upon have been made.

We jointly recommend the passage of the attached bill at the present session of Congress.

ROY HOFFMAN,
Brigadier General, Infantry Reserves,
President Reserve Officers' Association of the United States.
G. A. FRASER,
Brigadier General The Adjutant General's Department,
President National Guard Association of the United States.

Amendment intended to be proposed by Mr. REED of Pennsylvania to the bill (S. 3458) to create the reserve division of the War Department, and for other purposes, viz:

Strike out all after the enacting clause and insert: "That the act entitled 'An act for making further and more effectual provision for the national defense, and for other purposes,' approved June 3, 1916, as amended, be, and the same is hereby, further amended by inserting after section 38 a new section, as follows:

"SEC. 39. The reserve officers' division of the War Department: There is hereby created the reserve officers' division of the War Department. This division shall consist of one chief of the reserve officers' division, with the rank of major general, appointed from officers of the Regular Army in accordance with section 4c of this act, and such other officers as may be assigned to duty in the reserve officers' division by the Secretary of War: *Provided*, That three of the officers so assigned shall be members of the Officers' Reserve Corps.

"The duties to be performed by the reserve officers' division shall consist exclusively in the general supervision, under the Chief of Staff, of the administration and development of the Officers' Reserve Corps, under such regulations as may be prescribed by the Secretary of War, but shall not include such supervision over reserve officers who are federally recognized National Guard officers; in the performance of these duties the existing bureaus, departments, and agencies of the War Department shall be utilized as far as practicable. In coordination with the General Staff, the chief of the reserve officers' division shall be consulted regarding, and kept informed and advised of, all existing and proposed policies, regulations, plans, and orders affecting the Officers' Reserve Corps, and he will make directly to the Chief of Staff recommendations pertaining thereto. He shall maintain contact with the Officers' Reserve Corps, exclusive of reserve officers who are federally recognized National Guard officers, and through inspections in person or by representatives shall keep the Chief of Staff informed of their state of efficiency and measures necessary for their proper development.

"The reserve officers on duty in the reserve officers' division shall be called to active duty, with their own consent, for this purpose, and while so serving shall receive the active-duty pay and allowances of their

grades as prescribed in the pay readjustment act of June 10, 1922. Appropriations are hereby authorized to be made annually for the contingent and operating expenses of the reserve officers' division.

"The Secretary of War is authorized to transfer or assign to the reserve officers' division such clerical personnel as in his judgment may be necessary."

SEC. 2. That all laws and parts of laws inconsistent with this act are hereby repealed.

MILDRED G. SMITH AND MILDRED N. LOCKETT

Mr. BROOKHART submitted the following resolution (S. Res. 238), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the appropriation for miscellaneous items, fiscal year 1927, contingent fund of the Senate, to Mildred G. Smith and Mildred N. Lockett, daughter and granddaughter, respectively, of James A. Crystal, late a messenger in the employ of the Senate under direction of the Sergeant at Arms, a sum equal to one year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

ALASKA RAILROAD

Mr. DILL. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Seward Gateway, of Seward, Alaska, of May 2, 1928, written by John E. Ballaine, of Seattle, concerning the resources of Alaska. This article was inspired largely by the statement made by the junior Senator from Nebraska [Mr. HOWELL] when the Interior Department appropriation bill was before the Senate, when he attempted to amend it regarding the Alaska Railroad; and also by an article by Gen. W. P. Richardson, which appeared in the Atlantic Monthly for January, 1928.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

ALASKA: ALASKA'S RESOURCES AND THE ALASKA RAILROAD—A REPLY—A CORRECT AND VIGOROUS OUTLINE OF REAL CONDITIONS PRESENTED BY JOHN E. BALLAINE IN REFUTATION OF THE DAMAGING MISREPRESENTATIONS BY GENERAL RICHARDSON IN THE ATLANTIC MONTHLY—PROOF THAT THE ATLANTIC MONTHLY ENGAGED IN A CONSPIRACY OF WILLFUL AND UNPATRIOTIC MISCHIEF

[EDITORIAL NOTE.—The Atlantic Monthly of Boston carried a grossly unfair and libelous contribution on Alaska and Alaska's resources from Gen. W. P. Richardson in its number for January, 1928, and has declined to publish statements of any kind from any source to repair the great and undeserved damage caused by the Richardson article. It thereby proves its part in an unworthy conspiracy. The following article by John E. Ballaine truthfully and forcefully presents the plain facts about Alaska, Alaska's resources, and the Alaska Railroad. It is being published in many of the newspapers of the United States, as well as in the CONGRESSIONAL RECORD. Mr. Ballaine, is widely known as the best informed man on every phase of Alaskan resources and possibilities, and his statements in the following article are known to every resident of central Alaska to be scrupulously fair, truthful, and accurate.]

By John E. Ballaine

Whether Gen. W. P. Richardson's article in the Atlantic Monthly for January, 1928, on Alaska and its resources and possibilities, was intended to be friendly or inimical, it certainly has produced the results of very real and undeserved damage to Alaska and injury to the national interests in Alaska proportionate to the nation-wide circulation and influence of the Atlantic Monthly.

It has been used by large numbers of newspapers and by Senators and Representatives in Congress as a barrage against the Government's efforts to open Alaska to settlement and development, particularly the Government's policy in building and operating the Alaska Railroad from Seward to Fairbanks, a distance of 467 miles, as a means to that end. That general barrage, as if prearranged, was followed by determined attacks on the floor of the House and Senate at Washington against further appropriations for the upkeep and operation of the Alaska Railroad.

Without exception, all of those unfriendly critics of Alaska interpreted General Richardson's contribution to mean that the resources of Alaska do not, never did, and never will justify the building of the Alaska Railroad as a Government project, and that wagon roads would serve all of Alaska's needs for all future time.

The Richardson article is damaging more for its omissions than for its statements of facts. It discusses a few of Alaska's minor and inconsequential resources, such as placer gold, and none of its fundamental resources of large range and scope and of lasting importance, on which its future population will be supported, such as agriculture, horticulture, timber, and coal and other minerals. It draws comparisons with a small section of northwestern Europe, not more than one-quarter the area of Alaska, rather than with all of the countries of northwestern Europe, which together contain the same combined area of Alaska, 565,000 square miles, in the same latitudes, under identical conditions of climate, where 27,500,000 of the world's hardiest and most progressive people dwell in comfort and a high degree of civilization—Norway, Sweden, Finland, the Baltic Provinces of the former Russian Empire, Denmark, Scotland, and the northern tier of counties in England.

To get the full force and effect of such methods, we need only go back 250 years or so to the early colonial days in America and read from English magazines of the seventeenth century the numerous contributions by officers of the British Army and others returning to England from the colonies about the inhabitable wastes of New England and the regions now embraced in New York, Pennsylvania, Ohio, Indiana, Wisconsin, Illinois, and Minnesota. Seeing no placer gold or other precious metals, but overlooking the vast areas of agricultural lands and of virgin forests, with not a word about the incomparable deposits of coal, many of these returned officers and tourists concluded that the new continent, from Massachusetts to the Mississippi River, was greatly overrated. The rigors of its winter climate, they generally agreed, would render it unsuitable as the habitation of any considerable population.

New England and other eastern magazines and newspapers in their turn later teemed with contributions about the desert wastes and the lack of resources of all the western territories, which now are populous and prosperous States.

Even the great Daniel Webster never comprehended the wealth of natural resources contained in the long-disputed Oregon country, nor grasped its future importance to the United States, now comprising the States of Oregon, Washington, and Idaho. And Senator Benton, of Missouri, as late as 1824 in the United States Senate proposed and advocated that the western boundary of the United States should be established definitely and forever at the summit of the Rocky Mountains.

But fortunately for the continental proportions and the world-wide power and influence of the United States of to-day, statesmen of far-seeing vision were at the wheel in the pilot house at all critical periods of our national growth and expansion.

William H. Seward, our Secretary of State in 1867, who negotiated the purchase of Alaska from the Government of Russia; Senator Sumner, of Massachusetts, who led the contest in the Senate for the ratification of the Alaska treaty of purchase, and Representative Banks of Massachusetts, former Governor of Massachusetts, former Speaker of the National House of Representatives, who vigorously advocated the hard-fought appropriation of $7,200,000 to pay the purchase price for Alaska, were statesmen of the first rank, with minds that perceived and understood the importance and the possibilities of Alaska to the future needs of the United States. These three, more than all others together, deserve the credit for taking Alaska into our national domain at an opportune and fortunate hour, albeit under showers of columny at that time.

In the light of these historic truths, mindful of the criticism that each successive new part of our unfolding country has been compelled to overcome and disarm, let us examine the route of and the resources in the fields tributary to the Alaska Railroad, which General Richardson omitted to mention, and we shall have a picture of another color, with a wide variety of tints and settings.

First, take Seward and Resurrection Bay, the southern terminus, which General Richardson does not approve averring that Portage Bay "should be looked into" as a preferable terminus.

Resurrection Bay is the only harbor on the whole stretch of Alaska's southern coast line which joins directly with the open sea through the Gibraltar-like Harding Gateway without the danger of approach through tortuous inland channels, and at the same time connects with the interior by the lowest of mountain passes and the lowest altitudes of any possible route.

It has the unique distinction of being the only harbor on the entire coast of Alaska—south, west, or north—that is 100 per cent free from any mishap of any kind to any vessel entering or departing in the 25 years since it became a regular port of call. It is the only harbor on the entire southern coast of Alaska having room for a terminal city of any size, with a densely timbered valley 5 miles wide at its head.

Its average depth of water is about 600 feet, which lessens gradually to the shores. The surrounding timbered mountains give it an aspect of secure shelter and of picturesque fascination unlike any other in America.

After President Harding had returned from Fairbanks on the Alaska Railroad and was ready to leave for the States, he gave instructions for his transport to remain over one extra day at Seward, in order, as he expressed it, that he and his official party might breathe the bracing air and exhilarate in the splendors of its scenery and climate. At the same time he issued a statement for publication, which he repeated after his return to the States, saying:

"Resurrection Bay is the most beautiful gem I have seen in Alaska or in any other part of the world in all my travels."

The harbor of Resurrection Bay was selected and designated by a naval commission in 1914 as a future naval base for the southern coast of Alaska, and to that end the Secretary of the Navy set aside

and had created by presidential proclamation a site of 3,300 acres as a naval reserve 2 miles south of Seward.

Every Government commission that has examined Resurrection Bay, as also Gen. Franklin Bell when Chief of Staff of the United States Army, has given it unqualified praise as one of the world's few ideal harbors, always open and sheltered every hour of every day in the year, and always ice free. General Bell visited it on a trip of inspection, and promptly established a 5,000-acre reserve for future military purposes at its entrance.

Portage Bay, on the contrary, has been "looked into" by private railroad companies and by Government commissions at different times during the last 25 years, every one of which turned it down decisively and unanimously as physically unfit and impossible for railroad terminals or for naval uses of any kind. It is blocked by floating ice practically or wholly for five months of every year, is shut off from the interior by a high range of mountains, is studded with numerous pinnacles of sunken rocks, as shown by all hydrographic charts, and is storm swept and fog bound, so that vessels plying to and from it in the winter months would pay the highest marine risks, 26 per cent, contrasted with the lowest, 2 per cent, for Resurrection Bay.

It is a noteworthy fact that every enemy of the Alaska Railroad project has shown his colors from the beginning by favoring Portage Bay as its ocean terminus, with the perfectly obvious purpose of fastening upon it the ridicule and discredit of an impossible harbor and center of operation.

General Richardson refers to the "heavy" grades from Seward through the Kenai Peninsula. The highest elevation through the Kenai Peninsula is exactly 1,065 feet, and the maximum grade is 2.2 per cent compensated, and that only for a total distance of 9 miles in three separate stretches. That is the standard maximum grade of every transcontinental railroad, and all of them cross elevations exceeding 5,000 feet, some as much as 10,000 feet. Of the remaining 54 miles through the Switzerland of the Kenai Peninsula, every mile is water grade on the wide floors of timbered valleys.

But even the small amount of maximum 2.2 grades through the Kenai Peninsula can be reduced to 1.5 at light cost, and the distance shortened 18 miles, by the building of a cut-off through Moose Pass, leaving the present main line at Mile 29, north of Seward, and uniting with it again on Turnagain Arm, opposite Sunrise. The rapid filling up of Turnagain Arm now renders it crossable by a railroad fill and bridge at Sunrise. That cut-off will eliminate every mile of 2.2 grade, all trouble from snow in the "loop district" between Miles 48 and 52, every foot of snow sheds, besides traversing a new and extensive mineral zone in the Moose Pass country to furnish profitable tonnage.

As to resources along the route of the Alaska Railroad, they have been examined and reported by different agencies of the Government for the last 25 years, and have been demonstrated by many hundred farmers, gardeners, and miners, in all the mountains and valleys between Seward and Fairbanks.

The Susitna Valley, which the Alaska Railroad traverses, is 150 miles long by 25 to 75 miles wide, with low altitudes of 100 to 500 feet above the sea. The valleys of the Kenai Peninsula, including the plateau of 30 miles by 100 miles on its western side along Cook Inlet, aggregate half the area of the Susitna Valley, all tributary to the Alaska Railroad.

The Agricultural Department, through its agents on Government experiment farms in Alaska, estimates the total areas of all these valleys together in the Susitna and the Kenai regions at 5,000,000 acres, of which nine-tenths is covered with birch, spruce, and poplar trees of fine quality, and three-fourths of which is agricultural and grazing lands equal in productive capacity to the agricultural lands of our Northern States.

Many thousands of tourists from all parts of the United States have been there and have seen the luxuriance of the growth of red-top and blue-stem grasses, shoulder high, and forests as dense and thick as the forests of the Tropics, covering many hundreds of thousands of acres at intervals all the way from Seward to Fairbanks. They have seen hundreds of gardens and many fields of growing and ripened grain as luxuriant and prolific as any in Iowa or Illinois.

The Seward Daily Gateway, of Seward, Alaska, published an editorial in its issue of August 20, 1927, outlining and emphasizing these conditions. It presents agricultural possibilities in central Alaska from demonstrated facts over a long period of years so concisely and accurately that it is worthy of reproduction here as a timely summing up of first-hand evidence from Alaska. That editorial says:

"Farming and gardening in the Susitna Valley and in the numerous valleys of Kenai Peninsula, including the great plateau on the western side of the Kenai Peninsula between Cook Inlet and the Knik Mountains, have progressed far enough on many small patches widely scattered since the building of the Alaska Railroad to demonstrate what can be done on a large scale on every square mile of those extensive areas.

"With certainty there are 2,000,000 acres in the Kenai Peninsula and 3,000,000 acres in the Susitna Valley, to say nothing of an equal amount in the Tanana Valley, which have possibilities for growing every kind of vegetables, berries, rye, oats, barley, and the harder wheats more abundantly and of better quality acre for acre than the Northern States of the United States.

"If that statement should seem too sweeping, the answer is before the eyes of every man and woman who will visit the hundreds of little farms and gardens in and around Seward, Seldovia, Kenai, Hope, Sunrise, Anchorage, Matanuska, Wasilla, Talkeetna, and scores of other places in those valleys.

"What is produced on one acre can be produced on the adjoining acre under the same conditions, or the adjoining hundreds of acres, or thousands of acres.

"The long summers and the long hours of daylight in these latitudes produce with a rapidity and luxuriance of growth that are not surpassed in any State in the Union. When summer comes, it is here in a bound, and the danger of killing frosts is past, unlike the conditions that menace crops in many of the agricultural States."

Not only are vegetables, berries, and grains of every variety produced in strong and rapid growth in all these central valleys, but apples now are being grown successfully and profitably in an orchard at Hope, 75 miles northwest of Seward. A farmer there of Scandinavian origin has shown the Americans what can be done in fruit growing in central Alaska, as it has been in Norway and Sweden for centuries. He planted several apple trees at Hope eight years ago, which have produced full yields of good apples for the last three years. He set out 100 more apple trees a year ago, from which he proposes to supply nursery stock to farmers along the Alaska Railroad.

Whether General Richardson's silence on these very important and widely known facts was because of his lack of knowledge on subjects of agriculture and horticulture, or because his experience in Alaska has been mainly in the high and barren Copper River Plateau along the Richardson Highway, or because he deliberately shut his eyes to them, in any case it is what lawyers usually term a disqualifying element in any testimony he might offer.

All I have said about the Kenai and Susitna regions applies equally to the Tanana Valley, of 5,000,000 acres, which for 22 years has produced large acreage yields of hard wheat, barley, rye, and oats, and every variety of berries and of garden vegetables grown in the Northern States, on more than 200 farms, on the grounds of the Government experiment station near Fairbanks, and on farms near other towns of that valley.

Rye in particular is grown every summer in all of those central valleys with yields of 30 to 60 bushels to the acre. Those northern latitudes are the native environments of rye, where it thrives at its best. More than 100,000,000 people of northern Europe subsist on rye bread rather than wheat bread. The agricultural lands of the Kenai Peninsula and the Susitna and the Tanana Valleys, with their lateral valleys, like the Matanuska, can produce at an average of 25 bushels to the acre a total of 150,000,000 bushels of rye per year. It grows to maturity in the long days of those latitudes in 60 days from planting. The experts of the Department of Agriculture substantiate this estimate in their official reports as fair and conservative. The same areas in the corresponding latitudes of Europe and Siberia are doing relatively better than that and have been for years past.

The Susitna Valley is covered in most parts with forests of birch timber which are the only large stands of virgin hardwood west of the Mississippi River and north of Texas, its introduction and use in the furniture industry in the United States just now being undertaken by large mill operators of Oregon and California. Tests and experiments have proven it to be of fine grain and tough fiber, equal to the birch of Michigan and Wisconsin in quality. The Alaska Railroad is using it for flooring and interior finish of its passenger coaches.

Why did General Richardson overlook all of these magnificent forests of rare and much-needed hardwood?

Equally silent is General Richardson on the coal of the Matanuska fields, tapped by a 38-mile branch leaving the main line 150 miles north of Seward, although its high commercial and naval values have been demonstrated repeatedly by laboratory analyses and boiler uses over a period of 20 years.

That portion of the Matanuska coal within the 3,000-acre naval reserve was sufficiently tested by a naval coal commission on the cruiser *Maryland* in 1924, and again by a naval coal commission in 1921, in standard marine boilers such as equip all of our cruisers and battleships, first with 750 tons, and next with 5,000 tons, side by side with equal amounts of Pocahontas coal, followed by laboratory tests and analyses in both instances.

Those commissions reported as the results of their tests that the coal in the Matanuska naval reserve was suitable in every respect for use on battleships and cruisers. The commission of 1921 gave it a rating of 15.5 per cent better in steam producing qualities than the Pocahontas coal. Both of these reports are official documents in the office of the Bureau of Engineers, Navy Department, at Washington.

Doctor Savage, of the department of geology of the University of Illinois, was detailed to study the coal formations in the Matanuska naval reserve as a geologist for the Navy. He reported officially that the Matanuska naval reserve contains "probably not less than 30,000,000 tons of high-grade bituminous coal." He stated further that it

could be mined in quantities of 1,000,000 tons per year at a cost of not more than 50 cents per ton above the cost of mining coal in Illinois.

The known area of the Matanuska coal veins outside of the naval reserve is estimated by the Geological Survey in its official reports to be 75 square miles, with a total of 350 square miles of coal-bearing formation. The most of the coal in the area so far explored is subbituminous. But two years ago a new extension was discovered and examined by the Geological Survey, where large veins of anthracite of undetermined extent were uncovered.

The development and use of Matanuska coal in the markets of the Pacific coast and by our Navy on the Pacific Ocean in itself would place the Alaska Railroad on a basis of financial profit and independence, and would bring a wide assortment of other and dependent development and industries into form and activity.

Why, then, is it not done? The responsible officials at Washington are clothed with all the needful authority that Congress can bestow to do exactly those things.

That, however, opens up another field of discussion of wide extent and complicated ramifications, such as freight rates to and from Alaska and on the Alaska Railroad, and the powerful influences of coal operators of West Virginia and Pennsylvania who now supply our Navy on the Pacific, together with the influence of private railroad interests that are hostile to Government ownership and operation of railroads in any form, the Alaska Railroad most of all.

But while the Matanuska coal fields are well known, little has been said or is known outside of Alaska about another field or fields vastly greater in extent and quantity and value on the line of the Alaska Railroad. It is the Nenana coal fields and its extensions on the northern slope of the Alaskan range.

The revolutionary inventions and discoveries by German coal tar chemists, led by Dr. Frederick Bergius, for the reduction of lignite and subbituminous coals into coal tar, and the distillation from that coal tar of gasoline, Diesel engine distillate, fuel, and lubricating oils, and many other by-products, which have been the sensation of the coal and gasoline world for the last year or more, in one stroke out of a clear sky have raised lignite and subbituminous from the lowest to the highest in the scale of values among all the different kinds and grades of coal by supplying a utility and pressing demand for them as one of the world's largest future sources of supply for gasoline, Diesel engine distillate, and fuel and lubricating oils. The coals of these grades yield best and most abundantly to this treatment, while anthracite yields to it not at all.

In one small area of the Nenana district seven veins are superimposed one upon another in white sandstone, ranging in thickness from 20 feet to 63 feet, aggregating 283 feet, and extending over an area 10 by 24 miles. In this comparatively small and compact district the Geological Survey estimates in a special report after two years of exploration and examination that the total deposits of lignite and subbituminous amount to 10,000,000,000 tons. No other district in the world begins to equal it.

By comparison, the great fields in the Ruhr Basin of southern Germany contain only 3,000,000,000 tons.

Still more, this area of 10 by 24 miles in the Nenana district is but a small fraction of a much larger field extending 600 miles along the northern slope of the Alaskan Range all the way around to the Kuskokwim Valley. The Susitna Valley, too, is generally underlain with veins of lignite and subbituminous, some of which, of 10 to 30 feet in thickness, crop out in many different localities.

These valleys of central Alaska contain so many billions of tons of lignite and subbituminous, according to the official reports of the Geological Survey, in measured and conservative language, that no reasonable estimate of their total quantity can be made. The late Dr. Alfred H. Brooks, in charge of the Alaska branch of the Geological Survey for more than 20 years, stated in many of his officials reports, and repeated his statements to congressional committees at different times, that not less than 60,000 square miles of Alaska's area carries lignite and subbituminous, most of it in the central parts near the route of the Alaska Railroad. He said that the total area might exceed 100,000 square miles. Recent discoveries are constantly adding to the known areas of Alaska's lignite and subbituminous fields.

Up to a year ago all of this vast extent of lignite and subbituminous coal in Alaska was dismissed with a wave of the hand as of little commercial value because it was thought to be fit only for local consumption. But to-day it constitutes one of the most valuable assets of natural wealth in all the domains of the United States, or the world, due to the epochal discoveries of Doctor Bergius and other coal-tar chemists.

The Bergius process is no longer a laboratory experiment, but has passed definitely to the stage of commercial production in Germany, where this marvelous new industry now employs 15,000 men with investments of many millions of dollars. German officials and coal-tar operators announce confidently that Germany will produce all of her own gasoline and other by-products from her own beds of lignite and subbituminous coals.

These German coals are substantially like the Alaska lignite and subbituminous in all points of chemical composition.

In the authoritive public announcement made by Doctor Bergius before the world convention of coal-tar chemists at Pittsburgh 18 months ago, he gave his formula and the quantities of different products under it from German lignites and subbituminous coals. The lignite yields 16 per cent of gasoline, 15 per cent of Diesel engine distillate, 15.5 per cent of fuel and lubricating oils, and 22 per cent of solid organic matter, otherwise pure carbon residue equal to anthracite. In round figures that is slightly more than 1 barrel of gasoline, 1 barrel of Diesel engine distillate, 1 barrel of fuel and lubricating oils, and 440 pounds of anthracite coal from each ton of lignite of 2,200 pounds, besides other valuable by-products, like ammonia. He has lately announced that the proportion of gasoline will be increased by improved processes.

But on the basis of his first original output, this means that one small area of Nenana district alone, 10 by 24 miles, the mountains of lignite and subbituminous coals there under distillation can yield 10,000,000,000 barrels of gasoline, 10,000,000,000 barrels of Diesel engine distillate, 10,000,000,000 barrels of fuel and lubricating oils, 2,000,000,000 tons of residue anthracite, and numerous by-products of great and varied value in the industrial world.

Multiply those staggering amounts by many times to get the total of all the lignite and subbituminous fields in central Alaska tributary to the Alaska Railroad, and you get but a vague conception of the colossal wealth they contain.

To those who say that these tremendous fields of coal can not compete with the natural oils in economical cost of distillation, let Doctor Bergius reply with his recent statement that he expects to reduce the cost of extracting gasoline under his process in large-scale production to 10 cents per gallon. Let them remember that all of the natural oil known in the United States hold a certain supply for only five years at the present rate of consumption.

Is it possible that General Richardson never heard about the Nenana and Susitna fields of lignite and subbituminous coals, incomparably the largest in the world in extent and quantity? Did he never hear about the revolutionary discoveries and inventions of these coal-tar chemists, which possibly and conceivably make those coal fields the most valuable in the world? And yet he seriously discusses the resources and possibilities of Alaska without a word of mention or barest reference about either of them.

In another 50 years the United States will contain 240,000,000 population, and the world probably 3,600,000,000, or double their populations to-day. The Census Bureau announces that our increase between 1920 and 1930 will be 18,500,000, even under the restrictive immigration law, the largest of any 10 years in the history of the United States. The problem of food supply will then be indeed a pressing one, as it is already in many countries of the world.

Long before that time arrives Alaska will be called upon by all the other States of the Union for contributions of her soil to help feed their teeming consumers and for the by-products of her coals to help furnish power for the vast industries of their many scores of cities that are to-day but villages, added to the other cities of to-day that will be grown into the giants of that time, and to make homes on its farms for the surplus millions of our crowding national population.

What Alaska can do to meet these demands is answered by casting up the sum total of the corresponding areas of northwestern Europe, in the same latitudes, under identical conditions of climate, where 27,500,000 of the world's hardiest leaders in all the arts of civilization dwell in comfort and happiness under strong and stable governments.

The doubters of this age about the resources and possibilities of Alaska and the wisdom of the Government's policy in building the Alaska Railroad will take their place in the meantime in the ranks of their kindred who derided and opposed the aid and encouragement the Government extended to the building of our transcontinental railroads through the then supposed deserts of wilderness, now our populous and prosperous States of the flourishing West.

PRISON-MADE GOODS

Mr. SMITH. Mr. President, I ask to have printed in the RECORD an editorial from the Chester (S. C.) Reporter of May 3, 1928, entitled "Harmful measure," relative to the proposed legislation known as the Hawes-Cooper bill.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HARMFUL MEASURE

Bills are now pending before both Houses of the National Congress, which have for their object the prevention of interstate commerce in prison-made goods. This end is sought in the indirect way of divesting such goods of their interstate character. In other words, it is sought to keep these goods out of interstate commerce by legislating them into an arbitrary class, and thus circumvent the decisions of the Federal Supreme Court as that court has interpreted the plain intent of the commerce clause of the Federal Constitution. This is like declaring

by statute that an apple is rotten when actually it is sound and tempting. We are strongly of the opinion that our courts will not be misled into declaring such legislation constitutional, even if passed. But why pass it?

Under the guise of allocating certain powers to the States, which powers the States have manifested no desire to exercise, the proponents of this legislation seek to upset the well-settled plans of nearly all the States for dealing with their prison labor. The States have found by years of experience that there are certain types of labor which are far better suited to prison conditions than others. Prison labor must be used under certain restrictions, considerations of housing, feeding, health, and discipline must be met. After years of experience States have invested hundreds of thousands of dollars in plants and have worked out practical systems which afford suitable labor for the convicts and which render them self-supporting. Inmates of State prisons must be kept busy or become drones and parasites on society.

South Carolina has a well run penitentiary where the labor is employed under good conditions. The inmates, as any one who visits the penitentiary will see, are kept busy and thereby provide for their own maintenance. Some are passing from the class of "unskilled labor" to that of "skilled labor" by reason of the training received there. The health conditions are good, discipline is humane, and the system makes the inmates self-supporting.

The proposed legislation, known as the Hawes-Cooper bills, would upset all of this system which is now working so well in this State. We feel sure from reliable information that the results would be that same in many other States.

Surely no one wants to divert any tax money from our roads and schools to make idlers of our convicts. Do we want the burden increased? "We shudder to mention it." From our viewpoint we can see no sound reason for the proposed legislation. It is urged that these prison-made goods are sold in competition with goods made by free labor. Surely the amount of prison-made goods of any class must be negligible when compared to the total production of that class of goods in the Nation at large. If there are so many criminals in our State penal institutions that their production has become a serious competitor with the production by those of us on the outside, truly we have fallen on evil days. The necessity for reform would then be up to our criminal courts, and the necessity of providing healthy and gainful employment for so large a percentage of our citizenship would be all the most compelling.

We hope that this Federal legislation will not be passed to seriously hamper the States in their great problem of dealing with their criminals. This problem is difficult already and the Federal Government would do well to refrain from throwing another monkey wrench into the machinery of State courts and penal institutions. They need help, not obstructions.

When a Federal Congress wants to confer powers on "the States," "the States" would do well to scrutinize such proposed legislation. "We fear the Greeks even when bearing gifts."

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on May 18, 1928, the President approved and signed the following acts:

S. 4034. An act authorizing the Calhoun Bridge Co., an Illinois corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Illinois River at or near Grafton, Ill.;

S. 4045. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct a bridge across the French Broad River on the Newport-Asheville (N. C.) road near the town of Del Rio in Cocke County, Tenn.;

S. 4059. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Tennessee River at or near the mouth of Clarks River;

S. 4060. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Canton, Ky.;

S. 4061. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Smithland, Ky.;

S. 4062. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Tennessee River at or near Egners Ferry, Ky.;

S. 4253. An act authorizing H. L. McKee, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Lake Sabine at or near Port Arthur, Tex.;

S. 4254. An act authorizing the State of Texas and the State of Louisiana to construct, maintain, and operate a free highway bridge across the Sabine River at or near Pendleton's Ferry;

S. 4288. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the South Fork of the Cumberland River at Burnside, Pulaski County, Ky.;

S. 4289. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Neelys Ferry, in Cumberland County, Ky.;

S. 4290. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Burkesville, Cumberland County, Ky.;

S. 4291. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River, at or near Arat, Cumberland County, Ky.;

S. 4292. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Center Point in Monroe County, Ky.;

S. 4293. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Creelsboro, in Russell County, Ky.;

S. 4294. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the North Fork of the Cumberland River at Burnside, Pulaski County, Ky.; and

S. 4295. An act authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near the mouth of Indian Creek in Russell County, Ky.

SUPPLEMENTAL ESTIMATES, WAR DEPARTMENT (S. DOC. NO. 114)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States, transmitting supplemental estimates of appropriations for the War Department, fiscal years 1928 and 1929, amounting in all to $15,416,645, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATES, DEPARTMENT OF STATE (S. DOC. NO. 115)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States, transmitting supplemental estimates of appropriations for the Department of State, fiscal year 1928, amounting to $21,595.59, and the fiscal year 1929, amounting to $100,000; in all, $121,595.59, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATES, DEPARTMENT OF JUSTICE (S. DOC. NO. 113)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States, transmitting supplemental estimates of appropriations for the Department of Justice for the fiscal year 1929, amounting to $45,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. HEFLIN obtained the floor.

Mr. SMOOT. Mr. President, there is no amendment now pending, and I ask that the Senator from Connecticut be recognized to offer his amendment on the estate tax.

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Connecticut?

Mr. FLETCHER. So as to get something before the Senate.

Mr. HEFLIN. I have no objection, but I am going to take only a little time.

Mr. BINGHAM. Mr. President, I send to the desk the amendment which I ask to have read.

The VICE PRESIDENT. The clerk will read the proposed amendment.

The CHIEF CLERK. On page 192, strike out lines 20 to 25, inclusive, and lines 1 to 5 on page 193, and in lieu thereof insert the following:

SEC. 401. TERMINATION OF ESTATE TAX.

Title III of the revenue act of 1926 shall not apply in the case of the transfer of the net estate of any decedent dying after the enactment of this act.

Mr. ROBINSON of Arkansas. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Arkansas?

Mr. HEFLIN. I yield.

Mr. ROBINSON of Arkansas. Mr. President, it would seem to me that the time is approaching when the revenue bill should be disposed of in the Senate. I am fully aware of some of the circumstances that have prolonged the debate on the bill, and of course I have no disposition to usurp the authority of the Senator who has charge of the measure, but I would like to invite an expression from him and from the Senator from North Carolina [Mr. SIMMONS], the ranking minority member of the Committee on Finance, as to whether, after the pending amendment shall have been disposed of, it will not be practicable to propose an agreement for the limitation of further debate on the revenue bill with a view to disposing of that bill during this calendar day.

I think I need not take the time of the Senate to discuss the condition of legislation in the Senate and the other circumstances which prompt the consideration of a limitation of debate. There are other measures which necessarily must be considered, and the end of the session is approaching, whether it be next Saturday or next Saturday a week. So far as I have heard, no one contemplates the continuation of the session beyond next Saturday a week.

I merely make the suggestion at this time in the hope that the Senator from Utah and the Senator from North Carolina will confer about the matter and submit at an opportune time a proposition on that subject. I thank the Senator from Alabama for yielding to me to make this suggestion.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. HEFLIN. I yield.

Mr. SMOOT. I hope the Senate of the United States will remain in session to-day, if necessary, until at least midnight, if the bill is not passed before. I gave notice last night that I would like to have that done, and I hope it will be.

Mr. ROBINSON of Arkansas. My thought was that there was perhaps no use punishing the Senate by sitting here until at least midnight if an agreement could be reached. I am aware of the fact that there are some important amendments besides the one now pending that will be presented, but it occurred to me that it would at least do no harm to attempt to make an arrangement.

Mr. SIMMONS. Mr. President, may I ask the Senator from Arkansas a question?

Mr. HEFLIN. I yield to the Senator from North Carolina.

Mr. SIMMONS. I was not here when the Senator began his statement.

Mr. ROBINSON of Arkansas. My suggestion was that the Senator from North Carolina and the Senator from Utah confer, with a view to proposing a limitation on debate, to take effect, say, after the pending amendment is disposed of. I have been advised by another Senator that he will not consent to any limit on debate until an amendment which he proposes to offer shall have been acted upon. But this bill has been dragging along in the Senate now indefinitely for two or three weeks. All of us understand some of the circumstances which have contributed to that result. I think we are all anxious to proceed in an efficient way, and to deal fairly with other measures which are entitled to some consideration here. I am not proposing any definite arrangement; I have no disposition to unduly restrict debate, but I think if a limitation had been placed on debate a week ago the country probably would have been just as well off, and no material harm would have resulted.

Mr. SIMMONS. Mr. President, I ask the Senator from Alabama if he will not yield to me?

Mr. HEFLIN. I yield.

Mr. SIMMONS. I sympathize fully with the views expressed by the Senator from Arkansas. I think this bill has unnecessarily dragged for a long time. That has been due in part to two causes, first, yielding to conference reports, and another, speeches upon other subjects than the bill. I believe that we ought to come to some arrangement by which we can agree upon a definite time to vote, probably not to-day, because I think Senators who are in favor of a continuance of the inheritance tax want to discuss that amendment, and I believe they should have reasonable time in which to do it. I shall be very glad to confer with the chairman of the committee, and, if it is possible, bring about an agreement for an early vote. I shall be glad to enter into it, and do what I can to bring about a speedy vote on the part of the Senate.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Idaho?

Mr. HEFLIN. I yield to the Senator.

Mr. BORAH. If it were practicable to confine the attention of the Senate to the bill, we could make some progress, but there are two or three very important matters coming along, perhaps as important as have been before the Senate touching this bill, and about the only way, it seems to me, that we could make progress would be to confine ourselves to a discussion of the bill.

THE CAMPAIGN OF GOVERNOR SMITH

Mr. HEFLIN. Mr. President, I have no desire whatever to delay action on this bill; in fact, I am anxious to have it disposed of; but there are a good many other matters now pending here and before the country of great importance to the American people, and I am now going to bring one of them to the attention of the Senate for about five minutes.

I have in my hand a message from the President of the United States in 1926 in response to a resolution passed by this body in reference to the conduct of Mr. Joseph F. Guffey, director of the bureau of sales in the office of the Alien Property Custodian. I am going to read one brief passage from this message:

> Mr. Guffey deposited the funds received from the sale of property, over $55,000,000, in various banks for extended periods instead of making prompt remittances of same to Washington for deposit in the United States Treasury. No accounting for the interest earned and credited on bank deposits was made until a special audit of the account was completed in 1921, when $406,766.83 was remitted to the Alien Property Custodian. Subsequently, and as a result of this audit, there was an additional amount of interest found due, $3,139.03, and same was paid February 5, 1926.

I hold in my hand an indictment against Mr. Guffey, returned by the grand jury of a Federal court of the State of New York, and in the second count of this indictment—I am not going to read it all, but ask permission to print it in the RECORD—it is said:

> Said Joseph F. Guffey then and there sent moneys to the amount and value of said sum of $275,000; unlawfully and feloniously did wrongfully convert to his own use and embezzle against the peace and dignity of the United States and contrary to the form of the statutes in such case made and provided.

Mr. Guffey is now the leader of the Al Smith forces in Pennsylvania. To-day at Harrisburg he is proceeding to have elected as national committeeman from Pennsylvania a Mr. Kistler. Mr. Kistler, an Al Smith man, recently contributed a thousand dollars to the Al Smith campaign fund. Guffey received $5,000 from Van Namee. Van Namee, as I have related before, is Governor Smith's campaign manager and appointee on the Public Utilities Commission of the State of New York, where he can, by the power of his office, get all the campaign money that he needs. Van Namee has turned over to Mr. Guffey, I understand, $5,000, and I am inclined to think it was probably twenty times that amount, for the State of Pennsylvania.

The Al Smith bunch is to-day selecting a national committeeman for the Democratic Party in the State of Pennsylvania. There is where the Government was brought into being. There is where Jefferson gave to the world his Declaration of Independence. There is where this Government's flag was first unfurled. Now, the Republican Party is corrupting the ballot there, and permitting the sale of a seat in the United States Senate, and the Democratic leader of Pennsylvania, Joseph F. Guffey, an Al Smith supporter, is now under indictment for the embezzlement of Government funds intrusted to his care as a Federal officer. Mr. President, I will disclose to the Senate in a day or two a matter of serious concern to the whole country. A big corporation, involving a billion dollars, is being or has been formed by a big New York contractor who has contributed to Governor Smith's campaign fund. It will be recalled that Mr. Kenny flatly contradicted Van Namee's statement as to how much money he gave the Smith committee. Van Namee swore that he gave $20,000 and that he borrowed $50,000 from Kenny, a big contractor and Roman Tammany man. Kenny, not knowing, I suppose, what Van Namee had stated, said he did not loan any of it, that he gave it all to him, $70,000.

There are several thousand contractors in the State of New York, and if those contractors who graft on the contracts in New York City and New York State under Mayor Walker and Governor Smith can do that and get away with it, God only knows how much the Smith campaign fund will be.

I am the Senator who first suggested that we have a committee to investigate contributions to presidential candidates. I had a resolution on my desk for a couple of weeks all ready to introduce, which probably would have caused me to be a member of the committee investigating this matter. If I had been on the committee, I would have wanted the Senator from Idaho [Mr. BORAH] on it, and the Senator from Missouri [Mr. REED], and some others that I could name. I think some of us would have asked, when Mr. Kenny told the committee right here in the Capital of the Nation that he had given this money to Smith and that he would give him any amount that he wanted, any amount that was necessary, what he meant by that, and

how much he would be willing to give. I would have tried to get him to fix some figure showing how much he would give. I would have asked, "Would you be willing to give $10,000,000?" I would have tried to get some figure from this man showing in a way how far he was willing to go.

Mr. McMASTER. Mr. President, may I say to the Senator that that question was asked of Mr. Kenny and Mr. Kenny said, "I will give all that I have."

Mr. HEFLIN. And he is worth $40,000,000! [Laughter.] Mr. President, there never was in the history of this Government, so far as I know, such a bold and brazen display of the premeditated corrupt purpose to buy the Democratic nomination for President. I remember the terrible days when Addicks, the Republican money lord of Delaware, used to buy a seat in this body and the dark days of corruption in Pennsylvania under Quay, a Republican Senator, but never have I known in the National Government itself where moneybags would come to the capital and flaunt their arrogance and corruption and low-flung aristocracy of the dollar in the faces of the representatives of the patriotic, liberty-loving citizens of the United States. I thank the Senator from South Dakota for his statement.

Mr. BARKLEY. Mr. President——

The PRESIDING OFFICER (Mr. ROBINSON of Indiana in the chair). Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. HEFLIN. I yield.

Mr. BARKLEY. I do not desire to pass on the propriety of discussing from day to day the evidence that is secured by the investigating committee which was appointed by the Senate, but if it is going to be discussed I think it ought to be discussed on the basis of a fair report of what the witnesses have said. When Mr. Kenny was on the stand before the committee he was asked about his contribution to the campaign for the nomination of Governor Smith. He stated that he had contributed $70,000 and that he understood that the entire $70,000 was a gift. He was asked if he intended to make further contributions to the campaign. He stated that he did intend to make further contributions if necessary and if called upon.

He was asked how much more he intended to contribute and his reply was that he intended to contribute whatever he was asked to contribute or whatever he thought was necessary within his ability to contribute. He did not make the statement that he intended or desired to contribute all that he had or his entire fortune to this campaign.

The committee did not feel it incumbent upon it to ask Mr. Kenny how much he was worth, because I do not think the committee understood, I certainly did not understand, that Mr. Kenny intended to say that if he was worth $30,000,000 or $40,000,000 he would dump it all in the campaign of Governor Smith or anybody else.

I do not think that the statement that he said he was willing to give all he had is quite fair to him or to the committee. If we are going to discuss the evidence from day to day as we progress, I think the record ought to be kept straight and no effort made to garble the testimony of witnesses or in any way to put upon it an interpretation that neither the witness nor the committee understood at the time it was given.

Mr. HEFLIN. I read his statement. I agree with the Senator from South Dakota [Mr. McMASTER] that what he said was substantially what the Senator from South Dakota quoted. He said, "I will give all that is necessary according to my ability to give." I said that he was worth $30,000,000 or $40,000,000. That is not in the testimony, but I say it. So he is willing to give at least $20,000,000, I take it, if he is worth $40,000,000. He said he would give all they wanted.

I do not want to misrepresent one of them; God knows it is bad enough and black enough without anybody adding anything to the statements they made, but I am going to discuss it here from day to day. That is the only way we are going to get the real facts to the country. I am going to put the truth of these things in the RECORD, all of it that is possible, before Congress adjourns. The American people have got to know and they are going to know just what is being done to buy the Democratic nomination for Governor Smith, the head of the Roman Catholic political machine and the wet nullifier of old New York Tammany.

Mr. BARKLEY. Mr. President, will the Senator yield further?

Mr. HEFLIN. I yield.

Mr. BARKLEY. I have no disposition to engage in any controversy with the Senator from Alabama or anybody else as to the work of the committee. I can say to him and to the Senate and to the country that in so far as I am concerned—and I think I speak for the entire committee—I intend to resort to every proper and legitimate method to find out how much money has been expended to control the nomination in either party, and if our jurisdiction shall be construed or extended to cover the presidential campaign after the nominations shall have been made the same policy will be pursued then. The committee will undoubtedly make a report at the proper time of the result of its investigations. My object in rising a moment ago was simply to question the propriety of undertaking to discuss the results of the testimony from day to day as each witness comes before the committee and gives his testimony.

Mr. HEFLIN. I did that when the Teapot Dome investigating committee was carrying on its work. I discussed it myself from day to day. We did it when they were investigating Daugherty and Fall and Denby. I participated in the debate. The Senator from Missouri [Mr. REED] was on the firing line all that time. My old-time, vigorous, and active friend the junior Senator from Arkansas [Mr. CARAWAY] was also on the firing line in those days. We were discussing the matter here then vigorously day by day. We created a public opinion so strong that the President had to change his position and let Denby go from the Cabinet. I say that no harm can come from discussing the facts that come out in this investigation. The awful disclosures ought to be discussed just as soon as they are known.

Action is being taken every day in the various States. Delegations for Governor Smith are being obtained, I think, through the corrupt use of money in many instances. I think we ought to let the country know day by day what Governor Smith and his régime are doing to secure the nomination.

I can not permit to go by without comment and condemnation the coming of this man Kenny from New York, and standing before the Senate committee at the Capitol, appointed and empowered to go out and get the truth regarding the efforts to buy the Democratic nomination for the Presidency. I can not let it go by, I repeat, without my condemnation and repudiation—this bold, brazen, and impudent and insulting statement to the American people that he has given money, that he would give more money, that he would give all the money that is necessary. That is what it means to see Governor Smith secure the nomination and election to the high office of President of the United States.

What is the Democratic Party going to do about it? What are the temporary leaders of our party here at the Capitol going to do about it?

So far I have heard no word of condemnation from the minority leader [Mr. ROBINSON] of Governor Smith's act in appointing his appointee on the Public Service Commission of New York to be his campaign manager, or any criticism from him of the astounding and brazen statements of one of Governor Smith's financial backers, Mr. Kenny, of New York. I am not in favor of permitting the leadership of either party, by either silence or inaction, to destroy my Government. If I am an honest and faithful Senator and a true American I will fight corruption in the Democratic Party just as quickly and as earnestly as I will fight it in the Republican Party. They all look alike to me, these corruptionists. It makes no difference to me to what party they belong. Why should we wait for a committee report? Let us, who are trusted by the people to represent them here, give them these pungent, powerful facts. I want the RECORD to carry them forth day by day to the American people.

The people are reading the RECORD as they have never read it before; they are printing at their own expense in the various communities of this country thousands and tens of thousands of copies of my speeches and giving them away, people giving 50 cents, $1, and $5 and $10 and more to get the truth of what is going on here to the people. They write me thousands of letters saying that the big newspapers will not publish the truth about certain things that happen here.

We know that the metropolitan press decided some time ago to nominate Hoover for the Republicans and to nominate Smith for us. Is the Democratic Party drifting like a ship without a rudder? What has happened to her once strong and outspoken men? Have any of our southern Democratic Senators reached the time when they are ready to take up Governor Smith who stands for social equality? I shall ask the Democrats from the South, from Arkansas, Arizona, Georgia, and from all the other Southern States one day soon, are you ready to sit quietly by and see them put in the leadership of our party a man who will destroy the institution of white supremacy in the South? Are you willing for them to put a man upon our party as its leader, to be clothed with the power of the President in the White House, who can undo all that we have done to protect the white women of the South from the

lust and carnality of brutal negroes? Are you going to permit a man to be nominated for President who, as governor, permits in his State social equality to be practiced every night in dance halls under Tammany rule, and under his own rule, in order to control the negro vote in the city and State of New York?

I refer to the article in the Manufacturers Record, of Baltimore, on this subject. Richard H. Edmonds, as clean a man and as brave a southerner as ever drew the breath of life, reported it, and commented on it, and said some things were done there so suggestive, immodest, and outrageous that he would not print them in his publication. That is going on in these dance halls in New York City, and here we are permitting that dangerous and scandalous doctrine to be accepted and pushed forward by Governor Smith, who is asking to be made leader of the Democratic Party and President of the United States. Senators, do you believe the Democratic South will vote for a man for President who stands for such things, a candidate picked out by the Roman Catholic political machine here and abroad, a nomination bought by money gathered in by the New York City and State machine from people here and people abroad?

Mr. President, these questions go to the very foundations of our most sacred institutions; they go to the protection of the white women of the South; they go to the healthy and wholesome social order of the Nation. I want to tell the people of the South and of the North, and I want to tell northern Democrats and the Republican Party that when Governor Smith attempts to foist this negro equality business on the white people in order to get the negro vote, he will lose the votes of millions of white men and white women in the United States who deep in their hearts do not indorse such doctrine.

The idea of tearing down our fine ideals and institutions, leveling down everything that is dear to us, while some people here who ought to be fighting to prevent these things are as silent as the tomb.

Where is the voice of the fearless and stalwart leadership that once sounded in this august body? The Smith people are throwing down principles that are dear to us in their efforts to control the negro vote in the Northern States.

The Senator from South Carolina [Mr. BLEASE] pointed out the other day that it had been promised by Governor's Smith's crowd that if he were elected President he would put a nigger in the Cabinet. The Democratic South—God bless her!—is not going to surrender her principles. We have a negro problem that no other section has to any very large extent. Should she do so, she would give up the doctrine of white supremacy and abandon her protection of the white women of the South. If she did it, she would give up everything that she holds dear.

Here is Governor Smith's campaign committee discredited at the outset by his and their statements. New York contractors, on the one hand, gathering up money and coming down here and boldly telling our Senate committee at the Capitol what they intend to do about getting money. "Yes; we gave that; and we are going to give more; we will give all that is necessary." Necessary to do what? To buy the nomination. What does that mean? That means whatever is necessary to buy the nomination and Presidency. They are willing to pay it, they tell the committee, and that is what it means. Then let them come out in the open and put the Democratic nomination on the auction block where everybody can see and hear. Then advertise it to the world that the Democratic nomination for the Presidency is about to be sold to the highest bidder. Then the Al Smith Tammany Kenny comes up and says, "I will bid for Smith of New York." "How much are you willing to pay?" "I will pay a million dollars." Somebody else says, "I will pay a million and a half." Then Kenny will say, "I will pay $5,000,000, or whatever amount is necessary to buy it." The office is bartered off before the public. Sold! Sold for gold to the Roman Catholic hierarchy for Governor Smith, the Presidency of the greatest Government in all the world!

Senators, I have already referred to it, but I wish to mention again in this connection the antilynching bill which was under consideration a year or so ago and was forced through the House. The southern Democrats wanted to protect the white women of the South, to safeguard our girls who walk the highways to the home of a neighbor or to school in the rural districts. We want them to be free from danger and to be safe as they walk in the field and wood in the springtime gathering flowers along the way. Mr. President, I have in mind an instance where a negro man hid out in the bushes, and when a little 17-year-old white girl stopped to pick flowers on the roadside coming home from school, not dreaming that danger was near, within 150 yards from her home and 300 yards of the schoolhouse, she was seized by this black brute, assaulted, and left for dead. What a horrible outrage and crime! Of course he has hanged, as he should have been.

By crying out against such a crime and a crusade against the devilish and dangerous preaching of social equality, we are having less of that crime than ever; but here comes Governor Smith, of New York, who calls himself a Democrat, and the New York World editorially says he is in favor of social equality, and here comes the Manufacturers Record and says they practice it right under his nose and under the nose of Mayor Walker; that negro men are dancing with white women and white men dancing with negro women, and some of the things were so indecent and disgusting that the Manufacturers Record said it would not publish them.

Then come Kenney and Van Namee with their slush fund, gathering it in, and telling us that on top of all this they are going to pay all that is necessary to buy the nomination and election. The Senator from South Dakota is right. Kenney said in substance, "I will give what I have, or nearly all of it, to secure this man's election. I will give all they want or need."

Mr. President, the Democratic Party in the South expects her Democratic sons here to be true. The South has her eyes on them. Some few of them are pussyfooting; they are whispering around in the cloak rooms, but we are going to know where they stand before they reach Houston. I have the machinery in motion now to find out, and I will probably know by Tuesday, for some of the people at home, at least, are going to ask Senators by name how they stand upon this question. I have never seen anything like it; a bold declaration of the intention to buy the nomination for Governor Smith. I never witnessed anything like it—so brazen and shameful.

Suppose this man were a Republican and a Republican newspaper were to declare that he favored social equality, it would be to the South like throwing a red flag in a bull's face. What has become of our leadership? Where are they from the South who ought to stand up here and protect and defend our right and purpose to defend at any cost our white women against the insults, outrages, and crimes of brutal negroes.

Senators, what would you think about a man who would favor a policy or a doctrine that would encourage, incite, and inspire in negroes roaming the highways the desire and the purpose to go to a farmer's house, where his wife was cooking dinner for him while he was at work in the field, with her little baby sitting on a quilt on the floor, while she was looking after the household and guarding the roof tree and her offspring, and there attack that woman and assault her? Yet that is what has happened. Dancing together in New York City! The negro says, "Why, they have social equality up there in New York; I will go in here and attack this white woman; she is alone." And they invade the sanctity of the white fireside; they go into the temple of the white man; they assault her who is dearer than life to him, the wife of his bosom and the mother of his children, the woman he has promised to love, cherish, and protect with his life if need be. And here comes Governor Smith with this false doctrine, with this dangerous negro equality doctrine, and the New York World, his mouthpiece, editorially declaring that he is in favor of social equality!

The dance halls that run now in New York City, with Governor Smith's approval and sanction and Mayor Walker's approval and sanction, are proof of that. When the antilynching bill was pushed through the House which provided that if a negro assaulted a white woman, and her loved ones killed him, the white people of the county had to pay to his family $10,000—that is a premium on rape; that is an encouragement to the lawless negro to assault white women—when our Democrats from the South in the House begged these Tammany Democrats to vote with them to help defeat that monstrous measure, not one of them responded. Every one of them turned their backs on the South. There was no helping hand from them.

Now, here is Governor Smith nullifying the Constitution. He has already done it so far as New York State is concerned. He has withdrawn New York from the Union so far as the eighteenth amendment is concerned. There is a doctrine of the Pope's that any law or part of law condemned by the Pope is not binding on Catholics. The Governor of New York is a Roman Catholic; so if he has decided—and they have—that the eighteenth amendment is not binding on them, he has declared in one of the sovereign States of 48, "This realm is set apart. We have no sympathy for you and no support for you, you eighteenth amendment."

That is Governor Smith—a wet, wringing wet, a Tammanyite—and Tammany is covered all over with the slime of corruption, graft, and scandal.

Why, even the papers of New York have begun to print it to the public—graft, scandal, stealing, thieving—and out of all

that comes this white champion of social equality for the black race, of dance-halls where white girls are lured. God deliver them from such a den, and God deliver this Nation from a man who will sanction that in his own home town! God deliver the Nation from a man who will proclaim himself in favor of social equality for the two races, when every white man of any sense, principle, and decency is against it, and knows that it will not do.

There is room enough for us all. The negro will go his way and work out his own salvation with the aid of his southern white friends, if let alone by such as Governor Smith. The white people will go their way and work out their salvation, and they will all get along well with the negro, but when you have a miserable combination like this, where a man is willing to do anything to get negro votes; where he shows himself to be unworthy to lead the white people, and declares in favor of social equality, and encourages its practice in his home city and State, and then withholds the vote of Tammany from giving aid to the southern white people, he is not entitled to have a single vote out of the South. He is not going to get any votes out of the South; and I make the prediction now, that if Arkansas casts her vote or any of her votes for Al Smith in the Houston convention, every one of them, including their present Senators, who are responsible for it, are doomed politically in Arkansas.

I know those people. They will not vote for a man who will turn his back on them and all that is dear to them and cast the vote of Arkansas in the name of the white men and women of that great State, for Governor Alfred E. Smith to be President of the United States. They will not do it. You tell them that this man permits these dance halls in New York State, and the New York World, his mouthpiece, says he is for social equality, and tell them the stand they took on the antilynching bill—tell them that, give them the truth, and they will spurn any man who has betrayed them, I do not care who he is.

Senators, to the white men and women of the South this question is bigger than any man's ambition for the Presidency. Put alongside of that—and I am through for the moment—the corruptionist, the rich Roman Catholic contractor, telling this great Nation in its teeth that they are ready to pay what is necessary to buy this nomination and election!

I received a letter from an Al Smith supporter up in Canada giving me warning that I was a marked man. I am going to say to you frankly that I believe they would have killed me or poisoned me long ago if they could have gotten away with it; but they know there are certain written provisions in existence that would take a long train of them into that bourne from which no traveler has ever returned. That letter from a man in Canada says, "Let me remind you that you are a marked man; and let me remind you of what happened to William Jennings Bryan, Wayne B. Wheeler, and Frank B. Willis."

Are we intimidated by these people and these tactics? Has the courage gone out of the statesmanship of the South, its leadership? Where are we, and whither are we drifting?

Mr. President, in the life of every man who is worthy to live, who will fight and die, if need be, for his country, there comes a time when he must decide these questions. Would you permit this bunch to threaten you and drive you away from positions when you knew that your position was sound and that its maintenance meant the saving of your country?

I know that as I live and God reigns, He gives me strength to fight this battle, and He will continue to give it to me. I stand here and plead in the name of the white women of the South—God bless them! While I speak at this hour to-day many of them are looking after their household affairs, cleaning up the dinner tables, and their husbands are going back to work in the fields to make that which provides for his own family and feeds and clothes the world. There is a Bible on the center table in that home, pictures of Jesus of Nazareth and of Mary, of members of the family, dear ones gone. They are living their lives; they are serving their country as best they can. They cling to American ideals and institutions. They love our country. They do not want to see it turned over to this group.

It would be exceedingly dangerous to do it. Now they are coming with corruption on one hand, barrels of corrupt funds, and with social equality on the other, and a tearing out of the Constitution, sections of the organic law, throwing them all down, and telling me, "Oh, he is going to be nominated; why not go ahead and submit to it?" I said, "No; he is not going to be nominated." Watch the convention. He will never get over 550 at the outside. We will hold the line. In the name of the Democrats who are dead, in the name of real Democrats who are living, in the name of American Democrats yet unborn, we will hold the line. In the name of white supremacy in the Nation—and I assert that this is a white man's country; he is going to rule it; he has ruled every foot of American soil—in the name of the white men and women of the Nation, and, before I close, in the name of the white people of the South, who have suffered at the hands of this dreadful race question in the past, I promise you and promise them, we will hold the line! He shall not pass!

Mr. President, I desire to include in the RECORD part of a letter I received from Montreal, Canada, which starts off by saying:

DEAR SIR: Please note that Governor Smith's Catholic admirers in Canada are contributing to his campaign fund.

Here is a newspaper reference to Frank O'Connor, of Toronto, a Roman Catholic, who has contributed $1,000 to help elect a Roman Catholic President of the United States.

Mr. President, I ask to have this indictment of Mr. Guffey printed as an exhibit to my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

INDICTMENT AGAINST JOSEPH F. GUFFEY, OF PENNSYLVANIA

In the District Court of the United States of America for the Southern District of New York

(Of the December term, in the year 1922)

FIRST COUNT

SOUTHERN DISTRICT OF NEW YORK, *ss:*

The grand jurors for the United States of America empaneled and sworn in the District Court of the United States for the Southern District of New York at the December term of said court in the year 1922, and inquiring for said district, upon their oath present, that Joseph F. Guffey, late of the Borough of Manhattan, in said Southern District of New York, continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said borough and district, was an officer of the United States, to wit, director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on February 25, 1921, said Joseph F. Guffey had in his custody and under his control as such officer, and in the execution of his office as such officer, and in the execution of his office as such director of said bureau of sales, to wit, in said borough and district, divers moneys of the moneys and property of the United States; to wit, moneys in the sum of $275,000, which theretofore had come into his possession and under his control in the execution of his said office, and under color and claim on his part of authority as such officer; a description of the several kinds of which said moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there the said moneys, to the amount and value of said sum of $275,000, unlawfully and feloniously did wrongfully convert to his own use and embezzle; against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

SECOND COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present, that said Joseph F. Guffey, continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was employed as an assistant of an officer of the United States; that is to say, said Joseph F. Guffey was employed as director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on February 25, 1921, said Joseph F. Guffey had in his custody and under his control as such assistant of said officer of the United States, to wit, of said Alien Property Custodian, and in the execution of his said employment, to wit, in said borough and district, divers moneys of the moneys and property of the United States, to wit, moneys in the sum of $275,000, which theretofore had come into his possession and under his control in the execution of his employment, and under color and claim on his part of authority as such assistant of said officer; a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $275,000, unlawfully and feloniously did wrongfully convert to his own use and embezzle; against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

THIRD COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present that said Joseph F. Guffey, continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was an officer of the United States, to wit, director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on March 7, 1921, said Joseph F. Guffey had in

his custody and under his control as such officer, and in the execution of his office as such director of said bureau of sales, to wit, in said borough and district, divers moneys of the moneys and property of the United States, to wit, moneys in the sum of $7,671.06, which theretofore had come into his possession and under his control in the execution of his said office, and under color and claim on his part of authority as such officer; a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $7,671.06, unlawfully and feloniously did wrongfully convert to his own use and embezzle; against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

FOURTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present that said Joseph F. Guffey, continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was employed as an assistant of an officer of the United States, that is to say, said Joseph F. Guffey was employed as director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on March 7, 1921, said Joseph F. Guffey had in his custody and under his control as such assistant of said officer of the United States, to wit, of said Alien Property Custodian, and in the execution of his said employment, to wit, in said borough and district, divers moneys of the moneys and property of the United States, to wit, moneys in the sum of $7,671.06, which theretofore had come into his possession and under his control in the execution of his said employment, and under color and claim on his part of authority as such assistant of said officer; a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $7,671.06, unlawfully and feloniously did wrongfully convert to his own use and embezzle, against the peace and dignity of the United States and contrary to the form of the statute of the same in such case made and provided.

FIFTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present that said Joseph F. Guffey continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was an officer of the United States, to wit, director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on March 6, 1921, said Joseph F. Guffey had in his custody and under his control as such officer, and in the execution of his office as such director of said bureau of sales, to wit, in said borough and district, divers moneys of the moneys and property of the United States, to wit, moneys in the sum of $406,001, which theretofore had come into his possession and under his control in the execution of his said office, and under color and claim on his part of authority as such officer; a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys to the amount and value of said sum of $406,001,36, unlawfully and feloniously did wrongfully convert to his own use and embezzle; against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

SIXTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present, that said Joseph F. Guffey, continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was employed as an assistant of an officer of the United States, that is to say, said Joseph F. Guffey was employed as director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on March 6, 1921, said Joseph F. Guffey had in his custody and under his control as such assistant of said officer of the United States, to wit, of said Alien Property Custodian, and in the execution of his said employment, to wit, in said borough and district, divers moneys of the moneys and property of the United States, to wit, moneys in the sum of $406,001.36, which had theretofore come into his possession and under his control in the execution of his said employment, and under color and claim on his part of authority as such assistant of said officer; a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $406,001.36, unlawfully and feloniously did wrongfully convert to his own use and embezzle, against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

SEVENTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present that said Joseph F. Guffey continuously throughout the period of time from August 18, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was an officer of the United States, to wit, director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on February 25, 1921, said Joseph F. Guffey had in his custody and under his control as such officer, and in the execution of his office as such director of said bureau of sales, to wit, in said borough and district, divers moneys of the moneys and property of said Alien Property Custodian of the United States, to wit, moneys in the sum of $275,000, which heretofore had come into his possession and under his control in the execution of his said office, and under color and claim on his part of authority as such officer; a description of the several kinds of which said last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there the said moneys, to the amount and value of said sum of $275,000, unlawfully and feloniously did wrongfully convert to his own use and embezzle, against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

EIGHTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present, that said Joseph F. Guffey, continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said Southern District of New York, was employed as an assistant of an officer of the United States, that is to say, said Joseph F. Guffey was employed as director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on February 25, 1921, said Joseph F. Guffey had in his custody and under his control as such assistant of said officer of the United States, to wit, of said Alien Property Custodian, and in the execution of his said employment, to wit, in said borough and district, divers moneys of the moneys and property of said Alien Property Custodian of the United States, to wit, moneys in the sum of $275,000, which theretofore had come into his possession and under his control in the execution of his said employment, and under color and claim on his part of authority as such assistant of said officer; a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $275,000, unlawfully and feloniously did wrongfully convert to his own use and embezzle; against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

NINTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present that said Joseph F. Guffey, continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan in said southern district of New York, was an officer of the United States, to wit, director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on March 7, 1921, said Joseph F. Guffey had in his custody and under his control as such officer and in the execution of his office as such director of said bureau of sales, to wit, in said borough and district, divers moneys of the moneys and property of said Alien Property Custodian of the United States, to wit, moneys in the sum of $7,671.06, which theretofore had come into his possession and under his control in the execution of his said office, and under color and claim on his part of authority as such officer; a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $7,671.06, unlawfully and feloniously did wrongfully convert to his own use and embezzle; against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

TENTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present that said Joseph F. Guffey continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was employed as an assistant of an officer of the United States, that is to say, said Joseph F. Guffey was employed as director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on March 7, 1921, said Joseph F. Guffey had in his custody and under his control as such assistant of said officer of the United States, to wit, of said Alien Property Custodian, and in the execution of his said employment, to wit, in said borough and district, divers moneys of the moneys and property of said Alien Property Custodian of the United States, to wit, moneys in the sum of $7,671.06, which theretofore had come into his possession and under his control in

the execution of his said employment, and under color and claim on his part of authority as such assistant of said officer; a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $7,671.06, unlawfully and feloniously did wrongfully convert to his own use and embezzle, against the peace and dignity of the United States, and contrary to the form of the statute of the same in such case made and provided.

ELEVENTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present that said Joseph F. Guffey continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was an officer of the United States, to wit, director of the bureau of sales, in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on March 6, 1921, said Joseph F. Guffey had in his custody and under his control as such officer, and in the execution of his office as such director of said bureau of sales, to wit, in said borough and district, divers moneys of the moneys and property of said Alien Property Custodian of the United States, to wit, moneys in the sum of $406,001.36, which theretofore had come into his possession and under his control in the execution of his said office, and under color and claim on his part of authority as such officer, a description of which last-mentioned moneys said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $406,001.36, unlawfully and feloniously did wrongfully convert to his own use and embezzle, against the peace and dignity of the United States and contrary to the form of the statute of the same in such case made and provided.

TWELFTH COUNT

And the grand jurors aforesaid, upon their oath aforesaid, do further present, that said Joseph F. Guffey, continuously throughout the period of time from August 16, 1918, to March 12, 1921, in said Borough of Manhattan, in said southern district of New York, was employed as an assistant of an officer of the United States, that is to say, said Joseph F. Guffey was employed as director of the bureau of sales in the office of the Alien Property Custodian of the United States; that during said period of time, to wit, on March 6, 1921, said Joseph F. Guffey had in his custody and under his control as such assistant of said officer of the United States, to wit, of said Alien Property Custodian, and in the execution of his said employment, to wit, in said borough and district, divers moneys of the moneys and property of said Alien Property Custodian of the United States, to wit, moneys in the sum of $406,001.36, which theretofore had come into his possession and under his control in the execution of his said employment, and under color and claim on his part of authority as such assistant of said officer; a description of which last-mentioned money said grand jurors, by reason of their want of knowledge upon the subject, are unable to give; and that said Joseph F. Guffey then and there said last-mentioned moneys, to the amount and value of said sum of $406,001.36, unlawfully and feloniously did wrongfully convert to his own use and embezzle; against the peace and dignity of the United States and contrary to the form of the statute of the same in such case made and provided.

UNITED STATES ATTORNEY.

Mr. HEFLIN. I also ask to have printed in the RECORD in connection with my remarks an article on examples of Roman Catholic tolerance toward our public schools.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

EXAMPLES OF ROMAN CATHOLIC TOLERANCE TOWARD OUR PUBLIC SCHOOLS

During the recent hearings on the Curtis-Reed bill before the House Committee on Education many Roman Catholics appeared in opposition to the bill. In fact, nine-tenths of the opposition to the bill came from this source, and the remaining tenth of the opposition was due to the vicious and malicious propaganda which is constantly going on in the Roman Catholic Church against the public schools of our country.

Mr. ROBSION of Kentucky, ranking Republican member of the committee, asked some pertinent questions of some of the representatives of Roman Catholic organizations. Mr. DOUGLASS of Massachusetts, a Roman Catholic member of the committee, always vehemently denounced any suggestions that the Roman Catholic Church was opposed to the public schools. Some of those appearing stated that their opposition to the bill was not based upon any religious sentiment, but that their opposition was based upon the bad effect which a department of education would have on our public-school systems. In light of the position of the popes, cardinals, bishops, and other Roman Catholics against the public schools, their fear of the destruction of the public schools by a department of education is just another expression of Jesuitical hypocrisy.

Keeping in mind a statement by Mr. DOUGLASS that the Roman Catholic Church is not opposed to the public schools, and also keeping in mind the statements of the Roman Catholics appearing before this committee that religion is not the grounds for their opposition to a department of education, we submit extracts from the syllabus of Pope Pius IX, dated December 8, 1864, and from statements of the cardinals, priests, and the Catholic press.

From the following declarations our weak-kneed and uninformed Protestants may get a glimpse of the kind of tolerance which the Roman Catholic Church practices toward the Protestants and our public schools. The Golden Rule implies the principle of tolerance. The Roman Catholic Church is supposed to know this principle, although, historically, it does not practice it. Blind though you be to her purpose to destroy our institutions by first destroying our public schools, read carefully the utterances quoted below, and then decide for yourselves whether such vicious and unwarranted attacks upon our public schools should go unheeded by you.

(From the syllabus of Pope Pius IX)

"1. The state has not the right to the exclusive direction of the public schools.

"2. The church has the right to deprive the civil authorities of the entire government of the public schools.

"3. The Roman Catholic Church has the right to interfere in the discipline of the public schools and in the choice of the teachers for those schools.

"4. That the public school, open to all children, for the education of the young, should be under the control of the Roman Catholic Church, should not be subject to the civil powers, nor made to conform to the opinion of the age.

"5. Education outside of control of the Roman Catholic Church is a damnable heresy."

Now read and carefully note the following excerpts and quotations from Roman Catholic sources, which can be substantiated as absolutely exact in the wording as well as the source of their origin:

"Let the public-school system go to where it came from—the devil." (Freeman's Journal, November 16, 1869.)

"An imperfect and vicious system of education which undermines the religion of youth." (Cardinal Gibbons.)

"The common schools of this country are sinks of moral pollution and nurseries of hell." (The Chicago Tablet.)

"It will be a glorious day in this country when, under the laws, the school system will be shivered to pieces." (Catholic Telegraph.)

"The American school system is a national fraud, a social cancer presaging the death of national morality." (Catholic Telegraph.)

"We would rather our children should grow up in ignorance of letters than be taught in a school that is not Catholic." (Catholic Review.)

"The question of education is one of major and universal interest to our people. It is one of the penalties of living in a republic that every man or woman who has a vote is supposed to do his own thinking, for those who rule us by virtue of our votes and those who make our laws are but our representatives. We persist in our attiture of dissatisfaction with the public schools. They are quite as unacceptable to us as they ever were. Once they sinned by excess, now by deficiency. Once they taught religion opposed to ours, now by silence they undermine it.

"Could there be anything, I ask you, more futile or more repugnant to a Christian than the attempt (of which we read in the papers) to teach morality under the guise of sex hygiene in the public schools?

"In the privacy of the confessional we deal with such weaknesses, and set forth the stronger religious motives for morality and indicate the sure methods of recovery." (Extracts from sermon by Bishop Dowling, Des Moines, Iowa, September 15, 1913.)

"We must take part in the elections, move in solid mass in every State against the party pledged to sustain the integrity of the public schools." (Cardinal McClosky.)

"The State has no right to educate, and when the State undertakes the work of education it is usurping the power of the church." (Bishop McQuade, in a lecture in Boston, February 13, 1876.)

"I do not consider that we are doing our duty as American citizens, to ourselves, or to our children in permitting such a system of public schools to exist as we have to-day." (Professor Dunne, of the Jesuit College, Washington, D. C.)

"The day is not far distant when Catholics at the order of the Pope will refuse to pay the school tax and will send bullets into the breasts of the officials who attempt to collect them." (Monsignor Cappell.)

"There is and always must be a vast difference between those educated according to the mind of the church and those educated according to the mind of the world. The first are trained for eternity, the latter for the trickeries of time." (The Rosary Magazine (R. C.), September, 1914.)

"SCRANTON, PA., August 21, 1911.—Two thousand members of the Catholic Federation applauded Rev. Thomas F. Coakley, secretary of Bishop Canevin, of Pittsburgh, when the Pittsburgh priest demanded

that the Catholic Church be reimbursed by the State at the rate of $36,000,000 a year for the education of the Catholic young people." (The Pittsburgh Dispatch.)

"The children of the public school turn out to be horse thieves, scholastic counterfeiters, and well versed in schemes of deviltry. I frankly confess that Catholics stand before the country as enemies of the public schools. They are afraid that the child that left home in the morning would come back with something in his heart as black as hell." (Priest Phelan, St. Louis, October, 1873.)

"We do not indeed prize as highly as some of our countrymen seem to do the simple ability to read, write, and cipher. The best ordered and administered State is that in which the few are well educated to lead, and the many are trained to obedience, are willing to be directed, content to follow, and do not aspire to be leaders. We believe the peasantry in old Catholic countries two centuries ago were better educated, although for the most part unable to read and write, than are the great body of the American people of to-day." (The Catholic World for April, 1870.)

"The population of the archdiocese of St. Paul (Minn.) being largely rural, many congregations can not easily organize parochial schools; nor in such congregations is there a very pressing need of parochial schools, as teachers in the State or district schools usually are Catholics, and due provision is otherwise made for the religious instructions of the pupils." (Official Catholic Directory, 1914, p. 225.)

"Because of the weak-kneed Catholics who are afraid to say their souls are their own, the American Federation of Catholic Societies has been organized to bring the powerful influence of the entire Roman Catholic Church in America against the injustice of the public-school system, to secure the revision of the histories and books of reference prejudicial to the Roman Catholic Church, the removal of bigoted officials from holding office, and a move toward stricter divorce laws." (Bishop McPhaul before the Federation of Catholics in Milwaukee.)

"The public school is a national fraud; it must cease to exist, and the day will come when it will cease to exist." (Priest McCarthy in a sermon December 23, 1887.)

"The public-school system is a disgrace to the civilization of the nineteenth century." (Archbishop Hughes, of New York.)

"Our demand is Catholic schools, under Catholic control, for Catholic children, with Catholic teachers. This and not a point less is what we demand and what we will have." (The Catholic Times.)

"I would as soon administer the sacrament to dogs, and it would do the poor dogs quite as much good, as to Catholics who send their children to the public schools; for the public schools are nurseries of vice, and are godless schools, and they who send their children to them can not expect the mercy of God." (Priest Walker, of New York.)

"Read the records—the hideous records—records of divorce courts. Scan the daily papers. What an appalling spectacle! Murder, robberies, divorces, free love, infamies, shame unspeakable. Neither life, limb, nor property is secure. Why? Because we are surrounded by moral monsters—products of a godless system of education." (Words of a priest by the name of Mike Foley, in the Western Catholic, Quincy, Ill., dated latter part of 1914.)

"Our children must be taught nothing but the doctrine of the one true church, and must not be allowed to associate in any way, or listen to the profane language of godless Protestants, and, in particular, they must never be allowed within the walls of the filthy and damnable public schools. Help to educate the little ones, and in a short time America will belong to the children of Christ. Protestantism is fast dying out, with its go-to-church days and fake gospels. Soon the name of coward Luther will be a stench in the nostrils of every true American. He stands to-day condemned in hell, and the Protestant rabble that followed his ways can be heard groaning for Roman Catholic masses in purgatory." (Priest J. T. O'Reilly, Lawrence, Mass.)

We now quote from "A Manual of Moral Theology for English-Speaking Countries" by Rev. Thomas Slater, S. J. (Society of Jesus) with notes on American legislation by Rev. Michael Martin, S. J. (Society of Jesus) and with the imprimatur of John M. Farley, late Cardinal of New York.

"The church, too, has received a divine commission to teach, and those who by baptism have become subject to her authority are obliged to be guided by her directions in this all-important matter. The church condemns all non-Catholic schools, whether they be heretical and schismatical, or secularist, and she declares that as a general rule no Catholic parent can send his young children to such schools for educational purposes without exposing their faith and morals to serious risk, and therefore committing a grave sin."

Quoting from the "America," issue of February 8, 1928, we submit an excerpt from an article by Paul L. Blakely, S. J. (Society of Jesus), in which he says:

"To know what the Catholic Church thinks of secular education, and by consequence of the public-school system, read her law. It will make a good beginning to reflect that this law positively forbids Catholics to send their children to the public school.

"Catholics think in this matter with the church. And the thought of the church is expressed by Pius IX in the splendid sentence: 'Our divine religion must be the soul of the entire academic education.'

"The Catholic Church condemns every system of education 'which concerns itself with the knowledge merely of natural things, and only, or at least primarily, with the ends of social life.' (Syllabus, Prop. 48.) That is, she condemns every system which leaves God out. She does not merely 'criticize' it. She anathematizes it.

"A school which the Catholic Church condemns is a school which every loyal Catholic can 'criticize.' I go further to say that it is a school which every loyal Catholic should roundly condemn.

"If it is, further, a school maintained as part of a political system, every American may without peril to his loyalty 'criticize' it. If he deems it incompatible with the country's deepest interests, his loyalty binds him not only to criticize, but condemn."

From the foregoing quotations, no one should fool himself with the thought that any Roman Catholic, who is a true and devoted member of that church, can be a true Roman Catholic and at the same time a true friend of the public-school systems in our country. Either he must "hate the one, and love the other; or else he will hold to the one, and despise the other."

"It is conceded by all leaders of thought in America that the perpetuity of our republican form of government and all of its most potential institutions, as the continued right of religious liberty, freedom of press, freedom of speech, and the absolute separation of church and state must ever depend upon the education of the masses; it is, therefore, a matter of common knowledge that in the public schools is vested the safety, progress, and prosperity of the Nation.

"The greatest glory of this proud Nation to-day is its public-school system, where the foundation is laid for the future character of our American citizenship. The Italian Pope seeks to do away with our public schools and establish in their places his parochial schools. Why does he seek to do this? Why is he so anxious to destroy our public-school system? Why does he seek to control and direct the education of our American boys and American girls? Because his theory is that if he can control the education of a child until it is 10 years of age you can work on the child the rest of his life, but you never can eradicate the effect of his influence. His theory is undoubtedly correct. The impressions made upon the mind of a child between the ages of 5 and 10 can never be wholly removed.

"It therefore behooves us as loyal American citizens and as earnest, God-fearing, and liberty-loving parents to look closely after the education of our boys and girls; to be very certain that the source from which comes those early educational influences is uncontaminated by that enemy of civilization, the Roman Catholic hierarchy. The Pope seeks to do way with our public schools and take charge of our American educational system himself, because he knows that the character of our future American citizenship is determined by the educational influences that surround the child during his school years. Unfortunately for the Pope, he can not gather our Protestant or non-Catholic boys and girls into his parochial schools, so he has adopted the next best plan in the promotion of his campaign to make America Roman Catholic—he is installing his parochial school-teachers in our public schools. It is true that when they are employed as teachers in our public schools they do not wear the livery of the Roman Catholic hierarchy—the priestly robes and the uniform of the nun—but at the same time they are expected and pledged to instill into the minds of the children under their charge the objectionable doctrines that emanate from the Vatican at Rome.

"It is a lamentable fact and a fact that we should be ashamed to acknowledge that in 12 of the largest cities in the United States 60 per cent of the teachers in the public schools are sworn subjects of the Pope at Rome. That is not only the case in our large cities, but is also true in respect to many small towns throughout the country where Roman Catholic teachers have been employed in the public schools, even though the members of the school boards were non-Catholic and should have known better.

"Is it not almost unbelievable that loyal American citizens could be so blind to the dangers that threaten the future welfare of this American Republic as to permit the avowed enemies of our public-school system to be employed as teachers in the very schools which they seek to destroy? And yet that is what is going on in every State of this broad land of ours, and we continue to be asleep to the danger.

"In some of our cities the machinery of the public schools has been almost entirely monopolized and converted to Roman Catholic management. Notwithstanding the oft-repeated blatant anathemas hurled by priests and Roman Catholic editors, denouncing these schools as a national fraud, turning out "horse thieves, scholastic liars, and counterfeiters," and denouncing them as "a cancer presaging the death of national morality"; nevertheless it is a fact that not one of the many thousands of Catholic teachers, principals, superintendents, and trustees of our public schools have ever lifted a voice in protest against such slanders, and notwithstanding the fact that every insulting denunciation made by the church against the conduct of the public schools reflects as odiously upon these Catholic teachers and

principals as upon the Protestants, at whom they were doubtless only intended. Nor is it deniable that the public-school funds have been pilfered and diverted by Roman Catholic influence to the maintenance and support of their own parochial schools."

Mr. HEFLIN. Tolerance! Tolerance! What crimes are committed; what institutions of liberty are cut down in thy name? How long, O God, will the Members of this Senate stand mute to the facts here quoted. Awaken America! Awaken, while there is yet time!

A TALE OF TWO SMITHS

Mr. TYDINGS. I ask to have printed in the RECORD an editorial from this morning's Washington News, entitled "A tale of two Smiths."

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Samuel Insull gave liberally to Frank Smith and started a scandal.

William Kenny gave liberally to Al Smith and started a romance.

The story of the Insull contribution barred Frank from the Senate.

The story of the Kenny contribution—of the boyhood friendship that began when both were poor and ripened through the years as the one grew rich in business and the other powerful in politics—becomes a sentimental asset instead of a liability in Al's presidential campaign.

The answer is—there's a difference in Smiths.

Ordinarily, as things go in practical politics, if it were revealed that a contractor had given $70,000 to a campaign and intended to give more, the recipient would be ruined.

But not so with Al.

Instead, the public which would condemn the ordinary mortal views the fact without suspicion in the case of Al; reads nothing ulterior into it, and accepts at face value the contractor's declaration of friendship as his sole motive.

All of which is a lesson in the tremendous power of a good reputation when once firmly established.

During his four terms as governor, Al Smith has proved one thing beyond peradventure of a doubt—that he is honest. Even his enemies admit that now. Every effort to establish the contrary was tried and found wanting a long time ago. Those who did the trying were discredited. And it developed finally that attempting to prove Al Smith dishonest was a dangerous and an unprofitable occupation. So his enemies quit trying.

Accordingly, what in the case of another man would be pounced upon as a juicy morsel—the Kenny story—is passed up like a hot brick.

The nomination of Al Smith will bring a bitter attack from many sources and along many lines. He will be assailed for his wetness, for his Tammany membership, for his religion, for his position on this and that public question, for the way he wears his derby, and the way he pronounces his words. But his honesty will not be attacked.

Such is the value of a reputation when founded on rock.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the bill (S. 4229) to extend the time for completing the construction of a bridge across the Mississippi River near and above the city of New Orleans, La.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H. R. 11338) authorizing the Kansas City Southern Railway Co., its successors and assigns, to construct, maintain, and operate a bridge over the Missouri River near Randolph, Mo.

The message further announced that the House had agreed to the amendments of the Senate to each of the following bills of the House:

H. R. 7373. An act providing for the meeting of electors of President and Vice President, and for the issuance and transmission of the certificates of their selection and of the result of their determination, and for other purposes; and

H. R. 11990. An act to authorize the leasing of public lands for use as public aviation fields.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 3793. An act authorizing the St. Croix Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Croix River near Grantsburg, Wis.;

S. 4345. An act authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Kansas City, Kans.;

S. 4357. An act authorizing Henry Horsey, Winfield Scott, A. L. Ballegoin, and Frank Schee, their heirs, legal representatives, and assigns, to construct and operate a bridge across the Des Moines River at or near Croton, Iowa;

S. 4381. An act authorizing H. A. Rinder, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebr.;

H. R. 457. An act to create a board of local inspectors, Steamboat Inspection Service, at Hoquiam, Wash.;

H. R. 6104. An act to amend sections 57 and 61 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909;

H. R. 11479. An act to reserve certain lands on the public domain in Valencia County, N. Mex., for the use and benefit of the Acoma Pueblo Indians;

H. R. 12632. An act to provide for the eradication or control of the European corn borer; and

H. R. 13511. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

REPORT OF PUBLIC BUILDINGS COMMISSION (S. DOC. NO. 112)

Mr. SMOOT. Mr. President, under the law, as chairman of the Public Buildings Commission, I am required to make an annual report on behalf of that commission.

I have here the report for the calendar year 1927. I submit it to the Senate at this time and ask that it be printed as a Senate document, with the illustrations.

The PRESIDING OFFICER (Mr. ROBINSON of Indiana in the chair). Without objection, it will be so ordered.

TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. BINGHAM. Mr. President, although I might speak for a long time on this subect, I shall not consume more than 5 or 10 minutes.

It appears to those whom I have the honor to represent in part in the State of Connecticut that the estate tax is a State matter.

When anyone inherits property he inherits it through the laws of the State in which he resides. The method in which anyone can inherit property is fixed by State law and not by Federal law. Inheritances are distinctly a State matter. It is true that in periods of great emergency, during the period of the Civil War and during the period of the World War, when the Federal Government was greatly in need of large additions to the funds required for the national defense, the Federal Government has passed an estate tax, and has helped itself liberally from the estates of those who have died, and has taken large sections out of the money which otherwise would have been inherited by the children and legal heirs of the deceased. It has usually been held that this was intended only for great emergencies.

At the time when the 1918 tax bill was passed—which, as is shown by the charts on the wall in the back of the Chamber, was one of the most severe tax bills that this country ever passed—a large part of the money received by the Government under that bill came from taxes on inheritances. We have, however, revised the rates twice or three times since then; and, as a matter of fact, we have cut down the amount received from inheritance taxes so that it forms a very small part of the total.

May I ask the Senator from Utah what is the total amount received from the inheritance tax under the present revenue law?

Mr. SMOOT. I can give it to the Senator by years. For the last three years the following collections were made from the estate tax:

For the year 1925, $101,421,766.20.

For the year 1926, $116,041,036.09.

For the year 1927, $100,339,851.96.

An estimate of $65,000,000 has been made for the fiscal year ending June 30, 1928.

Mr. BINGHAM. How much of that was refunded to the States?

Mr. SMOOT. Let me see if I have the exact percentage.

Mr. COUZENS. Mr. President, will the Senator yield?

Mr. BINGHAM. Yes.

Mr. COUZENS. That is the net amount received by the Federal Government, because the Federal Government makes no refund to the States. The Senator asked how much of that was refunded.

Mr. SMOOT. I say that that is the net amount received by the Federal Government from the estate tax. The Federal Government makes no refund to the State in which the decedent lived.

Mr. FLETCHER. It is not a question of refund; it is a credit.

Mr. SMOOT. It is a question of credit.

Mr. COUZENS. But, I say, those are the net amounts received by the Federal Government.

Mr. SMOOT. Certainly; but the Senator is correct as to a refund. The Federal Government gives each of the States credit for 80 per cent of the amount paid by that State.

Mr. FLETCHER. It gives each State a credit for inheritance—taxes paid in the State up to 80 per cent of the Federal tax.

Mr. SMOOT. Yes; it is the other way around from what I stated.

Mr. HOWELL. Mr. President, may I ask the Senator from Utah what the net amount will be for 1928?

Mr. SMOOT. An estimate of $65,000,000 is made for the fiscal year ending June 30, 1928.

Mr. FLETCHER. Mr. President, will the Senator yield?

Mr. BINGHAM. Certainly.

Mr. FLETCHER. I have a statement to the effect that the Treasury Department estimates show that if a complete repeal of the estate tax up to the end of the fiscal year 1929 takes place it will mean a $7,000,000 loss to the Federal Government.

Mr. SMOOT. That refers to the first six months. That is the fiscal year, and not the calendar year.

Mr. BINGHAM. Do I understand the Senator from Utah to say, then, that the loss to the Federal Government if this should pass would be only $7,000,000?

Mr. SMOOT. For the fiscal year. The fiscal years run, as the Senator knows, from July 1 to June 30. The estimate is only $7,000,000 for the fiscal year. Of course, there is just a short time left of this fiscal year.

Mr. BINGHAM. What does the Senator think would be the loss to the Federal Government in the next fiscal year if this amendment should pass?

Mr. SMOOT. I have no estimate of that, so I could not say.

Mr. HOWELL. How much would go to the various States of the Union?

Mr. SMOOT. Sixty-five million is for the full fiscal year ending June 30, 1928; that is, ending this year. I suppose there would be at least that amount collected for the next fiscal year.

Mr. BINGHAM. Is that net, over and above what is given to the States?

Mr. SMOOT. There are only four States now that have no inheritance tax. Those are Alabama, the District of Columbia, Florida, and Nevada. All of the other States would receive their 80 per cent credit.

Mr. COUZENS. May I suggest to the Senator that that was not a reply to the Senator from Nebraska, but was a reply to the Senator from Connecticut? The Senator from Nebraska asked a question to which that might have been intended to be a reply, but it was not.

Mr. SMOOT. I stated I had no estimate.

Mr. FLETCHER. What is credited to the States depends on the State receipts. One State may get a certain amount, and another another amount.

Mr. HOWELL. If the States do not get it, then the Federal Government gets it.

Mr. FLETCHER. Up to 80 per cent of the Federal tax.

Mr. HOWELL. Yes.

Mr. BINGHAM. Mr. President, the amount collected by the Federal Government at the present time is a very small amount of the general income of the United States Government. Furthermore, the law in its present form, whereby 80 per cent of the taxes may be handed over to the States rather than be used by the Federal Government, shows clearer than anything else I can say that the object of this tax is not to raise revenue for the Federal Government to pay Federal expenses.

Mr. KING. Mr. President, will the Senator yield?

Mr. BINGHAM. The object of the present tax is an effort to force certain States which now charge no inheritance tax to change their laws; and to force certain other States, like the State of Connecticut, which have moderate inheritance tax laws, to increase the inheritance taxes.

I yield to the Senator from Utah.

Mr. KING. I did not hear the statement of my colleague as to the amount of revenue which is derived by the Federal Government from the estate tax. For the calendar year 1926 the total tax was $138,056,542.

Mr. BINGHAM. I will say to the Senator that his colleague quoted those figures.

Mr. KING. The highest amount received in any one year was $154,000,000. Speaking for myself, if I may be pardoned for interjecting a personal observation, I do not agree with the Senator that the object of this is to force the States into the levying of an estate tax. I believe that for the present this should be one of the sources from which the Federal Government should derive revenue to meet the very heavy expenditures which it is making from year to year. Moreover, we owe approximately between seventeen and eighteen billion dollars of obligations incurred in the prosecution of the war. Until the States avail themselves of the right to impose inheritance taxes, so long as they show such a reluctance to impose such taxes, I feel that the Federal Government, aside from the question of the propriety of it—that is, with respect to the rights of the States, and so on—should impose an estate tax. So I say, speaking for myself, I am in favor of continuing this tax, at least, for the present.

I know that back of this movement to secure a repeal of this tax is a determination to secure a repeal of the estate taxes in all States. The New York Evening Post and other papers a short time ago announced that the movement was to secure the repeal of the inheritance tax, as it was a tax upon capital, and the Senator knows that there is a strong feeling among many people, especially those who have large estates, that they ought to be exempt from inheritance tax, on the ground that it is a tax upon capital. I believe that if the Federal Government should repeal the estate tax to-morrow there would be a great drive, and a successful drive, in many of the States, to secure the complete repeal of the State inheritance taxes.

Mr. BINGHAM. This is the first I have heard of any such drive. There has been nothing said about it in the State of Connecticut. Our laws there in regard to estate taxes have been on the books for a number of years. Our tax commissioner is entirely in favor of maintaining those taxes in their present form. And yet he is one of the leading exponents of the theory that this source of taxation should be left to the States. If the Senator read the very able article which was prepared by Commissioner Blodgett, tax commissioner of the State of Connecticut, which I had printed in the RECORD a few days ago, he saw just how this matter applies to our State; and in the letter which Commissioner Blodgett wrote to me, which was also printed in the RECORD, he will see how extremely difficult it is to apply the present 80 per cent refund.

I shall take only a moment more, Mr. President, to say that I am extremely sorry to see my friend from Utah, who has stood with me so many times in favor of local self-government, and in favor of States' rights, taking this position. I regard him as one of the few fighting Senators still left on this floor who are really, truly interested in the rights of the States, as opposed to the constantly increasing centralization in the Federal Government. I do not believe that in other matters he has been in favor of any legislation which would coerce the States into passing legislation which, in their judgment, should not be passed.

There are only 4 of the 48 States that have no income tax on estates at the present time.

Mr. BORAH. Only three.

Mr. BINGHAM. Only three, the Senator from Idaho says. There were very few that did not have estate taxes when this law first went into effect. It seems to me a very great pity the Government should take this position. It is subversive of those principles of our Government which were first laid down by Thomas Jefferson, in which the States were relied upon to give the safe foundation to the Government. It seems to me that in view of those principles on which our Government was founded we can trust the States to do right in this matter, and that for the Federal Government to continue in an effort to force the States to put taxation in any form which the States themselves do not choose to put it in is an act of aggression, and one that is contrary to the principles on which our Government was founded.

For that reason, and for the others which I have given, I hope very much that this amendment will pass. I trust that the Federal Government will give back to the States what it took from them only in war time—namely, the right to tax the estates of decedents. I hope the Congress will, furthermore, do away with the iniquitous clause which, by bribery and force, says to the States, "If you do not do right, we will punish you by making you give a larger percentage of income for the conduct of the Federal Government than if you will do as we choose, as we want you to do." It offers them a bribe if they will fall in line with the doctrine set forth in the Federal estate tax. It threatens them with punishment if they do not do so.

I trust this amendment will prevail. If it does not prevail, I propose to offer at a later time an amendment which is now lying upon the table, which calls for a reduction of the rates in the estate tax, and attempts to do away with this 80 per cent repeal clause, which, to my mind, was introduced solely with the idea of clubbing the States into doing something which, in their judgment, they thought it best not to do.

Mr. KING. Mr. President, may I say to the Senator from Connecticut, in response to his suggestion as to the taxes collected by the Government in 1927, that the actual collection that went into the Treasury from the estate tax was $100,339,852. In 1928 the tax under the present law, as estimated, would be $61,000,000. That is for 10½ months of the year. For 1929 the estimate, based upon the very best figures that can be obtained and the best calculations Mr. McCoy can make, is $50,000,000. It will be reduced little by little until finally it will settle down to a $20,000,000 figure.

Mr. BINGHAM. And the reason it will settle down is that as time goes on the States will yield to this pressure put upon them by the Federal Government. That is the reason for the law in its present form. It is that very pressure to which I object.

Mr. KING. Mr. President, if the Senator will further yield, I object to that pressure. I voted against the return. If I had my way, I would have a reasonable rate for the time being, continuing until these war obligations were paid, and would make no remission whatever to the States. I agree with the Senator that that is improper legislation.

Mr. BINGHAM. Then I hope the Senator will vote for my second amendment, if he can not vote for the first.

Mr. KING. I do not know what the second one is; I may vote for it.

Mr. BINGHAM. I ask to have printed in the RECORD the letter I send to the desk.

The VICE PRESIDENT. Is there objection?

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SENTINELS OF THE REPUBLIC,
Washington, D. C., April 6, 1928.

Hon. HIRAM BINGHAM,
United States Senate, Washington, D. C.

DEAR SIR: In behalf of the Sentinels of the Republic I wish to record our earnest hope that the estate tax imposed by the Federal revenue act of 1926 will be repealed. One of the policies recently adopted by the Sentinels, with particular reference to this tax, is the following:

"We advocate the repeal of that provision in the Federal estate tax law which allows an 80 per cent credit for State inheritance taxes paid, because the admitted purpose of that provision is to coerce the States to levy inheritance taxes to the amount of the credit given."

Our objection is not to the imposition of a Federal estate tax, in so far as the revenue from such a tax is needed for the support of the Government, but to the allowance of an 80 per cent credit on account of estate or inheritance taxes paid to the States, with the obvious purpose of forcing or bribing the States to impose similar taxes to the extent of the credit given. Domination of the States with respect to the taxes which they shall levy for State uses is outside the scope of the powers granted to Congress by the Constitution, and the statute in that aspect clearly violates the reserved rights of the States.

The use of the taxing power by the United States to regulate subjects not intrusted to Congress but left to the control of the States by the Constitution has been held by the Supreme Court of the United States to be invalid. In the child labor tax case (259 U. S. 20, 37, 39), holding the child labor tax law invalid Chief Justice Taft said:

"It is the high duty and function of this court in cases regularly brought to its bar to decline to recognize or enforce seeming laws of Congress, dealing with subjects not intrusted to Congress but left or committed by the supreme law of the land to the control of the States. We can not avoid the duty even though it require us to refuse to give effect to legislation designed to promote the highest good. The good sought in unconstitutional legislation is an insidious feature because it leads citizens and legislators of good purpose to promote it without thought of the serious breach it will make in the ark of our covenant or the harm which will come from breaking down recognized standards. In the maintenance of local self-government, on the one hand, and the national power, on the other, our country has been able to endure and prosper for near a century and a half.

* * * * * * *

"So here the so-called tax is a penalty to coerce people of a State to act as Congress wishes them to act in respect of a matter completely the business of the State government under the Federal Constitution."

One of the powers retained by the States under the Constitution is the power to tax for State purposes. This power indeed is an essential and indispensable attribute of sovereignty, without which no State could maintain an independent existence. That Congress has no right to interfere with the exercise of the power of taxation by the States has been recognized as a truism ever since Chief Justice Marshall, in two of his monumental opinions, so declared. (See McCulloch *v.* Maryland, 4 Wheat. 316, 425; Gibbons *v.* Ogden, 9 Wheat. 1, 199.)

My own State, Massachusetts, furnishes a good illustration of the coercive effect of this legislation. Before the passage of the Federal revenue act of 1926 Massachusetts had an inheritance tax with graduated rates which by frequent increase had reached quite a substantial figure. Immediately following the passge of the Federal act a new State statute was passed imposing an estate tax so as to absorb the 80 per cent credit allowed by the Federal law. The purpose of this statute, as was publicly stated, was "to take up the slack," and the argument chiefly advanced in its favor was that as long as estates of Massachusetts citizens were liable for the tax in any event the State might as well have it. In 1926 the revenue from inheritance taxes was $6,000,000 and from the estate tax $1,500,000, approximately.

The result in Massachusetts is that we have two kinds of taxes imposed on the death of an owner of property, the total amount of which depends upon the application of the Federal law. If the amount of the taxes so collected from the estates of Massachusetts citizens is reasonable and proper, then those taxes ought to be levied without reference to any Federal statute; if not, they ought not to be levied at all. I do not favor the doctrine that the States require or should be given the aid of the Federal Government in the levying of State taxes for State purposes, or that regardless of their own needs and policies they should be compelled by the Federal Government to conform to a uniform policy of taxation.

Respectfully yours,

ALEXANDER LINCOLN, *President.*

Mr. METCALF. Mr. President, I have a letter from a very eminent man, whose good work is known in many places, which I would like to read. It is as follows:

Hon. JESSE H. METCALF,
United States Senate, Washington, D. C.

MY DEAR MR. METCALF: During the war we had to use every means possible to raise the enormous sums of money needed, and it was recognized that the duties on the property of decedents was a war measure, because it was an invasion of the rights of the States, justified, however, by the very great emergency.

It will be 10 years next November since the war ended and the death duties are still on the statute book.

As a citizen I object very seriously to this invasion of the States' rights, and as a man who is now in his ninety-second year, and must necessarily before long come under the operation of this law, I particularly object to the double taxation of my estate by both my State and the United States.

I pray you to take active measures for the repeal of this unjust and originally intended to be temporary source of revenue to the United States Government.

Very sincerely yours,

Mr. President, the fundamental objection to the Federal estate tax is that it involves the confiscation of private property. It invades the property rights of the individual, respect for which is essential to preservation of equality as a principle in government.

There is a clear distinction between confiscation and legitimate taxation. The latter rests for its justification upon necessity—the necessity of providing revenue for the support of the Government, which protects the individual in person and property. The same necessity which justifies the Government in conscripting men in time of war may also be present at such a time to justify the imposition of special taxes, such as a tax upon the estates of the dead, but when the necessity for this extraordinary demand ends justification for it ceases. Men should then be left free to return to their civil pursuits and the Government should return to normal and peace-time methods of providing revenue for its needs.

That the necessity for maintaining an estate tax to supplement the ordinary revenues of the General Government has passed is confessed in the terms of the Federal estate tax law itself. This provides that the proceeds of the tax levied under compulsion of the law shall not go into the Federal Treasury, but that the State of which the decedent was a resident shall receive 80 per cent of it, or such part not exceeding 80 per cent as may be equivalent to the State inheritance taxes paid by the beneficiaries of the estate. If the Federal tax is $1,000 and the State tax $800, for example, $800 is paid into the State and only $200 into the Federal Treasury, but if the State's tax is only $200 the Federal law requires that $800, or the remainder of the tax of $1,000 prescribed by Federal authority, shall be paid into the Federal Treasury.

Under the Constitution of the United States the State is a sovereign. It makes the laws controlling the succession to property within its own boundaries or jurisdiction, and decides what inheritance taxes, if any, it shall levy. The Constitution contemplates that it shall exercise this power freely, that it shall act according to its own discretion and judgment and not under duress exercised by any other sovereign.

However, it is admitted that the main purpose of the Federal estate tax law is to control the action of the States in a matter in which Congress has no direct authority under the Constitution and by indirection to compel them to levy State inheritance taxes and to make rates at least equal to 80 per

cent of the Federal rates on estates in excess of $100,000 whether they would prefer to do so or not. The alternative is the loss to the State of taxes the estates of her decedent citizens must pay anyhow to meet the requirements of the Federal law.

The Federal law creates a situation whereby Congress decides that death duties shall be imposed on estates and what the total of these death duties shall be. Nothing is left for the legislature to determine except the question of what portion of the proceeds not exceeding 80 per cent shall be claimed by the State as its share of the plunder.

This 80 per cent or joint-levy provision of the Federal law is itself a fatal objection to the act because it can not be permitted to stand without inviting further invasion of the rights of the States. It affords, for example, the precedent for Federal laws prescribing income taxes, gasoline taxes, school taxes, etc., with provisions allowing the States to share in the proceeds in proportion to their own rates of taxation for these purposes.

Thus the way is opened for destruction of the State through destroying the independence of its revenue system. The States to-day are invited to exchange this independence for a mess of estate tax pottage, to put their approval upon the Federal Government's invasion of the sovereignty of the State and receive in exchange 80 per cent of the proceeds of the Federal estate tax imposed on their own citizens. Some have done so, including such wealthy States as New York and Massachusetts. Legislatures of certain other States, while advancing their rates of inheritance tax to absorb 80 per cent of the tax imposed by the Federal law, have adopted resolutions denouncing Congress for invading the jurisdiction of the States and compelling them to choose between losing revenue and accepting the dictation of Congress.

The assertion that the Federal estate tax represents confiscation is abundantly warranted. It authorizes the taking of private property for public purposes without due compensation. In the case of the living individual, citizen or alien, this is forbidden by the Constitution of the United States and the constitution of every State. It is justly regarded as immoral, obnoxious to conscience, and contrary to public policy.

When the property taken without compensation is that of the dead there is a legal but not a moral distinction. The legal distinction exists because death occasions a transfer of property, either by will or under the intestacy laws of the State. The courts reason that the right to transfer property and the right of succession to title are privileges granted by the State and that the State or General Government has the right to tax the exercise of such privileges.

However, the right of the living to transfer property, without adequate compensation in money or money's worth, whether the transfer be made in contemplation of death or not, is also a privilege granted by government and the exercise of which it may tax. In fact Congress in 1924 adopted the gift tax law making such transfers by the living taxable.

By this gift tax law, repealed in 1926, Congress confessed that it was under no legal necessity of limiting the transfer or estate tax to the estates of the dead, that the limitation was purely arbitrary and based solely on considerations of political expediency, and that it constituted a discrimination against the estates of the dead unwarranted by due regard for equality, the foundation principle of just government, or by respect for economic justice or sound public policy.

The same confession is in truth contained in the existing Federal estate tax laws. This authorizes the taxing of transfers made in contemplation of death, but not until the author of the transfer is dead and therefore no longer a voter, nor able to resist in any manner the confiscation of his property by the Government.

Private property, the institution of civilization, has three attributes. One is the right to possession and enjoyment. Another is the right to the income it yields. The third is the right of disposition. These three attributes are necessary each to the security and, hence, to the value of the others.

When private property generally is levied upon to bear the expenses of government it can not justly be said that it is under attack, nor that its confiscation is threatened. What is witnessed in such a case is an ordinary operation of government, justified by necessity and by the equality with which the burden is apportioned. But an essential right of property is attacked, and we do have an example of confiscation when the Government takes a portion of an estate only because it is beyond a certain value and its owner has died since September 9, 1916.

For its justification authors of the present Federal estate tax law rely much upon the suggestion that it applies only to the estates of the dead having a value of over $100,000. But this circumstance merely aggravates the offense to sound conscience by making the discrimination more striking. State inheritance tax laws are superior in this particular, because as a rule they apply, in the case of collateral heirs, to all inheritances of $1,000 or over. If death is a just occasion for levying a special tax upon an estate, it unavoidably follows that the lower the exemption the more equitable must be the law, other things being equal.

The present Federal estate tax law has been effective only as a means of coercing States, several of which have amended their inheritance tax laws to secure to their own treasuries 80 per cent of the revenue the tax yields. Considered as a means of providing Federal revenue, it is glaringly ineffective. The gross Federal estates tax imposed during the calendar year 1926 was below $140,000,000. The effect of increasing the specific exemption from $50,000 to $100,000 should be to lower future collections materially. But if the gross revenue from the tax remained at less than $140,000,000, and the States took 80 per cent of it, the Federal Treasury's share would be only $28,000,000 per year. This is less than would be yielded by a tax of one-tenth of 1 per cent on the taxable income reported by individuals and corporations for the year 1925.

Instead of taxing about 10,000 estates of the dead a year at the average rate of $53.20 per $1,000 of value—which would equal $532 per $1,000 of income if the property earned 10 per cent—would it not be more equitable, assuming that the Federal Government needs the additional revenue, to increase to the extent of $1 per $1,000 the rates of income tax imposed on the more than 2,700,000 individuals and corporations whose returns for 1925 disclosed aggregate net income exceeding $31,000,000,000?

Obviously, the answer is in the affirmative. Manifestly, the Federal income tax laws, which at present does not impinge on the sovereignty of the States, is expedient, considered as a revenue measure, while the Federal estate tax law is a gross failure.

Politically the matter wears an entirely different aspect. The more than 2,700,000 individuals and corporations which paid Federal income taxes for 1925 control at least 2,700,000 votes. In the absence of a showing of necessity, they would resent any increase in their income taxes. But the 10,470 persons whose estates were plundered by our Government in 1926 to the extent of more than $138,000,000 in estate taxes are dead and have ceased to be voters. Besides, under universal suffrage, 10,000 votes would not count for much in a country with a population of 120,000,000 souls.

Hope for repeal of the Federal estate tax law, therefore, can be entertained only as the people may be brought to realize that Congress has attacked not the rights of dead men's estates merely but property rights in general. It has through its enactment of this law given its assent to a false principle in taxation and government, one in direct conflict with the ideals and traditions of this Republic and of the American people.

We have been taught that ours is a land of opportunity, one in which every individual is left free to become the architect of his own fortune. We have regarded success as honorable when accomplished by honorable means, or through the legitimate pursuit of a legitimate occupation open to all on the same terms. And we have observed that commonly the successful man is useful because his success has enabled him to open avenues of employment or markets for others. We have regarded it as our supreme national glory that this is a land in which all men are equal before the law.

To-day, through this Federal estate tax law, Congress asks us to turn our back upon principles of government which Americans have cherished since the hour this Republic was established, upon principles of equality which we fondly believed had been secured for all time through the results of the Civil War. To-day, as respects the vital matter in taxation, we are invited to surrender equality and to substitute discrimination and oppression of the minority. We are invited to forget that for the material progress which has made ours the mightiest of the nations and the envy of the world, and has diffused among us a condition of material comfort unrivaled by any other people on earth, we are indebted to the energy, the ingenuity, the daring, capacity, and skill of those of our fellow American citizens, most of them starting from scratch, who have won success in the competitions of industry and in the fields of science, invention, and the professions. We are asked to proclaim to our children that those among them who may be destined to material success are destined also, as respects their material possessions, to become the victims of discrimination by their Government, that upon what they may accumulate in

excess of some amount arbitrarily prescribed by Congress from time to time the Government has imposed a mortgage payable out of their estates as a penalty for the offense they are destined to commit by winning success and acquiring property within the jurisdiction of this Nation.

As respects just principles of government what should be our counsel to our children? Should we say to them that equality, a fair field, and no favor is the limit of their just demands, or should we ennoble their souls with the reflection that if they fail to conquer that spirit of envy and jealousy which is our common inheritance from Adam and which so often beclouds judgment in the affairs of life, they may at least by massing their power at the polls work a posthumous vengeance upon the contemporary who came into the world with his fortune to win by his own efforts and under equal laws, but surpassed them in the competition for wealth?

Is it by such counsel that the father would teach ambition, industry, and self-reliance to his children? Would he join the socialists in urging them to become "class conscious"? Would he encourage them, children born in America, to regard themselves as among the "disinherited," against whom the doors of opportunity have been closed, and who, therefore, should view with complacency and approval the invasion of the rights of others?

It has been said that the point at which confiscation under authority of the Federal estate tax law shall begin is arbitrarily prescribed by Congress. This is true. The law of 1916 fixed $50,000 as the point at which the accumulation of wealth became dangerous and a menace to society. Of all wealth of the decedent above this figure the law authorized the Government to take a part, its share increasing progressively with the extent of the estate. Congress at that time was merely seeking funds to carry on the Government. So it was generally believed at least. And the expectation was general that the tax would be repealed when the need for it had passed.

But to-day advocates of the law remind us that it was enacted before we knew that we were to be at war with Germany. They say now that it was enacted with the thought of permanency and as a permanent means of discouraging the accumulation of great fortunes by compelling the owners at death to divide them with the Government, or with the States which might accept the direction of Congress in this matter.

However, the exemption of $50,000 proved too low to give the law smooth sailing through the probationary period. Most of the estates affected in Iowa were the estates of farmers and other owners of agricultural lands. In the cases of farmers who died while the land boom was on, the estates were valued by the revenue agents at considerably more than they were worth after the collapse of the boom, or during the collection period. Hence, bitter opposition to the law developed among its victims in practically every county of the State. A similar feeling arose in other States. So it became clear that, until the principle of the law, the right of confiscation, should become better established by usage, it would be wise to raise the specific exemption to $100,000, as was done in 1926. With the opposition of owners of estates of less than $100,000 thus avoided, the law could be continued until the people, at last familiar with its face, could be persuaded to accept confiscation as a permanent principle in government.

Voluntary gifts of Americans in 1927 to religious, benevolent, and educational institutions approximated $200,000,000. The Federal estate tax collected by the Federal Treasury in 1926 was only half this amount. This comparison is offered to suggest that objection to the Federal estate tax is based not upon purely selfish considerations but upon genuine distaste for the principle involved, a genuine belief that this principle is socialistic and that its acceptance by our Government affords a precedent for a program of socialistic legislation fatal not merely to the fortunes of individuals but also to the prosperity of the country.

How can we prescribe a limit to the confiscation if we admit that death gives the Government a title to the property of the individual, any part of it? If the Government on such occasion may justly take 10 or 20 per cent of the estate, why not 50 or even 100 per cent? And if upon his death it may justly share in the estate of the citizen having a value exceeding $100,000, why is it not entitled to a share if the value is only $25,000, $10,000, $5,000, or $1,000?

If we begin by assenting to confiscation in the case of our neighbor, how shall we defend against it when it comes our turn? If we assent to a false principle in taxation or Government, how shall we prescribe its limitations?

The estate tax is without logical limitations respecting either exemptions or rates. This fact constitutes at once its dangerous character and its condemnation. It differs completely in nature from a general tax levied to meet the revenue requirements of the Government. The limitations of a general tax, when not imposed by the Constitution, are prescribed by the vigilance and self-interest of the taxpayers, as we observe whenever it is proposed to issue bonds for a public improvement or to increase the general tax levy for some specific purpose. The general tax is therefore the servant and aid of responsible government, while a special tax arbitrarily imposed and directly affecting less than 1 in 10,000 of the population leads to irresponsible government by providing a special fund out of which to compensate for unnecessary and extravagant expenditures without recourse to a general levy. It leads to irresponsible government furthermore because a public not immediately affected is indifferent to departure from sound principles of government and to injustice involving no actual distress to its victims.

The social trilogy has been described as resting on religion, the family, and property. Remove anyone of these three supports and the structure of civilization fails. When we cease to regard religion, the family, or the rights of property as sacred we are on the road to decline. The taxation of estates, an enterprise involving disregard of the rights of property, is a destructive and not a constructive movement.

So also national prosperity is based on a tripod consisting of capital, labor, and enterprise. Wealth is the creature of man's genius and energy directed to the production of utilities. In our industrial system capital and labor are indispensable to each other. Each supplies the material with which the other works. If from our annual production of wealth we set aside a certain portion to be employed as capital so much is added to industry to meet the ever-increasing needs of labor. But if by taxation we reduce the volume of capital, which could otherwise be at the service of industry, we diminish to a corresponding extent the fund available for labor's employment.

Labor's interest is served best when of the surplus wealth annually created the maximum is reserved as capital industry may command and the minimum is exacted for the pay roll of public officers. If taxes were doubled to-morrow, while gross profits of industry remained as at present, capital and labor would suffer in common. Their common interest requires the largest possible labor fund with governmental expenditures reduced to the limits of necessity. Hence it is to their mutual interest that whatever system or systems of taxation may be adopted for the support of the general or local government shall have a wide application, that it shall fall upon a body sufficiently numerous and powerful to hold the Government strictly accountable to the taxpayers for its expenditures of the public funds.

Who among our citizens on the pay roll of the Federal Government is a dollar better off because we have a Federal estate tax law in operation? Who among our private citizens has received a dollar in dividends from the proceeds of this tax?

Not one. The tax extorted from a few and which falls into the Public Treasury like manna from heaven is a constant temptation to needless appropriations and extravagances in government. It operates usually not as a replacement tax, but as a surplus to diminish the value of a dollar in the eyes of the appropriating authority. All such taxes should be abolished if only for the sake of holding the Government responsible to the people by compelling it to rely for subsistence on taxes drawn from the people, each citizen contributing according to his means.

Under such a plan, whatever labor might contribute could be abundantly returned in the form of higher wages and more constant employment. A condition precedent to this happy condition of labor, and of the agriculture whose highest rewards depend on the full employment of labor, is a system of taxation that will relieve minorities of oppression, encourage industry, and recognize that all men are equal before the law, as the founders of this Republic intended they should be.

WHY THE FEDERAL ESTATE TAX SHOULD BE REPEALED

First. From time immemorial this tax has been regarded as belonging exclusively to the States except in times of great emergency. Only four times in our history has this tax been levied by the Federal Government and on each occasion it was repealed immediately when the emergency had passed. The present law has now been enforced for more than a decade and no person to-day questions the statement that the emergency which gave rise to the passage of this legislation has ceased.

Second. The law is confiscatory. It is a tax upon capital, and therefore contrary to all principles of economics, and vicious in the extreme.

Third. The law is not a revenue-raising measure. Statements of members of the Ways and Means Committee in hearings and on the floor of the House prove this contention. These state-

ments prove that it not only is not a revenue-producing measure but that it is intended to level fortunes. The Secretary of the Treasury estimates the loss in revenue by the repeal of this act at $7,000,000 per annum.

Fourth. Another purpose of the law is to coerce States into enacting uniform inheritance tax laws. This is evidenced by the 80 per cent credit provision and the present Federal law which in substance means that if the States enact legislation along the Federal lines, 80 per cent of the amount assessed by the Federal law will be credited to such States. In effect, the Federal Government says to the States, "We will take the entire tax unless you pass State laws patterned after the Federal legislation, but if you do pass such laws we will credit you with 80 per cent of the amount collected." This is contrary to the spirit and letter of the Constitution of the United States.

Fifth. The States do not want uniform tax laws. In fact, such a condition is a physical impossibility. Owing to the varying conditions in the 48 States of the Union, it is impossible to fit the same tax straight jacket around every State. What might be good enough for Texas might prove disastrous to New Jersey and what might be advantageous to New Jersey would be ruinous to Indiana. The States themselves are the proper judges of their own local tax matters.

Sixth. To be consistent it would be proper for the Federal Government to legislate in such a manner that the States would have uniform income tax laws, uniform sales tax laws, and uniform tax laws of every description. Followed to its logical conclusion, therefore, the States would have no sovereignty left whatever. Surely the framers of the Constitution had no such thought in mind.

Seventh. So far only 15 States have amended their laws to take advantage of the 80 per cent credit provision in the Federal law. In every instance the States so acting did so under protest and in language which made the change null and void upon repeal of the Federal act.

Eighth. To carry out the wishes of Congress and amend their State laws would revolutionize the fiscal systems in some of the State jurisdictions. Pennsylvania, for instance, tried to comply with this regulation, and the Supreme Court held that the act passed by the Pennsylvania State Legislature was unconstitutional. A second attempt has been made by the State legislature to comply with this requirement, and the Supreme Court has not yet decided whether this second attempt is constitutional. The effect of such legislation must be obvious.

Ninth. The tax is discriminatory. It is not an equitable proposition. It penalizes widows and children. This fact was forcibly demonstrated in a speech by Representative STOBBS, of Massachusetts, delivered on the floor of the House on December 14. This speech appears on page 637 of the CONGRESSIONAL RECORD.

Tenth. Many States, such as Maryland, do not impose a tax on lineal descendants. The Federal law does not take this fact into consideration, and the immediate members of the family are penalized by this legislation. Surely no person will argue that a man's family who should profit by his earnings and labor should be discriminated against in the distribution of this property as compared with outsiders.

Eleventh. Twenty-three States have adopted joint resolutions calling on Congress to repeal the estate tax; in six other States one house of the legislature has adopted such a resolution, and in 15 additional States a canvass of members of both branches of the legislature has shown that a majority favor the repeal of the law. Official delegates of 42 States appeared before the Ways and Means Committee and urged the repeal of the law. From these facts it is only easy to gauge public sentiment on this matter.

Twelfth. There are many other objections that could be cited against this unnecessary and iniquitous tax, but it is believed the foregoing will prove conclusively that the Federal Government should immediately retire from this field of taxation.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Connecticut [Mr. BINGHAM].

Mr. FLETCHER obtained the floor.

Mr. KING. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Broussard	Fess	Harris
Barkley	Bruce	Fletcher	Harrison
Bingham	Capper	George	Hawes
Black	Caraway	Gerry	Hayden
Blaine	Couzens	Gillett	Heflin
Blease	Curtis	Glass	Howell
Borah	Cutting	Goff	Johnson
Bratton	Deneen	Greene	Kendrick
Brookhart	Dill	Hale	King
La Follette	Nye	Sackett	Swanson
Locher	Oddie	Schall	Thomas
McKellar	Overman	Sheppard	Tydings
McLean	Phipps	Shipstead	Tyson
McMaster	Pine	Shortridge	Vandenberg
McNary	Pittman	Simmons	Wagner
Mayfield	Ransdell	Smith	Walsh, Mass.
Metcalf	Reed, Mo.	Smoot	Walsh, Mont.
Moses	Reed, Pa.	Steck	Warren
Neely	Robinson, Ark.	Steiwer	Waterman
Norbeck	Robinson, Ind.	Stephens	Watson

Mr. CURTIS. I wish to announce that the Senator from Nebraska [Mr. NORRIS] is detained from the Senate in attendance upon a committee.

The PRESIDENT pro tempore. Eighty Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment proposed by the Senator from Connecticut [Mr. BINGHAM].

The Senator from Florida [Mr. FLETCHER] is entitled to the floor.

Mr. FLETCHER. Mr. President, the pending amendment does not propose to repeal the Federal estate-tax provision. Under the law there are various provisions looking to the time when executors are to make returns, settle estates, and so forth; one of them being, I think, that they have one year after the estate comes into the hands of an executor to make the returns and settle the tax with the Government. To repeal the act outright might involve the collection of taxes that are pending, and which can be collected under the law if this amendment is adopted, which means that hereafter there will be no Federal tax imposed on the transfer of estates. It leaves in effect the law so far as taxes which have accrued and which have not been settled and so far as returns which are pending, are concerned, and allows the Government to go on and collect the tax which properly is due under the law as it stands; but for the future, after this act is passed, there will be no Federal tax imposed on estates.

It is unnecessary to go into a detailed or elaborate discussion of this whole question of the Federal estate tax. It involves the soundness or unsoundness of a great governmental policy. It involves the soundness or unsoundness of a principle of government. It is therefore important. It is in effect to determine whether we are to depart from the traditions and institutions of our country and embark upon a new effort to control the policy of the States through the Federal Government.

I have heretofore discussed this matter at some length. On January 5, 1926, I made a speech in the Senate on the subject which I simply refer to now. If anyone who is interested desires to see what was then said, he can refer to the CONGRESSIONAL RECORD. I contended then, and contend now, that this field of taxation should be left to the States; that it is an invasion of the rights and powers of the States for the Federal Government to undertake to dictate the policy of the States that is involved in the present existing law.

Mr. COUZENS. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Michigan?

Mr. FLETCHER. I yield to the Senator.

Mr. COUZENS. I wonder why the Senator makes that statement, when it is well understood that all local taxes paid to the municipalities or the States are deductible from the Federal income tax. Why does he make the statement that it is an effort to coerce the States when it is simply a method of preventing double taxation?

Mr. FLETCHER. I will show the Senator, I think, very clearly what I mean by that statement, and will give reasons that ought to convince anyone who has any regard whatever for the rights and powers of the States before I finish this discussion.

The Constitution of the United States requires that Federal taxes shall be uniform. There is no requirement of the Constitution that State taxes shall be uniform. The effort here is to bring about uniformity of State taxation, which is not required by the Constitution, by violating the provisions of the Constitution with reference to uniformity of Federal taxes.

I contended in 1926, as I say, and contend now, that this is an excise tax, and it never has been imposed by Congress except in case of war, and it never has been continued more than seven years after any war until now. It has always been regarded as an emergency tax.

The Federal Government has a right to resort to that field of taxation in case of emergency, in case of war or serious trouble, where it has to raise money. The tax, if imposed by the Federal Government for raising revenue on all the States alike, if it is uniform in its operation and effect, is not in violation of the Constitution. The Federal Government has a right to impose an excise tax; but, as I say, we have never done it except in cases of war or great emergency—never except in

case of war, as a matter of fact—and we have never continued it more than a few years after the war, at no time longer than seven years, until now.

This tax is not needed by the Federal Government. We are reducing taxes. If the Federal Government actually needed the revenue it produces to meet some emergency when it had to raise money, well and good. Let it impose it in conformity with the Constitution, and make it uniform throughout the whole country, in every State. But it does not need the revenue. It is not continued on the statute books for the purpose of raising revenue. It is continued, and the provision is inserted in the law crediting the States with all inheritance taxes paid in those States up to 80 per cent of the Federal Government tax, confessedly for the purpose of forcing uniformity of inheritance taxes throughout every State in the Union.

That is the purpose of the tax. It is not levied or imposed because we need the revenue. It is not continued on the books for that reason. It is continued there, and the credit allowance is imposed as provided in the act, for the purpose of inducing—bribing, some Senator has said; compelling, if you please; coercing, undoubtedly—every State in the Union to impose inheritance taxes in accordance with the dictates of Congress.

I appeal to the Senate, has Congress the right or the power to say to every State in this Union, "You shall impose inheritance taxes whether you need the money or not; and not only that, but you shall impose inheritance taxes up to 80 per cent of the Federal tax which we impose"? Has Congress any such right or power? Is it not absolutely destroying the rights of the States when you take away from those States the control over their financial policy?

I submit that that position is untenable, indefensible, and can not be recognized by Congress as sound, unless we wish to destroy the States entirely.

I know it will be argued by those who are in favor of continuing this tax that it is important to have this 80 per cent credit provision in order to prevent double taxation. The way to prevent double taxation is for the Federal Government to retire from this field when they do not need the revenue, and leave it entirely to the States, where it belongs, where it has always rested. Let each State determine whether it will have an inheritance tax or an estate tax, or in what form it will have it. Some States have an inheritance tax. Some have an estate tax. There is a difference between the two. Some have some rates and some others, depending on their needs.

If a State says, "We do not need to tax our people in this way; we have other resources, or we have an administration so economical that we do not require to exact of our citizens an inheritance tax or an income tax of any kind," has Congress any right to say to that State, "You have got to impose an inheritance tax? Congress insists upon your doing it; otherwise, you get no credit whatever on the Federal estate tax; but we are going to induce you and compel you to impose an inheritance tax by insisting that unless you do you can get no credit on your Federal tax."

I say Congress has no right or power to do that. If some State insists that it can raise plenty of revenue to meet its governmental expenses without imposing an income tax, are we going to concede that Congress can require of such State that it shall impose an income tax or shall impose an inheritance tax, and not only that, but that such inheritance tax must be equal to 80 per cent of the Federal tax? That is the temptation held out; that is the inducement; and since the law was passed in 1924 16 States have increased their inheritance taxes so as to have them mount up to 80 per cent of the Federal tax.

Most of them have provided in their laws that this is to continue so long as the Federal estate tax remains upon the statute books. As soon as that is out of the way they will do something different, either do away with it, or reduce it, or change it in some way. In other words, they are being commanded by the Federal Government to impose taxes upon their people from this source, whether they are needed or not, in order to enable them to take advantage of this inducement offered by Congress to give them a credit on the Federal tax to the extent of 80 per cent where they impose those taxes in the States.

It will be contended, I know, that my position with reference to the lack of uniformity in this kind of legislation—my contention that it is unconstitutional—has been settled by the Supreme Court and therefore ought not to be urged any further. Fortunately, without being requested by anyone, so far as I know, certainly from an entirely disinterested standpoint, this subject has been very ably discussed by a distinguished lawyer of Baltimore. I saw his article published in the Cornell Law Quarterly and had it printed in the CONGRESSIONAL RECORD. It will be found at page 7966. I am going to take the liberty of quoting quite extensively from what that gentleman said, because some Senators may be inclined to discount my observations on this subject by reason of the fact that Florida has a constitutional provision which prohibits the imposition of an income or inheritance tax. We can not comply with the demands of Congress, if we concede Congress has made any such demands. We can not meet their exactions that we shall impose an inheritance tax, because our constitution prohibits it. We would have to change the constitution, which would be, I think, quite impossible. Certainly it would take a great many years to get to it.

Nevada does not impose an inheritance tax or an estate tax. Alabama can not impose an inheritance or an estate tax, because her constitution does not allow it. Those are three States where no advantage whatever can be taken of this tempting provision in the Federal estate tax law that would allow them a credit of 80 per cent on their Federal tax in those States.

By reason of the situation in Florida, and my very great interest in this matter on account of the attacks which have been made on that State by reason of her situation, what I have to say on this subject might be discounted, and therefore I am going to resort to what this gentleman in this article, which, in my judgment, is absolutely unanswerable, has to say about it.

I do not believe one can read this article carefully from beginning to end without being convinced thoroughly that the position of the author is sound, and that this act as it stands to-day is in violation of the Constitution of the United States requiring uniformity. But it is going to be contended, no doubt, that the question has been settled by the Supreme Court in "The strange case of Florida against Mellon." As I have stated, this comes from an outside, disinterested source, unsolicited by anybody from Florida, but it is the expression of a sound lawyer who has looked into this question and has considered it.

Mr. COUZENS. Who is the author of the article?

Mr. FLETCHER. Mr. Arthur W. Machen, jr., of Baltimore. I have never met this gentleman. I read the article, and I was so impressed with it that I thought everybody ought to see it, and that it certainly ought to go into the RECORD before the vote was taken on this amendment. He said:

> The Supreme Court of the United States throughout its history has set an example to other courts of last resort by resolutely refusing to express its opinion on questions not before it or not necessary for the decision of the case in hand. No small part of the respect in which that tribunal is held by the bar is due to its adherence to this rule, even in cases where laymen would be apt to think a settlement of some important question on the merits would be a more patriotic course than a decision on some technical point of jurisdiction or the like. In no class of cases has this self-imposed rule of judicial ethics been more scrupulously observed than in those involving the construction or application of the Constitution of the United States.

I think we will all agree to that. He proceeds:

> For example, the court has repeatedly gone to great lengths to construe a statute in such a way as to avoid deciding a constitutional question. (U. S. *v.* Delaware & Hudson Co., 213 U. S. 366, 29 Sup. Ct. 527 (1909); U. S. *v.* Standard Brewery, 251 U. S. 210, 219, 40 Sup. Ct. 139 (1920); Missouri Pac. R. R. v. Boone, 270 U. S. 466, 471–472, 46 Sup. Ct. 341 (1926); Fox *v.* Washington, 236 U. S. 273, 277, 35 Sup. Ct. 383 (1915); U. S. *v.* Jin Fuey Moy, 241 U. S. 394, 401, 36 Sup. Ct. 658 (1915).) So far as the writer recalls, only once—prior to 1927—has the court after holding a case to be not properly before it either for lack of jurisdiction, defect of parties, or any similar cause, proceeded to announce its decision on a constitutional question sought to be raised on the merits; and the results in that single exceptional case—Dred Scott *v.* Sanford (19 How. 393, U. S. 1856)—were not such as to encourage a repetition of the experiment.

In all the history of that court, as can be seen if one looks through all the embalmed opinions laid away in calf and sheep from the beginning until to-day, they have never undertaken to decide that an act was constitutional or unconstitutional in a case where they held they had no jurisdiction and the parties were not properly before them, except in the Dred Scott case. But they did it in the Florida case, as I will show. I continue:

> But in 1926 the State of Florida asked the Supreme Court for leave to file a bill against the Secretary of the Treasury to restrain him from enforcing in Florida the Federal estate tax law of that year, on the ground that the provision for "credit" of State inheritance taxes up to 80 per cent of what the Federal estate tax would otherwise be—a provision almost identical, except as to the amount of the allowable credit, with the corresponding section of the revenue act of 1924—rendered the act unconstitutional. The application was opposed on the ground that the State as such had no interest in the question and was therefore not entitled to file the bill.

That was the whole question before the Supreme Court, Was Florida entitled to file the bill? Mr. Machen further said:

The Solicitor General on behalf of the Government naturally assumed that the constitutionality of the credit provision was not at this stage before the court, the only question being whether the court had jurisdiction. Accordingly, his brief contains not one word in support of the constitutionality of the act.

That is, the Government representative, in behalf of the Secretary of the Treasury, did not say a word about the constitutionality of the act, because it was not before the court.

He contended merely (1) that the suit was forbidden by section 3224 of the Revised Statutes, providing that no suit to restrain the collection of a Federal tax shall be maintained in any court.

By the way, that is rather a remarkable provision, but it is in the law, and I presume it does not exclude an individual taxpayer from access to the courts under certain conditions, but section 3224 provides:

No statute for the purpose of restraining the assessment or collection of any tax shall be maintained in any court.

The door is absolutely closed, when we pass a revenue act, under that section. That was one of the points raised by the Solicitor General. I continue:

(2) That the State of Florida had no direct pecuniary interest in the question of the constitutionality of the act, and (3) that the State as parens patriae was not entitled to raise the question.

The Supreme Court, on January 3, 1927, in an opinion delivered by Mr. Justice Sutherland and concurred in by all the other members of the court, passing sub silentio the first of these three objections, sustained both the other two, and overruled both grounds on which the complainant, as its position was apprehended by the Supreme Court, sought to sustain the jurisdiction. (Supra, note 3.) "Neither ground," said the court, "is tenable."

But, mirabile dictu, having thus declared that the court had no jurisdiction to pass upon the constitutional question sought to be raised by the bill, the opinion proceeded to attempt to decide that question.

As to the contention that the tax was not geographically uniform throughout the United States, the opinion states (supra note 3, at 17):

"The contention that the Federal tax is not uniform because other States impose inheritance taxes while Florida does not, is without merit. Congress can not accommodate its legislation to the conflicting or dissimilar laws of the several States nor control the diverse conditions to be found in the various States which necessarily work unlike results from the enforcement of the same tax. All that the Constitution (Art. I, sec. 8, cl. 1) requires is that the law shall be uniform in the sense that by its provisions the rule of liability shall be the same in all parts of the United States."

As to the contention that the credit provisions of the act are in effect not a tax upon a constitutional subject, but an effort to coerce the States into levying inheritance or estate taxes equal at least to 80 per cent of the Federal rates, the opinion declares (ibid.):

"The act is a law of the United States made in pursuance of the Constitution and, therefore, the supreme law of the land, the constitution or laws of the States to the contrary notwithstanding. Whenever the constitutional powers of the Federal Government and those of the State come into conflict, the latter must yield."

Of course, this is a manifest begging of the question. If the act is "a law of the United States made in pursuance of the Constitution," the fact that it is in conflict with State policy on purely local matters is no objection to its validity.

Nobody ever contended that it was.

But the very question at issue, if the court had jurisdiction, was whether the law was made in pursuance of the Constitution. With the merits of the ruling there is, however, at this point, no quarrel. Amazement is concentrated upon the expression of any opinion on a constitutional question which the court declared it has no jurisdiction to decide.

You can not say that is an opinion that settles the law of this case. It is pure obiter, not binding in any other case or any other court, as a matter of law.

The criticism would have been the same if the court, instead of expressing approval of the controverted provisions of the revenue act of 1926, had declared it unconstitutional.

The judicial pronouncement is the more remarkable because not only did the Government's brief contain no argument in support of the constitutionality of the act but also the briefs for the plaintiff contained little or no direct argument against its validity. The only real argument against the statute was found in briefs filed by amici curiae, which set forth in a sketchy way some arguments against the constitutionality of the challenged provision of the revenue act of 1926, but only by way of inducement, as it were, and as a step in the process of showing that the State had an interest in the question. Moreover, only half an hour a side was allowed by the court for oral argument, on the express ground (as the writer is informed by one who was present in court at the time) that the constitutionality of the act would not be considered but only the question of jurisdiction.

At all events, it is clear that the opinion expressed by Mr. Justice Sutherland in favor of the constitutionality of the act of 1926 was quite unnecessary to the decision—which was that the court had no jurisdiction to pass on the question and therefore should not allow a bill to be filed to raise that question; and consequently the opinion expressed upon that question was obiter dictum, extrajudicial, and not binding either upon the Supreme Court itself or upon any inferior tribunal.

The expedient of "crediting" taxes paid the several States against taxes due the Federal Government had its origin in section 301 of the revenue act of 1924, which after levying an excise tax upon the transfer of the net estate of every decedent subsequently dying, and after providing a graduated scale of rates up to a maximum of 40 per cent of the amount by which the net estate exceeds $5,000,000, declares that "the tax imposed by this section shall be credited with the amount of any estate, inheritance, legacy, or succession taxes actually paid to any State or Territory, or the District of Columbia, in respect of any property included in the gross estate," subject, however, to the proviso that "the credit allowed by this subsection shall not exceed 25 per cent of the tax imposed by this section. The act of 1926 repeats the provision almost verbatim, but increases the limit of the credit from 25 per cent to 80 per cent of what the tax would otherwise be.

The remarkable effects of this provision for "credit" are perhaps not at first apparent, and certainly have not always been recognized. A moment's thought will show, however, that one result is to produce as between the several States an inequality in rate of tax which is mitigated in degree but not altered in kind by the limitation of the "credit" to 25 per cent or 80 per cent of what the tax would otherwise be.

For instance, the State of Maryland, although one of the first of the States to adopt inheritance taxation, has never imposed any tax upon transmission of property to a lineal descendant of the decedent; and the State of Florida, which has never had an inheritance tax, has recently, by constitutional amendment, expressly prohibited estate, legacy, inheritance, or succession taxes.

This is no new idea in Florida. It does not mean some action taken to induce people from other States to come to that State except in so far as lower taxes may induce anybody to move into a State where governmental affairs are well administered. We never have had an income tax in the history of the State. We never did impose one. It has not been the policy of the State. I submit the Federal Government has nothing to do with the fiscal policy of Florida or any other State. If we concede that the Federal Government can dictate to the States what their financial policy shall be, then we have no States left any longer.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Florida yield to the Senator from Utah?

Mr. KING. I do not want to interrupt the Senator if it will disturb the line of his argument.

Mr. FLETCHER. I yield to the Senator from Utah.

Mr. KING. Does not every tax levy have an effect, directly or indirectly, upon the fiscal policy of every State? If we impose an income tax or if we could, by proper apportionment, levy a property tax, it would be more or less an interference with the fiscal policy of the States, because they might be compelled or would at least feel constrained to adjust their rates and subjects and incidents of taxation to the Federal tax. It seems to me if the Senator is making the argument that the estate tax ought not to be imposed because it affects the fiscal policy of a State, he could with as much propriety make the same argument against the imposition of any tax by the Federal Government.

Mr. FLETCHER. I am going into that a little further in detail, if the Senator will allow me.

Proceeding with the particular point raised by Mr. Machen, he said:

On the other hand, most of the other States impose a tax of varying amounts on both lineal and collateral descents. Now, if a resident of Maryland or a resident of Florida should die, leaving a "net estate" of $1,000,000 (computed according to sections 302 and 303 of the revenue act of 1926 after deduction of the exemption of $100,000) descending to his only son, as sole heir at law, no State inheritance or succession taxes would be payable. A Federal estate tax of $48,500 would be payable. On the other hand, if the same decedent had lived, or the property which he owned had been situated in, say, Connecticut, a tax of $40,262 would be payable to the State, and although the net amount received by the heir would be almost the same, the identical estate would have paid a Federal estate tax of only $9,700. In fact, in any State imposing on such an estate inheritance or estate taxes of an amount equal to or greater than $38,000, the Federal tax would be only $9,700.

A number of States are given, with the amounts figured and submitted at page 7967 of the CONGRESSIONAL RECORD, which I need not refer to in detail.

Under the table it is shown that in case of a net estate of $1,000,000 to $1,100,000, without deducting the Federal exemption of $100,000, descending to an only son, in Maryland the State succession tax would be nothing and the Federal estate tax would be $48,500. In New York the State succession tax would be $46,750 and the Federal estate tax would be $9,700. In North Carolina the State succession tax would be $48,548 and the Federal estate tax $9,700. In Illinois the State succession tax would be $115,812 and the Federal estate tax $9,700. In Wisconsin the State succession tax would be $98,400 and the Federal estate tax would be $9,700. In Connecticut the State succession tax would be $40,262 and the Federal estate tax would be $9,700. In Idaho the State succession tax would be $20,585 and the Federal estate tax would be $18,915. In Kansas the State succession tax would be $21,537 and the Federal estate tax $20,923.

So the question of uniformity of State taxes is one over which the Congress has not any control. The laws of the different States are intended to provide for one kind of a tax in one State, a succession or inheritance tax going to certain descendants. There is no uniformity accomplished by this sort of attempt to force State legislatures to adopt uniform estate-tax laws.

Mr. Machen further said, proceeding with some quotations directly in point in which he refers to opinions of the Supreme Court:

"Wherever a subject is taxed anywhere, the same must be taxed everywhere throughout the United States, and at the same rate."

And again:

"The tax is uniform when it operates with the same force and effect in every place where the subject of it is found." (Head Money cases, supra, note 11.)

And, still again, with reference to a tax on distillers levied in proportion to 80 per cent of the capacity of the distillery, whether produced or not:

"The tax is uniform in its operation; that is, it is assessed equally upon all distilleries wherever they are." (U. S. v. Singer, supra, note 11.)

Mr. Justice Miller, in his "Lectures on the Constitution," gives a similar definition (Miller, the Constitution (1891), 240; italics the writer's):

"They"—i. e., duties, imposts, and excises—"are not required to be uniform as between the different articles that are taxed, but uniform as between the different places and different States. Whisky, for instance, shall not be taxed any higher in the State of Illinois or Kentucky, where so much of that article is produced, than it is in New York or Pennsylvania. The tax must be uniform on the *particular article;* and it is uniform within the meaning of the constitutional requirement if it is made to bear *the same percentage* all over the United States."

How is it possible to reconcile with the principle that "if a subject is taxed anywhere, it must be taxed everywhere, and at the same rate," a law which taxes the transmission of a net estate of $1,000,000 in Maryland or Florida to a lineal descendant at 4.85 per cent, and the transmission of an estate of the same amount to a lineal descendant in New York at 0.97 per cent, and in Kansas at 2.69 per cent, as is done by the estate tax law of 1926?

Again he said:

But in the act of 1924 for the first time Congress undertook to depart from these constitutional paths and, while nominally selecting as the taxable subject the decedent's estate without deduction for State inheritance or estate taxes, yet to vary the rate of tax in different parts of the country.

Defenders of this system of State coercion insist that the method of allowing "credits" upon Federal taxes is not new but has its antetype in several provisions of the income tax laws. It is, indeed, true that the income tax laws contain several provisions for regulating the amount of Federal tax collectible by allowing certain "credits"; but none of these provisions is such as in any way to affect the geographical or territorial uniformity required by the Constitution.

Then he proceeds to show the fallacy of that position. Continuing further he said:

Surely, however, the constitutional requirement of uniformity can not be evaded by designating the favored States by description rather than by name. For instance, an excise tax applicable only in the States where the laws prohibited slavery would prior to the Civil War have been clearly unconstitutional. So, too, prior to the eighteenth amendment, an excise applicable only in the free or license States would equally clearly have been invalid. Even to-day if Congress should pass an excise law applicable only, or at an increased rate, in those States whose laws permit child labor, would anyone be so bold as to maintain its constitutionality?

The truth is, of course, that law—at least Anglo-American law—is local or territorial, and any discrimination based on the law prevailing in any State is necessarily a geographical or territorial discrimination, and as such prohibited by the Constitution.

I can not see how that position can be successfully combated. I quote farther from this splendid and forceful article:

It is claimed, however, that the effect of the provision for crediting State inheritance taxes on the Federal estate tax is to promote and not to destroy uniformity of taxation throughout the United States. Indeed, the evil against which the advocation of such measures are clamoring is the present lack of uniformity in inheritance taxation in the different States. What they consider the unsisterly action of Florida in bidding for immigration of multimillionaires by prohibiting all inheritance taxes has made them see red. They apparently fear that all the rich men of other States will leave them for the torrid—or shall we say salubrious?—climate of Florida, and that it will be necessary for other States to meet the competition of Florida by reducing their rates of inheritance taxation. How far this fear is justified or how far the present lack of uniformity in State inheritance taxation is an unmixed evil we need not pause to inquire, for, however great that evil may be, it can not be remedied by imposing an unconstitutional Federal tax. What the Constitution requires is not uniformity of all excise taxation, State and Federal, but only of Federal excise taxation. It is not permissible, in order to counteract a diversity in rates of State taxation in different parts of the country—a diversity which the Constitution permits—to create a countervailing diversity of rates in Federal taxation in different parts of the United States, a diversity which the Constitution prohibits. In order to bring about a kind of uniformity which the Constitution does not require, it can not be right to destroy the kind of uniformity which the Constitution commands.

I can not see any answer to that. It is not only reasonable, logical, and sound but it can not be successfully controverted.

As said by the Supreme Court in another case in which an attempt was made to justify unconstitutional legislation by the desirability of promoting uniform State laws: "There is no power vested in Congress to require the States to exercise their police power so as to prevent possible unfair competition. * * * It may be desirable that such laws be uniform, but our Federal Government is one of enumerated powers." (Hammer v. Dagenhart, 247 U. S. 251, 273, 275, 38 Sup. Ct. 529 (1918). Cf. Nichols v. Coolidge, 274 U. S. 531, 540 ("The mere desire to equalize taxation can not justify a burden on something not within congressional power").)

The question has been asked whether, if all the States imposed inheritance or State taxes to an extent equal to or greater than the Federal rates, the Federal tax would not be "uniform" even though it allowed a credit for State taxes; and, upon the assumption that this question would be answered in the affirmative, it is argued that the only valid objection to the constitutionality of the credit provision is that the purpose of the portion of the rates of taxation against which the tax credit is allowed is not the collection of revenue but coercion of the States.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from Florida yield to me?

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Arkansas?

Mr. FLETCHER. Certainly.

Mr. ROBINSON of Arkansas. If the principle be accepted that uniformity in all forms of taxation is desirable, if the principle be adopted that taxation must be uniform in all the States, the result would be that the States which have great natural advantages would attract all the population and all the wealth and those which have fewer natural advantages would be without any means of development. So that it is not desirable to have uniformity of taxation in every respect.

Mr. FLETCHER. I think the Senator from Arkansas is entirely right.

Mr. ROBINSON of Arkansas. A State ought to have the opportunity by its laws and by its tax processes to invite population and capital within certain limitations.

Mr. FLETCHER. The Senator from Arkansas is entirely right, and not only for the reason stated by the Senator but because the needs of the various States are different. One State may need an inheritance tax or an income tax; another State may not need it. Why require that a State shall impose upon its citizens taxes which the State does not need or desire simply because Congress wants to promote uniformity?

Again, Mr. Machen says:

This decision—

Referring to a decision with reference to bankruptcy cases and drawing some distinction there—

This decision has a real bearing upon our present subject, because Congress in attempting to allow State taxes to be credited upon Federal taxes is not merely permitting the State laws to continue to operate—as in the bankruptcy cases—but is attempting to extend the operation of the State laws to matters confided to the exclusive control of Con-

gress. Of course, nothing is more exclusively within the power of Congress, and more completely beyond the power of the States, than to fix the amount of Federal tax collected from a given subject; and when Congress attempts to declare that State taxes may be credited in reduction of the Federal tax collectible from a given subject, it is giving those State laws an operation and effect which proprio vigore they could never have.

Mr. Justice Sutherland's dictum in Florida v. Mellon strangely misapprehends both the effects of the acts of 1924 and 1926 and the basis of the objection thereto. In answer to the contention of lack of geographical uniformity in the Federal tax, he says (273 U. S. 12, 17):

"Congress can not accommodate its legislation to the conflicting or dissimilar laws of the several States nor control the divers conditions to be found in the various States which necessarily work unlike results from the enforcement of the same tax."

Of course, it can not; and nobody ever contended that it should. But it can, and, it is submitted, must refrain from allowing the several States to fix by their changing laws the rate of a Federal tax on any given subject which has been selected without reference to State laws.

The learned justice proceeds:

"All that the Constitution (Art. I, sec. 8, ch. 1) requires is that the law shall be uniform in the sense that by its provisions the rule of liability shall be the same in all parts of the United States."

Mr. Machen continues:

In this the learned judge has departed from the rule laid down by earlier cases. That "the rule of liability" shall be the same in all parts of the United States is not all that the Constitution requires. In addition it requires that the rate of tax upon the same subject shall be the same in all parts of the United States; and it is in that particular, among others, that the acts of 1924 and 1926 depart from the constitutional standard.

Congress has fixed as the subject of the tax the net estate passing without deduction for State inheritance or estate taxes. Having done so, the constitutional mandate is that the tax must be levied at the same rate everywhere in the Union upon that subject. The State tax laws do not relate to the subject of the tax but are purely collateral. You might as well allow a credit of fines collected by the States for violations of the prohibition laws, or the amount paid the governor of the State as a salary.

Of course, we could not do that. Here are some very pointed illustrations. I can not see how we can escape the application of this reasoning and fail to agree with the author. He says, on page 8282:

The object of the constitutional requirement of geographical uniformity was, of course, to prevent discrimination against or in favor of any State or section, and particularly any discrimination against or in favor of any State because of its laws or institutions. The States took the risk of Congress selecting as objects of the tax commodities which are found in only some of the States, even though their nonexistence should be due not to natural circumstances but to State laws. But the States were jealous, and properly so, lest the power of Federal taxation should be so exercised as to penalize one State for failing in respect of its reserved powers to do what Congress might deem wise; hence the uniformity clause was inserted.

If such a provision as the credit clause of the estate tax law can be sustained, then the whole object of the requirement of uniformity might be frustrated.

He says further—

Suppose, for example, Congress should conclude that the salaries paid the judges in some of the States are inadequate—as they undoubtedly are—and suppose Congress, in order to remedy the inequality of judicial salaries in different States, should exact that there should be credited on the amount of estate taxes collected from the estates of decedents a sum equal to the lowest salary paid a judge of a court of record in the State of the taxpayer's residence up to what Congress may fix as the minimum respectable salary, would anybody doubt that the tax levied by such a law would not be "uniform throughout the United States"? Yet how would it be possible to distinguish such a case from the "credit" provision of the estate tax law?

Suppose Congress—

And this is quite important—

should determine that the caliber of the probate judges—for example, in Maryland, where such judges are not required to be lawyers—does not come up to the standard, and in order to improve the quality of these courts should allow as a credit on estate taxes collected from deceased residents of the several States an amount equal to the annual salary paid the judges of the court in which the estate is administered? Justice Sutherland's reasoning would sustain such a provision. Yet who would hold it valid?

Suppose, for example, Congress should determine that the State ought to be "encouraged" to expend additional amounts on the public schools and should exact that income taxes due from residents of any State should be "credited" with their respective pro rata share of amounts expended by the State upon education. Would it be possible to sustain such a provision? Yet if it be invalid, how can the "credit" allowed by the estate tax of 1924 or 1926 be distinguished?

Yet, again, suppose that Congress should conclude, as many tax theorists now do, that the States ought to substitute income taxes for the property taxes now in force, and under the influence of that theory should enact that State income taxes paid by any taxpayer should be credited upon the Federal tax to the extent of 25, 50, or 80 per cent thereof. The States would be forced in defense of their citizens to adopt a scheme of income taxation as a substitute for the existing property taxes. Yet if the estate tax of 1924 or 1926 be valid there could be no possible constitutional objection to such a law.

Unless the uniformity clause is to become a dead letter, shorn of all vitality and efficacy, the Federal estate tax of 1924, and still more clearly the estate tax of 1926, can not be reconciled with the Constitution.

I submit that that is a conclusion that is inevitable, if one will only study this proposition, as Mr. Machen has, and reason it out and square it up with our system of government, with the decisions of our courts, and in harmony with our institutions.

Suppose that the Federal Government should say "We favor a sales tax; we believe in the principle of imposing a sales tax." The Senator from Utah believes in that kind of a tax, and there is a great deal to commend it; but the States have not imposed that kind of tax. Suppose Congress should say "We favor a sales tax as a means of raising revenue. In those States which impose a sales tax we will give a credit on the Federal estate tax up to 80 per cent of their tax." Then those States which did not impose a sales tax would not be able to get any credit. Would anybody say that that was promoting uniformity? Would anyone claim that that was a constitutional provision? Yet that is precisely what is done under the 80 per cent credit provision as it stands in the law to-day. The whole thing originated certainly in an unwarranted and in a more or less desultory sort of attack upon Florida. That is shown by the hearings, and I will get to that in a few moments.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. GOFF in the chair). Does the Senator from Florida yield to the Senator from Utah?

Mr. FLETCHER. I yield to the Senator.

Mr. KING. The Senator does not deny—and I do not wish to misinterpret him—the right of the Federal Government constitutionally to levy an income tax or an estate tax, does he?

Mr. FLETCHER. No; I have admitted that.

Mr. KING. I did not hear all of the Senator's remarks.

Mr. FLETCHER. All I say is that under the Constitution it must be uniform.

Mr. KING. The argument, then, to which the Senator is addressing himself now is to show that because of the provision in the Constitution requiring uniformity of taxation, any provision in the revenue law of Congress that remits a portion of the tax or credits the taxpayer with a portion of the tax because of an estate tax levied within the State subjects the act of Congress to the charge of being unconstitutional.

Mr. FLETCHER. I claim that, whether it is 10 per cent or 20 per cent or 40 per cent or 80 per cent, or it might go to 90 or 95 per cent just as well as 80.

Mr. KING. And the Senator contends that the decision of the Supreme Court of the United States, the opinion being rendered by Mr. Justice Sutherland, in Two hundred and seventy-third United States Reports, is mere dictum in so far as it decides that the act of 1926 measures up to the requirements of uniformity?

Mr. FLETCHER. I do, because the question was not before the court. The question was purely whether the court would permit Florida to come in and test the constitutionality of the act; and they said, "No; you have no rights here. We will not let you in," and then they proceeded to decide the very question that Florida wanted to come in to present to the court.

Mr. Machen says further, on page 8282, what I am about to read. As I say, I am quoting liberally from this article because it comes from an entirely disinterested source. Nobody asked him to write this article. As a lawyer, he saw the fallacy of that strange decision, as he calls it, of Florida against Mellon, and he wanted to present to the profession, through the Law Journal, his views upon it. He has done it in such a masterly way that I am tempted to use his thoughts very liberally. I will not take the time to read all of it, but particular points that he brings out so clearly in this discussion.

He says:

The effect of such a Federal statute as the estate tax law of 1924 is to force the hands of the States, and make them in the exercise of their reserved rights mere puppets, not autonomously acting upon their own will and initiative but moving according to the congressional beck and nod. In effect, the tax is levied upon the action of the States in refraining from the passage of inheritance tax laws of sufficiently onerous character to meet the congressional approval. In Veazie Bank

v. Fenno (8 Wall. 533, 547 (U. S. 1869)) Chief Justice Chase, speaking for the Supreme Court, said:

"It may be admitted that the reserved rights of the States, such as the right to pass laws, to give effect to laws through executive action, to administer justice through the courts, and to employ all necessary agencies for legitimate purposes of State government, are not proper subjects of the taxing power of Congress."

And again on the first hearing of the Income Tax case, the Supreme Court said, the court being unanimous on this point:

"The Constitution contemplates the *independent exercise* by the Nation and the States severally of their constitutional powers." (Pollock *v.* Farmers' L. & T. Co., supra, note 32, at 583–584. Italics the writer's.)

The same principle, if regard be had to actual results rather than to names, would invalidate the credit provisions of the estate tax law of 1924 or 1926, even without regard to the lack of uniformity which it produces.

If this objection to the "credit" provision of section 301 of the acts of 1924 and 1926 be sound, it might be thought that the State of Florida should have been allowed to file its bill to enjoin the enforcement of those acts—unless, indeed, the maintenance of the suit was barred by the Revised Statutes, section 3224, prohibiting any suit to enjoin the collection of a Federal tax—and that therefore Florida *v.* Mellon is on this particular point an actual decision and not a mere dictum. But although the State of Florida did undoubtedly assign this invasion of her sovereign—or, according to Mr. Justice Sutherland, quasi-sovereign—prerogative as a ground for invoking the original jurisdiction of the Supreme Court, yet that tribunal did not so understand her contention. As already stated, Mr. Justice Sutherland seems to have grasped as the only two grounds on which jurisdiction was invoked—(1) the fear that wealthy men would be induced by the operation of the Federal tax to remove from Florida and thus reduce the State's revenues, and (2) the status of the State as parens patriae toward her citizens. The far more arguable position that the State had a right to complain of the Federal tax because it amounts in effect to an ill-disguised effort to coerce the State into legislating in a particular way on matters expressly reserved to her uncontrolled discretion by the tenth amendment, was overlooked or purposely ignored by the court. It is very provoking to counsel to have his position misrepresented by a court; but at least such misrepresentation has the advantage that the decision is a precedent, even by way of dictum, only upon the case as stated by the court and not upon the case as made by the record or as the court ought to have stated it.

Moreover, strange as it may seem, it is very doubtful whether the fact that the act in question thus operates in terrorem upon the States in the exercise of their reserved rights is sufficient to give the States as such any locus standi to challenge its validity. Before Florida *v.* Mellon, the case of Massachusetts *v.* Mellon (supra, note 9) was an authority against the right of the State to interfere on such a ground; and if the State of Florida had had the right to question the constitutionality of the credit provision on this ground, the proper course would have been to allow the bill to be filed and then decide against her on the merits. The question, therefore, would be still open, notwithstanding Florida *v.* Mellon at the suit of an individual interested.

I must confess that I do not quite relish that reference to the State as being a "quasi-sovereign." My understanding of all our history and our institutions and our form of government is that the State is sovereign within its sphere, as the Federal Government is sovereign within its sphere. The United States, in its Constitution of 1787, carried the Federal idea to its logical conclusion by boldly dividing sovereign powers between the Federal Government and the States. Single sovereignty of the people became a dual sovereignty of the people. The people of one State are sovereign as to their own State affairs; they share with all other people of the United States the sovereignty as to national affairs; they have nothing to do with the sovereignty of the people of another State as to that State's affairs.

Not only are the sovereign powers which constituted the old-time State divided in America between the Federal Government and the States but in some instances a single power is divided—as, for instance, the power of taxation, and the power over commerce—but each is sovereign within its scope and within its sphere and within its function. There is no "quasi-sovereignty" about it.

Referring to what has been aimed at by this provision in the 1924 act, and in the 1926 act emphasized and extended, allowing this credit on the Federal tax, the hearings before the House Ways and Means Committee show the purpose in continuing this Federal estate tax and in making these credits. For instance, Mr. RAINEY said:

Mr. RAINEY. If something can be done which would compel the States to occupy this field and occupy it by imposing taxes, would you not favor some arrangement of that kind, if it can be done?

Governor MCLEOD. I think I would, if it was fair in its distribution of this inheritance tax.

Mr. RAINEY. If we compelled every State to levy the same minimum?

Governor MCLEOD. If it was fair and equitable in its distribution to the States.

Mr. RAINEY. And let the States occupy the field entirely and apply the revenue entirely to the liquidation of their own expenses, provided we devised some means of compelling the States to do it; would you not favor it?

Governor MCLEOD. I think so.

Mr. GARNER. If there was an arrangement by the Federal Government under which, when a citizen of the United States died, there could be deducted the amount due the State of South Carolina of taxes he had to pay in the State, sending the balance to the Federal Government, it would not injure your exchequer?

Governor MCLEOD. No, sir; except that I would——

Mr. GARNER (interposing). He would have no occasion to flee from your State to Florida, or even to a warmer climate to avoid the inheritance tax due your State?

Governor MCLEOD. That is true, but speaking——

Mr. GARNER (interposing). You will agree that the plan suggested that the Federal Government devise some scheme whereby we could have the inheritance taxes uniform as far as possible throughout the Republic is desirable, will you not?

Governor MCLEOD. In that case the Federal Government would be established as a disbursing agency for the State governments.

Mr. GARNER. Not at all. Your citizens would have deductions allowed under certain conditions. Now, there are deductions both for the estate and income taxes, and a great many deductions are made. But he would simply deduct from the amount that he would owe the Federal Government whatever he would pay your State.

Governor MCLEOD. How would you justify the Federal Government levying taxes merely for that purpose unless those taxes are needed for the expenses of the Government?

Mr. HULL. But there would be uniformity.

Mr. CAREW. We are going to use this power to effect a great reform. (Hearings on revenue revision before the Committee on Ways and Means, October 19 to November 3, 1925, 370, 371.)

That procedure shows precisely what they had in mind when they framed this bill. "We are going to effect a great reform." What is it? "Accomplish uniformity of inheritance taxation throughout the United States."

What business has Congress to see that every State in this Union shall impose an inheritance tax, and shall impose that tax at a certain rate which Congress considers to be fair and reasonable and proper? "A great reform" indeed! Some of these "great reformers" ought to begin at home.

"A great reform!" Whether a State needs the money or not, it must impose these taxes upon its people because Congress wants it to do it in pursuance of a great notion of "reform" on the part of Congress!

There has been outside interference with Florida. Influences have operated in that State to our disadvantage. Land boomers and land speculators have come down there from all over the country, and have worked some harm in that State; but Florida is not going to change her constitution at the dictates of Congress. She is not going to change her laws to suit the notions of Mr. Reformer up here in the Capitol. She may be called torrid, and she will remain as she is in the exercise of her constitutional rights and powers. She stands there to-day, notwithstanding this outside influence—and practically all this business of land booms and speculation has come from outsiders—but she can put up with all that. Like Diogenes of old, all she asks is, "Just stand out of my sunlight. Let me alone. That is all I want." Calm and serene as her moonlight, brilliant and buoyant as her sunlight, she is furnishing health and happiness and comfort to hundreds of thousands of good people all over this land. She will continue to do that. She is Providence's choicest gift to the comfort of humanity. You are not going to interfere with her prosperity, her progress, her faith in our institutions, and her constitutional rights, so far as I can help it, by any step you may take here.

Mr. KING. Mr. President, will the Senator suffer an interruption?

Mr. FLETCHER. I yield to the Senator.

Mr. KING. I agree with the eulogy which the Senator pays to his magnificent State; and I share his views against any effort made by the Federal Government to coerce States with respect to their domestic and internal affairs.

Does not the Senator, though, recognize that in the imposition of taxes by the Federal Government—and, for that matter, by the States—there would be no derogation from their sovereignty and their inherent and plenary power if, acting upon the policy of comity, the proper respect to and regard for the

taxes imposed in the respective jurisdictions, they should attempt to levy their taxes so as not to interfere with the taxes imposed by the other sovereignty, or, at least, levy their taxes in such a manner that the burden of the State or the burden of the Federal Government would be reduced to a minimum because of, perhaps, a different system of taxation being levied by the States and by the Federal Government?

I have in mind this, if the Senator will pardon me; if the States should fail to avail themselves of the right to impose inheritance or estate taxes, but should content themselves with resorting to other sources for their income, it seems to me that the Federal Government might with greater propriety resort to that source of revenue than if the States themselves utilized that source of revenue; or, vice versa, if the States levied very heavy income taxes, I would feel that the Federal Government, in approaching the question of raising revenue, ought to take into account that fact, and, if it could, adopt a rational and just system of taxation, which would not bear too heavily upon the incomes of the people of Florida or the people of the United States generally, incomes which were taxed by the State; in other words, that there ought to be a spirit of reciprocity and comity between the sovereign States and the Federal Government in the imposition of taxes, not carrying it, of course, to the extent of forcing an injustice to either.

Mr. FLETCHER. I quite agree with the Senator, and Florida has done as he has suggested. I do not mean at all to indicate that we want to go alone, and disregard conditions in other parts of the country, or the spirit of cooperation among the several States or the people of the United States. We have adopted law after law on various subjects conforming to the statutes of other States. I do not know but that there is scarcely a field of legislative enactment about which we have not passed laws, conforming, as we could, with the laws of other States. We are doing that constantly. Sometimes I feel like criticizing our legislature for actually copying statutes from other States almost word for word. We have done that, and frequently do it, and that shows a good spirit. So far as those laws will apply, we want to have them conform to the laws of other States in the Union.

I will say further that I have no criticism to make about the Federal Government imposing an estate tax when they need the money. If the Federal Government needed this money, I would not raise the slightest objection or question about it except as to the provision for credits. I voted for the various means of raising revenue when we were in search of revenue. But, confessedly, the Government does not need this money, and, confessedly, this tax is imposed here for the purpose of accomplishing what seems a great reform in the minds of certain gentlemen who are superior to other people, and in order to coerce the States to bring about uniformity of legislation where the Constitution does not require it, and it is a violation of the constitutional requirement of uniformity where it ought to exist.

If the Federal Government needs this estate tax, let them have it. Florida will pay her share just as cheerfully as will any other part of the Union. I am not raising any complaint particularly about the estate tax. The imposition of a Federal estate tax is a pretty good way to raise money, I think, when the Government needs the money, and I will not object to that; but what I do object to is discrimination between States, and by providing for this 25 per cent and then this 80 per cent credit for the purpose of accomplishing another object, not for the purpose of raising revenue, you are giving away your revenue, you are giving it back to the States for the purpose of coercing the States into the adoption of a financial policy which the States do not approve. That is what I object to, and that, in my judgment, brings about the unconstitutionality of this provision.

If the people of a State decide that it is contrary to their policy and their judgment and their conviction to impose an income or inheritance tax, why not let the State decide that question for itself? There are many States which require the tax; there are others which do not. We have a property tax, license taxes, and that sort of thing. For instance, we are building our highways out of the gasoline tax. The tax started at 2 cents, we raised it to 3, and now it is 5 cents. We get a million dollars a month and more out of the gasoline tax and spend it on highways. Why not let us do that if we want to? Has the Federal Government any business to come in and say, "You must not do that. We do not like that. That is not in accordance with our great reform idea."

The Federal Government does not need this tax. We are reducing taxes, and the only possible argument under that score is that, first, the revenues will be decreased $7,000,000 during the fiscal year if this amendment is adopted, and the ultimate possible reduction of Federal revenue will be between twenty-five and thirty million dollars. The argument is that if we do raise this revenue here we can reduce it somewhere else. Other taxes will not be reduced to any appreciable extent because there may be a reduction in this tax of $25,000,000. The position is sometimes taken that if we raise this revenue, $25,000,000 a year, then we can reduce all down the line, in other taxes, $25,000,000 against $3,000,000,000 that we have to raise in order to run the Government. That argument fails. To spread $25,000,000 over three to five billion requirement would be no appreciable separate relief.

Let me continue just a little further. I wish the Senate to keep this in mind. Mr. Machen says:

> The tax imposed by the act of 1926 consists of two separable parts, (1) a tax equal to 20 per cent of the rates mentioned in section 301(a), which is imposed ostensibly for the purpose of raising revenue, and (2) a tax equal to 80 per cent of those rates which is on its face imposed not for any such purpose but solely for the purpose of inducing the States to impose estate or inheritance taxes of at least an equal amount. This portion of the so-called tax will from the outset raise no revenue at all in States whose laws conform to the congressional will, and if it becomes permanently a part of our system of Federal jurisprudence will untimately raise no revenue anywhere.
>
> May it not, therefore, be contended that the estate tax of 1926 consists of two clearly separable parts—20 per cent for the purpose of raising revenue and 80 per cent for the purpose, not at all of raising revenue but of inducing the States to impose inheritance or estate taxes at least equivalent in amount, and that this latter portion is not properly a tax at all, any more than the tax on articles produced by child labor, and is therefore null and void?
>
> The wide difference between a tax which is laid in such a way as while producing revenue yet also to accomplish some other purpose—a tax laid "with a political view," to borrow a phrase from our Maryland declaration of rights—and a so-called tax which is not imposed in any degree for the raising of revenue but solely for some other purpose, and is therefore void, may be emphasized by an illustration. The estate tax laws from the beginning, and the income tax laws since 1916, have allowed charitable or religious bequests or gifts, with certain qualifications, to be deducted in determining the taxable estate or income, as the case may be. Now, this practice undoubtedly tends to encourage charitable or religious contributions. The taxpayer knows that every dollar he gives to charity goes net, and that he does not have to pay anything to the Government by way of tax on the money so given. But, on the other hand, he does not save anything in tax on his other estate or other income and therefore is under no pressure or inducement to make a gift unless his inclinations prompt him to do so. But suppose Congress, instead of declaring that charitable or religious contributions shall be deducted in ascertaining the taxable estate or the taxable income, should enact that they should be credited on the tax. As a result, everybody would be virtually forced to contribute to charity. He would have the option between giving the money to the Federal Government and giving it to God; and most persons, for the good of their souls, would choose the latter alternative.
>
> Indeed, if this system of "credits" be once firmly established, there is absolutely no limit to the powers of Congress.
>
> For instance, suppose Congress should determine that fathers should be prevented from disinheriting their children. The purpose could be accomplished by the simple expedient of providing that a certain proportion of every estate bequeathed or descending to a child shall be credited on the estate tax.
>
> Or, again, suppose Congress decides that wages paid day laborers should be increased. All it need do is to provide that the income tax of every corporation or other employer of labor shall be credited with amounts paid laborers up to, say, $10 per day apiece.
>
> Is it not clear that the only alternative to allowing virtually unlimited powers to be concentrated in Congress is to hold that wherever Congress attempts to allow as a credit against a Federal tax any payment that depends upon the volition of the taxpayer or of the State, the statute, at least, to the extent that the credit is allowed, ceases to be a revenue measure and becomes an unconstitutional attempt on the part of Congress to legislate on matters which are beyond its powers?

Mr. Machen concludes his article with this statement, with which I am going to surrender the floor. The thought could not be expressed any better. He says:

> The power of the purse is throughout Anglo-American history the only means by which liberty and independence have been achieved or preserved. In an attempt to snatch it from the people Charles I lost his head; and, rather than surrender it, the American Colonies reluctantly severed connection with a mother country which they loved. If our States have yielded it up, in respect to their internal affairs—if Congress can by a cunning device dictate to them what taxes they shall levy for local purposes—then they are no longer States but satrapies. The Supreme Court has not hesitated more than once to overrule prior decisions if convinced of their error. Is it too much to expect of the patriotism and fair-mindedness of a great court to disregard the hasty dictum of Florida v. Mellon?

Mr. President, I ask to have inserted in the RECORD certain memoranda and material which have come to my hands. I call attention to the attitude of the Chamber of Commerce of the United States on this subject, too. Part of their insistence is that there shall be a repeal of the estate tax. This data I ask to have inserted in the RECORD.

The PRESIDING OFFICER (Mr. JOHNSON in the chair). Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

FEDERAL ESTATE TAX REPEAL

All State legislatures have been in session since Congress passed the Federal estate tax measure and 16 have accepted the levy, while 32 have either refused to accept the levy or have paid no attention to it.

Sixteen States have amended their inheritance tax measure so as to take advantage of the credit provision of the Federal estate tax measure. They are:

California, Delaware, Georgia, Maine, Massachusetts, Missouri, New York, North Carolina, Ohio, Pennsylvania, Vermont, Virginia, Rhode Island, Oklahoma, Mississippi, and New Jersey. Total, 16.

Alabama and Florida have constitutional amendments prohibiting the levying of an inheritance tax. Nevada has the constitutional power to levy inheritance tax, but the State legislature does not exercise it. Maryland and New Hampshire levy no tax in class A, which applies to lineal descendants. Pennsylvania accepted the Federal provision in 1926, but the supreme court of the State declared it unconstitutional. The Pennsylvania Legislature again endeavored to conform to the Federal provision at its last session, and the matter is again in court.

The New Jersey Legislature started its maximum brackets of 16 per cent at $3,700,000, thereby exceeding the Federal levy in many of its higher brackets. The maximum Federal levy starts at $10,000,000. The Federal rate of 20 per cent, permitting the States to take four-fifths of the levy, divides 16 per cent to the States and 4 per cent to the Federal Government. New Jersey is as much in disorder for taking more than Congress prescribed as Alabama or Florida are for taking less than Congress designates. For either Alabama or Florida to change their constitution would require at least five years' time to go through the various legal requirements of such a procedure.

Both houses of 23 State legislatures by concurrent resolution have asked Congress to repeal the Federal estate tax:

Alabama, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Indiana, Kentucky, Maryland, Michigan, Nevada, North Dakota, Oregon, Pennsylvania, Rhode Island, Tennessee, Texas, Utah, Vermont, Washington, West Virginia, and Wyoming.

(This resolution in practically the same form was passed by 23 State legislatures listed in the memorandum.)

Copy of concurrent resolution passed by lower house of Texas Legislature January 14, 1927, by a majority of 3 to 1. It is now before the Texas Senate

Whereas the Federal estate (inheritance) tax law as amended February 26, 1926, provides that all estates liable thereunder shall be credited with any inheritance tax paid by its beneficiaries to the State or States, the credit to equal 80 per cent of the Federal levy; and

Whereas this amendment encroaches upon the rights of the States to raise their own revenue as the wisdom of their legislature directs, because its object is to persuade them to abandon their State inheritance tax laws in favor of statutes based upon the Federal law. The tax not being required by the Federal Government for revenue at this time, its only object now must be to force uniformity of this tax in all of the States: Therefore be it

Resolved by the house of representatives of the fortieth legislature (the senate concurring), We hereby request the present Congress to immediately repeal the Federal estate (inheritance) tax provisions of the revenue law effective February 26, 1926, and abandon this field of taxation and leave this source of revenue for the State legislatures of the various States to deal with as they may see fit: Be it further

Resolved, That certified copies of this resolution be forwarded to our Senators and Representatives in the Congress of the United States.

[Excerpt from message of Gov. Albert C. Ritchie to the General Assembly of Maryland, January, 1927]

INHERITANCE TAXATION

The Federal estate tax, as amended by Congress in 1926, presents a serious question to most of the States of the country, including Maryland.

Congress reduced the maximum rates of the Federal estate tax from 40 per cent to 20 per cent, increased the arbitrary exemption privilege from $50,000 to $100,000, and increased the credit or deduction from the Federal tax which is allowed on account of local inheritance taxes paid to the States from 25 per cent up to 80 per cent of the amount of the Federal tax.

In other words, if the Federal tax on some particular estate amounts to $1,000, then there may be deducted from this amount any inheritance tax paid the State up to $800. If no State inheritance tax is paid, then the Federal Government will collect the full Federal tax.

The direct effect of this is to invite the individual States to levy inheritance taxes up to 80 per cent of the Federal tax in order that this full credit may be received. It encourages States with low rates to raise, and several States have already raised their inheritance-tax rates so as to approximate more closely 80 per cent of the Federal tax.

In my judgment this involves a clear invasion by Congress of the taxing powers of the States and contemplates a system of joint levies entirely out of accord with the long-established separation of tax sources as between State and Federal Governments.

There is a serious question now before the courts as to the constitutionality of the Federal law, and a determined effort will be made to repeal it at this session of Congress.

In any event, I do not think that Maryland should permit herself to be coerced by the Federal Government into raising her inheritance taxes in order to meet the credit allowance in the Federal law.

I recommend that we do not do so, and that this legislature memorialize Congress to repeal the Federal estate tax altogether.

I recommend also that Maryland join a number of her sister States in adopting the reciprocity feature in our inheritance-tax legislation and thus put an end to multiple State taxation which so often works a serious hardship and injustice.

AMERICAN TAXPAYERS LEAGUE,
Washington, October 25, 1927.

Concurrent resolution requesting repeal of the Federal inheritance tax has passed both houses of 23 State legislatures, as follows:

Alabama, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Indiana, Kentucky, Maryland, Michigan, Nevada, North Dakota, Oregon, Pennsylvania, Rhode Island, Tennessee, Texas, Utah, Vermont, Washington, West Virginia, and Wyoming.

The concurrent resolution has also passed one house of each of the following six State legislatures to the present date:

Idaho, Illinois, Iowa, Kansas, Maine, and Missouri.

Record of State legislatures on concurrent resolution to repeal the Federal inheritance tax

Passed in both houses	Passed in one house	Defeated in both houses	Defeated in one house	Session—no action	Not in session
Alabama. Arizona. Arkansas. Colorado. Connecticut. Delaware. Florida. Indiana. Kentucky. Maryland. Michigan. Nevada. North Dakota. Oregon. Pennsylvania. Rhode Island. Tennessee. Texas. Utah. Vermont. Washington. West Virginia. Wyoming. Total, 23.	Idaho. Illinois. Iowa. Kansas. Maine. Missouri. Total, 6.	Montana. South Carolina. Total, 2.	Wisconsin. New Hampshire. Massachusetts. Nebraska. Idaho. Illinois. Iowa. Kansas. Maine. Total, 9.	California. Minnesota. New Jersey. New Mexico. New York. North Carolina. Ohio. Oklahoma. South Dakota. Total, 9.	Georgia. Mississippi. Louisiana. Virginia. Total, 4.

This record covers period from January to June, 1927.

AMERICAN TAXPAYERS LEAGUE,
Washington, D. C., November 5, 1927.

Maximum rates of State inheritance, corporation, individual income, ad valorem, and gas tax

State	Inheritance (class A)	Corporation income	Individual income	Ad valorem (rate on $1)	Gas tax (per gallon)
Alabama	None	None	None	6.5 mills	4 cents.
Arizona	5 per cent	do	do	29.8 mills	Do.
Arkansas	10 per cent	do	do	8.7 mills	5 cents.
California	12 per cent	do	do	None	3 cents.
Colorado	7 per cent	do	do	do	Do.
Connecticut	4 per cent	2 per cent	do	24.1 mills	2 cents.
Delaware	do	None	3 per cent	None	3 cents.
Florida	None	do	None	7.5 mills	5 cents.
Georgia	3 per cent	do	do	5 mills	4 cents.
Idaho	do	do	do	6 mills	Do.
Illinois	14 per cent	do	do	None	2 cents.
Indiana	4 per cent	do	do	Classified	3 cents.
Iowa	7 per cent	do	do	7.68 mills	Do.
Kansas	2½ per cent	do	do	2.74 mills	2 cents.
Kentucky	16 per cent	do	do	3 mills, real estate; 5 mills, personal property.	5 cents.
Louisiana	3 per cent	do	do	5.75 mills	2 cents.
Maine	2 per cent	do	do	None	4 cents.
Maryland	None	None	None	2.74 mills	Do.
Massachusetts	7 per cent	2½ per cent	6 per cent	None	None.
Michigan	8 per cent	None	None	29 mills	3 cents.
Minnesota	4 per cent	do	do	7.7 mills	2 cents.
Mississippi	10 per cent	5 per cent	5 per cent	45 mills	4 cents.
Missouri	6 per cent	1 per cent	1 per cent	1.3 mills	2 cents.
Montana	4 per cent	do	None	4.333 mills	3 cents.
Nebraska	1 per cent	None	do	3.75 mills	2 cents.
Nevada	None	do	do	5.8 mills	4 cents.
New Hampshire	do	do	(1)	28 mills	3 cents.
New Jersey	16 per cent	do	None	None	2 cents.
New Mexico	1½ per cent	do	do	7.8 mills	5 cents.
New York	4 per cent	4½ per cent	3 per cent	1 mill	None.
North Carolina	6 per cent	4 per cent	5 per cent	None	4 cents.
North Dakota	7 per cent	3 per cent	6 per cent	3.95 mills	2 cents.
Ohio	4 per cent	None	None	0.85 mill	3 cents.
Oklahoma	16 per cent	do	2 per cent	2.5 mills	Do.
Oregon	10 per cent	do	None	6.7 mills	Do.
Pennsylvania	2 per cent	do	do	None	Do.
Rhode Island	3 per cent	do	do	0.9 mill	2 cents.
South Carolina	6 per cent	4 per cent	5 per cent	5 mills	5 cents.
South Dakota	4 per cent	None	None	18.84 mills	4 cents.
Tennessee	5 per cent	3 per cent	do	2 mills	3 cents.
Texas	6 per cent	None	do	2.5 mills	Do.
Utah	5 per cent	do	do	2.4 mills	3½ cents.
Vermont	do	do	do	None	3 cents.
Virginia	do	3 per cent	3 per cent	Intangible and classified.	4½ cents.
Washington	10 per cent	None	None	None	2 cents.
West Virginia	7 per cent	do	do	1.4 mills	4 cents.
Wisconsin	10 per cent	7 per cent	7 per cent	18.86 mills	2 cents.
Wyoming	2 per cent	None	None	4.26 mills	3 cents.
District of Columbia	None	do	do	20 mills	2 cents.

[1] New Hampshire: The individual income tax rate used is the average rate of taxation existing upon other property throughout the State.

STATE INHERITANCE TAX

The following States have amended their State inheritance tax measure to take advantage of the credit provision of the Federal tax measure: California, Delaware, Georgia, Maine, Massachusetts, Missouri, New York, North Carolina, Ohio, Pennsylvania, Vermont, Virginia, Oklahoma, Rhode Island, New Jersey.

The maximum levy on these States is 16 per cent. In most States there are exemptions ranging from $5,000 to $25,000 for each beneficiary. The State of Kansas grants the wife $75,000 exemption.

The rates on inheritance tax are from class A which applies to lineal descendants, wife or husband, and specified near kin. Perhaps 90 per cent of the property is transmitted under this provision of the State inheritance tax.

Alabama and Florida have constitutional amendments prohibiting the levying of inheritance taxes. Nevada has the constitutional power to levy inheritance taxes but the legislature does not exercise it. Maryland, New Hampshire, levy no tax in class A but levy taxes in class B which includes second kin.

Oregon has a maximum rate of 10 per cent on the entire estate.

STATE INCOME TAX

The constitution of the following States will not admit of a State income tax: Florida, Alabama, Indiana, Iljinois, Michigan.

FEDERAL TAX RATES

Inheritance (estate) tax: The Federal Government can not levy an inheritance tax and therefore can not graduate the rates according to blood relation. Congress can only levy an excise tax and graduate it according to the value of the estate. The Federal estate tax measure exempts from taxation $100,000 for each estate. The levy is graduated to a 20 per cent maximum with a credit of 80 per cent to the States provided they enact concurrent legislation.

Corporation tax: The Federal rate is 13½ per cent, flat, with $2,000 exemption.

Individual income tax: A graduated levy with a maximum of 25 per cent and exemption of $3,500.

Mr. BORAH obtained the floor.

Mr. KING. Mr. President, I suggest the absence of a quorum.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	McLean	Shortridge
Barkley	Fletcher	McMaster	Simmons
Bingham	George	McNary	Smith
Black	Gerry	Mayfield	Smoot
Blaine	Gillett	Moses	Steiwer
Blease	Glass	Norris	Stephens
Borah	Goff	Nye	Swanson
Bratton	Greene	Oddie	Thomas
Brookhart	Harris	Overman	Tydings
Broussard	Harrison	Phipps	Tyson
Bruce	Hawes	Pittman	Vandenberg
Capper	Heflin	Reed, Pa.	Wagner
Caraway	Howell	Robinson, Ind.	Walsh, Mont.
Couzens	Johnson	Sackett	Warren
Curtis	King	Schall	Watson
Dale	Locher	Sheppard	
Deneen	McKellar	Shipstead	

Mr. CURTIS. I was requested to announce that the Senator from Ohio [Mr. FESS] and the Senator from Tennessee [Mr. MCKELLAR] are detained in committee.

Mr. GERRY. I desire to announce that the Senator from Arkansas [Mr. ROBINSON], the Senator from Wyoming [Mr. KENDRICK], and the Senator from Arizona [Mr. HAYDEN] are detained on official business.

The PRESIDING OFFICER. Sixty-six Senators having answered to their names, a quorum is present.

Mr. BORAH. Mr. President, no one would be justified in the heat of an afternoon like this, especially Saturday afternoon, in discussing at length the legal proposition which may be thought to be involved in the tax under consideration or the manner in which it is being at present levied. My understanding is that every legal proposition which has thus far been presented to the Supreme Court touching the constitutionality of the tax has been decided in favor of the power of the Federal Government to levy the tax. Beginning with the case of Knowlton against Moore, the question has been presented to the Supreme Court from time to time as different phases of the question might be developed by different forms of the statute, and thus far the court has upheld the constitutionality of the tax.

It is contended by the able Senator from Florida [Mr. FLETCHER] that while the court decided upon the uniformity

question in the case of Florida against Mellon, it was in a sense obiter dicta in view of the fact, as contended, that the court held that it was without jurisdiction, but nevertheless went forward and decided the constitutional question.

There is no doubt that the court decided the constitutional question. It is a unanimous opinion. As I see the record, in the very brief examination which I have made of it in the last 20 minutes, the record justified the court in passing upon the constitutional question. At any rate, in my opinion, the court did not differ in its procedure from former practices of the court in that respect. More than once the Supreme Court, in passing upon questions, has discussed the question of jurisdiction, decided the question of jurisdiction adverse to the entertaining of the case, but nevertheless passed upon the merits of the controversy. But whether that practice be a uniform practice or whether it be a wise practice, in this case the court deemed it necessary to a fair disposition of the case to pass upon the merits of the controversy, and did so.

I shall read briefly from the decision and then pass on to another phase of the controversy in which I am much more interested:

> The contention that the Federal tax is not uniform, because other States impose inheritance taxes while Florida does not, is without merit. Congress can not accommodate its legislation to the conflicting or dissimilar laws of the several States nor control the diverse conditions to be found in the various States, which necessarily work unlike results from the enforcement of the same tax. All that the Constitution requires is that the law shall be uniform in the sense that by its provisions the rule of liability shall be the same in all parts of the United States.
>
> The claim of immediate injury to the State rests upon the allegation that the act will have the result of inducing potential taxpayers to withdraw property from the State, thereby diminishing the subjects upon which the State power of taxation may operate. The averment to that effect, however, affords no basis for relief, because not only is the State's right of taxation subordinate to that of the General Government but the anticipated result is purely speculative and at most only remote and indirect. If, as alleged, the supposed withdrawal of property will diminish the revenues of the State, non constat that the deficiency can not readily be made up by an increased rate of taxation. Plainly, there is no substance in the contention that the State has sustained or is immediately in danger of sustaining any direct injury as the result of the enforcement of the act in question.

Mr. President, there may be much to be said in favor of some contentions made by the able Senator from Florida, but we may proceed now upon the theory that for the present the Supreme Court has settled the question which the able writer whom he quoted seems to think ought to be reopened.

I want to discuss the matter from another standpoint. There has been a powerful propaganda in the country for the last several years for a repeal of the inheritance tax. The program includes Federal and State tax alike. The contention is that it is a tax which ought not to be levied at all, and the arguments adduced in favor of the repeal of the inheritance tax upon the part of the Federal Government are equally available against the levying of a tax by the respective States. I look upon the program initiated several years ago as including an assault upon the inheritance tax in any form by either sovereignty.

I favor an inheritance tax, not that I would use it, as some indicate they would, for the purpose of leveling great fortunes, nor as an assault upon great fortunes. Whatever the problems may be which those great fortunes present to the American people, I would not be in favor of undertaking to solve them through the power of taxation.

Mr. GLASS. Why not, if the fortunes were acquired through a system of taxation?

Mr. BORAH. I see what the Senator has in mind. I do not want to be diverted into a discussion of that proposition. I doubt, however, the efficacy of the remedy even in that instance.

I favor an inheritance tax as a permanent part of our taxing system. In the first place it is a tax that is most difficult to evade. It costs less to collect an inheritance tax than any other tax we have; and what particularly appeals to me is that it is the one tax upon great wealth which can not be passed on to be imposed upon those who ought not to pay it. It is my opinion that a study of the program for repeal will disclose that the real objection to the tax upon the part of those who would repeal it is because it is impossible to pass it on to others.

It seems to me to be a fair tax when we take into consideration that the exemption is $100,000 and that the rate up to $500,000 is very moderate and not, in my opinion, immoderate beyond that. It can hardly be criticized as in any sense an unfair tax. It corresponds with the fundamental rule of taxation that taxes should be laid in accordance with ability to pay. I do not know of any wise rule of taxation which conflicts with the levying of an inheritance tax.

The Senator from Florida [Mr. FLETCHER] said that if the Federal Government needed the tax, the situation might be different. The Federal Government does need the tax. We have at the present time a public debt of some $18,000,000,000.

Mr. FLETCHER. Mr. President, will the Senator from Idaho allow me to interrupt him?

Mr. BORAH. I yield.

Mr. FLETCHER. I think I made it clear that the situation might be different as to a Federal estate tax, but in no case did I justify the provision for crediting on the Federal tax the amount paid under the State tax laws.

Mr. BORAH. I understood that to be the contention of the Senator, and to some extent later I may refer to it. I said a moment ago that there were portions of the argument which the Senator advanced with which I had some sympathy, and that is a feature of it which I shall mention later. I was proceeding to say we have a national debt now of some $18,000,000,000 coming over from the World War. If this should be regarded as an emergency tax, as a war tax, economically we are still in the midst of the war. Our public debt at the close of the war was something like twenty-five or twenty-six billion dollars. It is now about two-thirds of that amount. Economically, therefore, we are yet in the midst of the great struggle which began in 1914.

In addition to that, in 1928 our annual budget is about $4,900,000,000. We are now very close to a $5,000,000,000 budget. I will not name the exact year, but prior to the World War our budget was something less than $800,000,000. Ten years after the war we have a budget of nearly $5,000,000,000. In this way our taxes mount from year to year at an alarming rate.

We shall not, in all probability, see a budget below that figure. It will continue to increase. It is true that as we decrease the national debt the interest charge will decrease, but that will be offset by the continuing increase of the ordinary expenses of the Government. The question arises, in view of the stupendous debt which we have and the constantly increasing burden of Government, how is the Federal Government going to meet its obligations? I know of no better way than to collect a reasonable tax from large estates. They are in no sense State creations. One will scarcely find a great fortune in the United States that was created wholly within any State. He will scarcely find a fortune which has not been built up as the result of the opportunities afforded by the States and the Federal Union combined, taking advantage of the opportunities presented by the combination of the economic powers within both the States and the National Government. It seems to me, therefore, that the National Government ought to claim a reasonable tax from the vast estates thus built up.

I said a moment ago that we should not likely see a decrease in our annual budget. Mr. President, the extent to which we are increasing the ordinary running expenses of the Government is alarming. We are building up what I conceive to be a purely bureaucratic system of government; and if there is any form of government that is more wasteful, more inefficient, and more demoralizing than a bureaucratic system of government, God in His infinite mercy has not as yet permitted it to torture the human family. Viewing the appropriations of the present and the preceding session, we get a glimpse of what in a very brief period of time we are going to have to face in the way of a budget upon the part of the Federal Government.

Many of these expenditures, Mr. President, may be justified; many of them are not to be condemned; those we must necessarily take care of; but when to them are added the appropriations which we feel disposed to make from year to year, and wholly indefensible in the way of building on to the Federal Government, we can not hope within the coming years to see a budget less than that which we now have; rather must we be prepared to see it greatly increase.

At the present time 1 person in every 12 over 16 years of age is upon a public pay roll either of the National, State, or the local governments. It has been said that at the beginning of the French Revolution 1 individual in every 5 was upon the Government pay roll in some way. Considering that as a nation we are now about 150 years old, and that 1 in every 12 persons over 16 years of age is upon some kind of a public pay roll, we can well realize the rapid strides which we are making toward that form of bureaucracy which really broke down the Government of France. Of course, we feel that the things which happened to other nations under a certain system can never happen to us even under the same system. A bureaucratic form of government, however, is not only burdensome, but it is destructive of initiative, of individuality, and of self-

reliance upon the part of the citizen, without which no republican form of government can long exist.

Six and five-tenths per cent of the Nation's income in 1922 was paid for personal services to Federal, State, and local employees. Salaries of the Federal, State, and local government employees take $34 from every man, woman, and child in the United States and $91 from every person over 10 years of age. Now, who is going to bear this constantly increasing burden? Who is under greater obligation to bear this burden than the vast estates which have been built up under the present economic system prevailing in the United States?

How can anyone justify for a moment exempting the individual who is fortunate enough to inherit $5,000,000 or $10,000,000 or $20,000,000 from bearing a portion of this great burden imposed upon the people generally and allowing him to pass on that which would be collected from him to those who are now paying their undue proportion of taxes?

Speaking of the conditions in France during the reign of Louis XVI, I recall that when Louis XVI first came into power he invited Turgot to become his finance minister. The first thing that his finance minister proposed was to curtail the bureaucracy, to decrease the number of officials, to break down the vast list of dependents upon the Government. The King told him that he would support him to the last in his brave undertaking; but it was not long until the King had to withdraw his support from the attack which his minister was making upon the bureaucratic system of government. Then Turgot said, "We will tax the great estates and make them bear their proportion of the burden of government"; but it was not long until the King had to withdraw his support from that undertaking, and so the only means by which the great finance minister could secure relief for the Government was denied him.

In our present situation we have a like problem. When we undertake to curtail the bureaucratic tendency of the Government we meet with united opposition from sources which make it impossible for us to accomplish very much. The moment we undertake to levy a due proportion of taxes upon the vast wealth of the country we are met with an attack from that source. I do not hesitate to say that the tendency of taxation in this country, as it was in France, is to relieve the vast wealth of the country from its proportion of the burden and place it upon those less fitted and less capable of bearing it.

The tendency of our tax system, as in the case of the tax systems of other countries, is to exempt those who are most able to bear, to exempt the vast wealth of the country, and to pass the burden on to those less capable. The second tendency is for those who have taxes levied upon them to pass them on to the ultimate consumer. Those two tendencies in government require a constant fight upon the part of those who insist upon equal taxation in order that we may secure such a result.

In connection with that proposition, we are constantly gratified by the statement that this is a very wealthy Nation, that we are a very wealthy people. We are a Nation of stupendous wealth, but it is rather poorly distributed.

From three sources which I think fairly reliable I find that the highest figure given for our national income of 1926 was $90,000,000,000. My opinion is that that is high, but I take the highest figure for a purpose. Even so, however, in 1926 there were 90,000,000 people out of the 117,000,000 people of the United States who had an income of about $500 apiece. Out of 117,000,000 people some 90,000,000 of them had an annual income of about $500.

You will say to me, "Why are you concerned, as those people do not pay taxes? They have not the means to pay taxes." But they do pay taxes. They pay an inordinate amount of taxes.

They pay it in the clothes which they buy; they pay it in rent; they pay in the food which they have. They pay the tax which it is within the power of the vast number of corporations to pass on to them, and they pay tribute. This is one tax which they can not pass on to that class of people. This is one exaction which the man against whom it is levied must pay; and when we take into consideration the leaps and bounds by which wealth is being concentrated, and the vast mass of people who do not come within the reach of that accumulation, it is nothing less than the obligation of the Government to require from those who have it to pay in accordance with their ability to pay.

Another figure: For the standard family of five, out of 76,000,000 there would be an average income of about $2,300 per year. The poorest class, comprising about 76,000,000, or 65 per cent of the population, had an income in 1926 of less than $500, or about $460 a year. That is an unhealthy condition of affairs. We have little to do to-day with that in this particular bill, except in the way of trying to place the tax where it ought to be. The only fault I find with this inheritance tax is that I would place the exemption much lower, and I would place the percentage higher. It ought to go back to where it was prior to the last amendment.

Let us give some consideration to the question of this tax going exclusively to the States.

When this tax was first levied the contention was that it was a tax upon the power or the right of the State to regulate estates, and therefore was a tax which embarrassed and interfered with the State in the regulation of the property of those living within its bounds. That question was decided by the Supreme Court in the case of Knowlton against Moore. It is not a tax upon the power or the right of a State to regulate, but it is a tax upon the right to receive. The tax is not upon the dead but a tax upon the living. The tax is upon those who are fortunate enough to acquire vast estates without themselves having contributed very much, if anything, to their creation.

Every argument which has been made against this tax, as I intimated in the opening of my remarks, runs against it as a State tax the same as it would run against it as a Federal tax. It is said that it is a tax upon capital. It would be a tax upon capital the same if it were levied by the State. But the question of its being a tax upon capital, in my opinion, does not necessarily militate against the justice of the tax. When you take into consideration the manner in which the capital is acquired, and also take into consideration that the tax levied upon property generally is a tax upon capital, it does not seem to me a justification for exempting these estates from their proportion of the Government's burden. We levy a tax in the States upon property, upon the farm, and upon that which is capital in every sense in which estates are capital.

The States have not indicated much desire to avail themselves of this tax. It is true that all except two or three States levy an inheritance tax; but all the States combined in 1926 collected $90,000,000 in inheritance taxes. The Federal Government in 1926 collected $119,000,000, making about $210,000,000 collected from these estates by all the States and by the Federal Government combined.

In 1926 the Federal and State tax, as I say, amounted to a little over $210,000,000. The value of the estates subjected to the Federal inheritance tax was $3,937,000,000. In other words, the Federal Government collected $119,000,000 out of estates valued at $3,937,000,000, leaving three billion and something over seven hundred million dollars of property after the tax was taken. When you add the State tax and the Federal tax together, you have some $210,000,000 taken from the $3,937,000,000, leaving $3,727,000,000 after both of the sovereignties had taken the tax under the present law.

I repeat that in my opinion the only objection to this tax is that the exemption from the Federal inheritance tax at the present time is entirely too high and the rates are not high enough.

The argument which is often made against the inheritance tax is that it depletes capital. The above figures are a complete answer to that contention. The fight for the repeal of the inheritance tax is being made behind the bulwark of State rights. It is not an invasion of the State's right to tax any more than an income tax is an invasion of the State's right to tax. There was a time when it was a question of whether or not we should employ the income tax. Some of the States now employ the income tax, and so does the Federal Government; but how is this any more an invasion of the right of the State to tax than for us to go into a State and levy a tax upon individual income when the State may be engaged in levying a tax upon the same income?

In other words, if a young man inherits $10,000,000, and the State lays a tax upon that inheritance, the next State may refrain from laying an inheritance tax, and another young man in that State inherits $10,000,000, and the State lays a tax upon his income from the property which he has acquired. Both of them receive their property by reason of the regulation imposed in the State in the distribution of estates. One of them pays it at the time the distribution takes place. The other pays it at the end of the year, in the nature of an income tax. The tax imposed by the Federal Government is as much an invasion of the right of the State in one case, in my opinion, as in the other.

Certainly, Mr. President, when we come to consider the benefits derived by these great estates from the Federal Government they are under quite as much obligation to pay the debt to the Federal Government as to the State.

At the beginning of this session it was recommended that we expend a billion dollars in the way of creating a larger Navy. At the same time it was recommended that we repeal the inheritance tax. Who is more interested in a large Navy, who is more interested in maintaining the security of the country,

in defending it, if need be, against a foreign foe, than the vast estates which have been built up under the protection of the Federal Government, its Army, and its Navy? They are under quite as much obligation to pay for the maintenance of these instruments of protection and stability and security as they are to pay for maintaining the ordinary machinery of their States.

The inheritance tax has been called a State tax, but it is no more so than a half dozen other taxes which might be mentioned, and the payment by the vast estates of this country of some $200,000,000 to the States and to the Federal Government for the benefits which they derive, the advantages which have accrued to them, and the wealth which has been assured to them, is the imposition of a very small tax for that which they have received.

We sometimes refer to this as an emergency tax. The first inhertance tax which was levied, I think, remained in the law about five years. That was in 1797. The next inheritance tax which was levied was during the Civil War. Then came the tax in a law which was declared unconstitutional. But the tax which we now have was levied in 1916, in a time of peace. I said a moment ago we are still economically in the midst of the difficulty which occurred shortly after the levying of this tax—that is to say, so far as our part in it is concerned—and if we should regard it as an emergency tax alone, and I do not so regard it, there would be just as much obligation to impose it to-day as there was in 1917 and 1918. The purposes for which it would be levied as an emergency tax are still in existence, as much as they were at the time that we levied it in the Civil War or in 1917 and 1918.

Mr. President, view it from whatever standpoint we may, it is a righteous tax, it is a just tax, it is a fair tax, and it ought not to be repealed. It is a democratic tax. There is no argument against it, save a selfish desire to escape a just portion of the burdens of Government. Instead of that, in my opinion, the Federal Government ought to make more out of the tax than we have made. In my humble judgment, we ought to increase the percentage and decrease the exemption. I trust the tax will not be repealed.

Mr. HARRIS. Mr. President, I ask to have read at the desk a letter I have recently received from the State tax commissioner of Georgia.

The PRESIDING OFFICER. The clerk will read, as requested.

The legislative clerk read as follows:

OFFICE OF STATE TAX COMMISSIONER,
Atlanta, Ga., May 4, 1928.

Hon. WILLIAM J. HARRIS,
United States Senator, Washington, D. C.

MY DEAR SENATOR:

* * * * * * *

The present Federal estate tax allowing Georgia 80 per cent of the amount collected is working admirably and bringing our State large revenues. I am very emphatically of the opinion that the Federal estate tax should not be repealed. It is not only a source of large revenue for the State of Georgia but the levying of this tax by the Federal Government prevents an unseemly scramble among the various States and makes for uniformity of inheritance taxation among the various States.

* * * * * * *

Sincerely yours,

R. C. NORMAN,
State Tax Commissioner.

Mr. REED of Pennsylvania. Mr. President, the Senator from Idaho [Mr. BORAH] has spoken with his usual clarity and force; but some of the statements he has made seem to me to call for a statement by those of us who expect to vote in favor of the pending amendment.

The Senator has stated that the propaganda which has been carried on in favor of the repeal of this tax has avowedly been directed also toward the repeal of the various State estate and inheritance taxes, and I think there is justification for that statement. The agitation in favor of a repeal of this Federal estate tax seems to me to have included much that was intelligent and persuasive, and very much that was unintelligent and impossible to agree with.

I want to say for myself, as one who has ardently favored the repeal of the Federal estate tax, that I do not want my votes in past Congresses or in this one to seem to imply a disagreement with the principle of taxation of inheritances. I should be happy to see the whole amount now taken by the Federal Government from the estates of decedents taken by the State governments immediately after this tax is repealed, and I do not speak from any desire to see a diminution of the burden of taxation borne by decedents' estates.

I never have been able to persuade myself that society owes any duty to men who have accumulated wealth to permit them to pass to succeeding generations the right to leisure or the immunity from labor that results from the possession of a fortune. I grant readily enough the right to protect those who are dear to us and whose support depends upon us, but I do not include in that group the able-bodied persons of succeeding generations. I never could see why a civilized nation should permit that immunity from labor to be transmitted from one generation to the next.

Mr. KING. Mr. President, will the Senator yield?

Mr. REED of Pennsylvania. I yield.

Mr. KING. Does not the Senator recall that when we were considering the tax bill two years ago there was an open avowal by some, notably by the New York Evening Post and other newspapers, that the drive should be carried on to secure a repeal of the Federal tax, and then go forward and secure a repeal of the State taxes? The Senator knows, of course, that in Florida there is a constitutional amendment under which they are prohibited from levying an estate tax. In the District of Columbia we have no estate tax. In one or two other States, as I recall, there is no estate or inheritance tax, and the Senator knows that before the Federal tax was rather heavy there was constant bidding between the States, lowering the estate tax, or not levying it, in order to attract men to make their domicile there so that they might escape taxes, and, of course, give the benefit to those States.

Mr. REED of Pennsylvania. Yes, Mr. President; I know those things were urged by perhaps the New York Evening Post and other advocates of repeal, and one purpose I have in rising now is to express my dissent from that particular argument which they then used and are now using. I do not believe that estates should be immune from taxation. I believe that the Commonwealths which confer the right of inheritance should resort to the exercise of that right for a source of large revenue, and I see no objection in any sound view of economics why they should not resort to it, and resort to it for larger revenues than they are now getting from it. So much for my belief about that.

As for the competition between the States of which the Senator speaks, undoubtedly such competition existed and will exist again if we repeal the Federal estate tax, but I do not believe that it is the function of the Federal Congress to prevent that competition. It stands to reason that if Florida abstains from inheritance taxation, she will have to seek other sources of income, and, in the long run, take from her citizenry the money that she needs to function her government. If she abstains from one, she will have to resort more heavily to another source of income. So that the people to whom she makes her appeal will not likely long be deceived by the apparent escape from taxation that is held out to them.

I want to state very briefly the reasons why I favor the repeal of the Federal estate tax, not the reasons of anybody else or of any party that has been conducting this propaganda—and we all know there has been great propaganda both ways on this question, both for the tax and against it. In the first place, I favor a repeal because as it now stands the tax is not an important source of revenue for the Federal Government. It is true, as the Senator from Idaho [Mr. BORAH] has pointed out, that the yield of this tax this year will be approximately $100,000,000, but that comes in the main from estates of persons who died more than two years ago, before we set up this 80 per cent rebate system.

It is calculated by the actuary who advises the Finance Committee that when the present law is in full operation, with the 80 per cent rebate applicable to all estates that we are taxing, our revenue from the law will shrink to less than $25,000,000 each year, and possibly will be closer to $20,000,000. Nominally, our tax will remain at about $100,000,000, but the rebate will absorb almost 80 per cent of it. That is one reason.

I favor its repeal because it has ceased to be an important source of revenue, and is used merely as a club to force these supposedly coordinate sovereignties to adopt laws which they themselves do not want to adopt. It forces them to take larger taxes from their decedents' estates than they want to take.

My own State of Pennsylvania furnishes an excellent illustration of that. We tax direct inheritances at the rate of 2 per cent, and collateral inheritances at the rate of 10 per cent. I think the 2 per cent rate is too small; I would be willing, for my part, to see it somewhat increased. But after the Federal Congress passed this 80 per cent rebate law Pennsylvania passed a new act, which has been sustained by the courts, providing that our tax should be only 2 and 10 per cent, respectively, as long as that was the maximum that was permitted to be deducted by the Federal Government, and that so long as a larger sum was permitted to be deducted in the payment of the

Federal estate tax, then the Pennsylvania tax should be that amount which is the maximum permissible deduction. There is an obvious case of yielding to the club in order to keep the money in Pennsylvania and prevent its going to the Federal Treasury.

Mr. COUZENS. Mr. President, will the Senator yield?

Mr. REED of Pennsylvania. I yield.

Mr. COUZENS. Does the Senator favor the next amendment, providing for the repeal of the 80 per cent clause?

Mr. REED of Pennsylvania. I would, by all means.

Mr. COUZENS. If we can agree on that, let us do it, if we can not get this through.

Mr. REED of Pennsylvania. If we are not going to repeal it all, let us, by all means, get rid of this rebate system, and use that, on the theory stated by the Senator from Idaho, as a bona fide tax to meet the great needs of the Federal Government which remain after the war. I myself would infinitely rather see this source of revenue turned over to the States, and see us quit making subsidies to the States, which would come to the same thing in dollars and cents; but if the Congress does not agree with that view, let us, by all means, keep this revenue for the Federal Treasury.

Mr. KING. Mr. President, the Senator will recall that when the last tax bill was under consideration in the Finance Committee, of which he is a member and I am a member, I opposed the giving of any credit, and finally insisted that, at any rate, we should not give a greater credit than that which existed in the law; namely, 25 per cent. The Senator then voted for the 80 per cent credit, and I had to file a minority report, and was the only one in the committee who was willing to keep it down to 25 per cent, though I was in favor of giving no credit. Does not the Senator admit now that we made a mistake?

Mr. REED of Pennsylvania. I think I admitted it then. I think I tried to be candid and honest——

Mr. KING. The Senator always is.

Mr. REED of Pennsylvania. And said that if I could not get the repeal of the tax directly, I would like to make it so ridiculous that the repeal would force itself, but I miscalculated, and the law stands to-day on what seems to be a ridiculous basis.

To go on to the next reason why I favor a repeal: The present law, as most of us realize on a moment's thought, is highly unfair in its application. The Constitution talks of uniformity of taxation, and the Supreme Court has held that this is uniform in its application. But let us consider whether it is uniform or not from the standpoint of common fairness.

Were I to die to-day leaving an estate—in order to flatter myself, suppose I should die leaving an estate of a million dollars all to one beneficiary, say to my wife—it would be taxed, as we know, with $100,000 exempted, and then an increasing scale running up to 6 or 7 per cent. In other words, the one beneficiary would have a tax which would amount to, say, 6 per cent of the total that was received. There is nothing very wrong about that. We will say that is reasonable enough. But suppose I died leaving $2,000,000 to two beneficiaries, each beneficiary would get exactly the same amount of money as in the first case I proposed, but the tax they would pay would be nearly double. That is not fair.

Mr. BORAH. The argument of the Senator is rather conclusive against the form of the tax, but it seems to me that it is not an argument against levying the tax, if it is levied properly.

Mr. REED of Pennsylvania. I do not mean it to be. The first argument I gave seemed to be an argument against a tax at all. The second I mean to offer as an argument against this particular form. For several years past the Senator from Rhode Island [Mr. GERRY] and myself, and I think other Senators, have pointed out its unfairness and have urged that as all taxes, after all, are paid by living beings, and after all, as the Senator from Idaho pointed out, this is not a tax on a dead man, but it is a tax on beneficiaries who receive property from the estate, if we are going to consider it as a tax upon the living beneficiaries, surely we ought to do our best to make it a uniform tax against such beneficiaries. And yet the simple illustration I have pointed out can be carried on to the further illustration as of five persons sharing in a $5,000,000 estate, where each beneficiary will pay about three times the tax that he would pay were he the sole beneficiary at the same amount from the smaller estate. I do not think that needs elaboration.

The next reason why I do not like the tax is that I disagree with the Senator from Idaho about the impossibility of evading it.

Mr. BORAH. I did not say there was an impossibility of evading it. I did say that in my judgment it was impossible to pass it on.

Mr. REED of Pennsylvania. I think that is true. I believe there is no way in which it can be passed on, as is an income tax passed on by those who are rendering public service and who pay the tax as an operating expense. That is true. But the tax is easy to evade, and if more people do not resort to the obvious evasion, it is rather, I think, to their credit. It is perfectly true that many rich men have evaded it by putting their money into prepaid insurance, if you will, or policies of any variety, and getting that money transmitted to the beneficiary wholly tax free. Under the decision in United States against Frick, or perhaps the case was in the collector's name against Frick, a decision handed down about three years ago, it was held that such contracts can not be included in the gross estate of the decedent, because it constitutes no part of his estate in actuality. Frick's insurance sets the precedent for many rich men, and occasionally we read of it in the paper. Many men will put their surplus in the form of prepaid insurance policies which are wholly tax free under this tax. The Senate only yesterday, against my protest, declined to tax even the profits made by insurance companies in which such property is placed.

Mr. BRUCE. Mr. President, will the Senator yield?

Mr. REED of Pennsylvania. Certainly.

Mr. BRUCE. I happen to know, from the fact of being an insurance lawyer, that insurance is resorted to on a very, very great scale for the purpose of evading the estate tax.

Mr. BORAH. I think the Senator from Maryland and the Senator from Pennsylvania are both agreed that there is no way under the sun to prevent evading the tax to some extent, it makes no difference what the tax is. If we were going to repeal it because of the evasions, there are several other taxes in the bill that would have to be repealed.

Mr. REED of Pennsylvania. Oh, surely. After all, the tax evasions simply represent a progressive battle of wits between Congress and a lot of lawyers, they inventing evasions almost as fast as we can stop the gap.

There is no question but that all these taxes are evaded, some by dishonesty and some by cleverness. We ought not to delude ourselves with the idea that we were wholly successful in levying this tax on great estates, because as a matter of fact we were not. Of course, the great, common evasion is gifts in contemplation of death, where, if the gift is made more than two years before the death, it becomes as a practical matter impossible for the Government to show that there was any such contemplation of death as is in excess of the anticipation of the ordinary mortal. Practically any such gift goes untaxed, and in that way many million dollars escape this tax.

So that, primarily, because I believe in this type of taxation, but I believe it ought to be levied by the Commonwealth that originates the right of inheritance; secondarily, because I believe that the law is essentially unfair in not being uniform in its application to different beneficiaries; thirdly, because I believe that the 80 per cent rebate constitutes a real usurpation of the power of the State and an unfair application of the congressional power in order to swerve their action; and, finally, because I believe that the tax is not as effective as we sometimes think it is, I expect to vote for the repeal. If that is unsuccessful, I expect to vote for the abolition of the 80 per cent rebate and the retention of the whole tax by the Federal Government.

Mr. BORAH. If the Senator should succeed in repealing the 80 per cent rebate, that would remove the most serious objection which he has to the tax.

Mr. REED of Pennsylvania. Yes; it would, indeed.

Mr. BORAH. I will join with him in that.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Connecticut [Mr. BINGHAM].

Mr. SMOOT. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. BROUSSARD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the inquiry.

Mr. BROUSSARD. What is the question we are to vote on?

The PRESIDING OFFICER. The amendment of the Senator from Connecticut [Mr. BINGHAM], the substance of which is the repeal of the estate tax.

The legislative clerk proceeded to call the roll.

Mr. BINGHAM (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. KENDRICK]. Since he is not present, I withhold my vote.

Mr. HARRISON (when his name was called). On this vote I have a pair with the Senator from California [Mr. SHORTRIDGE]. Not being able to obtain a transfer, I withhold my vote. If per-

mitted to vote, I would vote "yea." I am not informed how the Senator from California would vote.

Mr. McNARY (when his name was called). On this vote I am paired with the junior Senator from Delaware [Mr. BAYARD]. If that Senator were present, he would vote "yea." If I were permitted to vote, I should vote "nay."

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. I understand that if present he would vote as I contemplate voting. I therefore vote "nay."

The roll call was concluded.

Mr. CURTIS (after having voted in the negative). I have a pair with the senior Senator from Arkansas [Mr. ROBINSON]. I transfer that pair to the senior Senator from Washington [Mr. JONES] and let my vote stand.

Mr. LA FOLLETTE. I desire to announce that the junior Senator from Montana [Mr. WHEELER] is absent on account of a death in his family. He has a special pair on this question with the senior Senator from New York [Mr. COPELAND]. The junior Senator from Montana [Mr. WHEELER], if present, would vote "nay."

Mr. NYE. On this particular question my colleague the senior Senator from North Dakota [Mr. FRAZIER] is paired with the junior Senator from Florida [Mr. TRAMMELL]. Were my colleague present, he would vote "nay." I understand that the junior Senator from Florida, if present, would vote "yea."

Mr. WATSON. I have a pair with the Senator from South Carolina [Mr. SMITH]. I transfer that pair to the junior Senator from Oregon [Mr. STEIWER] and vote "nay."

Mr. DILL. My colleague the senior Senator from Washington [Mr. JONES] is absent on account of illness. If present he would vote "nay."

Mr. CURTIS. I desire to announce the following special pairs:

The Senator from New Jersey [Mr. EDGE] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Delaware [Mr. DU PONT] with the Senator from Idaho [Mr. GOODING];

The Senator from New Jersey [Mr. EDWARDS] with the Senator from New Hampshire [Mr. KEYES]; and

The Senator from New York [Mr. COPELAND] with the Senator from Montana [Mr. WHEELER].

If present, Senators DU PONT, EDGE, EDWARDS, and COPELAND would vote "yea," and Senators GOODING, KEYES, BLEASE, and WHEELER would vote "nay."

The result was announced—yeas 30, nays 43, as follows:

YEAS—30

Broussard	Goff	Oddie	Stephens
Bruce	Hale	Overman	Tydings
Caraway	Hawes	Pittman	Tyson
Deneen	Heflin	Ransdell	Walsh, Mass.
Fletcher	McKellar	Reed, Mo.	Warren
George	McLean	Reed, Pa.	Waterman
Gerry	Metcalf	Simmons	
Gillett	Moses	Steck	

NAYS—43

Ashurst	Dale	Locher	Schall
Barkley	Dill	McMaster	Sheppard
Black	Fess	Mayfield	Shipstead
Blaine	Glass	Neely	Smoot
Borah	Greene	Norbeck	Swanson
Bratton	Harris	Norris	Thomas
Brookhart	Hayden	Nye	Vandenberg
Capper	Howell	Phipps	Wagner
Couzens	Johnson	Pine	Walsh, Mont.
Curtis	King	Robinson, Ind.	Watson
Cutting	La Follette	Sackett	

NOT VOTING—21

Bayard	Edwards	Kendrick	Steiwer
Bingham	Frazier	Keyes	Trammell
Blease	Gooding	McNary	Wheeler
Copeland	Gould	Robinson, Ark.	
du Pont	Harrison	Shortridge	
Edge	Jones	Smith	

So Mr. BINGHAM'S amendment was rejected.

Mr. BINGHAM. I now offer another amendment relating to the estate tax. This amendment provides a new series of rates and also repeals the 80 per cent clause to which those who are interested in the rights of the States object. It will prevent the Federal Government exercising pressure on the States to levy estate or inheritance taxes of their own.

Mr. BORAH. Mr. President, I ask to have the amendment stated.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 192, it is proposed to strike out lines 20 to 25, inclusive, and lines 1 to 5 on page 193, and in lieu thereof to insert the following:

SEC. 401. ESTATE TAX RATES.

(a) In lieu of the rates of tax imposed by section 301 of the revenue act of 1926, the following rates shall apply in the case of the transfer of the net estate of a decedent dying after the enactment of this act—

Two-tenths per cent of the amount of the net estate not in excess of $50,000;

Four-tenths per cent of the amount by which the net estate exceeds $50,000 and does not exceed $100,000;

Six-tenths per cent of the amount by which the net estate exceeds $100,000 and does not exceed $200,000;

Eight-tenths per cent of the amount by which the net estate exceeds $200,000 and does not exceed $400,000;

One per cent of the amount by which the net estate exceeds $400,000 and does not exceed $600,000;

One and two-tenths per cent of the amount by which the net estate exceeds $600,000 and does not exceed $800,000;

One and four-tenths per cent of the amount by which the net estate exceeds $800,000 and does not exceed $1,000,000;

One and six-tenths per cent of the amount by which the net estate exceeds $1,000,000 and does not exceed $1,500,000;

One and eight-tenths per cent of the amount by which the net estate exceeds $1,500,000 and does not exceed $2,000,000;

Two per cent of the amount by which the net estate exceeds $2,000,000 and does not exceed $2,500,000;

Two and two-tenths per cent of the amount by which the net estate exceeds $2,500,000 and does not exceed $3,000,000;

Two and four-tenths per cent of the amount by which the net estate exceeds $3,000,000 and does not exceed $3,500,000;

Two and six-tenths per cent of the amount by which the net estate exceeds $3,500,000 and does not exceed $4,000,000;

Two and eight-tenths per cent of the amount by which the net estate exceeds $4,000,000 and does not exceed $5,000,000;

Three per cent of the amount by which the net estate exceeds $5,000,000 and does not exceed $6,000,000;

Three and two-tenths per cent of the amount by which the net estate exceeds $6,000,000 and does not exceed $7,000,000;

Three and four-tenths per cent of the amount by which the net estate exceeds $7,000,000 and does not exceed $8,000,000;

Three and six-tenths per cent of the amount by which the net estate exceeds $8,000,000 and does not exceed $9,000,000;

Three and eight-tenths per cent of the amount by which the net estate exceeds $9,000,000 and does not exceed $10,000,000;

Four per cent of the amount by which the net estate exceeds $10,000,000.

(b) Section 301(b) of the revenue act of 1926 (crediting the Federal estate tax with the amount of State inheritance taxes up to 80 per cent of the Federal tax) shall not apply in the case of the transfer of the net estate of any decedent dying after the enactment of this act.

Mr. BORAH. Mr. President, I desire to have the question on the amendment divided. I wish a separate vote on the repeal of the 80 per cent clause. I understand that there are two different propositions involved in the amendment.

Mr. FLETCHER. One portion of the amendment reduces the present rates, and the other repeals the 80 per cent clause.

Mr. SMOOT. Mr. President, the amendment proposes rates, as I noticed while it was being read, which are one-fifth of the present rates. In other words, the rates imposed by existing law under the amendment offered by the Senator from Connecticut will be reduced four-fifths in every case in each bracket.

Mr. BINGHAM. Mr. President, I may say, to put it in other words, that the rates proposed by the amendment would give the Federal Government exactly what it would receive now if the present law were carried out, and all the States brought their taxes up to the point the Federal Government wants them to bring them, and the Federal Government allowed 80 per cent to go back to the States and kept the 20 per cent. This amendment will allow the Government to receive the 20 per cent without putting pressure on the States.

Mr. SMOOT. That is another way of stating it, but the result is exactly the same.

Mr. BORAH. Mr. President, are we not entitled to have a division of the question of the amendment?

The VICE PRESIDENT. The two paragraphs of the amendment will be submitted to be voted on separately.

Mr. FLETCHER. I have no objection to that.

Mr. BORAH. Let us first vote on the provision repealing the 80 per cent clause.

Mr. GEORGE. Mr. President, I desire to inquire if the Chair announced that the two proposals would be voted on separately?

The VICE PRESIDENT. The two proposals will be voted on separately.

Mr. SIMMONS. Mr. President, as I understand this amendment, in addition to what the Senator from Utah has said, namely, that it reduces the rates to about one-fifth of the present rates——

Mr. SMOOT. It reduces them 80 per cent.

Mr. SIMMONS. In addition to that, the amendment provides for an exemption of only $50,000, while the present law provides for an exemption of $100,000.

Mr. SMOOT. Under existing law there is an exemption of $100,000, and the first bracket after that is $50,000.

Mr. SIMMONS. I am advised that this amendment does not change the exemption.

Mr. SMOOT. It does not.

Mr. McKELLAR. There seems to be some confusion about that. Is it correct that the amendment does not change the exemption?

Mr. SMOOT. It does not change the exemption. The exemption will remain $100,000 under the amendment proposed by the Senator from Connecticut.

Mr. SIMMONS. I merely heard it read from the desk, and I derived the impression from the reading that it changed the present law regarding the exemption.

Mr. BINGHAM. Mr. President, may I say to the President that all it does is to give the Federal Government exactly the tax which it would receive under the present law if the 80 per cent clause were repealed.

Mr. NORRIS. Mr. President, I desire to say so that that statement will not mislead anybody——

Mr. SIMMONS. It is misleading.

Mr. NORRIS. If, considering the entire amendment, we repeal the 80 per cent that goes to the States, it would bring to the Federal Government the same amount of money that it receives now but the States would not get anything. The portion of the amendment that we will vote on separately in regard to the rates does cut the rates down to one-fifth of the present rates, as I understand.

Mr. SIMMONS. Yes; that is true.

Mr. NORRIS. Let us have an understanding about it.

Mr. BINGHAM. There is no question about that.

Mr. NORRIS. It cuts the rates down. We are going to vote on that by itself, that is what it means, and if we are in favor of cutting the rates down to one-fifth of what they are now, of course we will vote for that proposal.

Mr. SIMMONS. Mr. President, if the Senator will pardon an interruption, more than that, under the present law, a State only gets the 80 per cent under certain conditions, where its tax laws are so adjusted as to entitle it to receive it, but in many cases the State does not get anything, while in other cases it gets only a small part of the 80 per cent.

Mr. SMOOT. There are three States, I will say to the Senator, that do not get anything.

Mr. FLETCHER. I ask that paragraph (b) be first voted on.

Mr. REED of Missouri. Mr. President, before the vote is taken I wish to understand clearly if I can the effect of this amendment. I have tried to gather its effect from the colloquy. It seems that the present law provides that where a State levies an inheritance or an estate tax of its own, 80 per cent of the Federal tax is returned to that State, and where a State does not levy an inheritance tax the entire 100 per cent collected by the Federal Government goes to the Federal Treasury. Are those two statements accurate?

Mr. WALSH of Montana. I do not so understand the existing law. There is not anything of that kind in it. The Government does not collect 100 per cent and return 80 per cent to the State at all. The language of the act is:

> (b) The tax imposed by this section shall be credited with the amount of any estate, inheritance, legacy, or succession taxes actually paid to any State or Territory or the District of Columbia, in respect of any property included in the gross estate. The credit allowed by this subdivision shall not exceed 80 per cent of the tax imposed by this section.

That is to say, here is an estate which has paid the State inheritance or legacy tax, and it is required to pay a certain amount to the Federal Government under the Federal inheritance tax law, but from that amount is to be deducted all that is paid to the State for the similar tax, not, however, in excess of 80 per cent of the tax due to the Federal Government.

Mr. REED of Missouri. So that if the State tax amounted to only 60 per cent of the Federal tax, the credit would be only 60 per cent?

Mr. WALSH of Montana. Sixty per cent.

Mr. REED of Missouri. And 40 per cent would go into the Treasury?

Mr. WALSH of Montana. That is correct.

Mr. REED of Missouri. But if the State tax is equal to the Federal tax, or is equal to 80 per cent of it, then the State gets the 80 per cent? Is that correct?

Mr. WALSH of Montana. The State gets all of the tax that it imposes.

Mr. REED of Missouri. Yes.

Mr. WALSH of Montana. When the estate comes to pay the Federal tax, it gets credit for all the amount it paid to the State for its tax; but if it paid more to the State than 80 per cent of the Federal tax, it gets credit only for 80 per cent of the Federal tax, and must pay 20 per cent.

Mr. REED of Missouri. And that leaves it to pay 20 per cent?

Mr. WALSH of Montana. Exactly.

Mr. REED of Missouri. So that the effect of this amendment would seem to be, first, that as to the three or four States that levy no estate tax the entire Federal tax would be collected by the Federal Government, and by it retained. If a State levied a 50 per cent tax, then there would be deducted from the Federal tax 80 per cent of the 50 per cent?

Mr. SMOOT. No; Mr. President.

Mr. WALSH of Montana. The whole 50 per cent.

Mr. REED of Missouri. I should say the whole 50 per cent; but the Government would collect the other 50 per cent. It is only when a State collects an amount equal to the Federal tax that it is remitted the 80 per cent?

Mr. SMOOT. The credit is allowed.

Mr. REED of Missouri. The credit is allowed for the 80 per cent; that is what I mean by "remitted." If that is the case, this bill does not preserve the status quo as to the Federal tax.

Mr. JOHNSON. May I ask the Senator whether this amendment eliminates the drawback provision?

Mr. FLETCHER. Section (b) of it eliminates the credit provision of the present act.

Mr. JOHNSON. All right. You eliminate that and you eliminate your inheritance taxes absolutely.

Mr. FLETCHER. No; that does not follow necessarily. You eliminate this discrimination and eliminate the credit provision. After that, if you decide to do that, you vote on the question of rates. You can vote that down if you like, in which case the rates will remain where they are to-day under the present law, and all you will accomplish will be to eliminate the credit.

Mr. JOHNSON. You eliminate the protection that the United States Government gives now, with its 80 per cent drawback, and leave the States to their own selfish purposes, and leave those States battling among themselves as to what they will do with ill and decrepit multimillionaires, and ultimately you will have no inheritance tax at all.

Mr. FLETCHER. It is entirely up to the States to decide what tax they want. This amendment simply says that the Federal Government will not credit the amounts paid to the States on the estate tax imposed by the Federal Government, but will levy the taxes herein named. If you do not agree with these rates, then you stand on the rates as they exist under the present law.

Mr. REED of Missouri. But the taxes herein named will not bring to the Federal Government the same revenue which it now collects.

Mr. FLETCHER. They will not for the present; but, assuming that the State taxes amount to 80 per cent of the Federal tax, this will bring the revenue up to the 20 per cent.

Mr. REED of Missouri. But that assumption is a false assumption, is it not?

Mr. FLETCHER. At present there are some 16 States since the act of 1926 was passed which have made their laws so that they now levy inheritance taxes amounting to 80 per cent of the Federal tax.

Mr. REED of Missouri. My question is just a little different from that. This law would pay to the Federal Government exactly what it now receives, provided all of the States had a tax equal to 80 per cent?

Mr. FLETCHER. Yes.

Mr. REED of Missouri. But all of the States do not have such laws, three of them having no Federal tax at all, and there being many others which do not have a sufficiently high tax to get the full benefit of the provision; so that this law will bring less revenue to the Federal Government than it now gets when applied to the States that levy taxes, even excluding the three that have no tax. That is the case, is it not?

Mr. BINGHAM. Yes, Mr. President. This bill will bring to the Federal Government, in the next two or three years to come, if it should remain a law, less revenue than it would otherwise receive; but those who invented this particular tax with a drawback hope to make all the States levy those estate taxes which they believe are right; and when all the States have fallen in line with the efforts being made through this club of the 80 per cent rebate, then the amount received by the Federal Government will be exactly the same as it would under this amendment.

Mr. REED of Missouri. I understand it.

Mr. BORAH. Mr. President, in view of the fact that section (b) is going to be offered separately, I withdraw the request for a division of it.

The VICE PRESIDENT. The Senator from Idaho withdraws his request.

Mr. SMOOT. Mr. President, I certainly hope the amendment will not be agreed to. If you adopt this amendment, you might just as well say that every multimillionaire or millionaire can go down to Florida or some other State and not pay any tax at all.

Mr. JOHNSON. That is just what I have been trying to say here.

Mr. SMOOT. I agree with the Senator about it.

Mr. JOHNSON. There is not any doubt at all about it.

Mr. SIMMONS. Mr. President, I do not think there is any probability of the amendment being agreed to; and I think we might just as well have a vote and dispose of it.

The VICE PRESIDENT. The question is on the amendment of the Senator from Connecticut [Mr. BINGHAM]. [Putting the question.] By the sound the noes seem to have it.

Mr. FLETCHER. I call for the yeas and nays. Can we not have the yeas and nays on it?

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll; and Mr. ASHURST and Mr. BARKLEY voted in the negative.

Mr. BLACK (when his name was called). Mr. President, before voting, I do not understand whether we are voting on the entire amendment or on section (a).

The VICE PRESIDENT. The vote is being taken on the entire amendment.

Mr. BLACK. Does that include the reduction——

SEVERAL SENATORS. Regular order!

Mr. REED of Missouri. Has there been any answer to the roll call?

The VICE PRESIDENT. There has. The Secretary will continue the calling of the roll.

Mr. BINGHAM (when his name was called). On this bill I have a general pair with the junior Senator from Wyoming [Mr. KENDRICK]. As he is not here, I will withhold my vote.

Mr. BRUCE (when his name was called). Is it permissible for me to ask what we are voting on?

The VICE PRESIDENT. On the amendment offered by the Senator from Connecticut.

Mr. BRUCE. I vote "nay."

Mr. CURTIS (when his name was called). I transfer my pair with the Senator from Arkansas [Mr. ROBINSON] to the Senator from Washington [Mr. JONES] and will vote. I vote "nay."

Mr. HARRISON (when his name was called). Making the same announcement as before, I withhold my vote.

Mr. MCNARY (when his name was called). Making the same announcement as before of my pair with the Senator from Delaware [Mr. BAYARD], I desire to state that if he were present he would vote "yea," and if I were at liberty to vote I should vote "nay." I withhold my vote.

Mr. SWANSON (when his name was called). Making the same announcement I made before, I vote "nay."

Mr. WATSON (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. LA FOLLETTE. Making the same announcement as before concerning the absence of the junior Senator from Montana [Mr. WHEELER] and his general pair, I desire to announce that if present and at liberty to vote he would vote "nay" on this amendment.

Mr. MCKELLAR (after having voted in the affirmative.) May I inquire if the senior Senator from Ohio [Mr. FESS] has voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. MCKELLAR. I have a pair with that Senator, and therefore am compelled to withdraw by vote.

Mr. RANSDELL. I have a pair with the junior Senator from Maine [Mr. GOULD], and withhold my vote.

Mr. DILL. My colleague [Mr. JONES] is absent on account of illness. If he were present, he would vote "nay."

Mr. NYE. Making the same announcement as on the previous question as to my colleague [Mr. FRAZIER], paired as he is with the junior Senator from Florida [Mr. TRAMMELL], were my colleague present he would vote "nay."

Mr. CURTIS. I have been requested to announce the following special pairs on this question:

The Senator from Delaware [Mr. DU PONT] with the Senator from Idaho [Mr. GOODING];

The Senator from New Jersey [Mr. EDWARDS] with the Senator from New Hampshire [Mr. KEYES];

The Senator from New Jersey [Mr. EDGE] with the Senator from South Carolina [Mr. BLEASE]; and

The Senator from New York [Mr. COPELAND] with the Senator from Montana [Mr. WHEELER].

If present, Senators EDWARDS, DU PONT, EDGE, and COPELAND would vote "yea," and Senators GOODING, KEYES, BLEASE, and WHEELER would vote "nay."

The result was announced—yeas 17, nays 52, as follows:

YEAS—17

Black	Hale	Moses	Warren
Broussard	Hawes	Overman	Waterman
Fletcher	Heflin	Reed, Mo.	
George	McLean	Reed, Pa.	
Goff	Metcalf	Tydings	

NAYS—52

Ashurst	Dill	Mayfield	Shipstead
Barkley	Gerry	Neely	Simmons
Blaine	Gillett	Norbeck	Smoot
Borah	Glass	Norris	Steck
Bratton	Greene	Nye	Stephens
Brookhart	Harris	Oddie	Swanson
Bruce	Hayden	Phipps	Thomas
Capper	Howell	Pine	Tyson
Couzens	Johnson	Pittman	Vandenberg
Curtis	King	Robinson, Ind.	Wagner
Cutting	La Follette	Sackett	Walsh, Mass.
Dale	Locher	Schall	Walsh, Mont.
Deneen	McMaster	Sheppard	Watson

NOT VOTING—25

Bayard	Edwards	Kendrick	Smith
Bingham	Fess	Keyes	Stelwer
Blease	Frazier	McKellar	Trammell
Caraway	Gooding	McNary	Wheeler
Copeland	Gould	Ransdell	
du Pont	Harrison	Robinson, Ark.	
Edge	Jones	Shortridge.	

So Mr. BINGHAM's amendment was rejected.

Mr. REED of Pennsylvania. I send to the desk the following amendment.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. On page 194, after line 26, insert a new section, as follows:

SEC. 405. Section 301 (b) of the revenue act of 1926 (crediting the Federal estate tax with the amount of the State inheritance taxes up to 80 per cent of the Federal tax) shall not apply in the case of the transfer of the net estate of any decedent dying after the enactment of this act.

Mr. JOHNSON. Mr. President, a point of order. Has not that just been passed upon?

Mr. SMOOT. It has been passed upon; but another vote is desired on it, and I have no objection.

Mr. JOHNSON. Why another vote? If it is the same thing we have just voted upon, then I make the point of order that it is not in order.

Mr. REED of Pennsylvania. Mr. President, this same language was contained in the amendment last voted upon in connection with the proposal to reduce the rates. I now offer it independently, and by itself. It seems to me it is an entirely different question.

The VICE PRESIDENT. The Chair overrules the point of order.

Mr. GEORGE. Mr. President, I have just been compelled to cast a vote that did not represent my views at all. I was unavoidably called out, and the Chair ruled, as I understood him, that a separate vote would be taken upon the amendment offered by the Senator from Connecticut.

The VICE PRESIDENT. The Senator from Idaho withdrew his request for a separate vote.

Mr. GEORGE. When I returned, I understood that had occurred, but the vote was then in progress. So I voted "yea." I do not favor the reduction of the rates on estates or inheritances. I voted "yea" on the first amendment offered—that is, to repeal the inheritance tax—because the provision imposing it contains the 80 per cent provision, and I voted for the amendment offered by the Senator from Connecticut. I felt that I wished to express myself on the 80 per cent provision, although I did not wish to reduce the rates in the present law.

I wish to make this statement: I am in favor of an inheritance tax. I believe that an inheritance tax ought to be imposed. I have no objection to the imposition of an inheritance tax by the Federal Government. I have never voted for the repeal of an inheritance tax on the ground that the inheritance, or legacy, as you may wish to call it, was not a proper subject of taxation by the Federal Government, if the General Government required the revenue, but I am opposed to the 80 per cent provision, and this amendment enables me to vote according to my convictions.

The Senator from California with commendable frankness has said that if you remove this provision the States will ex-

press their real convictions in this body through their representatives; he has frankly said, "If you take away the 80 per cent provision, you will repeal the Federal inheritance tax."

I would not vote to repeal the Federal inheritance tax, but I can not vote to impose a Federal inheritance tax with the credit of 80 per cent to the States, when confessedly it is the purpose by that kind of legislation to coerce the States into doing something which the States do not wish to do.

Take away the 80 per cent, it is said, and the States will not impose the tax, because very great fortunes will be able to find a refuge in some State. My answer is this, that it is not our concern what the States shall or shall not do with reference to their tax problems and with reference to their tax policies. Our duty is to legislate for the Federal Government. I, therefore, believe in the inheritance tax, and I believe that the inheritance tax should be imposed by the Federal Government, but I believe that the money raised should be kept by the Federal Government and used by the Federal Government. For that reason I shall vote to strike the 80 per cent provision. My vote just cast, in the light of the explanation made, is consistent, I trust. I wish the inheritance tax to remain, but I wish the entire amount of that levy to go into the Federal Treasury so long as the Congress finds it necessary to impose the tax. I do not regard it my duty through national legislation to undertake to shape the policies of the several States.

Mr. BRUCE. Mr. President, as I see it, the argument of the Senator from Georgia makes no allowance whatever for States which have for years had an inheritance tax. Such a State is the State of Maryland. I have had no opportunity to refresh my memory upon this subject; but if I am not mistaken, the State of Maryland has had an inheritance tax, certainly a collateral inheritance tax, for generations. Since the enactment of the recent Federal income tax legislation it has made no change at all in the policy of its laws as respects inheritance taxes. In other words, to borrow a phrase from the Senator from Georgia, it has not succumbed to any depraving solicitation of any kind that this 80 per cent deduction holds out to the States, as he imagines.

I was perfectly willing to do away with the Federal estate tax. I think it is a great mistake for the Federal Government to impose such a tax except at an hour of dire necessity, such as was created by the World War. I think the estates of decedents supply a natural field of taxation for the States. The Federal Government has its special field of customs taxation and its special field of income taxation; it has peculiar sources of revenue that are entirely adequate to all of its requirements. Why, then, not leave to the States, what could be more properly left to the States, than the field of estate taxation?

I voted, as I have said, to bring the present system of Federal estate taxation to an end in toto. That proposition was defeated; but that having been defeated, why should not I, as a representative of a State where there has been an inheritance tax for many years, vote to continue this 80 per cent deduction so that we shall have something to soften the impact of the Federal estate tax?

The argument of the Senator from Georgia, it seems to me, turns entirely upon the assumption on his part that the inevitable operation of this 80 per cent is to hold out, I will not say a corrupt, but at least a perverting temptation to the State.

I do not know, but I imagine that there are other States of the Union in the same situation as the State of Maryland, which have had systems of estate taxation for years, either in the form of collateral inheritance taxation alone, or in the form of both direct and collateral inheritance taxation. Why should not they have the benefit of the 80 per cent deduction?

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from North Carolina?

Mr. BRUCE. I yield.

Mr. SIMMONS. I want to ask the Senator from Maryland if this is not true: If we should now repeal this 80 per cent tax, and continue the present Federal income tax law, if a State levied any tax at all upon inheritances or estates, would they not have to pay a double tax?

Mr. BRUCE. But they would get a deduction of 80 per cent from the Federal taxes they paid.

Mr. SIMMONS. The Senator does not understand me. I say, if we should repeal this provision allowing this 80 per cent benefit to the States, would not the effect be that the Federal tax now imposed would all be collected and go into the Federal Treasury?

Mr. BRUCE. Yes.

Mr. SIMMONS. Then if the State levied any tax at all upon inheritances, or upon estates, whichever principle they adopted, any tax at all, they would be collecting out of the people two income taxes, one for the State and one for the Federal Government, and the State would get the benefit of no credit whatever.

Mr. BRUCE. That kind of duplication sometimes occurs. I think they have an income tax in Virginia.

Mr. GLASS. Virginia has an income tax, and it has an inheritance tax.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Pennsylvania.

Mr. SMOOT. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. BINGHAM (when his name was called). I have a general pair on this bill with the junior Senator from Montana [Mr. WHEELER]. In his absence I withhold my vote.

Mr. CURTIS (when his name was called). Making the same announcement as to my pair and transfer as on the previous vote, I vote "nay."

Mr. HARRISON (when his name was called). Making the same announcement as before, I withhold my vote.

Mr. RANSDELL (when his name was called). I again announce my pair with the junior Senator from Maine [Mr. GOULD] and ask that this announcement stand for the day. In his absence I withhold my vote.

Mr. SWANSON (when his name was called). Making the same announcement that I did on the last vote, I vote "nay."

Mr. WATSON (when his name was called). Making the same announcement with reference to my pair and transfer as before, I vote "nay."

Mr. LA FOLLETTE (when Mr. WHEELER's name was called). Making the same announcement as before with reference to the absence of the junior Senator from Montana [Mr. WHEELER] and his pair, I desire to announce that if present and at liberty to vote he would vote "nay" on this amendment.

The roll call was concluded.

Mr. WATSON (after having voted in the negative). The Senator from Oregon [Mr. STEIWER], to whom I transferred my pair, has entered the Chamber. I therefore withdraw that transfer, and inasmuch as I can not secure another transfer I withdraw my vote.

Mr. McKELLAR. Again announcing my pair with the Senator from Ohio [Mr. FESS] and noting his absence from the Chamber, I withhold my vote.

Mr. NYE. I desire again to announce that my colleague the senior Senator from North Dakota [Mr. FRAZIER] is paired with the junior Senator from Florida [Mr. TRAMMELL]. If the senior Senator from North Dakota were present, he would vote "nay."

Mr. CURTIS. I desire to announce the following special pairs on this question:

The Senator from Delaware [Mr. DU PONT] with the Senator from Idaho [Mr. GOODING];

The Senator from New Hampshire [Mr. KEYES] with the junior Senator from New Jersey [Mr. EDWARDS];

The senior Senator from New Jersey [Mr. EDGE] with the Senator from South Carolina [Mr. BLEASE];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from Florida [Mr. TRAMMELL]; and

The Senator from New York [Mr. COPELAND] with the Senator from Montana [Mr. WHEELER].

The result was announced—yeas 18, nays 51, as follows:

YEAS—18

Black	Fletcher	Metcalf	Stephens
Borah	George	Overman	Tydings
Brookhart	Goff	Pittman	Warren
Broussard	Hawes	Reed, Mo.	
Couzens	Heflin	Reed, Pa.	

NAYS—51

Ashurst	Glass	Mayfield	Simmons
Barkley	Greene	Moses	Smoot
Blaine	Hale	Neely	Steck
Bratton	Harris	Norbeck	Steiwer
Bruce	Hayden	Norris	Swanson
Capper	Howell	Nye	Thomas
Curtis	Johnson	Oddie	Tyson
Cutting	King	Phipps	Vandenberg
Dale	La Follette	Pine	Wagner
Deneen	Locher	Sackett	Walsh, Mass.
Dill	McLean	Schall	Walsh, Mont.
Gerry	McMaster	Sheppard	Waterman
Gillett	McNary	Shipstead	

NOT VOTING—25

Bayard	Edwards	Kendrick	Smith
Bingham	Fess	Keyes	Trammell
Blease	Frazier	McKellar	Watson
Caraway	Gooding	Ransdell	Wheeler
Copeland	Gould	Robinson, Ark.	
du Pont	Harrison	Robinson, Ind.	
Edge	Jones	Shortridge	

So the amendment of Mr. REED of Pennsylvania was rejected.

Mr. REED of Missouri. Mr. President, I offer the following amendment, and ask that it may be reported.

The VICE PRESIDENT. The amendment will be reported.

The CHIEF CLERK. On page 94, after line 7, insert a new subdivision, as follows:

(e) Bridges to be acquired by State or political subdivision: Whenever any State or political subdivision thereof, in pursuance of a contract to which it is not a party entered into before the enactment of this act, is to acquire a bridge—

(1) If by the terms of such contract the tax imposed by this title is to be paid out of the proceeds from the operation of such bridge prior to any division of such proceeds, and if, but for the imposition of the tax imposed by this title, a part of such proceeds for the taxable year would accrue directly to or for the use of or would be applied for the benefit of such State or political subdivision, then a tax upon the net income from the operation of such bridge shall be levied, assessed, collected, and paid in the manner and at the rates prescribed in this title, but there shall be refunded to such State or political subdivision (under rules and regulations to be prescribed by the commissioner, with the approval of the Secretary) an amount which bears the same relation to the amount of the tax as the amount which, but for the imposition of the tax imposed by this title, would have accrued directly to or for the use of or would be applied for the benefit of such State or political subdivision bears to the amount of the net income from the operation of such bridge for such taxable year. No such refund shall be made unless the entire amount of the refund is to be applied in part payment for the acquisition of such bridge.

(2) If by the terms of such contract no part of the proceeds from the operation of the bridge for the taxable year would, irrespective of the tax imposed by this title, accrue directly to or for the use of or be applied for the benefit of such State or political subdivision, then the tax upon the net income from the operation of such bridge shall be levied, assessed, collected, and paid in the manner and at the rates prescribed in this title.

Mr. SMOOT. Mr. President, so far as I can I am perfectly willing to accept the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri.

The amendment was agreed to.

Mr. SHIPSTEAD. Mr. President, I offer the amendment, which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 245, after line 16, insert the following:

SEC. 801. AMENDMENTS TO TARIFF ACT OF 1922.

(a) Paragraphs 4, 19, 53, 54, 55, 57, 58, 502, 701, 702, 703, 706, 707, 708, 709, 710, 711, 712, 713, 723, 724, 729, 737, 757, 760, 761, 763, 768, 769, 770, and 777 of the tariff act of 1922 are amended, respectively, as follows:

Strike out all of paragraph 4, and substitute in lieu thereof the following:

"PAR. 4. Alcohol: Amyl, butyl, propyl, and fusel oil, 6 cents per pound; methyl or wood (or menthanol), 12 cents per gallon; and ethyl for nonbeverage purposes only, 25 cents per gallon."

Strike out all of paragraph 19, and substitute in lieu thereof the following:

"PAR. 19. Casein or lactarene, 6 cents per pound, but not less than 50 per cent ad valorem."

Strike out all of paragraph 53, and substitute in lieu thereof the following:

"PAR. 53. Oils, animal: Sod, herring, and menhaden, whale and seal, 23 cents per gallon, but not less than 45 per cent ad valorem; sperm, 10 cents per gallon, and all fish oils, not specially provided for, 30 per cent ad valorem; wool grease, crude, including that known commercially as degras or brown wool grease, one-half of 1 cent per pound; wool grease, not crude, including adeps lanae, hydrous, and anhydrous, 1 cent per pound; all other animal oils, fats, and greases, not specially provided for, 30 per cent ad valorem."

Strike out all of paragraph 54, and substitute in lieu thereof the following:

"PAR. 54. Oils, expressed or extracted: Castor oil, 3 cents per pound; hempseed oil, tung-nut oil, palm oil, sesame-seed oil, rapeseed oil, perilla oil, 2 cents per pound; linseed or flaxseed oil, raw, boiled, or oxidized, 4 cents per pound; olive oil, weighing with immediate container less than 40 pounds, 7½ cents per pound on contents and container; olive oil, not specially provided for, 6½ cents per pound; poppy-seed oil, raw, boiled, or oxidized, 2 cents per pound: *Provided*, That in the foregoing in no case shall the duty be less than 45 per cent ad valorem; all other expressed and extracted oils not specially provided for, 45 per cent ad valorem."

Strike out all of paragraph 55, and substitute in lieu thereof the following:

"PAR. 55. Coconut oil, palm-nut oil, peanut oil, 4 cents per pound, but not less than 45 per cent ad valorem; cottonseed oil and soya-bean oil, 3 cents per pound, but not less than 45 per cent ad valorem."

Strike out all of paragraph 57 and substitute in lieu thereof the following:

"PAR. 57. Hydrogenated or hardened oils and fats, 5 cents per pound, but not less than 45 per cent ad valorem; other oils and fats, the composition and properties of which have been changed by vulcanizing, oxidizing, chlorinating, nitrating, or any other chemical process, and not specially provided for, 20 per cent ad valorem."

Strike out all of paragraph 58 and substitute in lieu thereof the following:

"PAR. 58. Combinations and mixtures of animal, vegetable, or mineral oils, or of any of them (except combinations or mixtures containing essential or distilled oils), with or without other substances, and not specially provided for, 45 per cent ad valorem: *Provided*, That no article containing alcohol shall be classified for duty under this paragraph."

SCHEDULE 5. SUGAR, MOLASSES, AND MANUFACTURES OF.

Strike out all of paragraph 502 and substitute in lieu thereof the following:

"PAR. 502. Molasses and sugar sirups, not specially provided for, testing not above 48 per cent total sugars, 0.25 of 1 cent per gallon; testing above 48 per cent total sugars, 0.275 of 1 cent additional for each per cent of total sugars and fractions of a per cent in proportion; molasses testing not above 52 per cent total sugars not imported to be commercially used for the extraction of sugar or for human consumption, one-sixth of 1 cent per gallon; testing above 52 and not above 56 per cent total sugars not imported to be commercially used for the extraction of sugar or for human consumption, one-sixth of 1 cent additional for each per cent of total sugars and fractions of a per cent in proportion; molasses testing not above 52 per cent total sugars, imported for or to be used in the manufacture of ethyl alcohol for nonbeverage purposes only, 10 cents per gallon; testing above 52 per cent and not above 56 per cent total sugars, imported for or to be used in the manufacture of ethyl alcohol for nonbeverage purposes only, 1 cent additional for each per cent of total sugars and fractions of a per cent in proportion."

SCHEDULE 7. AGRICULTURAL PRODUCTS AND PROVISIONS.

Strike out all of paragraph 701, and substitute in lieu thereof the following:

"PAR. 701. Cattle weighing less than 1,050 pounds each, 1½ cents per pound; weighing 1,050 pounds each or more, 2 cents per pound; fresh beef and veal, 8 cents per pound; tallow, oleo oil, and oleo stearin, 1 cent per pound, but not less than 30 per cent ad valorem; hides of cattle, raw or uncured, or dried, salted, or pickled, and all other hides not specially provided for, 25 per cent ad valorem."

Strike out all of paragraph 702, and substitute in lieu thereof the following:

"PAR. 702. Sheep and goats, $2 per head; fresh mutton and goat meat, 5 cents per pound; fresh lamb, 8 cents per pound."

Strike out all of paragraph 703, and substitute in lieu thereof the following:

"PAR. 703. Swine, one-half of 1 cent per pound; bacon, hams, and shoulders, and other pork, prepared or preserved, 5 cents per pound; fresh pork, 3 cents per pound; lard, lard compounds, and lard substitutes, 5 cents per pound, but not less than 45 per cent ad valorem."

Strike out all of paragraph 706, and substitute in lieu thereof the following:

"PAR. 706. Meats, fresh, prepared, or preserved, not specially provided for, 30 per cent ad valorem: *Provided*, That no meat of any kind shall be imported into the United States unless the same is healthful, wholesome, and fit for human food and contains no dye, chemical, preservative, or ingredient which renders the same unhealthful, unwholesome, or unfit for human food, and unless the same also complies with the rules and regulations made by the Secretary of Agriculture, and that, after entry into the United States in compliance with said rules and regulations, said meats shall be deemed and treated as domestic meats within the meaning of, and shall be subject to, the provisions of the act of June 30, 1906 (34 Stat. L. 674), commonly called the 'meat inspection amendment,' and the act of June 30, 1906 (34 Stat. L. 768), commonly called the 'food and drugs act,' and that the Secretary of Agriculture be, and hereby is, authorized to make rules and regulations to carry out the purposes of this provision, and that in such rules and regulations the Secretary of Agriculture may prescribe the terms and conditions for the destruction of all such meats offered for entry and refused admission into the United States unless the same be exported by the consignee within the time fixed therefor in such rules and regulations."

Strike out all of paragraph 707 and substitute in lieu thereof the following:

"PAR. 707. Milk, fresh, 4 cents per gallon, sour milk and buttermilk, 4 cents per gallon; cream, 40 cents per gallon: *Provided*, That fresh or sour milk containing more that 7 per cent of butterfat shall be dutiable as cream, and cream containing more than 45 per cent of butterfat shall be dutiable as butter."

Strike out all of paragraph 708 and substitute in lieu thereof the following:

"PAR. 708. Milk, condensed or evaporated: In hermetically sealed containers, unsweetened, 1½ cents per pound; sweetened, 2 cents per pound; all other, 2 cents per pound; whole milk powder, 7½ cents per pound, but not less than 40 per cent ad valorem; cream powder, 18 cents per pound; and skimmed milk powder, 3 cents per pound; malted milk, and compounds or mixtures of or substitutes for milk or cream, 40 per cent ad valorem."

Strike out all of paragraph 709 and substitute in lieu thereof the following:

"PAR. 709. Butter, 12 cents per pound, but not less than 30 per cent ad valorem; oleomargarine and other butter substitutes, 12 cents per pound, but not less than 30 per cent ad valorem."

Strike out all of paragraph 710 and substitute in lieu thereof the following:

"PAR. 710. Cheese and substitutes therefor, 8 cents per pound, but not less than 40 per cent ad valorem."

Strike out all of paragraph 711 and substitute in lieu thereof the following:

"PAR. 711. Birds, live: Poultry, including geese, ducks, turkeys, chickens, guinea fowl, water fowl, and game birds, fowl not otherwise specially provided for, when imported for food purposes, 10 cents per pound; all other, $2 each."

Strike out all of paragraph 712 and substitute in lieu thereof the following:

"PAR. 712. Birds, dead: Poultry, dressed or not dressed, drawn or not drawn, including turkeys, chickens, guinea fowl, geese, ducks, and every variety of water fowl or game birds, and all others not specially provided for, 14 cents per pound; all the foregoing prepared or preserved in any manner, and not specially provided for, 45 per cent ad valorem."

Strike out all of paragraph 713 and substitute in lieu thereof the following:

"PAR. 713. Eggs of poultry, in the shell, 12 cents per dozen; whole eggs, egg yolk, and egg albumen, frozen or in liquid form, with or without artificial preservative, 15 cents per pound; all dehydrated egg products, including dried whole eggs, dried egg yolk, and dried egg albumen, dehydrated by any process and designated by any trade name, and all eggs or egg products otherwise prepared or preserved and not specially provided for, 45 cents per pound."

Strike out all of paragraph 723 and substitute in lieu thereof the following:

"PAR. 723. Buckwheat hulled or unhulled, 40 cents per 100 pounds; buckwheat flour and grits or groats, one-half of 1 cent per pound."

Strike out all of paragraph 724 and substitute in lieu thereof the following:

"PAR. 724. Corn or maize, including cracked corn, 30 cents per bushel of 56 pounds; corn grits, meal, and flour, and similar products, 50 cents per 100 pounds."

Strike out all of paragraph 729 and substitute in lieu thereof the following:

"PAR. 729. Wheat, 42 cents per bushel of 60 pounds; wheat flour, semolina, crushed or cracked wheat, and similar wheat products not specially provided for, $1.04 per 100 pounds."

Strike out all of paragraph 757 and substitute in lieu thereof the following:

"PAR. 757. Peanuts, not shelled, 6 cents per pound; shelled, 8 cents per pound; blanched peanuts, 9 cents per pound."

Strike out all of paragraph 760 and substitute in lieu thereof the following:

"PAR. 760. Oil-bearing seeds and materials: Castor beans, one-half of 1 cent per pound; flaxseed, 75 cents per bushel of 56 pounds; poppy seed, 32 cents per 100 pounds; sunflower seed, 2 cents per pound; apricot and peach kernels, 3 cents per pound; copra and palm-nut kernels, 3 cents per pound, but not less than 40 per cent ad valorem; soya beans, cottonseed, hempseed, palm nuts, tung nuts, rapeseed, perilla and sesame seed, and other oil-bearing seeds and nuts not specially provided for, one-half of 1 cent per pound, but not less than 40 per centum ad valorem."

Strike out all of paragraph 761 and substitute in lieu thereof the following:

"PAR. 761. Grass seeds: Alfalfa, 8 cents per pound; alsike clover, 8 cents per pound; crimson clover, 3 cents per pound; red clover, 8 cents per pound; white clover, 8 cents per pound; clover, not specially provided for, 6 cents per pound; millet, 1 cent per pound; timothy, 2 cents per pound; hairy vetch, 2 cents per pound; spring vetch, 1 cent per pound; all other grass seeds not specially provided for, 2 cents per pound: *Provided*, That no allowance shall be made for dirt or other impurities in seed provided for in this paragraph."

Strike out all of paragraph 763 and substitute in lieu thereof the following:

"PAR. 763. Beans, not specially provided for, green or unripe, one-half of 1 cent per pound; dried, 2 cents per pound, but not less than 35 per cent ad valorem; in brine, prepared or preserved in any manner, 2 cents per pound, but not less than 35 per cent ad valorem."

Strike out all of paragraph 768 and substitute in lieu thereof the following:

"PAR. 768. Onions, 3 cents per pound; garlic, 2 cents per pound."

Strike out all of paragraph 769 and substitute in lieu thereof the following:

"PAR. 769. White or Irish potatoes, 75 cents per 100 pounds; dried, dehydrated, or desiccated potatoes, 3½ cents per pound; potato flour, 3 cents per pound."

Strike out all of paragraph 770 and substitute in lieu thereof the following:

"PAR. 770. Tomatoes in their natural state, 1 cent per pound; tomato paste, 40 per cent ad valorem; all other, prepared or preserved in any manner, 40 per cent ad valorem."

Strike out all of paragraph 777 and substitute in lieu thereof the following:

"PAR. 777. Hay, $6 per ton; straw, $1 per ton."

(b) Strike out all of paragraphs 1589, 1626, and in paragraph 1632 strike out the words "palm," "palm kernel," "perilla," and "sesame."

"PAR. 781. Cotton having a staple of less than 1⅛ inches, 4 cents per pound; of 1⅛ inches, 6 cents per pound; of 1⅜ inches, 7 cents per pound; of 1⅜ inches, 8 cents per pound; of 1⅜ inches, 9 cents per pound; of 1¼ inches, 10 cents per pound; of 1⅜ inches, 12 cents per pound; of 1⅜ inches, 14 cents per pound; of 1½ inches and longer, 15 cents per pound: *Provided*, That all cotton shall be graded according to the official cotton standards of the United States."

At the end of paragraph 729 insert a new paragraph, as follows:

"PAR. 737. Cherries in the natural state, sulphured or in brine, 4 cents per pound; maraschino cherries and cherries prepared and preserved in any manner, 50 per cent ad valorem."

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Minnesota [Mr. SHIPSTEAD].

Mr. SHIPSTEAD addressed the Senate. After having spoken for some time—

Mr. SMOOT. Mr. President, I would like now to offer a unanimous-consent agreement.

Mr. SHIPSTEAD. I yield for that purpose.

Mr. SMOOT. I offer the unanimous-consent agreement which I send to the desk.

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). The clerk will read the proposed agreement.

The Chief Clerk read as follows:

Ordered (by unanimous consent), That when the Senate concludes its business to-night it take a recess until 11 o'clock a. m. on Monday next; that after the hour of 1 o'clock p. m. on said day no Senator shall speak more than once nor longer than 10 minutes upon the pending bill (H. R. 1), the tax reduction bill, nor more than once nor longer than 15 minutes upon any amendment proposed thereto, and that the Senate remain in session until the said bill is finally disposed of.

The PRESIDING OFFICER. Is there objection to the agreement?

Mr. REED of Missouri. Just one moment.

Mr. ROBINSON of Arkansas. Mr. President, there was this tentative understanding between some of us who discussed this matter, that at the conclusion of the address of the Senator from Minnesota [Mr. SHIPSTEAD], who now has the floor, the Senator from Missouri [Mr. REED], if he desired, should take the floor, and thereupon the Senate would take the recess contemplated by the unanimous-consent agreement; the Senate would meet Monday at 11 o'clock, and after the hour of 1 o'clock the limitation on debate would go into effect, with 15 minutes for each Senator on the bill and 10 minutes on any amendment, the idea being that the limitation on debate would work a conclusion of the debate some time next Monday, before the expiration of the calendar day, in all probability.

Mr. HEFLIN. Mr. President, I take it that the Senator from Missouri would not want to go on to-night?

Mr. ROBINSON of Arkansas. No; he does not intend to go on to-night.

Mr. HEFLIN. He could have between 11 o'clock and 1 o'clock Monday.

Mr. ROBINSON of Arkansas. That is the idea. The thought was that he desired to make sure that he would have ample time for discussion Monday.

Mr. REED of Missouri. Mr. President, let me state that a little differently. My thought was that on the amendment which I propose to urge there should be a period of debate which would not be limited by the 15-minute limitation rule, but that period would expire at 1 o'clock, and then the limitation would apply. In other words, I think the amendment is important enough so that it ought not to be brought at once within the 15-minute rule. So far as I am concerned, I shall try to consume as small a portion of that time as I can and present my views.

Mr. SMOOT. Mr. President, I would like also to have it understood that the Senator from Minnesota will conclude his

remarks before we take a recess, and then immediately on meeting on Monday that the Senate take a vote upon his pending amendment without any further discussion.

Mr. SWANSON. How much time does the Senator purpose taking Monday to dispose of all these amendments?

Mr. SMOOT. We can dispose of this one amendment——

Mr. SWANSON. When does the Senator expect to get the bill through?

Mr. SMOOT. On Monday, if this unanimous-consent agreement shall be entered into.

Mr. SWANSON. What does the unanimous-consent agreement provide in that respect? I am tired being kept here repeatedly to have a night session and then not have it, breaking up all our engagements, and then, when we have stayed here waiting for a vote, in order to get the bill through, about 6 or 7 o'clock having the Senator surrender.

Mr. SMOOT. I think what we are doing will save time.

Mr. ROBINSON of Arkansas. I am satisfied that if we do not make such an agreement we will ultimately consume the entire evening and come to no conclusion. The unanimous-consent agreement contemplates a limitation on debate to take effect at the hour of 1 o'clock Monday. I am perfectly willing to add to that a provision that the Senate shall remain in session Monday until the bill shall be finally disposed of.

Mr. LA FOLLETTE. Mr. President, I make the point of order that the Senate is in disorder.

The PRESIDING OFFICER. Senators will take their seats.

Mr. LA FOLLETTE. Four different Senators are under the impression that they have the floor and are speaking at the same time.

The PRESIDING OFFICER. The Senator from Minnesota has the floor. To whom does he yield?

Mr. SHIPSTEAD. I refuse to yield any further. If Senators can come to an agreement by which we will adjourn until Monday, and that I shall have the time necessary to discuss my amendment—I shall not be unreasonable—and to have a vote on the amendment Monday, that will be agreeable to me. In the meantime, I shall continue with my remarks.

The PRESIDING OFFICER. Is there objection to the unanimous-consent agreement?

Mr. REED of Missouri. We can not agree unless we understand each other. If the understanding is that to-night I shall be given the floor for the purpose of presenting the amendment, and then have the floor and the right of way with the amendment on Monday morning at 11 o'clock, I am agreeable, but if other business is to be interjected, if, for instance, the Senator's amendment should be pending and should involve discussion, then I would not be willing to make this arrangement.

Mr. SMOOT. The Senator would be willing, however, if it did not involve any further discussion?

Mr. REED of Missouri. Yes.

Mr. SMOOT. And if we would vote upon the amendment of the Senator from Minnesota immediately on meeting Monday?

Mr. REED of Missouri. Yes.

Mr. SMOOT. I thought that was all the Senator was asking.

Mr. LA FOLLETTE. Mr. President, will the Senator from Minnesota yield?

Mr. SHIPSTEAD. I yield.

Mr. LA FOLLETTE. I suggest that the unanimous-consent agreement should be plain and specific. I object to having a unanimous-consent agreement presented and then having it modified by the opinions expressed by a dozen different Senators as to how they interpret it. If we are to have an understanding concerning a limitation on debate, it should be clear and should appear in the unanimous-consent agreement, because it has been my experience that these unanimous-consent agreements, after they are entered into, always result in disappointment and hard feelings on the part of Senators who are shut out when the debate is limited. Therefore, I suggest to the Senator from Utah that he prepare a unanimous-consent agreement which will be clear and specific and present it, and then if it is adopted, there will be no misunderstanding.

Mr. SMOOT. Mr. President, let me read this agreement to the Senate.

Mr. SWANSON. Let the clerk read it.

Mr. SMOOT. Very well; let the clerk read it.

The PRESIDING OFFICER. The clerk will read the proposed agreement.

The Chief Clerk read as follows:

Ordered (by unanimous consent), That when the Senate concludes its business to-night it take a recess until 11 o'clock a. m. on Monday next; that after the hour of 1 o'clock p. m. on said day no Senator shall speak more than once nor longer than 10 minutes upon the pending bill (H. R. 1), the tax reduction bill, nor more than once nor longer than 15 minutes upon any amendment proposed thereto, and that the Senate remain in session until the said bill is finally disposed of.

Mr. WATSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Indiana?

Mr. SHIPSTEAD. I yield.

Mr. WATSON. I would like to ask the Senator from Utah what he contemplates shall be done in the two hours from 11 to 1 o'clock?

Mr. SMOOT. The Senator from Missouri expects to offer his amendment to-night and after the vote is taken on the pending amendment of the Senator from Minnesota, without any further discussion, at 11 o'clock Monday, then the Senator from Missouri would have the floor.

Mr. LA FOLLETTE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Wisconsin?

Mr. SHIPSTEAD. I yield.

Mr. LA FOLLETTE. That is the point I am making. I desire to have that embodied in the agreement, because there are several Senators who have amendments which they consider important and if they discover, after this agreement has been entered into, that some of the rights which they thought they had protected in consenting to the agreement have been yielded, there will be hard feelings and a good deal of acrimonious debate on Monday. I suggest that the specific terms of the agreement be written into the agreement itself and then presented.

Mr. SMOOT. Let me suggest that we make it apply at 2 o'clock on Monday, then.

Mr. McMASTER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from South Dakota?

Mr. SHIPSTEAD. I yield.

Mr. McMASTER. Personally, it is perfectly agreeable to me that the Senator from Missouri should occupy the time from 11 o'clock until 1 o'clock, and I am very glad that he shall occupy the time in discussing his amendment. However, there are two or three amendments pending which those who have introduced consider of equal importance. Therefore, while I am perfectly willing to give the Senator from Missouri that time, I do not feel that it is fair to those who have introduced other amendments to be limited to 15 minutes.

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Missouri?

Mr. SHIPSTEAD. I yield.

Mr. REED of Missouri. I want to set myself right on this matter. I have not been trying to claim any special rights. I was asked if I would consent to the 10-minute rule to apply to Monday morning. I said I would not, that I desired to present the amendment. I was then asked if two hours would be sufficient in which to present it and debate it and, while I disliked to do so, I said I would consent to that arrangement. Thereupon this controversy arose. If other Senators have other amendments which they want to present, they certainly are entitled to stand here and insist upon that right; and I do not claim any rights over them at all.

Mr. McMASTER. How much time would the Senator from Wisconsin [Mr. BLAINE] need for his amendment?

Mr. BLAINE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Wisconsin?

Mr. SHIPSTEAD. I yield to the Senator for the purpose of answering the Senator from South Dakota.

Mr. BLAINE. As I have observed the debate, I find that the interruptions are usually at greater length than debate by the Senator who has the floor. The constant interruptions consume the time and leave the argument unfinished. I would not want to consent to a mere bagatelle of time.

Mr. NEELY. Mr. President, I demand the regular order. If we are going to stay here all night, let the Senator from Minnesota proceed with his speech.

The PRESIDING OFFICER. The regular order is demanded. The Senator from Minnesota has the floor.

Mr. SHIPSTEAD. Before I continue my remarks I will state to the Senator that I was told the intention was to continue until 12 o'clock to-night if necessary, and I made preparations to do that. I am perfectly willing to go home if we can get a unanimous-consent agreement that I shall have the floor on Monday morning and continue my remarks. I shall not take very much time. But I want to discuss the amendment, and I

want to vote on it. Whatever agreement is arrived at is immaterial to me; but I do not want my amendment displaced by any other until we have had a vote upon it.

Mr. WATSON. Mr. President, I suggest that the Senator proceed and conclude his remarks. That is the only sensible way to get along.

Mr. HEFLIN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Alabama?

Mr. SHIPSTEAD. I yield.

Mr. HEFLIN. I wonder if the unanimous-consent request can not now be granted? I think we understand it, in view of the statement just made by the Senator from Minnesota.

The PRESIDING OFFICER. Several Senators objected to the unanimous-consent agreement and the regular order was called for. The Senator from Minnesota has the floor and he will proceed.

Mr. SHIPSTEAD resumed his speech, and after having spoken for some time—

Mr. HEFLIN. Mr. President, I should like to inquire of the Senator from Minnesota and the other Senators who are in charge of this bill if there is not some chance now to get an agreement, so that we can adjourn until Monday? I understand that a good many Senators are not going to be here to-night and we will not have a quorum; and if a point of no quorum is made it will be impossible to obtain it. I submit that it is not fair to Senators who stay here all the time to keep them here when nothing is going to be accomplished by it. If we are going to discuss a question of importance, like that which the Senator from Minnesota is now discussing, we ought to have a full Senate here. We would all feel better and fresher if we should come back here Monday morning and go to work on this matter.

Mr. JOHNSON. Mr. President, I can answer one part of the Senator's question if he will permit me to do so. There is not going to be, immediately, a unanimous-consent agreement. Whether or not there may be later depends upon circumstances.

Mr. DILL. Mr. President, will the Senator yield to me? I want to ask him whether he thinks it is proper, when Senators are notified that we are going to stay here to-night, and break engagements that they otherwise would keep on the theory that they will be kept here, then, at a certain hour when we ordinarily would adjourn to make an agreement and adjourn or recess?

Mr. SMOOT. Mr. President, I want to say that I did intend to ask the Senate to remain here, and I am perfectly willing to do so now. All Senators know that the senior Senator from North Carolina [Mr. SIMMONS] is really a sick man. He wanted to offer an amendment in which he was interested; he wanted a few minutes to speak on it, but he simply said that he had to go home. I tried to get a unanimous-consent agreement on that account. I am perfectly willing to stay here and vote upon the bill, if we can get a vote to-night.

Mr. JOHNSON. All right; let us proceed.

Mr. HEFLIN. Mr. President, the Senator from California is occupying a rather peculiar position here. I know how anxious he is about his bill, but he is accumulating wrath against it when he is threatening the Senate.

Mr. JOHNSON. I am not threatening the Senate in the slightest degree. I am saying that I do not consent at the moment to any unanimous-consent agreement. I threaten nobody, at any time, or under any circumstances. I never have done it, and never will do it; but I do not propose, sir, that any time shall be wasted that may be saved.

I am here under just the same inconvenience that other Senators are here. I have been sitting here since 11 o'clock this morning, and I have pending a measure that ought to have the consideration of the Senate; and that measure is going to have the consideration of the Senate if it be possible for me to have that bill before the Senate. To take another day, when notice was given that we would sit here until this bill should be passed, does not seem to me to be just to the pending legislation, or just to the Members who have stayed here.

Mr. HEFLIN. Mr. President, there is no necessity for adjourning Congress on the 1st of June. We can stay here until July, and transact the business of the people.

Mr. JOHNSON. I agree with the Senator on that. I think we ought to stay here and finish all the important legislation.

Mr. COUZENS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The absence of a quorum is suggested.

Mr. ROBINSON of Arkansas. Mr. President, I inquire if the Senator from Minnesota [Mr. SHIPSTEAD] yielded?

Mr. COUZENS. Yes; the Senator yielded. I asked him if he would yield.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	McMaster	Shipstead
Barkley	Fess	McNary	Shortridge
Bingham	Fletcher	Mayfield	Smoot
Blaine	Gerry	Moses	Steck
Borah	Gillett	Norbeck	Steiwer
Bratton	Glass	Norris	Stephens
Brookhart	Greene	Nye	Swanson
Broussard	Hale	Oddie	Thomas
Bruce	Harrison	Pine	Tydings
Capper	Hawes	Pittman	Vandenberg
Caraway	Hayden	Reed, Mo.	Walsh, Mass.
Couzens	Heflin	Reed, Pa.	Warren
Curtis	Johnson	Robinson, Ark.	Waterman
Cutting	La Follette	Robinson, Ind.	Watson
Deneen	Locher	Schall	
Dill	McKellar	Sheppard	

Mr. LA FOLLETTE. I desire to announce that the junior Senator from Montana [Mr. WHEELER] is absent on account of a death in his family.

The VICE PRESIDENT. Sixty-two Senators having answered to their names, there is a quorum present.

Mr. SHIPSTEAD resumed and concluded his speech, which is entire as follows:

Mr. SHIPSTEAD. Mr. President, I am not going to delay the Senate very long. I hope during the little time that I shall occupy the floor we may have order, though I realize that at this time in the afternoon the Senators are tired and are hungry. I should very much have preferred if my amendment could have been taken up on Monday, but in view of the fact that the chairman of the Finance Committee has intimated that he desired to conclude the consideration of the bill to-night, I feel impelled to offer this amendment now and to submit a few remarks upon it.

Mr. President, I have supported the main features of the revenue bill as proposed by the committee which we have been considering. The bill proposes to reduce the taxes on corporations and incomes of those who have incomes sufficiently large to require them to pay income taxes, but I find nothing in the bill giving relief to that class of people in the United States who during the last half-dozen years have had no incomes sufficiently large to bring them in the category of those who have to pay any kind of an income tax; and yet they are engaged in a business that is recognized as the fundamental business of the Nation, that of producing the Nation's food. I am not going to take up the time of the Senate to go into the harrowing details that have been presented so many times on the Senate floor previously during the many years the farm-relief question has been discussed.

To my knowledge, since I had the honor to come to the Senate, there has been, with the exception of the McNary-Haugen bill, no farm legislation of any great consequence enacted. Early in the present session the Senate voted overwhelmingly in favor of a resolution requesting the House of Representatives to initiate tariff legislation for the purpose of reducing the tariff on manufactured products. I think I am correct in saying that in so doing the Senate recognized that there was a disparity in the operation of the tariff as between certain sections and industries of our country. It was hoped that the House would recognize that condition and would initiate a policy of tariff revision to bring to parity the economic condition of industry and agriculture, which was a principle that had been accepted and expounded by all political platforms, and a principle which, I believe, no man in public life has the courage to argue against. The House of Representatives, however, did not see fit to initiate that kind of legislation. The disparity in the economic condition as between agriculture and industry remains the same.

It was frankly stated upon the floor of the Senate during the debate on that resolution, and it was generally recognized that tariff rates on agricultural products were too low in many instances, and that many articles of agricultural production were on the free list. It was also frankly recognized that the rates on some manufactured articles were too high in proportion to the rates on agricultural commodities. It was also recognized that it was in many instances very difficult to make tariff schedules effective as to agricultural products, but it was hoped that by reducing the tariff rates on manufactured commodities the exchange value of the farmer's dollar would be raised more nearly to par.

Later the Congress in its wisdom passed what was called the McNary-Haugen bill, the so-called farm relief bill. To those who have conscientiously made known on many occasions their opposition to any protective tariff at all, I want to say that those who have voted in favor of the so called farm relief bill can have no qualms of conscience in voting for the pending amendment to the revenue bill, because the very foundation of the McNary-Haugen bill is a protective tariff.

Whether you admit it or not, the fact remains that every vote for that bill was a vote for the principle of protection. It was stated that it was passed for the purpose of making tariff schedules on agricultural products effective. It is an effort to equalize the inflation caused in part by this artificial and at present vicious interference with normal interchange of commodities in trade. As the system now operates, the farmer is the goat and is beginning to suspect it. If and when he becomes fully aware of it, you better look out. Your only cause for complacency now is that you are gambling on his continued ignorance of the facts.

It must be obvious to everyone, Mr. President, that if the McNary-Haugen bill is to make tariff schedules effective—and I think everyone who voted for the bill realized that was its purpose—it can have no effect unless there are tariff schedules to be made effective. The bill if it becomes law is useless without them. Let us not be fooled by any other claim.

I find that during the last year there was something like one billion and a quarter dollars' worth of agricultural products imported into the United States, and a large share of those importations entered into competition with agricultural commodities grown in the United States. For instance, in my State where we raise a great many potatoes, I am informed that more than 1,500 carloads of potatoes came in from Canada. The junior Senator from Idaho [Mr. GOODING] told me that on account of the importation of onions from Spain and from Bermuda the farmers in his State did not dig their onions last fall.

Last year something like 800,000,000 pounds of vegetable oils were imported into the United States, entering into competition with our dairy products, butter, and so forth.

From Canada there was imported, after the tariff was raised on butter by Executive order last year, the tariff on cream not having been increased, sufficient cream to make 20,000,000 pounds of butter, which entered into competition with butter produced on the farms of the United States.

Mr. REED of Missouri. May I ask the Senator what was the total consumption of butter in the United States?

Mr. SHIPSTEAD. I can not tell the Senator; I have not the figures before me.

Mr. REED of Missouri. I am interested in knowing what proportion 20,000,000 pounds would be of the total consumption. However, I do not wish to interrupt the Senator's thread of thought, and I will look the figures up for myself.

Mr. SHIPSTEAD. The question the Senator has asked is a fair one, and I regret that I have not before me the figures as to the total consumption. I will say to the Senator from Missouri, however, that I remember in 1925 when the Danish crown went to 50 per cent of par an American importer could take an American dollar and go over to Denmark and purchase Danish butter for 50 cents on the dollar, if he used American money, changing it into Danish money. Imports of butter started to come into the United States and it was claimed by those who had charge of the sale of butter for the large cooperatives of the United States that a very small importation of butter would seriously affect the price of the domestic product.

A man who had charge of the selling agency for a large butter cooperative informed me at that time that a very small quantity of imports hitting the peak of the market in New York would break the market all over the United States, because the price of butter for the United States is usually based upon the price at New York. So, a very small quantity of butter, say a hundred thousand pounds, entering New York in one day, I was informed, would adversely affect the market several cents. I think it is also true of other articles that when you have a certain amount that goes into the market, steadily flowing into the market, if you have an extra surplus piled upon that market it does not take very much to break the market. That is true of wheat. That is true of almost any commodity. I am also informed that it is true of automobiles, but particularly of perishable goods, although butter can be kept in storage.

It is to meet this importation of agricultural products that enter here under our present economic conditions that I have offered this amendment, in order that the American producer of agricultural products shall to some extent, so far as the tariff will aid him, obtain the American market.

There has been a great deal of controversy in recent years over the question of whether or not the tariff on agricultural products can be made effective. In some instances—as, for instance, in the case of butter—it is claimed by those who produce butter and sell it that the Executive order raising the tariff 4 cents was effective in raising the price of butter. In 1924, when the tariff on wheat was raised by Executive order to 42 cents a bushel, I have never been able to understand how that affected the price of wheat 1 cent a bushel.

Some one said to me, "In view of the fact that the McNary-Haugen bill was passed, why is it necessary now to pass an act raising or initiating tariffs on agricultural products?"

Rather than treating it as a substitute, I would consider this amendment to be a complement to the farm relief bill. That bill was based upon the idea that a farm board should purchase the surplus of agricultural products, and export these products to foreign countries, and exact an equalization fee on the American consumption in order to pay the loss on the exported surplus. It must be patent to everyone that if there are no tariff schedules on certain products, and there is determined to be a surplus in the United States, acting under the provisions of the McNary-Haugen bill, and the board goes into the market to purchase the surplus, if there are no tariff walls to shut out importations from foreign countries this board will be called upon to buy the surplus of the world in order to maintain an American price. So, without uniform tariff schedules forming a tariff wall to keep foreign products out of the United States, I do not see how the McNary-Haugen bill can be made to operate at all.

I have here some statistics and figures on imports of various agricultural products which I think it would be well for Senators to consider before we vote upon this bill.

The American protective principle has been built around the consideration that American markets must be preserved for American products. Paramount in the consideration of this principle has been the thought that only by such preservation of American markets for American products can American labor be adequately protected in the present standard of living.

That has been the principle of the protective tariff. However, we have gone through a revolutionary change in our economic system in the last number of years, due to the invention of new machinery and new increased production; and, as a result, the actual fact is that under the tremendous production of the last six years the figures of the Department of Labor statistics show that there are 32 per cent less men employed in the United States now than there were in 1920. The same Government reports show that the total monthly pay roll for the United States is 30 per cent less than it was in 1920 and that the total production of the average man engaged in industry is 34 per cent greater than it was in 1920. So the charge that the high-protective system for industry is of benefit to labor in the aggregate does not hold water when we take into consideration the economic condition of the last few years. Labor has not prospered with industry. There are too many of them out of work. Agriculture has not prospered, as the statistics of the Government and information revealed to the Members of the Senate have shown over and over again.

The overwhelming agricultural production of this country has, up until recent years, prevented any effective extension of this principle to agricultural products and to the great rural population engaged in the agricultural industry. In recent years, however, the agricultural situation has been changing rapidly; and the balance of trade in agricultural products has in many items swung from an export to an import basis.

In the question of dairy products, for instance, the balance of production and consumption is so finely set that we would undoubtedly be on an import basis were it not for such protection as has been thrown around dairy products by reason of present tariff schedules; and these are by no means adequate to prevent further expansion of imports in the future. In 1927 exports of dairy products reached a value of but $7,000,000, while in the same year imports were about $37,000,000; and in the case of many other items, particularly those classified as the vegetable oils and oil-bearing seeds, imports greatly overshadow the exports. As will be pointed out in the sections dealing primarily with these products, the imports in 1927 of inedible vegetable oils reached the enormous total of $67,000,000, while our exports, principally cottonseeds, were but six and one-half million. The American farmer asks no more nor less than that he shall be privileged to supply domestic demands.

Data tabulated from the reports of the Bureau of Foreign and Domestic Commerce, and therefore entirely reliable, reveal the astonishing situation that in 1927 practically one-half billion dollars' worth of markets for agricultural products were denied to the American producers, and were filled with importation from foreign countries. In many cases the products involved will be surprising to those who have not studied the situation carefully—dairy products, for instance, a question of $12,000,000; nearly $20,000,000 worth of grains; $22,500,000 worth of vegetable oils; $64,000,000 worth of vegetable seeds classified as oil bearing; $46,000,000 worth of raw cotton; $113,-

000,000 worth of hides; $7,000,000 worth of poultry products, and so forth, making a total of $429,000,000.

If by adequate tariff protection this market can be diverted to American producers, then diversified farming, so loudly extolled by our farm advisers, would mean something. It should be kept in mind that the shift of agricultural energy from one line to another tends to preserve the balance of agricultural protection. If we protect what may appear to be insignificant items when viewed in relation to the aggregate of imports, such as vegetable production, poultry production, and dairy production, we will immediately make it profitable to the American farmer to throw more energy into these lines, and thus automatically reduce the tremendous exportable surpluses in what are commonly called the staple crops. Particularly by adequate tariff protection is it possible to encourage the expansion and development of production in those crops which are the source of the vegetable oils; and this may very properly be considered also in its relation to the animal oils and fats, since for many uses the different oils are interchangeable. Perhaps in no other specific place can the Government of the United States bring to the farmers of America more encouragement and more substantial aid than in the wise application of tariff schedules to the various importation of oils and fats; and the importations of these make up a very substantial proportion of the total of the one-half billion dollars of American markets which are now denied to our domestic producers because of competition which they can not face from foreign countries, many of which, particularly the oriental ones, have standards of living and costs of production far below anything in our own country.

Mr. President, I not often accepted the orthodoxy of the Secretary of Agriculture in his discussion of agricultural questions; but for those who consider his opinions orthodox I want to quote from his annual report, the Yearbook for 1926, on page 25, where he says:

> Under our high-tariff régime such tariff rates should be placed on farm products, article by article, as will insure the producer the home market.
>
> In these circumstances I have little confidence in a method of tariff making for agricultural products based on supposed differences in production costs. The only method of setting up a workable and effective tariff for agricultural products is to do what used to be done decades ago for manufacturing industries, namely, to fix rates at such a height as effectively to give the home market to domestic producers.

The first schedule of the amendment is an amendment to paragraph 4 of the tariff act of 1922, affecting the duty on blackstrap molasses. The present duty is one-sixth of a cent, and under the pending amendment the duty would be 10 cents.

There were imported into the United States in 1927, 245,000,000 gallons of molasses, of which 181,000,000 gallons were blackstrap. This 181,000,000 gallons was used for consumption in this country, and was imported from Cuba. Total excise taxes of $283,000 were collected on this importation of blackstrap molasses, and this is equal to a calculated ad valorem rate of 3.16 per cent. This is a rate far lower than that applying to agricultural products generally, and very much lower than the average rate applied to manufactured products. The total available supply of blackstrap molasses in this country in 1927 was between three and three and one-fourth million gallons. This is imports plus production. About three-fourths of the total supply is used for the production of industrial alcohol. The major use for industrial alcohol in this country at the present time is either separately or in combination with other materials as an antifreeze product. Less than one-sixth of the available supply of blackstrap molasses is used in the manufacture of animal feeds. No additional duty is asked for the portion of imports which may go into the production of feed for farm animals.

Other uses for molasses are for the manufacture of yeast, glycerine, and vinegar; but in none of these is an important part of the product used. It is estimated that about 2½ gallons of blackstrap molasses are required to produce 1 gallon of alcohol. The average price of blackstrap for a recent period of years has been about 6½ cents. This makes the cost of raw material for 1 gallon of alcohol 15 cents.

Formerly, practically all industrial alcohol produced in this country was manufactured from the lower grades of corn.

With the development of blackstrap molasses as a source of raw material, this market for corn was lost to the American farmer. It requires about two-fifths of a bushel of corn to produce a gallon of alcohol. Something like 40,000,000 bushels of corn a year would be required to supply the alcohol needs of this country at the present time. At 90 cents per bushel, the cost of raw materials in 1 gallon of alcohol would be about 36 cents. Since it requires two-fifths of a bushel of corn to produce 1 gallon of alcohol, with this margin between the cost of molasses and the cost of corn as raw materials, the proposed duty of 10 cents per gallon is quite moderate, and will by no means compensate for the difference in the production cost of corn and molasses.

Table showing the duty per gallon on molasses testing 48° and above total sugars:

Molasses testing not above—	In general (cents per gallon)	From Cuba (cents per gallon)
48°	0.25	0.20
49°	.52	.42
50°	.80	.64
51°	1.07	.86
52°	1.35	1.08
53°	1.62	1.30
54°	1.90	1.52
55°	2.17	1.74
56°	2.45	1.96
57°	2.72	2.18
58°	3.00	2.40
59°	3.27	2.62
60°	3.55	2.84
61°	3.82	3.06
62°	4.10	3.28
63°	4.37	3.50
64°	4.65	3.72
65°	4.92	3.94
66°	5.20	4.16
67°	5.47	4.38
68°	5.75	4.60
69°	6.02	4.82
70°	6.30	5.04
71°	6.57	5.26

The next schedule is paragraph 19 of the tariff act of 1922, dealing with casein and lactarene, products of skimmed milk, and a very important outlet of the dairy industry.

The present duty on casein is 2½ cents per pound. We propose an increase on this product to 6 cents per pound, or not less than 50 per cent, ad valorem. The imports of casein, which are largely from the Argentine, were in 1927 in excess of 24,000,000 pounds. If the duty on casein were raised sufficiently so that the domestic producer could manufacture this additional volume of casein, it would provide an outlet for a billion pounds of skimmed milk, which would be equal to a market for 2½ per cent of all the skimmed milk available in the United States for feeding and casein manufacture purposes. This additional market would help to relieve the corn and hog situation, since with more skimmed milk utilized for making casein there would be less skimmed milk fed and a greater market for corn for feeding purposes. There has recently been a marked decline in the price of condensed and evaporated milk. This has worked great hardship on the dairy industry. The utilization of additional skimmed milk in the manufacture of casein would help to relieve the present market on condensed and evaporated milk from absorbing large volumes of skimmed milk.

Certain interests four years ago requested the Tariff Commission to investigate the cost of producing casein in the United States and the Argentine, with the idea of reducing the present tariff rates on casein. The United States Tariff Commission made an exhaustive study and the commission reported to the President in 1926 that they were unable to find what difference in costs existed between the United States and the Argentine in the production of casein. The commission did find that the price paid for milk in the Argentine was only 96 cents per hundredweight, or 2 cents per quart. The very fact that imports of casein from the Argentine have doubled since the 2½-cent duty was imposed indicates that we have not properly protected domestic producers, and that a duty of 6 cents per pound is necessary to encourage a greater use of skimmed milk in the United States for casein manufacture. The States which are particularly interested in the present manufacture of casein extend from Vermont to California. New York is the leading State, manufacturing about 5,000,000 pounds; Wisconsin is next, with 3,600,000 pounds; California is third, with 3,500,000 pounds; and Vermont is fourth, with 1,200,000 pounds. The possibility of the increased manufacture of casein in all these States is tremendous, providing proper protection can be given to the domestic producer from the large imports from the Argentine, where milk is produced at exceedingly low costs and where manufacturing of casein is carried on by cheap labor.

Paragraphs 53, 54, 55, 57, 58, 757, and 760 deal with vegetable and animal oils, and the comparative duties are shown in the following table:

Paragraphs 53, 54, 55, 57, 58, 757, and 760—Vegetable and animal oils

Present duty		Proposed duty
	PARAGRAPH 53	
	Animal oils, per gallon:	
5 cents	Cod, herring, menhaden,	23 cents, but not less than 45
6 cents	whale, and seal.	per cent ad valorem.
20 per cent	All other	30 per cent.
	PARAGRAPH 54	
	Vegetable oils:	
1½ cents	Hempseed, per pound	2 cents per pound.
6 cents	Rape seed, per gallon	
Free	Tung, palm, and perilla	
3.3 cents	Linseed, per pound	4 cents, but not less than 45 per cent ad valorem.
20 per cent	All other	Not less than 45 per cent ad valorem.
	PARAGRAPH 55	
	Vegetable oils, per pound:	
2 cents	Coconut	4 cents, but not less than 45 per cent ad valorem.
Free	Palm nut	
2½ cents	Soya bean	3 cents, but not less than 45 per cent ad valorem.
	PARAGRAPH 57	
4 cents	Hard oils, per pound	5 cents, but not less than 45 per cent ad valorem.
	PARAGRAPH 58	
25 per cent	Oil combinations	Not less than 45 per cent ad valorem.
	PARAGRAPH 757	
	Peanuts, per pound:	
3 cents	Not shelled	6 cents.
4 cents	Shelled	8 cents.
	Blanched	9 cents.

Paragraph 1560—Cotton

Present duty: Free list.
Proposed duty:

	Per pound
Cotton with staple under 1⅛ inches	4 cents
Cotton with staple 1⅛ inches	6 cents
Cotton with staple 1 5/16 inches	7 cents
Cotton with staple 1 7/16 inches	8 cents
Cotton with staple 1 9/16 inches	9 cents
Cotton with staple 1¼ inches	10 cents
Cotton with staple 1 7/16 inches	12 cents
Cotton with staple 1⅜ inches	14 cents
Cotton with staple 1½ inches and longer	15 cents

Considerable quantities of both long and short staple cotton have been imported into the United States in recent years. The volume of imports since 1922 has ranged from approximately 168,181,000 pounds in that year down to 156,680,000 pounds in 1925, and back to 181,393,000 pounds in 1926, and up to 205,609,000 pounds in 1927. Last year we imported 695,800,000 pounds of long-staple cotton and 130,029,000 pounds of short-staple cotton; the aggregate value of these imports was $45,669,000. This cotton came from the United Kingdom, Mexico, Peru, British India, China, and Egypt, and one or two other countries. Most of the long-staple cotton comes from Egypt and Peru, although undoubtedly some short staple comes from both of those countries.

At this point I desire to call the attention of my colleagues on the Democratic side to the fact that while American short-staple cotton is being forced to find a market in various parts of the world, and one of the problems of southern cotton growers is how to dispose of the lower grades of cotton and the shorter lengths, increasing quantities of low-grade cotton are coming into this country from China, British India, and Mexico.

With respect to the duties in my amendment proposed to be levied upon long-staple cotton, these duties were carefully worked out by the Mississippi Staple Cotton Growers' Association, perhaps the largest single agency handling American long-staple cotton in the United States. This association is a cooperative association, and markets approximately 250,000 bales of long-staple cotton every year. It finds itself in competition with the long staple from Egypt and Peru. With respect to American cotton, as well as other farm products, it is high time for us to say, "American markets first."

Paragraph 760—Oil-bearing seeds

Present duty		Proposed duty
40 cents	Linseed, per bushel	75 cents.
Free	Copra and palm-nut, per pound	3 cents or not less than 40 per cent ad valorem.
Free	Hemp, palm, tung, rape, perilla, sesame, and all other, per pound.	½ cent but not less than 35 per cent ad valorem.

By far the greatest problem confronting American farmers with respect to international competition is that of the oils and fats. More farmers have an interest in this subject than any other because of the interchangeability of the various oils and fats. This interchangeability has caused the prices of the various oils and fats to run fairly close together so that the question as to what oil or fat might be used in a formula for making a product like oleomargarine or soap, to some extent at least, is determined by the price of the oil. For example, if large quantities of coconut oil, palm oil, soya-bean oil, and whale oil were seeking a market the soap buyer would in a great measure determine his policy by the respective prices of those oils. If palm oil were a shade under soy-bean oil he would buy palm oil; but if menhaden fish oil or certain grades of cottonseed oil had their prices beaten down by the competition from the other oils and were to be offered at a shade lower, then the users would take the domestic oils.

The same thing is true of a wide variety of other oils and fats which are listed in my amendment for raises of duty.

These various oils and fats, particularly the vegetable oils, have been coming into this country in increasing quantities year by year. In 1912 our gross importation of principal vegetable oils amounted to 282,177,000 pounds. In the same year, of animal and fish oils, fats and greases we imported 47,906,000 pounds, and of oleaginous raw materials we imported the oil equivalent of 145,474,000 pounds. These importations have increased steadily until they reached what appeared to be a peak in the war year of 1918 when we imported of vegetable oils 877,392,000 pounds; of animal and fish oils, fats and greases 114,161,032 pounds, and of oleaginous material 808,894,000 pounds. At that time we were buying for our allies as well as ourselves and a considerable percentage of the oils and fats were exported to Western Europe. Our importations gradually fell off until 1921. Since that time they have increased steadily, and in 1926 we imported of the principal vegetable oils 751,741,684 pounds; of animal and fish oils, fats and greases 119,983,255 pounds; and of the oil equivalent in oleaginous materials 867,046,000 pounds.

In 1927 we imported of the principal vegetable oils 773,226,000 pounds; of animal and fish oils, fats, and greases, 146,959,000 pounds; of the oil equivalent in oleaginous raw materials, 830,132,000 pounds.

In other words, this country, aside from butter imports, is annually importing of oils and fats approximately one and three-fourths billion pounds.

But that is not the whole story. Some of those oils are on the free list and some are on the protected list, while coconut oil, one of the major oils, appears to be on the protected list but is on the free list, because of our relations with the Philippine Islands.

When the tariff act of 1922 was passed, copra, from which coconut oil is produced, was placed upon the free list. Now, copra has an oil content of 65 per cent, whereas the duty on coconut oil was placed at but 2 cents per pound. Notwithstanding the fact that the duty on soya-bean oil, which has a maximum oil content of 18 per cent, was placed at 2½ cents per pound. This duty on coconut oil at once caused a diminution in imports from foreign countries, with the exception of certain fine grades of coconut oil known as cochin, while it gave a virtual monopoly to the coconut-oil mills of the Philippine Islands, who were enabled to ship this oil into the United States without paying any duty. In consequence, approximately 99 per cent of the coconut oil coming into the United States to-day comes from the Philippines.

The record of imports of coconut oil is rather significant. In 1912 we imported from all countries 46,720,000 pounds, in 1928 we imported 356,089,000 pounds. Imports thus gradually declined until 1923 when we imported 181,282,149 pounds. Since that time our imports of coconut oil have advanced steadily, and in 1926 we imported 245,129,333 pounds. In 1927 we imported 293,370,000 pounds.

The coconut-oil content of copra, much of which also comes from the Philippine Islands and which is on the free list, has increased in imports from 23,142,000 pounds in 1913 steadily year by year until in 1926 it reached the enormous amount of 317,439,000 pounds; in 1927 these imports totaled 293,146,000 pounds so when considering the quantities of coconut oil that comes into this country both as copra and as coconut oil, we have more than a half billion pounds of the product to add to our fat supply.

Coconut oil is competing with butter in many other ways than as margarines. It is going into the baking and confectionery trades to a great extent, and it is also competing with cottonseed oil and other oils in the manufacture of soap. From a tariff point of view, American producers are least protected

against coconut oil and copra of all the oils and oleaginous materials. This is because of the fact that copra is on the free list and coconut oil from the Philippines comes in duty free. Much of the Philippine coconut oil is pressed from copra brought into the Philippines from oriental sources.

And this importation, since the passage of the tariff act of 1922, means that we are allowing the Philippine producers of copra and crushers of coconut oil to wax fat at the expense of American producers of dairy products, cottonseed, soya bean, and peanut oil.

At this point it is well to call the attention of the Senate to the fact that our relations with the Philippines have been a very expensive proposition for the American people. Aside from the original purchase price in 1898 of $20,000,000, we have actually expended upon the Philippines one-half billion dollars more than the revenue of the Philippines has produced from taxation. Our net loss last year was over $12,000,000.

In addition to the fact that we have given these islands the benefit of a monopoly of trade with the United States at the expense of our producers of raw materials, it is high time that we look at this issue squarely and determine upon a policy of protection for our own people. If the Philippines are to be a constant deficit to our Treasury as well as a source of danger to us in our international relations, some steps should be taken to obviate one or the other of these evils. The simplest step would be to place a tariff upon those products from the Philippines which come into injurious competition with the products of our American farms.

Now, let us see what happens by virtue of the interchangeability of these oils and fats. As long as soya-bean oil was on the free list importations into this country increased steadily from 1912 to 1918, when 335,984,000 pounds of soya-bean oil were brought into this country. Even in 1920, before soya-bean oil was caught by the emergency tariff act of 1921, we imported 112,213,750 pounds. As soon as the tariff was placed upon soya-bean oil its importation dropped to a little over 17,000,000 pounds in 1922, rose to approximately 42,000,000 pounds in 1923, dropped again to 9,125,000 pounds in 1924, and then dribbled down to approximately 6,000,000 pounds in 1926. Now, what is behind the story of this decrease of importation? If Senators will trace the importation of palm oil into the United States and the importation of whale oil, they will find the reason why. Palm oil is on the free list and whale oil bears the relatively small duty of 6 cents per gallon. In 1921 we imported of soya-bean oil approximately 17,000,000 pounds and of palm oil approximately 23,000,000 pounds. Palm oil then began to increase in importations. In 1922 we imported of palm oil approximately 57,000,000 pounds; in 1923 we imported over 128,000,000 pounds; in 1925 we had imported approximately 139,000,000 pounds; in 1926 approximately 131,000,000 pounds; and while palm oil remains on the free list, it is still necessary for the producers of this country to ship quantities of our cottonseed oil abroad because these cheaper oils continue to come into this country and displace uses which for years have been established for this important southern product.

At this point I call the Senators' attention to the fact that while the oleomargarine industry is in competition with the dairy industry of this country, the shifts in the use of ingredients going into oleomargarine has become so marked in the past few years that this substitute for butter is becoming more and more a product made from imported materials originating largely in the oriental countries where labor and costs of living are so low as to enable them to produce and export to us at prices which tend to hold down the entire price structure of our American fats.

In 1916 oleomargarine was made largely from materials produced in the United States. Of oleo oils we used 97,000,000 pounds; of cottonseed oil 64,000,000 pounds; of neutral lard 42,000,000 pounds; in 1927 of coconut oil 27,000,000 pounds. Note the shift in ingredients. In 1927 of oleo oil the margarine industry took only 49,000,000 pounds of cottonseed oil; 23,000,000 pounds of neutral lard, and 25,000,000 pounds of neutral lard, while the use of coconut oil had increased to 108,000,000 pounds.

As a side light upon this situation, let us take the case of peanut oil, which once promised to be an important factor for southern producers. In 1916 the oleomargarine industry used 20,000,000 pounds of peanut oil. In 1927 it used less than 5,000,000 pounds. On the other hand, considerable quantities of peanut oil and coconut oil have crept into a new product which is made of these two oils plus a little salt and a considerable quantity of moisture, and is being sold under various trade names for cooking purposes. It is also being used, according to testimony before the Senate and House Committees on Agriculture in this session, as a substitute for butter and oleomargarine. The exact amount produced of this product is not known because the internal treasury has no way of checking on its production, but this product consists of over 60 per cent coconut oil and about 20 per cent peanut oil. The House Committee on Agriculture recently reported favorably to include these products under the regulations of oleomargarine.

But peanut oil also is an imported product. Largely because of the market prices on these oils it is difficult for our American producers to grow peanuts for an oil market, and even to that extent we find a marked increase in the use of foreign-produced materials in the various types of margarines.

Now, from where do these oils come? Soya-bean oil is produced principally in northern and southern Manchuria. Manchuria is a pioneer country which had hardly received the touch of the Chinese plow until the birth of the Chinese Republic, having been received by the Manchu dynasty as its personal property.

With the building of the Chinese eastern railway and the south Manchurian railway connecting this vast territory equal in size to the States of Texas and Minnesota, combined with the ports of Vladivostok, Dairen, and the opening up of the Korean territory through the port of Fusan, rapid transportation was made available for numerous quantities of soya-bean and soya-bean oil exports. A great oil-milling industry sprang up in Harbin, Chang-Chun, Dairen, Port Arthur, and Antung. In addition a considerable oil-milling industry was developed in Japan, which thrived upon imported soya beans, copra, and fish oils. Since the advent of the railroad, Chinese settlement in Manchurian Provinces has progressed rapidly, and the Chinese have engaged in farming operations on the extensive rather than the intensive plan of cultivation; that is to say, they are using horsepower and in some large tracts they are using motor tractors. Already the imports of soya beans and soya-bean oil in terms of oil from Manchuria is equivalent to two and one-half million tons of oil. That is about one-half as much oil as would be produced from a normal cotton crop in the United States. Coconut oil comes to us principally from the Philippine Islands, but in normal years before the Philippine monopoly was created it arrived from various islands and countries of the Pacific South Seas, such as the Caroline Islands via Japan, Ceylon, and British India. Palm-kernel oil is largely an east African product, but much of it comes from the Dutch East Indies from Germany, where it has been processed.

Sesame oil is also a Chinese product, and is probably produced in other countries of the Orient. Our vegetable tallow comes from China; vegetable wax from Brazil, peanut oil from China, rapeseed oil from China and Japan, and linseed oil comes largely from Germany, the Netherlands, and the United Kingdom. As to flaxseed, our principal competitor now is Argentina. Last year we imported from Argentina nineteen and one-half million bushels of flaxseed, and from Canada two and one-half million.

The Chinese wood or tung oil comes from China; olive oil and olive-oil foots from Italy and Spain.

PRICE RELATIONSHIP

The following table shows the price relationship of the principal oils and fats on a pound basis. The figures given are on the 12-month average price:

	Cents per pound
Lard	12.6
Edible tallow	8.9
Prime tallow	8.2
White grease	8.7
Yellow grease	7.0
Whale oil	7.5
Menhaden oil	6.1
Cottonseed oil, crude	9.2
Peanut oil, refined	14.0
Peanut oil, crude	11.4
Corn oil, refined	11.6
Corn oil, crude	11.6
Soya-bean oil, crude	11.6
Palm oil	8.1
Coconut oil	9.8
Linseed oil (estimated 10-month average)	10.6

Organized agriculture insists that the farms of the United States are capable of producing indefinitely much greater quantities of oils and fats than are now produced and that we are internationally on a self-sufficient basis if the entire oils-and-fats production are considered as they should be considered in the light of their interchangeable uses. We are, in fact, on an export basis principally with respect to cottonseed oil and lard and some other fats.

Our dairy industry is to-day just about evenly balanced between production and domestic consumption. It also is capable of much greater expansion, and the time may not be far distant when the United States will be forced to compete on the world markets with export surplus dairy products.

In the face of this, the past policy of our Government has been to permit enormous quantities of these cheaper oils and

fats to come into this country and depress prices of American farm products, for no one can deny, for example, that the price of cottonseed and the price of flaxseed are largely determined by the prices of the residue oil contents of those commodities. Likewise the price of butter is to a great extent governed by the one-fourth billion pounds of oleomargarine annually produced and which sells at prices much under the butter prices. In fact, for years the margarine industry has exercised the position of a governor on the price of butter. American farmers, therefore, are asking, and with good reason, why they should be held down, and why the purchase power of their dollars should be kept so low as compared with the purchase power of the dollar of the industrial worker and the employing capitalist.

One key, at least, to unlock the door of prosperity for agriculture is the tariff on the foreign competing oils and fats.

I ask unanimous consent to have printed in the RECORD some tables relating to these schedules.

(There being no objection, the tables were ordered to be printed in the RECORD, as follows:)

Imports in pounds of principal vegetable, animal, and fish oils into the United States

[American Dairy Federation; National Cooperative Milk Producers' Federation; National Dairy Union; Southern Tariff Association]

Kind of oil	1912	1914	1916	1917	1918	1919	1920
Vegetable oils:							
Coconut	46,720,000	58,012,000	64,349,000	163,091,000	356,089,000	281,063,213	216,327,103
Cottonseed	2,160,000	16,016,000	16,598,000	13,826,000	18,373,000	27,805,784	9,457,924
Linseed	2,135,000	4,350,000	711,000	633,000	196,000	16,142,835	35,200,200
Olive—							
Edible	43,460,000	50,857,000	55,435,000	51,055,000	1,284,000	67,681,020	30,591,082
Inedible	5,794,000	5,609,000	6,335,000	4,476,000	3,000	2,118,405	496,118
Palm kernel	27,680,000	21,089,000	4,324,000	306	34,000	1,920,493	1,693,740
Palm	52,671,000	49,092,000	29,270,000	34,257,000	20,993,000	41,817,945	41,948,224
Peanut	7,626,000	7,365,000	15,674,000	27,405,000	68,466,000	154,052,378	95,124,273

Imports into the United States of free agricultural products

[Calendar year 1926]

Products	Value of free imports for consumption
Total free merchandise imported for consumption	$2,908,107,735
Total free agricultural products (sum of details shown below)	1,250,553,928
Animals and animal products, edible (sausage casings, chief item $16,493,172)	23,338,310

Imports into the United States of free agricultural products—Continued

Products	Value of free imports for consumption
Animals and animal products, inedible	$534,471,583
Hides and skins	96,771,443
Silk, raw	402,675,581
Wool, unmanufactured	30,002,518
Animal oils and fats, inedible	2,866,803
Animals	2,155,238
Vegetable food products	493,408,056
Grains, etc. (wheat for milling and export, $21,488,632)	21,994,062
Fodders and feeds	2,124,523
Vegetables, etc	6,323,113
Fruits and nuts (bananas $31,684,306)	35,859,254
Cocoa, coffee, and tea	396,843,071
Sugar (Philippine and Virgin Islands)	30,234,033
Vegetable products, inedible	199,335,979
Oil seeds	24,275,823
Vegetable oils (coconut oil from Philippine Islands, $22,087,870)	61,943,150
Seeds, except oil seeds	1,183,076
Miscellaneous vegetable products	1,892,410
Cotton, unmanufactured	46,239,693
Jute, not dressed or manufactured	13,938,252
Manila fiber	18,282,084
Sisal	21,370,198
Other vegetable fibers	10,400,793

UNITED STATES TARIFF COMMISSION,
Statistical Division, April, 1928.

Mr. SHIPSTEAD. Mr. President, paragraph 723 relates to buckwheat, and the comparative duties are as follows:

Buckwheat, hulled or unhulled, per 100 pounds: Present duty, 10 cents; proposed duty, 40 cents.

This country in 1926 produced 12,922,000 bushels of buckwheat. This production was scattered over a variety of States, but the chief producers are New York, Pennsylvania, and Iowa. In the same year we imported 4,272,555 bushels. These imports came principally from Canada, which alone sent 4,170,118 bushels, while the Kwangtung Leased Territory exported to us 100,000 bushels.

Here is an excellent opportunity for those who believe in diversification as a means of assisting agriculture by protecting the home market by consumption of this very valuable food product. The use of this product is not as much appreciated in the United States as it is in some other countries, notably Russia, where it is an important element of the diet. It is admirably adapted for diversification purposes and its production should be encouraged in the United States.

Paragraph 724—Corn

	Present duty	Proposed duty
	Cents	*Cents*
Corn or maize, including cracked corn, per bushel of 56 pounds	15	30
Corn grits, meal, and flour, and similar products, per 100 pounds	30	50

While the total annual imports of corn in 1926 amounted to 1,055,382 bushels, valued at $909,027. Of this amount 724,167 bushels came from the Argentine, 234,391 from the Dominican Republic, and 85,392 bushels from the Kwantung leased terri-

tory. These imports for the most part were consumed in the Pacific Coast States, although smaller quantities of this corn got into Dakota and additional quantities were used in the Eastern States.

The principal reason why the duty on corn should be raised lies in the potential competition that we expect from Argentina in the near future, and also in the further fact that the consumption of corn by work animals has been decreased approximately 250,000,000 bushels annually according to figures compiled by a special committee of the Association of Land Grant Colleges. Just as the problem of finding a market for hay is intensified in the consumption habits of the country, so we have a similar problem confronting the corn producers.

For years the late Secretary of Agriculture, H. C. Wallace, pointed out the disadvantages experienced by the middle western corn producers by virtue of freight rates in reaching the eastern markets of this country with shipments of corn in connection with the competition from Argentina. But the railroads of the country are protected against material decline in freight rates on corn by virtue of the Esch-Cummins Transportation Act. It would, therefore, seem only reasonable that further protection should be given the Middle West by adding to the tariff duties on this product.

The proposed increase on corn and other products is to provide compensatory duties for American producers.

Paragraph 729—Wheat

	Present duty	Proposed duty
	Cents	*Cents*
Wheat, per bushel of 56 pounds	30	42
Wheat flour, semolina, crushed or cracked wheat not specially provided for, per 100 pounds	78	$1.04

The duty on wheat, wheat flour, and similar products was increased by Executive action following a tariff commission investigation, from 30 cents to 42 cents per bushel on wheat, and from 78 cents to $1.04 on wheat flour, semolina, and similar wheat products.

The purpose of my amendment with respect to wheat is to establish these duties by legislative action so that in case a new tariff investigation should be inaugurated it would be possible for a still further protection of the duties to be made in case such action might be found justifiable.

Notwithstanding the duty on wheat, the records of the Bureau of Foreign and Domestic Commerce for the calendar year 1926 showed that duty was paid upon 14,050,924 bushels of wheat, practically all of which came from Canada, and was entered principally in the custom ports of Buffalo and New Orleans.

Of dutiable wheat products we imported a total of 1,892,536 pounds of wheat flour; 1,544,193 pounds of biscuits, wafers, cakes, and so forth.

Paragraph 757—Peanuts

	Present duty	Proposed duty
	Cents	*Cents*
Peanuts, not shelled, per pound	3	6
Peanuts, shelled, per pound	4	8
Blanched, per pound		9

No section of this country is more admirably adapted to the production of peanuts than the Southern States. This valuable food product has both a high oil content, and has widespread use in this country for a variety of purposes. Not only in its roasted condition but in the confectionery trade it is a popular product, and one that should be made profitable for our own American producers. In spite of this the American peanut industry has suffered well-nigh murderous competition because of the great volume of this product that comes into the United States from other countries, principally China.

Like many other farm products the production of peanuts was expanded greatly due to the war impulse and the great needs in fats for the Allies. After the war production decreased for several years. This tendency to decrease was caused by the pressure here of huge quantities of peanuts which came into this country at times when domestic prices would reach a point which would permit profitable importation. For the last two or three years, however, the movement out of China of peanuts from the Chang-Tung Province has been more or less interrupted on account of internal warfare. In consequence the American peanut industry tended to pick up somewhat, as may be evidenced by the fact that in 1926 the production was 631,825,000 pounds, while in 1927 the production had come back to 866,820,000 pounds. Even under those conditions, however, the importation of Chinese peanuts amounted to 35,258,685 pounds in 1926.

I desire to call particular attention to the item in my amendment providing for an adequate duty on blanched peanuts. Blanched peanuts are peanuts which have undergone a process whereby the little skin on them is removed. By means of this process the importers have been able to bring peanuts in at a duty which would approximate 35 per cent ad valorem, whereas the duty on peanuts, shelled and not shelled, runs considerably higher. My amendment provides for a rate of duty which will put blanched peanuts in line with other peanuts as regards import duties.

Paragraph 777—hay: Hay, per ton: Present duty, $4; proposed duty, $6.

It may be surprising to Senators to learn that this country in the year 1926 imported 326,156 tons of hay from Canada, valued at $3,373,320. At the same time that we were importing hay on account of remarkable changes which have taken place within the farming industry as a result of the utilization of motor power and similar changes in the city industry wherein the motor truck has taken the place of the horse and the mule, this country is now annually consuming, approximately, 10,000,000 tons of hay less than it did in former years. These figures were compiled by a special committee of the Association of Land Grant Colleges of America.

The decline in the consumption of hay, which is one of our largest crops, being normally third in money value to dairy production, presents some rather serious marketing problems for American agriculture, and also some serious problems in connection with the adjustment of acreages. Unless this hay can be utilized by other types of animals, notably dairy animals, much good meadow land will be unprofitable. If the dairy industry is to utilize increased quantities of hay, it must also be protected with regard to domestic markets from foreign competition.

Paragraph 761—Grass seeds

	Present duty	Proposed duty
	Cents	*Cents*
Alfalfa, per pound	4	8
Alsike clover, per pound	4	8
Crimson clover	1	3
Red clover	4	8
White clover	3	8
Clover, not specially provided for	2	6

In 1926 our imports of important seeds were as follows: Alfalfa, 4,826,344; alsike clover, 5,554,462 pounds; crimson clover, 4,478,145 pounds; red clover, 18,157,226 pounds; other dutiable clovers, 12,442,092 pounds. Our largest imports of alfalfa seed comes from the United Kingdom. France is our greatest exporter of red clover and crimson clover, although Germany, Hungary, Italy, and the United Kingdom send considerable quantities of the latter. Canada is the largest exporter to us of other clovers, with Hungary coming second, and a considerable quantity coming from Poland and Danzig.

While the machinery of distributing grass and clover seeds is largely through seed dealers, the custom prevails in this country on an extensive scale of farmers producing these seeds on a contract basis for the seed dealers. In consequence, farmers are directly interested in promoting a market among their own kind for these seeds, and the purpose of my amendment is to encourage this phase of domestic industry.

(At this point Mr. SHIPSTEAD yielded to Mr. SMOOT, who submitted a proposed unanimous-consent agreement.)

Mr. SHIPSTEAD. Mr. President—

Paragraph 708—Condensed milk and powdered milk

	Present duty	Proposed duty
Milk, condensed:		
Unsweetened	1 cent per pound	1½ cents per pound.
Sweetened	1½ cents per pound	3 cents per pound.
Other	1⅜ cents per pound	2 cents per pound.
Milk powder	3 cents per pound	7½ cents per pound or 45 per cent ad valorem.
Skimmed milk powder	1½ cents per pound	3 cents per pound.
Cream powder	7 cents per pound	10 cents per pound.
Malted milk	20 per cent	40 per cent.

Paragraph 708—Condensed milk and powdered milk—Continued

IMPORTS

Item	1922	1924	1927
Milk, condensed:	*Pounds*	*Pounds*	*Pounds*
Unsweetened	5,294,000	1,738,000	2,117,000
Sweetened		4,714,000	506,000
Milk powder		1,870,000	6,828,000
Cream powder, malted milk		167,000	905,000
Total			10,356,000

The imports of dairy products covered by paragraph 708 have increased 100 per cent since 1922. The imports of condensed milk, milk powder, cream powder, and malted milk were 5,294,000 pounds in 1922, and in 1927 had increased to 10,356,000 pounds. In 1926, out of a total of 9,375,000 pounds imported into the United States of dairy products covered by this paragraph, 8,020,000 came from Canada, or 85 per cent of the total imports of these items. The same situation exists with reference to these dairy products as exists with reference to milk and cream; that is, the rates on these products of the dairy industry are not equal to the rates on butter. Canada is therefore increasing her shipments of these items which carry lower duties than the butter duties and decreasing the shipments of butter. Holland also has become a serious competitor within the last few months, offering dried milks on the New York market at very low prices. It takes 250 pounds of fresh milk to make 100 pounds of condensed milk; 250 pounds of fresh milk will produce 12 pounds of butter, and the duty on the butter at 12 cents per pound would be $1.44, thus, to equalize the duty on condensed milk with the 12-cent duty on butter would require a tariff of 1½ cents per pound. The duty on sweetened condensed milk is higher in order to cover the sugar content of the milk. Milk powder, which takes about 9 pounds of milk to make 1 pound of powder, would require a duty to equalize with butter at 12 cents per pound about 9½ cents per pound. We have, however, made the rate on milk powder 7½ cents per pound. In a similar manner the other products which are covered by this paragraph have been increased to equalize with the butter tariff rate.

PARAGRAPH 709—BUTTER AND BUTTER SUBSTITUTES

The present duty, in accordance with the 1922 act, is 8 cents per pound. This was increased under the flexible tariff provision by a proclamation of the President to 12 cents per pound. The proposed duty is 12 cents per pound or 30 per cent ad valorem. The Tariff Commission investigated the cost of producing butter, under resolution by the Senate, and, as a result of such investigation, recommended to the President an increase in the butter duty of 50 per cent, or from 8 cents per pound to 12 cents per pound. Congress should now make the duty 12 cents per pound in order to make possible, if the situation should arise, a further increase under the flexible tariff provision. The 30 per cent ad valorem provision is proposed in order to cover situations such as we had last winter when the price of butter went so low in Denmark due to competition from New Zealand and Australia that the Copenhagen quotation was 17 cents per pound less than New York. Under the 30 per cent ad valorem duty the domestic producer could have been protected against this unusually low foreign butter price.

Paragraph 710—Cheese and cheese substitutes

	Present duties	Proposed duties
Cheese	5 cents per pound or 25 per cent ad valorem.	8 cents per pound or 40 per cent ad valorem.

IMPORTS OF CHEESE

	Total	From Canada
	Pounds	*Pounds*
1922	46,375,000	687,000
1923	64,420,000	1,899,000
1924	59,176,000	909,000
1925	62,403,000	10,274,000
1926	78,417,000	11,835,000
1927	79,796,000	13,267,000

Imports of cheese since the tariff bill of 1922 was passed have increased from 46,573,000 pounds in that year to 79,796,000 pounds in 1927, an increase of 72 per cent. This very large increase indicates that the dairy farmer is losing part of his market for his dairy production. Under adequate tariff protection our dairy farmers would have an additional market at home for nearly 1,000,000,000 pounds more of milk.

The imports of cheese from Canada have shown a most unusual and tremendous increase, having jumped from less than 700,000 pounds in 1924 to over 13,000,000 pounds in 1927.

Last year the United States Tariff Commission, under the flexible tariff provision, completed an investigation into the cost of producing Swiss cheese in the United States and Switzerland. In their formal statement of conclusions, page 31 of the Swiss-cheese report to the President of the United States, the commission found that under the farm basis of cost, the cost of producing Swiss cheese in the United States was thirteen and a fraction cents per pound higher than in Switzerland. They also found that—

> the present rate of duty of 5 cents per pound, but not less than 25 per cent ad valorem, fixed in paragraph 710 of the tariff act of 1922, does not equalize the difference in costs of production of Swiss cheese in the United States and in the principal competing country.

And as a result stated—

> the rate of duty on Swiss cheese, Emmenthaler type, shown by said difference in costs of production in the United States and in said principal competing country necessary to equalize said difference, within the limits of section 315 of the tariff act of 1922, is a rate of 7½ cents per pound and not less than 37½ per cent ad valorem.

This report to the President resulted in the President proclaiming on June 8, 1927, an increase in the duty on this type of cheese to a maximum of 50 per cent—that is, to 7½ cents per pound but not less than 37½ per cent ad valorem. I am now asking Congress to make the duty on all cheese 8 cents per pound or 40 per cent ad valorem.

Paragraphs 711, 712, 713—Poultry and poultry products.

In connection with these changes in the schedules on poultry and poultry products, I have a statement from the National Poultry Council of the United States of America relative to the poultry industry and the need for more substantial tariff schedules on poultry and eggs. This statement is signed by its president, Harry R. Lewis, of Davisville, R. I., and also by very many organizations of poultry men from practically every State in the Union. There are organizations from Alabama, Arkansas, Connecticut, California, Georgia, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, Oklahoma, Ohio, Oregon, Pennsylvania, Tennessee, Texas, Virginia, Washington, and Wisconsin.

I may say that the communication shows that there were importations of different kinds of eggs and egg products and preparations of eggs amounting to 15,341,000 pounds in 1927. I might quote, for the benefit of those Senators who are listening, the last paragraph:

> The poultry industry beseeches Congress to give to them the same protection which industry is enjoying, for they earnestly feel that a policy of protection for all will safeguard the poultry industry and insure the consumer of America a high-quality food commodity in the nature of both eggs and poultry at a reasonable cost.

I ask that the entire statement be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The statement is as follows:

STATEMENT BY THE NATIONAL POULTRY COUNCIL OF THE UNITED STATES OF AMERICA RELATIVE TO THE POULTRY INDUSTRY AND THE NEED FOR MORE SUBSTANTIAL TARIFF SCHEDULES ON EGGS

1. The poultry industry has come to be one of America's leading agricultural pursuits when measured by the position it occupies in the production of a very necessary and highly valuable human food, namely, poultry meat and eggs.

2. The poultry industry has just passed through one of the most depressing years in its history due to extremely low prices received for poultry and eggs and to relatively high costs of production.

3. In spite of the tariff schedules now in force, eggs last year sold at country points for as low as 12 cents per dozen in the spring of the year. This year prices are slightly higher but far below the cost of production.

4. The weakened and distressing conditions within the industry are due primarily, in the case of eggs, to immense importations of frozen and dried eggs from the Orient. Last year, according to statistics compiled by the Department of Commerce, the following egg products were imported:

	Pounds
Dried whole eggs	962,482
Frozen or prepared whole eggs	2,774,319
Dried egg yolks	3,525,308
Frozen or prepared egg yolks	2,778,422
Dried egg albumen	2,960,277
Frozen or prepared egg albumen	2,340,602
Total	15,341,410

5. Increasing quantities of live and dressed poultry are coming into the country every year from South American, European, and North American countries giving our poultry producers severe competition under the existing low-tariff schedules. During 1927 close to 2,000,000 pounds of live poultry was imported and over 4,000,000 pounds of dead and prepared poultry, which immense volume creates a surplus and a serious depression in prices.

6. Only recently large and heretofore unexperienced shipments of turkeys from South American and European countries are coming into the United States and every evidence goes to show that unless checked by adequate tariff they will literally destroy the turkey industry of this country.

7. These immense importations of frozen and dried egg products cause the most serious competition directly with low-grade eggs produced in this country and indirectly with the finest quality eggs produced because their existence here does not allow for a satisfactory price to encourage home breaking, drying, and freezing, with the result that a large volume of low-grade eggs which should be broken are compelled to find a market here in the shell with distressing results to both quality of product and price.

8. The revised tariff schedules requested in the Shipstead amendment have been arrived at after exhaustive and careful study and are designed to take care of the difference between the cost of production of eggs and poultry in the United States as against the much lower cost of production of similar products in those countries from which they come. Certainly the American poultry farmer should be adequately protected against the unfair and impossible competition from such countries as China, the Argentine, Austria, etc.

9. The poultry industry of the Nation is solidly behind an adequate protective tariff for the products of the American hen and is willing to take their chance with any exportable surplus which may be produced in this country, but insist upon adequate protection against similar commodities produced under extremely low standards of living and at a very low cost.

The poultry industry beseeches Congress to give to them the same protection which industry is enjoying, for they earnestly feel that a policy of protection for all will safeguard the poultry industry and insure the consumer of America a high quality food commodity in the nature of both eggs and poultry at a reasonable cost.

Prepared by the National Poultry Council, an organization representing the poultry industry of the United States in all its branches, including the following organizations:

American Poultry Association.
American Incubator Manufacturers' Association.
American Feed Manufacturers' Association.
Poultry Science Association.
Poultry Publishers' Association.
Indiana State Poultry Association.
New Jersey State Poultry Association.
New Hampshire Poultry Growers' Association.
Oklahoma State Poultry Federation.
New York State Cooperative Poultry Certification Association.
Petaluma Chamber of Commerce.
Blue Andalusian Club of America.
International Baby Chick Association.
Alabama Baby Chick Association.
Arkansas Baby Chick Association.
Connecticut Baby Chick Association.
California Baby Chick Association.
Georgia Baby Chick Association.
Illinois Baby Chick Association.
Indiana Baby Chick Association.
Iowa Baby Chick Association.
Kansas Baby Chick Association.
Michigan Baby Chick Association.
Minnesota Baby Chick Association.
Mississippi Baby Chick Association.
Missouri Baby Chick Association.
Nebraska Baby Chick Association.
New Jersey Baby Chick Association.
Oklahoma Baby Chick Association.
Ohio Baby Chick Association.
Oregon Baby Chick Association.
Pennsylvania Baby Chick Association.
Tennessee Baby Chick Association.
Texas Baby Chick Association.
Virginia Baby Chick Association.
Washington Baby Chick Association.
Wisconsin Baby Chick Association.

HARRY R. LEWIS,
President National Poultry Council.

Mr. SHIPSTEAD. I also wish to read a statement from Knox Boude, of Petaluma, Calif, with reference to these poultry schedules. Mr. Boude represents the poultry interests of California:

The tariff of 1922 was largely ineffective from date of passage on poultry and its products simply because the rates were low and were carefully balanced to allow importers every advantage. In the proposed schedules we are asking practically the same rates as were urged of Chairman Fordney by the original poultry tariff group in 1921. Unless rates as high as we now ask are granted by Congress the poultry industry can not expand and furnish reasonable standard of living to those engaged in it. The rate on shell eggs is based upon the necessity of shutting out an annual importation of 800,000 cases from countries south of the Equator and permitting the American producer to increase his production that much or more for the home market. If we ask less than 12 cents, it means that we can not keep out imports. In the case of frozen eggs, under the present tariff American production has grown, but is continually in financial trouble because of imports underselling our product, to tremendous disadvantage of American poultry industry. It is enormously important to the poultry industry that the frozen-egg industry be given an adequate tariff, because there are four or five million cases of American eggs annually which can most efficiently be handled in that manner exclusively. The present year the market for this class of eggs is greatly disturbed owing to importers offering Chinese frozen eggs for delivery any time this year at 4 to 5 cents under cost of American production. American frozen eggs are in direct competition with dehydrated eggs from China, and if the frozen home product can get adequate tariff rates the market for American eggs suitable for freezing can be expanded 50 to 100 per cent in the immediate future. Unless we can control by tariff the importations of dried eggs at an approximate rate of three times that on frozen, which is the basis upon which the dehydration takes place, it is not possible to reestablish the egg-drying industry in America. The present tariff on dries is ineffective, absolutely valueless to the industry. Nothing short of a 45-cent tariff will establish a dehydrated-egg industry in America. The rate on live poultry now is so low it is merely a method of collecting a small revenue for the Government. In asking for a 10-cent tariff we need protection proportionate to that upon which the fowls dress out. The 14-cent rate upon dressed poultry should shut out dressed turkeys from the Argentine and Australasia of two and one-half million pounds annually and allow the turkey raisers of America a living return for their labor. Also it will help restrict importations of millions of pounds of frozen poultry at present being received at Atlantic ports from central and eastern Europe. We do not need any imports of dressed poultry. American industry could supply every legitimate market demand under adequate tariff protection.

Paragraph 711—Live birds

	Present duty	Proposed duty
Poultry per pound	3 cents pound	10 cents pound.
All other:		
Value $5 or less	50 cents each	$2 each.
Value over $5	20 per cent	

Imports	Pounds
1923	1,249,000
1924	1,779,000
1925	2,072,000
1926	2,108,000
1927	1,629,000

The most important country of imports is Canada, which in 1926 shipped us 2,096,000 pounds, or all but 12,000 pounds of the total imports. Imports were lower this past year, due to the fact that the poultry industry was hard hit and less profitable than in former years. This resulted in somewhat less imports last year than in 1926.

Paragraph 712—Dead birds

	Present duty	Proposed duty
Poultry	6 cents per pound	14 cents per pound.
All other	8 cents per pound	
Prepared, etc	25 per cent ad valorem	45 per cent ad valorem.

Imports—Poultry, dead and prepared

	Pounds
1923	2,183,000
1924	2,160,000
1925	3,140,000
1926	6,492,000
1927	4,209,000

Principal country imported from, 1926

DEAD POULTRY	Pounds
Argentina	2,279,000
Canada	1,203,000
United Kingdom	1,136,000
Austria	951,000
Australia	277,000
All other	181,000
Total	6,027,000

PREPARED POULTRY	Pounds
France	190,000
Hong Kong	150,000
China	90,000
All other	35,000
Total	465,000

Paragraph 713—Eggs

	Present duty	Proposed duty
	Cents	*Cents*
Eggs, per dozen	8	12
Eggs, frozen, etc., per pound	6	15
Eggs, dried, per pound	18	45

Imports by years

	Eggs of poultry in shell	Frozen, dried, and prepared eggs
	Dozen	*Pounds*
1922	1,019,000	24,809,000
1923	412,000	23,299,000
1924	383,000	19,722,000
1925	609,000	29,658,000
1926	298,000	25,738,000
1927	250,000	[1] 15,341,000

[1] Chinese revolution cut exports from China.

Imports of frozen, dried, and prepared eggs by products—pounds

	Whole eggs dried	Whole eggs frozen	Yolks dried	Yolks frozen	Egg albumen dried	Egg albumen frozen, prepared, or preserved
1924	2,083,000	6,162,000	4,107,000	3,606,000	2,768,000	996,000
1925	1,455,000	12,531,000	5,683,000	5,800,000	4,189,000	4,328,000
1926	677,000	9,392,000	4,398,000	4,161,000	3,499,000	3,611,000
1927	962,000	2,774,000	3,525,000	2,778,000	2,960,000	2,341,000

Principal countries of imports, 1926

Eggs in the shell:	Dozen
Hong Kong	212,000
Canada	54,000
Argentina	15,000
China	13,000
All other	4,000
Total	298,000
Eggs, frozen:	Pounds
China	10,849,000
United Kingdom	6,008,000
All other	306,000
Total	17,163,000

China	8,150,000
All other	424,000
Total	8,574,000

CONVERSION FACTORS ON EGGS

One dozen eggs in shell equals 1 pound liquid or frozen eggs. Three and one-half pounds liquid eggs equals 1 pound dried eggs.

Paragraph 701—Fresh beef and veal tallow, oleo, hides

	Present duty	Proposed duty
Fresh beef and veal	3 cents	8 cents.
Tallow and oleo	1 cent	1 cent or 30 per cent.
Hides	Free	25 per cent.

No changes are recommended in the tariff on live cattle being imported into this country because of the fact that practically no live cattle is imported for immediate slaughter.

From the ranges of Canada there are now imported what we call stockers or feeders, that come into the market and are sold in the Middle West, where the American farmer can feed them corn, thus furnishing a market for the American farmers' corn, and therefore no tariff is recommended upon the importation of that kind of cattle.

Most of the cattle being imported are going into the Corn Belt feed lots to use up surplus grains and roughages. The tariff on live cattle represents approximately the differential in cost of production between our western range country and that of western Canada, which is our principal source of live cattle.

The situation, however, with reference to fresh beef and veal is quite different. The present tariff of 3 cents per pound does not represent a fair differential in cost of production between farms of the United States and those of the Argentine and other foreign countries, and Argentina beef is temporarily excluded from our markets by an embargo because of the existence of the foot-and-mouth disease in the Argentine. The lifting of this embargo would result in hundreds of millions of pounds, which are now going to European countries, being diverted to the United States markets to be sold in competition with our own beef. United States Statistical Abstract shows that in 1922 beef and veal were imported to the extent of 36,000,000 pounds; in 1923, 19,000,000 pounds; in 1924, 18,000,000 pounds; in 1925, 15,000,000 pounds; in 1926, 20,000,000 pounds; and in 1927, 43,000,000 pounds, the principal source of this beef being Canada. The tariff of 8 cents per pound which is provided for in this bill would be only protective and not prohibitive.

With reference to tallow and oleo, the present duty is 1 cent per pound. The imports of animal oils and fats, exclusive of fish oil, composed principally of tallow and oleo, were 2,000,000 pounds in 1922, 11,000,000 pounds in 1923, three and one-half million pounds in 1925, 16,000,000 pounds in 1926, and 16,000,000 pounds in 1927. The importation of these fats unquestionably had a depressing effect on our live-cattle market, and the large imports of 1926 being the result of comparatively high-price levels during that year, we are proposing to protect the industry in the period of high price levels by a 30 per cent ad valorem duty on fats. In this connection it should be pointed out that the industry is seriously affected by the importation of other oils and fats, which are replacing oleo oil and oleo stearin in the manufacture of oleomargarine products. Figures for 1927 show that in the manufacture of these products 47,000,000 pounds of oleo oil were used, as compared with 98,000,000 pounds of coconut oil and 5,000,000 pounds of peanut oil, both of which were imported in large quantities without adequate protective tariffs.

The importation of these fats unquestionably has had its influence on the American market, as many of them come in in competition also with butter because of their use in the manufacture of oleomargarine.

With reference to hides, which are now on the free list, approximately one-third of the hides now being used in this country, or approximately 150,000,000 pounds, were imported in 1926 free of duty, and in 1927 237,000,000 pounds. This last import of hides had a greatly depressing effect on the market of live cattle and veal. The tariff protection on hides is being demanded by many cattle producers throughout the United States. The 25 per cent ad valorem duty which is provided for in this bill does not represent the difference in cost of production between the United States and the Argentine, but does offer some relief to the cattle producer of this country from the unfair competition which he is now confronted with in the importation of hides wholly free of duty.

Paragraph 703—Pork, lard, lard compounds

	Present duty	Proposed duty
Pork, per pound:		
Fresh	¾ cent	3 cents.
Cured	2 cents	5 cents or 45 per cent.
Lard	1 cent	
Lard compounds and substitutes	4 cents	

Section 703 provides for an increase from three-fourths cent to 3 cents per pound on fresh pork. The imports of this product in 1926 amounted to 9,000,000 pounds and in 1927 to 14,000,000 pounds. This in the face of an exportable surplus of pork produced in the United States. The tariff of 3 cents per pound provided for in this bill would not entirely prevent the imports of pork, but would fairly represent the differential in the cost of production between the United States and countries from which pork is imported. The present tariff on cured pork is 2 cents per pound, and on lard 1 cent per pound. My amendment provides for 5 cents per pound and 45 per cent ad valorem. There were imported in the United States prepared meats, principally cured pork, in 1926, 10,000,000 pounds, and 23,000,000 pounds in 1927, this in the face of an exportable surplus of pork produced on American farms both years.

I have previously referred to animal oil and fat imports of an edible character. Our imports are known to have included a considerable portion of lard in spite of the fact that lard is produced in the United States to the extent that 698,000,000 pounds were exported in 1926, 681,000,000 pounds in 1927. There were also exported in 1926, 10,000,000 pounds of lard compounds, and in 1927, 9,000,000 pounds of lard compounds. With this vast exportable surplus produced annually, the import duty is needed to maintain the American market for American products.

Paragraph 702—Fresh mutton and goat meat, fresh lamb

	Present duty	Proposed duty
Fresh mutton and goat meat, per pound	2½ cents	5 cents.
Fresh lamb, per pound	4 cents	8 cents.

Section 702 provides for an increase in the duty on fresh mutton and goat meat from 2½ to 5 cents per pound, and on fresh lamb from 4½ to 8 cents per pound. In 1926 there were imported a total of 3,000,000 pounds of these products, and in 1927, 2,600,000 pounds. These products coming principally from New Zealand and Australia, are produced at a cost far below the cost of production on American farms. The tariff provided for in this bill is necessary to insure permanency to the sheep industry of the United States.

Mr. BROUSSARD. Mr. President, will the Senator yield to me?

Mr. SHIPSTEAD. I yield.

Mr. BROUSSARD. I notice there is in the Senator's amendment, schedule 5, relating to "sugar, molasses, and manufactures of."

Mr. SHIPSTEAD. Yes.

Mr. BROUSSARD. I should like to ask the Senator a question in regard to that. I have compared the rates proposed in his amendment with the present law, and I find that the only change the Senator proposes is a flat tax of 10 cents a gallon on molasses imported for the manufacture of alcohol, and for each additional per cent of sucrose content the Senator's amendment proposes an additional duty of 1 cent.

I merely wish to call the Senator's attention to the fact that he proposes to raise the rate of duty on many agricultural products, for instance, from 2 cents a pound to 5 cents. In my section of the country we are the consumers of those products which are raised in the Middle West and the Northwest; we do not raise any of them. The Senator proposes to double the rates on those products, and the only thing he proposes to do for us is to raise the duty on molasses imported for the manufacture of alcohol. I want to know if the Senator thinks that is fair treatment to the sugar producers of the country?

Mr. SHIPSTEAD. I was not able to hear all that the Senator said, on account of the noise in the Chamber. Does the Senator refer to blackstrap molasses?

Mr. BROUSSARD. Yes. I wanted to know, if the Senator is trying to help the agricultural people of this country, if he thinks he has made a fair distribution of the additional tariff rates which he proposes to put upon agricultural products?

Mr. SHIPSTEAD. I am not sure that I understand the Senator's question. I propose a tariff on blackstrap molasses, because it is imported here and used for the purpose of making industrial alcohol, and to that extent displaces corn.

Mr. BROUSSARD. Yes; I know—because it competes with the corn raised in the Senator's part of the country. That is the only reason.

Mr. SHIPSTEAD. Does the Senator mean to say that it injures the producer in the United States of blackstrap molasses?

Mr. BROUSSARD. No; it does not, but we are consumers of your product, and if you propose to raise the rates on your agricultural products which we consume you should raise our rates proportionately.

Mr. SHIPSTEAD. I thought we were raising the rates on molasses.

Mr. GLASS. Mr. President, what becomes of those of us who do not raise either product that is increased and have to pay the tax on both?

Mr. ROBINSON of Arkansas. You get it in the neck. [Laughter.]

Mr. SHIPSTEAD. We pay a tariff gladly on manufactured products; and we are simply asking to be placed on the same level with manufactured products that have been placed upon a protective basis by many Congresses in the past. We are asking Congress to extend to agriculture the same protection it has given to industry.

I may say to the Senator from Virginia and to the Senator from Louisiana that I have proposed a duty on cotton. They may propose others. Paragraphs 15 and 16 of the tariff act of 1922 deal with cotton.

The pending amendment proposes a duty of 4 cents per pound on cotton with a staple under 1⅜ inches; cotton with a staple of 1⅛ inches, 6 cents a pound; cotton with a staple of 1$\frac{5}{32}$ inches, 7 cents a pound; 1$\frac{3}{16}$ inches, 8 cents a pound; 1$\frac{7}{32}$ inches, 9 cents a pound; 1¼ inches, 10 cents a pound; 1$\frac{5}{16}$ inches, 12 cents a pound; 1⅜ inches, 14 cents a pound; 1½ inches and longer, 15 cents a pound.

In 1922 there were imported of long and short staple cotton 168,181,000 pounds.

In 1925 there were imported of long and short staple cotton 156,680,000 pounds.

In 1927 there were imported of long and short staple cotton 205,609,000 pounds.

Last year there were imported 695,000,000 pounds of long-staple cotton and 130,029,000 pounds of short-staple cotton. The aggregate value of these imports was $45,669,000. These figures are taken from the 1926 Yearbook of the United States Department of Agriculture and from sources within the Department of Commerce. This cotton came from the United Kingdom, Mexico, Peru, British India, China, Egypt, and one or two other countries. Most of the long-staple cotton came from Egypt and Peru, although undoubtedly some short-staple cotton came from both of those countries.

At this time I desire to call attention to the fact that while American short-staple cotton is being forced to find a market in various parts of the world, one of the problems of the southern cotton growers is how to dispose of the lower grades of cotton and the shorter lengths. Increasing quantities of low-grade cotton are coming into this country from China, British India, and Mexico.

With respect to the duties in this amendment proposed to be levied upon long-staple cotton, those duties were carefully worked out by the Mississippi Staple Cotton Growers' Association, and are offered here in the Senate at their request, or the request of their representatives here in Washington. I am informed that this is the largest single agency handling American long-staple cotton in the United States. This association is a cooperative association, and markets approximately 250,000 bales of long-staple cotton every year. It finds itself in competition with the long-staple cotton from Egypt and Peru. With respect to American cotton as well as other farm products, it is high time for us to say that American markets ought to go to the American producer.

(At this point Mr. SHIPSTEAD yielded to Mr. HEFLIN, and, after some debate on the order of proceeding, the point of no quorum was made, and the roll was called.)

Mr. SHIPSTEAD. Mr. President, the next paragraph, 707, deals with milk and cream.

	Present duty	Proposed duty
Fresh milk	2½ cents per gallon	4 cents per gallon.
Sour milk	1 cent per gallon	Do.
Cream	20 cents per gallon	40 cents per gallon.

The imports of milk and cream have been increasing tremendously in past years. The imports of milk since the 2½-cent-per-gallon duty was imposed in 1922 have more than doubled, or an increase from about 2,000,000 gallons in 1922 to over 4,000,000 this past year. Imports of cream have increased during the same period from about 2,000,000 gallons in 1922 to nearly 5,000,000 gallons this past year. The principal reasons for this tremendous increase in imports is that the duty on milk and cream are not properly equalized with the duty on butter. The United States Tariff Commission investigated the cost of producing butter, and as a result of their report to the President the duty was increased from 8 cents to 12 cents per pound. Butter is manufactured from milk and cream. The milk and cream duties, therefore, should have been increased to equalize with the butter duties. A gallon of milk will produce four-tenths of a pound of butter. To equalize, therefore, with a 12-cent duty on butter, the duty on milk should be 4.8 cents per gallon. Likewise, a gallon of cream will produce about 4 pounds of butter, and thus to equalize with the 12-cent tariff on butter, the duty on cream should be 48 cents per gallon. We are proposing 4 cents per gallon on milk and 40 cents per gallon on cream.

The effect of this inequality on tariff rates between milk, cream, and butter is shown in the tremendous increase in imports of cream from Canada and the decrease in butter. Cream, in terms of butter, increased from 1919 to 1926 from an amount of cream which would produce 3,725,000 pounds of butter to an amount of cream in 1926 which would produce 21,496,000 pounds of butter. During the same period the imports of butter from Canada dropped from 9,437,000 pounds to only 339,000 pounds in 1926, the point being that since the duty on cream was less than one-half of what it should be to equalize with the duty on butter, the Canadian producer has shipped his butter to us in the shape of cream instead of butter, and thus has evaded the payment of the higher butter duty. This situation can not be righted by the recent investigation of the United States Tariff Commission under the flexible tariff pro-

vision into the costs of producing milk and cream in the United States and Canada, since tariff rates can only be increased 50 per cent. This inequality must be righted by Congress. The Tariff Commission's preliminary reports indicate that the cost of producing a gallon of cream in Canada is approximately 40 cents less than in the United States and that the cost of producing a gallon of milk in Canada is approximately 4 cents less than in the United States. These facts warrant favorable action by Congress on these proposed increases in the duties on milk and cream.

Imports from Canada of butter and cream

(Expressed in terms of butter)

[Source: Report foreign and domestic commerce]

Year	Cream (gallons)	Butter at 4 pounds per gallon	Butter (pounds)
1919	931,416	3,725,000	9,437,000
1920	1,397,160	5,588,000	9,235,000
1921	2,033,769	8,135,000	2,846,000
1922	2,123,659	8,494,000	2,151,000
1923	3,024,663	12,098,000	5,931,000
1924	4,197,528	16,790,000	2,807,000
1925	5,171,498	20,685,000	3,626,000
1926	5,374,131	21,496,000	339,000
1927	4,843,138		

Paragraph 763—Beans

	Present duty	Proposed duty
Beans, per pound:		
Dry	1¾ cents	2 cents or
Prepared	2 cents	35 per cent

BEANS

The importation of edible beans is fairly well stabilized at about 80,000,000 pounds per year. Some considerable increase occurred in 1927, as compared with 1926, however. The major portion of these beans come from Japan, although considerable quantities are imported from France and Italy. In the case of the former, American producers can hardly compete with Japanese farmers for reasons well known to everyone, and the additional tariff requested will perhaps do no more than prevent any further expansion of imports. It will, however, preserve a further expansion of demand in this country for the benefit of American producers.

Paragraph 769—Potatoes

	Present duty	Proposed duty
Potatoes, per hundredweight	50 cents	75 cents.
Dried, per pound	2¾ cents	3½ cents.
Flour, per pound	2½ cents	3 cents.

The production of potatoes in this country is generously ample, even in years of short crops, to supply all domestic needs. Due to the nature of the crop, costs of production, varying almost directly with the latitude of the country in which the crop is grown, our own producers along the northern boundary have a distinct advantage over the more southern producers. Producers in countries farther north, likewise, have an advantage over those of our domestic producers along our northern border. It is not surprising, therefore, to find that importations of potatoes from Canada have grown rapidly in recent years. In 1922 but little more than 100,000,000 pounds were imported into this country. In 1926 and 1927 the importation had trebled and we were importing something in excess of 300,000,000 pounds. The major part of this importation comes from Canadian sources; in 1926 these were 320,000,000 pounds out of a total 344,000,000 pounds. One other aspect of the importation of potatoes is the fact that our southern producers who are catering to the early spring markets are meeting increasing competition from the Bermudas and the British West India Islands. Of the total imports of 1926, 9,000,000 pounds came from these two sources, and they came on the market directly at a time when our early southern crop was being harvested.

Paragraph 770—Tomatoes

	Present duty	Proposed duty
Tomatoes, per pound	½ cent	1 cent.
Prepared or preserved	15 per cent	40 per cent.

No feature of foreign competition in the vegetable industry is more striking than the growth of the importation of raw tomatoes into this country. During recent years substantial increases have occurred each year. In 1924 about 56,000,000 pounds were imported. This had doubled in the four-year period and in 1927 we imported 132,000,000 pounds. Practically the entire importation of raw tomatoes comes from Mexico, although the British West Indies and Cuba contribute a portion. As in the case of the early potato crop, these importations offer serious competition to the early southern tomato crop. If anything the Mexican crop precedes that of the early Southern States and has at times dominated the price situation in the early tomato crop. Another serious result from the growing importation of Mexican tomatoes, has been the handicap placed upon the hothouse tomato industry in this country. With all of our consuming markets finding a ready supply from this foreign source in the late winter, there has been but little outlet left for "forcing industry" which previously supplied northern markets with winter tomatoes.

In the case of canned tomatoes and tomato paste, the competition comes almost completely from Italy. Importation of tomatoes in cans has developed to an item of nearly 100,000,000 pounds per year, growing in volume four times since 1923. At the same time importation of tomato paste, which is used largely in this country as stock for soups, has approximately doubled, and in 1926 and 1927 something over 15,000,000 pounds were imported.

Summing up this entire vegetable situation, it is a surprising fact that we are to-day importing into this country something above $20,000,000 worth of vegetable products in these three groups alone. If this market could be diverted to domestic producers and a further expansion of demands can be preserved for domestic products, as pointed out earlier in this statement, a significant proportion of agricultural energy can be here utilized and thus automatically reduce the exportable surpluses which exist in other farm products.

Paragraph 768—Onions

	Present duty	Proposed duty
Onions, per pound	1 cent	3 cents.
Garlic, per pound	2 cents	2 cents.

The importation of onions into this country has been gradually increasing from year to year. In 1910–1914 we were importing a little over 60,000,000 pounds per year. The peak of importations was reached in 1925 when 138,000,000 pounds were imported. In 1927 the importation was 128,000,000 pounds. The major importations came from Spain. In 1922 62,000,000 bushels out of a total importation of 103,000,000 bushels came from this country. Egypt in the same year contributed 31,000,000 bushels; Italy 3,500,000 bushels. No other substantial importations are recorded for that year. Data for 1927 itemizing the sources of imports are not yet available.

This growing importation of onions has been giving increasingly serious competition to our domestic producers since a great proportion of domestic onions are produced at some distance, notably Texas, from our domestic markets. In some sections the differential transportation costs are all in favor of the countries from which imports come because of the low water rates which these countries enjoy. (For further information see investigation before Tariff Commission.)

PARAGRAPH 706—MEATS

Meats not specially provided for:	Per cent
Present duty	20
Proposed duty	30

Section 706 provides for an increase from 20 per cent ad valorem to 30 per cent ad valorem on meats not specifically provided for which includes principally canned meats, of which product 22,000,0000 pounds were imported in 1926, and 35,000,000 pounds in 1927. With this vast import of these products into a country producing an exportable surplus of practically all meat products, an increase in the tariff is necessary to preserve our domestic markets for American producers.

If this importation of meat and vegetable products is through a tariff, stopped at the border, or the tariff duty is paid, if there is anything to the argument to which the United States and the Congress of the United States have committed this country as a national policy, these importations of agricultural products should convince Congress, if nothing else can, if a study of the agricultural situation in the United States now can not convince Congress, that a tariff on agricultural products is necessary to equalize the economic condition of agriculture with industry, in addition to the legislation that was passed called the McNary-Haugen bill, and it is not neces-

sary for me to occupy the floor of the Senate on this subject any longer.

I have brought here some statistics, which are taken from the Government's own reports, from the reports of the Tariff Commission and various other agencies of the Government, and I am sure no one will question their reliability.

SUMMARY

There may be some who will make answer to the urgent request of farmers for tariff legislation by this session of Congress by saying that the proper procedure would be to have Executive action as a result of investigations by the United States Tariff Commission under section 315 of the tariff act of 1922. It is true that some modifications are possible.

It is true that the commission under the flexible tariff provision may investigate conditions, but the commission is primarily limited in its investigational work to comparative costs of production. The powers of the President are somewhat broader. However, some of our producer groups have availed themselves of this machinery since 1922; but their experience has been such as to indicate that it is almost futile to hope for early relief under the flexible tariff provision. The reasons for this are obvious. The commission is already a much overburdened body with a relatively small appropriation to do its work. Until recently it has been very much a body divided within itself, according to testimony of commissioners before the Senate committee investigating it.

Moreover, the machinery for these investigations is, of necessity, very complicated, and investigations generally consume from two to two and one-half years before any definite action results. For many other reasons, some of which are itemized below, the relief which agricultural groups can expect through the Tariff Commission has been, is, and will likely continue to be, inadequate and unsatisfactory:

First. In making its investigations, the Tariff Commission is empowered to proceed only on the basis of comparable costs of production in this country and any other countries which their findings indicate to be the principal competing sources of imports. Eminent authorities are in practically unanimous agreement that costs of agricultural production are almost impossible of accurate and definite ascertainment in any industry where production units are small and so widely scattered as in agriculture, and summarization of individual costs into a definite figure which can be set to represent the entire industry, is manifestly unfair to many portions of the industry. Moreover, foreign competition may not affect the industry as a whole, but only a very localized portion of it, such as was evidenced by testimony offered in the milk and cream tariff case reviewed this same year, 1928.

Second. Foreign governments have not always shown a disposition to make available to Tariff Commission investigators data relating to cost productions in their countries so that comparable information is not always available upon which to make adjustments. This is illustrated in the casein case.

Third. Factors have been changing so rapidly in the agricultural situation in recent years as to make the limitation of adjustment inadequate to properly recognize differences in cost of production where it appears to accurately ascertain them. This is particularly well illustrated in the case of the vegetable oils and fats where the interchangeability of one with another is so great that slight shifts in selling prices of one as compared to the others immediately extenuates the sources of raw materials in the soap and oleomargarine industries.

Fourth. The Tariff Commission is empowered only to report on changes in existing schedules. What is more urgently needed is the coordination of the present schedules with any future schedules so that tariffs on one product may have a definite relation to tariffs on other products either related to or interchangeable with each other.

Finally, American farmers ask that domestic markets may be preserved for them. This is but the extension of the protective principle so long utilized in this country for the development and encouragement of manufacturing and industry, and they ask it not only on the basis of differences of cost of production, but on the time-honored American principle of domestic markets for domestic producers and on the preservation of American standards in living.

I claim that the American farmer has not enjoyed that at all under the Fordney-McCumber Act of 1922. At present the tariff is one of many swindles from which the farmer suffers. No one can deny the maladjustment between the economic condition of agriculture and of industry. Congress having refused to lower the schedule on manufactured articles now will have an opportunity to raise agricultural schedules in order that there shall be a more equal parity between the schedules on agricultural products and on manufactured products.

There is nothing in the bill without this amendment up until this time for the American farmer. For many years Congress and political leaders have spoken loudly before election about a willingness to legislate for the farmer. Here is a chance to go on record and give some kind of relief to agriculture now. The farm cooperatives of the United States gathered in Washington in conference a short time ago and unanimously passed a resolution memorializing Congress to give relief to agriculture now through an emergency tariff. Are you going to listen to their plea or slap them as usual.

I may say to the more prosperous sections of the country who are industrialized, who are enjoying the benefits of the protection afforded by the Fordney-McCumber bill, that unless the tariff schedules are equalized to give the farmer the same protection as industry, the time may not be far distant, in fact is soon here, when the farmers of the United States will combine to tear down the high protective tariff that is making the industrial East wealthy and prosperous for those who enjoy the benefits of wealth acquired at the expense of the agricultural sections of the country.

I do not claim that my amendment will be any complete remedy for the agricultural situation.

In discussing the farm relief bill Senators pointed out the various measures that have been passed to help the transportation companies of the country. They pointed out the benefits that have been enjoyed by the manufacturing industries of the country through the high protective schedules of the Fordney-McCumber tariff act, a tariff act building a tariff wall behind which the prices have been raised by the manufacturers and have been paid by the consumer. The shifting in the distribution of wealth shows that there is a gradual drift of wealth from the average class of people to a constantly decreasing number of people in the United States.

I hope that we shall have a record vote on the amendment and I hope it will be agreed to. Here is a chance for those claiming to be friends of the farmer to show their colors.

Mr. McMASTER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WATERMAN in the chair). The absence of a quorum is suggested. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	McMaster	Shipstead
Barkley	Fess	McNary	Shortridge
Bingham	Fletcher	Mayfield	Smoot
Blaine	Gerry	Moses	Steck
Borah	Gillett	Norbeck	Steiwer
Bratton	Greene	Norris	Stephens
Brookhart	Hale	Nye	Swanson
Broussard	Harrison	Oddie	Thomas
Bruce	Hawes	Pine	Tydings
Capper	Hayden	Pittman	Vandenberg
Caraway	Heflin	Reed, Mo.	Walsh, Mass.
Curtis	Johnson	Reed, Pa.	Warren
Cutting	La Follette	Robinson, Ind.	Waterman
Deneen	Locher	Schall	Watson
Dill	McKellar	Sheppard	

Mr. LA FOLLETTE. I desire to announce that the Senator from Montana [Mr. WHEELER] is detained from the Senate because of a death in his family.

The PRESIDING OFFICER. Fifty-nine Senators having answered to their names, a quorum is present.

Mr. PITTMAN. Mr. President, I have proposed two amendments to the pending revenue bill; one dealing with hides and the other with silver. I prepared an argument to present to the Finance Committee, but I ascertained that they determined not to receive any arguments or report upon any tariff amendments. I ask, therefore, that the argument or brief to which I have referred may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

TARIFF ON HIDES AND SILVER

On the calendar day of December 17, 1927, I introduced a proposed amendment to H. R. 1, the revenue bill, now under consideration, providing for a tariff duty on the importation of hides in the form and amounts as was offered in the Senate as an amendment to the tariff act of 1922. I used the exact language of the amendment as proposed to that tariff act because of the large vote it received in the Senate in 1922.

On the legislative day of December 6, being the calendar day of December 9, 1927, I introduced a proposed amendment to H. R. 1, the revenue bill, providing for a tariff duty of 30 cents per ounce on the importation of the silver in ore, bullion, or matte.

These proposed amendments were referred to the Senate Committee on Finance while the pending revenue bill was under consideration by that committee.

I suggested these amendments to the revenue bill at this session for two reasons. In the first place, tariff and other revenue bills must, under the Constitution, originate in the House of Representatives, and therefore the only opportunity of passing tariff legislation at this session of Congress would be through amendments to the pending revenue bill.

In the second place, the Senate, on the 16th day of January, passed a resolution by a vote of 54 to 34 resolving that "Tariff revision should be considered and enacted during the present session of Congress." The resolution as adopted is as follows:

Resolved, That many of the rates in existing tariff schedules are excessive, and that the Senate favors an immediate revision downward of such excessive rates, establishing a closer parity between agriculture and industry, believing it will result to the general benefit of all.

Resolved further, That such tariff revision should be considered and enacted during the present session of Congress; and

Resolved further, That a copy of this resolution be transmitted to the House of Representatives.

I voted for this resolution because I am satisfied that the existing tariff schedules were not enacted with relation to any sound economic policy and in absolute contradiction to the policy and principles enunciated at the time of the establishment of the Tariff Board under the Taft administration and the Tariff Commission under the Wilson administration in support of such legislation, and because I believe that the tariff act of 1922, under which we are operating, is discriminatory against many natural industries of our country and particularly against agricultural and other raw products.

Again, in many instances, the schedules of the tariff act have tended to bring about monopoly in certain industries even if such schedules were not intended or administered for such purpose.

I am sustained in my conclusions with regard to the tariff act by the vote in favor of such resolution by such progressive Republicans as Senators BORAH, BLAINE, BROOKHART, CAPPER, HOWELL, MCMASTER, NORBECK, NORRIS, PINE, and SHIPSTEAD.

The argument in favor of the resolution has been so ably presented by Senator MCMASTER, of South Dakota, the proposer of the resolution, that I am content to quote from his very able speeches in favor of the resolution such portions as meet with my approval and express my attitude in the matter. Senator MCMASTER, on January 9, in discussing the resolution, said:

Mr. President, at the outset I wish to say that there are three principles pertaining to the tariff system which has been advocated by the Republican Party and which may be expressed in the following language:

1. The tariff shall represent the difference in the cost of production at home and the cost of production abroad.

2. If the agricultural class, or any other class, because of conditions imposed by a tariff system, can not obtain a just and proportionate share of national prosperity, then additional compensatory legislation shall be enacted to give to such class its full and proportionate share of national prosperity.

3. Using the language of the statesman, John Sherman, "If the combination (meaning a trust or a monopoly) is aided by our tariff laws, they should promptly be changed, and, if necessary, equal competition with all the world should be invited in the monopolized article."

It may be interesting in this connection to quote from the tariff plank of the Democratic national platform of 1924. In this plank the following declaration is made:

We declare our party's position to be in favor of a tax on commodities entering the customhouses that will permit effective competition, protect against monopoly, and at the same time produce a fair revenue to support the Government.

I freely admit that platform declarations must in the nature of things only be an attempt at a declaration of principles and policies that will govern legislation and the execution and administration of such legislation.

There is no doubt, however, that both great parties have unequivocally declared against any acts, either legislative or executive, that will destroy or interfere with effective competition of one industry with another industry or one enterprise within an industry with any other similar enterprise in the same industry, whether such industries exist within or without the confines of our country.

The following colloquy that took place between Senator MCMASTER and Senator WALSH of Massachusetts during the able address of Senator MCMASTER clearly discloses the purpose of the resolution:

Mr. MCMASTER. This resolution was not introduced merely for the purpose of a tariff revision, but it has a deeper significance than that. Only a few years ago the agricultural population was 60 per cent of our total population. It has since dwindled to 50, then to 40, and now it is only 29 per cent of our total population. As that population dwindles, so does its political power wane and fade; and the hour has come now for the farmer to strike, or else it will be too late.

I want to say to the representatives of the industrial group that the farmers of America are going to wage this fight to a finish; and if the industrial group invites it to its final conclusion it may smash your tariff system, but out of the ruins will arise a new tariff system and other compensatory legislation, which will give economic justice not only to the farmer but to the industrial classes as well.

Mr. WALSH of Massachusetts. Mr. President, I should like to ask the Senator from South Dakota [Mr. MCMASTER] a question, if he will permit me. Would the Senator be willing to have his resolution changed by striking out the word "lowering" and insert the word "revision"; in other words, permit the resolution to favor revision of the tariff schedules rather than lowering of the tariff schedules?

Mr. MCMASTER. I will say to the distinguished Senator from Massachusetts that I do not care to quibble over the words in the resolution so long as there is a distinct understanding and the words express the fact that there shall be a general lowering of tariff schedules. A revision, of course, might mean upward, and it might mean downward.

It is evident that Senator MCMASTER had in mind that the abandonment of agriculture for rural undertakings and employment is rapidly becoming a national catastrophe that concerns not alone the farmer but every citizen of our country.

Senator MCMASTER, in exposing the deception that has been practiced upon the farmers of the country in obtaining their support for the tariff act of 1922, said:

Before entering into a discussion of the pending resolution, it would be well to examine and to inspect a certain nostrum that is being used for the purpose of soothing and allaying this rising tide of discontent among the farmers over these tariff relationships. That nostrum is this: We are informed by those in high places with great assurance that everything the farmer uses in farming is upon the free list, and most of the things that he sells are upon the protected list. In order that we may have a clear and comprehensive idea of those articles upon which the farmer pays a duty, and which are known as the necessities of life, but which he does not use in farming, permit me to read just a partial list: Kitchen and household utensils, stoves, furniture, sheets, pillowcases, mattresses, rugs, carpets, table linen, tableware, clocks, glassware, earthenware, clothing, hosiery, gloves, all wearing apparel, and hundreds of other articles.

It is equally certain that the following articles, which the farmer uses in farming, are also upon a highly protected list:

Scythes, sickles, hammers, saws, scoops, shovels, pitchforks, corn knives, grass hooks, grindstones, pliers, files, drainage tools, machine tools, horseshoes, horseshoe nails, nails, steel wire, galvanized wire, roofing felt, strap leather, paints, brick, tile, baling wire, cast-iron pipe, cream separators valued at $50.

* * * * * * *

There are those who point with great pride to the fact that farm implements are upon the free list. Let us examine the subtle sophistry of that contention. The prices of farm implements are controlled and dominated by a trust that not only controls and dominates the farm-machine market of America but which controls and dominates the farm-machine market of the world. The importations of farm machinery into this country are insignificant. Last year we exported $78,000,000 worth of machinery, and the farm implement is one of the few manufactured products of this country that has been steadily rising in price since the war. A binder costs more money to-day that it did at war peak prices, because the heads of the manufacturing concerns which manufacture farm implements meet in secret and behind closed doors and make up the price list for the ensuing year. Does anybody doubt that statement? Let the record speak. The report of the Federal Trade Commission on the causes of high prices of farm machinery says:

"Practically all important manufacturers of farm implements are members of the National Implement and Vehicle Association, which was formed in 1911 by the union of several existing farm-implement associations.

"Under cover of bringing about uniform cost accounting, uniform terms of sale, and standardization of products the manufacturers who are members of these associations repeatedly advanced prices of farm implements by concerted action during the period 1916 to 1918, inclusive."

What they were doing during that period they were doing before that time and continued to do after that time.

Thus disappears the sophistry of those who would lead the farmer to believe that because his farm implements are upon the free list he has been given a special favor under this law.

* * * * * * *

Mr. BLAINE. Before the Senator leaves the discussion in relation to imported farm machinery I want to call his attention to the fact that the value of agricultural implements manufactured in the United States in 1921 amounted to $334,915,000, while the importations of farm implements—that is, those farm implements which are free of duty—amounted to the insignificant sum of only $2,327,956.

Mr. MCMASTER. But some of those imports might have been reimports of machinery which had been exported by us.

Mr. BLAINE. I want to say to the Senator that any 10 important agricultural counties in any one of the Mississippi Valley agricultural

States would absorb all imported farm implements, which would not have an appreciable effect upon the price of farm implements.

Mr. McMASTER. I think the Senator is quite correct in his conclusion. The figures which he furnishes conclusively show that so far as farm machinery being upon the free list affecting the price in America, it has no effect whatsoever.

Senator McMASTER then proceeds to consider and compare the tariff schedules, for the purpose of showing the discrimination that has been practiced in the tariff act against the farmer and other producers of raw material, and the favoritism that has been shown to certain large manufacturing industries. I quote from his speech:

The law was supposed to establish a copartnership wherein industry and agriculture were to share and share alike. The amazing discrepancies and disparities between the protection afforded agricultural products and the protection afforded industrial products are astounding.

The duty on cattle, 1½ to 2 cents per pound, is approximately 16 per cent of the present market value. The duty on sheep is $2 per head, or about 25 per cent of the present market value. The duty on corn is 15 cents a bushel, or 16 per cent of its market value. The duty on wheat is a tariff of 42 cents a bushel, which is largely inoperative. The duty on horses and mules is 20 per cent of their value. The duty on eggs is 8 cents a dozen, or 25 per cent of their value. The duty on poultry is 3 cents a pound, approximately 10 per cent of its value. The duty on milk is 2½ cents a gallon, or about 5 per cent of its value. The duty on wool is 12 cents per pound, or 30 per cent of its value.

There are innumerable articles of finished steel and iron products with duties ranging from 25 to 45 per cent. The duty on rugs and carpets is from 40 to 55 per cent of their value; on finished cotton and woolen goods from 25 to 55 per cent of their value; on chemicals, oils, paints, and coal-tar products, 25 to 40 per cent; on clothing made of wool, 24 cents a pound and 40 per cent of its value; on white granite, semiporcelain, earthenware, and stoneware, 45 per cent of their value; table and kitchen articles and utensils of glass, 50 to 55 per cent of their value; table, kitchen, bread, and butcher's knives, from 1 to 16 cents each, and in addition thereto 45 per cent of their value. The duty on table and household utensils made of aluminum is 11 cents a pound and 55 per cent of their value. This deadly parallel could be continued indefinitely.

Senator McMASTER then turned his attention to the growth of monopolies under the existing tariff act. He took as an example the Aluminum Co. of America, in which Secretary Mellon is a controlling factor. I will quote the exact language of Senator McMASTER in this behalf as reported in his speech of January 9. It is as follows:

Mr. McMASTER. Let us take up the aluminum schedule.

Mr. WALSH of Montana. The matter of duty on aluminum has been under consideration by the Senate on several occasions since the enactment of the law. The remarks just made by the Senator from Utah [Mr. SMOOT] prompt me to say a word. I am talking not about aluminum ware but I am talking about sheet aluminum, ingot aluminum, of which the Aluminum Co. of America has a complete monopoly and on which there is a duty of 3 cents a pound. Immediately after that rate of duty was established the Aluminum Co. of America increased its price from 21 cents to 25 cents, and to-day the current price is 27 cents.

* * * * * * *

Mr. McMASTER. Speaking of the aluminum schedule, when I remembered the pitiful amount of duties that were afforded the agricultural schedules, and realized the deplorable condition that agriculture was in at that time, I said to myself that if aluminum finished products had a duty of 11 cents a pound and an ad valorem duty of 55 cents per pound the evidence must reveal a frightful condition of the financial affairs of the aluminum industry of America. So I went through the testimony given before the Committee on Finance, but in that testimony I found very little evidence as to the actual financial condition of the aluminum company. I then went back to the hearings held before the House Committee on Ways and Means in 1912, and there we find the representative of the Aluminum Co. of America testifying to the fact that back in 1890 that company was organized with a paid-in capital of $1,500,000, and then we find that in 1912 that company had accumulated a surplus of $28,000,000, and that their capital and surplus had increased to $30,000,000. Then, picking up the thread of the story, I found a letter published in the RECORD during the Senate debates in 1922 showing that that $30,000,000 of capital in 1912 had increased to $131,000,000 in 1922, in addition to the cash dividends which had been paid; and in addition to that the stock value of that company upon the markets at that time amounted to $300,000,000, or it would have sold for that upon the stock exchange.

We have, therefore, a little capital of $1,500,000 during the course of a few years expanding and growing until it has reached $131,000,000.

I want to say to you that when some good farmer's wife out in the Northwest learns that upon an aluminum kitchen utensil of a factory value of $2 she must pay an ad valorem duty of 55 per cent, or $1.10, and 11 cents a pound in addition thereto, making $1.21 upon that aluminum kitchen utensil, and then when that farmer's wife thinks of how she must labor and with patience go out and gather 5 dozen eggs at a market value of 25 cents and transport those 5 dozen eggs to a market 5 or 6 miles away as a tribute to the aluminum industry of America, and when she thinks of the hundreds of dozens of eggs that she has thus contributed to the aluminum industry, and then when she recalls that when her husband goes with a bushel of wheat to the market he must transport that bushel of wheat to the world market and receive what the world will give for the wheat, I want to say that that woman is going to become agitated. But when that woman realizes and is informed that the officials of this aluminum company have opposed and do oppose every effort that is made to give that farmer's wife and her husband an equal share in the national prosperity, that woman is going to act; and you need not be surprised if she with her vote places a stick of dynamite under those aluminum schedules and all other similar schedules, blowing into smithereens that portion of your tariff system which permits of excess profits, which creates a breeding ground for trusts, and harbors and shelters monopoly.

The great Secretary of Agriculture, Mr. Jardine, says that if a woman should do a thing like that she would be an unthinking person. He says only the unthinking would criticize this law or would attempt to change any schedules in it.

That good woman out there in the Northwest may not comprehend the intellectual processes of the great Secretary of Agriculture, but she does comprehend and understand the common sense and the militant Americanism of John Sherman, who said that if there is any article that is monopolized the tariff laws should be lowered, and, if necessary, that monopolized article should be opened to the free competition of the world. John Sherman may not be as great a man as the distinguished Secretary of Agriculture; he may be unthinking; but still there are many who have great respect for the ability of John Sherman.

This tariff compact between the agricultural West and the industrial East has been in existence for a long period of time, and out of this long experience we find the farmer emerging with an 89-cent dollar. During the last 16 years that dollar has reached par only three times. During the last seven years it has ranged all the way from 69 to 89 cents in value; and one of the greatest factors producing that 89-cent dollar is the present tariff system under which we operate.

I want to say to the representatives of this industrial group you can no longer continue preaching to the farmers the doctrine that legislation will not help agriculture to obtain its just and proportionate share of national prosperity.

* * * * * * *

I wish to state here that the farmers of America are going to start to slash and hew their way through the barbed-wire entanglements that bar their pathway; and when they do that they know that their feet are treading upon a pathway of sound economic doctrine.

I will now return to the amendments intended to be proposed by me, which I have hereinbefore referred to. The duty upon hides provided in the amendment introduced by me and intended to be offered is lower than it should be, in my opinion, but realizing the difficulty of obtaining any tariff duty upon hides I adopted the rate as proposed in the Senate in 1922. The benefits of such a duty would be more general in their effect upon the farmers of the United States than any other item of tariff, because practically every farmer, no matter what branch of the agricultural industry he may be engaged in or how large or how small may be his enterprise, generally raises a certain number of cattle. As a matter of fact, this tariff duty would be more beneficial to the small farmer than to the large stock raiser.

Whilst it is true that the value of the hide is to some extend reflected in the price of cattle purchased on hoof by packers, the chief benefit would go to the small farmer who butchers his own cattle and sells the meat and the hide separately.

I do not intend at this time to make an extended argument upon this question. We are all familiar with the fact that the stock-raising industry has suffered as much, if not more, than any other industry since the termination of the war. There were times when the price of hides was so low and the competition was so great from South American countries that it did not pay to skin the carcass of a cow.

The fact that the cattle industry has improved to some extent in the last year does not affect the necessity for such a duty. While the cattle industry has improved, it has not improved to any extent by comparison with other industries, and is constantly subjected to the dangers incident to the dumping of South American meats and hides upon our market. Let me again quote from the speech of the distinguished Senator from South Dakota upon this very subject. In that address he said:

Now, we find appearing again before that committee the representatives of the Livestock Association of America. Mr. E. B. Speller, of Fort Worth, Tex., representing Texas and Southwest Cattle Raisers' Association, appeared before the committee. He made this remarkable

statement, the facts of which are well known to producers of cattle throughout America:

"As to what benefit the tariff on cattle and hides would be to the livestock producers, I see it in this way: We know that in Argentina, Brazil, New Zealand, and other countries they produce livestock, cattle, and sheep in very large quantities. Stock producers of those countries are the big packers of this country. They can throw on our markets at any time they desire enough beef to demoralize our beef market and they can throw upon our market at any time enough mutton to demoralize our mutton market. That is not speculation; that is not what we believe, but it is what we have seen done time and again in the past. We ask for those people who are struggling to try to remain in business, to rehabilitate their business, that they will be given the benefit of the tariff that will take away the danger of having their market destroyed in that way."

Then Mr. Prior, representative of the American Livestock Association, took the stand. In his testimony as to the needs of the cattle industry, he was interrupted by Senator Smoot—

"Senator SMOOT. Mr. Prior, will you tell me briefly just what you want so that I can have it here to refer to quickly?

"Mr. PRIOR. That you enact a duty of 20 per cent ad valorem on all cattle and 20 per cent duty on hides imported into this country."

Did the livestock producers of this country receive an ad valorem duty of 20 per cent upon cattle and a 20 per cent duty upon hides? Oh, no.

Mr. SMOOT. But they would have received it if the Republican Party had been able to control the situation. The duty on hides was defeated here on the floor of the Senate. I have voted for every duty on hides which has been proposed since I have had an opportunity to vote on tariff bills.

Why was the Republican Party unable to control the situation on the floor of the Senate with regard to the proposed tariff duty upon hides? The party had no trouble in controlling the tariff duties upon the manufactured articles which have been referred to by the Senator from South Dakota. The Republican Party had no trouble in providing for a tariff duty on aluminum, which has aided in the creation of a monopoly. The Republican Party was in control of the United States Senate at the time, and, in addition to that, substantially every western democratic Senator voted for such proposed amendment placing a duty upon hides.

Now permit me to turn to my amendment that I introduced and intended to propose to the revenue bill providing for a tariff duty of 30 cents an ounce upon the importation of silver into the United States.

The production of silver in the United States during the calendar year 1926 was 62,718,462 ounces. The importation of silver during the calendar year 1926 as to value was $69,595,936. The average price paid for that silver so imported was $0.624 an ounce, so the total number of ounces imported in 1926 was 111,000,000 ounces plus. The exports of silver from the United States during the calendar year 1926 were 147,000,000 ounces plus.

Now let us see what the domestic consumption of silver was during the fiscal year ending June 30, 1927. I use these figures because I have not the figures for the calendar year 1926. The fiscal year takes in the last half of 1926 and the first half of 1927, and there would be no material difference in the figures as applying to the fiscal year and the calendar year.

There was used for subsidiary coins in that fiscal year $7,622,161 worth of new silver. The average price per ounce paid for the silver was $0.5767. The number of ounces coined from such silver was 13,200,000 ounces. During the calendar year 1926 there was used in the arts new silver to the amount of 29,407,601 ounces. The result of these figures is as follows:

	Ounces
American production	62,718,462
American consumption	42,607,601

So 111,000,000 ounces of foreign silver competed with the 62,000,000 ounces of domestic silver in the local market for 42,607,601 ounces of silver. The price was thus beat down during the calendar year of 1926 to $0.624 per ounce and during the fiscal year ending June 30, 1927, to the price of $0.5767 per ounce.

Testimony was given before the Senate Commission of Gold and Silver Inquiry in 1924 by experts in the silver industry that the actual cost of producing an ounce of silver at that time was 70 cents. The cost at the present time is approximately the same. It means that a mine that produces only silver can not operate, and many mines throughout the mining area have been compelled to close down. The production of silver in the United States would practically vanish if it were not for the fact that silver is found associated with ores that are mined for copper or lead or zinc. As silver is associated with these other metals in the rock, the silver is naturally separated through the process of separating other metals from the rock. So we have some production of silver. It must be also remembered that mines whose ores have been chiefly valuable for their copper or lead or zinc contents have been able to pay a profit in many cases because of the silver content of such ores. When the price of that silver has dropped below a certain point then the profits on such ore has ceased and therefore such copper and lead and zinc mines have been compelled to close down by reason of the low price of silver.

The question arises, What should be the price of silver? Let us take the 13,200,000 ounces of new silver that was purchased by the Treasury Department during the fiscal year ending June 30, 1927, to ascertain its value. The Treasury Department paid for the 13,200,000 ounces $7,622,161, or, in other words, at the rate of $0.5767 an ounce. It manufactured that silver into dimes, quarters, and halves and sold those dimes, quarters, and halves to banks and to commercial houses for the sum of $18,216,000. In other words, the Government purchased the silver for $0.5767 an ounce and sold it to banks and business houses of the country in the form of subsidiary coins at the rate of $1.38 plus an ounce. The result of the transaction was that the Government made on the transaction a profit of $10,593,839. The users of subsidiary coinage made no profit on the low price of silver, and the producer was compelled to accept a loss on his production.

Now, let us see the effect of foreign competition upon the domestic silver market. Outside of the United States most of the silver produced in the world is produced in Mexico. In fact, our importations of silver are chiefly from Mexico. The average wage in the metal mines of the United States is about $5 a day for an eight-hour day for each miner. What are the wages of miners in Mexico?

Northern Sonora, ₱5.27 daily; Chihuahua, ₱4; Coahuila, ₱2.85; Lower California, ₱3.45; Guanajuato, ₱1.66; Jalisco, ₱2.07; Zacatecas, ₱2.88; Hidalgo, ₱3; Oaxaca, ₱1.68; Michoacan, ₱2.10; Guerrero, ₱1.64; and State of Mexico, ₱1.65.

These figures are given in Mexican money, or based upon the peso. The peso has a value at the present time of about 46 cents on the dollar. In northern Sonora most of the mining is copper mining. The silver is chiefly produced in the other States of Mexico. Eliminating northern Sonora, the average daily wage paid the miner in Mexico is 2.45 pesos, which translated into American money means $1.03. Even if we include the wages paid in northern Sonora, it makes very little difference in the figures, as the average daily wage would then be 2.95 pesos, or $1.36.

Now, this cheap Mexican silver is imported into this country free of duty to compete in the local market with American production. The tariff act of 1922 took care of aluminum, lead, and zinc. Here is the provision with regard to lead, being paragraph 392 of the tariff act, which reads as follows:

PAR. 392. Lead-bearing ores and mattes of all kinds, 1½ cents per pound on the lead contained therein: *Provided*, That such duty shall not be applied to the lead contained in copper mattes unless actually recovered: *Provided further*, That on all importations of lead-bearing ores and mattes of all kinds the duties shall be estimated at the port of entry and a bond given in double the amount of such estimated duties for the transportation of the ores or mattes by common carriers bonded for the transportation of appraised or unappraised merchandise to properly equipped sampling or smelting establishments, whether designated as bonded warehouses or otherwise. On the arrival of the ores or mattes at such establishments they shall be sampled according to commercial methods under the supervision of Government officers, who shall be stationed at such establishments, and who shall submit the samples thus obtained to a Government assayer, designated by the Secretary of the Treasury, who shall make a proper assay of the sample and report the result to the proper customs officers, and the import entries shall be liquidated thereon. And the Secretary of the Treasury is authorized to make all necessary regulations to enforce the provisions of this paragraph.

PAR. 393. Lead bullion or base bullion, lead in pigs and bars, lead dross, reclaimed lead, scrap lead, antimonial lead, antimonial scrap lead, type metal, Babbitt metal, solder, all alloys or combinations of lead not specially provided for, 2⅛ cents per pound on the lead contained therein; lead in sheets, pipe, shot, glazier's lead, and lead wire, 2⅝ cents per pound.

A similar provision is made with regard to zinc. I do not contend that foreign ores, bullion, or mat containing silver shall be excluded from entry into this country for the purpose of reduction and refining and the subsequent export of the silver.

I simply ask that the amendment be in exactly the same form as the amendments with regard to lead and zinc. If such amendment with regard to silver were adopted, then there would be at the present time a local market for approximately 68 per cent of American production. Of course, as to the surplus, American producers will have to compete in the market of the world with the production of Mexico and other countries.

The history of the production and consumption of silver in the United States clearly indicates that it will only be a short time when the consumption of silver in this country will equal domestic production.

Mr. DILL. Mr. President, the farmers' organizations of some of the Western States have coined a slogan, "Tariff for all or tariff for none." Early in the present session the Senate passed a resolution expressing its judgment that the tariff rates on manufactured articles used by the farmers should be reduced, but the House of Representatives has failed to heed that resolution. The amendment offered by the Senator from Minnesota [Mr. SHIPSTEAD] proposes to raise the tariff rates upon commodities produced on the farm. Since we are retaining the profiteering tariff rates on the manufactured goods that the farmers must buy, I can find no defense for refusing the farmers adequate tariff rates on the things which they produce. While I would not ordinarily vote for tariff rates as high on some products as is proposed by this amendment, I feel that, under the circumstances, with no chance to reduce the tariff rates on the commodities which the agricultural producer must buy, I should, in justice to him, vote for higher tariff rates on the things which he produces.

The tariff on poultry and eggs is very badly needed by the producers of poultry and eggs on the Pacific coast. They face the competition with the Chinese eggs that are imported there not only in the shell but in frozen condition and in dried form, and are entitled to the increases provided by this amendment.

The producers of cherries, the producers of onions, the producers of milk and butter are all in need of protection if they are to pay the prices which they are compelled to pay for the manufactured goods under the profiteering tariff rates which protect many of them. So, because of the fact that we can not obtain a just revision of the tariff, I believe this amendment, if adopted, would tend to equalize conditions, I believe also that the only way we can bring home to the consuming masses of the great cities of this country the injustice and the unfairness of the profiteering tariff duties on manufactured goods is to give an equally high protection to the producers of farm products in this country. Of course, this would increase the price of farm products to them, just as the tariffs on manufactured products increases the cost of manufactured goods to the farmers. For these reasons, briefly stated, I shall vote for the amendment.

Mr. WALSH of Massachusetts. Mr. President, I present certain statistical information relative to the agricultural products covered by the amendment of the Senator from Minnesota [Mr. SHIPSTEAD].

I ask that the correspondence and tables prepared by the United States Tariff Commission, showing the proposed rate, the present rate, and the percentage of increase of the proposed rate over the present rate; and also tables showing the percentage of imports to total production. I shall not take the time of the Senate to discuss this amendment, for it is inconceivable that such a sweeping increase in tariff duties would be adopted without extensive study and public hearings by a committee of the Senate.

The PRESIDING OFFICER. Without objection, the tables and correspondence will be printed in the RECORD.

The matter referred to is as follows:

UNITED STATES TARIFF COMMISSION,
Washington, May 4, 1928.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

MY DEAR SENATOR WALSH: Receipt is acknowledged of your letter of April 18 requesting certain statistical information relative to the products named in the Shipstead amendment.

Inclosed you will find a table showing, for the products named, the proposed rate, the present rate, and the per cent of increase of the proposed rate over the present rate.

The additional data requested in reference to the per cent of imports compared with the production of these articles during the last three years, and the imports of them since the last tariff law was enacted, are being compiled so far as practicable. In many cases production statistics are not readily available.

Sincerely yours,

JOHN F. BETHUNE, *Secretary.*

SHIPSTEAD AMENDMENT

Comparison of proposed rates with present rates

Product	Proposed rate	Rate under the tariff act of 1922	Actual increase of proposed rate over present rate	Per cent of increase of proposed rate over present rate
Paragraph 85:				
Starch, potato	3 cents per pound	1¾ cents per pound	1¼ cents per pound	71.43
All other starches, n. s. p. f.	1 cent per pound	1 cent per pound		
Paragraph 707:				
Milk, fresh	6½ cents per gallon	2½ cents per gallon	4 cents per gallon	160.00
Milk, sour	3 cents per gallon	1 cent per gallon	2 cents per gallon	200.00
Buttermilk	do	do	do	200.00
Cream	60 cents per gallon	20 cents per gallon	40 cents per gallon	200.00
Paragraph 708:				
Milk, condensed or evaporated, unsweetened	4 cents per pound	1 cent per pound	3 cents per pound	300.00
Milk, condensed or evaporated, sweetened	4½ cents per pound	1½ cents per pound	do	200.00
All other condensed or evaporated milk	4 cents per pound	1⅝ cents per pound	2⅜ cents per pound	190.91
Whole-milk powder	9 cents per pound	3 cents per pound	6 cents per pound	200.00
Cream powder	10 cents per pound	7 cents per pound	3 cents per pound	42.86
Skimmed-milk powder	4 cents per pound	1½ cents per pound	2½ cents per pound	166.67
Malted milk	40 per cent	20 per cent	20 per cent	100.00
Compound or mixtures of or substitutes for milk or cream	do	do	do	100.00
Paragraph 709:				
Butter	16 cents per pound	8 cents per pound	8 cents per pound	100.00
		12 cents per pound [1]	4 cents per pound	33.33
Oleomargarine and other butter substitutes	8 cents per pound	8 cents per pound		
Paragraph 710: Cheese and substitutes therefor	7½ cents per pound but not less than 40 per cent.	5 cents per pound but not less than 25 per cent.	2½ cents per pound 15 per cent.	[2] 50.00
		7½ cents per pound but not less than 37½ per cent. [1]	2½ per cent	[3] 6.67
Paragraph 711:				
Poultry, live	9 cents per pound	3 cents per pound	6 cents per pound	200.00
All other live birds valued at $5 or less each (except bobwhite quail)	50 cents each	50 cents each		
All other live birds valued at more than $5 each	20 per cent	20 per cent		
Paragraph 712:				
Birds, dead, dressed or undressed—				
Poultry	12 cents per pound	6 cents per pound	6 cents per pound	100.00
All other	8 cents per pound	8 cents per pound		
All the foregoing prepared or preserved in any manner, n. s. p. f.	45 per cent	35 per cent	10 per cent	28.57
Paragraph 713:				
Eggs of poultry in the shell	14 cents per dozen	8 cents per dozen	6 cents per dozen	75.00
Whole eggs, egg yolk, and egg albumen, frozen or otherwise prepared or preserved, n. s. p. f.	10 cents per pound	6 cents per pound	4 cents per pound	66.67
Dried whole eggs, dried egg yolk, and dried egg albumen	30 cents per pound	18 cents per pound	12 cents per pound	66.67
Paragraph 723:				
Buckwheat, hulled or unhulled	40 cents per 100 pounds	10 cents per 100 pounds	30 cents per 100 pounds	300.00
Buckwheat flour and grits or groats	One-half of 1 cent per pound.	One-half of 1 cent per pound.		

[1] By presidential proclamation, under section 315 of the tariff act of 1922.
[2] Specific.
[3] Ad valorem.

SHIPSTEAD AMENDMENT—continued

Comparison of proposed rates with present rates—Continued

Product	Proposed rate	Rate under the tariff act of 1922	Actual increase of proposed rate over present rate	Per cent of increase of proposed rate over present rate
Paragraph 760:				
Oil-bearing seeds and materials—				
Castor beans	One-half of 1 cent per pound.	One-half of 1 cent per pound.		
Flaxseed	80 cents per bushel of 56 pounds.	40 cents per bushel of 56 pounds.	40 cents per bushel of 56 pounds.	100.00
Copra (par. 1626 under the tariff act of 1922)	3 cents per pound	Free	3 cents per pound	300.00
Poppy seed	32 cents per 100 pounds	32 cents per 100 pounds		
Sunflower seed	2 cents per pound	2 cents per pound		
Apricot kernels	3 cents per pound	3 cents per pound		
Peach kernels	do	do		
Soya beans	One-half of 1 cent per pound.	One-half of 1 cent per pound.		
Cottonseed	One-third of 1 cent per pound.	One-third of 1 cent per pound.		
Paragraph 761:

Paragraph 777:				
Hay	$6 per ton	$4 per ton	$2 per ton	50.00
Straw	$1 per ton	$1 per ton		

UNITED STATES TARIFF COMMISSION,
Washington, May 10, 1928.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

MY DEAR SENATOR WALSH: In further reference to your letter of April 18, we have the pleasure of transmitting herewith in tabular form some of the information requested in the second paragraph of your letter.

This information is contained in two tables inclosed herewith. One of these tables shows for the five years from 1923 to 1927, inclusive, the value of imports of products included within the provisions of the amendment offered by Senator SHIPSTEAD on April 16, 1928, to the revenue bill. The second table shows for the year 1926 imports compared with production of the articles or products covered by the same amendment. The data in this second table are not readily available and some time has been required for their accumulation. We are therefore transmitting them for the one year which has been completed and, if you so desire, will complete for the years, say, 1924 and 1925, as rapidly as may be practicable. It would be almost impossible to get any adequate or satisfactory production figures as yet for 1927.

The imports indicated in the tables herewith inclosed are in each case net imports—that is, imports for consumption duty paid.

Very truly yours, JOHN F. BETHUNE, *Secretary.*

Value of imports of products included in the Shipstead amendment
(During period of tariff act of 1922)

Products	1923	1924	1925	1926	1927
Paragraph 85:					
Starch, potato	$352,161	$378,985	$418,670	$599,038	$1,006,173
All other starches, n. s. p. f.	32,116	71,596	59,880	136,869	98,854
Paragraph 707:					
Milk, fresh	866,425	818,960	1,225,061	1,245,392	748,166
Milk, sour, and buttermilk	17,060	8,626	17,002	6,852	31,095
Cream	4,744,955	6,141,231	7,591,025	8,050,912	7,606,071
Paragraph 708:					
Milk, condensed or evaporated, unsweetened	324,107	142,371	66,748	129,227	176,689
Milk, condensed or evaporated, sweetened	588,464	691,387	471,565	36,263	22,999
All other condensed or evaporated milk	51,912	8,653	210,438	218,315	86,258
Whole milk powder	128,263	155,074	151,190	355,541	488,767
Cream powder	410			985	3,435
Skimmed-milk powder	245,822	84,771	352,601	322,180	236,430
Malted milk, compounds or mixtures of, or substitutes for milk or cream	7,799	6,497	930	3,057	330
Paragraph 709: Butter and substitutes	7,543,698	6,958,372	2,553,219	2,389,387	2,873,177
Paragraph 710:					
Cheese and substitutes therefor—					
At specific rate	963,515	1,142,673	905,543	2,875,531	3,140,219
At ad valorem rate	18,948,647	16,644,912	16,654,048	17,500,368	21,560,298
Paragraph 711:					
Poultry, live	276,304	337,139	440,451	472,162	388,164
All other live birds valued at $5 or less each	526,083	579,299	710,847	857,367	938,125
Bobwhite quail				15,818	17,690
All other live birds valued at more than $5 each	14,635	27,618	32,205	47,773	48,912
Paragraph 712:					
Birds, dead, dressed or undressed—					
Poultry	497,711	428,900	865,036	2,003,322	994,245
All other	91,244	222,548	56,419	49,447	116,680
All the foregoing, prepared or preserved in any manner, n. s. p. f.	296,230	309,318	240,270	299,418	363,440
Paragraph 713:					
Eggs of poultry in the shell	109,564	108,821	137,190	103,665	74,808
Whole eggs, egg yolks, and egg albumen, frozen or otherwise prepared, n. s. p. f.	974,065	1,820,354	3,312,419	3,071,283	1,205,434
Whole eggs, egg yolks, and egg albumen dried	2,620,244	3,856,631	5,085,625	4,970,093	3,963,833
Paragraph 723:					
Buckwheat, hulled or unhulled	252,275	346,193	306,137	74,632	51,866
Buckwheat, flour, and grits or groats	2,822	2,220	2,139	3,615	2,537

UNITED STATES TARIFF COMMISSION, STATISTICAL DIVISION, *May, 1928*

The PRESIDING OFFICER. The question is on the amendment of the Senator from Minnesota [Mr. SHIPSTEAD].

Mr. REED of Missouri. Let the amendment be stated.

Mr. LA FOLLETTE. The amendment has already been stated. It is an exceedingly long amendment. It took 10 or 15 minutes to read it in the first instance.

Mr. REED of Missouri. I simply wanted the amendment stated by its title or catchwords. I did not mean to have it all read.

The PRESIDING OFFICER. The amendment will be stated, as suggested by the Senator from Missouri.

The principal legislative clerk proceeded to summarize the amendment.

Mr. REED of Missouri. That is sufficient.

Mr. President, I simply wish to say a word about this amendment. I appreciate the spirit in which the Senator from Minnesota has offered it; but the difficulty with this and similar measures is that they relate to articles which we export rather than import. It is true that in the fluctuations of business, and because of peculiar conditions, a few products of every conceivable kind come into the United States, but they can have no material effect when a much larger volume of the same articles is moving out of the United States in response to world conditions.

The wheat farmer can not get relief by tariff duties upon wheat when he must sell his surplus of wheat—and a very large surplus—in the markets of the world in competition. All these efforts to benefit the farmer—or nearly all of them—by levying tariff duties upon commodities which are not imported in sufficient quantities really to affect prices are vain proposals.

One trouble with the farmer—not all of the troubles that affect him—is that he can not buy in the market at the same level where he sells. What is being attempted is to bring the farmer up to the same level of protection that the manufacturer receives, but the two positions are diametrically opposite. The manufacturer wants to keep goods out of this country that otherwise would come in. This amendment proposes to keep out agricultural products that will not come in. So the farmer can not, by having tariff rates upon commodities that will not come in and which he must export, reach the price level of the manufacturer who can keep out articles that would come in, that would be imported, and then, having succeeded in keeping those possible imports out, be able to organize combinations back of the tariff wall and control the prices in the domestic market. That is the trouble with all of these schemes.

The Senator from Minnesota as much as any man in this Chamber wants to help the farmer, and wants to equalize these artificial inequalities, but it can not be done by an increase of tariff duties upon farm products because we ship them out instead of importing them.

There are instances, of course, where small quantities come in, as I said. I asked the Senator about one of these items. I think he stated that 20,000,000 dogen eggs had been shipped in from China; but the production in this country in 1895 or 1896 was 1,800,000,000 cases, so that the importation was an infinitesimal amount, and our exportations were very much larger.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. MCNARY in the chair). Does the Senator from Missouri yield to the Senator from Idaho?

Mr. REED of Missouri. I do.

Mr. BORAH. With reference to eggs particularly, if there were no tariff at all upon eggs does the Senator think that the importation would be limited to 20,000,000?

Mr. REED of Missouri. Yes; I do. I do not think it amounts to anything.

Speaking broadly, and leaving out the question of particular items, I do not think this is any way to get a result. I think there is a way to get a substantial result, and that is to confer upon the farmer the right to purchase in the market where he sells, and that is the purpose of an amendment that I propose to press when this amendment is out of the way.

So if I cast my vote against this amendment, it is done for the considerations I have just named. It is not the way to help the American farmer in any practical way. It is a subterfuge that is being put upon the American farmer by those who in some instances—I do not apply that to anyone in this Chamber—want to perpetuate the present tariff iniquities.

As long as the farmer can be led to believe that he will receive aid in this way, he can still be induced to vote for a party or a policy which means the maintenance of the present outrageous tariff. It is time that he was given to understand that the trouble with him is that he buys on one market level—a level promoted, created, and enforced by law—and that he must sell upon an entirely different and lower level, one that is created by productive and economic conditions.

I am perfectly willing to vote; but, Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. The question is upon agreeing to the amendment proposed by the Senator from Minnesota [Mr. SHIPSTEAD].

Mr. REED of Missouri and Mr. SHIPSTEAD called for the yeas and nays.

The yeas and nays were not ordered.

Mr. SHIPSTEAD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	Mayfield	Smoot
Barkley	Fletcher	Moses	Steck
Bingham	Gerry	Norbeck	Steiwer
Blaine	Greene	Norris	Stephens
Borah	Hale	Nye	Swanson
Bratton	Harrison	Oddie	Thomas
Brookhart	Hawes	Pine	Tydings
Bruce	Hayden	Pittman	Vandenberg
Capper	Heflin	Reed, Mo.	Walsh, Mass.
Caraway	Johnson	Reed, Pa.	Walsh, Mont.
Curtis	La Follette	Robinson, Ind.	Warren
Cutting	Locher	Schall	Waterman
Deneen	McKellar	Sheppard	Watson
Dill	McMaster	Shipstead	
Edge	McNary	Shortridge	

The VICE PRESIDENT. Fifty-eight Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment offered by the Senator from Minnesota [Mr. SHIPSTEAD].

Mr. REED of Missouri. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. CURTIS (when his name was called). I transfer my pair with the Senator from Arkansas [Mr. ROBINSON] to the Senator from Washington [Mr. JONES], and will vote. I vote "nay."

Mr. SWANSON (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WARREN (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. OVERMAN]. I do not see him in the Chamber, and I therefore withhold my vote.

Mr. WATSON (when his name was called). I transfer my pair with the Senator from North Carolina [Mr. SMITH] to the Senator from Massachusetts [Mr. GILLETT], and will vote. I vote "nay."

Mr. LAFOLLETTE (when Mr. WHEELER's name was called). I desire to announce that the junior Senator from Montana

[Mr. WHEELER] is absent because of a death in his family. He has a general pair with the junior Senator from Idaho [Mr. GOODING].

The roll call was concluded.

Mr. REED of Pennsylvania (after having voted in the negative). I have a general pair with the Senator from Delaware [Mr. BAYARD]. I am advised that if he were present he would vote as I have voted. Therefore I will allow my vote to stand.

Mr. BINGHAM. I have a general pair with the Senator from Wyoming [Mr. KENDRICK]. Not knowing how he would vote, I withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. CARAWAY. My colleague [Mr. ROBINSON of Arkansas] is unavoidably absent. If he were present, he would vote "nay."

Mr. EDGE (after having voted in the negative). I have a temporary pair with the Senator from New York [Mr. COPELAND]; but I am informed that if the Senator from New York were present he would vote as I have voted, so I will permit my vote to stand.

Mr. HARRISON. The senior Senator from North Carolina [Mr. SIMMONS] is necessarily detained. If present, he would vote "nay."

Mr. BROUSSARD. My colleague [Mr. RANSDELL] is unavoidably absent.

Mr. HEFLIN. My colleague [Mr. BLACK] is unavoidably absent. While he favors an increase in the rates on some of the things listed in this amendment, feeling as I do on that subject, he would vote "nay" if present.

Mr. SWANSON. My colleague [Mr. GLASS] has been momentarily called from the Chamber. He is paired against this amendment. If present and at liberty to vote, he would vote "nay."

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from New Hampshire [Mr. KEYES] with the Senator from New Jersey [Mr. EDWARDS];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from West Virginia [Mr. GOFF] with the Senator from Tennessee [Mr. TYSON];

The Senator from Rhode Island [Mr. METCALF] with the Senator from North Carolina [Mr. SIMMONS];

The Senator from Michigan [Mr. COUZENS] with the Senator from Georgia [Mr. HARRIS];

The Senator from Kentucky [Mr. SACKETT] with the Senator from West Virginia [Mr. NEELY];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Virginia [Mr. GLASS]; and

The Senator from Colorado [Mr. PHIPPS] with the Senator from Georgia [Mr. GEORGE].

The result was announced—yeas 13, nays 44, as follows:

YEAS—13

Borah	La Follette	Nye	Vandenberg
Brookhart	McMaster	Pittman	
Capper	Norbeck	Schall	
Dill	Norris	Shipstead	

NAYS—44

Ashurst	Fess	McKellar	Smoot
Barkley	Fletcher	McNary	Steck
Blaine	Gerry	Mayfield	Steiwer
Bratton	Greene	Moses	Stephens
Broussard	Hale	Oddie	Swanson
Bruce	Harrison	Pine	Thomas
Caraway	Hawes	Reed, Mo.	Tydings
Curtis	Hayden	Reed, Pa.	Walsh, Mass.
Cutting	Heflin	Robinson, Ind.	Walsh, Mont.
Deneen	Johnson	Sheppard	Waterman
Edge	Locher	Shortridge	Watson

NOT VOTING—37

Bayard	George	Keyes	Simmons
Bingham	Gillett	King	Smith
Black	Glass	McLean	Trammell
Blease	Goff	Metcalf	Tyson
Copeland	Gooding	Neely	Wagner
Couzens	Gould	Overman	Warren
Dale	Harris	Phipps	Wheeler
du Pont	Howell	Ransdell	
Edwards	Jones	Robinson, Ark.	
Frazier	Kendrick	Sackett	

So Mr. SHIPSTEAD'S amendment was rejected.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 11134) to authorize appropriations for construction at military posts, and for other purposes; requested a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. MORIN, Mr. JAMES, and Mr. MCSWAIN were appointed managers on the part of the House at the conference.

CONSTRUCTION AT MILITARY POSTS

The Vice President laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 11134) to authorize appropriations for construction at military posts, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. REED of Pennsylvania. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Vice President appointed Mr. REED of Pennsylvania, Mr. GREENE, and Mr. FLETCHER conferees on the part of the Senate.

PULLMAN SURCHARGE

Mr. MAYFIELD. I ask to have a short editorial on the Pullman surcharge appearing in the Washington Post this morning printed in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

PULLMAN TICKET GRAFT

Elimination of the Pullman surcharge is proposed in a bill sponsored by Senator ROBINSON of Arkansas, which has been approved by the Senate Committee on Interstate Commerce. The measure proposes an amendment to the interstate commerce act making it unlawful for a railroad to charge a higher rate than that applying in a day coach for travel on parlor or sleeping cars. The only exception is made where the railroads themselves own sleeping cars.

The Pullman surcharge is a relic of the war days and should have been abolished long ago. No valid reason exists why the railroads should get this particular form of graft from Pullman passengers. The railroads provide nothing in the way of service in return for this charge. The occupant of a Pullman does not arrive at his destination a single minute before his fellow travelers in the day coaches. If anything, the use of Pullmans benefits the railroads by increasing travel and spreading the traffic load out over the 24 hours of the day.

The Pullman Co., which provides the additional comforts, has never benefited from the surcharge. In order to keep its own skirts clean it is specifically stated on every Pullman ticket that the additional 50 per cent is paid to the railroads. The carriers have resisted successfully the abolition of this excess payment. It is easy to understand that they do not wish to surrender a source of revenue which is 100 per cent profit. The rates which the Pullman Co. charges are all that may be justly exacted. Anything above that amount is a polite form of highway robbery.

TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. MCMASTER. Mr. President, on behalf of my colleague, the senior Senator from South Dakota [Mr. NORBECK], I offer the following amendment.

The VICE PRESIDENT. The clerk will read.

The CHIEF CLERK. On page 206, after line 2, insert a new section as follows:

SEC. 441. TAX ON CALL LOANS.

Schedule A of Title VIII of the revenue act of 1926 is amended by adding at the end thereof a new subdivision to read as follows:

"8. Call loans: Drafts, checks, promissory notes, or other evidences of indebtedness, payable at sight or on demand, evidencing a loan made by any person engaged in the business of making call loans, 5 cents if the face value is not more than $100, and for each $100, or fractional part thereof, of face value, 5 cents."

Mr. MCMASTER. Mr. President, if this amendment were adopted on the promissory notes or other evidence of indebtedness given for transactions in speculation on the stock exchange, the tax would amount to $2,000,000 a year, providing those promissory notes or other evidences of indebtedness should run for a period of one year, but if they should mature in 60 days, on an average, the amendment would raise revenue of $12,000,000 a year.

There has been a wild orgy of speculation on the stock exchange during the last two or three years. Hundreds of millions of dollars of profits have been made, and to anyone who is familiar with the past history of the stock exchange, while many hundreds of those millions of dollars to-day are in the hands of what are called the "lambs," it will be a period of only a short time when there is going to be a frightful shakedown

in the stock market and in the value of stocks, and those profits again are going to revert to the rich and be safely stored in their strong boxes.

Mr. President, I can not see any reason why a tax of 5 cents per $100, and for each hundred dollars in addition thereto, should not be levied in reference to this speculation. There are other amendments pending here in the interest of the farmers that are going to require a certain amount of money to be refunded from the Treasury of the United States, and the adoption of this amendment will add $12,000,000 a year to those revenues. It would therefore seem to me that the amendment ought to be adopted.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. HARRISON. Mr. President, I offer the following amendment.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. The Senator from Mississippi offers the following amendment, on page 243, after line 21, to insert a new section as follows:

SEC. 706. Commissioners of the Court of Claims: The salary of the commissioners of the Court of Claims provided for in the act entitled "An act to authorize the appointment of commissioners by the Court of Claims and to prescribe their powers and compensation," approved February 24, 1925, as continued in force by Public Resolution 4, Seventieth Congress, approved January 11, 1928, shall after the date of the enactment of this act be at the rate of $7,500 a year.

Mr. SMOOT. I have no objection to the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McMASTER. Mr. President, I offer another amendment.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. On page 245, after line 16, insert the following:

SEC. —. AMENDMENT TO TARIFF ACT OF 1922.

The tariff act of 1922 is amended by adding after section 313 thereof a new section, to read as follows:

"SEC. 313a. The Secretary of Agriculture is authorized and directed to designate primary markets for each of the following: Grains, cotton, livestock, tobacco, fruits, nuts, vegetables, and any other agricultural product which the Secretary of Agriculture deems advisable. After the designation of any primary market for any such product any producer or shipper of such product shipping for export any quantity thereof through a primary market shall be paid a compensatory allowance equal to the transportation charges paid on such product from the primary market to the most convenient port. Such allowances shall be paid out of the revenue from customs, and a sum sufficient for such purpose is hereby reserved, set aside, and appropriated from the revenue from customs for each fiscal year in a special fund to be administered by the Secretary of Agriculture to carry out the provisions of this section. Such allowances shall be determined and paid under such rules and regulations, and upon the filing of such notices, bonds, bills of lading, and other evidence of payment of transportation charges and exportation as the Secretary of Agriculture may prescribe. In designating primary markets for any agricultural product under this section the Secretary of Agriculture shall, so far as practicable, avoid the creation of discrimination against other primary markets for such product."

Mr. McMASTER. Mr. President, this amendment, with two or three other amendments which are pending at the present time, are what might be called "farmer amendments," amendments which are calculated to confer distinct advantages and benefits upon the farmers of this country. What seems strange to me is that farmer amendments, and the discussion of those farmer amendments, and the disposition of those amendments, must be crowded into a few hours on Saturday night, disposed of by 12 o'clock to-night, and discussed in the stifling atmosphere of the Senate, which prevails after the intense heat of the day. Such apparently is the treatment that is accorded to the farmers of the country and matters in which they are interested.

The purport of this amendment is to incorporate into the tariff act of 1922 the principle of the drawback system, conferring distinct advantages and benefits upon the farmers of this country. The privilege of the drawback system has been enjoyed for many years by the manufacturers of this country.

The drawback system permits the manufacturers to import raw materials from foreign lands free of duty, provided such raw materials are converted into manufactured products that are intended for export, notwithstanding the fact that those raw materials may be produced and are produced upon American farms.

The drawback system does more than that. It permits manufacturers to import manufactured articles from foreign lands free of duty, provided a finishing process is applied to those manufactured products, and they are intended for export. Thus, when the manufacturer desires to compete in foreign lands in competition with cheap foreign materials and cheap labor, under the drawback system he is permitted to import into this country those raw materials and cheap European labor which may be used in the manufacture of products which are intended for export.

When the farmers of America, however, produce a surplus crop, they must produce that surplus crop under the high costs of American production. There is no drawback system for the farmer. There is no drawback system which permits him to import cheap European material. There is no drawback system which permits him to import cheap labor to be used in the production of his surplus crop. When the American packer cures meat for export, he may import salt free of duty for that purpose, but when the farmers feed that same salt to their cattle, and those cattle are intended for export, the farmers must pay a duty upon that salt.

Do Senators think they can impose this one-sided Machiavellian system upon the farmers of this Nation without a protest? Do they think the farmers of this country are going to submit to that injustice like dumb beasts in the field?

It is inconceivable that any legislative body would inflict that injustice upon the agricultural interests of the country. Those who contend for the retention of this policy without further application must of necessity use sophistry to sustain their contention. Of course, it is claimed that the principle applies to all alike, but everyone knows that a farmer can not import a half-grown bale of cotton or a half-grown bushel of wheat or corn and apply a finishing process here, because God Almighty produces cotton and corn and wheat, but it requires high-priced materials and high-priced labor to aid Providence in the production of that cotton and corn and wheat. Therefore the principle of the drawback system can not be applied to the farmer in the same manner that it can be applied to the manufacturer. But the good to be obtained, the advantages to be derived through the rebating of freight rates to the farmers of the country are identical in principle with the advantages that are derived by the manufacturers through the drawback system.

The principle of the drawback system is fair and just when applied impartially and fairly to all classes alike, but it is a vicious and reprehensible and indefensible policy when its benefits are reserved for only a favored few. The total production of agricultural products amounts to about $12,000,000 a year, but each one of those dollars is worth only 89 cents. Therefore $1,200,000 has been exacted from the farmer through tariff juggling and through other governmental devices.

The adoption of this amendment, the purpose of which is to rebate freight rates upon agricultural products from the primary markets to the seaports upon such agricultural products as are intended for export, will amount to about $100,000,000 a year to be rebated out of the tariff revenues of the country. That $100,000,000, which would be rebated to the farmers under that system, is simply rebating to them the taxes which, through tariff duties, they have paid upon the necessities of life which have been employed in the production of that surplus crop.

It is contended that this is a tax bill to which under no circumstances must an amendment of this nature be attached. No matter if the amendment would confer great advantage upon the great mass and proportion of our population, still there shall be no farmer amendment attached to the bill. It is true that those who pay income taxes pay campaign bills. The farmers do not pay campaign bills. What a glorious record it is for us to go before the farmers of the country and point with pride to the fact that we have reduced the taxes upon corporations; that we have reduced the taxes upon those whose incomes range from $30,000 to $5,000,000 a year; that some Senators have voted to reduce taxes upon high-priced theater tickets, upon prize fights, and upon country clubs. But what shall we say to the 4,000,000 farmers in the country whose annual income is only $235 after they have paid their running expenses? The tax bill does not affect one-tenth of 1 per cent of the farmers of the country save only in the rebating of the excise taxes upon automobiles.

It is intimated, of course, that if any amendment like this were to be attached to the bill it would receive the presidential veto. If the amendment will confer a distinct advantage upon a population of 30,000,000 in this country, then why not pass the bill over the presidential veto? Do those of us who come from the agricultural section, who represent the cotton growers and the

grain and wheat growers, the producers of livestock and the producers of vegetables and fruit, think that that great class of the population will be more pleased at our voting for the reduction of taxes upon corporations and more pleased at our voting for the reduction of taxes upon those whose incomes range from $20,000 to $5,000,000 a year, that they will be more pleased at our voting to reduce the taxes on high-priced theater tickets and prize fights and country clubs, than they would be pleased at our voting to rebate freight rates upon their export agricultural products, thereby establishing for them the principle of the draw-back system? If so, then, of course, we should vote against this amendment. To give to the manufacturers of the country the privilege of the draw-back system and deny to the farmers of the country is unfair, un-American, and unpatriotic.

Surely no one can claim that the amendment is economically unsound. If it is economically unsound then the whole principle of the drawback system is economically unsound. If it is economically sound to pass laws permitting the railroads to increase their freight rates to earn between 5 and 6 per cent upon their investment, is it economically unsound to rebate certain freight rates to the farmers in order that they may earn a greater income upon their investment? As I said, the rebates under the amendment are the rebates that the farmers of the Nation have paid into the Treasury of the United States through the tariff upon those necessities of life which they have actually employed in producing the surplus crop.

Mr. President, in examining the bill, if we analyze it carefully, we will find in reality that all we have done is to rebate about $200,000,000 of profits to those who are in very comfortable circumstances. The only thing that we have done in the bill for the farmers of the country is to rebate the taxes upon that poor, pitiful little income of $235 a year.

I say to you, Mr. President, that it is reported that the President is going to veto the McNary-Haugen bill. That means that Congress is to adjourn without enacting one single piece of legislation for the advantage of the agricultural interests of the country. I say to you that if that is going to be the case, bitterness is going to be written into the hearts and the minds of the farmers of the country, and words can not describe the brutal indifference of the Federal Government toward that great agricultural population of 30,000,000 people who believe in our form of government, who in the past and who to-day constitute the backbone of our civilization. I say to you that if the Senate passes a tax bill which includes practically $200,000,000 of rebates of profits to those who are in comfortable circumstances, and does nothing for the farmers, then every farmer in America ought to have this tax bill framed and hung on the walls of his home. Above the bill he should put the inscription, "In God we trust," and below it he should put the words "Dedicated to the memory of the conservers of the public weal. Dedicated to the memory of those who voted to exempt our family income of $235 a year from all taxation."

The PRESIDING OFFICER (Mr. LA FOLLETTE in the chair). The question is on the amendment proposed by the Senator from South Dakota.

Mr. McMASTER. I demand the yeas and nays.

The yeas and nays were not ordered.

Mr. BLAINE. Mr. President, I suggest the absence of a quorum.

Mr. CURTIS. Mr. President, I ask if there has been any business transacted since we last had a quorum call.

Mr. McMASTER. Yes. I have introduced two amendments since then.

Mr. FESS. And there has been a vote.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	McNary	Smith
Barkley	Fletcher	Mayfield	Smoot
Bingham	Gerry	Moses	Steck
Blaine	Glass	Norbeck	Steiwer
Borah	Greene	Nye	Stephens
Bratton	Hale	Oddie	Swanson
Brookhart	Harrison	Pine	Thomas
Broussard	Hawes	Pittman	Tydings
Bruce	Hayden	Reed, Pa.	Vandenberg
Capper	Heflin	Robinson, Ark.	Wagner
Curtis	Johnson	Robinson, Ind.	Walsh, Mass.
Cutting	La Follette	Schall	Walsh, Mont.
Deneen	Locher	Sheppard	Warren
Dill	McKellar	Shipstead	Waterman
Edge	McMaster	Shortridge	Watson

The PRESIDING OFFICER. Sixty Senators having responded to their names, there is a quorum present. The question is on the amendment proposed by the Senator from South Dakota [Mr. McMASTER].

Mr. McMASTER. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. BINGHAM (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. KENDRICK]. In his absence I withhold my vote.

Mr. GLASS (when his name was called). I have a general pair with the senior Senator from Connecticut [Mr. McLEAN]. Not knowing how he would vote on this question, I withhold my vote. If I were permitted to vote, I should vote "nay."

Mr. REED of Pennsylvania (when his name was called). I have a general pair with the Senator from Delaware [Mr. BAYARD], but I am advised that if present he would vote "nay." Therefore, I am free to vote, and I vote "nay."

Mr. SWANSON (when his name was called). I have a general pair with the senior Senator from Washington [Mr. JONES], who is unavoidably detained from the Senate. I transfer that pair to the junior Senator from Utah [Mr. KING], and vote "nay."

Mr. WARREN (when his name was called). I again announce my pair and withhold my vote.

The roll call was concluded.

Mr. GLASS. I am advised that my pair the senior Senator from Connecticut [Mr. McLEAN] if present would vote as I intend to vote on this question. Therefore, I am at liberty to vote, and vote "nay."

Mr. EDGE. I have a general pair with the Senator from New York [Mr. COPELAND]. I am advised, however, that if present he would vote as I propose to vote, and I vote "nay."

Mr. CURTIS. I desire to announce that the Senator from Nebraska [Mr. NORRIS] is necessarily absent attending a committee meeting.

I also desire to announce the following general pairs:

The Senator from Colorado [Mr. PHIPPS] with the Senator from Georgia [Mr. GEORGE];

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from New Hampshire [Mr. KEYES] with the Senator from New Jersey [Mr. EDWARDS];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from West Virginia [Mr. GOFF] with the Senator from Tennessee [Mr. TYSON];

The Senator from Massachusetts [Mr. GILLETT] with the Senator from Alabama [Mr. BLACK];

The Senator from Michigan [Mr. COUZENS] with the Senator from Georgia [Mr. HARRIS];

The Senator from Kentucky [Mr. SACKETT] with the Senator from West Virginia [Mr. NEELY]; and

The Senator from Rhode Island [Mr. METCALF] with the Senator from North Carolina [Mr. SIMMONS].

The result was announced—yeas 14, nays 44, as follows:

YEAS—14

Blaine	Johnson	Norbeck	Shipstead
Brookhart	La Follette	Nye	Steck
Capper	McMaster	Pittman	
Dill	McNary	Schall	

NAYS—44

Ashurst	Fletcher	Mayfield	Steiwer
Barkley	Gerry	Moses	Stephens
Borah	Glass	Oddie	Swanson
Bratton	Greene	Pine	Thomas
Broussard	Hale	Reed, Pa.	Tydings
Bruce	Harrison	Robinson, Ark.	Vandenberg
Curtis	Hawes	Robinson, Ind.	Wagner
Cutting	Hayden	Sheppard	Walsh, Mass.
Deneen	Heflin	Shortridge	Walsh, Mont.
Edge	Locher	Smith	Waterman
Fess	McKellar	Smoot	Watson

NOT VOTING—36

Bayard	Edwards	Jones	Phipps
Bingham	Frazier	Kendrick	Ransdell
Black	George	Keyes	Reed, Mo.
Blease	Gillett	King	Sackett
Caraway	Goff	McLean	Simmons
Copeland	Gooding	Metcalf	Trammell
Couzens	Gould	Neely	Tyson
Dale	Harris	Norris	Warren
du Pont	Howell	Overman	Wheeler

So Mr. McMASTER's amendment was rejected.

Mr. FLETCHER. Mr. President, I offer the amendment, which I ask the clerk to read.

The VICE PRESIDENT. The amendment proposed by the Senator from Florida will be stated.

The CHIEF CLERK. On page 194, after line 26, it is proposed to insert a new section, as follows:

SEC. 405. SUITS TO ENJOIN COLLECTION OF ESTATE TAX.

Notwithstanding the provisions of section 3224 of the Revised Statutes (prohibiting suits to enjoin the collection of an internal-revenue tax) the executor of any decedent dying before or after the enactment of this act may institute and maintain a suit in the proper district court for the purpose of enjoining collection of the estate tax imposed by Title III of the revenue act of 1926, if such suit is brought solely on the ground that such tax is invalid because of the provisions of section 301 (b) thereof (providing for credit against the Federal estate tax of the amount of State inheritance taxes paid, up to 80 per cent of the amount of the Federal tax), and if the State of which such decedent was a resident joins as a petitioner; and for the purposes of such suit such State shall be considered as a proper party.

Mr. SMOOT. Mr. President, I hope the amendment will not be agreed to.

Mr. FLETCHER. Mr. President, I am not going to discuss the amendment further than to observe that in the case of Florida against Mellon the Supreme Court held that there was no authority to file the petition to test the validity of this provision of the estate tax law. One ground on which that decision was made was that we have a statute which forbids any suit being brought to enjoin the collection of a tax. This amendment merely allows a State and the executor of an estate to come into court and raise the question as to whether we are passing laws that are constitutional or not. That is all. I ask for a vote on the amendment.

Mr. SMOOT. Mr. President, it simply overrules the decision of the Supreme Court.

Mr. FLETCHER. It authorizes what the Supreme Court says we can not do now; this amendment authorizes that to be done. It merely permits the State and an executor to raise that question to determine whether or not we are passing laws that are contrary to the Constitution.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Florida.

The amendment was rejected.

Mr. FLETCHER. I offer another amendment.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 243, after line 6, it is proposed to insert the following as a new section:

SEC. —. REAL ESTATE SALES IN 1924–1926.

If in the return of a taxpayer for the taxable year 1924, 1925, or 1926 there was included income from the sale of real estate, and part of the consideration received upon such sale consisted of evidences of indebtedness, and it appears that the fair market value of such evidences of indebtedness, on the date of the enactment of this act, is less than 50 per cent of their face value, then, at the request of the taxpayer, the tax for such taxable year shall be redetermined, so far as relating to the income from such sale, substituting the fair market value of such evidences of indebtedness on the date of the enactment of this act for their fair market value on the date of their receipt by the taxpayer.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Florida.

The amendment was rejected.

Mr. FLETCHER. I offer another amendment.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 231, it is proposed to strike out lines 11 to 16, inclusive, and in lieu thereof to insert:

(3) May issue a certificate of partial discharge of any part of the property subject to the lien if there is furnished to the collector and accepted by him a bond, in an amount not to exceed double the fair market value of the taxpayer's interest at the date of said bond, in such part or portion of the whole property sought to be released, such bond to be conditioned upon the payment, within the time therein prescribed, of the full amount of the taxpayer's interest in the property released, toward the satisfaction of the outstanding tax liability, and to be in accordance with such requirements relating to terms, conditions, and form of the bond and sureties thereon as may be specified in the regulations.

On page 232, after line 6, add subdivision reading as follows:

"(g) All bonds authorized by this section shall run in favor of the United States of America."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Florida.

Mr. REED of Missouri. Mr. President, who is the author of the amendment?

The VICE PRESIDENT. The amendment was offered by the Senator from Florida.

Mr. REED of Missouri. I should like to have it explained.

Mr. FLETCHER. The amendment provides for what is practically being done now by regulation. The regulations of the department permit a taxpayer to satisfy a portion of a tax lien that may exist on a large area of property and allow him to sell a portion of the property, upon paying a certain amount of the tax and giving bond for the remainder; that is all. It is practically carrying out the regulation which is being enforced, only it is being done by regulation rather than by law.

Mr. SMOOT. Mr. President, briefly stated—and I shall not take more than a minute of the time of the Senate—the amendment imposes upon the collector the tremendous and impossible task of determining a taxpayer's interest in the property which is sought to be released from the tax lien. Not only must the collector appraise the value of the land, but he must determine the validity of all outstanding mortgages and other liens, which is an impossibility.

Mr. REED of Missouri. I am interested in knowing as to that. The Senator from Florida states that it is now being done, while the Senator from Utah states that it is an impossibility. That presents an interesting question as to just how the impossible is now being done, and of course I am bound to credit both these distinguished Senators with absolute adherence to the truth.

Mr. SMOOT. I think the Senator from Florida is mistaken when he says it is being done by the department. I will say that there are a number of cases that have gone to the courts, so that the question is being brought to attention, but, so far as the department is concerned, it is not acting in the way suggested.

Mr. REED of Missouri. If it is impossible to be done, how could a court do it?

Mr. SMOOT. I am not saying what the court will decide, but I do not think that the court will decide that it can be done.

Mr. REED of Missouri. If it can not be done, why is it that the department is now trying to do it. I should like to hear further from the Senator from Florida.

Mr. SMOOT. I am quite sure that the department is not even trying to do it.

Mr. FLETCHER. It is a case where the Senator from Utah and the Senator from Florida are not so far apart when all the circumstances are understood. His view is that it is impossible to carry out a law like this for the reasons he has mentioned; but undoubtedly in particular cases, in individual cases, they have been doing this very thing.

Of course, if it were put on the statute books, it might involve some cases where it would be very difficult to do it, and if it went into a formal regulation it might be impossible to do it. I do not know but that I made a mistake when I said they were doing by regulation what I am asking to have go into the law; but they are doing it in practice in individual cases. I am quite sure of that.

Mr. SMOOT. Not in the department.

Mr. FLETCHER. They are permitting a thing like this, and there is nothing wrong about it:

If a man has a tract of land, for instance, perhaps divided into lots, and an assessment is made against him, all of his property is covered by a lien for his tax that is spread on the records. This whole tract of land is covered by the lien. He can not sell a lot of it. He can not sell an acre of it. The tax is more than he is able to pay; but he can sell a portion of the area that he owns and get enough money to pay a good portion of the tax. This would permit him to pay on account of the tax. It would let the collector go and value it—and he does that now; he makes an estimate of the value of property when he wants the tax collected, and gives time on a portion of the tax—but that does not release the property. Therefore, the owner can not dispose of the property because there is a blanket lien over all of it. This would permit him to sell a lot, and, out of the proceeds of that lot, pay on account of the tax and then take a bond for the rest of the tax.

Mr. SMOOT. The departments have gone this far in a case like that: They are perfectly willing to release the lien, providing a bond is given for the whole of it, and then they can sell it as they please; but the bond is given before the lien is released.

Mr. FLETCHER. Yes.

Mr. SMOOT. Why should it be otherwise?

Mr. FLETCHER. I think that is what this amendment does.

Mr. BORAH. Mr. President, I want to ask the Senator from Missouri if the explanation is satisfactory to him?

Mr. REED of Missouri. Mr. President, I have listened to this colloquy, these explanations, and I am still absolutely in the dark.

I am first told that a thing is impossible. I am next told that it is being done. As nearly as I can make out, it is being done in individual cases, but not according to an established rule. Then, are we to understand from that that the depart-

ment has a rule which it applies in certain cases but does not apply in others?

Mr. SMOOT. No one said that, Mr. President.

Mr. REED of Missouri. Is that the understanding of the Senator from Utah?

Mr. SMOOT. The Senator said that it is the practice in the department, wherever there has been a lien upon the whole of the property, to release the lien upon the property providing the owner of the property would give a bond outside, so that the department would be perfectly secure.

Mr. REED of Missouri. Why should not that be enacted into a rule of law?

Mr. SMOOT. The bill provides for that now.

Mr. REED of Missouri. Do I understand that the Senator from Florida, in this amendment, has provided for something that is already in the bill?

Mr. SMOOT. No; I did not say that. I said it provided for just such a situation as the Senator was stating and asking why we did not do it.

Mr. REED of Missouri. I did not ask about any particular situation. I asked about a general condition, which I understand now to be that there is no rule of law, but that the decision in these cases varies according to the opinion or desire of some departmental clerk.

Mr. SMOOT. No, Mr. President; the bill now pending before the Senate provides that wherever a bond is given for the full amount of the tax upon the property, there is no lien upon the property.

Mr. REED of Missouri. Can the Senator call my attention to that provision?

Mr. SMOOT. Yes; if the Senator will look on page 231, lines 11 to 16, inclusive, he will find the law; and then the amendment to that is the amendment that the Senator from Florida is offering.

Mr. BORAH. Mr. President, this raises a very serious question. It seems to me it had better go over until Monday.

Mr. SMOOT. No; next month.

Mr. REED of Missouri. We do not know what calamity may happen to the country in the next month.

Mr. FLETCHER. Of course, anyone who does not want any reduction of taxes at all is perfectly willing to have the bill go over. I can understand that.

Mr. REED of Missouri. Mr. President, I am talking seriously about this matter. It did assume a rather humorous aspect a few minutes ago, when we were told that a thing was impossible, and yet was being done. Now the Senator says that there is a radical difference between the proposition contained in the amendment and the text of the bill.

Mr. SMOOT. There is.

Mr. REED of Missouri. Yet a moment ago he told us that the proposition contained in the amendment was already in the bill.

Mr. SMOOT. Oh, no; the Senator is mistaken. I never said that. I said that the proposition the Senator stated was not in the bill, but that the proposition I stated was in the bill, and I told the Senator where it was in the bill.

Mr. REED of Missouri. Then the proposition of the Senator from Utah is different from the proposition of the Senator from Florida?

Mr. SMOOT. Certainly.

Mr. REED of Missouri. Then the proposition of the Senator from Florida does add something to the bill?

Mr. SMOOT. It adds something to the bill.

Mr. REED of Missouri. And yet the argument of the Senator from Utah a moment ago was that the amendment was useless, because it was already in the bill.

Mr. SMOOT. Oh, no; the Senator is mistaken again. The Senator from Utah never made such a statement. The Senator from Utah said he was opposed to the amendment proposed by the Senator from Florida.

Mr. REED of Missouri. And did not the Senator from Utah give as a reason that the cases cited by the Senator from Florida were already covered by the provisions of the bill?

Mr. SMOOT. No; I did not. I never made any such statement.

Mr. REED of Missouri. What was the statement of the Senator? I am asking seriously. I understood the Senator that way.

Mr. SMOOT. I said that the case of the Senator from Missouri, not the Senator from Florida, was in the bill.

Mr. REED of Missouri. I did not put any case.

Mr. SMOOT. The Senator does not think he did, but I know that he did.

Mr. REED of Missouri. That I put a case?

Mr. SMOOT. Yes; the Senator put a case himself. Then I said that what the Senator said, in answer I think to the Senator from Florida, was in the bill, on such and such a page of the bill.

Mr. REED of Missouri. That is so lucid that I think I ought to understand it, but I confess that I can not. I am sure that is a very clear statement of the situation.

Mr. President, I do not care to discuss this matter; but I should like to know now what the difference is between the proposition of the Senator from Florida and the proposition contained in the bill. If the Senator from Florida can make that plain, I shall be obliged to him.

Mr. FLETCHER. Mr. President, there is a provision in the bill for the issuing of certificates of discharge, as referred to by the Senator from Utah.

Mr. REED of Missouri. Will the Senator cite me to that provision?

Mr. FLETCHER. It is on page 231.

Mr. REED of Missouri. I thank the Senator.

Mr. SMOOT. Paragraphs (2) and (3), on page 231.

Mr. FLETCHER. Yes; paragraphs (2) and (3).

Paragraph (2) provides that the collector—

> May issue a certificate of release of the lien if there is furnished to the collector and accepted by him a bond that is conditioned upon the payment of the amount assessed, together with all interest in respect thereof, within the time prescribed by law (including any extension of such time), and that is in accordance with such requirements relating to terms, conditions, and form of the bond and sureties thereon, as may be specified in the regulations.

That enables him to make a regulation that covers some conditions that are unknown now. We do not know what the regulations will be.

Paragraph (3) provides that the collector—

> May issue a certificate of partial discharge of any part of the property subject to the lien if the collector finds that the fair market value of that part of such property remaining subject to the lien is at least double the amount of the liability remaining unsatisfied in respect of such tax and the amount of all prior liens upon such property.

So the very thing that the Senator from Utah, as I understood him, said was impossible, because it would put enormous burdens upon the collector, is the thing that he can do here. He has to go out and appraise this property and find the market value of it now, under the law.

I have provided, in the proposed amendment, on page 231, to strike out lines 11 to 16. That is the third provision. The third provision is:

> May issue a certificate of partial discharge of any part of the property subject to the lien if the collector finds that the fair market value of that part of such property—

Under the law now he has to go and look at the property, and ascertain the fair market value—

> remaining subject to the lien is at least double the amount of the liability remaining unsatisfied in respect of such tax and the amount of all prior liens upon such property.

He has to do that now. That is the main responsibility and the principal amount of work that the collector must do.

I say, instead of that, that the collector—

> May issue a certificate of partial discharge of any part of the property subject to the lien if there is furnished to the collector and accepted by him a bond, in an amount not to exceed double the fair market value of the taxpayer's interest at the date of said bond, in such part or portion of the whole property sought to be released, such bond to be conditioned upon the payment, within the time therein prescribed, of the full amount of the taxpayer's interest in the property released, toward the satisfaction of the outstanding tax liability, and to be in accordance with such requirements relating to terms, conditions, and form of the bond and sureties thereon, as may be specified in the regulations.

I think that is quite different. Then I provide in the next paragraph that these bonds shall read, instead of to the collector, to the United States of America. That is the kind of bond that we ought to be taking, it seems to me, instead of a bond to the collector. These bonds ought to read to the United States; and I think this would simplify matters, and would be better than paragraph (3) as set out in the bill.

The Senator thinks not; apparently the department thinks not. I can not see that it imposes any greater responsibility or any more work upon the collector than the paragraph as it is written in the bill. It permits the giving of this bond. Instead of being the fair market value of that part of the property remaining subject to the lien, it is the fair market value of the interest of the owner in the property.

Mr. SMOOT. Nobody knows what that is.

SEVERAL SENATORS. Vote! Vote!

Mr. REED of Missouri. Mr. President, I do not think we need to get impatient about these matters at all. I take it that this is an important provision or it would not be presented in this bill by the department. It is perfectly manifest to me that the proposal made by the Senator from Florida is infinitely to be preferred over the one contained in the bill, and that the two provisions are radically different.

Of course, there are two purposes to be served. One is to permit the owner of the property to transfer a part of that property without being compelled to pay the taxes upon every portion of it. The second proposition is to secure to the Government payment of the taxes which may be due. The scheme devised in the plan of the department is a very cumbersome one, and I do not think would be accepted as a good plan by any business organization. A certificate of release of the lien may be furnished and accepted.

Mr. FLETCHER. Paragraph 3, page 231, is the one I want to strike out, and to insert this instead.

Mr. REED of Missouri. It reads:

> May issue a certificate of partial discharge of any part of the property subject to the lien if the collector finds that the fair market value of that part of such property remaining subject to the lien is at least double the amount of the liability remaining unsatisfied in respect of such tax.

The fair market value of that part of the property remaining subject to a lien is not the true test. The interest of the taxpayer is the true measure, and we are asked to adopt a false yardstick to begin with. The amendment which is proposed by the Senator from Florida recognizes the fact that the only thing that can be held by the Federal Government is the interest of the taxpayer in the property, and provides the very simple method of escaping all of the circumlocution, all of the appraisements, all of the investigations, if the taxpayer will furnish a good bond in double the amount of tax liability upon the particular property to be released, in which case the property may be released from the tax.

It seems to me that the proposition made by the distinguished Senator from Florida, who is known to be not only a faithful legislator but a learned lawyer, is very much better than this plan that has been devised down in the department by some clerks, who probably could not obtain a position at home and hence came down to Washington to rule and govern the rest of mankind.

I do not think that for the sake of saving a few moments of time, or a few hours of time, for the sake of driving this bill through to a speedy adjournment, there is any necessity of slumming over the importance of this work. Perhaps the most important bill that has been before this Congress is this very bill.

We were told initially that a very large amount of tax reduction was to be accomplished, and that it would be so accomplished as to relieve the burdens now resting upon industry, commerce, and individuals. We have witnessed a spectacle here which, to my mind, is an almost complete repudiation of the promises made. We have taken the tax off amusements and have kept the tax upon industry, upon labor, and the products thereof. We have cut down the proposed reduction, and so diminished it by taking the tax off luxuries—for amusements are luxuries—that there will be no substantial reduction upon the incomes of the people who earn their incomes by hard labor, labor of brain and labor of brawn.

When we get through with this wonderful tax reduction it will be found that whereas we have an enormous surplus no real benefit has come to the overburdened taxpayers of the land. Even a man who wants to go to a moving-picture show will not escape the payment of this tax that has been ostensibly remitted, for the moving-picture magnate in every case charges all the traffic will bear, and he will simply continue to add the tax to the admission price.

The purchaser of an automobile will just buy an automobile a little bit quicker, and likely enough the tax reduction will find its sepulchre in a failure to reduce prices in the future where otherwise they might be reduced, because the automobile manufacturer charges all the traffic will bear, and yet permit him to market his machine.

So I might go through with this bill. It has afforded no genuine relief, and when the slight reductions are distributed through incomes they will be so small as to be inconsequential. The people who need tax reduction are the great mass of men and women who have earned a small competence by long years of industry, and who, by toil and labor, have reached the point where their income of each year comes within the brackets of the tax law, where they are heavily burdened by virtue of an onerous and unjust tax.

This tax reduction is a farce, a laughable, humorous sort of farce. It does not exactly provoke an explosion; it produces a smile of contempt. We were told in the first instance that we must not reduce taxes because the income would not permit more than a very slight reduction. As has been well said on this floor, as was well said by the Senator from Mississippi, we have been told that for seven long years. In every instance the Treasury Department has been found to be the poorest guesser that has ever walked across the face of this good earth. If the Treasury was not guessing honestly, then it was deliberately misleading. A little mistake of three or four hundred million dollars has never occasioned to the Treasury Department any embarrassment or produced the slightest faint auroral dawn of a blush. It has repeated its statements the next year, and when they were found to be false and misleading it has continued to repeat them in the year following.

For seven long years this performance has proceeded, and now we find a Congress which, instead of lifting the burden from the shoulders of industry, the great producing class, takes the tax off the things that are not necessary, lifts the tax from those expenditures that are made voluntarily, with the absolute certainty that in the end about all the people will have will be an increase in the returns of these amusement magnates. Against them, of course, I have no antipathy. They want to make money, and there is no criticism for that reason. Of course, if the tax can be lifted from that industry, and they can pocket that which the Government has heretofore received, they will be entirely content, and no one can blame them. The blame must rest upon those whose duty it is to guide the interests of the people of the United States.

I am reminded, as I speak of this discrimination, of an instance presented during the late war. We were levying taxes for the purpose of carrying on the war. We laid our tribute upon everything, it seemed to me, if not in heaven above, at least in the earth beneath. We taxed the clothing that the people wore.

We taxed all of their amusements. We did not forget the children. We taxed the doll which the little infant hugged to its bosom. We taxed the rattle with which it amused itself. We forgot nothing except chewing gum. The reason why we exempted chewing gum was because Mr. Wrigley was interested in the chewing-gum business and was the financial agent of the Republican Party.

Mr. SMOOT. That was during the Democratic administration.

Mr. REED of Missouri. Yes; but it was done by Republican management. Wrigley was exempted. Chewing gum was exempted when everything else was taxed. Nobody could tell why. I protested at the time for the sake of the preservation of the teeth of the American people, for chewing gum has destroyed more teeth than all the dentists who have been born since the first pair of forceps was invented. I did not understand why the delicate sensibilities and sympathies of great statesmen were aroused for this particularly obnoxious thing that Wrigley was selling. But when I read the list of campaign contributions before and after, I understood then that gum was exempt because the proprietor of the iniquitous production had paid his money not to the Federal Government, but to the same committee that Mr. Will Hays afterwards enriched by contributions which were the price of the soul of a Cabinet member and a bribe that brought about the transfer of the treasure lands of the people of the United States.

We pile up these surpluses and, as I showed the other day, to the astonishment of my distinguished friend and illustrious namesake, the Senator from Pennsylvania [Mr. REED], some of the bonds of the Government had been redeemed at 114, at a premium of $14 on each $100. The records, I do not hesitate to state, will show that at about the same time or shortly before or thereafter we had been issuing certificates of the Government and borrowing money. Who got the graft? I am not inclined to make wild charges, but I say that for the Federal Government to go into the public market and pay $114 for a $100 obligation was never justified by any honest reason.

That is the department which dictated these tax laws. I have no confidence in it. I have no confidence in any department presided over by any man who receives $50,000 of bonds corruptly obtained and secreted the fact. I have no confidence in any department headed by a man who gathered together the political harpies of his State, welded them into a political machine and contributed the first $75,000 of a corruption fund, headed the organization that raised $2,000,000 to purchase the nomination for the office of United States Senator, headed the organization that bought 50,000 men and women in the city of Pittsburgh alone on election day at $10 a head, who witnessed them standing in line for six days as they

approached the pay window to receive the price of their citizenship and honor, and who then proclaimed that the collection of this money was as honorable as the collection of money for a church of Almighty God. I have no confidence in that department of our Government. Its assertion of a fact amounts to no more to me than the ashes blown by the idle winds.

When they write a provision of law and send it here and tell us to swallow it, when we are told that we can stay here until 12 o'clock midnight, that we can continue here through the early hours of the Sabbath morning, that we must take this bill without discussion because it comes from this sacred source, I protest.

What is the reason why the amendment offered by the Senator from Florida [Mr. FLETCHER] is not a good amendment? No one has given us a reason for destroying it. It may not be the most crucial or vital, but the distinguished Senator from Utah [Mr. SMOOT] waves the wand and says, "It does not bear the brand of the Treasury. The real name is not blown in the bottle. Somebody from the Treasury had another scheme, and that settles it." Well, it does not settle it for me. The Treasury has been indicted upon this floor by the Senator from Michigan [Mr. COUZENS], indicted in language which demanded a repudiation and which, if charged against an honest man, would have brought an indignant reply and an insistence upon investigation. But the Treasury head paid no more attention outwardly than he would to the appeals of a debtor for a little more time to pay a note.

I do not know whether the people will ever arouse themselves to conditions. Robbery may be so long reduced to a system and so long suffered that the people come to regard it as one of the adversities of life which must be endured, and so reach out their hands to invite the gyves. But, as I look back through some of the pages of history and turn to view the great multitude of honest folk who make up the population of our land, I can explain the anomaly of their nonresistance in only one way. They are so honest and sincere themselves that they find it difficult to believe their representatives can be guilty of base betrayal.

Witness if you please, this spectacle: A tariff tax is levied for war purposes away back in Civil War times. It is recognized as a burden and, along with other taxes, it is expected that relief will come when the expenses of the war have ended. But, when the war is over and all other tax burdens are gradually being reduced, there come forward certain industries and state that they demand the retention of the tariff in order that they may increase their profits.

The American people are lulled into a condition of nonresistance by the argument that this tax will remain but a few years while the infant industries are gathering strength in their limbs and power to withstand the opposition from abroad; but the youngest of those infants is now 75 years of age and they stand astride this continent. They are the most powerful organizations of the earth. They have planted themselves in foreign countries; they have established industries in the very lands against which they claim they are unable to compete. They manufacture and ship abroad billions of dollars worth of goods and sell them in foreign lands for a great deal less than they sell to the American people.

They told us that they desired this tariff in order to protect the American workman against the wicked pauper labor of Europe. Then for 20 years, with that protestation upon their lips, they hired agents to comb the slums of Europe and to import here under contract people who were little better than slaves and to drive them into the factories to take the places of the American workmen whom they had asserted they desired to protect. They told us they would create a home market for all agricultural products, but the farmer to-day must, as he did 50 years ago, find a market for his great surplus in other lands, and the price of that surplus fixes the price at home.

They told us they would compete with each other as soon as they became strong, and that there would be a reduction in prices because of competition, but they did not compete; they conspired and combined and fixed an arbitrary price which they extorted from a people denied the privilege of buying in the markets of the world, although they must there sell their products. They gathered to themselves immense fortunes, and they perpetuated their law of graft and privilege by great contributions to keep in office the party that had bartered its soul to them for these campaign contributions.

Let me give the few Members of the Senate who remain here an illustration, not out of the realms of fancy but from the cold archives in which the facts are recorded. The Payne-Aldrich law was devised by gentlemen who desired to serve these interests. It was before the Finance Committee of the Senate for consideration. The American Woolen Manufacturers' Association sent its own private secretary to the city of Washington and had him employed secretly by the Finance Committee of the Senate. In that capacity he reported to his employers in New England, the manufacturers, daily. From them he daily, and even hourly, received his orders and instructions. They told him exactly how much tariff they demanded should be levied upon each article made of wool, and he reported back the efforts he was making to control the committee. From day to day that went on; and I produced before a committee of this body the original letters and telegrams. At the end of this performance he was able to report to the men who had sent him here that he had caused to be written into the bill every single demand and desire they had expressed.

They took him home, gave him a great banquet, eulogized him for his magnificent work in behalf of this private industry, raised his salary, and enshrined him among their saints.

Here was an instance of a private concern, through its own agent, illegally and infamously employed, writing into the laws of this land the particular amount of loot it desired to levy upon the entire American public. There is no more damnable chapter written of the secret machinations of government than this thing I have told of. Yet we have grown so accustomed to robbery that the recital does not arrest the interest of the Members of the Senate, although it may drive the distinguished chairman of the committee to bury his nose in a newspaper.

Mr. ASHURST. Mr. President——

Mr. REED of Missouri. I yield to the Senator from Arizona.

Mr. ASHURST. I do not wish to take the Senator from Missouri from the floor, but I must propound a question to the Senator from Utah [Mr. SMOOT], who is in charge of this pending bill, the tax bill. I have consumed no time in the discussion of this tax bill; certain circumstances for obvious reasons have precluded me from attempting any discussion of the bill; but I have offered an amendment to this bill which was printed in the RECORD of yesterday's proceedings. It is an exact rescript of House bill 13039, which passed the House of Representatives on the 16th of last April and which is the World War veterans' bill. It embraces subjects important to the World War veterans.

I am anxious that this veterans' bill should pass, and I can not omit to use every care and precision to see that the bill shall pass the Senate, and if the distinguished Senator who is now in charge of the tax bill, the chairman of the Senate Committee on Finance, will give me satisfactory assurances that as soon as this tax bill shall be passed through the Senate he will call his committee together and will consider this House bill to which I have referred and the hospital bill and favorably report them, I am then willing to withdraw this amendment, because I have faith in his promises. If, however, the Senator is unable to give me such assurance that these veterans' bills will be reported at an early date, I shall insist upon my amendment going into this bill. I make this inquiry in the interest of time.

Mr. SMOOT. All I can say is that just as soon as the pending bill shall be out of the way I am going to call the Finance Committee together for the purpose of considering World War veterans' legislation, and among the bills that will be considered by the committee is the one to which the Senator has referred. I can not, however, say what the committee will do.

Mr. ASHURST. I realize, of course, that I could not, and that the Senator from Utah could not commit nor bind his committee; but I fear I might be guilty of remissness if I permitted this opportunity to pass without securing some expression on these two veterans' bills, and for this reason: Thousands of World War veterans from other States came into Arizona to seek relief from that dread scourge, tuberculosis. These afflicted veterans came into Arizona from every State in this Union, and my colleague and I and the Representatives from Arizona are and should be alert to secure relief for them; indeed, we are really carrying the burden of other States in this vital matter. If the Senator from Utah will call the Committee on Finance together and that committee will consider and report the veterans' bills, I shall be content not to offer them as amendments to the pending tax bill.

Mr. SMOOT. I will assure the Senator that I shall call the committee together, and I will assure him that his bill will be considered by the committee.

Mr. ASHURST. With the permission of the Senator from Missouri, I desire to make a statement, so that this subject may be thoroughly understood.

My amendment proposes about as follows:

Section 1 of the bill amends section 19 of the act by establishing a uniform statute of limitations for suits on contracts of insurance. At the present time, under the conformity act, the statutes of limitations of the various States apply. The periods of limitations in these statutes vary from 3 to 20 years, the average being 6 years. The committee believes that the average statute of limitation, namely, six years, should be

applied to these suits, with an additional year from the date of passage of this amendatory act for all suits. In computing the limitation period it is provided that the time from the date of filing claim for insurance benefits to the date of disallowance of the claim by the director shall not be included. Further, it is provided that the period of limitation shall not run during the time a person is under legal disability or is rated as incompetent by the bureau, and that such person shall have three years from date of removal of disability in which to sue. The amended section is made applicable to suits which have been heretofore rejected under the State statutes of limitations, pending suits, as well as future suits.

Section 2 of the bill, as amended, amends section 21, subdivision 2, of the World War veterans' act, to provide authority in the Director of the United States Veterans' Bureau for the payment of the expenses of original appointments of guardians, curators, and conservators of incompetent beneficiaries. At the present time the law provides for the payment of such expenses incident to any investigation or court proceeding for the removal of a guardian, curator, or conservator, who has not properly executed the duties of his trust, and the appointment of a new guardian, curator, or conservator, but it is not within the power of the director to secure the appointment of such a fiduciary in the first instance and pay the expenses of the proceeding. The cost of this item is estimated at $164,000 per annum.

Section 3 of the bill, as amended, amends section 28 of the World War veterans' act, as amended, under which authority now exists for waiver of recovery of payments from any beneficiary, who, in the judgment of the director, is without fault on his part and where, in the judgment of the director, such recovery would defeat the purpose of benefits otherwise authorized or would be against equity and good conscience, by the substitution of the word "person" for the word "beneficiary." Under the language of this section at present, as construed by the bureau and the Comptroller General, the word "beneficiary" does not comprehend persons who are not legal beneficiaries under the statute; for instance, in a case where, upon the evidence submitted, the bureau has paid insurance or compensation to a person who was alleged to be the widow of an ex-service man, but who, it subsequently appears, was not his widow for the reason that prior to her marriage to the veteran he was married to another woman from whom he was not legally divorced, recovery can not be waived because the woman, not being the veteran's widow, could legally not be a beneficiary within the meaning of that term as used in the World War veterans' act, as amended. It is obviously unjust, however, to attempt to recover in such a case, both the payee and the bureau being without fault. The substitution of the word "person" for the word "beneficiary" will cure the situation. There is also included language to the effect that no disbursing officer shall be held liable for any amount paid by him to any person where the recovery of such amount is waived under this section. The purpose of this amendment is to relieve disbursing officers from liability on their bonds through payments made through error, the recovery of which has been waived under authority of section 28. At the present time the Comptroller General holds that, although recovery may be waived in so far as the payee is concerned, the disbursing officer is nevertheless liable under his bond for the erroneous disbursement. It is estimated that this would result in an immediate cost of $218,500 and an annual cost of $84,850 thereafter.

Section 4 of the bill, as amended, adds a new section to Title I of the World War veterans' act, as amended, to be known as section 34, and to provide authority for the director to enter into private contracts for the services of translators without regard to the civil service laws and the classification act of 1923. This amendment is included to enable the director to procure the translation of correspondence from foreign languages into English, and English into foreign languages, by the piece, where the foreign language is unusual and so seldom encountered in the administration of the bureau as not to justify the hiring of a translator on a salary basis. The director has found it economical to enter into private contracts in such cases rather than to employ a regular translator at an annual salary, but the Comptroller General has held that such procedure is unauthorized. It is estimated that the cost of this provision would be approximately $300. The amendment is made retroactive to June 7, 1924, in order that translators who have heretofore performed services under this arrangement may be reimbursed.

Section 5 of the bill, as amended, adds a new section to Title I of the World War veterans' act, 1924, as amended, to be known as section 35, and to provide authority for the purchase of transcripts of the record, including the evidence of trial of litigated cases. This section is recommended by the bureau in order that in the future review of such cases the bureau would have the full benefit of evidence adduced at trial. It is estimated that this amendment will cost approximately $10,000 per year.

Section 6 of the bill amends section 201, subdivision (1), of the statute, which now provides an allowance of $100 plus $7 for a flag to drape the casket in cases where a veteran dies after discharge or resignation from the service and does not leave assets which, in the judgment of the director, should be applied to meet the expenses of burial and funeral and the transportation of the body, so as to provide for the payment of $107 in all cases in which the director, in his discretion and with due regard to the circumstances of each case, may decide that the sum should be allowed. Provision is also made that the director may make contracts for burial and funeral services without regard to the laws providing for advertisement and acceptance of the lowest bid, in order that the director shall be no longer bound by the law requiring him to accept the lowest bid offered, but, on the other hand, may accept the bid which will provide the best funeral within the amount allowed for burial and funeral expenses. Further provision is made so as to permit payments under contracts heretofore made on this basis by the director in an effort to provide respectable burials, but which have been disallowed by the Comptroller General.

This section of the bill also proposes to amend subdivision (3) of section 201 by the addition of a new proviso authorizing the payment of compensation to children after the age of 18 years, and until completion of education or training, where such children are or may hereafter be pursuing a course of instruction at a school, college, academy, seminary, technical institute, or university particularly designated by them and approved by the director. This allowance is to be continued until such children reach the age of 21 years, or terminate their attendance at school. It is estimated that this provision would result in a total increased cost to the Government of $1,007,900.

Section 7 proposes to amend section 202, subdivision (7), first paragraph, by increasing the amount of compensation now paid to disabled veterans, who have no dependents and who are being maintained by the Government in hospitals, from $20 to $30 per month. This amendment would result in an increased cost to the Government of $699,000 annually.

Section 8 of the bill proposes to amend subdivision (12) of section 202, by substituting the word "may" for the word "shall," so as to give the director discretion in making apportionments of compensation where the disabled person and his wife are not living together, or where the children are not in the custody of the disabled person. At the present time the language of this subdivision is mandatory and leaves no discretion in the director as to whether an apportionment shall be made regardless of the circumstances in the case. The object of the amendment is to permit the director to inquire into the reasons for the separation, and to make apportionments only in those cases where the facts warrant, and although it places on the bureau the functions of a court of domestic relations it nevertheless is important from the standpoint of justice to those veterans who are separated from their wives through the misconduct of the latter, that the law no longer contain a mandate requiring apportionment in favor of a wife without regard to the circumstances of the separation. There would be no increased cost due to this amendment.

Sections 9 and 10 of the bill provide for the repeal of sections 206 and 209 of the statute, which now contain limitations on filing claim and proof thereof. It is estimated that the repeal of these two sections will result in an increased cost to the Government of $3,342,516 the first year.

Section 11 of the bill adds a proviso to section 212 of the World War veterans' act, to provide that where the widow, child, or children of a deceased veteran are entitled to compensation by virtue of an accrued right under the war risk insurance act, as amended, the rates of compensation shall be the same as now paid to widows and children who are receiving compensation under the World War veterans' act, as amended. This amendment is proper in view of the fact that the dependents of veterans who died of injuries received during the period of time covered by the war risk insurance act, but not between April 6, 1917, and July 2, 1921, the period of the World War as defined by the World War veterans' act, are now paid at the rate provided by the old statute. It is fair to put all these dependents on the same basis. This amendment will result in an increased cost to the Government of $12,000 annually.

Section 12 amends section 300 of the act by removing the restriction on the designation of a beneficiary for converted insurance to a permitted class. The permitted class of beneficiaries will still remain in the statute in so far as yearly renewable term insurance is concerned. The committee is of the opinion that in view of the fact that the insured under converted insurance is paying an ample premium for the pro-

tection afforded he should be given the same right with regard to designating a beneficiary or changing a beneficiary as he would have under a commercial insurance policy. This amendment will make unnecessary the amendment providing that trustees be included among the permitted class of beneficiaries for converted insurance. There will be no additional cost attached to this amendment.

Section 13 of the bill amends section 301 of the act merely to make the provisions of that section conform to the amendatory section removing the permitted class of beneficiaries for converted insurance and to permit reconversion of converted insurance to policies of a lower premium rate, other than the five-year term, where the insured is in good health. Evidence was produced to show that immediately following the war many men bought endowment policies which carry a high premium rate; they are now finding it impossible to continue the premiums on these policies, and it was believed that by permitting them, if they are in good health, to transfer to a lower premium-rate policy they would be able to continue the insurance. No additional cost will result under this amendment.

Section 14 of the bill adds a new section to the act to be known as section 310. This section authorizes the granting of converted insurance to any man who has heretofore applied, or has been eligible to apply, for either yearly renewable term or converted insurance if he is now in good health and submits evidence to this effect satisfactory to the director. The committee believes that this amendment will not only be beneficial to the veterans but also to the United States Government life converted insurance fund, as it will permit men in good health to take out converted insurance and thereby increase the number of good risks carrying this form of insurance.

Section 15 of the bill adds a new section to the act to be known as section 311. Evidence was presented to the committee showing that under the present law many veterans had been rated temporarily totally disabled for long periods of time and then rated permanently and totally disabled. As a result of this, in many instances the policy lapsed before the permanent total disability was effective, and no insurance was payable. The committee believes that it was the intention of Congress that cases of this kind should be payable, and in order to insure that the benefits might be paid this amendment is recommended. The effect of the amendment is this: It leaves the two previous maturing factors for insurance, namely, death or total disability, as they are. It adds an additional maturing factor, namely, wherever an insured has been totally disabled for 12 months the benefits shall be payable from the beginning of total disability during the continuance of such total disability. The amendment is only made retroactive in those cases where there has been a period of total disability followed by a rating of permanent total disability. It does not cover retroactively cases of men who previously have been rated temporarily totally disabled but who have since recovered. A special proviso is included protecting applications, reinstatements, and conversions heretofore made. The cost of this section is figured at $9,200,000 for term insurance and $450,000 for converted insurance.

The total increased cost of this entire bill for the first year is estimated at $5,632,346.

The figures given in this report are the official figures furnished by the Veterans' Bureau. I am equally desirous that the hospital bill shall be passed by the Senate and I do not believe a dissenting vote will be cast if a vote could be had.

Mr. BRUCE. Mr. President, will the Senator yield to me?

Mr. ASHURST. The Senator from Missouri has yielded to me, and I must not abuse his privilege.

Mr. BRUCE. I just wanted to ask the Senator to submit to an interruption.

Mr. ASHURST. I can not, Mr. President, because I have not the floor.

Mr. BRUCE. Oh, I see. There seems to be no tax-reduction clause in the Senator's amendment, however. The tax that the Senator is discussing is the tax that mortality imposes on us all?

Mr. ASHURST. Yes.

Mr. BRUCE. That is the only relationship it has to the pending bill, is it not?

Mr. ASHURST. Yes, sir; and the tax which I fear I am imposing upon the patience of the Senate, for which I make due apology, but I intend so far as may be within my power to have these veterans' bills considered and passed by the Senate.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit a question?

Mr. ASHURST. Permit me, first, to say this:

I had introduced this amendment to this tax bill; but in order to save time, because it would not be pardonable in me to take much of the time of the Senate under the particular circumstances which surround me, but I have had assurances from the Senator from Utah, the chairman of the Finance Committee, that he will assemble his committee and will report the bills for veterans of the World War, and if I can have the assurance of the able Senator from Pennsylvania [Mr. REED] that he will join with the Senator from Utah in favorably reporting these two soldier relief bills, I shall not delay the pending bill.

I know that no ex-service man has ever appealed in vain for justice to the Senator from Utah or the Senator from Pennsylvania. I do not intend that anything shall happen here hereafter which will make me fairly subject to the charge of having failed to try to secure soldier relief legislation.

Now, may I have such assurances from the Senator from Pennsylvania?

Mr. REED of Pennsylvania. Mr. President, as soon as the tax bill is out of the way I hope the Senator from Utah will assemble the subcommittee and the full Committee on Finance, and will take immediate action on the hospitalization bill.

Mr. ASHURST. H. R. 13039?

Mr. REED of Pennsylvania. Yes; and I hope and I believe that it will be reported substantially without amendment——

Mr. ASHURST. That the two soldier bills will be reported?

Mr. REED of Pennsylvania. And that it will be agreed to by the Senate.

Mr. ASHURST. Both bills?

Mr. REED of Pennsylvania. As soon as it is reported out; but, Mr. President, the longer we delay action on the tax bill, the longer we are postponing action on the hospitalization bill for the veterans; and that prompts me to ask the Senator whether he is filibustering against the Boulder Dam bill?

Mr. ASHURST. I would not dream of doing such a thing. [Laughter.] Mr. President, I am so humiliated that I scarcely know how to make reply. Just think how horrible it is that the Senator should conjure up from the figments of his imagination any such thing as that!

But, abandoning facetiousness, I am content when these two Senators—the Senator from Utah and the Senator from Pennsylvania—assure me that they will bring in these bills which the ex-service men want passed; and I ask permission to withdraw my amendment.

Mr. SMOOT. I do not want any misunderstanding. If the committee will agree to report the bill favorably, it is going to be reported out; but, as I said before, I can not promise that it will be, because I have had no expressions from the committee. But the very day this bill is out of the way I am going to call the Finance Committee together for the consideration of the bill.

Mr. ASHURST. Then, obviously, the best service I can render now to the ex-service men of the country is to say no more, and sit down and allow this tax bill to pass.

Mr. WATSON. The Senator is correct.

Mr. ASHURST. I thank the Senator from Missouri for yielding to me.

Mr. BRATTON. Mr. President——

Mr. REED of Missouri. I have the floor, Mr. President.

Mr. BRATTON. Will the Senator from Missouri yield for a moment?

Mr. REED of Missouri. Yes.

Mr. BRATTON. Supplementing what the Senator from Arizona has said, I introduced some weeks ago a bill dealing with the ex-service men. It is S. 4252. It amends what is called the $50 provision governing ex-service men diagnosed as arrested tuberculosis. It is an important bill, and it is supported by abundant merit. I want to ask the chairman of the Committee on Finance what he proposes to do with regard to considering that bill at the same time that he considers the bills to which the Senator from Arizona has referred.

Mr. SMOOT. There are some eight or 10 bills affecting veterans of the World War pending now in the Finance Committee. At that meeting nothing will be considered with the exception of bills affecting the veterans of the World War; and I am hopeful of having each of those bills considered. If it can not be done at one meeting, I am going to call a meeting the following day, and I want them to be considered by the committee.

Mr. BRATTON. And this bill, along with the others, will be considered then?

Mr. SMOOT. Yes; I will say to the Senator that it will be.

Mr. BRATTON. Mr. President, I join the Senator from Arizona in the statement that the best service that can be rendered to the ex-service men is to refrain from lengthy discussion of the matter now, in order that the pending bill may be disposed of at the earliest moment; and with that in view I shall refrain from discussing the situation further. But the

bill dealing with ex-service men of arrested tuberculosis must receive consideration before we adjourn.

Mr. CARAWAY. Mr. President, may I ask the Senator from Utah a question? There is a bill pending to enlarge the hospital at Hot Springs. That is before the Senator's committee, I take it?

Mr. SMOOT. And that is one of the bills that are going to be considered. I have not heard a single Senator object to the passage of the hospitalization bill, and I think it is unanimously agreed by everybody that it ought to be the first of the bills reported to this body.

Mr. ASHURST. I thank the Senator.

Mr. HOWELL. Mr. President——

The PRESIDING OFFICER (Mr. ODDIE in the chair). Does the Senator from Missouri yield to the Senator from Nebraska?

Mr. REED of Missouri. What is the purpose for which the Senator rises?

Mr. HOWELL. I wish to offer an amendment to the pending bill.

Mr. REED of Missouri. And discuss it?

Mr. HOWELL. Yes, sir.

The PRESIDING OFFICER. The Chair will state that there is an amendment pending now.

Mr. REED of Missouri. Very well, Mr. President. Out of consideration for the Senator from Nebraska I will at this time yield the floor, in order that we may vote upon the pending amendment, and that the Senator from Nebraska may present his amendment.

SEVERAL SENATORS. Question!

The PRESIDING OFFICER. The question is on the amendment of the Senator from Florida [Mr. FLETCHER].

Mr. BRUCE. I ask that the amendment be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 231, it is proposed to strike out lines 11 to 13, inclusive, and to insert in lieu thereof the following:

(3) May issue a certificate of partial discharge of any part of the property subject to the lien if there is furnished to the collector and accepted by him a bond, in an amount not to exceed double the fair market value of the taxpayer's interest at the date of said bond, in such part or portion of the whole property sought to be released, such bond to be conditioned upon the payment, within the time therein prescribed, of the full amount of the taxpayer's interest in the property released, toward the satisfaction of the outstanding tax liability, and to be in accordance with such requirements relating to terms, conditions, and form of the bond and sureties thereon, as may be specified in the regulations.

Also, on page 232, after line 6, it is proposed to add a subdivision reading as follows:

(g) All bonds authorized by this section shall run in favor of the United States of America.

The PRESIDING OFFICER. The question is on agreeing to amendment offered by the Senator from Florida.

Mr. REED of Missouri. I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. REED of Missouri. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	Locher	Shortridge
Barkley	Fletcher	McKellar	Smoot
Bingham	Gerry	McMaster	Steiwer
Blaine	Gillett	McNary	Stephens
Borah	Glass	Mayfield	Swanson
Bratton	Greene	Moses	Thomas
Brookhart	Hale	Neely	Tydings
Broussard	Harris	Norbeck	Vandenberg
Bruce	Harrison	Nye	Wagner
Capper	Hawes	Oddie	Walsh, Mass.
Caraway	Hayden	Pine	Walsh, Mont.
Curtis	Heflin	Pittman	Warren
Deneen	Howell	Reed, Mo.	Watson
Dill	Johnson	Reed, Pa.	
Edge	La Follette	Sheppard	

Mr. CURTIS. I desire to announce that the Senator from Nebraska [Mr. NORRIS] is detained in a committee meeting.

The PRESIDING OFFICER. Fifty-eight Senators having answered to their names, there is a quorum present.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Florida.

The amendment was rejected.

Mr. DILL. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The clerk will read.

The CHIEF CLERK. The Senator from Washington moves at the proper place to insert:

SEC. —. That the tariff act of 1922 is hereby amended as follows: Strike out paragraph 1660 of section 201 and insert at the end of paragraph 401 of section 1 a new paragraph, as follows:

"401A. Shingles and cedar lumber, 25 per centum ad valorem. Any paragraph or part of paragraph of the tariff act of 1922 in conflict herewith is hereby repealed."

Mr. DILL. Mr. President, this amendment to the tariff act is desirable and necessary if the great cedar lumber and shingle industry of the United States is to continue in the Northwest; and in order that I may explain it, let me call attention to the fact that the present tariff act must be considered in connection with the tariff levied on lumber and shingles in Canada. The United States has a tariff on the importation of logs, and Canada has a tariff on the exportation of logs. In addition to that, Canada restricts the exportation of logs so that American manufacturers find it practically impossible to secure logs in Canada.

If the American manufacturer of cedar lumber and shingles ships them into Canada, he must pay a sales tax there. The result is that the shingles and cedar lumber produced in the United States are barred from the Canadian market. On the other hand, the cedar lumber and shingles made in Canada, from logs costing from two to six dollars less per thousand, are sold in the United States without any import taxes whatsoever, or any tax of any kind. Thus this tariff act operates to destroy the cedar lumber business and the shingle business of this country. Owing to the fact that there is no tariff we are prohibited from appealing to the President successfully to have the tariff raised, because there is no tariff to raise.

I am not going to take the time of the Senate to discuss this question at any length, but I urge this particular tariff for the reason that the lumber and cedar industry of the Northwest, in competition with the Canadian lumber business, is being destroyed because of the combined tariff acts of the two countries. We at least ought to have reciprocal tariff relations in this great industry, and since the passage of the tariff law of 1922 laying an import tariff on logs, the shingle mills of the Northwest have been closing, until to-day more than half those that were formerly running are closed and the others are in danger of bankruptcy.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit a question?

Mr. DILL. Yes.

Mr. REED of Pennsylvania. If I gather the Senator's point correctly, it is that the cost of production of these shingles is less in Canada than in America.

Mr. DILL. Yes; the cost of production is less and the cost of the logs is less.

Mr. REED of Pennsylvania. The cost of the raw material to them is less than it is to us?

Mr. DILL. And, in addition to that, they have an export tax on their logs that formerly came to our mills.

Mr. REED of Pennsylvania. That adds to the cost to the American mill?

Mr. DILL. Absolutely.

Mr. REED of Pennsylvania. And the Senator, therefore, thinks that a tariff is justified for the protection of the American mills?

Mr. DILL. I do, because of the conditions stated.

Mr. REED of Pennsylvania. If I should prove to the Senator's satisfaction that the cost of the manufacture of pig iron in Germany, France, and Belgium was similarly less than the cost of making it here, would the Senator approve a protective tariff on pig iron?

Mr. DILL. I want to say to the Senator that I am in favor of tariffs that protect American industry to the point of competition, but not that protect them to the point of profiteering, as some of the present tariff rates do.

Mr. REED of Pennsylvania. If the Senator knew that half the furnaces along the Atlantic coast were closed down, as half the shingle mills in Washington are, would he then be in favor of a protective tariff on iron?

Mr. DILL. If the conditions are such as they are in the shingle industry I certainly would.

Mr. REED of Pennsylvania. Surely; assuming that my hypothesis is correct.

Mr. DILL. I want to say this to the Senator, that the Republican Party has failed to meet the needs of this country above everything else in failing to revise the tariff at this session.

Mr. REED of Pennsylvania. And the Senator, as a Democrat, advocates a higher protective tariff on shingles than we have put on?

Mr. DILL. We have no tariff at all on shingles.

Mr. REED of Pennsylvania. He advocates that we put one on?

Mr. DILL. I do. I believe in a reciprocal tariff. If the Canadian market were open and the American market were open, even with the oriental labor of Canada and even with the cheaper lumber production, we might compete with them; but the trouble is that our own law operates against us, and when you add that to the Canadian tariff law it is practically destroying the business, and our mills have no chance under these circumstances. When we had free trade between both countries, our shingle mills and our lumber mills survived, although they suffered, but when Canada put a tariff on our products that went in there and put an export tariff on logs we added a tariff on the very logs that would come into this country. Thus we added to the very objections that Canada set up by the laws which she passed by adding a tariff on logs coming into this country.

Mr. GLASS. Mr. President, it seems to me it is a question of the survival of the people who have to buy lumber. Not longer ago than last week I paid $30 a thousand for common oak fencing plank, which 10 years ago I bought for $12.

Mr. REED of Pennsylvania. Does the Senator mean he does not agree with the Senator from Washington that we should have a protective tariff on shingles?

Mr. GLASS. No; nor with General Hancock when he said the tariff was purely a local issue.

Mr. REED of Pennsylvania. The Senator's party seems to be divided on this question of protecting the shingle industry of Washington.

Mr. GLASS. Unhappily, it is.

Mr. DILL. I want to remind the Senator that the present condition which exists in the cedar lumber and shingle industry is not one of protective tariffs at all. It is a case of the necessity of reciprocity. If we had a reciprocal condition, we might endure, but the trouble is that the condition which we have is not only not reciprocal, but we have added a tariff against ourselves, in addition to the tariff which the Canadians have levied against the logs coming into this country.

Mr. BORAH and Mr. BRUCE rose.

The PRESIDING OFFICER. Does the Senator from Washington yield, and if so, to whom?

Mr. DILL. I yield to the Senator from Idaho, who rose first.

Mr. BORAH. I was going to say that we have no tariff upon shingles at the present time, and that fact has not at all reduced the price we pay for shingles. The Canadian has no difficulty in placing his own price on the article which he ships into this country.

Mr. DILL. And the Canadian production has increased 400 per cent, while American production has decreased about 16 per cent.

Mr. FLETCHER. Suppose we should take the duty off logs?

Mr. DILL. I think that would help; but I want to say to the Senator that the present condition has so weakened and destroyed the lumber industry that it would be very difficult to get back on the basis we were on before the 1922 law was passed, and there would still be an export tariff by Canada.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. DILL. I yield.

Mr. BARKLEY. Does the fact that there is an export duty on logs shipped out of Canada tend in any way to equalize this difference to which the Senator has referred?

Mr. DILL. It tends to accentuate the difference, because our mills can not get the logs out of Canada they formerly could get at the low price at which they are sold in Canada. We have an import tariff on logs, and Canada has an export tariff on logs, and they cost us from two to four dollars a thousand extra because of those duties.

Mr. BARKLEY. Are these logs kept from coming in by reason of both the export tax and the import tax?

Mr. DILL. They can not come in in any great numbers. If they do, the cost of production of shingles here is so high that we can not compete with the shingle manufacturers in Canada, who ship here free.

Mr. BARKLEY. So that if a log gets into the United States from Canada, it is taxed before it starts, and after it gets here?

Mr. DILL. Exactly so; it is taxed before it leaves Canada, and taxed on its way in here. A more unjust tariff could not be created than has been created against the cedar-lumber industry in connection with Canada.

Mr. GLASS. That being so, if shingles are taxed twice, how are people who buy shingles getting along?

Mr. DILL. They are not being taxed twice.

Mr. GLASS. The exporter of logs in Canada pays a tax over there, and we exact a tax over here.

Mr. DILL. They make the shingles over there and ship them out, and there is no export tax on shingles, and there is no tariff on shingles coming into this country.

Mr. BORAH. The high prices which we are paying for shingles is for Canadian shingles. The American mills have been closed down. The high prices which we are paying we are paying to the foreigner.

Mr. BLAINE. Mr. President, will the Senator yield?

Mr. DILL. I yield.

Mr. BLAINE. I have no doubt but that the Senator has given some attention to the amendment which I propose to offer to the revenue bill. That amendment will permit logs of fir, spruce, cedar, or western hemlock, which now bear a dutiable rate of $1 per thousand feet, to enter the United States on a reciprocal trading basis, providing that Canada, for instance, which imports those logs into the United States, will take back agricultural products in value equal to the value of the logs. Would not that afford great relief?

Mr. DILL. I may say to the Senator that Canada not only would not export logs to this country, but Canada has a law which specifically forbids the exportation of logs, and when they started to enforce that law they put an export tariff on logs to prevent their being shipped into this country. Canada is trying to keep logs in her own country, and to have them manufactured there, and has placed an export tariff on them to keep them for that purpose.

Mr. BLAINE. If the amendment I propose were adopted and became the law of this country, is it not reasonable to suppose that Canada would repeal her export tariff in order to receive the benefit of the tariff reduction, when Canada needs particular agricultural products which she does not produce in exchange for her logs? Is it not reasonable to assume that will be the policy of the Canadian Government in the interest of her own people?

Mr. DILL. I do not know whether it would or not. The history of the Canadian tariff does not indicate that Canada would repeal the export tariff law.

Mr. SHORTRIDGE. May I ask the Senator from Wisconsin how we are going to put export duties on American products under the Constitution?

Mr. BLAINE. I do not propose to put export duties on American products. I propose to have a reciprocal trading privilege in commodities, which is, after all, the only substantial relief that can be given to agriculture. I expect to debate this proposition after I have offered my amendment.

Mr. REED of Pennsylvania. Will the Senator indicate to us what agricultural product it is that Canada stands in need of?

Mr. BLAINE. I do not know about Canada, but I know that the trade of the world will demand our principal agricultural products if we can break down the tariff wall that keeps out the manufactured products.

Mr. DILL. Mr. President, I can not yield for a debate in my time between the Senator from Pennsylvania and the Senator from Wisconsin.

Mr. REED of Pennsylvania. I did not realize the Senator was so hurried. I am sorry.

Mr. DILL. I am not so hurried, but I do not want to be taken entirely away from the discussion of my own amendment.

I am not in favor of a tariff on raw materials as such anyhow. What I am proposing is a tariff on manufactured products that come in from other countries to compete with manufactured products that could be made in this country, even with the tariff we have on logs, and their export tariff also, because if we had a tariff protecting us against the manufactured products of Canada we would then be able to produce our own shingles at such a profit that our mills could continue in business.

Mr. BARKLEY. Mr. President——

Mr. DILL. I yield to the Senator from Kentucky.

Mr. BARKLEY. I have considerable sympathy with the Senator from Washington in the position he has taken about this matter, but does he think it is wise to attempt to amend the tariff law by piecemeal in the form of amendments on a tax bill?

Mr. DILL. I recognize the force of the Senator's question, and there is much to be said for it. But here is a great industry, one of the greatest industries in the country, and the great industry of the great Northwest. More shingles are produced in the States of Washington and Oregon than in all the rest of the United States. The present situation is such that the industry is being destroyed. It has been impossible to get the House of Representatives to open up the tariff question. Owing to that fact, I know of no way to do it except by offering an amendment here. We are told that the President will veto the bill if there is a tariff schedule on it. I can not believe that. Here is a case where a great industry is being destroyed. The

Tariff Commission can not reach it. It can be reached only by Congress and we are told we must wait two more years, but by that time we will have no more business left.

Mr. BARKLEY. The Senator's idea is that the President will not veto the bill if the tariff amendment raised the tariff, but he would veto it if the tariff amendment lowered the tariff?

Mr. DILL. I can see why the President might object to a tariff schedule as such on the revenue bill. But I consider this an emergency situation, in which the people of my State have invested $50,000,000, and the annual production of which nearly equals that amount. It is being destroyed, and destroyed by the tariff laws of the country to-day, operating, as they do, with the tariff laws of Canada.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Utah?

Mr. DILL. I yield.

Mr. SMOOT. The Senator knows that when the tariff act of 1922 was under consideration the Honse refused to put a duty upon shingles. When the bill came to the Senate, the Senate put a duty on shingles. The bill then went to conference. I think the duty upon shingles was about the last thing on which the Senate conferees had to yield. The House said they would not yield. I think the Senator at that time was a Member of the House or had just left the House.

Mr. DILL. No. I had left the House some three years before, involuntarily.

Mr. SMOOT. I know it was not very long before. That is the history of shingle legislation. I know at that time, in 1922, there was a majority of the Senate in favor of putting a duty upon shingles.

Mr. DILL. I have no quarrel with the statement of the Senator from Utah, because I was not here.

Mr. BARKLEY. Is that the session of Congress in which the membership of the Republican Party was about two to one over the Democrats in the House?

Mr. DILL. It was a very great majority.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Idaho?

Mr. DILL. I yield.

Mr. BORAH. The Senator from Kentucky is correct about that being the condition. It only illustrates again the statement of General Hancock that "the tariff is a local issue."

Let me say that the Senator from Washington is correct in stating that this industry is literally being destroyed. It is a demonstrable fact. Anyone who wishes to examine into the subject can determine in a very short time that it is being destroyed by reason of the fact that it can not compete with Canada in the production of shingles. They destroy our industry, and, being in control of the market, fix their own price.

Mr. DILL. And that is because of the tariff laws of the two countries operating from both sides against our own manufacturers.

Mr. GLASS. Mr. President, if the Senator will permit me——

Mr. DILL. I yield.

Mr. GLASS. I have on my desk right now a huge pile of telegrams telling me the peanut industry is being destroyed in Virginia by competition, but I voted against the proposition of putting a tariff rider on the revenue bill. I do not believe we ought to do that sort of thing.

Mr. BORAH. It is not that the Senator from Virginia so much objects to putting a tariff rider on a revenue bill as that he does not believe in putting a tariff on anything.

Mr. GLASS. Oh, yes, I do; but not too high.

Mr. FLETCHER. Mr. President, will the Senator yield to me?

Mr. DILL. I yield to the Senator from Florida.

Mr. FLETCHER. It is perfectly apparent there is great need for a revision of the tariff.

Mr. DILL. That need existed long ago. The Republican Party is in control of both the House and Senate. The Senate has passed a resolution asking for tariff revision. The Republican leaders of the House refuse to permit tariff revision, and now when I offer an amendment to save a great industry being destroyed by the log tariff and free-shingle schedules of the 1922 tariff act passed by a Republican Congress I am told it is improper legislation on a revenue bill, and Republicans will defeat this amendment, no doubt. I am doing all within my power, and if I fail it will be because Republicans refuse to vote for this tariff amendment.

Mr. FLETCHER. I would have been glad to vote for some of the provisions in the amendment offered by the Senator from Minnesota [Mr. SHIPSTEAD] and the amendment offered by the Senator from South Dakota [Mr. MCMASTER], but from what the Senator has now said it is perfectly evident that there ought to be a revision of the tariff. Whether we are ever going to get it or not I can not say, but it is a real need. It is embarrassing to endeavor to legislate in a revenue bill on the subject of the tariff. I have difficulty there. But plainly there is a real need throughout the country for a complete revision of the present tariff.

Mr. BRUCE. Mr. President, will the Senator yield?

Mr. DILL. I yield.

Mr. BRUCE. I can not agree with the Senator from Florida that there is any need for a revision of the tariff, certainly not at a single blow, because the special tariff investigating committee, appointed by the Senate, has been looking into the question of tariff duties now for a great many months; and I am very much delighted to be able to say that a majority of that committee are in favor of reporting the expediency of the reorganization of the Tariff Commission in such a manner as to clothe it with the power to recommend duties; that is to say, deliberately to consider each and every case of an application for a tariff duty that may be presented to it and to suggest a tariff rate as the result of its deliberations, subject, of course, to the ratification of Congress.

I think that I can say that I was the member of the commission who suggested that idea in the first instance, and I have been very much gratified to find that all the members of the commission, with one possible exception, are in favor of it. Now that I have seen these divisions of opinion to-night on the subject of the tariff, I am more strongly impressed than ever with the importance of our creating a commission of that kind; that is to say, a commission with a long enough tenure and a large enough compensation to have something of the aloofness and dignity that give such prestige to the Interstate Commerce Commission, and with power to do nothing less than look into every grievance such as the Senator from Washington is presenting to us to-night, and recommend the duty that it might think that the situation called for, subject to the ratification of Congress.

Mr. DILL. I shall not talk longer on this subject. I recognize the objections of Senators regarding the placing of a tariff rider on the tax bill, but I wanted to present these facts briefly. I had hoped the Senate might recognize this as such a great emergency for a great industry in my part of the country, an industry that is being destroyed, and will be replaced only at a tremendous cost in the future after the mills have been allowed to run down and be closed, and the labor organizations that run them dissipated, that it seemed to me I was justified in making this plea.

Mr. FESS. Mr. President, will the Senator yield for a question?

Mr. DILL. Certainly.

Mr. FESS. The Senator will recall that in 1913, in the Underwood bill, when shingles were on the free list, there was a very spirited discussion in the House representing the idea the Senator is now representing, but that all the argument was strongly the other way. Then, in 1922, when it came up again in the House, the argument was very strong again to put shingles back on the dutiable list.

Mr. DILL. But the trouble was that the law of 1922 put a tariff on logs, and at the same time Canada put an export tariff on logs and enforced the law that had been on the statute books.

Mr. FESS. I recognize that.

Mr. DILL. The shingle mills had been struggling along as best they could and were competing with the Canadian mills, but when that added burden was placed on them they could not stand it, and more than half of them have been closed up and the other half are almost in bankruptcy now.

Mr. FESS. Then in 1922 the shingle industry was in a very bad condition in the Northwest——

Mr. DILL. That is true.

Mr. FESS. And the argument was presented to relieve the situation by a reduction of the tariff.

Mr. DILL. But their condition was prosperous then compared to what it is now.

Mr. FESS. I would like to join the Senator and would like to vote to put shingles on the dutiable list if it were not that it seems to me we ought not to do it on the tax bill. That is the only reason.

Mr. DILL. Mr. President, I ask unanimous consent to have inserted in the RECORD at this point a statement by Mr. A. C. Edwards, chairman of the committee of the United States cedar industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

The statement is as follows:

THE UNITED STATES CEDAR INDUSTRY

By A. C. Edwards, of Everett, Wash., committee chairman

The vital act affecting the American cedar industry was that of 1922, which placed a tariff on the import of logs when shipped to American mills for manufacture by American workmen and still retained shingles and cedar lumber on the free list.

Prior to 1922 the forestry act of Canada had not been enforced. That act reads as follows:

"All timber cut on Crown lands or on granted lands after the 12th day of March, 1906, or on lands under preemption record, shall be used in the Province, or manufactured in the Province, into boards, deals, joists, shingles, or other sawn timber, or into wood pulp, or paper, except as hereinafter provided; and all logging or manufacturing camps or premises used or occupied for any purpose of or in connection with the cutting or manufacturing of such timber shall be located in the Province."

A subsequent provision of the act permits log exportation under rigid restrictions.

The United States permits free export of American logs and free import of foreign shingles and cedar lumber.

If American mills ship shingles or lumber to Canadian markets they are charged sales or import taxes, with the result that American shingles and cedar lumber are effectually barred from all Canadian markets. No American shingles and lumber to any extent, if at all, is even being offered for shipment to Canadian markets.

Prior to 1922 American log buyers entered Canadian log markets and bought in equal competition with Canadian mill operators, save that Canadian manufacturers were given slight preferences. Since the enactment of the present tariff act, Canadians, seeing the advantage afforded by the American log tax, secured the enforcement of the forestry act, and Canada now charges an export tax on logs, rigidly restricts log exportations, and even completely prohibits shipments of logs to American manufacturers. Such Canadian logs as are granted export privileges are chiefly inferior grades. See Tariff Commission's report, page 13.

OPERATIVE EFFECT AND RESULTS OF ACTS MENTIONED

The tariff imposed on log importations raised log prices in the United States and lowered log costs in British Columbia. There is frequently a log shortage in American markets and generally a log surplus in the log markets of Canada.

The raising of American log prices and lowering of Canadian log costs forced manufacture of shingles and cedar lumber to Canadian mills and necessitated curtailment of production in American mills.

Prior to the enactment of the 1922 tariff act, and subsequent to 1913, Canadian gain in production of shingles totaled 251 per cent over 1913. To and including 1925 the total gain in production in Canada over 1913 is more than 400 per cent.

Charging a tariff on the import of logs, an unmanufactured product, and granting a free and unrestricted entry of shingles and cedar lumber, a finished product, equals the granting of United States tariff protection to foreign manufacture to prevent American competition in the production of shingles and cedar lumber for American consumption.

Fully 90 per cent of all shingles and cedar lumber manufactured in British Columbia is shipped to and sold in the markets of the United States.

These conditions have caused and are causing annual shutdown periods in the American mills of approximately 33 per cent of the usual working period each year. This means an annual wage loss to American cedar workers of about $10,000,000, and this same general total of an annual loss has continued since 1923. Lesser annual losses were sustained for the preceding years, subsequent to 1913. As a general total wage loss to American workmen it is safe to assert that it easily equals $80,000,000. It is therefore easily ascertainable that as a result business curtailment has run into the hundreds of millions.

There are still approximately 10,000 men engaged in the cedar industry in Washington, Oregon, and Idaho, even after the extermination of half of the American cedar industry. These men are all white, nearly all American, and the great majority are men of families.

Shingle-mill values have depreciated until at present they are being offered for sale at 10 cents on the dollar of cost, with no purchasers at that figure.

A number of Washington shingle-mill owners are planning to go before the boards of equalization in their respective counties and ask reduction in assessments to a total not to exceed 5 to 10 per cent on the cost values of their plants. They will submit proofs that their mills can not be sold for such amounts, and that conditions are so adverse they are unable to operate except at great losses.

Due to idleness of mill employees, business stagnation has prevailed, and as a consequence land and farm values have decreased in many instances more than 50 per cent.

The great timber resources of the Northwest are being removed under conditions that allow no profit, either to logger, manufacturer, or laborer. The result is none are given a profit with which to build and establish other lines of industry to take the place of timber when that shall have been exhausted. As a final consequence it will some day be found that the Pacific Northwest has been congressionally forced to devastate its timber resource and is left with insufficient other industries to continue its progress.

ORIENTAL EXCLUSION ACT

Granting free and unrestricted importation to orientally produced products to compete with American like products effectually annuls the American exclusion act. This is as it affects the American cedar industry. In view of the import tax on logs it even gives the oriental an actual preference over the American workman, for it has forced idleness to American workmen and double-shift operations to the mills of a foreign country employing more than 50 per cent of orientals as workmen in their cedar mills.

Charge has been made that orientals are employed in American mills. That charge is absolutely false. Careful search and inquiry has been made to ascertain if orientals were ever employed in American cedar mills. To date not even one instance of the employment of one oriental in any American cedar mill has been found.

There are not now and never have been any orientals employed in the American cedar mills.

INDUSTRY PRODUCTION

The cedar industry of Washington, Oregon, and Idaho, even after half of the industry has been forced out of business, and notwithstanding the usual annual curtailments that are forced by reason of adverse conditions, still produce a product in shingles having an annual value close to $23,000,000 and afford an annual pay roll of about $19,975,000. The difference between product value and pay roll represents cost of standing timber.

Annual shingle production is approximately 7,000,000,000. Annual cedar-lumber production is about 15,000,000 feet, of a value of about $5,000,000. This item, too, represents actual pay roll, save as to cost of timber standing in the woods, and is based on decreased productive figures caused by periods of forced idleness.

THE PRESENT SITUATION

The situation now confronting the shingle and cedar-lumber industry of Washington, Oregon, and Idaho is the most serious ever known.

Approximately 35 per cent of all shingle mills are at present idle or have curtailed their productive capacity. Some of the combination mills cutting both shingles and cedar lumber have greatly reduced shingle production.

A few mills are being dismantled and the machinery sold for junk. Others are holding on in the hope that congressional relief will yet be afforded in time to save them from bankruptcy.

There are more idle millworkers than ever known before, except in general shut-down periods; and in all principal Northwest cities there are more "For rent" and "For sale" signs than in any previous period in the past 30 years.

Merchants and business interests are complaining more generally than for many years, and the number of failures reported is considerably in excess of the average.

So far as ascertainable, practically all Canadian shingle mills are operating full capacity, with a very large percentage of such mills working double shifts. Two of the larger Canadian mills are at present temporarily closed for repairs.

GOVERNMENT REVENUE LOSSES

By reason of the free importation of shingles and cedar lumber to the United States, the Government is annually losing more than $2,000,000, and during the past year the United States Government has reduced cedar stumpage prices to mills purchasing Government timber, thus entailing further losses of revenue to the Government.

Canadian manufacturers have just as free access to American markets as do Americans, but they pay no American taxes and in no way share governmental expenses. They are, therefore, even more privileged in our own American markets than are American manufacturers.

The Department of Commerce shows the imports of Canadian shingles to the United States, from 1913 to and including 1925, to total 24,047,327,000 shingles. Canadian admitted production, as shown by figures given to the Tariff Commission, totals for the same period 25,120,000,000 shingles. If the Canadian admitted-production figures were true it would mean they exported to United States markets 95.8 per cent of all shingles manufactured.

THE TARIFF COMMISSION'S REPORT

The report of the United States Tariff Commission on the United States shingle industry verifies every claim ever made by the shingle industry.

American shingle manufacturers claim American log costs are higher than Canadian log costs. This is substantiated by the Tariff Commission's report on page 11, showing an average American excess log cost over Canadian logs of $2.25. The excess shown in 1922 was $3.09, and in the first six months of 1926 was $2.52.

The commission's report, on page 21, shows 45 per cent of oriental labor in the Canadian cedar mills. Canadian statistics admit a total of 54 per cent of oriental workmen in their cedar mills.

The Tariff Commission's report, pages 22 and 23, shows that wages paid in the United States are higher than the wages paid in the shingle mills of British Columbia. The difference in wages, shown by the report, extended to an operative basis, equals about 7 cents per thousand shingles in favor of Canada.

Notwithstanding the commission found these lower log costs and lower wages, the several comparable tables on pages 36 to 44 show practically no difference in cost of manufacture between the United States and Canada. In other words, by a mere process of comparison the labor and log differences have been made to almost totally disappear. They actually compare out of existence that which was found to exist and which was duly reported.

It is utterly, wholly, and completely impossible, by a mere process of comparison, to eliminate the differences in log costs and lower wages. Facts must exist after comparison in the same proportion as they were in existence prior to comparison, and the very fact that they have been made to magically disappear thoroughly proves the fallacy of the commission's comparable theory.

SCALING AND GRADING OF LOGS

The Tariff Commission implies the American log scales are more liberal, but admits: "A log 24 feet long and 18 inches in diameter contains under the Scribner (American) rule 320 board feet, whereas the same dimensions under the British Columbia scale gives only 311 board feet." Page 8.

If the scale rule is honestly used there can be no question but what Canada would have the advantage in the scale, but it is well known that Canada scales one way for export trade and another way for home trade. Practically every American buyer of Canadian logs is well aware of this fact, and this charge is conclusively proven by the statistics contained in the 1927–28 British Columbia Lumber Trade Directory, page 149, which reports shingle cuts from government tests as follows: On No. 2 logs, 10.60; No. 3 logs, 8.60; and No. 1 logs, 11.06. American manufacturers are well content if they can average a cut of 10,000 shingles per 1,000 feet from the American scale.

Under the Canadian system scalers are government employees and test cuts are made at the direction of the forest branch to give fairness to both logger and manufacturer, with results as shown. Seemingly the Tariff Commission failed to secure this information.

Special attention is asked to Table 17, page 51, of the Tariff Commission's report. It will be noted by comparing this table with figures of import reported by the Department of Commerce of the United States as follows:

Year	Tariff Commission's report shows Canadian production	Department of Commerce report Canadian exportation to the United States
	Thousands	*Thousands*
1922	1,826,000	2,318,492
1923	1,894,000	2,579,836
1924	2,537,000	2,567,748
1925	2,685,000	2,513,257

This evidences the Canadian information obtained by the Tariff Commission failed in its correctness, and without correct information it could not be expected the Tariff Commission could make true findings as to facts. There is no probability of exporting millions more shingles for a period of several years than are produced.

PHENOMENAL COINCIDENCES

The Tariff Commission found an average difference of $2.25 on log costs, and the wage table, extended to an operative basis, shows a difference of nearly 7 cents per thousand shingles in favor of British Columbia production. This totals over 31.5 cents per thousand shingles as an advantage in cost of production in favor of British Columbia. By taking the total amount of shingles, as shown by Department of Commerce records to have been shipped to the United States, and ascertaining and apportioning costs on this total, the result then found equals within a half cent per thousand shingles the exact 31.5 cents per thousand shingles seemingly lost by the commission in its comparable tables.

Another still stranger coincidence is the fact that by adding 10 per cent to the total amount of shingles shipped to United States markets in an effort to obtain a nearly true production total for British Columbia and then determining and apportioning costs on that amount, the result then shown in favor of British Columbia is 50 cents for each thousand shingles, and this is the difference that cedar-industry experts have claimed for years as an actual advantage existing in favor of British Columbia manufacturers, figured on an extra-clear basis. The commission seemingly found total costs but not total production.

It can not be contended that these deductions afford indisputable proof of the errors in the comparable tables of the commission, but it is certainly phenomenal that in dealing with billions of shingles and millions of dollars, with numerous processes of additions, multiplication, and division to apportion and determine costs in each instance the final results should each come within half a cent of the differences shown in the Tariff Commission's report and what for years has been claimed by manufacturers who have made a life study of the situation.

CANADIAN AND AMERICAN LOG COSTS

British Columbia log prices generally average from $4 to $6 less per 1,000 feet of log than the prices obtained for logs on Puget Sound. This is verified from the Tariff Commission's report, page 12, Table 5–B, but the difference in grading logs is confusing to one not informed as to the usual run of No. 3 logs in both American and Canadian rafts. At the time the shingle investigation was made by the Tariff Commission it is an indisputable fact that good logs were being sold in British Columbia log markets at $12 per 1,000 feet of log.

GENERAL AVERAGING OF DIFFERENCES

Summing up all differences, taking into consideration all grades of shingles and logs and cedar lumber, and extending and averaging to an operative basis, the average difference in favor of British Columbia will be found to be within a few cents of 20 per cent ad valorem on all grades of shingles and cedar lumber.

HIGHER PRICES FOR CANADIAN SHINGLES

The report of the commission asserts higher prices are paid for Canadian shingles than for American shingles, but does not tell all the facts with reference to these higher prices. They could have ascertained that higher commissions were paid for the sale of Canadian shingles, and that higher discounts were allowed, with the final result that American manufacturers receive about the same price as Canadian manufacturers. They could have also ascertained that some American manufacturers are obtaining higher prices than some Canadian manufacturers. The grades being sold and purchased and guaranteed by their producers most vitally affect the differences in prices where differences exist.

IMMATERIAL FACTORS ASSIGNED AS CAUSES FOR INDUSTRY DEPRESSION

The commission assigns as reasons for the depression of the shingle industry composite roofings, fire-insurance ratings, antishingle ordinances, poor marketing methods, lack of proper trade connections, and other immaterial items.

The United States shingle industry was perfectly able to cope with any of its legitimate competitors, but is not now and probably never will be able to compete as long as the existing tariff act discriminates against the American industry in favor of a foreign nation, oriental labor, and its foreign competitor. That is competing in the face of governmental opposition, and the cedar industry has tried long enough to admit that it can't be done.

EFFECT OF A TARIFF TO ULTIMATE CONSUMER

It will probably be claimed that if a tariff is added to shingles the amount of that tariff will be passed on to the ultimate consumer. Hundreds of retail dealers have written the industry, advising stability of prices, favoring a shingle tariff, to the end that stability of shingle prices may be effected, and stated the profits asked by such retailers are sufficient to absorb any price increase to manufacturers and labor.

The prices noted in the Tariff Commission's report, on page 67, verifies the claim of the cedar industry that no increase in price will be passed to the ultimate consumer, as it will be noted from the retail prices quoted by the commission they average about double the delivered price to the detail dealers.

Shingle prices per thousand shingles to manufacturers at present are: Stars, $1.90; clears, $2.05; perfects, $2.75; and royals, $8.50. To ascertain the average delivered price add $1.25 per thousand shingles for freight to clears and perfects. See page 66, commission's report.

UNITED STATES CEDAR INDUSTRY.

Mr. WATSON. Mr. President, may I ask the Senator from Washington a question?

Mr. DILL. Certainly.

Mr. WATSON. I am curious to know whether or not all of the raw material out of which shingles are made has been exhausted in his part of the country so that the raw material must come from Canada.

Mr. DILL. No. A large part of it comes from the United States, but a large number of the mills are on the Puget Sound area and the logs are shipped in, and the fact that they can not get logs there to supplement the local supply has been one of the causes of the breakdown of the industry.

Mr. WATSON. So there is no sufficient supply of raw material in our own country to meet the American demand?

Mr. DILL. I would not say there is not a sufficient supply, but I would say it is not always an economical supply under present conditions.

Mr. WATSON. Mr. President, I have no desire to continue the discussion, but I notice that when the Fordney-McCumber bill was under discussion and was put on its passage in the Senate the question arose on striking out the rate of 50 cents a thousand on shingles levied in the House bill. On that question

there were 49 yeas and 19 nays. I have no desire to thrust a partisan discussion into the question at all, but I want to remind my friend that nearly all of the yeas were Democratic, and only one Democrat, the Senator from Louisiana [Mr. BROUSSARD] voted in the negative. I voted in the negative against striking off a tariff of 50 cents on shingles.

The next vote came on the motion of the Senator from Idaho [Mr. BORAH] to place a duty of 25 cents a thousand on shingles. Nineteen voted in the affirmative, one of whom was the Senator from Wyoming [Mr. KENDRICK], the only Democrat so voting. The negatives were Republicans and Democrats, but all of the Democrats in the Senate voted "nay" with the exception of the Senator from Wyoming [Mr. KENDRICK]. So that the Republican Party's record on the proposition is still straight, and we can stand for a tariff on shingles.

Mr. DILL. I must remind the Senator that the Republican Party had control of both House and Senate by a tremendous majority in 1922, and that party must take the responsibility for that bill; it can not be saddled onto the Democrats.

Mr. WATSON. However that may be, it was an industry in the Senator's section of the country, and all of us who cared to do so and who believed in the protective tariff as a fundamental proposition voted to keep a tariff on shingles, and the Senator's party voted the other way. I am very glad to welcome my friend into the ranks of the protectionists. I hope that he will find a permanent abiding place among us.

Mr. DILL. I am not worried about being called a protectionist or being called a "tariff Democrat" or anything of that kind. It is not a question of "tariff Democracy" with me, but a question of justice and a square deal to the lumber industry of the Northwest.

Mr. WATSON. I understand that.

Mr. DILL. I believe in standing for what I think is for the best interest of the country and of my State, and I do not propose to allow myself to be led away by having attention called to some particular vote on some particular amendment. The tariff act is the product of the Republican Party in both House and Senate. That party had enormous majorities, and they can not get behind the minority of Democrats, who may not have voted for a certain provision or on a particular question as I might think they should have voted. I refuse to have such roll calls held up as an excuse for not blaming the Republicans for the present situation. I did not bring parties into this discussion, and I do not care to have the question considered as a party question.

Mr. WATSON. I want now to pay a little attention to what my friend from Maryland said a moment ago. He wants to have the Tariff Commission empowered, without any reference whatever to the American Congress, to fix tariff rates; in other words a commission not elected by the people, not responsible to the people, and which the people can under no conditions remove, unless they change the administration, is to do the work that has been entrusted to Congress.

Mr. BRUCE. Mr. President, the Senator has not correctly stated my position. The thought was that the Tariff Commission should be clothed with full power to prescribe tariff duties, but subject to congressional ratification. In other words, the Tariff Commission would be a congressional commission, but it would have the opportunity for deliberate investigation and for the employment of expert aid in arriving at its conclusions that Congress, independently of such a commission, would not have in arriving at its conclusions.

Mr. WATSON. That is the very object for which the Tariff Commission was created, I will say to my friend.

Mr. BRUCE. No. Tariff duties are only raised or lowered by the President under the flexible clause of the tariff act. Agreeable to the suggestion to which I have been referring, the President would be eliminated altogether from the making of tariff duties and the Tariff Commission would be reorganized and its members, as I have said, would receive a larger compensation than they receive now because their present compensation, I think, is insufficient. The members of the commission would also have a longer tenure and would be given full power, subject to congressional ratification, to deal with each and every tariff situation whatever that situation might be and to recommend to Congress the proper duty for meeting it.

Mr. WATSON. The object of the creation of the Tariff Commission as originally designed was to have an expert body that would find the difference between the cost of production here and abroad when the Republican Party was in power and a protective tariff law was to be enacted. The facts and the information were then to be given to Congress for the action of Congress. That was the very idea, but the suggestion later came in to empower the Tariff Commission with the authority to raise or lower rates by submitting their recommendations to the President after finding the facts.

I am opposed as an individual to permitting any commission not elected by the people, not responsible to the people, not removable by the people to arrange or fix a tariff rate or otherwise to levy taxes in the United States. For a thousand years our ancestors fought for the glorious privilege of taxing themselves, and in reality the fundamental on which the Revolutionary War was based was the principle of taxation without representation. Now are we going to begin a system that will take from Congress the power to tax the American people?

Mr. BRUCE. I do not agree with the Senator at all, because Congress, under my plan, would still have the power to adopt or to reject duties recommended by the Tariff Commission and reported to it; Congress would have complete control.

Mr. WATSON. That is precisely what the Tariff Commission does now, I would say to my friend.

Mr. BRUCE. No.

Mr. WATSON. Its duty is to recommend to Congress when we get ready to pass a tariff bill the rates that it has found are the proper rates. Of course, it also does other things.

Mr. BRUCE. Practically all it does is to look into the question of the difference between the cost of production in this country and abroad and then report to the President, so as to give the President the opportunity to act, under the flexible clause of the tariff act, to raise duties or lower duties.

Mr. WATSON. That is under the flexible provision of the tariff act only.

Mr. GLASS. I think practically all the members of the commission do is to draw their salary.

Mr. BRUCE. I can not agree with the Senator as to that.

Mr. WATSON. The Senator from Maryland has stated what was the initial object in creating the Tariff Commission. The original design of the men who formulated the Tariff Commission provision—and I happened to be one of them—was that the Tariff Commission should find the facts, report the facts to Congress when a tariff bill was to be passed; it was to have no other function. Then we enacted the flexible provision, and, in my judgment, diverted the Tariff Commission from its original purpose and design.

Mr. BRUCE. I will simply say that I have taken some little interest in the subject, and I know that it has been very carefully considered by the committee. It was originally composed of two Democrats and three Republicans, and the conclusion that has been reached by the committee is that of the whole committee, with the exception of a single member, who says that he is not ready as yet, at any rate, to unite in the conclusion arrived at by the majority of the committee.

Mr. WATSON. It is well-nigh impossible for this to be a nonpartisan Tariff Commission. If Republicans are appointed they are protectionists, and if Democrats are appointed they are for a revenue tariff.

Mr. GLASS. Real Democrats can be appointed on the commission.

Mr. BRUCE. I will say that when they are appointed to that commission it does not make one particle of difference whether they are Democrats or Republicans; in some measurable degree, at any rate, they are bound in the very nature of things to be protectionists.

Mr. WATSON. I wish that were true; it is theoretically true——

Mr. BRUCE. It has proved to be true.

Mr. WATSON. Oh, no; it has proved to the contrary, because the Tariff Commission has been at warfare within its own ranks until—I need not mention what has been done.

Mr. NEELY. Until the President stacked the commission.

Mr. WATSON. We had to get rid of some members of the commission and send them abroad to other positions.

Mr. BRUCE. That has been due to a great variety of causes, in my judgment. There was no occasion for it.

Mr. BORAH. Mr. President, I wonder if we can have a vote on this amendment.

Mr. WATSON. We can, so far as I am concerned.

Mr. GLASS. Mr. President, there may be a vote taken on the amendment as soon as I thank the Senator from Indiana for calling attention to the fact that the Democrats of 1922 adhered to the fundamental principles of the party in better style than they have ever done since.

Mr. WATSON. And probably better than they ever will again.

Mr. BRUCE. Mr. President, I have not had an opportunity to say what I want to say because I have been interrupted so frequently. When I say that the members of the Tariff Commission all become protectionists I do not mean that they become protectionists in the sense of being in favor of rapacious or exorbitant duties. What I mean to say is that into the views of every man who finds himself on that commission, whether he be a Democrat or a Republican, must enter in

some degree, though in many instances only a limited degree, the element of protection. That has been true of all tariff duties fixed by Congress. A striking illustration is the case of a member of the commission that I had the honor of having appointed to the commission myself.

I refer to Mr. Alfred P. Dennis, of the State of Maryland. If a Democrat is to be found within the confines of the United States, he is one; if there is a man to be found in the United States who is bitterly antagonistic to extortionate tariff duties, he is the man. And yet at the same time it has become a part of his duty and is in harmony with his convictions, I should say, to make the proper allowance for differences in costs of production abroad and in this country.

Mr. GLASS. And I want to say to the Senator from Maryland that no man that I know has more emphatically stated than he that the Tariff Commission as constituted is perfectly useless.

Mr. BRUCE. He is in favor of that commission being reorganized and of its being clothed with such power as to accomplish the objects that I have in view.

Of course, I am not surprised that this suggestion is not satisfactory to my friend the Senator from Indiana, because we all know he is a high protectionist. I will not say the highest of the high——

Mr. WATSON. I am pretty well up.

Mr. BRUCE. I will not go into relative altitudes as respects protectionists, but he is a high protectionist and there have been Members of the House and Members of the Senate that I could term "exorbitant protectionists." I have not that sort of protection in mind, but I have in mind a moderate, reasonable measure of protection in special cases, which practically all the Democrats that I have ever been thrown into association with favor in one degree or another when it comes to an industry in their own communities.

Mr. GLASS. That is the same thought that was advocated by Alexander Hamilton when he favored the upbuilding of our infant industries.

Mr. BRUCE. Well, the Tariff Commission should not have anything to do with the building up of an infant industry. That is beyond the scope of its power, of course; but it should have a right to look into competitive conditions of every sort and to contrast costs of production abroad with such costs in this country and to suggest to Congress tariff duties that would not rob the masses of the people or do any injustice to them and would yet afford at least moderate protection to our domestic industries where protection was needed at all.

There may have been a time when the ideas that I have been expressing may not have been regarded as sound Democratic ideas, but they are rapidly becoming so, because I will say that so far as the Tariff Commission—which was created by a Democratic administration—is concerned, there is no difference, so far as I know, between the Democratic members on it with regard to this question; and the opposition, so far as there is any Republican opposition, is, in my judgment, due to the fact that a certain element of the Republican Party does not want any deliberate, measured investigation of any kind made into the operations of the tariff, and behind them stand a lot of greedy, rapacious manufacturers whose idea is to come down to Congress and by pressure in one form or another, or by jugglery in one form or another, or by misrepresentation in one form or another to secure the very highest duties that they possibly can, without reference to the interests of the great mass of the people.

Mr. SMOOT. Mr. President, I ask unanimous consent that at the conclusion of the evening's business the Senate take a recess until 11 o'clock on Monday.

The PRESIDING OFFICER (Mr. ODDIE in the chair). Is there objection?

Mr. BORAH. I should like to ask a question in connection with the Senator's request. When is the conclusion of this evening's business to be?

Mr. SMOOT. I do not know.

Mr. NEELY. I want to ask when this evening's business is going to begin and not when it is going to conclude. The Senator starts at the wrong end; there has not been anything done as yet.

Mr. SMOOT. I make that request, Mr. President.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The question is on agreeing to the amendment of the Senator from Washington [Mr. DILL].

Mr. DILL. I ask for the yeas and nays.

Mr. GLASS. Mr. President, pertinent to this question, is there not somebody to stand here and speak for the consuming public? I venture to say that there are 20,000 people who buy shingles to every one who manufactures shingles, and they are the poor people of the country who buy shingles. The rich and well-to-do do not roof their houses any longer with wooden shingles; they use slate; they use terra cotta; they use the expensive manufactured materials. I repeat, it is the poor people who buy the shingles.

Mr. BORAH. Even those poor people are now buying shingles from Canada and are paying as much as they did before.

Mr. GLASS. I do not know whether they are buying shingles from Canada. It would appear to me that the transportation charges alone would preclude their buying shingles from Canada. The amendment which has been proposed would simply help a few border communities; it would not help the general public.

Mr. BORAH. Mr. President, it would help those and those only, practically, who manufacture shingles in the United States. If the Senator will take the time to look into the matter, he will find that the price of shingles has not gone down, as the mills in the State of Washington have closed. The Canadian manufacturers charge as high a price and are charging the price which we are now paying. We are not getting any of the benefit by reason of the fact that the shingles are being manufactured in Canada.

Mr. REED of Missouri. But if this proposed tariff duty were levied, and the mills were opened in this country, why would they be able to open?

Mr. BORAH. They would be able to open because that would exclude the introduction of shingles from Canada.

Mr. REED of Missouri. That is to say, that would exclude the introduction of shingles from Canada; but that still would not enable them to open unless they raised their price.

Mr. BORAH. They undoubtedly would have to raise their price.

Mr. REED of Missouri. Very well.

Mr. BORAH. But let me put it the other way: Prior to the time the mills were closed down we were paying no higher price for shingles in the West than we are paying now, after the mills have closed down.

Mr. REED of Missouri. Exactly; but let us follow that out for just a moment. I do not want to disagree from my friend from Idaho. We have agreed so many times. We have a condition to-day——

Mr. BORAH. If we can get the shingles in this country for the same price, we ought to manufacture them in this country.

Mr. REED of Missouri. Oh, yes; if we can get them for the same price.

Mr. BORAH. The history of the shingle industry in the Northwest shows that the transfer of the business to Canada did not lower the price.

Mr. REED of Missouri. Let us see why that was. Let us take it as it is now, and settle one question at a time.

The mills of the United States have the right to make shingles. The only reason why they can not make shingles is because the Canadian shingles are sold cheaper than the mills of the United States can make them. Therefore, the mills of the United States are closed. Therefore, the mills of the United States can not open until they raise the price. Therefore, if we pass a law to enable the raising of the price, the people of the United States will have to pay that increased price.

Mr. BORAH. When the mills in Washington are closed down there is no competition, and therefore Canada fixes her own price.

Mr. REED of Missouri. But the mills did not close down until the price was lowered; and the mills can open the minute the price is raised.

Is not this the fact? I am not very familiar with the Canadian tariff law, but I have been talking with the Senator from Washington.

We had free trade in logs and in shingles both ways. The United States did the idiotic thing of putting a tariff upon logs shipped in from Canada. Of course, when it did that, it protected some standing trees in this country; but it put a burden upon our own manufacturers which made their raw materials cost more. Then Canada put a tariff upon the exportation of those logs, and that meant that our mills could not get logs unless they paid two tariffs—one which we had levied and one which Canada levied—and it was the conjunction of those two things that closed our mills.

Now, it is proposed to remedy this artificial evil by what?

Mr. GLASS. By pyramiding it.

Mr. REED of Missouri. Yes; by pyramiding it; that is to say, by putting a tariff upon the Canadian manufactured product—to wit, the shingles—so that our mills can open, and pay the tariff levied by Canada upon the logs, and pay the tariff levied by the United States upon the logs, and collect the

whole business from every man who has to put a shingle on his roof.

Is it not manifest that what we ought to do is to repeal our tariff upon the logs coming in from Canada, and let them come in, and let our mills operate, and to proceed further along sensible lines and say to the Canadian Government—of course, we can not do it as a legislative body, but our administrative department can—"We will let your logs come in free if you will agree to let our shingles come in free"? Thus our mills could open, and we would all get cheaper shingles.

It seems to me that we are trying to meet an evil which we inaugurated by adding to it another evil. That is not the way to get at the matter, in my judgment. It is a mistake to pyramid these charges, as the Senator from Virginia said. When we get through, who pays them? The people of the United States pay them. The great consuming public pays them.

I should like to see these mills opened. It just so happens that for many years my firm has represented a great lumber-manufacturing concern; but I am not willing to open the mills of this country at the expense of the American people when the mills have been closed by the idiotic legislation of this Congress shutting out logs.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Washington [Mr. DILL].

Mr. DILL. I call for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Secretary will call the roll.

Mr. NEELY. Mr. President, a point of order. I protest that the demand for the yeas and nays was not sustained; and I ask for a count on that.

The PRESIDING OFFICER. Those who second the demand for the yeas and nays will raise their hands. [After a pause.] A sufficient number have seconded the demand. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES], and withhold my vote. If I were at liberty to vote I should vote "nay."

Mr. WARREN (when his name was called). I have a standing pair with the junior Senator from North Carolina [Mr. OVERMAN]. I am informed that if that Senator were present he would vote "nay." If I were at liberty to vote I should vote "yea." I withhold my vote.

Mr. WATSON (when his name was called). I have a pair with the Senator from South Carolina [Mr. SMITH]. I am informed that if present he would vote "nay," and therefore I desire to vote. I vote "nay."

The roll call was concluded.

Mr. DILL. My colleague [Mr. JONES] is absent because of illness. If he were present, he would vote "yea."

Mr. NEELY (after having voted in the negative). When my name was called I voted "nay." I have a pair with the senior Senator from Kentucky [Mr. SACKETT]; but I am informed that if he were present he would vote as I have voted. Therefore I will allow my vote to stand.

Mr. GLASS. Being informed that the Senator with whom I am paired would vote as I shall vote, I vote "nay."

Mr. EDGE. Announcing the same pair with the Senator from New York [Mr. COPELAND], and being informed that he would vote as I shall vote, I vote "nay."

Mr. BINGHAM. Has the junior Senator from Wyoming [Mr. KENDRICK] voted?

The VICE PRESIDENT. The junior Senator from Wyoming has not voted.

Mr. BINGHAM. I have a pair with that Senator; and, as he is not present, I withhold my vote.

Mr. REED of Pennsylvania (after having voted in the affirmative). I have a general pair with the Senator from Delaware [Mr. BAYARD]. I am told that if he were present he would vote "nay." I am unable to obtain a transfer, and therefore I regretfully withdraw my vote.

Mr. GERRY. I desire to announce that the Senator from Utah [Mr. KING] is necessarily detained on important business.

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from Colorado [Mr. PHIPPS] with the Senator from Georgia [Mr. GEORGE];

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from New Hampshire [Mr. KEYES] with the Senator from New Jersey [Mr. EDWARDS];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from West Virginia [Mr. GOFF] with the Senator from Tennessee [Mr. TYSON];

The Senator from Minnesota [Mr. SCHALL] with the Senator from Alabama [Mr. BLACK]; and

The Senator from Rhode Island [Mr. METCALF] with the Senator from North Carolina [Mr. SIMMONS].

The result was announced—yeas 13, nays 41, as follows:

YEAS—13

Borah	Johnson	Pittman	Vandenberg
Brookhart	La Follette	Shipstead	
Capper	McNary	Shortridge	
Dill	Nye	Steiwer	

NAYS—41

Ashurst	Gerry	McKellar	Smoot
Barkley	Gillett	Mayfield	Stephens
Blaine	Glass	Moses	Thomas
Bruce	Greene	Neely	Tydings
Caraway	Hale	Norbeck	Wagner
Curtis	Harris	Oddie	Walsh, Mass.
Cutting	Harrison	Pine	Walsh, Mont.
Deneen	Hayden	Reed, Mo.	Watson
Edge	Heflin	Robinson, Ark.	
Fess	Howell	Robinson, Ind.	
Fletcher	Locher	Sheppard	

NOT VOTING—40

Bayard	Edwards	King	Schall
Bingham	Frazier	McLean	Simmons
Black	George	McMaster	Smith
Blease	Goff	Metcalf	Steck
Bratton	Gooding	Norris	Swanson
Broussard	Gould	Overman	Trammell
Copeland	Hawes	Phipps	Tyson
Couzens	Jones	Ransdell	Warren
Dale	Kendrick	Reed, Pa.	Waterman
du Pont	Keyes	Sackett	Wheeler

So Mr. DILL's amendment was rejected.

Mr. ROBINSON of Arkansas (at 10.45 p. m.). Mr. President, I move that the Senate take a recess in pursuance of the order previously made.

Mr. JOHNSON. Upon that I demand the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. GLASS (when his name was called). I have a general pair with the senior Senator from Connecticut [Mr. MCLEAN], who is absent. Not knowing how he would vote in this instance, I withhold my vote.

Mr. REED of Pennsylvania (when his name was called). I transfer my pair with the Senator from Delaware [Mr. BAYARD] to the Senator from Michigan [Mr. COUZENS], and vote "nay."

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. Not knowing how he would vote if present, I withhold my vote.

Mr. WATSON (when his name was called). I transfer my pair with the senior Senator from South Carolina [Mr. SMITH] to the senior Senator from Nebraska [Mr. NORRIS], and vote "nay."

The roll call was concluded.

Mr. EDGE. I transfer my pair with the senior Senator from New York [Mr. COPELAND] to the senior Senator from Vermont [Mr. DALE], and vote "nay."

Mr. WARREN. I transfer my pair with the junior Senator from North Carolina [Mr. OVERMAN] to the junior Senator from Colorado [Mr. WATERMAN], and vote "nay."

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Colorado [Mr. PHIPPS] with the Senator from Georgia [Mr. GEORGE];

The Senator from Kentucky [Mr. SACKETT] with the Senator from West Virginia [Mr. NEELY];

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from New Hampshire [Mr. KEYES] with the Senator from New Jersey [Mr. EDWARDS];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from West Virginia [Mr. GOFF] with the Senator from Tennessee [Mr. TYSON];

The Senator from Minnesota [Mr. SCHALL] with the Senator from Alabama [Mr. BLACK]; and

The Senator from Rhode Island [Mr. METCALF] with the Senator from North Carolina [Mr. SIMMONS].

The result was announced—yeas 23, nays 34, as follows:

YEAS—23

Ashurst	Fletcher	Locher	Thomas
Barkley	Gerry	McKellar	Tydings
Bratton	Harris	Reed, Mo.	Wagner
Broussard	Harrison	Robinson, Ark.	Walsh, Mass.
Bruce	Hawes	Sheppard	Walsh, Mont.
Caraway	Hayden	Stephens	

NAYS—34

Bingham	Fess	Mayfield	Shipstead
Blaine	Gillett	Moses	Shortridge
Borah	Greene	Norbeck	Smoot
Brookhart	Hale	Nye	Steiwer
Capper	Howell	Oddie	Vandenberg
Curtis	Johnson	Pine	Warren
Cutting	La Follette	Pittman	Watson
Deneen	McMaster	Reed, Pa.	
Edge	McNary	Robinson, Ind.	

NOT VOTING—37

Bayard	George	McLean	Smith
Black	Glass	Metcalf	Steck
Blease	Goff	Neely	Swanson
Copeland	Gooding	Norris	Trammell
Couzens	Gould	Overman	Tyson
Dale	Heflin	Phipps	Waterman
Dill	Jones	Ransdell	Wheeler
du Pont	Kendrick	Sackett	
Edwards	Keyes	Schall	
Frazier	King	Simmons	

So the Senate refused to take a recess.

Mr. HOWELL. Mr. President, I send to the desk an amendment, which I offer.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. On page 237, after line 6, to insert the following:

(e) All claims, rebates, refunds, compromises, set-offs, and credits in any form whatsoever allowed by the Commissioner of Internal Revenue in excess of $10,000 on account of income taxes shall be audited by the General Accounting Office the same as other expenditures of the Government, notwithstanding the provisions of any other law.

Mr. HOWELL. Mr. President, the expenditures of practically every department of government are audited, no matter how small the items may be. There is an exception, however, in connection with the Bureau of Internal Revenue in the Treasury Department.

Mr. HARRISON. Mr. President, will the Senator yield just for a question?

Mr. HOWELL. I yield.

Mr. HARRISON. May I ask the Senator from Utah, in the time of the Senator from Nebraska, how long he expects the Senate to remain in session to-night? May I say, prefacing that, that the Senator is aware that we have been here since 11 o'clock this morning, it is now 11 o'clock, within an hour of Sunday, and there are a good many more of these amendments. There have been no delays, so far as this side of the aisle is concerned, may I say to the Senator; on the contrary, I think a majority have voted against all of these tariff amendments. Can we not get a unanimous-consent agreement now that we will vote on the measure Monday, so that we can get at least a little sleep? If we can not, will not the Senator give us some idea when the other side is going to make a motion to recess to-night?

Mr. SMOOT. I think the sentiment on this side of the Chamber is that they desire to act on the bill to-night.

Mr. HARRISON. Evidently so, and the desire over here among a great number of Senators is to act, but that is an impossibility. Everybody knows that.

Mr. SMOOT. Oh, no.

Mr. HARRISON. I did not know that anyone here would think we could act to-night on these amendments, in view of the threats of certain Senators and the desire of certain Senators to speak. Does the Senator expect the Senate to run longer than 12 o'clock to-night?

Mr. SMOOT. I think it will take us that long to pass the bill.

Mr. BRUCE. Mr. President, I desire to serve notice on the Senator, the chairman of the Committee on Finance, that as far as one of these amendments is concerned, I should myself take up enough time in relation to it, in conjunction with other Members of the Senate interested in that particular amendment, to make it impossible to bring this bill to a vote to-night.

Mr. MOSES. Does the Senator mean before sunrise?

Mr. BRUCE. I should say before sunrise.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. BRUCE. I yield.

Mr. ROBINSON of Arkansas. Is it the purpose of those in charge of the bill to carry the consideration of the bill over Sunday? I think all will agree that I have exerted every effort within my power to facilitate the final disposition of the bill. What is the consideration that would impose the indecent purpose to force the Senate, after having been in session already for 12 hours, to continue in indefinite session? Is that the purpose of those in charge of this bill? If it is, I want to be informed of it.

Mr. SMOOT. I have no such purpose, as far as I am concerned.

Mr. FLETCHER. Can we not get consent to vote at 2 o'clock Monday?

Mr. CURTIS. If we can, I hope such an agreement will be reached. We would not lose any time if we should meet at 11 o'clock Monday morning and vote by 2. If we pass this bill to-night, and adjourn, we will put in two hours on the calendar Monday morning, and we could save just as much time by recessing until 11 o'clock Monday morning. I ask unanimous consent——

Mr. REED of Pennsylvania. Is the Senator about to propose a definite time for a final vote on the passage of the bill?

Mr. CURTIS. To fix the time, so that we can vote not later than 2 o'clock.

Mr. REED of Pennsylvania. On the bill and all amendments?

Mr. CURTIS. Yes.

Mr. HARRISON. Will not the Senator offer the unanimous-consent request that was offered once before, with the limitation on debate upon each amendment and the bill? Put it at five minutes, if you want to do so.

Mr. CURTIS. I ask unanimous consent that when the Senate recess to-night it recess until 11 o'clock on Monday——

The VICE PRESIDENT. That has already been agreed to.

Mr. CURTIS. I want to repeat it in the way I have stated, because I wish to submit with it another request, which is that general debate close upon this measure at 1 o'clock on Monday; that after 1 o'clock debate to be limited to 10 minutes on the bill and 10 minutes on amendments, and that we vote at 2 o'clock on the passage of the bill.

Mr. REED of Pennsylvania. Does that mean that 10 minutes' debate will be permitted on each amendment?

Mr. CURTIS. After 1 o'clock.

Mr. REED of Pennsylvania. Then if more than six amendments are offered before that hour, after the first six the amendments have to be voted on without debate.

Mr. CURTIS. I propose a final vote at 2 o'clock. That will give two hours for general debate, from 11 to 1, and then after 1 o'clock debate will be limited to 10 minutes on all amendments and 10 minutes on the bill, up to 2 o'clock.

Mr. BROOKHART. Why not five minutes after 1 o'clock?

Mr. ROBINSON of Arkansas. Mr. President, I suggest to the Senator from Kansas that he modify his proposal so that there may be a measure of debate upon all amendments which may be proposed. The limitation, so far as I am concerned, could be made quite brief. I would suggest that after the hour of 2 o'clock debate be limited to five minutes on the part of each Senator on any amendment that may be pending or that may be proposed.

Mr. CURTIS. That will be satisfactory.

Mr. ROBINSON of Arkansas. There are some Senators who have waited quite patiently for the opportunity to offer amendments, amendments that will require some discussion, and I think it would be better procedure to include that provision.

Mr. CURTIS. The modification is satisfactory to me, but I think it ought to be made at 1 o'clock instead of 2, because we will have two hours of general debate from 11 o'clock to 1.

Mr. ROBINSON of Arkansas. I have no objection to the change.

Mr. REED of Pennsylvania. That will be satisfactory to me.

Mr. BLAINE. Mr. President, I can not agree to a five-minute limitation on amendments. The debate has been going on for two and a half weeks or more. There are two important amendments remaining on the table, one presented by the Senator from Missouri [Mr. REED] and the other presented by myself. In my opinion those are the most important amendments which have been offered to the bill from the standpoint of the people of the country. To limit debate upon such important propositions to a few minutes after all the time that has been wasted is a proposition to which I can not consent. In all fairness it ought not to be asked.

Mr. CURTIS. Mr. President, I understood the Senator earlier in the evening to state that 35 minutes would be sufficient time for him to debate the one amendment in which he is interested. If that is so, I will ask unanimous consent that after 1 o'clock debate be limited to 15 minutes on the bill and 20 minutes on any amendment, and that after 2 o'clock debate be limited to 5 minutes.

Mr. BLAINE. Then if the debate continues up to 2 o'clock, which, of course, would be the case, the same purpose is served

as under the former request. Everyone offering an amendment after 2 o'clock is practically excluded from engaging in the debate.

Mr. CURTIS. I understood the Senator to state that there are two important amendments on which he wanted time. My proposal would give three hours for those two important amendments. It does seem to me we could come to a vote on those two amendments in that time after all the debate we have had heretofore.

Mr. BLAINE. The amendment submitted by the Senator from Missouri is the amendment before the Senate. I know, or at least I have a right to believe, that the entire time will be consumed in the discussion of that amendment, with all the interruptions that are bound to occur. Therefore, the amendment which I have proposed will practically be submitted without any debate whatever.

Mr. SMOOT. Perhaps the Senator from Missouri would agree now upon taking a vote on his amendment at a particular time?

Mr. BROOKHART. I suggest that two hours, from 11 to 1 o'clock, be allowed for the amendment of the Senator from Missouri, and then one hour to the Senator from Wisconsin on his amendment, and that then the five-minute limitation be applied.

Mr. SMOOT. Provided the Senator from Wisconsin wants that length of time.

Mr. JOHNSON. Mr. President, I will give my consent to a vote at 2 o'clock, or possibly a short time thereafter, if it may be agreed that we shall vote upon the bill and every amendment at that time and dispose of the bill entirely. That is the only consent that I will give.

Mr. CURTIS. Would the Senator consent to a final vote at 3 o'clock?

Mr. JOHNSON. I am willing to say 3 o'clock if discussion of the bill be closed at that time and final action taken on it, and we then go on with the unfinished business. Let that be the understanding.

Mr. CURTIS. Mr. President, I ask unanimous consent——

Mr. BRUCE. Just a moment. As I have said, one of the amendments is a proposition in which I feel a very considerable degree of interest. That is the amendment relating to the field deputy internal revenue collectors. I do not ask for much time on it. If I can be assured that I shall have 10 minutes on it, I will ask nothing more.

Mr. CURTIS. The Senator would have 10 minutes under the proposed agreement.

Mr. BRUCE. That is all right.

Mr. CURTIS. Mr. President, I ask unanimous consent——

Mr. BRUCE. Just one moment further. Does not the Senator think his request ought to be broad enough to exclude the consideration of any other subject during the time we are going to devote to the bill?

Mr. CURTIS. I think that ought to be done.

Mr. BRUCE. It has been done heretofore.

Mr. CURTIS. I think no one ought to offer any bills or suggestions for unanimous consent to do anything, but let us go on and get rid of the tax bill.

Mr. GLASS. Mr. President, may I ask if that proposition includes the Pope and prohibition? [Laughter.]

Mr. CURTIS. I ask unanimous consent that when the Senate concludes its business this evening it take a recess until 11 o'clock Monday morning; that general debate proceed on the amendment to be offered by the Senator from Missouri [Mr. REED] until 12 o'clock and on the amendment offered by the Senator from Wisconsin [Mr. BLAINE] until 1 o'clock; and that from that time on debate be limited to 10 minutes on each amendment and 15 minutes on the bill, and that the bill be voted upon at not later than 3 o'clock.

Mr. REED of Pennsylvania. Mr. President, reserving the right to object, I have just counted the number of amendments on the clerk's desk. There are 26 amendments which have been printed and are lying on the table, not yet acted on. I have two amendments which have not yet been printed. I have no doubt many other Senators have a considerable number.

The effect of the proposed unanimous-consent agreement, or the latter part of it requiring a vote at not later than 3 o'clock, would be to impose the gag rule on about 20 of the 26 amendments. I am perfectly willing to agree to a five-minute limitation, but it is not fair to do otherwise. We have seen it happen in the past where amendments are read and voted down with a roar by the Senate that does not know even what is in the amendment that is voted on.

Mr. CURTIS. The Senator from California [Mr. JOHNSON] said he would not consent that the vote should be taken later than 3 o'clock. I think that every Member of the Senate already has his mind made up how he is going to vote on each one of the amendments yet to be considered, and there will not be a vote changed by any discussion or argument that may be presented.

Mr. ROBINSON of Arkansas. Mr. President, I call for the regular order.

The VICE PRESIDENT. The regular order is demanded. The question is on agreeing to the amendment submitted by the Senator from Nebraska [Mr. HOWELL].

Mr. HOWELL. Mr. President, the expenditures of every department of Government, or nearly every department of Government, are audited by the Comptroller General, no matter how small the purchases may be. However, that is not true of a division of the Treasury Department, the Bureau of Internal Revenue. Although the expenditures made by that department have involved billions of dollars, there is no audit whatever by the Comptroller General to determine whether the expenditures are made according to law or in accord with regulations.

Section 3220 of the Revised Statutes, as amended by section 1111, act of February 26, 1926, authorizes the Commissioner of Internal Revenue to remit, refund, and pay back all taxes erroneously or illegally assessed or collected without authority, and all taxes that appear to be unjustly assessed or excessive in amount or in any manner wrongfully collected.

Mr. SMOOT. Mr. President, will the Senator yield to me?

Mr. HOWELL. I yield.

Mr. SMOOT. I will say to the Senator that I am perfectly willing to accept the amendment and let it go to conference. There is considerable merit in the amendment and I would like to have it go to conference and be considered there.

Mr. HOWELL. If the amendment is accepted, it is unnecessary for me to say more.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Nebraska [Mr. HOWELL].

The amendment was agreed to.

Mr. REED of Pennsylvania. Mr. President, I send to the desk an amendment which I offer.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 36, line 24, strike out "$20,000" and insert "$30,000," so as to read:

(3) "Earned net income" means the excess of the amount of the earned income over the sum of the earned income deductions. If the taxpayer's net income is not more than $5,000, his entire net income shall be considered to be earned net income, and if his net income is more than $5,000, his earned net income shall not be considered to be less than $5,000. In no case shall the earned net income be considered to be more than $30,000.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Pennsylvania.

Mr. BRUCE. Mr. President, I move that we take a recess until 11 o'clock on Monday next. It is perfectly obvious that this assemblage is going to pieces in a few minutes and that we are all engaged in an absolutely futile task in remaining here at this hour.

The VICE PRESIDENT. The question is on the motion of the Senator from Maryland.

Mr. MOSES. Let us have the yeas and nays on the motion of the Senator from Maryland.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. GLASS (when his name was called). I transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the senior Senator from Iowa [Mr. STECK] and vote "yea."

Mr. NEELY (when his name was called). On this vote I am paired with the senior Senator from Kentucky [Mr. SACKETT]. I do not know how he would vote if he were present. Therefore I withhold my vote.

Mr. REED of Pennsylvania (when his name was called). I transfer my pair with the Senator from Delaware [Mr. BAYARD] to the Senator from Michigan [Mr. COUZENS] and vote "nay."

Mr. SWANSON (when his name was called). I transfer my pair with the senior Senator from Washington [Mr. JONES] to the junior Senator from Utah [Mr. KING] and vote "nay."

Mr. WARREN (when his name was called). I transfer my pair with the Senator from North Carolina [Mr. OVERMAN] to the junior Senator from Colorado [Mr. WATERMAN] and vote "nay."

Mr. WATSON (when his name was called). I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Nebraska [Mr. NORRIS] and vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before as to my pair and its transfer, I vote "nay."

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Colorado [Mr. PHIPPS] with the Senator from Georgia [Mr. GEORGE];

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE].

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from New Hampshire [Mr. KEYES] with the Senator from New Jersey [Mr. EDWARDS];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from West Virginia [Mr. GOFF] with the Senator from Tennessee [Mr. TYSON];

The Senator from Minnesota [Mr. SCHALL] with the Senator from Alabama [Mr. BLACK]; and

The Senator from Rhode Island [Mr. METCALF] with the Senator from North Carolina [Mr. SIMMONS].

The result was announced—yeas 16, nays 42, as follows:

YEAS—16

Ashurst	Fletcher	Harrison	McKellar
Broussard	Gerry	Hawes	Reed, Mo.
Bruce	Glass	Hayden	Tydings
Caraway	Harris	Locher	Walsh, Mass.

NAYS—42

Barkley	Fess	Moses	Shortridge
Bingham	Gillett	Norbeck	Smoot
Blaine	Greene	Nye	Steiwer
Bratton	Hale	Oddie	Swanson
Brookhart	Heflin	Pine	Thomas
Capper	Howell	Pittman	Vandenberg
Curtis	Johnson	Reed, Pa.	Wagner
Cutting	La Follette	Robinson, Ark.	Warren
Deneen	McMaster	Robinson, Ind.	Watson
Dill	McNary	Sheppard	
Edge	Mayfield	Shipstead	

NOT VOTING—36

Bayard	Frazier	McLean	Simmons
Black	George	Metcalf	Smith
Blease	Goff	Neely	Steck
Borah	Gooding	Norris	Stephens
Copeland	Gould	Overman	Trammell
Couzens	Jones	Phipps	Tyson
Dale	Kendrick	Ransdell	Walsh, Mont.
du Pont	Keyes	Sackett	Waterman
Edwards	King	Schall	Wheeler

So the Senate refused to take a recess.

The VICE PRESIDENT. The question is on the amendment of the Senator from Pennsylvania.

Mr. REED of Pennsylvania. Mr. President, I shall not take three minutes to explain this amendment. At the present time we are following the policy that is followed in Great Britain of allowing a slight reduction in the tax where a part of the income of the taxpayer is earned income instead of income from investment.

Mr. BRUCE. May I interrupt the Senator from Pennsylvania a moment?

Mr. REED of Pennsylvania. I yield to the Senator from Maryland.

Mr. BRUCE. Does the Senator really think, in the present state of exasperation of a large part of the Members of the Senate, that his amendment will receive any fair consideration? I do not.

Mr. REED of Pennsylvania. I should be sorry to believe so, because I do think that the Senate is sincerely desirous of disposing of this bill; and, in spite of the exasperation that most of us share, I believe that the Senate still preserves a large part of its wisdom.

Mr. BRUCE. I will say this: If there were any disposition to filibuster now on this bill, if there were any desire to obstruct its passage, I would not have said what I did; but there is not; it is simply a question of whether we are going to continue in session to-night or are going to proceed like rational beings on Monday instead of unduly protracting our proceedings to-night. I venture to say that no amendment that is offered by the Senator from Pennsylvania or by any other Senator is going to get the measure of consideration that it deserves in the present state of mind of a large portion of the Members of the Senate.

Mr. REED of Pennsylvania. The Senator has just made his effort to recess without success. I should like, by taking less than three minutes, to explain the amendment. I think the explanation will convince the Senator that the Senate is still willing to consider amendments seriously if they are seriously proposed.

Mr. BRUCE. I expect to vote "nay," I will tell the Senator frankly.

Mr. REED of Pennsylvania. Very good. If we may just postpone frivolity for a moment I should like to explain what the amendment means.

Mr. BRUCE. It is not frivolity; I assure the Senator it is gravity of the most pronounced description.

Mr. REED of Pennsylvania. Mr. President, have I the floor?

The VICE PRESIDENT. The Senator from Pennsylvania has the floor.

Mr. REED of Pennsylvania. Mr. President, at the present time we are permitting a slight reduction in tax, where the taxpayer shows that his income is earned by the rendition of personal service. The minimum is $5,000; that is to say, every taxpayer whose income is $5,000 or more is presumed conclusively to have earned the first $5,000 of it; and if, as a matter of fact, he can show that he has earned more than that, then he is permitted a reduction amounting to one-fourth of the tax on such income as he has up to $20,000. The sole purpose of the amendment is to increase that maximum permissible earned income of $30,000.

The reason that Congress has set a maximum is that it has been cautious to prevent an abuse of the privilege by permitting imaginary salaries to be paid by corporations to their officers. It has been found that the present limitation is not abused. We are all agreed that the principle is sound, and therefore I offer the amendment to raise the maximum from $20,000 to $30,000. The loss in revenue entailed by this would be comparatively slight, and it would redound to the benefit of those taxpayers who are contributing to the upbuilding and the welfare of the country by actual effort and not merely sitting passive and receiving an unearned income.

Mr. BRUCE. Mr. President, it is perfectly obvious that this amendment is going to be followed by another and another and another until practically the crack of doom. I trust that the Senate will have an opportunity to consider each and every amendment that may be offered for the rest of the night at a later stage of our proceedings, but I trust that every amendment that is offered under such unreasonable conditions as those under which this amendment is being pressed now will be voted down.

Mr. SMOOT. Mr. President, I will say that the committee was opposed to this amendment and voted against it; and I see no reason why it should be adopted.

Mr. REED of Missouri. Mr. President, I should like to say a word seriously to the Senate on this matter.

There ought to be a great distinction between the income that a man acquires by his labor from day to day and the income which he derives from invested capital or from something that he inherits. The injustice of the rule as applied is that it works hardship particularly to all classes of professional men.

Two men start out in life at the same time. Neither of them possesses any capital. One of them engages in the mercantile business and the other enters a profession, whether it is law, medicine, teaching, engineering, or any other profession. Generally neither of them makes a large sum of money to begin with, but the one who engages in the merchandising business as soon as he acquires an income is allowed before he pays any income tax to deduct 6 per cent upon his capital.

The man whose capital is in his brain does not secure any such exemption or allowance. The man who is in the profession generally goes along for a number of years, barely making a living; his capital is his gradually increased knowledge and reputation; but he is allowed nothing of an exemption upon that capital. The other man who is engaged in the mercantile business continues to increase the goods upon his shelves; his capital is there all the time, and he obtains the exemption of 6 per cent.

Mr. SMOOT. To what 6 per cent does the Senator refer?

Mr. REED of Missouri. No surtax is paid on any income until 6 per cent has been deducted.

Mr. SMOOT nodded in the negative.

Mr. REED of Missouri. Why does the Senator from Utah shake his head. What does he mean?

Mr. SMOOT. I do not know what the Senator means by a deduction of 6 per cent.

Mr. REED of Missouri. I mean to say that any corporation is allowed to earn or was granted an allowance of 6 per cent upon the capital that it has invested.

Mr. SMOOT. The excess profits tax, I will say to the Senator, has been repealed; of course, he knows that; but the Senator, I think, has confused that with the income tax. As to corporations, they pay the regular rate imposed under the bill, and there is no 6 per cent deduction.

Mr. SWANSON. Mr. President, if the Senator will allow me, I think I can explain what the Senator means. I think he has in mind the fact that if a taxpayer receives dividends from a corporation which itself has paid the tax the normal tax is not assessed on the dividends so paid.

Mr. SMOOT. That relates to an individual.

Mr. SWANSON. Yes; to an individual.

Mr. REED of Missouri. That is what I had in mind, although I may have expressed it awkwardly. After a period of years—and this is the particular part I want to stress—the professor in the school who has obtained a reputation, the writer who has obtained a reputation, or the lawyer, or the doctor, or the engineer, has arrived at a period where he begins to earn, whereas in the past he earned but little. When that period arrives they find the taxes loaded upon them very heavily because their income is income that has increased suddenly and within a few years; but all the years of the past, when they earned but a small income, are not taken into account.

Mr. President, it seems to me that these classes of people ought to be encouraged.

There is another feature which is akin to what I spoke of. Take the lawyer: He may work upon a case for 10 years. It may be a case that is of such character that he can not obtain any fee until the case is concluded. Then he suddenly receives the fee all in one year. He can not distribute it over the years that are past. Upon the income of that year he pays an enormous tax, and the next year he may earn but little. There is no arrangement in our tax law by which earnings of that character can be distributed over a period of years, because they would have to be set up on the taxpayer's books from year to year, and that can not be done in those cases.

What is true of the lawyer is true of the doctor, or may be true of him. It may be true of the engineer; and to allow this moderate amount of exemption, it seems to me, is only fair and proper.

Mr. LA FOLLETTE. Mr. President, I desire to say only a few words in support of the amendment offered by the Senator from Pennsylvania.

In my judgment, the theory of permitting deductions for earned income is sound. The only reason for placing a limitation upon it is the difficulty in administration, which every person who has studied the subject recognizes. It does seem to me that permitting an earned-income deduction up to $30,000 is just when one considers the difference in the amount of money which is paid by the professional worker or the industrial worker and the amount paid by the person who derives his income from bonds and stocks. The deductions are four or five times larger for the latter class than for the individual who obtains his income from professional pursuits. Therefore, I hope the amendment offered by the Senator from Pennsylvania will prevail.

Mr. REED of Pennsylvania. I call for the yeas and nays upon the amendment.

The yeas and nays were not ordered.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The question is on the amendment of the Senator from Pennsylvania.

The amendment was agreed to.

Mr. SMOOT. Now I want to suggest once again a unanimous-consent agreement.

I ask unanimous consent that on Monday the Senate meet at 10 o'clock instead of 11; that between 10 and 11 o'clock the amendment of the Senator from Missouri [Mr. REED] be considered; that between 11 and 12 o'clock the amendment of the Senator from Wisconsin [Mr. BLAINE] be considered; that after 12 o'clock speeches be limited to five minutes upon any amendment, and five minutes upon the bill, and that we vote upon the bill not later than 3 o'clock.

The PRESIDING OFFICER. Is there objection to the proposed unanimous-consent agreement?

Mr. REED of Missouri. Mr. President, I should like to have the Senator modify that request. I have explained to the Senator that I do not want to be in the position of objecting unless I am forced to do so. I am not taking the arbitrary position that the Senate has to do a particular thing by a particular hour.

I have explained that I wanted time for the consideration of an amendment which I present, which involves a principle which I think is of great importance, and which I know several Senators desire to discuss. I reluctantly consented earlier in the evening to an arrangement which would have left a maximum of two hours for the consideration of that amendment. The amendment of the Senator from Wisconsin [Mr. BLAINE] I believe to be generally of the same character. I hope the Senator can change his proposition so that there can be an hour and a half allowed, if it is taken, for the amendment I have suggested.

Mr. SMOOT. The Senator from Wisconsin [Mr. BLAINE] told me earlier in the evening that he would not want more than a half hour; and, if that be the case, then of course we could have an hour and a half for the amendment of the Senator from Missouri, and a half-hour for the amendment of the Senator from Wisconsin.

Mr. REED of Missouri. Put another half hour in there, and then the Senator from Wisconsin and I will divide the time. We will agree on it.

Mr. SMOOT. I will ask the Senator from California [Mr. JOHNSON], shall we make it 3.30?

Mr. JOHNSON. I will agree, sir, to 3 o'clock.

Mr. REED of Missouri. Mr. President, when any Senator—and I am as good a friend as the Senator has—will not yield 30 minutes in the interest of the desires of others——

Mr. JOHNSON. Wait a minute, Mr. President. If we begin to indulge in crimination and recrimination, we will get nowhere.

Mr. REED of Missouri. We are not going to indulge in any crimination.

Mr. JOHNSON. I hope the Senator will not, with me.

I have stood here, sir, for three weeks. I have stood here, yielding to every request that has been made of me in the endeavor to accommodate every Senator upon this floor. There is not a thing which has been asked of me in that three weeks with which I have not complied in order to accommodate Senators.

I have in my charge a measure the importance of which, in my opinion, transcends even the importance of the tax measure. On that measure we are entitled to a vote. I am facing difficulties of which the Senator is aware. I am facing a filibuster which has been already threatened concerning that bill.

I need every hour of the time that it is possible to secure between now and adjournment in behalf of that bill. It is because of its importance, and because up to this moment I have never denied a request of anybody, that I am endeavoring to insist now upon every conceivable hour that may be accorded that measure.

That is the reason why I have done as I have. This is the first time that I have ever objected, in 12 years of service in this body, to a unanimous-consent agreement. This is the first time in 12 years, sir, that I have not yielded my own desires to those of my fellows and those of my colleagues. But, now, sir, I have reached the point where to yield further yields the lives of 60,000 people, in my opinion, and yields a measure that demands at the hands of this body some sort of action. That is the reason for the attitude that I have assumed.

Mr. REED of Missouri. And, Mr. President, all that depends upon 30 minutes!

Mr. JOHNSON. No; it does not all depend upon 30 minutes at all.

Mr. REED of Missouri. That is the only point that I asked the Senator to concede—to make it 3.30 instead of 3.

Mr. JOHNSON. You may have your 3.30. I will yield to you, as I have yielded to you before. Take your 3.30, and we will have unanimous consent, if you desire, that we vote at 3.30 Monday afternoon; but at 3.30 Monday afternoon let it be understood that the Boulder Dam bill will go upon this floor; and then I want the consideration of the Senator from Missouri in the endeavor ultimately during the week to get a vote before this body.

What a horrid thing it is that a measure like this shall be filibustered out of existence in one session, and then in another session shall be threatened with a filibuster and shall be jockeyed until the very last day of the session!

I have no desire to complain of anybody. I have not whined about the situation in which I find myself. I have not in any way or in any shape criticized anybody; but I have reached the limit, sir. I want to go forward with this bill, and we ought to go forward with it; and the Senate ought to accord us a right to have a vote upon it.

Mr. DILL. What is the grievance of the Senator?

Mr. REED of Missouri. Mr. President, the Senator from California does not mean to say that I have thrown any obstacle in the way of his bill I am sure.

Mr. JOHNSON. Oh, I am not saying that you have thrown any obstacles in its way.

Mr. REED of Missouri. Neither at this session nor at the last session.

Mr. JOHNSON. But let me recall the situation to the Senator.

Here is an amendment of the Senator that is pending—an amendment that was presented days ago. What would one of the rest of us have done, I ask the Senator from Missouri? We would have come into this body days ago, presented our amendment, argued it, and argued it to the limit that we desired. The Senator from Missouri I do not complain about, nor do I criticize him at all because of his methods; but his methods are that he may take what time he desires in this legislative body; and he arrogates to himself, it seems to me, privileges that are not accorded to other Members of the body.

I ask neither rights nor privileges from this body. I ask only that it be a body that dare legislate where there is a great

Power Trust spending $400,000 to prevent the passage of this bill by the Congress of the United States. I ask no favor of any man. I ask only that I be given a right to have a vote in this body; and that is why every hour now is so precious upon this measure.

Mr. REED of Missouri. Mr. President, I can not understand the attitude of the Senator at all. I shall not waste any time trying to understand it.

The amendment that I introduced was written and introduced on yesterday. It was worked out after some consultations. I have tried to get it up during the day. I have desired a full discussion. When it was explained to me that the Senator was so anxious about his bill, I agreed willingly to an arrangement which would have limited the discussion far beyond what I thought it ought to be. I am agreeing to a further limitation; but I asked the Senator if he would not concede 30 minutes.

Mr. JOHNSON. I have told you that I would.

SEVERAL SENATORS. Regular order!

Mr. REED of Missouri. Very well. Then why should the Senator lose his temper in discussing this matter with me? I supported his bill before.

Mr. JOHNSON. I am not losing my temper with the Senator from Missouri. I have lost my patience, I admit; but it is not losing my temper with the Senator from Missouri or any other man.

Mr. REED of Missouri. Very well.

Mr. JOHNSON. Now, I concede 3.30.

Mr. DILL. Mr. President, some other men in this body have been kept here this long. I think we had better stay; and I do not see any reason why we should have a vote at 3.30.

SEVERAL SENATORS. Regular order.

Mr. SMOOT. Does the Senator object?

Mr. DILL. I shall object; yes.

Mr. ASHURST. Mr. President, I crave the indulgence of the Senate for a moment, and say to my good friend from California that his attitude neither intimidates nor convinces.

The Senator, with his histrionic ability, says that the lives of 60,000 people are about to be destroyed; but when I offered an amendment in the committee to appropriate $30,000,000 to save his people he voted against it. Then he complains that the lives of people in his State are about to be overwhelmed, when he voted against my amendment that would have appropriated as a free gift, nonreimbursable, $30,000,000! Edwin Booth and Richard Mansfield pale into insignificance in histrionic ability compared to the simulated zeal of my good friend from California.

Now, he says something of the Senator from Missouri claiming special rights. The Senator from Missouri voted against me on the Boulder Dam bill last year. His piercing sword and his keen thrusts are felt on my breast, not in my back, thank God! because the Senator from Missouri never struck a foe in the back or below the belt in his life. It is with great regret that I see that he is not going to support me this time; but I will say for the Senator from Missouri that he is right in claiming the privileges of the floor.

The Senate of the United States is a forum of freedom, the only one in America, the only one in the world. Sir, I suppose you have in your vest pocket a cloture petition. When the cloture is called and applied to the Boulder Dam bill, then the Senate is no longer a forum of freedom, but is the refuge of cowards. The Boulder Dam bill would destroy the State of Utah and destroy the State of Arizona, and if the Senator's constituents in Imperial Valley shall be overwhelmed by the floods of wrath from the Colorado River, he ought to feel some compunction of conscience for voting against my amendment to appropriate $30,000,000 to save them.

Mr. President, I apologize for taking even this much time. Let the man who voted against his own constituents explain that. He says, "No; I will not take flood water for my people in the Imperial Valley unless and until the Federal Government at its expense gives to us potable water and hydroelectric power." He inveighs against the Power Trust. I have no apology for the Power Trust—none in the world. That there is a lobby here against Boulder Canyon is most true. That there is an insidious lobby here against Boulder Canyon is true. That there is a more insidious lobby here for Boulder Canyon is also true.

Mr. HEFLIN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. HEFLIN. If the Senate takes a recess now, or adjourns until Monday, the tax bill will then be before the Senate until it is disposed of?

The PRESIDING OFFICER. The Senate has already agreed to take a recess until 11 o'clock on Monday.

Mr. HEFLIN. I am asking if the tax bill will be before the Senate when we meet on Monday to the exclusion of all other business.

The PRESIDING OFFICER. If the Senate takes a recess, it will be.

ADDITIONAL REPORT OF A COMMITTEE

Mr. NORBECK, from the Committee on Public Lands and Surveys, to which was referred the bill (S. 4385) to establish the Teton National Park in the State of South Dakota, and for other purposes, reported it without amendment and submitted a report (No. 1246) thereon.

ORDER FOR RECESS

Mr. CURTIS. Mr. President, I ask unanimous consent to change the order as to the hour of meeting on Monday so that when we recess to-night we shall recess until 10 o'clock Monday morning.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

EXECUTIVE SESSION

Mr. CURTIS. Mr. President, I have no desire, and I do not think it well, to keep the Senate in session for this bill or any other after 12 o'clock. We have some executive business which ought to be looked after, and I move that the Senate proceed to the consideration of executive business.

On a division, the motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 11 o'clock and 52 minutes p. m.) the Senate, under the order previously entered, took a recess until Monday, May 21, 1928, at 10 o'clock a. m.

NOMINATIONS

Executive nominations received by the Senate May 18 and May 19 (legislative day of May 3), 1928

DIRECTOR WAR FINANCE CORPORATION

George R. Cooksey, of the District of Columbia, to be a director of the War Finance Corporation for a term during the life of the corporation but not exceeding four years. (Reappointment.)

MEMBER UNITED STATES SHIPPING BOARD

Samuel S. Sandberg, of California, to be a member of the United States Shipping Board for a term of six years from June 9, 1928, vice Philip S. Teller, term expired.

UNITED STATES CIRCUIT JUDGES

John H. Cotteral, of Oklahoma, to be United States circuit judge, eighth circuit, vice Walter H. Sanborn, deceased.

Xenophon Hicks, of Tennessee, to be United States circuit judge, sixth circuit. An additional position created by the act approved May 8, 1928.

REAPPOINTMENTS IN THE OFFICERS' RESERVE CORPS OF THE ARMY

GENERAL OFFICERS

To be brigadier general, Adjutant General's Department Reserve

Brig. Gen. Thomas Edward Hambleton, Adjutant General's Department Reserve, from July 17, 1928.

To be brigadier general, Auxiliary Reserve

Brig. Gen. Edward Orton, jr., Auxiliary Reserve, from September 27, 1928.

APPOINTMENTS IN THE REGULAR ARMY

GENERAL OFFICERS

To be major generals

Brig. Gen. Paul Bernard Malone, from June 27, 1928, vice Maj. Gen. Thomas Q. Donaldson, to be retired from active service June 26, 1928.

Brig. Gen. Charles Dudley Rhodes, from September 5, 1928, vice Maj. Gen. William S. Graves, to be retired from active service September 4, 1928.

To be brigadier generals

Col. Lytle Brown, Corps of Engineers, vice Brig. Gen. Paul B. Malone, nominated for appointment as major general.

Col. Charles Evans Kilbourne, Coast Artillery Corps, from September 1, 1928, vice Brig. Gen. Alfred W. Bjornstad, to be retired from active service August 31, 1928.

Col. Hamilton Smith Hawkins, Cavalry, vice Brig. Gen. Charles D. Rhodes, nominated for appointment as major general.

POSTMASTERS

CALIFORNIA

George P. Comings to be postmaster at Ramona, Calif., in place of H. J. Woodward, resigned.

Charles B. Randall to be postmaster at Kerman, Calif., in place of C. B. Randall. Incumbent's commission expired April 3, 1928.

Peter D. McIntyre to be postmaster at Blythe, Calif., in place of P. D. McIntyre. Incumbent's commission expired January 9, 1928.

Harry A. Canfield to be postmaster at Bellflower, Calif., in place of G. M. Brown. Incumbent's commission expired January 9, 1928.

FLORIDA

Gladys F. Tierney to be postmaster at Hialeah, Fla., in place of L. F. Randall, removed.

ILLINOIS

Alta Winn to be postmaster at Saybrook, Ill., in place of A. B. Thompson. Incumbent's commission expired January 7, 1928.

Lyle E. Wilcox to be postmaster at McLean, Ill., in place of L. E. Wilcox. Incumbent's commission expired May 14, 1928.

James W. Corwine to be postmaster at Lincoln, Ill., in place of J. H. Boyd. Incumbent's commission expired January 7, 1928.

KANSAS

Charles J. Roy to be postmaster at Wilsey, Kans., in place of M. E. Brown, deceased.

Charles T. Murray to be postmaster at Isabel, Kans., in place of C. T. Murray. Incumbent's commission expired March 13, 1928.

KENTUCKY

Ruby M. Wood to be postmaster at Salt Lick, Ky., in place of R. M. Wood. Incumbent's commission expires June 6, 1928.

Gertrude Berry to be postmaster at La Center, Ky., in place of Gertrude Berry. Incumbent's commission expired May 14, 1928.

Trilby A. Russell to be postmaster at Kevil, Ky., in place of H. C. Mann. Incumbent's commission expired June 22, 1926.

Edgar Renshaw to be postmaster at Hopkinsville, Ky., in place of Edgar Renshaw. Incumbent's commission expires May 23, 1928.

John M. Burkholder to be postmaster at Crofton, Ky., in place of J. M. Burkholder. Incumbent's commission expired May 14, 1928.

Edna W. Morin to be postmaster at Alexandria, Ky., in place of E. W. Morin. Incumbent's commission expired May 14, 1928.

LOUISIANA

Jesse L. Beasley to be postmaster at Harrisonburg, La. Office became presidential July 1, 1927.

Isidore A. Currault to be postmaster at Westwego, La., in place of I. A. Currault. Incumbent's commission expired January 7, 1928.

James M. Coan to be postmaster at Sicily Island, La., in place of J. M. Coan. Incumbent's commission expires June 5, 1928.

Fred E. Callaway to be postmaster at Jonesboro, La., in place of F. E. Callaway. Incumbent's commission expired January 7, 1928.

Edward S. Rogers to be postmaster at Berwick, La., in place of E. S. Rogers. Incumbent's commission expires May 19, 1928.

MAINE

Stella L. Hill to be postmaster at Northeast Harbor, Me., in place of S. L. Hill. Incumbent's commission expires June 4, 1928.

Henry W. Perry to be postmaster at Fort Fairfield, Me., in place of H. W. Perry. Incumbent's commission expires June 6, 1928.

MINNESOTA

Eda M. Ashbaugh to be postmaster at Murdock, Minn., in place of E. M. Ashbaugh. Incumbent's commission expired December 19, 1927.

MISSISSIPPI

William L. Jansen to be postmaster at Okolona, Miss., in place of F. J. McDonnell. Incumbent's commission expired May 11, 1926.

NEBRASKA

Thomas Werner to be postmaster at Humphrey, Nebr., in place of L. A. Lewis, removed.

George W. Nicholas to be postmaster at De Witt, Nebr., in place of G. W. Nicholas. Incumbent's commission expires June 6, 1928.

NEW HAMPSHIRE

Everett F. Tozier to be postmaster at Salmon Falls, N. H., in place of E. F. Tozier. Incumbent's commission expires June 4, 1928.

NEW YORK

Ralph F. Spaulding to be postmaster at Piermont, N. Y., in place of F. di M. Spaulding, resigned.

Warren C. Edgar to be postmaster at New Hamburg, N. Y., in place of S. E. Harris, resigned.

Harold V. Mulford to be postmaster at Hopewell Junction, N. Y., in place of H. V. Mulford. Incumbent's commission expired May 5, 1928.

Erwin Smith to be postmaster at Annandale-on-Hudson, N. Y., in place of Erwin Smith. Incumbent's commission expires June 4, 1928.

NORTH CAROLINA

Julia B. Greer to be postmaster at Moravian Falls, N. C., in place of J. B. Greer. Incumbent's commission expired May 5, 1928.

OHIO

Henrietta Bennett to be postmaster at Tippecanoe City, Ohio, in place of C. E. Bennett, deceased.

Earl W. Starkey to be postmaster at Flushing, Ohio, in place of E. W. Starkey. Incumbent's commission expires June 4, 1928.

PENNSYLVANIA

Walter D. Lewis to be postmaster at Ulysses, Pa., in place of W. D. Lewis. Incumbent's commission expires June 5, 1928.

Martin T. Weaver to be postmaster at Strasburg, Pa., in place of M. T. Weaver. Incumbent's commission expires June 6, 1928.

Ella Hill to be postmaster at Roulette, Pa., in place of Ella Hill. Incumbent's commission expires June 5, 1928.

Ray K. Garman to be postmaster at Lemoyne, Pa., in place of R. K. Garman. Incumbent's commission expired February 15, 1928.

Samuel M. Carnell to be postmaster at Dott, Pa., in place of S. M. Carnell. Incumbent's commission expired March 22, 1928.

Ruth S. Waters to be postmaster at Dallas, Pa., in place of R. S. Waters. Incumbent's commission expired January 8, 1928.

Clifford G. Chase to be postmaster at Butler, Pa., in place of C. G. Chase. Incumbent's commission expires June 4, 1928.

William C. Drager to be postmaster at Boiling Springs, Pa., in place of W. C. Drager. Incumbent's commission expires June 6, 1928.

SOUTH CAROLINA

James H. McCord to be postmaster at Hodges, S. C., in place of J. H. McCord. Incumbent's commission expired March 27, 1928.

SOUTH DAKOTA

Rose B. Flahart to be postmaster at White Lake, S. Dak., in place of R. B. Flahart. Incumbent's commission expired February 8, 1928.

C. Albert Zeitner to be postmaster at Mission, S. Dak., in place of C. A. Zeitner. Incumbent's commission expired May 17, 1928.

TEXAS

Ben M. Vick to be postmaster at Valentine, Tex., in place of B. H. Stewart, deceased.

Charles A. Quails to be postmaster at Post, Tex., in place of C. A. Quails. Incumbent's commission expired May 14, 1928.

UTAH

John McPhee to be postmaster at Salt Lake City, Utah, in place of Ralph Guthrie. Incumbent's commission expired February 8, 1927.

Hans P. Ipson to be postmaster at Panguitch, Utah, in place of H. P. Ipson. Incumbent's commission expires June 4, 1928.

William S. Anderson to be postmaster at Moroni, Utah., in place of W. S. Anderson. Incumbent's commission expires May 19, 1928.

VIRGINIA

Thomas R. Cocks to be postmaster at Prospect, Va., in place of H. T. Ferguson. Incumbent's commission expired February 8, 1928.

McClung Patton to be postmaster at Lexington, Va., in place of McClung Patton. Incumbent's commission expires May 19, 1928.

WASHINGTON

Rose M. Illy to be postmaster at Uniontown, Wash., in place of R. M. Illy. Incumbent's commission expired May 14, 1928.

WEST VIRGINIA

Charles B. Wright to be postmaster at Minden, W. Va., in place of W. B. Murray, resigned.

WISCONSIN

Clyde C. Harris to be postmaster at Waupun, Wis., in place of Dena Kastein, resigned.

Orestes K. Hawley to be postmaster at Baldwin, Wis., in place of O. K. Hawley. Incumbent's commission expired April 21, 1928.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 19 (legislative day of May 3), 1928

MEMBER OF UNITED STATES SHIPPING BOARD

Hutch I. Cone.

COLLECTOR, INTERNAL REVENUE SERVICE

Joseph S. MacLaughlin to be collector of internal revenue for the first district of Pennsylvania.

PROMOTIONS IN THE NAVY

MARINE CORPS

To be second lieutenants

Robert G. Ballance.
Charles B. Mitchell.
Kenneth H. Weir.
Frank C. Croft.
Perry O. Parmelee.
Arthur F. Binney.
John J. Heil.
Max W. Schaeffer.
Clovis C. Coffman.
Ernest E. Pollock.
Thomas G. Ennis.
Wilson T. Dodge.
Charles Popp.
Boeker C. Batterton.

POSTMASTERS

ARIZONA

Walter Runke, Flagstaff.

IOWA

Theodore B. Satory, Albert City.
William M. Bausch, Ashton.
Albert A. Emigh, Atlantic.
Royal E. Hutton, Bancroft.
John J. Ethell, Bloomfield.
Harry Aitken, Clearfield.
Joseph M. Jacobs, Delta.
Mary E. Coy, Farragut.
Rose M. Fischbach, Granville.
Louis C. Giencke, Guttenberg.
Henry W. Huibregtse, Hull.
Harvey S. Powers, Iowa Falls.
Howard H. Tedford, Mount Ayr.
William A. Grummon, Rockwell.
Ira Soop, Sanborn.
Lyle J. McLaughlin, Schaller.

Garfield Russell, New Tazewell.
Belle Whittenburg, Ooltewah.
William G. Leach, Huntingdon.

TEXAS

E. Leon Donner, Hereford.
Mabel E. Bryant, Rockport.

HOUSE OF REPRESENTATIVES

SATURDAY, *May 19, 1928*

The House met at 12 o'clock noon.

The Rev. William Pierpoint, pastor of the McKendree Methodist Church, offered the following prayer:

Almighty God, our Heavenly Father, the Father of all mercies, we come unto Thee in humility and with gratitude for Thy many gifts to us. We thank Thee that Thy blessings have ever been upon us to enrich us, and we have ever been the recipients of Thy mercy and of Thy grace. Help us as we come to Thee to realize that while Thou hast given unto us health, prosperity, and peace, that greatness consists not in the things which we possess, but greatness consists in being able to contribute unto all mankind of the blessings which Thou hast given unto us. We pray that Thy blessings may be upon our country and that Thy guiding eye may continue to be over it and that Thy mercy may ever be extended to it. Bless, we pray Thee, those in authority over our country; give unto all, our Father, into whose hands have been vouchsafed the keeping of our national greatness Thy wisdom, Thy understanding, and Thy grace. Help them in all their deliberations, that they may so honor and glorify Thy name that Thy smiling favor may ever be upon them. Pardon us, we pray Thee, wherein we may have transgressed Thy law, and help us forever to have that forgiving spirit wherein we shall in turn merit forgiveness from Thee. Grant this with all the blessings that may enrich our lives. We ask in the name and for the sake of our Lord and Savior, Jesus Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate refuses to reconsider its vote on the passage of the bill (H. R. 11479) entitled "An act to reserve certain lands on the public domain in Valencia County, N. Mex., for the use and benefit of the Acoma Pueblo Indians."

The message also announced that the Senate refuses to reconsider its vote on the passage of the bill (H. R. 12632) entitled "An act to provide for the eradication or control of the European corn borer."

The message further announced that the Senate had passed a bill and a joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3554. An act to authorize the Public Health Service and the National Academy of Sciences jointly to investigate the means and methods for affording Federal aid in discovering a cure for cancer, and for other purposes; and

S. J. Res. 156. Joint resolution to stay proceedings for the condemnation of squares 727 and 728 in the District of Columbia.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9495) entitled "An act to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled 'An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts,' approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture."

The message further announced that the Senate disagrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12030) entitled "An act to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes," further

insists upon its amendments to said bill, requests a further conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and appoints Mr. MOSES, Mr. PHIPPS, and Mr. MCKELLAR to be the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment a bill and joint resolutions of the House of the following titles:

H. R. 8546. An act authorizing an appropriation of $2,500 for the erection of a tablet or marker at Lititz, Pa., to commemorate the burial place of 110 American soldiers who were wounded in the Battle of Brandywine and died in the military hospital at Lititz;

H. J. Res. 39. Joint resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Chinese subjects, to be designated hereafter by the Government of China; and

H. J. Res. 40. Joint resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Siamese subjects, to be designated hereafter by the Government of Siam.

PERMISSION TO ADDRESS THE HOUSE

Mr. McCLINTIC. Mr. Speaker, I ask unanimous consent that on next Thursday, after the reading of the Journal and the disposition of matters on the Speaker's table, I may be permitted to address the House for 15 minutes.

Mr. CHINDBLOM. Reserving the right to object, will the gentleman state the subject?

Mr. McCLINTIC. I have information showing that the War Department is paying a salary to the person who brought charges against the misuse of my frank and I want to present some information along that line.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

MEETING OF ELECTORS

Mr. GIFFORD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 7373) providing for the meeting of electors of President and Vice President and for the issuance and transmission of the certificates of their selection and of the result of their determination, and for other purposes, and agree to the Senate amendment.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to take from the Speaker's table the bill H. R. 7373, with a Senate amendment, and agree to the Senate amendment. The gentleman will state he acts by authority of his committee?

Mr. GIFFORD. Yes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the Senate amendment.

The Senate amendment was agreed to.

LEASING OF PUBLIC LANDS FOR AVIATION PURPOSES

Mr. SINNOTT. Mr. Speaker, by direction of the Committee on the Public Lands, I move to take from the Speaker's table the bill (H. R. 11990) to authorize the leasing of public lands for use as public aviation fields, with Senate amendments, and agree to the Senate amendments.

The Clerk read the Senate amendments.

The Senate amendments were agreed to.

LANDS OF CERTAIN MEMBERS OF THE FIVE CIVILIZED TRIBES

Mr. LEAVITT. Mr. Speaker, I call up the bill (S. 4448) to amend section 4 of the act entitled "An act to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes," approved May 10, 1928.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 4 of an act approved May 10, 1928, entitled "An act to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes" (Public, No. —, 70th Cong., 1st sess.), be, and the same is hereby, amended so as to read as follows:

"SEC. 4. That on and after April 26, 1931, the allotted, inherited, and devised restricted lands of each Indian of the Five Civilized Tribes in excess of 160 acres shall be subject to taxation by the State of Oklahoma under and in accordance with the laws of that State, and in all respects as unrestricted and other lands: *Provided,* That the Indian owner of restricted land, if an adult and not legally incompetent, shall select from his restricted land a tract or tracts, not exceeding in the aggregate 160 acres, to remain exempt from taxation, and shall file with the Superintendent of the Five Civilized Tribes a certificate designating and describing the tract or tracts so selected: *Provided further,* That in cases where such Indian fails, within two years from date hereof, to file such certificate, and in cases where the Indian owner is a minor or otherwise legally incompetent, the selection shall be made and certificate prepared by the Superintendent for the Five Civilized Tribes; and such certificate, whether by the Indian or by the Superintendent for the Five Civilized Tribes, shall be subject to approval by the Secretary of the Interior; and, when approved by the Secretary of the Interior, shall be recorded in the office of the Superintendent for the Five Civilized Tribes, and in the county records of the county in which the land is situated; and said lands, designated and described in the approved certificates so recorded, shall remain exempt from taxation while the title remains in the Indian designated in such approved and recorded certificate, or in any full-blood Indian heir or devisee of the land: *Provided,* That the tax exemption shall not extend beyond the period of restrictions provided for in this act: *And provided further,* That the tax-exempt land of any such Indian allottee, heir, or devisee shall not at any time exceed 160 acres."

Mr. LEAVITT. Mr. Speaker, I offer an amendment. In line 6, page 1, insert after the word "numbered" the figures "360."

The SPEAKER. The gentleman from Montana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEAVITT: Page 1, line 6, after the word "numbered," insert the figures "360."

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

AUTOMOBILE INSURANCE BILL

Mr. TREADWAY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD with reference to the bill H. R. 9688, the automobile insurance bill.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. TREADWAY. Mr. Speaker, on January 19, 1928, I introduced H. R. 9688, a bill to provide security for the payment of compensation for personal injuries and death caused by the operation of motor vehicles in the District of Columbia, and for other purposes.

This bill is patterned after the Massachusetts law, with certain necessary adaptations to conditions in the District of Columbia. No disinterested person can argue that an irresponsible automobile driver has any place on our streets and highways. If he is irresponsible in driving he will likewise be irresponsible in the settlement of any damage claims which may result from his driving. This law has been in operation in Massachusetts for a year and a half, and all official evidence tends to show that it has been most advantageous.

Nearly all of the States have under consideration some form of insurance against automobile casualties. I predict that in the course of a very few years every State in the Union will require automobile drivers to assume financial responsibility for accidents due to their carelessness. It will not do for Congress to neglect the interests of the people in the District of Columbia in this direction.

Hearings have been held by one of the subcommittees of the District of Columbia Committee on House bill 9688. The proponents of the bill represented the public interest and the opponents represented the selfishness of those engaged in the automobile business. In view of the early adjournment of Congress it was mutually agreed that the subject should not be pressed until Congress reconvenes in the fall. At the last hearing of the subcommittee its chairman, Congressman UNDERHILL, of Massachusetts, gave assurance that strenuous efforts would be made to secure action on this important measure at the next session. In the meantime further study will be given to the best practical solution of this pressing problem as regards its application to the District of Columbia. A survey can also be made of legislation which has been suggested in the various States so that when Congress reconvenes the committee may have available complete evidence in the premises.

I can assure the people in the District of Columbia who have shown an interest in the bill of my best efforts at the proper time to convince Congress of the need of this or similar legislation. The day is not far distant when an irresponsible driver of a powerful engine will not have unrestricted use of the streets and highways of the District. It is to be hoped that those interested in the bill will make note of the expectation of prompt action next December and be prepared to support the measure, either individually or through their civic organizations.

BRIDGE ACROSS THE MISSISSIPPI RIVER AT NEW ORLEANS, LA.

Mr. DENISON. Mr. Speaker, by instructions of the Committee on Interstate and Foreign Commerce I call up the bill (S. 4229) to extend the time for completing the construction of a bridge across the Mississippi River near and above the city of New Orleans, La.

The Clerk read the bill, as follows:

Be it enacted, etc., That the time for completing the construction of a bridge across the Mississippi River near and above the city of New Orleans, La., authorized by act of Congress approved April 17, 1924, to be built by the city of New Orleans, a municipal corporation existing under the laws of the State of Louisiana, its successors and assigns, through its Public Belt Railroad Commission, is hereby extended five years from the date of the approval hereof: *Provided*, That it shall not be lawful to continue the construction of said bridge until plans thereof shall again be submitted to and approved by the Chief of Engineers and by the Secretary of War.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be read a third time, was read the third time, and passed.

A similar House bill was laid on the table.

BRIDGE ACROSS THE MISSOURI RIVER AT RANDOLPH, MO.

Mr. DENISON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 11338) authorizing the Kansas City Southern Railway Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Randolph, Mo., with Senate amendment, and agree to Senate amendment.

The Senate amendment was read and agreed to.

A DECADE IN CONGRESS UNDER REPUBLICAN DOMINATION

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject "A decade in Congress under Republican domination."

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. LANKFORD. Mr. Speaker, I am serving my tenth year in Congress and feel that a few observations as to the obstacles I have encountered are proper.

I was officially sworn in May 19, 1919, nine years ago to-day. President Wilson was still in the White House, but the Republicans had gained control of the Congress. They have held that control until this time. We Democrats have been and are at their mercy. Absolutely no bill can pass over the objection of the solid Republican forces. No bill can even be taken up in the House if only three or four leading Republicans on their steering committee object to it. Ofttimes when a bill is taken up we get some Republicans to break ranks and help the Democrats put on some good amendments. Ofttimes party lines disappear and Democrats and Republicans vote on both sides of a matter. I have heard Members criticized for voting with the Republicans.

When they vote on both sides of a measure we must vote with them or not at all. I am glad to vote with them when they vote my way. The only way we Democrats can pass any laws is by getting Republican help. Sometime ago a man in my district, who likes baseball, asked me if I did not like the great congressional game. I said yes; but I would like it so much better if I could help play the game with the Democrats in power. I then said to my friend, "How would you like a game of baseball if your side could not catch a single ball, hit a single ball, or make a single run without the consent of the other side?" My friend admitted he would not at all like any such a game. I then told him that we Democrats are up against just such a situation with the Republicans in power.

Mr. Speaker, it is so easy for one not in Congress to feel that if he should ever enter here, his appearance will be the occasion of great acclaim and he will come great wonders to perform. A new Member is soon disillusioned. He is instantly confronted with his helplessness. He can talk, introduce bills, listen, and learn, but if his party is not in power he is almost as helpless as a baby in the matter of securing the passage of worth-while legislation of his own.

Sometime ago I saw two very good pictures. One was of a new Member of Congress leaving his home town for Washington. He looked to weigh a thousand pounds or more. There were a dozen or more of his friends trying to get him on the train. He was too wide and entirely too high to even get on the platform of the train, much less get in at the door. The next picture showed his arrival in Washington. Like the "nigger's" catfish he had "shrunk up." He appeared to weigh about 10 pounds. The top of his hat did not quite reach the bottom step of the train coach from which he had just alighted. Well, it is not quite this bad, but please do not get the idea that a new Member finds nothing to do. The trouble is he finds everything to do, is handicapped on every side, and does not know how, when, or where to begin. He must begin at the A B C's of a new school course—a course which he can never complete, but in which he becomes more learned and more proficient as he stays here and labors hard for 5, 10, 20, or even 40 years, if he should live and serve as long as "Uncle" Joe Cannon.

Who are the great men in Congress? They are those who have been here 15, 20, and 25 years. They came here as young men and are now gray with age but wise in legislative matters. The great Members of the past became powerful not so much because of their great ability but because of their long service and years of legislative training. Great ability does not enable one to hurry to the front over the well-fixed rules of seniority in force here. The greatest orators of the country came here and like the rest of us must talk, study, introduce bills, offer amendments, and take their time waiting. Very few men get through the world "on flowery beds of ease" because of their ability. Many, many more with only reasonable ability succeed by staying on the job and working while others play. A Member of Congress can never become very helpful if he does not stay on the job, it matters not how much ability he may possess.

Many of the best Congressmen here are men of reasonable ability who endeavor to honestly give their folks conscientious service by staying on the job while others, ofttimes of greater ability, attend the ball games, play golf, go to shows, or indulge by day and night in the various social functions here. While failure awaits the more book-learned and mentally gifted Congressmen who indulge themselves in pleasures of a great city, a splendid success is sure to come to the Member of reasonable ability and hard-earned education, with the welfare of his constituents at heart, who stays on the job and studies by day and night the great problems of his people. Nothing but success can eventually come to the hard worker of even reasonable ability, while failure is written on every act of the man, even of great ability, who puts pleasure ahead of the service of his folks.

I repeat for a Member to become powerful here he must stay on the job, serve many years, have a reasonable amount of sense, and, above all, have at heart the welfare of the people who elect him from term to term. The very worst men here are the men of great ability who have become powerful by long service and yet who represent the big interests and the powerful monopilistic forces. It is most unfortunate for the common people that some of the ablest men in Congress—lawyers, if you please—represent the Power Trust, the Steel Trust, and other trusts just as fully as any lawyer ever represented a client in a courthouse.

Many of them represented big interests before they came; they represent them here and will continue to represent them when they leave here, unless they are shipped home in a box. The big interest paid them big fees before they came, paid them even larger amounts of money as campaign donations while they were running, and will continue to pay as "campaign contributions" just what they may wish to call for as the price for the betrayal of men, innocent women, and children—yes; for the betrayal of all humanity.

These Members in many cases are wealthy themselves and own stock in the big corporate interests which they represent so well here. Many other Members are not rich, but have represented as a lawyer the great trusts until they feel that any sort of exploitation of the people by the monopolies is but a higher form of patriotism. Then, again, the money of the big trusts elected them, the subsidized big dailies help keep them in, and in the future they are assured of the support of the money, big dailies, and every known and unknown agency of the trusts and big rich. They are loyal to their masters. They represent the crowd who elected them. They do not care for the voters personally. Money is their god. They proceed on the theory that money has elected them and will reelect them. There is a limit on the amount of money a candidate for Congress can legitimately spend. There is no limit on what the big interest spends for him and tells him about after the election. Enormous amounts of money, running to several times the salary of Members of Congress, are devoted and spent in an effort to get certain men elected. Why? Simply because the big interests expect and get returns a thousandfold.

The first and primary duty of many campaign managers of congressional candidates is to receive donations in amounts beyond that allowed by law and do the criminal campaign stunts of which the candidate may wish to plead ignorance. By the way, I have never had any one man as a campaign manager. I have succeeded very well so far with the whole

people whom I humbly seek to represent as my campaign managers. I have never felt like I needed a manager bad enough to put myself under too many political obligations to any one man.

I kind of feel like a fellow who must have a manager to help him run for office will need a manager to help him vote, make appointments, and discharge the duties of the office. Then, why not elect the manager to begin with if he is to feel he is the brains of the performance. I am not criticizing the selection of managers in state-wide or nation-wide elections when one man must have help in the way of handling legitimate publicity, and so forth.

I have on a few occasions had people come to me during a campaign and want to know who my manager was so they could see him. I told them I was the manager, and if the good people elected me I would still be the manager after I took office. You know a manager ofttimes makes promises which the candidate is expected to fulfill after election, and then some managers want to keep on managing the candidate even after he is elected. I have many many times felt good when I realized that I had no one political manager to tell me of obligations to corporations who made donations or gave help. There is a wonderful freedom in feeling that all the people elected you and that your duty demands loyalty to the whole people, and only them.

It is very seldom, if ever, money is offered to a Congressman outright for a vote or his help. I have never personally known of such an offer. They go after a fellow in a different way. They secure the help of many by selecting the candidate whom they are sure will do their bidding and then put up whatever money may be necessary to elect him. Of course, many Members are elected on whom the big interests have no strings. Well, such a Member is not permitted to represent his folks without a continuous warfare being made to capture him, and if he can not be taken in, then ofttimes he is marked for defeat. He gets invitations to come into the social swim, join clubs, attend so-called swell dinners where a few blistered English peas, stale chicken decorated with pin feathers, and other similarly unpalatable food is served in a smoke-filled room to a crowd of folks listening to a lot of jazz—so-called music—and cheap jokes. The Member and his folks get invitations to other social functions, such as dances, where they do not dance much, and dress parades where they do not dress much, and high society generally where the women puff their cigarettes, tilt their disdainful noses, paint profusely to hide the palor of their indifferent stare, and lacking modesty do not blush, but bring the blush of shame to modesty's cheek and the crimson of disgust to the face of decent men and women.

A Member who enjoys this kind of thing is soon taken over and in a little while feels his social obligations drawing him, and feels that these people with whom he enjoys so many hours are pretty good folks after all and that he ought not to fight them and ought to vote with them or perhaps just not vote at all.

> Vice is a monster of so frightful mien,
> As to be hated needs but to be seen;
> Yet seen too oft, familiar with her face,
> We first endure, then pity, then embrace.

For my part I do not attend such functions, nor any other entertainment where the enemies of my people are seeking to get me under obligations which would in the least deflect my service from the people who elected me. Then, again, I don't enjoy at all any such performances. I have received hundreds of invitations to free dinners and suppers, all of which I have ignored. Why should I attend? Why do they want me? They never asked me before I was elected. If I was defeated they would not invite me the day after I left Congress. They never invited any of my folks; why did they ignore my folks? I know why they want me and other Members of Congress. They hope to get us in line to jump when they say jump. They want us to feel kindly toward them. They want to come in between us and the folks we represent. They want to lead us into their way of thinking. They intend to bombard us with letters, literature, and come to see us sometime in behalf of their ideas and want us to be in a receptive mood so our minds will be as "clay in the potter's hand." And we hear from them ever and anon. They come into our office and approach us in all kind of ways. If the Member is from a farming district, they begin by telling him a certain bill in which they are interested is about to ruin the farmers, and so on. Although they never farmed a day in their lives, they make great protestations of their love for the farmer. All this on their part is, of course, the very basest of deception.

Just at this point I find it very interesting to ask them a few questions. Thus I force them to admit whom they represent and who is paying them as lobbyist to endeavor to mislead Members of Congress. When they are forced into the open it is very easy to see that they are for certain selfish interests regardless of the consequences to others. They then ofttimes come back by suggesting that I have probably received several letters and telegrams advocating their side and none from my farmer friends in opposition. This is true in almost every case. The big-moneyed interests are active all the time in behalf of their nefarious schemes. They always send more telegrams, write more letters, and have an army of paid lobbyists to dog the steps of Members of Congress in behalf of the bills they wish passed.

My farmer friends very seldom write me in behalf of a farm-relief measure. They do not have to. It is not necessary. I am for them body, heart, and brain, and will do all I can for them as long as I stay here in spite of all the wiles of those who oppose them and in defiance of all the bombardment of all who would destroy them. Thus the big interests try to elect their crowd. If they fail in this, they try to enmesh them in the social whirl or through their clubs or other activities of big-city life. If all this fails, they seek to scare us into doing their will by a bombardment of letters, telegrams, and such other methods as their paid lobbyists may desire.

Failing in all of this, they turn the bloodhounds of certain big dailies loose on our trail, and, if possible, defeat us and elect in our place some one who will do their bidding. I have been sorely criticized for my stand against Sunday desecration, for my fight against measures which sought to protect the criminal negro rather than the white women of the South and the Nation, and also because of my fight in behalf of the ultimate consumers and the farmers, and against the profiteers of the Nation. Especially is a Member subjected to a terrific bombardment by the newspapers here in Washington if he is not willing to betray the common people who elected him and vote just as the lobbyist of the big interest say vote. The big Washington papers are vultures of the press. A Member will never go very wrong if he simply does the things the Washington papers object to. If I found all the Washington papers supporting a measure I favored, I would be almost sure I was mistaken about my position. Here are a few of their inconsistencies.

When seeking enormous appropriations from Congress they say Washington is the Nation's Capital and should be improved by the money of the whole Nation. When an effort is made to pass some regulation to make Washington a law-abiding city, the papers say Congress is attempting to interfere with the District of Columbia and that the rest of the Nation has nothing to do with what happens here. They want the Government in business for the profiteer, but not for the common folks. They favor price fixing for everybody except the farmer. A few dollars spent for the farmer is wasteful extravagance, but millions stolen by their crowd is true patriotism. They worry over the safety of a rapist and make no decent defense of women and children. They desire to govern others, but do not wish to govern themselves. They subject women and children accused of small offenses to the scourge of pitiless publicity and heroize the most brutal of criminals. They seem to think that freedom of the press means the right to suppress the truth and oppress the right.

The conduct of Washington papers toward Members of Congress who do not do their bidding is simply a cheap form of blackmail. But let me further discuss the handicap of serving as a Democrat with the Republicans in majority in the House.

Not a single bill of importance bearing the name of a Democrat has passed during the last 10 years. No such bill bearing the name of a Democrat will pass while the Republicans stay in power. If a Democrat introduces a good bill and it becomes popular, it is copied and reintroduced in the name of a Republican. This is done so the Republicans will get all the credit for the measure. The big bills always bear the name of the Republican chairman of the committee which considers the bill. The Esch-Cummins Railway Act bears the name of the chairmen of both the House and Senate committees. This is also true of the Fordney-McCumber Tariff Act and the McNary-Haugen bills. The Volstead Act only bears the name of the then chairman of the Judiciary Committee of the House.

This explains why no big bill bearing the name of a Democrat has passed Congress since I came to Congress. Many people do not understand how Members get committee assignments. Up to a few years ago the Speaker appointed the committees and was ofttimes called the czar of the House. That day is gone and no longer are new committees made up at each session, as in the case of the State legislatures. Now, when a man is appointed on a committee, he stays on that committee as long as he stays in Congress, unless he resigns. The man on the side of the party in power who has been on the committee the

longest is the chairman of the committee as a matter of seniority.

Thus, in order for a Member to become chairman of a committee, he must get on and stay on the committee until all who are on when he first gets on either are defeated, die, or resign, and furthermore he must wait until his party comes back into power. For instance, Congressman J. R. Walker, of my district, came to Congress and went on the great Judiciary Committee, but he could not be chairman even though the Democrats were in power, for there were several Democratic Members on the committee ahead of him. He retired from Congress before he had a chance to be chairman of his committee.

In fact, if he had stayed in until now he would never have been chairman, for the Republicans have been in ever since he left. But if he had stayed in and was elected again this year, and if the House goes Democratic, he would next session be the chairman of the great Judiciary Committee after 16 years' service. He would be one of the most powerful men of the House and in position to do much more for his district than any new Member could do without waiting for a similarly long service.

I have never had a chance to get on the committee which Mr. Walker left, because when I came Mr. Wise, of the fifth Georgia district, had been in Congress longer than I and wanted this committee, and under rules of seniority of force in Georgia delegation he got it. When Mr. Wise retired Alabama got it, and Georgia has never been able to get a member on that committee since.

Each State does not have a Member on every committee. There are some big committees on which Georgia has no Members. Nearly every Georgia Member would rather be on the Committee on Agriculture than any other committee, and yet Georgia has no Member on that committee. Congressman Lee was on that committee, but when he was put on appropriations Mr. FULMER, of South Carolina, got on agriculture, and so Georgia will probably not get a Member on that committee unless the Democrats win this fall. If this happens we will get a larger number of Democrats on all committees and a Georgian will likely get on agriculture.

I should rather be on Agriculture than any other committee, and if I come back and the Democrats win, I stand a good chance. If all the Georgia Members come back there will be six who have been here longer than I have and five for a shorter period. Six will be entitled to choose ahead of me, but probably all of these will keep what they have, as they all will either be chairmen or very high on important committees. One hates to give up a high rank or chairmanship and go near the foot on a new committee. There is only one Member between me and the chairmanship of the Committee on Irrigation and Reclamation, and I understand he will probably become chairman of another committee, and thus make me chairman of the important Committee on Irrigation and Reclamation.

This committee has jurisdiction of drainage and reclamation in my district and the South. It would be the first time the South ever had a chairman of that great committee, and could not but mean the putting of the South on a parity with the rest of the Nation in drainage and reclamation.

Of course, if I got this chairmanship after all these years of waiting I would not give it up for another committee, with me going to the foot or near the foot, unless I thought I could render better service on the new committee. All would depend, for instance, on what happened in connection with the Committee on Agriculture. There are eight Democrats on that committee. If most of these went off by going on other committees or otherwise, and the Democrats were increased to the majority members of 14, and if 10 or 12 new members were appointed, all having been in Congress less than 10 years, I could afford to go on, for I would rank ahead of the new members, and thus be near the top.

The seniority rule applies in all committee assignments. When I first came here I found that we first had to find what could be secured for Georgia, and then Mr. Upshaw and I had to take what was left after 10 older Georgia Members had their choice. It takes years of service here to become qualified as a good legislator, and it takes even more time to get a good place on a good committee.

When Congressman Brantley retired and Mr. Walker came in, he could not at all begin where Mr. Brantley left off. Mr. Walker had to patiently begin at the bottom, which he did and builded nobly for six years. But I could not save his splendid work when I came. Down at the bottom I had to start and attempt to build again the rights of my district to preferences in legislation by reason of the long service of its Member. Now, if I quit, the results, in so far as committee assignments are concerned, of 10 years of effort and waiting will go with me and all must be done over again.

Just think of it, if the Democrats win this fall and Mr. Brantley had remained in Congress, he would be at the very top, being probably Speaker and next to the President of the United States in matters of national legislation. If Mr. Walker had remained, he would be chairman of one of the most powerful committees of the House.

There is no other place where length of service is so valuable as here. A Member easily adds to his usefulness 100 per cent every additional term. Many Members are twenty times as powerful as other Members. Why? Simply because they have been here twenty times as long as the other Members. The district that is always changing never gets the best services. The districts which keep Members in for long periods get the very best service and, in fact, their Members run the Congress.

Before I came to Congress I had an idea all speeches were printed free for Members and that speeches should not be mailed out free. The Member pays for the actual printing of speeches but gets free mail service. This free mail service is the franking privilege which is ofttimes criticized. It is ofttimes abused, as are all privileges, but it is very essential to our form of government. It is the privilege of the common people. The wealthy Member does not need free mail service. He would gladly pay postage if he was only able to prevent the Congressmen of small means using their frank as a protection of the common people. The man who receives large campaign contributions from the big interests and who has the big daily press back of him could absolutely destroy the Member of small means if he had no way to get his views and position in matters before the country.

The Member doing the will of the big rich would have unlimited money and newspaper publicity to hold him up to public gaze as a hero. The Member voting with the common people, if he was not rich, would be ridiculed out of office by the subsidized press of the Nation and would not be able to even fight back. With the franking privilege a Member can vote for the poorest of the poor, and with $100 each month out of his salary he can let his people know the truth about his record in spite of newspapers and all others attacking him. It is hard enough now for a poor man to vote and fight for the common people and stay in Congress, even with a franking privilege. He would be absolutely helpless without the RECORD and free mail service.

Should a man make a report of his work to his employer? If so, Members of Congress should make reports constantly to the people whom they are serving. Some never make reports to their people. They only have to report to the big boss who put up their campaign funds. Others have nothing good to report and, therefore, remain silent. I very much favor Members keeping their folks fully advised as to the Members' views and record in Congress. The franking privilege enables a Member to defend himself against false newspaper propaganda, and thus enables him to vote his conviction regardless of the position of the big press. I am glad to send my speeches and statements to my people and thus give them an opportunity to see if I am truly fighting for the right. I shall probably spend over $1,000 of my salary this year sending out speeches and remarks. Should I send out my remarks? Practically all other Members are letting the people know of their record and their views on various matters. Are my people entitled to the same consideration from their Congressman? I am sure they are. Are my remarks as worthy of distribution as others that are sent out? I hope so.

Many people have an idea that the congressional frank is the property of the Congressman. This is erroneous. It is intended that the frank be used for the people whom a Member represents. Let me illustrate what I mean. I intend to have printed in the CONGRESSIONAL RECORD at the request of the Brunswick Board of Trade and the Young Men's Club of Brunswick an address delivered by the Hon. R. W. Dunlap, Assistant Secretary of Agriculture, and have approximately 10,000 copies of the speech reprinted, folded, and placed in envelopes with my frank and sent to these organizations at Brunswick. These organizations can mail these speeches to whomsoever they please and without postage. Any person in my district can get me to print in the RECORD his remarks, and I can have them reprinted at actual cost of printing and sent to him in "frank" envelopes, and he can mail out a carload if he wishes. Of course, the Member is duty bound to only have printed and distributed under his frank matter he approves and which he believes is beneficial to the people of the country.

This explains another thing which is often misunderstood. The CONGRESSIONAL RECORD has long since ceased to be only a

record of what happens in Congress. It now contains a record of the congressional proceedings, and is also a periodical in which Members have printed their views and the views of their friends on various matters. By printing these extensions in the RECORD we get them before the country almost as well as if delivered, and we can then mail them free or let our friends do so. If Congress stayed in session day and night all the time, all the Members would not have time to express all they wish to get before Congress and the country. All Members who are working 100 per cent efficiently have their views printed in the RECORD and also deliver them on the floor. On the subject of farm relief, for instance, during the last six months I have made a half dozen or more speeches on the floor, I have printed several extensions of my own and of editors and others with whom I agree. I have talked farm relief over the radio. I talk farm relief every way, everywhere, and every time I get a chance. It is easy to talk, and I hope soon to help talk results out of Congress for the farmers.

Some weeks ago, when the Mississippi flood control bill had the right of way for the whole week, I was working day and night to get an amendment on the McNary-Haugen bill to prevent the levy of a tax on leaf tobacco on the floor in the warehouses when sold by my farmers. I was for the flood control bill. I did not want to talk on it as others living along the Mississippi, and who had studied the matter more, wanted all the time. I wanted to talk against the tobacco tax. I could have gotten time to talk on the flood situation but not against the tobacco tax. I could wait until next week, when the farm bill would be up, and get a little time. I knew I would not get much time, as Members who have been here longer than I and hold higher places on the committee would get most of the time. There would be hundreds of Members wanting time and many getting absolutely none. What was I to do? I did as I have always tried to do. I did the best I could. I got a permit to print in the RECORD a written argument against the tax. Therefore, the next morning I had that written argument against the tax on the desk of every Congressman, Senator, Cabinet member, and the President. I then saw every Congressman and Senator I could and argued against the tax and begged them to read my printed argument in the RECORD.

When the bill did come up I offered three amendments, all against this tobacco tax and other tax features, and made several speeches on the floor in support of my amendments. Ofttimes we can not do as we wish and must content ourselves with doing the best we can. This statement would be entirely too long were I to discuss all I would like to get before my people.

Mr. Speaker, since I am being sorely attacked, I feel I should briefly mention more specifically my humble efforts during my service here. I feel my best efforts are rarely worthy of the praise of others, and therefore come with apologies when I offer to mention them. I much prefer for others to tell of my labor in their behalf, and therefore shall mention only that which those I have helped may not know or happen to remember.

I know that specific results are remembered, but many people do not realize nor remember the toil and effort ofttimes necessary to bring to fruition our fondest longings. For instance, about six years ago there was much said about tax-exempt securities. The papers were full of it. Democratic and Republican Presidents had recommended the abolition of tax-exempt securities. Cabinet members favored the move, and it seemed everybody in Congress and out were against tax-exempt securities. The resolution passed Congress by more than two-thirds vote. The handful of us that spoke and voted against it were laughed at and sorely criticized. A few of us accepted our temporary humiliation, followed the bill to the Senate, and enlisted there the aid of Senator Thomas E. Watson, of Georgia, and others and defeated the bill. It came up again in the House; we fought it with all our might and defeated it. It is now absolutely dead, and I believe will never be resurrected. The small crowd was right, or we could never have been able to whip the whole big newspaper, political, and financial combine of the country. If this bill had ever passed, all bonds issued in the future would have been taxable, and consequently would have been sold for about $10 on the hundred less. The bonds would be taxable where owned in New York and other money centers. The loss would have come to the struggling community seeking to build a schoolhouse or to build a new courthouse or to make any other public improvement.

I made two long speeches against the bill. It has been said these are the best speeches I ever made. A few of us turned the tide. I only did my best, and claim only an humble portion of the credit for helping save nearly one-tenth of the cost of all new school buildings, courthouses, and other improvements made by bond-financed programs. The interest on all farm loans would have advanced if this bond-taxing resolution had been written into our Constitution. The defeat of this resolution helped every man, woman, and child in my district. Of course, it would take many days to tell in detail of all our contest. We have several every day on minor details and on major matters. I shall later mention a list of things I have done, giving a general idea of my work and how I vote.

Just here let me say the hardest work I do is when Congress is not actually in session. I used to wonder why Congress did not meet before 12 o'clock noon. I know now that it is because there is three and more times as much as a Member can do of a morning without Congress being in session. There are always several big committees in session. All this spring I tried to attend all farm-relief hearings from 10 to 12 of a morning. Many mornings two of my committees were in session with a dozen or more Post Office, Veterans' Bureau, and other matters pressing at the same time. Each day's mail would ofttimes bring one or two more days' work. All I could do was to work my office force full capacity, use the telephone all I could, and put in from 7 of a morning to 11 and 12 at night with scarcely enough time to eat.

I have spent many months here while Congress was not in session and have always been busy. Last summer I gained several big World War veterans' cases, meaning thousands of dollars to worthy veterans or their people. I now want to go home just as soon as this Congress adjourns, but I have not the heart to do it until I handle a dozen or more small cases and four large ones in each Atkinson, Appling, Berrien, and Brooks Counties. I hope to collect at least $40,000 for my people out of these four cases. If I stay 10 days on these a dozen more matters will come up before I get away. Finally, I will just have to select a day to go, get on the train, and leave part to be handled by my secretary. I shall not give the names of thousands of persons I have helped individually as veterans, officials, or otherwise. I leave that for them to mention as they may wish.

It would require too much time to mention the bills I have helped or fought. Let me simply attempt to make some general observations which will furnish a basis for my people to determine whether my record should be approved or not:

First. I have never missed a record vote on any matter expect when providentially absent.

Second. Have always put my work here ahead of every form of entertainment.

Third. Have worked and studied much harder than ever before in my life, ofttimes working until midnight.

Fourth. I often work on one bureau matter many, many hours, just as a lawyer does with a most difficult lawsuit.

Fifth. I feel that I am the paid counsel of the common people of my district and do my best to give them value received.

Sixth. I have always tried to vote and act on all matters just as the majority of my people would tell me to vote if they were here and familiar with all the facts.

Seventh. I have always felt I truly represented my people, for my people are their people and their folks are my folks, and I feel their thoughts and desires are my thoughts and desires.

Eighth. I have always felt that all the people of the district were my friends, as I have been several times elected without opposition and certainly had no ill will for a single individual who voted against me when I had opposition.

Ninth. I have never been unduly under obligations to anyone for campaign funds. No money was ever made up for me except some of my Douglas people made up a little money 10 years ago to buy some stamps and envelopes for me.

Tenth. I have never accepted any money other than my salary for anything I have done as Congressman, and have never received any campaign funds since my first election, and am not asking or expecting any now.

Eleventh. I have always refused all money for expenses or otherwise for speeches made in my district at schools or on other programs. I have permitted my hotel bill and railroad fare to be paid for speeches made near Washington, but never any fee.

Twelfth. I have acquired 10 years' experience and knowledge of congressional matters, enabling me to do five times as much as I knew to do when I came here.

Thirteenth. If the Democrats gain the House this fall I will be chairman of one of the major committees and in position to do for my people many times more than a new man could possibly do.

Fourteenth. I have always fought for cheaper fertilizers for the farmer. I helped to defeat a tariff on potash and saved the farmers millions.

Fifteenth. I am fighting for cheaper fertilizers at Muscle Shoals and cheaper electrical power for the ultimate consumer everywhere.

Sixteenth. I have labored most earnestly to eliminate unnecessary middlemen and to help the farmers to name the prices of the products of their toil.

Seventeenth. I have given special attention to farm relief, and have introduced a bill which I honestly believe is the best farm bill ever written.

Eighteenth. I have made in Congress many farm-relief speeches and have endeavored by years of study to become familiar with the many, many farm-relief ideas and proposals.

Nineteenth. I have come nearer passing than ever before a reasonable Sunday rest bill for the Nation's Capital.

Twentieth. My efforts here have caused preachers and the best people generally not only to select me to sponsor a Sunday bill for them but has caused them to fight with me.

Twenty-first. I have always endeavored to mail out all the speeches, and so forth, that I could afford to pay for, after making necessary payments to those I owe, and for expenses of my family.

Twenty-second. I have made many speeches which I have not been able to mail out; for instance, those in my efforts for farm relief,. in my contest in behalf of better prices for school, road, and other improvement bonds, and also several against social equality of the white and colored races.

Twenty-third. I helped to secure numerous small appropriations for various matters and secured the passage of many bills of a local nature.

Twenty-fourth. After much opposition in Congress I secured a Federal court for Waycross, in my district, thereby honoring Waycross with the distinction of being the first and only city in Georgia to become the headquarters of a second Federal court in the same congressional district. My district has twice as many Federal court grounds as any other congressional district in Georgia, and the people therefore can attend to their Federal court affairs much more quickly and cheaper than heretofore.

Twenty-fifth. Have fought for appropriations for post-office buildings for small cities in my district, but have met the same defeat as other Democrats. The only post-office building built in my district since the war was constructed in Douglas by an appropriation obtained by Mr. Brantley, and on a site I sold to the Government while Mr. Walker was in Congress.

Twenty-sixth. I have sought for 10 years to get a line up to pass a bill to construct the St. Marys-St. Marks Canal. Nothing like this could be put over for the South in face of the so-called Coolidge economy program. If the Democrats win this year, I believe this canal can be built. If the Republicans win, with Hoover the civil engineer, our chances will be good. I shall do my best in either event.

Twenty-seventh. I have always worked for river and harbor improvements for my district and shall continue to do so.

Twenty-eighth. I oppose a high tariff generally, but work for a tariff on products of my people to offset so far as possible the tariff on what they buy.

Twenty-ninth. I am bitterly opposed to the usurpation of the rights of the States by the Federal Government and deplore the passing of rights of the people to bureaus and bureau chiefs.

Thirtieth. I have fought the spoils system at every opportunity.

Thirty-first. I fought and made speeches against the settling of the Italian and other foreign debts in such a way as to donate to these countries millions and millions of dollars of the people's money.

Thirty-second. The eighteenth amendment is a part of the Constitution of the United States. I am sworn to uphold and defend it. In Congress I have consistently voted for its faithful and efficient enforcement. I stand for the enforcement of the law.

Thirty-third. I favor the repeal of section 15 (a) of the Esch-Cummins Transportation Act and the restoration of "a reasonable rate" as a basis of rate making. I voted against the Esch-Cummins bill. Freight rates on agricultural products and commodities which the farmer must buy are too high. I favor a survey of the whole rate structure with a view to its readjustment to meet present conditions.

Thirty-fourth. The Federal Government, because of its interest in post and military roads has a distinct interest in the maintenance of highways. Federal aid has always had my active support. It shall be my policy to advocate the extension of Federal aid in proportion to the advancement of road-building programs throughout the United States.

Thirty-fifth. For many years the salaries of postal employees and carriers were much lower than those of others in Government employ. I have voted for the adjustment of salaries to equalize them. The efficiency of the Postal Service should be maintained.

Thirty-sixth. In Congress I have supported restrictive immigration legislation. The conditions in Europe following the World War demanded that the United States protect its own interests and those of its people by preventing an influx of aliens. I voted against Japanese immigration and took an active part in preventing the administration from handling that question by a "gentlemen's agreement." To have tolerated such a policy would have given immigration the color of being an international question. It is purely a domestic question, subject alone to the action of Congress and the American people. No other nation nor foreign influence has any right either to dictate or suggest to the people of the United States what their policy shall be with reference to immigration.

Thirty-seventh. I have left off some large committee assignments I could have secured so as to stay on the committee dealing with drainage and so as to make a fight to give the wet lands of the South the same help given in the way of irrigation to the lands of the West. I feel the logical time is at hand to put the South on a parity with other sections in matters of drainage and otherwise.

Thirty-eighth. I have fought to save for the people the great God-given assets, such as Muscle Shoals, the public forest, the oil properties, and so forth.

Thirty-ninth. I have endeavored to legislate on the theory that if the common people are prosperous their prosperity will inure to the benefit of all rather than on the theory that if the rich are made richer that in some mysterious way enough will ooze through the pockets of wealth for the common folks.

Fortieth. I have been true to the common people. As God gave me to see the right I have labored for the man of toil in shop, factory, and farm, and for the common people everywhere. I have done my best. My conscience is clear.

Mr. Speaker, of course I can not mention in a few minutes all that I have done in Congress in nearly 10 years. We all realize that the World War more than doubled the duties of Members of Congress. Hundreds of claims come to Members which we are glad to handle. Nevertheless, much time is required. Congressmen are no longer lawmakers only. We have become the general counsel for the people of our district. I am glad it is this way. We stay in closer touch with our people. We know more fully their cares when they write us for help in every possible trouble. Our people have honored us. We are getting a fair salary. We should render the most efficient service possible. No Member can personally handle all that comes through his office if he stayed here all the time and never put any time at all on the matter of making laws. Necessarily much is gained by an efficient, conscientious secretarial force. I am most fortunate in this respect. Mrs. Nanna G. Cross, formerly Miss Nanna Griffin, of Valdosta, sister of Mr. Newton Griffin, of Valdosta, and aunt of Mrs. Governor Hardman, has charge of my office work in Washington. She has been in Washington handling departmental work for nearly 30 years and knows more about the work here than most Congressmen. With her experience and mine we are able to dispose of many important matters much more efficiently and with one-tenth of the time required by any new Member and new office force. Honestly, I do not believe any congressional office in Washington handles the matters submitted more efficiently than mine.

I am not claiming this credit; it is largely due to the efficiency and painstaking efforts of Mrs. Cross. I purpose keeping my office open here all the year for the transaction of the business of my people as long as I stay in Congress, and as long as Mrs. Cross consents to remain in charge. Most Members close their office when Congress adjourns. Some discharge part of the secretarial help. I find that the very best service can be given by my office remaining open all the while.

My brother, Mr. Henry L. Lankford, of Pearson, is my clerk, and as such handles matters for me in Georgia the year round. He pays out of his allowance the salary of from one to three persons here to help in the office, address envelopes, and do whatever other work is required. He gives special attention to me in my efforts to serve the people when I am home, hauling me in his car and doing whatever else is required in his capacity as my clerk. He at all times shows to me in my congressional efforts the loyalty not only of an employer, but that of a brother, even thought ofttimes he saves nothing out of his salary as my clerk.

Mr. Speaker, I hesitate to mention a personal matter which I feel has been unnecessarily emphasized by those who seek to get the attention of the public away from the real merits of my official record. I would not at this time mention that which has caused me more embarrassment and forced on me more

sleepless nights than all else if I did not feel that it would not be fair for my entire record here to be misunderstood because of a wrong impression of me.

It is being urged that I should not be given full credit for my services here and am not entitled to future confidence of my people, because I have not been able since I came to Congress to pay all I owed when I was first elected. Let me frankly confess I still owe part of what I owed 10 years ago. I have paid court cost, attorneys' fees, interest, taxes, and loan commissions and cut the principal down to less than one-fifth of the original amount. In spite of more hospital and doctor bills than ever in all my life before, and thousands of dollars spent keeping my wife and three children in the West for the last three years on account of my son's illness, I have averaged paying about half my salary on my debts every month. Many Congressmen say they can not live on their salary. My family and I get along on one-half of mine, and I pay the other half to my creditors. I have not owned an automobile since I came here. I do not intend to spend money I can possibly avoid while I am owing money that is justly due and unpaid.

I have always arranged for all rents of properties in which I am interested to be collected by some agent and go directly to those holding liens against the property. Four or five hundred dollars per month is now going on my debts, and if God gives me life and strength, I hope to get out in less than three years more. I have not paid out since I came to Congress simply because I have not had time with my present income. Before I was first elected I lost some money on corporate stocks and built an office building costing $32,000 of borrowed money. That building alone has cost me over $15,000 out of my salary since I came to Congress. I have never received one cent net out of it. I hope, though, in the near future to get it where it will pay me a profit each month. Even though it has been a burden to me, this building has yielded to my city, county, and State over $10,000 in taxes since it was built.

A large part of what I now owe is practically unsecured, but I hope to pay every dollar of it, nevertheless. I have paid all my indebtedness over and over in embarrassment and remorse of conscience, but I want to see the happy day when once again I can know that I do not owe a dollar that is past due and unpaid. My people trusted me and elected me when I owed five times what I now owe. I have done my best to prove worthy of that trust in service and in a serious effort to pay what I owe. I have had no income except my salary and a small amount in rents. I could have gone into bankruptcy, but that would not have paid what I owe. I am struggling to pay out, and feel I should not be condemned for not being quite out yet.

Some have criticized me for buying a home and a little other property here. When I came here I was determined not to buy anything, as I already owed too much. I soon found though that it would cost me much more to rent than it would to buy with a small cash payment and monthly installments. In fact, I gave up an undesirable apartment at $145 a month, paid $500 cash on a house and began to pay $125 a month installment. I rented the upstairs at $65, so I was actually saving $80 a month by buying and getting a little paid on a piece of property. That piece of property is still paying for itself. In brief, the property I bought here is paying for itself, and I have been able to pay more on my debts down in Georgia than I could have paid if I had kept on paying big rents rather than buying.

I heard the other day that some one said I owned some property in California. That is good news to me. I did not know of my good fortune. Honestly, I do not own any land anywhere. I am trying to pay for some. I never at any time bought any land anywhere except down home and here.

I apologize again for this diversion. I felt I owed it to my people to advise them of the facts.

Mr. Speaker, I feel that my hardships in life have not disqualified me to represent my people. In my heart I know that I owe everything I am or ever hope to be to the common people of my district. I can never repay them. No man who has not lived with them and suffered with them knows the agonies of mind and body that they have endured. No man who is not in fullest accord with my people can truly represent them. On every hand, every hour, I am reminded of the unfair economic systems and discriminatory laws which deprive the people of my section of a just return for their efforts. I know how these systems and laws enslave them and their children, and still I remember my people's fortitude, patience, and patriotism.

It is my humble prayer as their Representative and as one who is in sympathy with their every heart throb that, they having endured all and suffered all, receive all that is justly theirs.

EDMUND F. HUBBARD

The SPEAKER laid before the House a message from the President of the United States, which was read, as follows:

To the House of Representatives:

H. R. 10139, entitled "An act for the relief of Edmund F. Hubbard," is hereby returned without my approval. Attached hereto is a letter from the Secretary of War giving reasons why the bill ought not to become a law. If this bill stood alone it might not be of enough importance to warrant adverse action on the part of the President. It is one of a considerable number of bills which have been passed, two of which have already reached me. These cases for reinstatement involve the review of very careful action which is always taken when men are retired or discharged from the Army, and I can see no reason for passing special bills for relief of this kind.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

Mr. TILSON. Mr. Speaker, I do not see a member of the Military Committee here, and I move that the message be referred to the Committee on Military Affairs.

The motion was agreed to.

The objections of the President were ordered to be spread upon the Journal.

GEORGE R. ARMSTRONG

The SPEAKER laid before the House another message from the President of the United States, which was read, as follows:

To the House of Representatives:

H. R. 4664, entitled "An act for the relief of Capt. George R. Armstrong, United States Army, retired," is hereby returned without my approval. Attached hereto is a letter from the Secretary of War setting out reasons why this bill ought not to become a law. If it stood by itself it might not be important enough to warrant a veto. It is a bill, however, of a series which have been passed, two of which have already reached me, and taken in its connection with others of a like nature I am unable to give it my approval.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

Mr. TILSON. Mr. Speaker, I move that the message be referred to the Committee on Military Affairs.

The motion was agreed to.

The objections of the President were ordered to be spread upon the Journal.

COWLITZ TRIBE OF INDIANS

The SPEAKER laid before the House another message from the President of the United States, which was read, as follows:

To the House of Representatives:

I am returning herewith H. R. 167, "An act to amend the act of February 12, 1925 (Public, No. 402, 68th Cong.), so as to permit the Cowlitz Tribe of Indians to file suit in the Court of Claims under said act," without my approval.

These claims amount to approximately $1,584,800, which represents the value, at $1.25 per acre, of 1,267,840 acres of land in the aboriginal possession of the Indians.

In returning S. 1480, without my approval, I said:

These claims are not based upon any treaty or agreement between the United States and these Indians, nor does it appear to me that they are predicated upon such other grounds as should obligate the Government at this late day to defend a suit of this character. The Government should not be required to adjudicate these claims of ancient origin unless there be such evidence of unmistakable merit in the claims as would create an obligation on the part of the Government to admit them to adjudication. It seems to me that such evidence is lacking.

The same objections apply to this bill—H. R. 167. I am compelled, therefore, to withhold my approval of this bill.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

The objections of the President were ordered to be spread upon the Journal.

Mr. LEAVITT. Mr. Speaker, I move that the message be referred to the Committee on Indian Affairs.

The motion was agreed to.

COORDINATION OF PUBLIC-HEALTH ACTIVITIES IN THE GOVERNMENT

The SPEAKER laid before the House another message from the President of the United States, which was read, as follows:

To the House of Representatives:

Herewith is returned without approval H. R. 11026, a bill to provide for the coordination of the public-health activities of the Government, and for other purposes.

This act, in my opinion, is so framed as to undertake to take away and limit the constitutional authority of the President to make appointments. I have been furnished with a memorandum by the Attorney General, in which I concur, that is as follows:

This act contravenes section 2, Article II, of the Constitution of the United States, in that it creates offices of the United States to be filled by appointment by the President, with the advice and consent of the Senate, and at the same time not only limits the choice for appointees to such offices to persons who possess the qualifications of passing an examination conducted by a board of officers convened by the Surgeon General of the Public Health but also limits the choice among individuals possessing such qualifications to persons who are recommended by such board and by the Surgeon General, thereby attempting to vest in such board and in the Surgeon General participation in the executive function of appointment of officers of the United States, which function can be vested in and exercised only by the President, with the advice and consent of the Senate, the President alone, the courts of law, and heads of departments.

I am not unmindful of the primary purpose of this bill to coordinate the public-health activities of the Government, and the importance of enlarging the facilities of the Public Health Service to enable it to deal more effectively with Federal health problems.

Under the provisions of the act of January 4, 1889, medical officers of the Public Health Service are appointed by the President, by and with the advice and consent of the Senate. In the bill under consideration it is proposed to extend this method of appointment to include sanitary engineers, medical, dental, and other scientific officers, including pharmacists engaged on comparable duties, selected for general service and subject to change of station. At the present time sanitary engineers are serving as civil-service employees, and dentists are serving under reserve appointments. While the bill does not provide for new personnel, it is my understanding that approximately 100 sanitary engineers, dental, medical, and other scientific officers, now on the Public Health Service rolls, will be eligible for appointment to a regular commissioned status, divided about equally among the classes named.

For some time past there has been a definite movement among various groups of Government professional and scientific employees toward militarization of their respective services, and I am impelled to oppose this movement from the standpoints of both economical administration and public policy. From an economic standpoint the method of appointment of the civilian personnel should be such that the force of Government employees can be increased or decreased as the needs of the service or condition of the Treasury makes necessary. But more important still, I do not believe that permanency of appointment of those engaged in the professional and scientific activities of the Government is necessary for progress or accomplishment in those activities or in keeping with public policy. If this were the only objection, I might have been inclined to overlook it, though I feel it is one that ought to be corrected in the preparation of any new legislation. The unconstitutional feature, of course, I could not overlook.

The Secretary of the Treasury, who has administrative supervision of the Public Health Service, in 1927 stated to your body his belief that legislation for the unification of the method of appointment of professional personnel, in so far as it would give a military character to the Public Health Service, was unnecessary in the civilian service of the Government, and that there should be eliminated from the legislation any provision which gives a military status to officers or employees of the service engaged in scientific pursuits.

The other provisions of the bill have my entire approval, and if the unconstitutional feature should be removed and the militarization feature removed I should be pleased to approve it.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

The objections of the President were ordered to be entered upon the Journal.

Mr. PARKER. Mr. Speaker, I move that the message be referred to the Committee on Interstate and Foreign Commerce.

The motion was agreed to.

NIGHT WORK IN THE POSTAL SERVICE

The SPEAKER also laid before the House a further message from the President of the United States, which was read, as follows:

To the House of Representatives:

Herewith is returned, without approval, H. R. 5681, a bill to provide a differential in pay for night work in the Postal Service.

Night work has always been a necessary and characteristic feature of employment in the Postal Service, and notwithstanding the continuous campaign that has been carried on by the Post Office Department for a number of years, with some measure of success, to induce the public to mail early in the business day rather than just before its close, it is evident that the expeditious distribution, dispatch, and delivery of the mails will continue to require the greater part of postal work to be performed between the hours of 6 o'clock in the evening and 6 o'clock in the following morning.

It is estimated that the provisions of the bill now returned would add $6,456,000 to the present annual cost of the Postal Service. The operating deficit in postal revenues for the fiscal year ended June 30, 1927, payable from the general fund of the Treasury derived from taxes, duties, and miscellaneous receipts, was over $31,500,000. For the fiscal year 1928 it is estimated that the deficit will be about $32,400,000, and for the fiscal year 1929 about $28,300,000. There is now pending before the Congress a bill (H. R. 12030) revising postal rates. As passed by the House of Representatives it is estimated that the bill will cause an annual decrease in postal revenues, and a corresponding further increase in the postal deficit, based on current mailings, of $13,585,000. As passed by the Senate it is estimated that the bill will cause an annual decrease in the revenues and a corresponding further increase in the deficit of $38,550,000.

With these figures before me I am not disposed further to increase the burden on the taxpayers of the country for the maintenance and operation of the Postal Service, especially in view of the very substantial increases in pay given postal employees under the so-called postal reclassification act, approved February 28, 1925. Moreover, it is my understanding that a proposal to establish a night-work differential was considered by the proper committees of Congress in connection with the reclassification legislation, and eliminated by them because of the substantial flat-rate increases in pay that had already been agreed to and which were subsequently included in the reclassification act. If night work in the Postal Service has any basis whatever for a differential in pay, the action of the committees referred to would indicate that the present-pay schedules include it.

It should be recalled that the postal-pay increases which I approved caused an increase in the Budget for 1926 of about $65,000,000. Every committee that approached me urged that this increase be granted because of certain night work that was involved in the duties of the postal clerks. It is well known that the pay received by those so employed is in excess of that which is paid for corresponding work in private enterprise. While I believe in good wages, they can only be advanced as our economic position improves. The burdens of the war debt have to be borne by all our people. The almost irresistible tendency of Government expenditure is to mount higher and higher. All increases which are not absolutely necessary ought not to be incurred. The officials of the Government who are charged with the conduct of its affairs ought not to yield to constant and organized clamor for increases in pay, unless they are justified by the clearest evidence.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

The objections of the President were ordered to be spread upon the Journal.

Mr. LAGUARDIA. Mr. Speaker, I move that the consideration of the President's veto message be postponed until Tuesday next.

The SPEAKER. The question is on the motion of the gentleman from New York.

Mr. SWING. Mr. Speaker, will that be open to debate?

The SPEAKER. It will be in exactly the same situation on Tuesday next that it is now. It will be open to debate unless the previous question is ordered.

The motion of Mr. LAGUARDIA was agreed to.

ALLOWANCES FOR RENT, ETC., FOURTH-CLASS POSTMASTERS

The SPEAKER also laid before the House the following message from the President of the United States, which was read:

To the House of Representatives:

Herewith is returned, without approval, H. R. 7900, a bill granting allowances for rent, fuel, light, and equipment to postmasters of the fourth class, and for other purposes.

The bill would necessitate an increase of approximately $2,865,000 in the annual postal expenditures, based upon the aggregate compensation of postmasters of the fourth class for the fiscal year 1927. This amount would be increased or decreased as the compensation of postmasters for the fiscal year 1929 increases or decreases.

It is well known that fourth-class post offices are generally carried on in connection with the private business of the postmasters, usually in country stores, and are regarded as beneficial to the business. The space occupied is ordinarily insignificant and the location of the post office in the storerooms seldom involves additional expense for rent, light, and fuel.

The compensation of postmasters of the fourth class was materially increased by the act of June 5, 1920; again by the act of July 21, 1921; and again by the act approved February 28, 1925. In the debates preceding the passage of these acts the fact that postmasters at offices of the fourth class are required to furnish at their own expense quarters, including light and fuel, was brought out. It is not improbable, therefore, that part of the increase in compensation granted by these acts was due to the fact that the postmasters are required to furnish these facilities.

I believe that postmasters of fourth-class post offices are now reasonably compensated and, therefore, am not in favor of the additional compensation which this bill provides for.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

The SPEAKER. The President's message will be spread at large upon the Journal.

Mr. LAGUARDIA. Mr. Speaker, I move that the consideration of the President's veto message be postponed until Tuesday next.

Mr. UNDERHILL. Mr. Speaker, what is the purpose of this motion? Is it so that we may be deluged by telegrams from various parts of the country, or is it for the purpose of expediting business?

The SPEAKER. The Chair would hardly regard that as a parliamentary inquiry. The question is on the motion of the gentleman from New York to postpone the consideration of the President's message until Tuesday next.

The question was taken; and on a division (demanded by Mr. UNDERHILL) there were—ayes 138, noes 53.

So the motion was agreed to.

SAN FRANCISCO AND THE HETCH HETCHY GRANT IN YOSEMITE NATIONAL PARK

The SPEAKER. Under special order of the House, the Chair recognizes the gentleman from Michigan [Mr. CRAMTON].

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and in doing so to insert certain letters and opinions of the Attorney General and some extracts of proceedings.

The SPEAKER. The gentleman from Michigan asks unanimous consent to revise and extend his remarks, and in connection therewith to insert certain letters and opinions of the Attorney General and other matters. Is there objection?

There was no objection.

Mr. CRAMTON. Mr. Speaker, the generous grant of important rights in one of our greatest national parks to meet the water needs of one of our greatest cities, the failure of that city to carry out its obligations under that act, its unwarranted and unnecessary interference with the administration and use of the park, and the conversion to private profit of water power stipulated as only for public use—these are the things I wish to bring to your attention to-day.

I do so not only in the hope that the situation outlined may be aided by thus challenging national attention to it but in order that the experience of the Federal Government in this instance may warn us of the care and conservatism that should govern us in any grant of the Federal domain for local benefit, and the stringency of the safeguards requisite to adequately protect the public interest.

There was a time when the words Hetch Hetchy were as common sounds in this Chamber as McNary-Haugen, Muscle Shoals, or Boulder Dam. The cause they represented, water supply for the city of San Francisco through construction of reservoirs in Yosemite National Park, had sufficient force to cause action upon it by this House in the first session of the Sixty-third Congress, in September, 1913, the opening special session of the Wilson administration. In that session a resolution of the caucus of the Democratic Party, the majority party, limited the business of the session to appropriation bills, the revision of the tariff, and the enactment of the Federal reserve banking act. So great was the pressure of the Hetch Hetchy legislation that it won a place on that select program. Against it John Muir, Robert Underwood Johnson, and other nature lovers of national repute and influence were arrayed and their pronouncements brought nation-wide protests from women's clubs and others against the alleged despoilment of one of our greatest national parks.

That was my first session as a Member of this House and the whole controversy made a lasting impression upon me, so that I have personal knowledge of the subject I am discussing.

I am bringing to-day to your attention the shocking breach of faith by the city and county of San Francisco in its subsequent conduct in connection with the grant then secured from the Federal Government, a breach of faith threefold in character, involving (1) failure to construct roads and trails and convey lands that were expressly stipulated conditions of this grant, (2) undue interference with the administration and use of the Yosemite National Park for proper and essential park purposes, and (3) diversion of power to the profit of a private company in violation not only of the whole spirit of the act but its express terms.

THE CONTEST OVER THE HETCH HETCHY GRANT

The Hetch Hetchy bill was based upon the alleged desperate necessities of the city of San Francisco for additional water supply. In opening the debate upon it in the House, Hon. Scott Ferris, then chairman of the Committee on the Public Lands, which reported the bill, said:

> This bill, as the committee knows, is known as the San Francisco Hetch Hetchy waterworks bill. The committee has been convinced by conversations had with Secretary Lane, with city officials of San Francisco, and conversations and hearings had with 11 Members of Congress from California, that the city of San Francisco is suffering from a water famine. (Vol. 50, CONGRESSIONAL RECORD, p. 3894, August 29, 1913.)

He quoted a letter from Secretary Lane dated May 29, 1913, which stated:

> The newspapers and others are keeping it as quiet as possible, but the situation is one of emergency and of actual distress.

Hon. John E. Raker, who introduced the bill, said to the House:

> San Francisco urgently needs an additional supply of water. The city is confronted by an emergency. Practically one-third of the municipality is without an adequate water supply. The condition is so grave that the water company now supplying the city has advertised in all the papers, warning the people not to wash down their steps, sprinkle their lawns, or otherwise waste water. (RECORD, p. 3900, vol. 50.)

Such was the need that was proclaimed. To meet this, it was proposed to grant—

> to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California—

And so forth.

Most important was the right to build a great dam 300 feet high to create in Hetch Hetchy Valley of the Yosemite National Park a tremendous water-storage reservoir.

This Hetch Hetchy Valley, some 20 miles from the famed Yosemite Valley, was thus described by John Muir at that time:

> The Hetch Hetchy Valley is a wonderfully exact counterpart of the great Yosemite, not only in its cliffs and waterfalls and peaceful river, but in the gardens, groves, meadows, and camp grounds of its flowery, park-like floor. (Letter of June 27, 1913, quoted, RECORD, p. 3973, vol. 50.)

Many Members of the House were gravely concerned by such allegations of despoilment of a national park. The bill was, on the other hand, vigorously urged by the entire California delegation (see letter of August 1, 1913, Exhibit A), supported by the unanimous report of the Committee on the Public Lands, was approved by the Departments of the Interior and of Agriculture, and ably championed in the House by Chairman Ferris and Representatives Raker, Julius Kahn, and William Kent, of California, FRENCH, of Idaho, Thomson, of Illinois, and others.

So positive and explicit were the claims made as to the need for water and the assurances given in debate as well as the terms attached to the grant in the bill, that we were satisfied to give the city its reservoir. The city was desperate and had no other feasible source, the beauty of the park would not be disturbed but would be enhanced and made accessible to the many instead of restricted to the few, the limited sanitary requirements would not only not interfere with use of the park area but campers would be encouraged and places made available for them, beautiful scenic roads and trails to be provided by San Francisco in return for the grant would open a new park area of charm and beauty, and all was for the superior public interest, nowhere was private profit to be served. And so we voted for Hetch Hetchy and it became law. The following present Members of the House were among those voting for the bill: ASWELL, BELL, BUCHANAN,

BYRNS, COOPER of Wisconsin, CRAMTON, CRISP, CURRY, DICKINSON of Missouri, DOUGHTON, DYER, EVANS of Montana, FRENCH, GARNER of Texas, GARRETT of Tennessee, JOHNSON of Washington, KELLY, LINTHICUM, McLAUGHLIN, MAPES, MONTAGUE, NELSON, of Wisconsin, OLDFIELD, POU, RAYBURN, RUBEY, SABATH, SINNOTT, STEDMAN, SUMNERS of Texas, TAYLOR of Colorado, TEMPLE, WINGO, WOODRUFF. Present Members of the House voting against the bill were BRITTEN, COLLIER, and GARRETT of Texas.

FIFTEEN YEARS HAVE PASSED

Now, it is 15 years later. San Francisco has built the dam and many miles of waterway, but not one drop of water from Hetch Hetchy has ever been used to augment the water supply for San Francisco, and until the past few weeks no serious move made in that direction. Power has been developed and in direct and open violation of the grant is sold to a private power company. The roads have not been built and in response to the official demand of the Secretary of the Interior for compliance with the grant the city questions the character and extent of the roads required. And not only does the city served by the grant fail to perform its promises to make new park areas accessible to the public but by high-handed, entirely unjustified interference in park administration it has sought to virtually exclude the public from fishing and camping in the Tuolumne watershed, approximately half to two-thirds of the great Yosemite Park area.

THE OBLIGATION TO BUILD ROADS AND TRAILS

The Raker Act provided in section 9 (p) that certain roads and trails should be built in the Yosemite National Park. Under date of July 7, 1927, Hon. Hubert Work, Secretary of the Interior, made formal demand upon the city and county of San Francisco—

to require performance by them of all matters required of them in the act of December 19, 1913—

Including construction of these roads and trails. (See Exhibit B.) To this the city replied, October 13, 1927 (see Exhibit C), urging that roads of the type called for, estimated to cost $1,628,500, were not contemplated by the act. In conference it was urged that—

the road and trail provisions in the act were included merely for the purpose of having the city provide roads and trails for patrol purposes in connection with the administration of the park but not for tourist travel.

The gentleman from California [Mr. WELCH], who was for a long time a member of the board of supervisors of San Francisco County, was then present and was understood to have that point of view. At the time of his departure for Washington, November 30, 1927, the San Francisco Chronicle stated:

Congressman WELCH, whose familiarity with the Raker Act and the whole Hetch Hetchy project comes from his long service as a supervisor here, is out to do battle with Stephen Mather, Director of National Parks, and those who want to force San Francisco to expend more than a million dollars for Hetch Hetchy road construction. San Francisco taxpayers should not be forced to pay thousands of dollars for boulevards in Hetch Hetchy when only wagon roads and trails were contemplated when the Raker Act was passed by Congress.

San Francisco raises the question as to what the Raker Act required. Those who were here at the time or those who will read the record can have no doubt. The city agreed in 1913:

(p) That this grant is upon the further condition that the grantee shall construct on the north side of the Hetch Hetchy Reservoir site a scenic road or trail, as the Secretary of the Interior may determine, above and along the proposed lake to such point as may be designated by the said Secretary, and also leading from said scenic road or trail a trail to the Tiltill Valley and to Lake Vernon, and a road or trail to Lake Eleanor and Cherry Valley via McGill Meadow; and likewise the said grantee shall build a wagon road from Hamilton or Smoths Station along the most feasible route adjacent to its proposed aqueduct from Groveland to Portulaca or Hog Ranch and into the Hetch Hetchy Dam site, and a road along the southerly slope of Smiths Peak from Hog Ranch past Harden Lake to a junction with the old Tioga Road, in section 4, township 1 south, range 21 east, Mount Diablo base and meridian, and such roads and trails made necessary by this grant, and as may be prescribed by the Secretary of the Interior. Said grantee shall have the right to build and maintain such other necessary roads or trails through the public lands, for the construction and operation of its works, subject, however, to the approval of the Secretary of Agriculture in the Stanislaus National Forest, and the Secretary of the Interior in the Yosemite National Park. The said grantee shall further lay and maintain a water pipe, or otherwise provide a good and sufficient supply of water for camp purposes at the Meadow, one-third of a mile, more or less, southeasterly from the Hetch Hetchy Dam site.

That all trail and road building and maintenance by the said grantee in the Yosemite National Park and the Stanislaus National Forest shall be done subject to the direction and approval of the Secretary of the Interior or the Secretary of Agriculture, according to their respective jurisdictions.

I might call attention at this time to the map which I have here. It is a map of the Yosemite National Park. The part of the park best known is the valley of the Merced. The valley of the Hetch Hetchy, affected by the legislation that I am discussing, is up here, some 20 miles away. Gentlemen will note that the great area of the Yosemite National Park as shown on this map, the greater part of which is scarcely ever seen by anyone, and some of which has never been visited.

Mr. COOPER of Wisconsin. Mr. Speaker, if the gentleman will permit, will he kindly indicate in what direction San Francisco is from the section of the map he has been referring to?

Mr. CRAMTON. Here is a road to Stockton, and here is a road to Merced. San Francisco would be off in this direction, a distance of 160 miles, as I recall it.

Those roads and trails specified in the act are vital to the proper development of Yosemite National Park, tremendously needed now with the great increase of attendance there. The attendance, chiefly of Californians, has trebled in two years, and last year was 490,000 people.

Mrs. KAHN. That is at Yosemite Valley.

Mr. CRAMTON. Yes; necessarily the visitors would go to this valley because of the lack of roads and other developments to enable them to get into these other areas, but the situation is considered so important that in the Interior appropriation bill for the year 1929 there is carried an authorization for the creation of a commission that is now at work studying the problems of the Yosemite Park with a view to working out some way to get the visitors out of this congested area so that they may enjoy the tremendous areas there are throughout all the rest of the park. In that development the construction of these roads by San Francisco is a necessary part. But do not let anyone get the idea that the Federal Government is sitting back and leaving it all to San Francisco to do. We have expended and authorized for roads in that park $2,023,000, and the program in the future that is under way will call for something like $11,000,000 more. But the little $1,600,000 that San Francisco promised to open up this area is what I am talking about now.

The records of the past fully sustain the Secretary of the Interior and absolutely disprove any such contentions as San Francisco now urges. The brief submitted to the Committee on the Public Lands of the House by San Francisco, signed by Percy V. Long, the city attorney; the statements made before the Public Lands Committee by Engineer O'Shaughnessy and by Franklin Lane, former city attorney of San Francisco and then Secretary of the Interior; the report to the House by Congressman Raker, the introducer of the bill; the speeches of Judge Raker, Chairman Ferris, and Congressman Julius Kahn, of San Francisco, in the House, and of Senator KEY PITTMAN, who led the fight for the bill in the Senate, all expressly urged the value of these roads and trails in developing that section of the park for public use. Not only that, but those gentlemen who led the fight for San Francisco construed the language of the act as leaving the character of the improvements entirely to the discretion of the Secretary of the Interior, promised automobile roads and stated such roads and trails would cost from $500,000 to $1,000,000. The roads that would have cost from $500,000 to $1,000,000 in 1913 would naturally cost more than $1,600,0000 to-day.

Mr. O'Shaughnessy told the Public Lands Committee that San Francisco submitted itself entirely to the discretion of the Secretary of the Interior "as to the character of these improvements"—said they were ready to pay $1,000,000 for roads.

He said in the hearings:

Mr. GRAHAM. The road, of course, would be located especially with a view to exposing the scenery and beauty of the place?

Mr. O'SHAUGHNESSY. It would. In this connection, I will say that there is a gentleman here in the Government service, Mr. Marshall, in the United States Geological Survey, who made the map that you see, the Government map, who has made a special study of this project, and I have been in touch with that gentleman and his views and suggestions, and I can safely pledge the city that whatever line of development these people choose for the expenditure of this money for the roads and trails we will be glad to comply with.

Further on in the hearing, speaking of a possible road on the south side of the reservoir, Mr. O'Shaughnessy stated:

About one-half of that [road] it is proposed to discontinue, as the people who desire to preserve the park requested that we omit a part

of that road, and there is a qualifying clause put in this bill that this road shall be built so far as directed by the Secretary of the Interior. We submit ourselves entirely to his direction and discretion as to the character of these improvements.

And this Mr. O'Shaughnessy, who then said, "We submit ourselves entirely to his direction and discretion," now contests against the directions of the Secretary of the Interior and the very reasonable exercise of discretion on which it is based.

City Attorney Long in his brief said that San Francisco proposed in return for the grant—

to build at its own expense a magnificent system of roads and trails which will make one of the most beautiful scenic parts of the Sierra, now reached only by tedious journeys afoot, or on mule back, generally accessible to the public.

Franklin K. Lane, former city attorney of San Francisco, and then Secretary of the Interior, emphasized to the Committee on Public Lands that the city of San Francisco was undertaking—

to construct and maintain roads, trails, and bridges, which will practically result in a great enlargement of the park areas of the high Sierra by making them more safely and easily accessible.

I have at hand the report in 1912 on the Hetch Hetchy proposal by John R. Freeman, employed by the city of San Francisco for that purpose—

the result of two years personal study on the part of Mr. Freeman, working with a staff of skilled engineers, as the mayor states in the letter of transmittal.

This was the foundation on which San Francisco built its case before the departments and before Congress. Illustrations, full page, therein on pages 6, 10, 12, 13, 16, 17, 18, 19, and others feature the proposed scenic roads. In connection with views from Norway the engineer states:

It was while touring on certain of these Norwegian roads that the engineer developed his plan for a scenic road in the Hetch Hetchy.

The report details proposed roads—

a first-class, well-surfaced wagon road—the quality of roadbed equal to that of the State highways. The city proposes to build and maintain a scenic road along both shores of the proposed Hetch Hetchy Lake. This road * * * equal in permanence and surface to the State highways.

Under the Freeman report the proposition of San Francisco was a paved scenic highway all the way around the reservoir, and there are the pictures.

I read from the legend underneath the picture, on page 6:

Showing also the proposed scenic road around the lake.

Anyone who desires to consult the other full-page, halftone engravings is at liberty to do so.

That was the proposition of San Francisco—a scenic road all the way around that great reservoir. Congress decided not to have that road, but said there should be a road or trail on the north side, and the Secretary of the Interior has called on the city of San Francisco to construct that at a cost of $43,500, so that really what could not be built probably for about a million dollars they are getting out of for $43,500.

But to say that Congress did not have in mind automobile roads or such a program as the Secretary of the Interior now calls for is ridiculous and has placed San Francisco in the position of ungracious quibbling about performance of its own promises, after being saved $20,000,000 by the Hetch Hetchy grant.

It is important not only that San Francisco build the roads, but that the San Francisco attitude toward the Hetch Hetchy use of Yosemite National Park be changed, an attitude which no doubt is not fairly representative of the thought of the best people of that great city, but is at least officially so representative.

Let us look at the record as to the promises made.

The report of the committee, which always has great weight with the House, summarized the provisions of the bill, and stated—

these roads will cost the city of San Francisco $500,000 to $1,000,000—

and would be built subject to the approval and direction of the Secretary of the Interior. The report further urged—

the city proposes to expend more than a million dollars in making the sublime scenery of the Hetch Hetchy and Yosemite accessible to people of small means and limited leisure.

Chairman Ferris, of the Public Lands Committee, told the House San Francisco agreed to construct improvements "which aggregate approximately $1,000,000."

The analysis of the bill distributed by the promoters of the legislation, and inserted twice in the RECORD by Judge Raker—RECORD, page 3911—and by Representative Thomson had this comment on section 9 (p) as to roadbuilding:

The routing of these roads and trails was made by Mr. Marshall, of the Geological Survey, who surveyed the Hetch Hetchy Valley and is familiar with all the scenic and topographical conditions there. These roads will cost the city of San Francisco $500,000 to $1,000,000, and are to be turned over, free of charge, to the United States. This is one of the important considerations, and carries compensation to the Government for the rights of way granted. The construction of these roads will make the Hetch Hetchy Valley accessible and will provide a convenient and easy way for mountaineers to reach the higher parts of the Sierra. The paragraph also contains a requirement that the grantee shall provide a water supply for camp purposes at the Meadow camping place, a third of a mile from Hetch Hetchy. It is also provided that all trail and road building shall be done subject to the approval and direction of the Secretary of the Interior or the Secretary of Agriculture, according to their respective jurisdictions.

Judge Raker promised "boulevards around this lake, so that the people may see the wonders of the Hetch Hetchy Valley, and also the remainder of this territory that is in the watershed of this valley," and that San Francisco would build and maintain roads as specified that would cost "in the neighborhood of $1,000,000," and spoke of the "beautiful road to the Hetch Hetchy Valley." (See Exhibit D.)

Congressman Julius Kahn emphasized that the grant would save San Francisco $20,000,000; that the United States should be willing to do this because of the burdens left on the city by the great fire. He stated the burdens placed on the city in the bill were heavier than he thought they ought to be, but "we do accept it with all its burdens," and that San Francisco would live up to the spirit and letter of the bill.

Congressman FRENCH, of Idaho, a member of the committee that reported the bill, expressed the understanding of Congress, when he said that under the terms of the bill there would be constructed—

roads and trails at a cost of many hundreds of thousands of dollars.

In the Senate the full report of the House committee was printed in the RECORD, and these promises so much emphasized there had great weight in getting the bill through.

Senator KEY PITTMAN, of Nevada, who was a leader in behalf of the bill, said the bill provided that San Francisco should—

build such roads and boulevards as will allow the people of all this country to get into the valley with wagons or automobiles, by foot or on horseback; to go up the boulevards to the top of the peaks, which are 8,500 feet high, drive around the border of that lake, and see all the beauties of that great national park.

These statements, made in behalf of San Francisco and construing the terms of the act when the grant was sought and accepted, can not be repudiated and ignored by any community that has a proper regard for its reputation. They are conclusive and demonstrate that the Secretary of the Interior is only performing his absolute duty when his demand is made. The fact that the Federal Government has so long delayed in calling upon the city for performance does not justify repudiation, but, rather, should serve to expedite compliance by reason of the great consideration that has been shown.

December 14, 1927, the Solicitor for the Interior Department filed an opinion in which he advised the Secretary of the Interior:

I therefore conclude and advise you that the city and county of San Francisco is obligated to construct and maintain, in the manner prescribed by the Raker Act and subject to your direction and approval, such roads and trails over the routes specified in the act as will render those portions of Yosemite National Park adjacent thereto easily accessible to the public under such conditions of travel as existed or could reasonably have been foreseen in 1913. In requiring construction of roads of that character you will be exercising the discretion vested in you by the Congress and the city in the manner intended by those bodies when the Raker Act was passed and the grant accepted.

In response to the request of the Secretary of the Interior under date of December 19, 1927, for his opinion on this and other questions arising under the Raker Act, the Attorney General has within the past few days given an opinion to the same effect. (See Exhibit E.) The position of the Secretary of the Interior is thus fully sustained by the law officers of the Government and insistence by him on compliance with its roadbuilding obligations by San Francisco will no doubt soon bring results.

SANITATION AND ADMINISTRATION

The distressing thing, however, is that San Francisco not only seeks to escape from performance of its promised road

and trail development of this great area but has shown frequently a disposition to interfere with development of the area by the Federal Government and its use by the general public. Engineer O'Shaughnessy seems to have the feeling that San Francisco's use of the park is primary and the public use of the Tuolumne watershed is secondary. That was demonstrated last spring, when notices were posted in the park prohibiting fishing in any waters above the intakes at Hetch Hetchy Reservoir, Lake Eleanor Reservoir, and Early Intake. Press notices were given out that—

all camping and fishing in the watersheds of the upper Tuolumne region will be discontinued this summer.

Here is one notice. It was taken down by a park ranger and at my request sent here. The posted notice was as follows:

Notice: No fishing is allowed above the intakes of our water supply at Early Intake, Lake Eleanor, Hetch Hetchy Reservoir.

M. M. O'SHAUGHNESSY, *City Engineer.*

A number of these notices were posted in this Tuolumne watershed, which is drained by the Hetch Hetchy Reservoir. It drains from this northern boundary of the park down to the divide. This Tuolumne area is the watershed that supplies the Hetch Hetchy. It covers from one-half to two-thirds of the total area of Yosemite National Park, and this is the area in which it was claimed that the granting of this reservoir to San Francisco would not interfere with the use of the national park by the public. It is in that area that the city engineer of San Francisco posted his notice forbidding any fishing in those waters. And he went further in his assumption of jurisdiction over the national park. He went further. First, notices were given out that all camping and fishing in the upper Tuolumne region would be forbidden this summer. All camping and fishing in this great Tuolumne region were forbidden on the word of the city engineer of San Francisco. I have read the posted notice.

I have here also a copy of a letter from O'Shaughnessy to the superintendent of parks. I read:

DEPARTMENT OF PUBLIC WORKS,
BUREAU OF ENGINEERING,
City and County of San Francisco, April 18, 1927.

Mr. W. B. LEWIS,
Superintendent Yosemite National Park, Calif.

MY DEAR MR. LEWIS: You have no doubt been advised in the conference with Secretary Mather, of the National Park Department, last year, that it was resolved that no fishing be permitted either on Cherry or Lake Eleanor.

We are going to observe the rule strictly.

Very truly yours,

M. M. O'SHAUGHNESSY,
City Engineer.

No consent had been given by the Park Service to any such "resolve" of San Francisco.

The effort made to interfere with legitimate public use of this area and the effect of such publicity on the public are further illustrated in the following:

WAR DEPARTMENT,
SAN FRANCISCO GENERAL INTERMEDIATE DEPOT,
QUARTERMASTER SECTION,
Fort Mason, San Francisco, Calif., May 17, 1927.

Mr. LEO K. WILSON,
Editor Fish and Game, the Chronicle, San Francisco, Calif.

DEAR SIR: Reference inclosed clipping from a local daily of yesterday's issue, will you please advise if the locality referred to embraces the Tuolumne Meadows in Yosemite Park?

I spent a week last summer at Soda Springs in Tuolumne Meadows and had intended returning there this year, but am in doubt as to whether this so-called "treaty" covers that portion of the park.

I presume this prohibition is effective only in the Grand Canyon of the Tuolumne, but would be pleased if you would verify same and advise through your valuable and interesting column.

Very truly yours,

T. M. STACK.

[Inclosure]

TUOLUMNE CAMPING DISCONTINUED BY PACT

All camping and fishing in the watersheds of the upper Tuolumne River will be discontinued this summer.

This is a result of a treaty between the city of San Francisco and the Department of the Interior, National Park Service, in which the city asked that all recreational sports in that district be stopped in order that the city's water supply may be kept pure.

The city asked that "all recreational sports" in half or two-thirds of the Yosemite National Park should be stopped in order that the city water supply may be kept pure. They not only ask it, but without warrant they carry to the newspapers of California the statement that it was in pursuance of a pact.

Mr. REED of New York. Mr. Speaker, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. REED of New York. I am very much interested in the gentleman's statement. What are you going to do about it? That is what I am interested in.

Mr. CRAMTON. Well, as to the three proposiitons, I make a suggestion as to each one. As to the first one, the building of roads, the Secretary of the Interior has made his demands, and San Francisco must now do, tardily and ungraciously, that which they should have done gladly and willingly some time ago.

As to sanitation, San Francisco should take its hands off the administration of Yosemite National Park.

These posted and published notices were an unwarranted attempt to eliminate public use of one-half of the entire Yosemite National Park. The very answer of the city attorney of San Francisco, John J. O'Toole, to the Secretary of the Interior, under date of October 13, 1927, which appears in the appendix of my remarks, sets up the claim of jurisdiction over a portion of the park area to inforce sanitary regulations when it is urged that certain lands can not be conveyed to the United States because "it is our contention that these lands are required for use by the city sanitary control of the reservoir."

The amazing thing about these interferences in park administration by officials of San Francisco in the name of sanitation enforcement is that the city of San Francisco has no right to any sanitary restrictions whatever in the Yosemite Park until its reservoirs are used for water supply, and they are not now and have not been as yet so used. And even when the reservoirs are used for water supply there is not a word in the act to justify any interference with fishing or camping in the park. The only sanitary restrictions on use of the Yosemite Park area imposed by the Raker Act are in section 9 (a), reading as follows:

(a) That upon the completion of the Hetch Hetchy Dam or the Lake Eleanor Dam, in the Yosemite National Park, by the grantee, as herein specified, and upon the commencement of the use of any reservoirs thereby created by said grantee as a source of water supply for said grantee, the following sanitary regulations shall be made effective within the watershed above and around said reservoir sites so used by said grantee:

First. No human excrement, garbage, or other refuse shall be placed in the waters of any reservoir or stream or within 300 feet thereof.

Second. All sewage from permanent camps and hotels within the watershed shall be filtered by natural percolation through porous earth or otherwise adequately purified or destroyed.

Third. No person shall bathe, wash clothes or cooking utensils, or water stock in, or in any way pollute, the waters within the limits of the Hetch Hetchy Reservoir or any reservoir constructed by the said grantee under the provisions of this grant, or in the streams leading thereto, within 1 mile of said reservoir; or, with reference to the Hetch Hetchy Reservoir, in the waters from the reservoir or waters entering the river between it and the "Early Intake" of the aqueduct, pending the completion of the aqueduct between "Early intake" and the Hetch Hetchy Dam site.

Fourth. The cost of the inspection necessary to secure compliance with the sanitary regulations made a part of these conditions, which inspection shall be under the direction of the Secretary of the Interior, shall be defrayed by the said grantee.

Fifth. If at any time the sanitary regulations provided for herein shall be deemed by said grantee insufficient to protect the purity of the water supply, then the said grantee shall install a filtration plant or provide other means to guard the purity of the water. No other sanitary rules or restrictions shall be demanded by or granted to the said grantee as to the use of the watershed by campers, tourists, or the occupants of hotels and cottages.

That is to say, (1) the restrictions named are not effective so far as the Raker Act is concerned until the reservoir is used "as a source of water supply"; (2) the only restrictions are elementary ones enforced in any event by park regulations and do not interfere necessarily with camping and fishing; and (3) if San Francisco wants at any time further protection of its water supply in this reservoir it shall itself—

install a filtration plant or provide other means to guard the purity of the water. No other sanitary rules or restrictions shall be demanded by or granted to the said grantees as to the use of the watershed by campers, tourists, or the occupants of hotels and cottages.

Mr. BARBOUR. Mr. Speaker, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BARBOUR. Right there the gentleman is talking about something that I am very much interested in. I would like to ask the gentleman if there was any authority given to San Francisco for posting notices on the upper Tuolumne?

Mr. CRAMTON. There was not.

Mr. BARBOUR. I have received communications from my district about those notices. I wanted to know, at that time, what the authority was.

Mr. CRAMTON. There was no authority whatever. Not a word. Let me repeat that the act carried certain sanitary regulations but it provides that those regulations are only to be effective when the reservoir is used as a source of water supply, and it is not yet so used, and even when it is so used there is no authority for any restriction of camping or fishing in the park. I have already read those provisions. The only sanitary provisions in the act do not interfere with camping and fishing if people conduct themselves as the park authorities would require them to do anyway.

As to the statutory provisions on sanitation, get this: You must remember, in order to appreciate this, what the situation was. There was a nation-wide protest throughout the country against despoiling the park and interfering with the camping and fishing. I was one of those who had a sensitive ear to that kind of a demand. Before we voted we wanted to be reassured. We were reassured, and we voted for the bill, in part, because section 9a read, in part:

> Fifth. If at any time the sanitary regulations provided for herein shall be deemed by said grantee insufficient to protect the purity of the water supply, then the said grantee shall install a filtration plant or provide other means to guard the purity of the water. No other sanitary rules or restrictions shall be demanded by or granted to the said grantee as to the use of the watershed by campers, tourists, or the occupants of hotels and cottages.

It is amazing that the act contains these express provisions that specifically provide against any such notice as that posted by the engineer.

Mr. REED of New York. A great mass of the public did not know but what it was official. What will the Gvernment do to let people know and go into the park?

Mr. CRAMTON. The gentleman from California [Mr. BARBOUR] has said that the people in his district were kept out of the park by those notices. I made a statement in Yosemite last October that I understand the newspapers of Fresno, where Mr. BARBOUR lives, and of Stockton and Los Angeles were kind enough to print. San Francisco papers, however, would not give the people of that city this reliable information that the people want to know about. The public should be reassured that camping and fishing rights are not restricted by those notices, and the Park Service has made every effort to reassure them.

Mr. WELCH of California. I know the gentleman stated he did not want to be interrupted, but inasmuch as he has yielded to others may I ask him to yield to me?

Mr. CRAMTON. I yield to the gentleman from California.

Mr. WELCH of California. May I ask, in all fairness, whether the gentleman is attempting to create the impression here to-day that San Francisco is opposing fishing within the entire Yosemite Valley Park?

Mr. CRAMTON. Oh, no.

Mr. WELCH of California. Or within the restricted area?

Mr. CRAMTON. Within the Tuolumne watershed.

Mr. WELCH of California. A very restricted and small area.

Mr. CRAMTON. A very large area, at least half of the area of the park.

Mr. WELCH of California. No; it is not one-half or one-third of the area of the park.

Mr. CRAMTON. When you speak of the Tuolumne watershed you speak of this area [indicating on map], and when you look at the map you can see how much territory is included. But if it was only one square inch the city attorney of San Francisco exceeded his authority grossly when he posted that notice and sent out press notices, because he has no jurisdiction or authority over one square inch of the park area. However, the area represented was many hundreds of square miles.

Before the grant San Francisco sought to quiet any alarms as to exclusion of fishermen or campers from the park. The Freeman report (p. 33) says:

> Any statement that the use of the Hetch Hetchy for domestic water-supply storage would probably cause the exclusion of tourists and campers from the watershed tributary thereto is utterly without foundation, and those who suggest it set up a fanciful standard of their own for San Francisco, far more rigorous than is found needful by sanitary science or called for by experience in the study of water-borne disease, and far more rigorous than is in force for the drinking-water supplies of Boston, New York, Los Angeles, Seattle, Portland, Oreg., or Portland, Me., Glasgow, Manchester, Birmingham, or so far as is now known, any city in the world either with or without filtration works. The public wagon road to Half Moon Bay crosses the Crystal Springs Reservoir of the present San Francisco supply on the division dam.

And the official analysis of the bill said of section 9a:

> These sanitary regulations were prepared by experts of the United States Government and Mr. Allen Hazen and Professor Whipple, and are approved by the Board of Army Engineers, the Secretary of the Interior, the Director of the Geological Survey, and others. It is intended that the use of the watershed shall be free to campers and visitors, and that no onerous or prohibitive sanitary regulations shall ever be imposed. The sanitary experts assert that the storage of water in the Hetch Hetchy Reservoir will insure adequate purity, and the Government officials assert that the regulations herein are only those required by common decency and for the protection of campers themselves; and further, these regulations are practically identical with the rules now in force in the Yosemite National Park.

In the preliminary study leading up to this the Geological Survey pointed out the importance of settling this matter "at the outset," since otherwise—

> Camping will be suppressed and the national park will become merely the preserve of the city in everything except legal title.

And the question was settled at the outset in the Raker Act, and San Francisco has no control over this area, and only the most ordinary sanitary decencies are required, with no restriction on camping and fishing in this great region. The city of San Francisco has sought to treat this region as a "mere preserve of the city," but without any legal authority whatever, and it is to be hoped that such officious but unauthorized interference will not continue.

I will say to the gentleman from New York [Mr. REED] I am hoping that such a statement as I am making will challenge the attention of Congress to this situation and will help to end the things I am complaining of.

Mr. REED of New York. I have no doubt it will accomplish great good, but it seems to me the Government ought to take some action by posting notices in convenient places, so that the public coming to the park can see they have the right to go in there. I am wondering whether there has been any attempt on the part of the officials of San Francisco to punish in any way people who did go in there and camp.

Mr. CRAMTON. They have not gone as far as to send anybody to jail, because I think even Mr. O'Shaughnessy recognizes his limitations to that extent.

Mr. W. T. FITZGERALD. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. W. T. FITZGERALD. What provision has the Government made for the purification of the water in the park itself? Of course, the danger to San Francisco can easily be eliminated.

Mr. CRAMTON. I will say to the gentleman that I did not want to take the time to discuss that matter, but, as the gentleman is an eminent physician, he will be interested in the statement of the restrictions which the act itself makes, which I have above inserted. Of course, the Park Service has its regulations for the protection of the public in the use of water in the park, and it enforces those regulations, but I have not them all at hand.

At the same time the city of San Francisco administers its works in the Hetch Hetchy area with gross disregard of proper sanitation. They flooded Lake Eleanor Reservoir without removal of cow stables, privies, barns, manure piles, and so forth. The garbage from the present camp is thrown throughout the season into the spillway at Lake Eleanor, to remain there undisturbed and offensive until the spring freshets carry it down the stream. The sewage from the dry toilets and otherwise in the Hetch Hetcky camp to-day is drained direct into Hetch Hetchy Reservoir. Supreme disregard is given by the reservoir authorities for the rights of campers who would drink these waters. Proper penalties should be imposed on any such violations of park sanitation regulations hereafter.

UNLAWFUL EXPLOITATION OF POWER

The third matter I desire to bring to your attention is the exploitation of the power development for private profit in violation of the whole intent of the act, its express provisions, and all assurances given Congress at the time the act was passed.

In the travel of this water from the Hetch Hetchy Reservoir to the city of San Francisco tremendous power possibilities are involved. The whole project was being urged not as a power proposition but as a water-supply question. It was being urged as a grant desired to meet the public necessity, not to make possible private profit. Necessary development of the water power was recognized as a proper incident and an important economy for the water-supply project, but every assurance

was given by the advocates of the legislation and every precaution possible was taken by Congress to insure that such power development and such important economies should inure solely to the public benefit and not to enrich the coffers of any private company. The act says, section 6:

That the grantee is prohibited from ever selling or letting to any corporation or individual, except a municipality or a municipal water district or irrigation district, the right to sell or sublet the water or the electric energy sold or given to it or him by the said grantee: *Provided*, That the rights hereby granted shall not be sold, assigned, or transferred to any private person, corporation, or association, and in case of any attempt to so sell, assign, transfer, or convey, this grant shall revert to the Government of the United States.

That sections states as plainly as can be stated, first, that San Francisco is prohibited from ever selling either the water or the electric power to any private concern for resale, and, two, that upon any sale in violation of that provision the entire Hetch Hetchy grant reverts to the Government of the United States. There has been such sale to a private corporation, the Pacific Gas & Electric Co., and the Hetch Hetchy grant has been thereby voided. On demand of the Secretary of the Interior a suit must be brought by the Attorney General to carry out the provisions of the Hetch Hetchy act. If such suit should be brought, as it ought to be brought if the city of San Francisco continues its defiance of the terms of the act, there is no question in my mind but what the courts would find that the Hetch Hetchy grant had reverted to the United States. The city of San Francisco has for several years had a contract with the Pacific Gas & Electric Co. by which that private company buys the entire output of the Hetch Hetchy power and resells same to the industries and people of San Francisco, and so forth. That contract brings the city of San Francisco a net revenue of about $2,000,000 a year, as will be noted by the following item, which appeared in the San Francisco Examiner December 11, 1927:

HETCHY POWER NETS $190,224

San Francisco's revenue from Hetch Hetchy power since August, 1925, amounted to $5,258,509.18 yesterday with the receipt by the board of public works of a check for $190,224.20 from the Pacific Gas & Electric Co.

The latter sum represents the earnings of the power system for the month of November.

The finance and public utility committees of the board of supervisors are about to start an inquiry into the possibility of obtaining an increase in the rate paid by the company.

While San Francisco realizes $2,000,000 a year from this sale of Hetch Hetchy power they have sold their rich birthright for a mess of pottage. Their own industries and their own people must buy back this same power at figures which yield the Pacific Gas & Electric Co. handsome profits. The capitalization of this profitable contract of the Pacific Gas & Electric Co. with the city of San Francisco is illustrated in the following advertisement which appeared in newspapers in Minneapolis, Minn., in connection with offer of stock in same company:

WHERE DRINKING WATER SUPPLIES POWER

When San Francisco sought a new supply of drinking water from the Tuolumne River in Yosemite National Park, 150 miles away, engineers reversed the usual procedure.

Instead of spending huge sums to furnish pumping power, they trapped the water as it plunged down the mountain, ran it through a powerhouse, and used the electricity it generated to light homes and furnish power for industries.

The pure mountain water, dammed up in the Hetch Hetchy Reservoir, is released as needed into an 18-mile tunnel. It roars then through great pipes that stretch down the slope like a toboggan slide and does its work in the turbo-generators before it continues, impelled by the force of gravity, in a 137-mile aqueduct to the faucets of the Pacific coast metropolis.

Thus the power and light industry is turning to a double use one of nature's greatest resources.

It is another step in the progress of electricity. And its significance is in its economy. It is simply further evidence of stability and security that is daily attracting conservative investors to the securities of well-managed power and light companies.

We offer Pacific Gas & Electric Co. 1st and ref. mtf. 5 per cent. Due 1955, at 99¾; yield over 5 per cent.

NORTHLAND SECURITIES CORPORATION,
Ground Floor Security Building, Minneapolis, Minn.

This adroit advertisement, that would leave the intending investor in Minneapolis somewhat confused as to the relationship between San Francisco and the Pacific Gas & Electric Co., closes with the statement that the San Francisco water-supply program is—

further evidence of stability and security that is daily attracting conservative investors to the securities of well-managed power and light companies.

This unlawful contract with the private power company is as much a violation of the intent and spirit of the charter of San Francisco as it is of the Raker Act, and the people of San Francisco with this wealth of pure water and electric energy under their control have seen their city officials make a political football of the whole Hetch Hetchy problem, delay many years in availing of the water supply, and ignore any effective steps for public utilization of the water power in accordance with Federal law and city charter.

There is no real difference of opinion as to the meaning or effect of section 6 of the Raker Act, which I have quoted. Col. Allen G. Wright, as counsel for the San Francisco Chamber of Commerce, rendered an opinion on the legality of the Hetch Hetchy power disposal under date of December 18, 1923, in which he said:

It is my opinion * * * under the terms of that act of Congress known as the Raker Act, San Francisco has no authority to sell or lease its Hetch Hetchy electric energy to any person or private corporation for resale, or, in other words, to wholesale it.

September 9, 1923, Mayor Rolph and other prominent officials or citizens of San Francisco, on the eve of an election, expressed themselves as follows on this question:

I do not believe the wholesaling of power to a corporation would be legal as I read the Raker Act. * * * As long as I am in office no such transfer of the peoples' rights, property, and profits will take place with my consent. I would as soon consider wholesaling Hetch Hetchy water to the Spring Valley Co. for resale to the citizens at Spring Valley's rates as to follow a similar course in disposing of Hetch Hetchy electrical power. (Mayor Rolph, September 9, 1923.)

If the city should transfer to the Pacific Gas & Electric Co., or any other company, corporation, or individual, its power developed at Hetch Hetchy, not only would we lose the right to the power, but our water rights as well would be forfeited. (Matt I. Sullivan, former chief justice Supreme Court of California, September 9, 1923.)

The report of the citizens advisory committee to the supervisors, October 22, 1923, advised that the disposal of Hetch Hetchy to a private corporation for purposes of resale is forbidden by law and that under the Raker Act the city is mandated to distribute the power to its own people.

The SPEAKER pro tempore (Mr. ELLIOTT). The time of the gentleman from Michigan has expired.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to proceed for 15 additional minutes, with the expectation of getting through in that time or less.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CRAMTON. I quote from Hon. James D. Phelan, former mayor of San Francisco and former United States Senator:

Under no circumstances should we abdicate our sovereign right and farm out our taxes and our rates.

He said that on September 9, 1923; and in a speech before the Commonwealth Club of California a few weeks later he said, referring to the Raker Act:

An agency is clearly against the letter and spirit of the Federal act. The Raker Act is stringent in its provisions. It provides that, in accepting that grant, which we have accepted, we can not give or lease to any other person or individual or corporation for resale the commodity which we will enjoy. I remember very well that Congress had no doubt in the matter. The intent was to give us this in such form—and Congress had the right, remember, to make its own conditions, notwithstanding what may be the provisions of the charter of San Francisco—that no supergovernment, that no invisible government, that no trust or other power could ever take it away from us by our own consent, complaisance, or, indeed, corruption, without the consent of Congress. The existing corporations have offered $2,000,000 annually for the electric power released at our Moccasin Creek plant. We are told 214,060,000 kilowatts are available January 1, 1925, but under their schedules they would collect $8,800,000 for it. The proposition is illegal as well as unconscionable; we can not entertain it.

But the city administration, pledged not to entertain it, did entertain it, and the contract is now in effect. I quote from Hon. RICHARD J. WELCH, now a Member of Congress, but then, on September 9, 1923, when this statement was made, a member of the board of supervisors of San Francisco County:

That the city must and should distribute its own power directly to the citizens is absolutely clear. San Francisco has asserted herself in favor of municipal ownership, and I do not believe that our charter will permit us to sell power to a corporation even temporarily. It will be practically impossible to complete any steps toward buying or building ourselves a distributing system by the time that the Hetch Hetchy power is available for use, but the dangers of disposing of the power at wholesale are just as serious.

Mr. WELCH of California. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. WELCH of California. I want to say that is absolutely correct, and I stand for the same principle and the same policy to-day.

Mr. CRAMTON. I am very glad to know that.

Mr. WELCH of California. And those who betrayed San Francisco's trust and were responsible for selling the power to the Pacific Gas & Electric Co., which is a part of the Hydroelectric Power Trust of the United States, were driven from office, and I took the platform and helped to drive them from public office. [Applause.] Since that time, three years ago, San Francisco has had the Pacific Gas & Electric Co. and the Great Western Power Co. before the Railroad Commission of the State of California, condemning their properties for the purpose of carrying out the provisions of the Raker Act.

Mr. CRAMTON. I am glad to know the gentleman's position, but whoever went into office or whoever was driven out of office there has been no proposition submitted to the people of San Francisco to raise the money or provide the wherewithal for either acquiring or building a distributing system, and day after day the illegal contract continues. The Secretary of the Interior sought an opinion July 20, 1925, from the Attorney General with reference to the effect of section 6 upon the Pacific Gas & Electric Co. contract. The Attorney General with great agility "passed the buck" back to the Secretary of the Interior in an opinion of August 5, 1925, a copy of which I attach as an appendix to my remarks. (See Exhibit F.)

A study of the debates of Congress leaves no doubt that the Pacific Gas & Electric Co. contract is a gross violation of the assurances that were given Congress and the purpose that Congress had in approving the Hetch Hetchy grant.

The late Representative William Kent was then a Member of the California delegation and his support of this measure had much to do with its passage.

The gentleman from Wisconsin [Mr. COOPER], the gentleman from Idaho [Mr. FRENCH], and all the older Members will remember Mr. Kent as an outstanding progressive in this House, and there is no doubt that his support of this measure helped greatly in securing its passage.

He said (vol. 50, p. 3991, CONGRESSIONAL RECORD, 1913):

Mr. Chairman, I should like to suggest to the gentleman from Indiana, Mr. Gray, that this bill is strictly drawn in the public interest; that there is no possibility of selfish gain; and that no corporation or individual can obtain any benefit whatsoever from this bill. It is for the benefit of the people of California.

And, later, I had written here that he would not have promoted its passage if he thought otherwise, and then I found this speech which he made in that same symposium before the Commonwealth Club of California in 1923, where he said this:

Section 6 of the Raker Act was not put in by accident. It was a deliberate attempt to draft a contract whereby any future short-sighted or sordid government of San Francisco could not divest the people of the bay region from the beneficence of the congressional grant.

At first it seemed that the good faith of the city in carrying out its end of the contract should be taken for granted, but later on a lawyer on the committee, named Taylor, of Arkansas, objected to the lack of a penalty clause in section 6, and so on the floor of the House introduced the reversion clause which you will find in the act as passed, though not in the quoted draft published and circulated by those who are apparently acting for private interests against the people of San Francisco and the bay cities.

It may be that the language is clumsy, but the meaning is clear, as is the intent, and there is no possible excuse for this cheap pettifogging and subterfuge as to its meaning. It means definitely what we contend for it, that the use of Hetch Hetchy Valley and the privileges granted across the public domain shall revert to the Government in the event of private interests being permited to resell property right in water power, which Congress by contract with responsible city officials directed should be applied to the welfare of the citizens. You will find in the hearings a statement of the meaning of section 6 by City Attorney Long that it meant simply and only direct municipal ownership.

He said further:

I have been almost maddened with the thought of what we went through during that hot summer in fighting for the public of this town, now to think that there comes a time when there seems to be a proposition to throw it down and sell it out.

Then he goes on to refer to the support of Gifford Pinchot and himself, and says:

Reverting to the history of the passage of the bill, you can recall the tremendous fight made by the power companies with the hoodwinked help of the nature lovers. The combination was very strong. If it had not been for Gifford Pinchot, the leading apostle of conservation and one of the most efficient of those who respect and revere nature—if it had not been for my standing as a conservationist, the bill never could have passed, for we secured by our indorsement many votes that were stampeded by the reckless representations made of park destruction.

Mr. TAYLOR of Colorado. Will the gentleman yield? Who was that?

Mr. CRAMTON. Hon. William Kent, former Member of this House, and who has so recently died. Then he speaks of the signing of the bill by the President:

After the bill had passed those of you familiar with the transaction remember the message of President Wilson, who in signing the bill said that he relied upon the judgment of men in whom he had confidence as against the general argument for the parks. When I went to the White House to ask the President to sign the bill I met Mr. Robert Underwood Johnson coming away.

In the prepared analysis of the bill to which I have referred, which was inserted in the RECORD by Judge Raker, it is said:

That section 6, acquiesced in by the grantee, was designed to prevent any monopoly or corporation from hereafter obtaining control of the water supply of San Francisco.

And the provision in question referred to electric energy as being on the same basis with water.

Mr. Thomson, of Illinois, in his speech in behalf of the bill urged that—

Under the provisions of section 6 the grantee can not assign its right acquired under this bill to any private corporation and can not sell water or electric energy to any private corporation or individual for the purposes of resale.

In the course of the debate Mr. Mann asked Mr. Raker:

This bill provides that property rights shall not be sold; but suppose they are sold, what will happen?

Mr. Raker replied:

My conviction is that under the provision of the law they are forfeited.

Further in the course of the debate, page 4093, Mr. Helm, of Kentucky, asked a question of Mr. Ferris, of Oklahoma, chairman of the committee in charge of the bill, question and answer being as follows:

On page 4093 (vol. 50, CONGRESSIONAL RECORD) the following occurred:

Mr. HELM. What they can sell to the citizens of San Francisco they can sell to a corporation organized by a group of San Francisco men, could they not?

Mr. FERRIS. Oh, no; because there is an express provision to the effect that they can not resell the power in any way. They can sell for use only with a positive restriction against sale for any resale purposes of any sort.

The Secretary of the Interior, who has for the past two years been giving highly commendable attention to this subject, should call now upon the Attorney General to bring a suit that would end this diversion of power to private profit.

The present relations between the park administration and our privileged tenant in the park, San Francisco, are intolerable and can not be permitted to continue.

San Francisco came to Congress begging for a water supply and constructed instead two power plants. Hetch Hetchy is not yet used as a water supply. Power is being sold and the proceeds of $2,000,000 alleviate the San Francisco tax rate. The existing contract for sale of power is a direct violation of the terms of the act, and the grant has in reality reverted to the Government of the United States under section 6 of the act. It only remains for a competent court to so declare. If San Francisco can not properly cooperate with its generous landlord, the relationship had better cease, and the Federal Government resume exclusive use of the park area.

I will only close as I began by saying that I have brought this to your attention in the hope, first, that publicity may help to cure the evils that exist, and also as a warning to this House that whenever we are granting away the public domain Congress

owes it to the people to see that the safeguards put around the grant are explicit, mandatory, and adequate to protect the public. [Applause.]

APPENDIX

EXHIBIT A

WASHINGTON, D. C., *August 1, 1913.*

DEAR SIR: The Public Lands Committee of the House, after two months' painstaking investigation, unanimously reports in favor of the use of the Hetch Hetchy Valley in the Yosemite National Park as a reservoir site for San Francisco.

The use of this valley is also approved by the Secretary of the Interior, the Secretary of Agriculture, the Secretary of War, the Chief of the Reclamation Service, the Chief of the Geological Survey, the Chief Forester, and by Gifford Pinchot, former Chief Forester.

The irrigationists, who have prior rights on the Tuolumne River, also desire this bill passed, as they are assured water, which they would not otherwise obtain.

The Hetch Hetchy Valley is an inaccessible canyon, 30 miles from the Yosemite Valley proper. The San Francisco project proposes to make this an accessible mountain lake, with roads and trails leading to the high Sierras.

The only opposition to this project comes from a small number of well-intentioned persons who wish to have the valley remain in the state of nature. You no doubt will receive protests from these people. Members of the California delegation in the House earnestly request you to not prejudge this proposition in favor of the nature advocates, and earnestly request you to read the hearings before the Public Lands Committee and the committee report which will accompany the bill. We feel that with the full facts before you San Francisco's request will be granted. The city needs this water supply and the completed project would be of inestimable benefit to one-fourth of the population of the State of California.

Sincerely yours,

JOHN E. RAKER,
DENVER S. CHURCH,
JULIUS KAHN,
JOHN I. NOLAN,
WILLIAM KENT,
CHAS. W. BELL,
J. R. KNOWLAND,
WILLIAM KETTNER,
WM. D. STEPHENS,
C. F. CURRY,
E. A. HAYES,

Representatives from California.

EXHIBIT B

THE SECRETARY OF THE INTERIOR,
Washington, July 7, 1927.

THE CITY AND COUNTY OF SAN FRANCISCO,
San Francisco, Calif.

GENTLEMEN: The act of December 19, 1913 (38 Stat. 242), under which the city and county of San Francisco was granted valuable rights of way and reservoir sites within the limits of the Yosemite National Park, in California, included, among others, the following obligations of the grantee:

Section 7 of the said act provided in part as follows:

"That for and in consideration of the grant by the United States as provided for in this act the said grantee shall assign, free of cost to the United States, all roads and trails built under the provisions hereof; * * *."

Section 9 of the act stated:

"That this grant is made to the said grantee subject to the observance on the part of the grantee of all the conditions hereinbefore and hereinafter enumerated."

By paragraph (p) of section 9 of said act it was provided:

"That this grant is upon the further condition that the grantee shall construct on the north side of the Hetch Hetchy Reservoir site a scenic road or trail, as the Secretary of the Interior may determine, above and along the proposed lake to such point as may be designated by the said Secretary, and also leading from said scenic road or trail a trail to the Tiltill Valley and to Lake Vernon, and a road or trail to Lake Eleanor and Cherry Valley via McGill Meadow; and likewise the said grantee shall build a wagon road from Hamilton or Smiths Station along the most feasible route adjacent to its proposed aqueduct from Groveland to Portulaca or Hog Ranch and into the Hetch Hetchy Dam site, and a road along the southerly slope of Smiths Peak from Hog Ranch, past Harden Lake, to a junction with the old Tioga Road, in section 4, township 1 south, range 21 east, Mount Diablo base and meridian, and such roads and trails made necessary by this grant, and as may be prescribed by the Secretary of the Interior. Said grantee shall have the right to build and maintain such other necessary roads or trails through the public lands for the construction and operation of its works, subject, however, to the approval of the Secretary of Agriculture, in the Stanislaus National Forest, and the Secretary of the Interior, in the Yosemite National Park. The said grantee shall further lay and maintain a water pipe or otherwise provide a good and sufficient supply of water for camp purposes at the meadow, one-third of a mile, more or less, southeasterly from the Hetch Hetchy Dam site.

"That all trail and road building and maintenance by the said grantee in the Yosemite National Park and the Stanislaus National Forest shall be done subject to the direction and approval of the Secretary of the Interior or the Secretary of Agriculture, according to their respective jurisdictions."

Paragraph (q) of said section 9 provides in part:

"That the said grantee * * * shall reimburse the United States Government for the actual cost of maintenance of the above roads and trails in a condition of repair as good as when constructed."

By paragraph (t) of said section 9 it is provided:

"That the grantee herein shall convey to the United States, by proper conveyance, a good and sufficient title free from all liens and encumbrances of any nature whatever, to any and all tracts of land which are now owned by said grantee within the Yosemite National Park or that part of the national forest adjacent thereto not actually required for use under the provisions of this act, said conveyance to be approved by and filed with the Secretary of the Interior within six months after the said grantee ceases to use such lands for the purpose of construction or repair under the provisions of this act."

Paragraph (u) of section 9 of the act of December 19, 1913, contains the following:

"* * * *Provided, however,* That the grantee shall at all times comply with and observe on its part all the conditions specified in this act, and in the event that the same are not reasonably complied with and carried out by the grantee, upon written request of the Secretary of the Interior, it is made the duty of the Attorney General in the name of the United States to commence all necessary suits or proceedings in the proper court having jurisdiction thereof for the purpose of enforcing and carrying out the provisions of this act."

On September 14, 1925, the Director of the National Park Service appeared before the board of supervisors of the city and county of San Francisco and outlined the requirements of the Government as to roads, and again, at a conference held October 2, 1926, with the city engineer and other officials of the city and county, the director again stated the requirements of the United States as to roads in the national park.

The city and county of San Francisco have not complied with the requirements of the grant hereinbefore set forth, and in accordance with the provisions of the act of December 19, 1913, I hereby make a formal request in writing that the following action be taken at once by the said city and county:

(a) Widen the present road from Hog Ranch to Hetch Hetchy to a full travelable width of 18 feet and surface said road.

(b) Build a road from Hetch Hetchy Reservoir to Lake Eleanor, via McGill Meadow, so as to render the route available for motor travel.

(c) Construct a road of not less than 18 feet in width and with grades of not to exceed 8 per cent from Hog Ranch past Harden Lake to the Tioga Road, said road to be suitable for motor travel.

(d) Construct a wide and serviceable trail along the north side of Hetch Hetchy Reservoir for the full length thereof.

(e) Construct a trail from the trail along the north side of Hetch Hetchy Reservoir to Tiltill Valley and to Lake Vernon.

(f) Before proceeding to construction of the works herein required, the city and county must secure approval, by the Secretary, of the specifications for said works, to be followed by the construction contractor or party, as required by section 9 (p) of the act, and likewise must secure the formal approval and acceptance of the roads and trails constructed.

(g) The grantee shall make arrangements for the reimbursement of the United States for the actual cost of maintenance of the above roads and trails in a condition of repair as good as when constructed, in accordance with the provisions of section 9 (q) of the act of December 19, 1913.

The requirements expressed in this notice are not to be construed as in anywise releasing the city and county of San Francisco from constructing, at such future time as may be prescribed by the Secretary, a road or trail from Lake Eleanor into Cherry Valley, nor is this notice and the matters required therein to be construed as an abandonment of the right to require additional trails or roads, pursuant to the provisions of paragraph (p) of section 9, requiring the grantee to construct "such roads and trails made necessary by this grant, and as may be prescribed by the Secretary of the Interior."

It likewise appears that as to the lands listed below the grantee has for more than six months ceased "to use such lands for the purpose of construction or repair under the provisions of this act" (the Raker Act), and hence that such lands should be conveyed to the United States, as provided by section 9 (t) of said act. The lands which appear to occupy this status are:

(a) The east half of northwest quarter, the southwest quarter of the northwest quarter, and the northwest quarter of the southwest quarter of section 32, township 1 north, range 20 east.

(b) The southeast quarter of section 9; the south half of the northeast quarter, the south half of the northwest quarter, the north half of the southwest quarter, and the northwest quarter of the southeast quarter of section 10; the southwest quarter of the northwest quarter and north half of the south half of section 11; the northwest quarter of the northeast quarter and the northeast quarter of the northwest quarter of section 16, all in township 1 north, range 20 east.

(c) The south half of the northeast quarter, the north half of the southeast quarter, the southeast quarter of the southeast quarter of section 34; the southwest quarter of the northwest quarter, the west half of the southwest quarter, and the southeast quarter of the southeast quarter of section 35; and all of section 36, township 2 north, range 19 east.

(d) The southeast quarter of the northwest quarter, the northwest quarter of the southeast quarter, and the east half of the southwest quarter of section 12, township 1 north, range 19 east.

(e) The southwest quarter of the northwest quarter and the northwest quarter of southwest quarter of section 19, township 2 north, range 21 east; the southeast quarter of the northeast quarter of section 24, township 2 north, range 20 east.

(f) The southwest quarter of the northeast quarter, the south half of the northwest quarter of section 5, the southeast quarter of the northeast quarter of section 6, all in township 1 north, range 21 east.

Under authority of section 9 (t) of the act of December 19, 1913, a formal request is hereby made that "a good and sufficient title, free from all liens and incumbrances of any nature whatever," as to each of the described tracts and any other lands occupying the same status be conveyed to the United States.

The purpose of this letter is to require of the city and county of San Francisco performance by them of all matters required of them by the act of December 19, 1913; and the enumeration herein of certain of those matters is not intended to and must not be regarded as waiving performance of any other required acts or as excepting such other required acts from the operation of this notice.

Very truly yours,

HUBERT WORK, *Secretary.*

EXHIBIT C

CITY ATTORNEY,
San Francisco, October 13, 1927.

Hon. HUBERT WORK,
Secretary of the Interior, Washington, D. C.

DEAR SIR: Under date of July 7, 1927, you issued a formal notice to the city and county of San Francisco the purpose of which, as stated in said notice, was to require of the city and county of San Francisco performance of all the matters required of the said city and county by the act of December 19, 1913, commonly known as the Raker Act.

In the notice quotation is made from several sections of the act relative to the obligations of the city imposed thereby, following which the statement is made that the city and county of San Francisco has not complied with the requirements of the grant as set forth in the act and referred to in the notice, and request in writing is then made of the city and county that the following specific action be taken at once:

"(a) Widen the present road from Hog Ranch to Hetch Hetchy to a full travelable width of 18 feet and surface said road.

"(b) Build a road from Hetch Hetchy Reservoir to Lake Eleanor via McGill Meadows so as to render the route available for motor travel.

"(c) Construct a road of not less than 18 feet in width and with grades of not to exceed 8 per cent from Hog Ranch past Harden Lake to the Tioga Road, said road to be suitable for motor travel.

"(d) Construct a wide and serviceable trail along the north side of Hetch Hetchy Reservoir for the full length thereof.

"(e) Construct a trail from the trail along the north side of Hetch Hetchy Reservoir to Tiltill Valley and to Lake Vernon.

"(f) Before proceeding to construction of the works herein required, the city and county must secure approval by the Secretary of the specifications for said works, to be followed by the construction contractor or party as required by section 9 (p) of the act, and likewise must secure the formal approval and acceptance of the roads and trails constructed.

"(g) The grantee shall make arrangements for the reimbursement of the United States for the actual cost of maintenance of the above roads and trails in a condition of repair as good as when constructed in accordance with the provisions of section 9 (q) of the act of December 19, 1913."

Provision is made in the notice that the expression of the above specific requirements is not to be construed to release the city and county of San Francisco from constructing at such future time as may be prescribed by the Secretary a road or trail from Lake Eleanor into Cherry Valley, nor is it to be construed as an abandonment of the right to require additional trails and roads pursuant to the provisions of paragraph (p) of section 9, requiring the grantee to construct "such roads and trails made necessary by this grant and as may be prescribed by the Secretary of the Interior."

You also direct attention to several parcels of land which it is stated the city has for more than six months ceased to use for the purpose of construction or repair under the provisions of the Raker Act, and request is made that these lands as well as any other lands occupying a similar status be conveyed to the United States free from all liens and encumbrances.

Following the receipt of this notice, Mr. Stephen T. Mather, Director of the National Parks, appeared before the board of supervisors in San Francisco, and, while admitting that he could not commit the Secretary, outlined his views as to what the Department of the Interior considered were the obligations of the city under the Raker Act and indicated the order in which he—and it is presumed the Department of the Interior—desired the city to proceed to carry out its obligations, and indicated the estimate of cost of doing this work to meet the requirements or standards of construction which the department would adhere to for the roads to be built. Following is the list of obligations in the desired order of accomplishment and the estimated costs as set forth by Mr. Mather:

Project No. 1: Transfer city-owned lands to United States (acres)	2,632.94
Project No. 2: Construct trail north side of Hetch Hetchy Reservoir to Tiltill Valley and Lake Vernon, 21 miles (estimated cost)	$43,500
Project No. 3: Construct Harden Lake Road, 12 miles (estimated cost)	480,000
Project No. 4: Construct Lake Eleanor Road, 14 miles (estimated cost)	800,000
Project No. 5: Reconstruction and surfacing Hetch Hetchy Road, 9 miles (estimated cost)	270,000
Surveys	35,000
Total estimated cost	1,628,500

At the meeting at which Mr. Mather appeared, exception was taken to Mr. Mather's interpretation of the terms of the Raker Act with respect to the city's obligation, and a resolution was introduced and adopted referring the entire subject matter to the public utilities committee of the board of supervisors with the thought that an understanding might be reached between the representatives of the city and the representatives of the Yosemite National Park or the Department of the Interior relative to the city's obligations.

Such a meeting was held and was attended by the superintendent of the Yosemite National Park, Mr. Lewis, and one of his assistants. At this meeting Mr. Lewis stated that he had no authority to speak for the Secretary of the Interior in the matter, and so after a brief discussion it was decided to submit to the Interior Department a statement of the city's position in the matter. Briefly, this may be summed up as follows:

The city of San Francisco has not at any time sought and does not now seek to evade any of its just obligations under the provisions of the Raker Act. Until the receipt of this notice of date July 7, 1927, no written or formal request had ever been made by the Secretary of the Interior for the construction of any of the roads outlined or for the transfer of any of the lands listed. Exception is taken to the implied thought contained in the notice, that the city and county of San Francisco has not carried out any of its obligations as imposed by the Raker Act. This is contrary to the facts, as will appear in the discussion relative to the specific requests outlined in the notice. The several specific requests will be taken up in their order and the city's contentions in regard to each set forth:

"(a) Widen the present road from Hog Ranch to Hetch Hetchy to a full travelable width of 18 feet and surface said road."

The city has constructed a road from Hog Ranch to Hetch Hetchy, with roadbed 22 feet in width, on a 4 per cent grade, which was originally used as a railroad grade, from which, through an understanding with your office, the rails were temporarily removed and the surface prepared so that the grade might be used for vehicular travel until such time as it might be again necessary to relay the rails, in accordance with letter from the Secretary of the Interior and resolution of the board of supervisors. More than $200,000 was expended in the construction of this roadbed, which must be credited to work which the city has done in carrying out its obligations as to the construction of this particular road. In Mr. Mather's list this is listed as project No. 5, in the order of desirability, and his estimate of the cost of doing the work which he believes is necessary is $270,000. This road is now in satisfactory use, accommodating approximately 35 automobiles per day during the season. Inasmuch as the road is constructed on excellent line and grade, it would appear that he contemplates that this expenditure, which is equivalent to 31½ cents per square foot, would be made almost solely for paving, corresponding possibly to an 8-inch concrete surface. It is the contention of the city that the proper interpretation of the Raker Act, adopted in 1913, which calls for a wagon road from Hamilton, or Smiths Station, along the most feasible route adjacent to its proposed aqueduct from Groveland to Portulaca, or Hog Ranch, and to the Hetch Hetchy Dam site, does not require the construction of a road along these 9 miles of a higher standard than the main-traveled roads with which is connects and forms a part, as in existence or immediately contemplated at the time of the adoption of the Raker Act.

"(b) Build a road from Hetch Hetchy Reservoir to Lake Eleanor via McGill Meadows, so as to render the route available for motor travel."

Relative to this request, the provision of the Raker Act is that the city construct a road or trail to Lake Eleanor and Cherry Valley via McGill Meadows.

Under date of October 13, 1916, the city submitted to the Department of the Interior a map outlining the proposed road from Hetch Hetchy to Lake Eleanor, showing the alignment thereof, together with survey notes showing the the proposed grades. These plans and the location of the road were approved by the Secretary of the Interior under date

of December 30, 1916. This road was constructed and utilized by the city for handling approximately 6,000 tons of freight to Lake Eleanor by motor trucks. The grades on it are superior to the Big Oak Flat Road, one of the main roads leading into Yosemite Valley and over which one would travel in going from Yosemite Valley to Lake Eleanor. This road has been maintained by the city at its expense since its construction. It is the city's contention that this road has been built with the approval of the Secreary of the Interior as one of the obligations of the Raker Act, and that it was not the intent of the Raker Act to impose upon the city the continual improvement of the standards of roads constructed in conformity with the act at the time of its adoption.

"(c) Construct a road of not less than 18 feet in width, and with grades of not to exceed 8 per cent, from Hog Ranch past Harden Lake to the Tioga Road, said road to be suitable for motor travel."

The provision of the Raker Act as to this particular road is "a road along the southerly slope of Smiths Peak from Hog Ranch past Harden Lake to a junction with the old Tioga Road, in section 4, township 1 south, range 21 east, Mount Diablo base and meridian."

The city has already advanced the sum of $6,000 to the national park authorities to be expended on surveys to be made by the United States Bureau of Good Roads for the location and construction of this road. These surveys are being made along lines of even a higher standard than that which has been set forth in the notice. The city recognizes its full obligation to construct a road between these points along such location as may be approved, but contends that the intent of the Raker Act does not contemplate a road of a higher type of construction, particularly as to grade, width of roadbed, and character of surface than that existent on the two main roads which it connects, namely, the Big Oak Flat Road, the wagon road constructed by the city from Hamilton to Hog Ranch, and the Tioga Road. The city recognizes that the Government now is contemplating the construction of a new main highway into the Yosemite Valley, of which this road would form a link. It is the city's contention that if this is the intent of the Government, the reasonable obligation of the city under the terms of the Raker Act would be to contribute toward the cost of such a road a sum of money equivalent to the cost of constructing a road along the route indicated, of grades, width, and type of surface as existed on connecting roads at the time of the adoption of the Raker Act. I am advised that such a road could be built by the city at a cost not to exceed $250,000, and I would recommend the appropriation by the city of such sum toward the construction of any higher standard road on this location in lieu of this particular obligation.

"(d) Construct a wide and serviceable trail along the north side of Hetch Hetchy Reservoir for the full length thereof."

The city does not question in any way this obligation, and in accordance with your request will proceed to make the necessary surveys and submit them to your office with the necessary specifications for the approval of the Secretary. These surveys will be made as soon as the weather conditions will warrant.

"(e) Construct a trail from the trail along the north side of Hetch Hetchy Reservoir to Tiltill Valley and to Lake Vernon."

No exception is taken to this requirement. Surveys for this will be made at the same time as the surveys contemplated under (d) above mentioned.

"(f) Before proceeding to construction of the works herein required, the city and county must secure approval by the Secretary of the specifications for said works, to be followed by the construction contractor or party as required by section 9 (p) of the act, and likewise must secure the formal approval and acceptance of the roads and trails constructed."

It is the contention of the city that all roads and trails heretofore constructed have been constructed subject to the direction and approval of the Secretary of the Interior or the Secretary of Agriculture, according to their respective jurisdictions, and that the general plans were approved by the Secretary of the Interior, and all instructions or directions issued to the city at the time of the construction of the road were observed in the manner of doing the work and carrying out the same. In the future the city will be glad to comply with your request that formal approval and acceptance be secured.

"(g) The grantee shall make arrangements for the reimbursement of the Unted States for the actual cost of maintenance of the above roads and trails in a condition of repair as good as when constructed, in accordance with the provisions of section 9 (q) of the act of December 19, 1913."

The city of San Francisco has at its own cost and expense maintained all roads and trails built by it under the provisions of the Raker Act, except that during the past season Mr. Mather and the superintendent of the Yosemite National Park requested that they be allowed to maintain the road from Mather to Hetch Hetchy as a part of their road-maintenance work. The city has never at any time failed to meet any obligation as to reimbursement of the Government for the maintenance of any of these roads.

With regard to the request for the conveyance of lands as provided by section 9 (t) of the act the following lands are listed in the notice as being those whch should be conveyed to the United States under the provisions of section 9 (t) of the act.

"(a) The east quarter of northwest quarter, the southwest quarter of the northwest quarter, and the northwest quarter of the southwest quarter of section 32, township 1 north, range 20 east.

"(b) The southeast quarter of section 9; the south half of the northeast quarter, the south half of the northwest quarter, the north half of the southwest quarter, and the northwest quarter of the southeast quarter of section 10; the southwest quarter of the northwest quarter and east half of the south half of section 11; the northwest quarter of the northeast quarter and the northeast quarter of the northwest quarter of section 16; all in township 1 north, range 20 east.

"(c) The south half of the northeast quarter, the north half of the southeast quarter, the southeast quarter of the southeast quarter of section 34; the southwest quarter of the northwest quarter, the west half of the southwest quarter, and the southeast quarter of the southeast quarter of section 35; and all of section 36, township 2 north, range 19 east.

"(d) The southeast quarter of the northwest quarter, the northwest quarter of the southeast quarter, and the east half of the southwest quarter of section 12, township 1 north, range 19 east.

"(e) The southwest quarter of the northwest quarter and the northwest quarter of southwest quarter of section 19, township 2 north, range 21 east; the southeast quarter of the northeast quarter of section 24, township 2 north, range 20 east.

"(f) The southwest quarter of the northeast quarter, the south half of the northwest quarter of section 5; the southeast quarter of the northeast quarter of section 6; all in township 1 north, range 21 east."

The lands described under item (a) are generally referred to as the Canyon ranch tract, comprising 160 acres. Proper conveyance of this land to the United States will be made immediately. The lands covered in item (b) are those commonly referred to as the Hetch Hetchy Reservoir lands, and those in item (c), Lake Eleanor Reservoir lands, involving 720 acres and 920.35 acres, respectively. The provisions of the Raker Act, section 9 (t) relative to the conveyance of lands reads:

"Shall convey to the United States * * * to any and all tracts of land which are now owned by said grantee within the Yosemite National Park * * * not actually required for use under the provisions of the act."

It is the contention of the city that these lands which were acquired by the city for reservoir purposes are actually in use or are required for use under the provisions of this act. A large portion of these lands are at the present time submerged, and a further part lies between the present flow line of the reservoir and the flow line of the ultimate development of the same, and a comparatively small remaining portion lies along the margin of the reservoir, and it is our contention that these lands are required for use by the city for sanitary control of the reservoir. In view of this, it is the contention of the city that these Hetch Hetchy Reservoir lands and the Lake Eleanor Reservoir lands are not to be considered as lands which the city is required to convey to the Government under the terms of the act.

Item (d) covers what is known as the McGill Meadow tract, involving 160 acres. Item (e) covers the Lake Vernon land, involving 121.49 acres. These two tracts were acquired by the city in a single transaction by deed dated January 8, 1918, four years after the adoption of the Raker Act, and as they were not in our possession at the time of the passage of the Raker Act, it is our contention that we are in no way required to convey them to the United States. Both of these tracts are, moreover, required for future use by the city in connection with the project.

Item (f), Tiltill Valley lands, 160 acres. The west 40 acres of this land are required for use by the city in connection with its future operations. The remaining 120 acres will be conveyed to the United States Government under the provisions of the act immediately.

In conclusion, I wish to assure you that it is the intention and desire of the city to cooperate in every reasonable way with the Secretary of the Interior and the national park authorities in the carrying out of what may be determined as the just terms of the Raker Act. I would impress upon you, however, that the Hetch Hetchy project is far from complete. The original $45,000,000 voted for its construction prior to the passage of the Raker Act have been expended, $10,000,000 more have been voted, and $24,000,000 must be voted within the next year, after which possibly four years will elapse before water from the Hetch Hetchy can be brought into San Francisco, and that during this long period of construction the city has been and still is under a heavy burden of bond interest, and it is our desire that a definite program be mapped out so that the uncompleted obligations may be carried out in such manner and at such time as will avoid at this time large capital expenditures for any roads which are not at present actually required to link up with the Federal or State road program.

May I ask that you give consideration to the contention of the city in the several matters and modify your requests with regard to the specific matters to conform to what may be considered as a reasonable interpretation of the act?

Respectfully,

JNO. J. O'TOOLE, *City Attorney.*

EXHIBIT D

Hon. John E. Raker on roads and trails, volume 50, CONGRESSIONAL RECORD, page 3902:

"I want, Mr. Chairman, to call the attention of the committee further to this fact, that this bill provides for roads to be built by the city and county of San Francisco from the public highway into the valley, the Hetch Hetchy Valley. They say there is a trail around the Hetch Hetchy Valley. The city and county of San Francisco, under this grant, are to build the road up to the dam, around the lake, and from there north to the Tioga Road, which is a public road leading across the mountains to the State of Nevada. It will also build a trail up to the Tiltill Valley, where the city and county of San Francisco now own 160 acres of land, an ideal place for hotels and camp sites. They will build a road from there through the valley to Smiths Peak, and a trail from the main road around the Hetch Hetchy on to Lake Eleanor, and then to Cherry Creek. The city and county of San Francisco will keep up these roads from now until the crack of doom. To-day about 25 to 75 people per year visit the Hetch Hetchy Valley. You must go in on the trail and on burro back to get there. Instead of that, you will have one of the scenic roads of the world built to this valley; and instead of having barren cliffs on either side you will have boulevards around this lake, so that the people may see the wonders of the Hetch Hetchy Valley and also the remainder of this territory that is in the watershed of this valley. They will make it accessible, and make accessible the Tuolumne Meadows, which are about 40 miles beyond, where there are about 1,500 acres which will be accessible to campers. That part of the floor of the valley which is now owned by the city and county of San Francisco, about 780 acres in extent, could now be fenced, and the Government could be prevented from using any of that part of the floor of the valley. But instead of that they say they will build roads where people can go and see this beautiful lake, as well as the rest of the park.

"They will turn over the 160 acres of land which they now own at the Tiltill Valley for camping purposes. They will make accessible Lake Eleanor, which is to-day inaccessible except to a few who go there by trail. They will turn over the Cherry Creek Valley in the same way all that they do not use for reservoir purposes, and there is a good deal of it. So that instead of destroying the scenery and preventing the people going in there, this valley will be made more beautiful with a road in, through, and about it, with the camping ground made accessible and turned over to the use of the public instead of being, as now, controlled by a municipal corporation. Those who have seen the lakes in the mountains can not but believe that Lake Hetch Hetchy will be more beautiful than anything there to-day. Lake Louise, in Canada, which is but a pond of water with a snow-capped mountain in front of it, a rugged mountain on one side, and a rugged mountain covered with trees on the other, is one of the most famous bits of scenery in the world. The very colors of the rainbow are reflected in that lake, and people go from all over the world to behold its beauty. It will be the same with this lake in the Hetch Hetchy Valley, which is to-day inaccessible. As for the rocks, there are grander and larger rocks to be seen in the Yosemite Valley. You can see them almost anywhere; but this bill proposes to make accessible that which to-day is inaccessible. Professor Grant said in relation to Lake Louise, 'I would like to go to heaven. I do not want to go to hell; but if I can not go to heaven, send me to Lake Louise.' And it will be the same with Lake Hetch Hetchy when it is completed."

Hon. Scott Ferris, on roads and trails:

"Now, much has been said in opposition both in the press and by correspondents concerning this proposition. Many of you have received circular letters from people who actually believe and in good faith think that this will destroy the park. Now, I desire with such emphasis as I have to deny that it will destroy the park in any sense. On the contrary, I believe it will improve the park. As the matter now stands only rich and well-to-do people can visit the park at all. It is an expensive proposition to journey there. You have to go on burros, pack trains, etc., and there is no railroad or street-car line that would enable you to go in any other way except by pack train. San Francisco concurs in this bill, and this bill exacts of the people of San Francisco as a condition precedent to build street-car lines and roads and trails and railroads, so that the poor can visit the park. The improvement will really make a park in reality of what is now the roughest country God ever made.

"In addition to that, they must construct roads surrounding this lake, so that the people can go in there and view the scenery in the higher Sierra of California. I said before and I repeat, that San Francisco will have to pipe this water 142 miles."

EXHIBIT E

DEPARTMENT OF JUSTICE,
Washington, May 16, 1928.

SIR: I have the honor to acknowledge receipt of your letter of December 19, 1927, in which you request my opinion on certain questions arising under the act of December 19, 1913 (ch. 4, 38 Stat. 242), commonly referred to as the Raker Act.

The Raker Act granted to the city and county of San Francisco, a municipal corporation in the State of California (hereinafter referred to as the city), certain public lands and lands in the Yosemite National Park and the Stanislaus National Forest, and rights of way and other rights, in connection with the city's project for conveying water for domestic purposes and uses to the city and other municipalities and water districts, and constructing and operating electric plants. The grant was made on certain terms and conditions set forth in the Raker Act. Paragraph (s) of section 9 of the act provided:

"That the grantee shall file with the Secretary of the Interior, within six months after the approval of this act, its acceptance of the terms and conditions of this grant."

It is stated in the opinion of the solicitor of your department, a copy of which was sent me with your letter, that the city formally accepted the provisions of the Raker Act, and it follows that the act should be regarded as setting forth a contract which is binding upon the city. Indeed the city attorney, in his letter of October 13, 1927, a copy of which also was sent me with your letter, does not question that the provisions of the Raker Act are binding upon the city, although he raises certain questions as to the proper construction of the act. The questions upon which you desire my opinion relate to these matters of construction, and I therefore proceed to consider separately each of your questions and the provisions of the Raker Act applicable thereto.

1. Your first question is as follows:

"Does the Raker Act entitled the Secretary of the Interior to prescribe the kind and quality of roads and trails required to be built and maintained by the city and county of San Francisco?"

Paragraph (p) of section 9 of the Raker Act provides as follows:

"That this grant is upon the further condition that the grantee shall construct on the north side of the Hetch Hetchy Reservoir site a scenic road or trail, as the Secretary of the Interior may determine, above and along the proposed lake to such point as may be designated by the said Secretary, and also, leading from said scenic road or trail, a trail to the Tiltill Valley and to Lake Vernon, and a road or trail to Lake Eleanor and Cherry Valley via McGill Meadow; and likewise the said grantee shall build a wagon road from Hamilton or Smiths Station along the most feasible route adjacent to its proposed aqueduct from Groveland to Portulaca or Hog Ranch and into the Hetch Hetchy Dam site, and a road along the southerly slope of Smiths Peak from Hog ranch past Harden Lake to a junction with the old Tioga Road, in section 4, township 1 south, range 21 east, Mount Diablo base and meridian, and such roads and trails made necessary by this grant, and as may be prescribed by the Secretary of the Interior. Said grantee shall have the right to build and maintain such other necessary roads or trails through the public lands for the construction and operation of its works, subject, however, to the approval of the Secretary of Agriculture in the Stanislaus National Forest, and the Secretary of the Interior in the Yosemite National Park. The said grantee shall further lay and maintain a water pipe, or otherwise provide a good and sufficient supply of water for camp purposes at the meadow, one-third of a mile, more or less, southeasterly from the Hetch Hetchy Dam site.

"That all trail and road building and maintenance by the said grantee in the Yosemite National Park and the Stanislaus National Forest shall be done subject to the direction and approval of the Secretary of the Interior or the Secretary of Agriculture according to their respective jurisdictions."

It seems clear that the provision that all trail and road building and maintenance by the city in the Yosemite National Park shall be done subject to the direction and approval of the Secretary of the Interior authorizes the Secretary to prescribe the kind and quality of roads and trails required to be built and maintained by the city, subject, however, to the implied condition that the decision of the Secretary must not be arbitrary or unreasonable and must be consistent with the intention of the parties at the time the Raker Act was passed and its provisions were accepted by the city. The act provides for the construction of roads, and it must be assumed that these roads were to be such as would meet the needs of the public then existing and such future public needs as could reasonably be anticipated.

The city attorney does not appear to question that the Secretary of the Interior has general authority to prescribe the kind and quality of roads and trails to be built by the city, but seeks to place a limitation upon the exercise of that authority in addition to the limitation indicated above, stating:

"It is the contention of the city that the proper interpretation of the Raker Act, adopted in 1913, * * * does not require the construction of a road * * * of a higher standard than the main traveled roads with which it connects and forms a part, as in existence or immediately contemplated at the time of the adoption of the Raker Act."

The short answer to this contention is that there is absolutely nothing in the Raker Act to justify the inference that the roads to be constructed need be no better than those with which they connected. If Congress had regarded the connecting roads as satisfactory and had intended that they should serve as models for the roads to be constructed, it would have been easy to insert a provision to that effect. Instead

of such a provision, the matter was left to the direction of the Secretary of the Interior. It follows that the Secretary was authorized to require the construction of roads adequate for the needs of the public existing or reasonably to be foreseen at the time the Raker Act was passed and accepted without regard to the standard of the connecting roads. It may be that the obligation of the city under the Raker Act goes further and extends to the construction of roads adequate for the actual or foreseeable needs of the public at the time the roads are built, but as it does not appear that you contemplate requiring the construction of roads of any higher standard than would have been required at the time the act was passed and accepted, and as I am not informed concerning the causes for the delay in construction of the roads, I pass over this question without expressing my opinion thereon.

2. Your second question is as follows:

"Does the Raker Act entitle the city and county of San Francisco to retain ownership of any lands owned by it in 1913 within the Yosemite National Park, except those lands actually flooded or to be flooded by reservoirs created pursuant to said act or otherwise occupied by constructed works of the project?"

Paragraph (t) of section 9 of the Raker Act provides as follows:

"That the grantee herein shall convey to the United States, by proper conveyance, a good and sufficient title, free from all liens and encumbrances of any nature whatever, to any and all tracts of land which are now owned by said grantee within the Yosemite National Park or that part of the national forest adjacent thereto not actually required for use under the provisions of this act, said conveyance to be approved by and filed with the Secretary of the Interior within six months after the said grantee ceases to use such lands for the purpose of construction or repair under the provisions of this act."

Your question amounts in substance to a request for a definition of the phrase "tracts of land * * * not actually required for use under the provisions of this act" as used in the foregoing paragraph. The phrase seems to me to be self-explanatory and incapable of further general limitation. I am unable to say that there may not be lands actually required for use under the provisions of the Raker Act, although not "actually flooded or to be flooded, by reservoirs created pursuant to said act, or otherwise occupied by constructed works of the project."

However, it appears from the letter from the city attorney of San Francisco and the opinion of the solicitor for your department that your question relates to two distinct types of lands, with respect to which there is controversy between you and the city. The first type is described by the city attorney as lying "between the present flow line of the reservoir and the flow line of the ultimate development of the same." The second type consists of lands lying along the margin of a reservoir, which the city contends "are required for use by the city for sanitary control of the reservoir."

With respect to lands of the first type, it should be noted that section 2 of the Raker Act required the city within three years after the passage of the act to file a map or maps "showing the boundaries, location, and extent of said proposed rights of way and lands required for the purposes" of the project contemplated by the act, subject to change by filing additional map or maps before the final completion of any of the work, and that section 5 contained the following provision:

"* * * That the construction of the aforesaid works shall be prosecuted diligently, and no cessation of such construction shall continue for a period of three consecutive years, and in the event that the Secretary of the Interior shall find and determine that there has not been diligent prosecution of the work or of some integral and essential part thereof, or that there has been a cessation of such construction for a period of three consecutive years, then he may declare forfeited all rights of the grantee herein as to that part of the works not constructed, * * *."

It is apparent that the act contemplated prompt determination of the scope of the proposed project and diligent prosecution of the construction thereof. It is my opinion that the city is entitled to retain all lands within the ultimate development of its reservoirs as contemplated by the maps of the project filed in accordance with the act, subject only to possible forfeiture if the construction is not prosecuted diligently, but that the city is not entitled to retain any lands not required for the project contemplated by the maps merely because they might at some indefinite time in the future be required for some enlargement of the project.

With respect to the contention of the city that it is entitled to retain certain lands for use for sanitary control of the reservoir, paragraph (a) of section 9 of the Raker Act provides as follows:

"(a) That upon the completion of the Hetch Hetchy Dam or the Lake Eleanor Dam, in the Yosemite National Park, by the grantee, as herein specified, and upon the commencement of the use of any reservoirs thereby created by said grantee as a source of water supply for said grantee, the following sanitary regulations shall be made effective within the watershed above and around said reservoir sites so used by said grantee:

"First. No human excrement, garbage, or other refuse shall be placed in the waters of any reservoir or stream or within 300 feet thereof.

"Second. All sewage from permanent camps and hotels within the watershed shall be filtered by natural percolation through porous earth or otherwise adequately purified or destroyed.

"Third. No person shall bathe, wash clothes or cooking utensils, or water stock in, or in any way pollute, the water within the limits of the Hetch Hetchy Reservoir or any reservoir constructed by the said grantee under the provisions of this grant, or in the streams leading thereto, within 1 mile of said reservoir; or, with reference to the Hetch Hetchy Reservoir, in the waters from the reservoir or waters entering the river between it and the "Early Intake" of the aqueduct, pending the completion of the aqueduct between "Early intake" and the Hetch Hetchy Dam site.

"Fourth. The cost of the inspection necessary to secure compliance with the sanitary regulations made a part of these conditions, which inspection shall be under the direction of the Secretary of the Interior, shall be defrayed by the said grantee.

"Fifth. If at any time the sanitary regulations provided for herein shall be deemed by said grantee insufficient to protect the purity of the water supply, then the said grantee shall install a filtration plant or provide other means to guard the purity of the water. No other sanitary rules or restrictions shall be demanded by or granted to the said grantee as to the use of the watershed by campers, tourists, or the occupants of hotels and cottages."

Obviously these sanitary regulations are intended to be exclusive and are to be enforced by the Secretary of the Interior, the only remedy of the city in case it regards them as insufficient being to install a filtration plant or other similar device. It follows that the city is not entitled to retain any lands for use for sanitary control.

3. Your third question is as follows:

"Does the Raker Act entitle the city and county of San Francisco to exclude, or to insist upon the exclusion by the department, of the public from the use and enjoyment of the park in any manner not inconsistent with the sanitary regulations embodied in section 9 of the said act?"

It follows from what has been said above in answer to your second question that this question must be answered in the negative. The sanitary regulations embodied in section 9 of the Raker Act are intended to be exclusive, and the city has no right to enforce, or to require you to enforce, any other or further regulations.

Respectfully,

JNO. G. SARGENT, *Attorney General.*

The honorable the SECRETARY OF THE INTERIOR.

EXHIBIT F

AUGUST 5, 1925.

Hon. HUBERT WORK,

Secretary of the Interior, Washington, D. C.

DEAR MR. SECRETARY: Your letter of July 20, 1925, referred for my consideration copy of a contract by and between the city and county of San Francisco, Calif., and the Pacific Gas & Electric Co., dated July 1, 1925, together with a copy of the opinion of the Solicitor of the Interior Department on the legal effect thereof. You request my opinion—

"Whether the performance of the acts of the city and county of San Francisco under and by virtue of this agreement constitutes a violation of section 6 of said entitled act approved December 19, 1913 (38 Stat. 242), which section prohibits the city and county 'from ever selling or letting to any corporation or individual, except a municipality or a municipal water district or irrigation district, the right to sell or sublet the water or the electric energy sold or given to it or him by the said grantee.'"

This section in full is as follows:

"That the grantee is prohibited from ever selling or letting to any corporation or individual, except a municipality or a municipal water district or irrigation district, the right to sell or sublet the water or the electric energy sold or given to it or him by the said grantee: *Provided,* That the rights hereby granted shall not be sold, assigned, or transferred to any private person, corporation, or association, and in case of any attempt to so sell, assign, transfer, or convey this grant shall revert to the Government of the United States."

In the view that I take of this transaction an extended summary of the provisions of this contract is not necessary. It provides in substance for the transmission and delivery to consumers in San Francisco of the electric energy generated by the city at its Moccasin hydroelectric plant by employing the existing distribution system of the Pacific Gas & Electric Co. at and beyond Newark, Calif., as a temporary method of utilizing this energy for the benefit of the city, pending the acquisition of title to the company's distributing system within San Francisco by purchase or condemnation after proceedings instituted by the city for the valuation of the system have been concluded. Since the city owns no distributing system of its own, it proposes to deliver the current to the company at Newark, about 40 miles from San Francisco, and from this point on the company takes the energy over its own system and accounts to the city therefor upon an agreed basis of compensation for services to be rendered under the agreement.

In the consideration of this question I have been aided by discussions with representatives of San Francisco, on the one hand, and of the Modesto irrigation district, on the other. Consideration has also been given to a lengthy argument, dated July 20, 1925, filed by seven members of the Board of Supervisors of San Francisco who voted against making this agreement; resolution on behalf of the Turlock irrigation district, adopted on June 15, 1925; copy of a letter to you from Messrs. Hadsell, Sweet & Ingalls, of San Francisco, Calif., on behalf of the Delta Land Syndicate, dated June 24, 1925; together with other letters and telegrams which discuss this contract from various angles and approve or disapprove it.

From reading this contract and the statute known as the Raker Act, it is at once apparent that the question on which you request my opinion involves a determination of a judicial question which at any time may become the subject of proceedings in the courts at the instance of the Federal Government, acting through you and the Attorney General, or of one or many other parties proceeding jointly or individually.

In this situation not only because this office ought not to commit itself to one side or the other of a legal controversy in which it may be required to take part in the future, but for the further reason that authority and the policy of the department in the past have been uniformly against such a course (see 19 Op. 56; 19 Op. 670; 20 Op. 210; 20 Op. 383; 20 Op. 618; 23 Op. 221; 23 Op. 585; 24 Op. 69, 74; 24 Op. 59; 32 Op. 472; 33 Op. 87), I am constrained to decline to give an opinion upon the question proposed.

I think you will appreciate more fully the necessity of this conclusion when you consider that by the provision of the statute known as the Raker Act the duty is cast upon you to determine from time to time whether the conditions specified in the act are being reasonably complied with and carried out by the grantee, the city and county of San Francisco; and just now, as an incident of that duty, to decide whether the utilization of the 410,000,000 kilowatt hours per year which is now or will soon be going to waste unless utilized in the manner in this contract provided for, is or is not an unreasonable thing to be done by the city until a municipally-owned transmission and distribution system can be provided.

Some of the parties in interest and their counsel contend that the instrument by which such utilization is proposed to be brought about is not in violation of the terms of the statute in any view. Some take the other extreme and say that it is wholly in violation of the terms of the statute. Others take the view that the meaning of the statute is to prevent the permanent conversion of the benefits of this waterpower development to private uses, and that what is done as a temporary makeshift to save to the city the $2,000,000 a year or thereabouts which it will realize under this contract, is not within the contemplation of the terms of the act. In the exercise of your discretion you may come to the conclusion that this last is the correct view.

It may be that an attempt will be made to continue this arrangement beyond the time that you will determine to be reasonable, even going to the extent of making this contract the means of permanently turning over this great waterpower development to the private corporation interested, and in that event it would be very unfortunate for this office to be committed to one side or the other of the controversy by an opinion rendered when conditions were entirely different from conditions existing at the time the controversy might arise.

In any event, as stated above, it is not thought best that this department undertake to determine the legal controversy in advance should it arise.

Respectfully,

JOHN G. SARGENT, *Attorney General.*

The SPEAKER pro tempore. Under the previous order of the House, the Chair recognizes the gentlewoman from California [Mrs. KAHN] for 30 minutes.

Mrs. KAHN. Mr. Speaker, the attack made on San Francisco by the gentleman from Michigan is in many respects both unwarranted and unjust. The gentleman has the idea that the most important things in the country are the national parks and he has been diverted by this from the great purpose Hetch Hetchy is to serve and has magnified a mole hill into a mountain. In these days when we think and act in terms of hundreds of millions, even billions, our colleague from Michigan has taken it upon himself to attempt to besmirch the good name of a great city because of the difference of opinion between the Department of the Interior and the officials of San Francisco involving the sum of $1,600,000 in a project running over the hundred million mark.

Let me point out right here San Francisco has shown its good faith in the Hetch Hetchy project to the extent of $120,000,000. An early bond issue of $45,000,000, followed later by one of $10,000,000, and on the 8th day of this month a further issue of $24,000,000 for construction and another of $40,000,000 to buy the existing distributing system. Surely San Francisco is not going to jeopardize a project of this magnitude by not fulfilling the minor conditions imposed by the authorization act. It is a serious thing to charge any city with breach of faith. No city built upon a foundation of broken pledges and promises unkept could prosper and grow and be loved as San Francisco is around the world.

San Francisco has not had easy sailing. Her's has been a tragic past—tragic but not drab. Three times has this city risen from her ashes to greater beauty. Undismayed by any disaster, brave, courageous, undaunted, she carries on to greater glory; unique in her charm, unsurpassed in her loveliness, there on the edge of the Pacific.

On the 19th day of December, 1913, President Wilson signed a bill which had been passed by both Houses of Congress and which was vitally necessary to the continued growth and prosperity of the city of San Francisco.

The purpose of this bill was to enable San Francisco to proceed with a great water supply and electric power development designed to serve the fast-increasing needs of the city and such of the surrounding metropolitan area as might see fit to join with San Francisco in that development for many years into the future. This bill is commonly known as the Raker Act, after the late Congressman Raker, who introduced it because the project was to be housed in the congressional district which he represented.

The title of the act is:

An act granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California and for other purposes.

The primary purpose of the city and county of San Francisco in securing this legislation was to obtain the right to use for reservoir purposes the Hetch Hetchy Valley and Lake Eleanor, both of which are located in the Yosemite National Park.

San Francisco, from the beginning of its history as a large city, has been supplied with water by a private corporation, the Spring Valley Water Co., from sources located on the San Francisco Peninsula and across the bay in Alameda and Santa Clara Counties.

About 1900, during the mayoralty term of James D. Phelan, who subsequently became United States Senator, it was realized by Mr. Phelan and other officials that the local sources must eventually be supplemented by water brought from the high mountain regions of the Sierra Nevadas and, in fact, that the latter source would become the principal one, the local supply assuming more and more the status of an auxiliary.

In 1901, as a result of engineering investigations and estimates, it was determined that the Tuolumne River watershed would be the most satisfactory source. This source, with Hetch Hetchy Valley and Lake Eleanor as the principal reservoir sites, had been suggested many years earlier as the possible source for an augmented water supply for San Francisco by a number of engineers, including those of the United States Geological Survey, but it took 12 years for the city to overcome the opposition that developed from opponents without and within the city.

Promoters endeavoring to foist rival projects upon the city, irrigation districts fearful of being deprived of water to which they thought themselves lawfully entitled, and individuals and associations interested in the preservation of the natural beauty of the national parks, all had their innings and bitterly opposed the grant to San Francisco even to the extent of seeking a presidential veto. The self-styled "nature lovers" went to the utmost limits of absurdity, one prominent magazine editor stating that San Francisco should be compelled to distill sea water if that were the only alternative to using the desired reservoir sites in the national park. The people of San Francisco had no desire to interfere with the public's enjoyment of the great Yosemite National Park. They were, therefore, willing to agree that the congressional grant which they sought be made subject to conditions which would safeguard, in a reasonable manner and to a reasonable and to a perhaps more than reasonable extent, the interests of all parties concerned, and such conditions were contained in the bill as finally approved by the President.

Our present concern is not with the propriety of the conditions of the Raker Act. The present discussion is on the matter of compliance with the conditions as they exist. Let us now review those portions of the act in which San Francisco is obligated to do things for the benefit of the United States.

Under the Raker Act the city and county of San Francisco is granted rights of way and lands in the Yosemite National

Park, Stanislaus National Forest, and other public lands for all purposes in connection with its water supply and power development. The city is obligated to pay the United States the sum of $15,000 annually to and including the year 1928, $20,000 annually for the succeeding 10 years, and $30,000 annually forever thereafter, which sum is to be kept in a separate fund by the United States to be applied to the building and maintenance of roads and trails in the Yosemite National Park and other national parks in the State of California.

The city is required to pay the full value of all timber and wood cut, injured, or destroyed on or adjacent to any of the rights of way and lands in the course of the city's work.

The city is required to build certain roads and trails and to reimburse the United States Government for the cost of maintenance of these roads and trails and to lay and maintain a water supply for camp purposes near the Hetch Hetchy Dam site.

The city is required to convey to the United States a good and sufficient title, free from all liens and encumbrances, to any and all tracts of land owned by the city at the time of approval of the Raker Act within the Yosemite National Park or that part of the national forest adjacent thereto not actually required for use under the provisions of the act.

The act sets forth sanitary regulations to be made effective within the watershed above and around the reservoir sites and in the streams tributary to the city's aqueduct.

By way of contrast it is interesting to remember that when the city of Los Angeles decided upon the Owens River as the source of its greater water supply it had no difficulty in obtaining congressional action granting the necessary rights of way, and the Owens River project of the Reclamation Service for irrigation of lands in Inyo County was abandoned in order that the water might be put to a higher use for the benefit of the greatest number of people. No onerous conditions were imposed upon Los Angeles by Congress.

The city of Portland, Oreg., obtains its water supply from a mountain watershed of 102 square miles, nearly all of which is Government land, the small remainder being owned by the city of Portland. By an act of Congress approved April 28, 1904, this watershed was absolutely closed to all persons except forest rangers, Federal and State officers in the discharge of their duties, and the employees of the water board of the city of Portland in the discharge of their duties. No conditions whatever were imposed upon Portland.

San Francisco has received so much less at the hands of the Government that she well deserves the fullest cooperation of the Government in the utilization and enjoyment of what she has been granted.

There is no question at this time as to compliance with the other conditions of the act, and it is therefore unnecessary to summarize them.

Immediately on obtaining the rights granted by the Raker Act the city commenced work on its great project. A bond issue of $45,000,000 had been authorized by the voters of the city in 1910 and funds were available from the sale of these bonds. Surveys were completed, many miles of wagon roads and trails were constructed, a standard-gauge railroad 68 miles long was built, and a complete hydroelectric power system for the operation of construction machinery was developed. However, with the increasing difficulties of financing and later of securing labor and material, due to the World War, the progress of construction for several years was slow.

The local sources of water supply were still capable of development which would take care of the city's needs for some years to come. The easterly end of the Hetch Hetchy system contained large power-development possibilities. San Francisco therefore did the sensible and businesslike thing in scheduling its construction so as to complete first the works necessary for power development in the Sierra Nevada Mountains. These works were completed in 1925, and the power development now produces a net revenue of $1,800,000 yearly, applicable to bond interest and redemption and easing the otherwise heavy financial burden which the city would have to bear. A 22-mile section of the Hetch Hetchy Aqueduct in the San Francisco Bay region has also been completed and is in service at present for conveying a part of the water from Alameda County sources to the reservoirs on the San Francisco Peninsula. The Spring Valley Water Co. pays the city $250,000 annually—practically interest charges—for the temporary use of this conduit.

The gentleman from Michigan [Mr. CRAMTON] stated that no effort had been made by the city of San Francisco to acquire a distributing system of its own for the power. I am in receipt of this telegram which was just handed me from the city attorney of San Francisco, saying:

SAN FRANCISCO, CALIF., *May 19, 1928.*

Hon. FLORENCE P. KAHN,
Representative in Congress,
Fourth Congressional District of California,
House Office Building, Washington, D. C.:

Distribution through the agency of Pacific Gas & Electric Co. to the people in San Francisco was approved as a temporary expedient by Department of Interior in July, 1925. Immediately after this approval my office proceeded to condemn local distribution systems of Pacific Gas & Electric Co. and Great Western Power Co. During past three years these proceedings have been before railroad commission, and during past two years more than 300 actual trial days have been occupied before commission. More than 5,000 folios of oral testimony have been taken, in addition to hundreds of exhibits filed by city and companies. Taking of testimony closed on March 15 and each side allowed 90 days for preparation of briefs, which will be filed by June 15, when matter will be submitted to commission for decision. As soon as railroad commission fixes valuation of properties of these companies question of their purchase by city for the purpose of distribution by city of Hetch Hetchy power will be submitted to people. You can assure the Congress that since the permission granted by the Department of Interior to distribute power through Pacific Gas & Electric Co. city has used every effort to obtain by condemnation local distributing systems. Both companies have resisted to the utmost our plans to acquire their properties, but have every hope that price to be fixed by commission will meet the approval of people and that these distribution systems will be obtained.

JOHN J. O'TOOLE, *City Attorney.*

Having completed the sections from which immediate financial return was to be expected, thus lightening the burden of interest and bond redemption upon the San Francisco taxpayers, the city is actively continuing the work of aqueduct construction, and in about four years' time should be delivering Hetch Hetchy water to San Francisco. This work is at present being financed from a $10,000,000 bond issue authorized by popular vote in 1924. A further $24,000,000 issue will be necessary to complete the work, so that by the time the first Hetch Hetchy water is delivered into San Francisco the city will have expended on the project, in round figures, $80,000,000, exclusive of charges for interest during construction and exclusive of the purchase of the present Spring Valley system, which will add about $40,000,000, bonds for which were authorized May 8 of this year.

It was not until last July that the Department of the Interior woke up to the iniquity of San Francisco. Under date of July 7, 1927, the Secretary of the Interior issued a formal notice to the city and county of San Francisco demanding the performance of all matters required of San Francisco by the Raker Act. Quotation was made from several sections of the Raker Act relative to the obligations of the city under that act, following which the statement is made that the city has not complied with the requirements of the grant set forth in the notice. Request is then made for the immediate performance by the city of a number of specific items of work and conveyances of certain designated parcels of land to the United States.

And here is an interesting situation. The Department of the Interior, created to serve and further the interests of the people, the taxpayers who maintain it, very much like a temperamental employee, comes to its employer in an arbitrary and precocious mood, making demands predicated only on its own idea of how things should be done.

Mr. CRAMTON. Would the lady mind yielding?

Mrs. KAHN. No.

Mr. CRAMTON. I am not so sure that the approval referred to in the telegram is not a matter of controversy, but to pass that for the present, the lady hardly gives quite justice to the Secretary of the Interior in the statement as to no attention being given the matter until 1927. Of my own knowledge I know the department had up with the city of San Francisco the question of certain compliance with the act in connection with the removal of the railroad tracks, and so forth, from one to two years earlier.

Mrs. KAHN. This was the first time a formal notice was served.

Mr. CRAMTON. Yes; a formal notice.

Mrs. KAHN. Following the city's receipt of this notice Mr. Mather, Director of National Parks, on August 8, 1927, appeared before the board of supervisors in San Francisco; and while admitting that he could not commit the Secretary, outlined his views as to what the Department of the Interior considered were the obligations of the city under the Raker Act, indicated the order in which he—and it is presumed the Department of the Interior—desired the city to proceed to carry out its obligations, and gave an estimate of cost of doing this work to meet the requirements or standards of construction which the depart-

ment would adhere to for the roads to be built. This estimate totaled $1,628,500. The work outlined practically ignored the work already done by the city in compliance with the Raker Act, and the cost estimate indicates very highly exaggerated ideas as to the manner in which specific items of construction should be carried out by the city.

The city officials, naturally enough, took exception to the interpretation of the Raker Act, with respect to the city's obligations, as thus presented by Mr. Mather. A letter was prepared by the city attorney outlining the city's views of the matter, noting the points of difference between the city and the Interior Department, and indicating the work which the city was willing to proceed to do. This was forwarded to the Interior Department October 13, 1927.

Later the Attorney General was called upon for an opinion, which was released last Wednesday, May 16, and which admittedly must be read from the viewpoint of the Solicitor of the Interior Department. That opinion may have its day in court, and its worth can be tested then.

The differences of opinion between the Federal Government officials and the city hinge largely upon the question of what type of road is necessary to satisfy the requirements of the Raker Act for roads to be constructed by the city. The Interior Department is calling for roads having construction standards suitable for heavy, high-speed motor-vehicle traffic; in fact, roads which might properly be termed "boulevards."

The city can not reasonably be expected or required, under the terms of the Raker Act, to construct at its own sole expense roads of such high standards.

At the time the Raker Act was approved, motor vehicles were not in common use in the mountain regions. All mountain roads, and most roads elsewhere as well, were simply wagon roads, built to serve the needs of horse-drawn vehicle traffic, without any thought for the possible future requirements of such traffic developments as have occurred since that time. The roads in the Yosemite National Park were no better than those in the adjacent mountain country, and motor vehicles were not permitted to enter the park. In such regions the word "road" was always understood to mean wagon road.

The roads already constructed by the city in connection with the water-supply development are in general of higher types of construction than would have been necessary under the act at the time of its passage. The city voluntarily exceeded the Raker Act requirements, partly for greater convenience in the use of the roads incidental to the water-supply development and partly for permanent public convenience.

Some of the specific requests contained in this notice exceed the requirements of the Raker Act, reasonably interpreted; others are reasonable and will be complied with by the city at the earliest possible time.

Briefly stated, the city's position in these matters is as follows:

The city has complied, and will continue to comply, with the obligations imposed in the Raker Act, reasonably interpreted in fairness to both the city and the Federal Government. The city has not at any time sought and does not now seek to evade any of its just obligations under the provisions of the Raker Act.

The city has received no formal written request prior to that of July 7, 1927, for compliance with specific requirements of the act. Nevertheless, the city has already done a great deal of work in fulfillment of such specific requirements. Most of this has been on the city's own initiative, generally as such work became necessary or convenient in connection with the Hetch Hetchy water supply construction program. Some such work has been in compliance with informal requests of Government officials made from time to time. Payments to the Government, as required by the act, have been promptly made. Yet the implication of the notice is that the city has not complied with any of the Raker Act requirements set forth in the notice. Emphatic exception is taken to this implication, which is very far from fact, as I will endeavor to show later.

The city is willing to proceed as rapidly as is reasonable to fulfill any requirements not already met, according to such program and in such manner as may be satisfactory to the Secretary of the Interior, within the spirit of the Raker Act.

San Francisco most emphatically takes exception to any intimation that she has been derelict or dilatory in complying with her obligations. The city has from the time of acceptance of the Raker Act "reasonably complied with and carried out" (I quote the exact language of the Raker Act) the conditions specified in the act, and is now reasonably complying with and carrying out those conditions.

It is only recently that the city completed the initial stage of construction of its work in the Yosemite National Park and the Stanislaus National Forest. The first four years of work were also the four years of the World War, and during that period and the subsequent two or three years of readjustment the work was very much hampered by difficulties of financing and of obtaining labor and material. Construction was thus thrown far behind schedule, and it was necessary to devote every effort and every obtainable dollar to essentials. It was not practicable to expend funds on projects having no immediate value in connection with the main construction job, such as the road from Mather to Harden Lake. However, nearly all of the requirements of the Raker Act for road and trail construction could be fulfilled, and in formulating the bill it was intended that they should be fulfilled by the construction of roads and trails necessary as parts of the communication system of the city's water supply construction work. Such roads and trails were, of course, built, each as necessity arose.

The city has provided a road 9 miles long extending from Mather Station (Hog Ranch) to Hetch Hetchy. This was used as the roadbed of a portion of the city's 68-mile railroad line from the Sierra Railway to Hetch Hetchy. Two years ago the track was removed and the grade was resurfaced for automobile traffic, it being understood that when, in the future, it becomes necessary to put the railroad back into service for future construction work the track may be replaced by the city. The road has cost about $250,000 and has a maximum grade of 4 per cent, and the surfaced width permits two cars to pass safely and comfortably at all points. The road is far superior in all respects to that leading to Mather from Yosemite Valley, or any other road in the park outside of the Yosemite Valley and the lower Merced Canyon, and unquestionably far superior also to the type contemplated in the Raker Act, which specifically calls for a wagon road from Hog Ranch to Hetch Hetchy. The city has far exceeded its obligations in connection with this road, but the department schedule calls for a further expenditure of $270,000 on this item. The only way such a sum could be spent on the road would be to put a high-class concrete pavement about 8 inches thick on the entire length of it.

The city built a road from Hetch Hetchy to Lake Eleanor via McGill Meadow and a trail from Lake Eleanor to Cherry Valley as required by the Raker Act. This work cost about $60,000. The Raker Act calls for a road or trail to Lake Eleanor and Cherry Valley via McGill Meadow. This language indicates that a high-class road was not contemplated. The road has a 14-foot minimum width, 12 per cent maximum grade, and the route and plans were approved by Secretary of the Interior Franklin K. Lane December 30, 1916. As constructed it fulfills the Raker Act requirements; yet Mr. Mather, representing the Interior Department, is now asking that the city construct an entirely new road in its place at an estimated cost of $800,000.

The city cooperated at considerable expense in the improvement of sections of the Big Oak Flat Road from the confluence of Moccasin Creek and the Tuolumne River to the middle fork of the Tuolumne River, performed extensive reconstruction work to improve the grade and alignment of that road, and has contributed labor, material, and equipment toward the maintenance of the road. This road, a State highway, traverses the Stanislaus National Forest. It is the only direct connection from the west to the Tioga Road, and is one of the three most important routes to Yosemite Valley. The work done by the city materially improved conditions for travel to and from Yosemite National Park and through the Stanislaus National Forest.

The city reconditioned and to a large extent reconstructed the old road extending from the Big Oak Flat Road near South Fork to Mather, north of the middle fork of the Tuolumne River. This road had been virtually abandoned, so that the city's work in effect opened a new route to Mather.

Commencing with the year 1919, the city has, as required by the Raker Act, paid the Government $15,000 annually in cash, making the total of such payments to date $135,000. For the 10-year period 1929–1938, the annual payment is to be $20,000 and thereafter $30,000.

While the Hetch Hetchy Railroad was in operation, Government officials and employees of the National Park and Forest Services were carried free of charge, and the privilege of free freight haul was extended them.

Free use of the city's telephone lines is allowed the Government.

The city has also performed many services for the United States Government, some of which are and some of which are not required by the Raker Act. The city has never been niggardly in complying with the reasonable requests of the national park and national forest authorities.

WORK REMAINING TO BE DONE UNDER THE RAKER ACT

The Raker Act also calls for a road to connect from Hog Ranch to the old Tioga Road passing Harden Lake. Early in

1927, on the request of the Director of Parks, the city paid over to the National Park Service the sum of $6,000, to be expended for a survey of this road under the direction of the United States Bureau of Public Roads. On completion and acceptance of the survey, the necessary financial arrangement to comply with the obligation in full should be made as soon as possible. However, the Interior Department is demanding a road of a much higher type than the existing park roads and much higher than that contemplated in the Raker Act. The estimate of the cost of this road is $480,000. The road as now proposed by the Bureau of Roads requires only the addition of a concrete pavement to make it fully equal to the highest class of main trunk two-line highways. Now, of course, the road actually to be constructed should be of whatever type may be necessary to provide for the class and volume of traffic anticipated by the park service, but the city's obligation would be fully met by contributing toward the cost of the road a sum sufficient to pay for the construction, at the present time, of such a road as was contemplated in the Raker Act, the Federal Government paying all excess cost made necessary by the adoption of higher construction standards. The city is ready to contribute the sum of $250,000 for this purpose. This amount is certainly more than necessary to fulfill the Raker Act obligation to the letter.

The obligation for a trail along the north side of Hetch Hetchy Reservoir and a trail from that trail to Tiltill Valley and Lake Vernon is accepted without question by the city, and surveys are now being made and these trails are to be constructed during the coming year, provided approval of the location is had within reasonable time.

LAND CONVEYANCES

Section 9 (t) of the Raker Act provides:

That the grantee herein (the city) shall convey to the United States, by proper conveyance, a good and sufficient title free from all liens and encumbrances of any nature whatever, to any and all tracts of land which are now owned by said grantee within the Yosemite National Park or that part of the national forest adjacent thereto, not actually required for use under the provisions of this act, said conveyance to be approved by and filed with the Secretary of the Interior within six months after the said grantee ceases to use such lands for the purpose of construction or repair under the provisions of this act.

The requirement of this section extends only to land owned by the city at the time of adoption of the act and not actually required by the city for use. There is no obligation upon the city to convey to the United States land required for use or acquired after the adoption of the act. Certainly land below the high-water line of any existing or proposed reservoir, land adjacent to a reservoir and required for sanitary control, and other land that will be used in connection with future construction are "actually required for use."

The discussion before Congress previous to the passage of the Raker bill clearly shows that it was the intention that lands owned by the city and suitable for use for recreational purposes within the national park and adjacent national forest area should be transferred to Government ownership. It was never intended that the reservoir lands be surrendered by the city.

The request for land conveyances in the Secretary's notice of July 7, 1927, clearly exceeds the requirement of the Raker Act. It includes all land owned by the city within the national park at the present time, whether in use or not, except a tract of 80 acres in Poopenaut Valley, which last, however, Mr. Mather has not neglected to include in his own demand. The request includes land below the flow lines of Hetch Hetchy and Lake Eleanor Reservoirs, lands immediately adjacent to the flow lines, and two tracts acquired by the city after the adoption of the Raker Act.

Certain very important clauses of the Raker Act empower the city to exercise sanitary control on the watershed tributary to its reservoirs and points of diversion. Section 9 of the act includes the following provisions:

No human excrement, garbage, or other refuse shall be placed in the waters of any reservoir or stream or within 300 feet thereof.

No person shall bathe, wash clothes, or cooking utensils, or water stock in, or in any way pollute the water within the limits of the Hetch Hetchy Reservoir, or any reservoir constructed by the said guaranty (city) under the provisions of this grant, or in the streams leading thereto, within 1 mile of said reservoir; or, with reference to the Hetch Hetchy Reservoir, in the waters from the reservoir or waters entering the river between it and "Early Intake" of the aqueduct.

In connection with such sanitary control, it is necessary for the city to reserve such portions of its lands in the national park and national forest as lie along the margins of reservoirs and important streams, and certain other lands for the use of sanitary officers to be employed by the city to enforce sanitary regulations.

Lands covered by the requirements of section (t) and not required for use under the provisions of the act are now being transferred to the United States by the city.

It has been stated by the Director of the Park Service that all of the city's lands within the park should be transferred to the United States as an evidence of good will and to conform to the desire of the park service to have all land within the park boundaries under one control. However, the objectionable features of ownership of land within the park by private parties do not exist in regard to ownership by the city, and it is difficult to see that any benefit to the Government would result from conveyance of all of the city's land necessary for water use.

SUMMARY OF THE FOREGOING

Far from having failed to carry out its obligations under the Raker Act, San Francisco has already expended sums aggregating in the neighborhood of $400,000 in the construction of roads and trails to comply with the Raker Act requirements, and is ready to spend some $300,000 additional on the remaining items, making a total expended and to be expended of about $700,000 on these roads and trail items.

Mr. CRAMTON. Would the lady mind an interruption?

Mrs. KAHN. Not at all.

Mr. CRAMTON. The lady has quoted certain regulations, but where is there anything in the act to give the city of San Francisco the right to enforce any regulation or, as the lady has said, any control whatever?

Mrs. KAHN. The water released from Hetch Hetchy Reservoir flows for a distance of 12 miles down the Tuolumne River to a diversion dam at a point called "Early Intake," where the water is turned out of the river into the city's aqueduct. Any contamination entering this portion of the Tuolumne River would be carried directly to the aqueduct. This aqueduct is now actually serving as the source of water supply for about a thousand persons located in the city's power plant operators' quarters and in the various construction camps at which further aqueduct construction is now being prosecuted. The sanitary measures provided for in the Raker Act must be enforced for the immediate benefit of these people, and the city has merely been endeavoring to enforce these regulations in a practical manner in accordance with the recommendations of the Board of Health of San Francisco, just as it will be necessary to enforce them for the benefit of the whole population of San Francisco a few years hence when the water will be conveyed on to San Francisco on completion of the remaining divisions of the aqueduct. There has never been any thought of attempting to exclude tourists from the watershed as a whole.

Pursuant to its policy of keeping the watershed clean, the city in 1927 established a public camp ground on its property at Mather Station, with water supply and sewerage systems costing about $50,000. There the tourists will be less than one-half hour's drive from Hetch Hetchy and will be much more comfortably accommodated than they could possibly be anywhere else in the vicinity.

If the city's regulations have interfered to a slight extent with the freedom of movement of a small fraction of the total number of tourists—possibly 100 annually would be a fair figure to set as a maximum—on the other hand, the health of nearly a million people in San Francisco and the neighboring communities is a pretty heavy weight on the other side of the balance and the city should have the active cooperation of the park authorities instead of resistance and opposition.

POWER DISPOSAL

The gentleman from Michigan alleged that San Francisco is violating the Raker Act by selling power to a private corporation. The fact is that the city of San Francisco, not having any distributing system for its power, and not having at the time adequate bonding capacity to provide a complete distributing system, entered into an agency contract with the Pacific Gas & Electric Co. and is delivering power to that company at a substation near San Francisco Bay for distribution through this company acting as agent for the city. The contract is subject to termination on 24 hours' notice, this provision being intended to permit the city to withdraw from the arrangement at any time that it may come into possession of a distributing system either by purchase or by construction. In the meantime, the city has entered proceedings before the State railroad commission for a valuation of the existing power companies' distributing systems, looking toward purchase through either negotiation or condemnation.

TREATMENT ACCORDED OTHER CITIES BY FEDERAL GOVERNMENT

There are many who believe that San Francisco was forced into the bad end of a hard bargain by the inclusion of a number of unnecessary and unjustified conditions in the Raker Act. It is indeed difficult to see why the Federal Government should be concerned with the apportionment of water between San Francisco and the irrigation districts. It is hard to understand why San Francisco should be required to make annual payments to the Government in perpetuity in addition to the contributions required in the form of road and trail construction and maintenance for the public benefit.

And so I have spoken to uphold the fair name of San Francisco—open-hearted, generous, kindly, hospitable—endeavoring to fulfill her every duty, her every obligation; fitting herself and her citizens for the great future that lies before them, the westward outpost of our great country, the sentinel of the Pacific, in that great State that "lies nor east nor west, but like a scroll unfurled where the hand of God hath hung it—down the middle of the world." [Applause.]

SECOND DEFICIENCY APPROPRIATION BILL

Mr. MORROW. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon certain portions of the deficiency bill that passed yesterday.

The SPEAKER pro tempore (Mr. HOOPER). Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. MORROW. Mr. Speaker, the House yesterday passed the deficiency appropriation bill, H. R. 13883. There were included in the bill some items of vital interest to the development of the State which I have the honor to represent.

Two items which particularly are of direct and far-reaching importance in the future development of the State were included in the bill, the development of the Middle Rio Grande Valley, N. Mex., and the raising of Avalon Dam, Carlsbad irrigation project, New Mexico.

MIDDLE RIO GRANDE CONSERVANCY DISTRICT

The first of the items mentioned had its origin with the residents in the middle Rio Grande Valley, principally the people located in the city of Albuquerque, N. Mex.; the people of other towns and villages in the valley cooperated with the city of Albuquerque in forming the Middle Rio Grande Conservancy District. The district was organized under and pursuant to chapter 140, session laws of the State of New Mexico, in 1923. This law was drawn with the view of securing the cooperation of the Government of the United States. Authority was vested specifically therein authorizing the cooperation with the United States in making surveys, investigations, and reports as well as in constructing, maintaining, using, and operating the improvements to be made.

The act approved February 14, 1927 (Public, No. 620, 69th Cong.), authorized an appropriation for reconnaissance work in conjunction with the Middle Rio Grande Conservancy District to determine whether certain lands of the Cochiti, Santo Domingo, San Felipe, Santa Ana, Sandia, and Isleta Indians are susceptible of reclamation, drainage, and irrigation. The survey was thus permitted to go forward and completed.

On March 13, 1928, a further act was approved. This was the act (Public, No. 169, 70th Cong.) authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande Conservancy District providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes.

There was considerable struggle to enact the above act, but it was finally passed and thus permitted a contract between the Conservancy District of the Middle Rio Grande Valley, N. Mex., and the Secretary of the Interior. One hundred and thirty-two thousand acres of land within the valley, adjacent to the city of Albuquerque and the other towns of the valley, will be reclaimed, drained, irrigated, and a complete plan of flood control will be provided.

The press of that section of New Mexico has said that this legislation is one of the most forward steps in building and developing that part of the State that has been accomplished since statehood. The appropriation of $100,000 was not included in the deficiency appropriation bill, as reported to the House. It is said that this appropriation was held up because certain Indian legislation which had passed the House and Senate, pertaining to the Acoma Pueblo Indians (H. R. 11479), had been recalled and was being held up without passage in the Senate; the legislation was urgently demanded by the Bureau of Indian Affairs. That legislation, as well as that for which the appropriation of $100,000 is sought, should be enacted.

The purpose of the appropriation was to carry forward the contract between the Government and the conservancy district, which had for its purpose the irrigation, reclamation, drainage, and flood control of 23,670 acres of Indian land, for which the Government contracts to pay the Indian share of the same, $1,593,311. This $100,000 is the first installment toward the carrying-out of that contract on the part of the Government with the Middle Rio Grande Conservancy District.

I was taken by surprise when I found the appropriation was not included in the bill. In tracing the item from its recommendation by the Commissioner of Indian Affairs to the Bureau of the Budget, and the latter's approval of the same to the Committee on Appropriations, I was assured that the appropriation would be included. Finding that it was not included, I sought the chairman of the committee and requested from him and other members of the committee permission to offer an amendment on the floor; the amendment which I offered is as follows:

On page 30, line 4, insert a new paragraph:

Middle Rio Grande conservancy project, New Mexico: For payments to the Middle Rio Grande Conservancy District, in accordance with the provisions of an act entitled "An act authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande Conservancy District providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes," approved March 13, 1928, fiscal year 1929, $100,000 (reimbursable).

The amendment was agreed to.

It is to be hoped that from now on this development will go forward, so that the entire area contained within the conservancy district may at the earliest time possible be developed, with full cooperation from the Government, through the officers of the Bureau of Indian Affairs. There is opportunity for speedy growth of a desirable population in this healthful locality, which has great possibilities along agricultural and horticultural lines.

AVALON DAM, CARLSBAD PROJECT, NEW MEXICO

The other project that the people of New Mexico may feel great satisfaction in is the carrying forward and construction of Avalon Dam, Carlsbad, N. Mex., which will, when completed, afford a complete water supply for the 25,000 acres of land now under irrigation under that project.

This project when first taken over by the Government in 1904 had for irrigation at that time a dam known as the McMillan Dam. This reservoir had been condemned by four engineers of the Government in their report made under date of August 31, 1905. The report stated as follows:

Lake McMillan is a leaky reservoir and the leakage is so great as to practically destroy its value, except for temporary and auxiliary storage.

At the time this project was taken over by the Government the condition of that reservoir was known, and it was contemplated and agreed that the Government would construct for that reclamation project a new reservoir. From that time up until the proposed construction of Avalon Dam the Government has failed to carry out its promise.

There was an attempt made by the Government in the year 1912 to raise McMillan Dam, to provide storage for 5,000 acres additional; at that time 20,000 acres were under irrigation. The result was the expenditure of $395,747.40; of this sum $164,383.62 was for the acquisition of flowage rights which the Government admitted was a mistake made by the Government.

The total expenditure was of no value to the project, but caused a greater leakage and less storage in McMillan Reservoir.

In the charge off that occurred upon the reclamation projects, under the act which passed the House on May 3, 1926, and the Senate on May 17, 1926, and which received the approval of the President, there was deducted by the charge-off bill from the total cost of Carlsbad project the sum of $374,885.69, on account of error in providing for additional storage in Lake McMillan. This was the first move by which this project began to recover, and from that time on to the present there has been an effort, by various conferences with the Reclamation Service, to secure an adequate water supply and the construction of a dam at site No. 3, or at the Alamogordo site near Fort Sumner, N. Mex., to provide both Carlsbad and Fort Sumner irrigation projects with a permanent water supply.

Three outstanding irrigation engineers were appointed by contract between the Government and the Pecos Water Users' Association and the Fort Sumner project. The engineers selected in pursuance of this contract dated May 10, 1926, were Louis C. Hill, Oro McDermith, and S. O. Harper. The specific matters to be reported were outlined in article 5 of the contract, as follows:

It is understood that the board shall, among other things, consider the feasibility of (a) a reservoir at the so-called site No. 3, Carlsbad

project; (b) a reservoir at the so-called Alamogordo site to furnish supplementary storage for the Carlsbad project and for the irrigation of lands in the vicinity of Fort Sumner, with or without storage at site No. 3; (c) a reservoir to be constructed at Alamogordo site for lands near Fort Sumner alone; (d) the question of available water supply for both projects named, with the inclusion of such additional land, if any, as may be found feasible.

The engineers filed their report in July, 1927, eliminating all sites except the raising of Avalon Reservoir to the elevation of 3,200 feet, to store 50,000 acre-feet of water, the cost of which was estimated at $857,527.

The geologist, Mr. Kirk Bryan, delayed his report until January, 1928. The recommendation made by him was to raise the Avalon Dam to the 3,192 elevation; this was contrary to the report of the engineers.

The Commissioner of Reclamation considered the geologist's report as unfavorable and declined to make a recommendation for an appropriation, unless the matter was further passed on by another geologist. A geologist from Leland Stanford University was selected to make the report; his recommendation was to raise the dam to the 3,200 elevation. The Commissioner of Reclamation still declined to make a recommendation after the disaster to the St. Francis Dam in California.

Again engineers were requested to make further report, and a special inspection for the Bureau of Reclamation was made in the closing days of April, 1928, by Mr. D. C. Henney, Mr. Foster (consulting engineer), and Mr. Walters, of the Denver office, chief engineer of the western irrigation projects.

A complete report was made and the recommendation was the Avalon Dam should be raised to the 3,200 elevation. The deficiency appropriation bill carries the first installment for this purpose in the sum of $250,000.

It is with a certain degree of satisfaction that after a period of 24 years the Government is now going to complete this reservoir and make this project permanent for the irrigation of 25,000 acres of land.

The appropriation for these two projects carried in the bill has caused me to feel considerable satisfaction with what efforts I have put forward toward the success of getting these matters in a position of permanency in my State of New Mexico.

FUNCTIONING AS AN INTERPRETER FOR SOCIAL DEMOCRACY—AN EXPLANATION OF SOME OF THE BILLS I HAVE INTRODUCED

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. BERGER] is recognized under the special order for 45 minutes.

Mr. BERGER. Mr. Speaker, ladies, and gentlemen, I appreciate your courtesy in granting me time at present to explain some of my bills. I am well entitled to the time, however, as the only Representative in this House of a school of opinion which has several million adherents in our country. Moreover, I have never tried to obstruct the business of the House, even when I was sorely tempted to do so.

Mr. TILSON. I thank the gentleman personally; he has been helpful rather than obstructive.

Mr. BERGER. I appreciate this remark of the gentleman from Connecticut.

Mr. Speaker, I am a pioneer, as you know.

SOWING THE SEED—FUTURE GENERATIONS WILL HARVEST

And remember, ladies and gentlemen, the lot of the pioneer is always a hard lot, no matter which the line or what the field. Whether a man goes out into the primeval forest to blaze a path for civilization and build a home for his family, whether a man finds new facts for science and medicine, the pioneer always has to overcome immense difficulties. And especially in new lines of thought one has to combat tradition, prejudice, ill will, misunderstanding, hatred, and a thousand other obstacles.

Nowhere is this more evident than in the realm of law and politics, where usually old-established economic interests and social prerogatives are well intrenched. After all, however, this pioneering work must be done in every line by somebody, or else humanity would come to a standstill. We Socialists are simply sowing the seed for future generations to harvest.

Even in my lifetime I have seen many an idea which we Socialists have originated, and which was denounced at first as anarchistic, un-American, and dangerous, become a part of the law of this country—Federal as well as State and municipal.

To interpret the Socialist position, I have introduced a number of bills in this House, some of which I shall discuss in the short time allotted to me.

SOCIALISTS ARE OPPOSED TO ANY VIOLENT REVOLUTION

These bills will give you, ladies and gentlemen, and also the people of the country, some idea of our hopes, fears, and ambitions.

These bills in themselves ought to set at rest any speculation caused in the average man by the fear of the unknown.

All I can do is to introduce bills that show what the Socialists would do as a party if they had the power. These measures, and many others like them, will sooner or later become the law of the land, if we are to avoid a social explosion like the one in France at the end of the eighteenth century, which cost Europe 5,000,000 lives. Or the one in Russia 10 years ago, which has cost, according to some figures, about 2,000,000 lives, and is still far from being finished.

Now, we Socialists are opposed to any violent revolution.

And I especially do not want any because I am convinced that a violent revolution would probably take on a worse aspect in this country than anywhere else. Anything bad in our country is done more thoroughly, you know.

Now, as to a few of the bills which I have introduced this session.

FEDERAL AID TO REDUCE ILLITERACY

Mr. Speaker, ladies and gentlemen, on January 30, this year, I introduced a measure proposing Federal aid to the various States for the purpose of reducing illiteracy.

The bill provides that the Federal Government appropriate $2,000,000 annually for the next six years—that appropriation to be apportioned among the various States in proportion to their percentage of illiteracy, but subject to the requirement that each State appropriate a similar amount.

The United States was one of the first nations to make an elementary school education generally available. It is therefore unfortunate that our great and rich country should now be trailing other and poorer nations which started later than we did.

Mr. FLETCHER. The gentleman says we are lagging behind other countries.

Mr. BERGER. Yes; in comparison with other countries.

Mr. FLETCHER. By illiteracy, the gentleman means those who can not read or write?

Mr. BERGER. Yes, sir.

Out of every 100 Americans over 10 years of age, 6 are unable to read or write their names, according to the Federal Census.

RICHEST NATION COULD WELL AFFORD TO BECOME MOST LITERATE

We have a larger percentage of illiterates than France, England, Wales, Scotland, Sweden, Norway, Netherlands, Switzerland, Denmark, or Germany.

Germany, for example, has practically no illiteracy—the percentage being 0.03 per cent. In the United States the percentage of illiteracy is 7.7 per cent.

Our 5,000,000 adult illiterates are just about equal to the total population of the continent of Australia.

And the percentage of illiteracy, according to the Census Bureau, for native whites of native white parentage is decidedly higher than for native whites of foreign or mixed parentage.

All of that is not only unfortunate, but it is also unnecessary.

We claim—and rightly so—to be the richest nation on earth. We can very well afford also to make it the most literate.

ILLITERACY BEGETS TYRANNY AND MOB RULE

The menace of illiteracy is especially threatening in a democracy, where so much depends upon the people's ability to read and write.

We may assume that the communist régime would not have made the headway in Russia, and Fascism would not have taken root in Italy and replaced democracy, if there had not been so much illiteracy in those two countries. And in the degree that illiteracy will disappear, democracy will assert itself.

And as to our own country—where illiteracy is greatest, as in the South—such groups as the Ku-Klux Klan and other mob movements, are able to get their start and even make headway for a while.

ONLY OBLIGATION OF STATE TO PAY EQUAL SUM TO THE FEDERAL GOVERNMENT

Even the most faithful adherent of State rights need not fear to support this bill.

My proposal does not shift the problem from the State to the Federal Government. Nor does it deprive States of any of the rights they now have. In my bill education still remains a State matter.

The State still continues to have full control and every right, as in the past. All that I propose to do in this bill is to encourage the States to increase and improve their educational facilities, and thereby reduce illiteracy.

By acquiring the benefits of the Federal appropriation the States only assume the obligation to pay an equal sum with the Federal Government for the abolishing of illiteracy. The States will thereby benefit and the Nation will benefit.

NEWSPAPERS EXPRESSED GENERAL APPROVAL

Congress has set a precedent for this by making Federal appropriations for good roads. And everyone will agree that abolishing illiteracy is worth at least as much to the Federal Government and to the Nation as good roads. And the cost of the plan under my bill is surely not prohibitive. It is rather moderate.

I might add that the comment which the bill caused in the press all over the country shows a general approval of this measure.

So much for this.

A BILL TO GUARANTEE FREE SPEECH

Mr. Speaker, ladies and gentlemen, a bill "to put teeth" into the first amendment to the Constitution by passing an enforcement act was introduced in the House by me on February 14 last. This measure makes it a Federal offense to violate the provisions guaranteeing freedom of speech, of the press, and of orderly assembly. It makes violations of the first amendment a felony punishable by two years' imprisonment or by a fine of $5,000, or both.

Much is being said about "putting teeth" into the eighteenth amendment—the prohibition amendment. Putting teeth into the eighteenth amendment has become a favorite phrase of the Anti-Saloon League ever since the "dry" amendment was adopted.

It has never been suggested by any group of these "whisky reformers," however, to put teeth into the first amendment to our Constitution, which is much older and certainly much more important.

JEFFERSON AND HAMILTON BELIEVED AMENDMENT MOST ESSENTIAL

Thomas Jefferson and Alexander Hamilton did not agree on many things. Thomas Jefferson and Alexander Hamilton, nevertheless, agreed that the first amendment, which guarantees the right to speak freely, write freely, and peaceably to assemble, was the most important amendment of our Constitution.

All thinking people believe with Thomas Jefferson and Alexander Hamilton that the first amendment—guaranteeing free speech and a free press—is most essential to the preservation of the fundamental rights of Americans.

FIRST AMENDMENT STANDS FOR FREEDOM

This amendment is also remarkable as being one of the few provisions of the Constitution which, instead of limiting liberty, extends it. For instance, the eighteenth amendment undoubtedly restricts personal liberty, which the first amendment undoubtedly extends.

Moreover, I believe that the first amendment can be enforced fully, because it means freedom; while the eighteenth amendment can never be enforced entirely, because it forbids freedom.

WE HAVE DIFFERENT KINDS OF AMERICANS NOW

Unfortunately, human liberty meant more to Americans in the eighteenth and nineteenth centuries than to the American to-day.

Certain American business men to-day worship Mussolini, who bragged that he "wipes his feet on liberty," and who abolished the last vestige of democracy in Italy. These same business men find fault with the Russian Communists, however—not because they abolished democracy but because they violated the sacred rights of private property.

Wealthy Americans to-day envy Italy, Spain, and Turkey their dictators. One hears every day business men deploring the fact that Congress is in session, and that the Senate is investigating "big business" and the methods of oil magnates and of the Power Trust.

Some business men even express the wish that Congress would adjourn forever.

A Member of the other House who represents big business made the pious statement not long ago that if he were dictator one of the first things he would do would be to abolish the Federal Trade Commission and the Interstate Commerce Commission. Why? Because they occasionally expose the corrupting influences of big business.

BUT THEY WOULD JAIL THOMAS JEFFERSON

We hear a great deal of Americanism and Americanizing, of course. There is much lip service paid to our Constitution. Capitalist newspapers give prizes for the best essays on the Constitution. But the most important parts of that Constitution are now dead letters—and are to remain so, as far as these newspapers are concerned.

Americanism now means that children and immigrants must learn how to salute the flag.

And patriotism to-day means military display—Navy Day, Defense Day, Flag Day.

And democracy, if it means anything at all, means jobs for "deserving Democrats"—and the hope that Al Smith will get a chance to shake the "plum tree." [Laughter.]

If Thomas Jefferson would arise from his grave to-day, the Democratic statesmen of the South would put him in jail immediately as a dangerous radical. [Applause and laughter.] Jefferson said that violent revolutions are needed every 25 years to preserve liberty. [Laughter.]

CONDITIONS IN RUSSIA, ITALY, PENNSYLVANIA, AND COLORADO

There can be no question that the right of the people to speak freely, write freely, and to have the right to assemble for the purpose of discussing their grievances lie at the basis of all other rights.

But free speech has become next to impossible in our country, especially whenever strikes and economic problems are in question.

Everywhere in the civilized world strikes are now recognized to be the leading economic weapon of the working class—except in Russia, Italy, Pennsylvania, and Colorado. [Laughter.]

CHURCH HYMNS CONSIDERED REVOLUTIONARY IN PENNSYLVANIA

Even the right to worship has been denied in Pennsylvania.

Judges disposed to do the bidding of the mine owners in Pennsylvania have not only enjoined the strikers from congregating, from holding meetings, from speaking to each other, but in one instance the injunction even provides that the men and their families shall not gather at the church to sing religious hymns, because the company complained that the singing of these hymns inflames the strikers.

The same judge has even forbidden the strikers, most of whom are actually starving and homeless, from receiving any kind of aid from others, thus sentencing thousands of miners and their families to starvation.

NOT AS WELL ORGANIZED AS IN WESTERN EUROPE

Mr. Speaker, have the American people lost their faith in democratic institutions? There seems to be less concern in our country about the loss of civil liberties than in any western European country. There is surely less resistance among our folks against Federal, State, and local tyranny. We have truly become a docile people.

The trouble is that our American working class, apart from the farmers, is mostly made up of aliens and semialiens.

Furthermore, it is made up of all kinds of nationalities, races, and religions, who have little love for each other and little coherence with each other. Certain employers play upon these animosities. These are the reasons why the American proletariat is the most poorly organized of any working class of any civilized western European country.

SO HAPPY WITH "BREAD AND GAMES"

Owing to the colonial conditions that still prevail to a certain extent—the standard of living is higher in America than in Europe and the living conditions are undoubtedly easier—especially since the war has turned most of Europe into a poorhouse. That explains the psychology of being "satisfied with anything at all" of the immigrant worker.

Nevertheless, even the native American is satisfied if he has enough to eat, can go to a "movie" and see a game of baseball or a prize fight occasionally. If, on top of all that, he is permitted to have a cheap automobile and a little "radio" on monthly payments, and in some places a little home brew, then the goal of his wishes has been reached.

The slogan in our country to-day, like in Rome of antiquity, seems to be "Panem et circenses," bread and games. But in old Rome bread and games were furnished free; here the populace must work for bread and pay admission whenever they want to see a game.

AND REVERE THE DAUGHTERS OF THE AMERICAN REVOLUTION

Mr. Speaker, we have all but stopped immigration, even immigration from Germany, England, and the western countries of Europe, where people on the whole have a high average education.

We are trying now to mold them all into one form, which we proudly call the American mold.

All are to think alike and to speak alike and to act alike. All are to believe that the present social, political, and economic order is the best that the world has ever produced or ever can produce, and that our Constitution, which was patched up nineteen times, is the most perfect and the most sacred document ever received by man since the decalogue.

And we are teaching the young people in the public schools to salute the flag and to revere the Daughters of the American Revolution [laughter] and to believe that if anybody wants cheaper electric service he is a bolshevik. [Laughter.]

SUPERPOWER SYSTEM IS SUPERIMPORTANT

Mr. Speaker, ladies, and gentlemen, on April 30, 1928, I offered a bill providing for a national public superpower system.

The bill contains features for the conservation of the Nation's natural resources—the coordination of irrigation and flood control, navigation, and hydroelectric power production—the enlargement and expansion of the Reclamation Service in the field of agriculture—and also Federal aid to States, counties, districts, cities, townships, and other political subdivisions in the development of a superpower system, with service at cost.

SOCIALISTS WARNING TO PREDATORY WEALTH

In proposing public ownership and public control of superpower the Socialist Party and the Socialists in general are the most conservative and genuinely conserving force at work in our Nation to-day.

And let me warn you that the predatory interests, and especially those that are now in the Power Trust, are doing all they can to bring about a violent revolution, in which they will undoubtedly suffer the fate of the tyrants of previous epochs and be wiped out entirely, probably with their wives and children. Not only to benefit all the people to-day, but also to prevent a fearful catastrophe, we Socialists are suggesting the taking of steps that will allow for a peaceable and orderly change.

HE FROM WHOM "OIL" BLESSINGS FLOW

John D. Rockefeller, jr., has just admonished the big oil magnates—connected with Teapot and oily "jack pots"—to be honest. This gesture of piety must have impressed some people. Do you know why he asked Col. Robert W. Stewart to resign as chairman of the board of the Standard Oil Co. of Indiana?

Colonel Stewart revealed in his testimony before the Senate committee that $759,500 of the bonds of the Continental Trading Co., which company netted a profit of $3,000,000, he put to his personal account in the bank.

Stealing from the Government is one thing, but grabbing from the Standard Oil is another. We must draw a line somewhere. Is it any wonder that John D., jr., became indignant to the point of demanding honesty in "big business"?

Moreover, after a man is a multimillionaire it pays him to preach honesty so that people will respect his ownership and should not by wicked means try to get his wealth away from him. [Laughter.]

There can be no doubt, however, that the superpower lobby and the interests it represents constitutes to-day one of the most corrupting influences in the United States.

THE CORRUPTING INFLUENCE OF THE SUPERPOWER UTILITY COMPANIES

The Federal Trade Commission during recent weeks has been piling up a mass of documentary evidence and direct testimony which proves that the utilities industries are engaged in a campaign of propaganda and corruption of enormous proportions. The object is to influence public thought and legislation against public ownership in any form, against Federal legislation, and specifically against the Boulder Dam and Muscle Shoals bills.

During the war we have become familiar with many forms of propaganda, but the superpublicity experts employed by power companies have improved upon the system and brought it to a state of perfection. [Applause.]

Pinning the bolshevist label on opponents and undertaking to censor school textbooks are samples of this high-power efficiency.

Mr. FLETCHER. Is Dr. Frank Bohn a member of the Socialist Party?

Mr. BERGER. He was, but he left the socialists during the war. During the war Bohn was in charge of the American spy system in Switzerland—in charge of our so-called secret information service in Geneva.

Mr. FLETCHER. Was he associated with "Big Bill" Haywood?

Mr. BERGER. I do not think he was, but it is possible. Bohn was a socialist, and Bill Haywood was an I. W. W. You know occasionally a black sheep will get into any party, but the socialists kick them out.

Facts in the Power Trust case are as follows:

WILL BECOME EITHER THE SLAVE OR THE OVERLORD OF NATION

The next phase of civilization will be based upon the general use of electric power. The home as well as the factory and the farm will be dependent upon the general extension of this power. If this superpower is wisely controlled for the benefit of all the people, it will become the slave of the Nation.

If it is not publicly controlled, but left in the hands of a few overlords to be used for their greed and profit, that power is bound to enslave humanity.

CONCENTRATION RAPIDLY PROCEEDING

To-day five companies control almost one-half of all the electric power used in America. About 20 concerns control more than four-fifths of all the electric energy in our country.

This concentration of control has brought with it large and increasing profits to those on the inside who have control. In 1922, for instance, the profits of the electric industry were $338,400,000. In 1926 these profits rose to $587,400,000, which means an increase of more than $250,000,000 in three years.

GREATEST LOBBY EVER ORGANIZED

And hand in hand with this concentration goes the corrupting influence of this octopus. Not only Congress but State and city legislative bodies feel now the presence of this lobby.

It has been well characterized in Congress as the greatest lobby ever organized in this country—and its spokesmen boast that it represents $18,000,000,000.

OCTOPUS BUYS UP PROFESSORS AND HIRES AND FIRES TEACHERS

College professors are getting Electric Trust "retainers" to preach against public ownership and to boost the "advantages" of private operation. Servile colleges get big donations as a reward.

The Federal Trade Commission reports that the managing director of the National Electric Light Association recommended to the trust—that it not only hire and bribe university professors, which it did—but also use all other means to discharge teachers and to remove textbooks that the trust did not want.

This was accomplished in a number of States.

HOW THE POWER TRUST "TAKES CARE" OF ITS FRIENDS

About a year ago Mr. Insull, of Chicago, contributed $200,000 to the senatorial campaign of the chairman of the Illinois Public Service Commission and also a neat little sum to the fund of his Democratic opponent, who happened to be the Democratic boss of Illinois.

In 1922 the electric interests on the Pacific coast acknowledged the expenditure of more than $500,000 to defeat the water and power act of California.

Recent investigations brought out incredible conditions in that respect.

Newspapers and preachers were subsidized, and two former governors and two former United States Senators are among the men retained to help the Power Trust get what the trust wants and keep what the trust has. The trust has spent millions and is ready and willing to spend millions more.

Whenever it is necessary and whenever the agents of the Power Trust think it advisable they not only dine and wine members of legislative bodies, but these agents of the octopus assure such legislators that they "will be taken care of" when they retire to private life.

EVERY ONE OF US HELPS TO PAY THESE WAGES OF SIN

Nevertheless the question has been asked not only by Socialists but even by capitalist papers not yet in the ring of the power companies:

In the last analysis, who is it that contributes the $1,144,000 being spent this year by the National Electric Light Association for propaganda and "educational" purposes?

Why, it is you and I and everyone else who turns on an electric light to read or plugs in an electric iron to press a frock. [Applause.]

All the money comes out of the rates collected from the household consumers of the country. The National Electric Light Association gets a portion of the gross receipts of each electric-light company which records the contribution as an operating expense.

Each of us is thus taxed by a monopoly to provide funds used against us by a propaganda and lobby organization that buys professors, corrupts newspapers, and "influences" legislators. [Applause.]

Of course they want to control "public opinion." It means many millions of dollars every year to them. And we, the consumers, must hand them the money used to corrupt and control public opinion as they choose.

PUBLIC OWNERSHIP

The only way to bring a halt to this menace of wholesale corruption and grand thievery is to adopt the principle of public ownership. Public ownership is not bolshevism, of course.

Public ownership means simplicity of organization, no stock-selling propaganda, and no corruption. It means more than this.

WHAT PUBLIC OWNERSHIP MEANS

It means electricity at home at the cheapest possible price and at the lowest rates. It means the revolutionizing of our industrial life. It means the revolutionizing of our transportation. It means an abundant supply of electric current for every city. It means the revolutionizing of agriculture not only by

cheap fertilizer but by its use for all kinds of work, and especially burdensome work, on the farm, because a 10-horsepower motor is equivalent to the power of 2 teams of 2 horses each and 10 men. It means the conservation of coal, oil, and gas. And it also means the coordination of flood control, irrigation, and navigation and hydroelectric power by the development of our great waterways.

COMPARE RATES IN CANADA WITH RATES IN UNITED STATES

We have before us a most conspicuous example of such public control, even on a comparatively small scale, the case of Ontario, Canada.

Despite the fortune spent by the Power Trust to discredit the efficient example of that Canadian Province, we know that Ontario, starting on a very small scale 20 years ago, to-day owns numerous great generating plants along the Canadian border and is cooperating with 380 municipalities to supply electricity at cost.

From charges ranging from 7 cents per kilowatt under private ownership—the rates have been reduced until in 1926 the average price for domestic users throughout the Province of Ontario was only 1.8 cents per kilowatt—that is, less than 2 cents per kilowatt.

And even this low charge permits the retiring of the bonds issued by the Hydroelectric Power Commission within 40 years.

SAVE OUR COUNTRY FROM BONDAGE

In the United States we permit private companies to whom we have given most of our resources to charge exorbitant rates for the benefit of private bond and stockholders. To judge from the example of Ontario, the profits must be exorbitant. [Applause.]

We can still save future generations from bondage by enacting the bill I have introduced for the public ownership of super power. If you do not adopt this measure, or a similar one in the near future, you are courting grave trouble.

AS TO THE DAWES SCHEME

Mr. Speaker, ladies, and gentlemen, to-day I have introduced a resolution authorizing and directing President Coolidge to call an international conference for the purpose of revising the so-called reparation terms, the Dawes plan, and the provisions of that pact of hate, the Versailles Treaty.

I have done so because I am convinced that a European economic crisis which will also affect the United States will be precipitated shortly when the larger of the reparation sums under the Dawes plan will have to be paid by Germany.

THE FIRST TEST IS NEAR

On September 1, 1928, within less than three months, the Dawes scheme will be subjected to its first test. On that day Germany will have to make a payment of about $625,000,000. It is clear from the most superficial study of European conditions and of Germany's finances that Germany will not be able to meet this obligation.

It will be the first test because the money that Germany has paid each year since the Dawes plan became effective was paid out of loans made by Germany in foreign countries, mainly in America. This, obviously, can not go on forever.

Germany can not go on paying debts by making more debts.

CAPITALIST AND NATIONALIST FOLLY

The only way by which Germany could pay any reparations at all, as a former English chancellor of the exchequer pointed out, would be by having a surplus of exports over imports. At the present time Germany imports $300,000,000 more than she exports. In order to pay reparations at all she would have to change the import surplus of $300,000,000 to an export surplus of $625.000,000.

That is plainly impossible. And if it were possible, it would mean flooding the British and American markets with cheaply made German goods, which would put so many people out of work that it would create a revolution in England and hard times in America—in spite of our high tariff.

As it is, Great Britain, France, and America are making the German people work longer hours and accept a lower standard of living than ever before. Capitalistic and nationalistic folly—and capitalistic and nationalistic greed—are defeating their own ends.

OUR FARMERS ARE MUCH INTERESTED

At the conference which I propose that the President should call it will be necessary to consider not only the Dawes plan and the immediate disaster that faces Europe but the entire subject of reparations and the Versailles treaty—since these things can not be divorced.

Americans, and especially our farmers, are very much concerned in this central European market—over $2,000,000,000 annually. Our farmers have lost this very desirable market through the war and are regaining it very slowly. [Applause.]

The facts in the case are as follows:

GERMANS WERE DECEIVED

On November 5, 1918, the allied governments declared that they were willing to make peace with Germany on the terms laid down by President Wilson in his various declarations, especially the so-called 14 points.

It was upon this understanding that Germany laid down her arms. And in this understanding there was no intention of Germany paying any indemnity at all. President Wilson said, "There shall be no contributions, no punitive indemnities."

It has been estimated by British experts that $10,000,000,000 would cover all the damage done in France and Belgium.

VICTORS WERE RULED BY HATE ONLY

The American delegation did try to place the reparation claims at a reasonable figure, but Lloyd-George, a demagogue, and Clemenceau, the incarnation of hate, demanded fantastic sums.

It was always clear that Germany could pay only by exports; that she could not export without importing raw materials; and that she had no money with which to buy raw materials.

Moreover, it was clear that if Germany exported enough to pay an indemnity she would compete with England, and England would be in even greater economic distress.

It is hardly necessary to mention the French invasion of the Ruhr, which was simply an outburst of French nationalist hatred. It did not achieve its purpose, which was to separate the Rhineland from Germany. But the unlimited issuance of paper money to assist the striking workers of the Ruhr—who struck against the French annexationist schemes—brought chaos into German finance and German economics.

In order to find a way out the Dawes scheme, so-called, was introduced.

WHAT THE PLAN PROVIDED

The plan, which the American international bankers had devised to accomplish the impossible—to squeeze blood out of the bloodless German turnip—was adopted in January, 1924.

The Dawes plan did not fix the amount Germany was to pay. But it provided, first, for the restoration of German economic unity by having the French leave the Ruhr; second, for a loan of $200,000,000 to Germany; third, a partial moratorium for four years, during which Germany would pay sums ranging from $250,000,000 to $450,000,000 annually; and fourth, that Germany pledge certain revenues and her railroads and telegraphs as security.

This plan was never expected to last for any length of time, of course. And the Dawes scheme will break down—just as it was intended that it should.

AMERICA MUST TRY TO UNDO SOME OF THE DAMAGE DONE

Germany has by this time anyway paid nearly 10 times as much as she should have paid.

The Versailles treaty, the reparations, and the Dawes plan which followed, all rest upon the infamous lie that Germany alone was guilty of provoking the World War. The Dawes plan must be dropped and the indemnities refused.

France, which is extremely prosperous, but who declines to pay her just debts, must be shown her place in the world—for the good of the world.

America did not sign the Versailles treaty, but we are the leading nation, economically and politically. Having misled the Germans by Wilson's fourteen points, and having helped bring on the era of political insanity and economic chaos in Germany by entering the war we should now also help to undo, at least to some extent, the damage we have done.

So much for the Dawes scheme.

A BILL TO INCREASE COMPENSATION OF TOTALLY DISABLED VETERANS

Mr. Speaker, ladies and gentlemen, veterans of the World War who have been totally disabled as a result of their military service will have their compensation increased under the terms of a bill introduced by me on May 9.

Compensation for those totally incapacitated for any work is raised from $100 to $150 per month, while veterans who are totally blind get an increase from $150 to $250 per month. Loss of both eyes and one or more limbs entitle a veteran, under the terms of my bill, to $300 per month.

THIS CAN NOT EVEN BE TERMED GENEROSITY

Although the World War was the result of European capitalistic and nationalistic rivalries and hatreds—and we were dragged into the bloody mess by a lying propaganda unparalleled in the history of the world—and although none of the pretexts of those who dragged us into it have been achieved—the men who went into the slaughter, went there believing that they defended our country. And, therefore, when they came out with eyes and limbs gone they can never be compensated sufficiently. The least that we can do is pay them enough to keep them secure against want.

Generosity—if that is what it is to be called—is all the more justified when it is recalled that these men, with very few exceptions, did not go voluntarily. They went because the law said they had to go. More than 90 per cent of the American Expeditionary Forces were chased across the ocean obeying laws with the making of which they had nothing to do.

As a matter of fact, many had just voted Wilson into office because "He kept us out of war."

We must remember that neither the propaganda of the years preceding the war, nor all the horrible stories of German atrocities, nor all the high-sounding phrases about fighting to preserve democracy—really impressed our young men sufficiently to make them rush to the recruiting stations when war was declared. Officers in charge of recruiting stations reported immediately after the declaration of war that there were very few volunteers. In this respect, also, the late war differed from the American Civil War, when over 90 per cent of the soldiers were volunteers.

Our men were conscripted and sent to France. That is, if they were poor. If they were rich—many were commissioned in the naval reserve, or given swivel-chair jobs in Washington.

WAR PROFITEERS OUGHT TO BE TAXED TO PAY TO WAR VICTIMS

Convinced as I am that we committed a crime against our people and against the white race when we permitted our international bankers and munition makers to plunge us into the World War—I am equally convinced that the 23,000 millionaires the war created can afford to pay, and should be made to pay, along with all other profiteers, the minimum requirements of those who have been disabled for life—the victims of the war.

This bill ought to be passed without delay.

Mr. TILSON. The gentleman's bill is founded on disability and not on rank?

Mr. BERGER. Of course; I am a Socialist, you know.

Mr. TILSON. I am a Socialist to that extent.

Mr. BERGER. The gentleman is more of a Socialist than he knows.

MY ANTILYNCHING BILL

Mr. Speaker, ladies and gentlemen, in a bill I introduced on April 12, this year, I proposed that the Federal Government take drastic steps to abolish lynchings by having the Federal Government prosecute civilians and officials who have any part in lynchings.

Any citizen who joins a lynching party would be liable to five years imprisonment and a $5,000 fine. Police officials whose duty it is to protect individuals in accordance with the laws, and who fail to take the necessary precautions to protect them against mob attacks, would be liable to twice that penalty.

Communities in which lynchings occur would forfeit $10,000 for each lynching taking place in those communities.

REPUBLICAN PROMISES AND REPUBLICAN PERFORMANCES

Four years have passed since the Republican Party pledged itself, in its national platform, to the enactment "at the earliest possible date of a Federal antilynching law so that the full influence of the Federal Government may be wielded to exterminate this crime."

During those four years 79 persons were killed by lawless mobs, while the Republican Party, which had made this platform pledge, and which had a majority in both Houses of Congress to carry out its other policies beneficial to special interest groups, failed to keep its promise to outlaw lynchings.

This betrayal of those whose votes the Republican leaders obtained by making this platform pledge is an encouragement to lawless communities to continue the barbarous practice.

In 1927, 16 people, entitled to the protection of our laws, were lynched, 7 of them in the State of Mississippi alone, which State holds the record for the year.

DEMOCRATS THINK LYNCHING IS A "STATE RIGHT"

The first duty of a government is to maintain the authority of its laws over the territory it governs. That duty our Government has failed to perform.

I hope that the Seventieth Congress will not conclude its work until the majority party—the Republicans—enact a Federal antilynching law. I make this appeal to the Republicans, because the Democrats here seem to insist that the right to lynch a person is a State privilege [laughter], and that any Federal legislation seeking to abolish that valuable privilege is an encroachment on State rights. [Laughter.]

The Democrats do not think it is an encroachment on the rights of States to have a Federal prohibition agent come snooping around your home to find out whether you take a drink. So far the Federal Government may go, according to the claims of my Democratic friends. But to have Federal agents come into a State to punish lawlessness which deprives people of their life and limb without a trial or a hearing—that, say the Democrats, is an invasion of State rights.

Mr. FLETCHER. The gentleman does not mean all Democrats?

Mr. BERGER. I do not mean all of them. There are some very fine and noble Democrats, as there are fine and noble Republicans. Only they have not yet seen the light.

CONGRESS MUST DEFEND ITS OWN LAW

It is not only the duty of Congress but also clearly within the power of Congress to enact this legislation.

In the fifth section of the fourteenth amendment Congress is given the power to enforce constitutional guaranties, and that power is broad enough to authorize the enactment of the bill I propose.

NOT STRONGER THAN SITUATION REQUIRES

My bill is stronger than any other antilynching bill that has been proposed. There are teeth in it. It is not any stronger, however, than the exigencies of the situation require—or the menace with which it is intended to deal would justify.

TELEPHONE AND TELEGRAPH ACTUALLY A MONOPOLY

Mr. Speaker, ladies and gentlemen, recent investigations have confirmed the impression that has prevailed for a long while that the American Telephone & Telegraph Co. has destroyed practically all competition in the telephone business, dominates the field in which it operates, and is piling up tremendous profits, not only directly from its income for services, but in a dozen other ways less generally known.

I believe that when a monopoly reaches the stage where no competition can prevail against it, it ought to be acquired by the Government and operated in the interest of all the people—and not left in possession of a little group.

I therefore introduced a bill on January 23, 1928, providing for the national acquisition and Government operation of telegraph and telephone lines.

COMPELS MANY PEOPLE TO PAY TOLL

The American Telephone & Telegraph Co. does 72 per cent of the telephone business of the United States. It dominates the rest. It is supposed to be the richest corporation in the world.

Through its control of the Western Electric Co., of which it owns 98 per cent of the stock, and from which all other telephone companies are obliged to purchase telephone apparatus on a cost-plus basis—the telephone trust exacts tribute from the American people. The tribute is paid from the time the apparatus is made, down to the time the telephone user is compelled to pay the rate for the service he gets.

PRIVATE MONOPOLY CHARGES AS HIGH AS FOUR TIMES AS MUCH AS PUBLICLY OWNED INSTITUTION

Practically every important nation in the world, excepting the United States, owns and operates its telephone and telegraph system in connection with the postal department. Practically every Postmaster General of the United States (since the telegraph was invented) has pointed out the advantages that would result from its Government ownership and operation. At 17 different times committees of Congress have investigated this matter, and in every case have concluded that public ownership was desirable and have recommended such action.

In spite of all this, the Telephone Trust, with the publicity and propaganda created by the fortune it has made through fleecing both the public and its employees, has been able to hold on to a monopoly.

The investigations that have been made of the system of public operation now almost universally adopted, show telegraph rates under private ownership are from two to four times as high as in countries under public ownership. Long-distance telephone rates are from three to seven times higher.

Our telegraph rates run from 25 cents to $1 and over per message. Where the systems are publicly owned they cost from 10 cents to 24 cents for the same messages.

EVEN WORSE IN CASE OF TELEPHONE RATES

The contrast in telephone rates is even more striking. For 100 miles we pay three times, for 300 miles five times, and for 400 miles six times, and for 700 miles eight times as much as the rate under public ownership for the usual three-minute conversation.

In other countries under public ownership, the rates are about 1 cent a call on the average. In our country, under private ownership, the local rate averages more than 5 cents per call.

Thus, we find that our rates for electrical communication average, in the case of the telegraph, two to four times—in the case of the long-distance telephone, three to seven times—and, in the case of the local telephone, two to four times—the rate for

such service where the wire systems are publicly owned and operated, as they should be in this country, as a part of the postal system.

IMMENSE SAVINGS UNDER PUBLIC OWNERSHIP

Public ownership will have three important advantages, each of which will benefit not a special group but the entire Nation.

In the first place, it would result in important economies which can not be effected under private ownership.

Instead of having several systems of wires, exchanges, and equipment, one system would be sufficient to take care of both the telegraph and telephone service. The telephone wires and other equipment are sufficient to handle the telegraph service at the same time, thus avoiding the tremendous loss resulting from duplication.

Theodore N. Vail, the late president of the Western Union, made the statement that the gross reduction of charges that would be made possible by joint use of the wire systems would be from 2 to 25 per cent. This would mean a possible saving of $50,000,000 a year.

WOULD BE DOING AWAY WITH DUPLICATION

Public ownership would do away with the operation of 25 private companies doing a commercial business in the United States. Two of these companies duplicate their agencies in more than half of the country—the Western Union and the Postal Telegraph.

In most places, you have probably observed that one company maintains an office a few doors away from the other. Why this duplication? Whom does it benefit? And who pays the cost for this waste of men and materials? The public.

While there is an enormous waste resulting from this duplication where there is much telegraph business, in many places where service is needed occasionally but business is not plentiful, there is no service at all. Neither the Western Union nor the Postal Telegraph will open a branch in those places.

Thus private companies develop the overpaying territory and neglect the territory where business is rarer.

The Government, which even in 1922 already had 52,000 post offices, could use those offices also for telegraph stations. Every community in the country would thus be assured telegraph service. The saving that could be effected from the present duplication in the busy districts would more than cover the cost of the extension of the service to the entire Nation.

COMPARE POSTAL SERVICE WITH TELEPHONE SERVICE

Not only is Government operation bound to be more economical but it will also be more efficient. In 1912 the United States ranked second among all the nations in the matter of postal efficiency—a remarkable tribute to the greatest enterprise upon which our country is engaged.

In the matter of telephone service the United States ranked ninth.

The success of the parcel post also confirms the view that Government service is more efficient, as well as more economical, than private enterprise.

EMPLOYEES WOULD REAP GREATEST BENEFITS

All the people, and especially the small business man, would benefit from public ownership. But the workers engaged in the industry would gain the most. The Government would not spend money for spying in order to prevent them from joining a trade-union. The Government would give them decent wages and decent working conditions.

They get neither now.

FOR SAKE OF ECONOMY, EFFICIENCY, AND HONESTY

Regulation has failed to deal with this problem.

Regulation did stimulate corruption. Regulation always fails when big business and Government officials get together to settle matters that concern millions—hundreds of millions—of dollars.

For the sake of efficiency, for the sake of economy, and for the sake of honesty let us make the telegraph and telephone system part of our Postal Service. [Applause.]

TO PROTECT MINORITIES IN RUMANIA

Mr. Speaker, ladies, and gentlemen, on March 26, this year, I offered a resolution providing that treaty relations between the United States and Rumania be terminated because of Rumania's persecution of racial and religious minorities.

The atrocities to which the resolution referred were perpetrated in Rumania on various minorities—including Catholics, Lutherans, Baptists, Jews, Germans, and Magyars—and they were perpetrated with such brutality as to justify reading Rumania out of the family of civilized nations.

INCREASED RUMANIAN TERRITORY

The cruelties and brutalities practiced by the so-called "successor" countries of Europe, especially Rumania, again disclose how foolishly we acted when we poured out life and treasure on the European battle fields in order to make possible the existence of these nations.

As a result of our sacrifices, Rumania increased her territory from 53,000 square miles to 123,000 square miles, and acquired jurisdiction of 18,000,000 people in place of the 8,000,000 she ruled before.

SMALL SIZE OF A COUNTRY NO EXCUSE FOR GREAT DEPRAVITY

The United States, being largely responsible for bringing these minorities under her power, owes them the duty to protect them against the atrocities of that semicivilized, medieval government. The fact that Rumania is smaller than some of the other nations gives her no right to sink below the standard of all civilized countries.

WE ABROGATED TREATY WITH CZAR IN 1912

In 1911 our Congress voted to terminate treaty relations with Russia, because the United States did not want to be a party to a treaty with any Government that discriminates between American citizens on the ground of their religious views. That decision was largely the result of the persecution to which the Russian Czar subjected religious and racial minorities.

The time has come when Rumania must be made to realize that it can not revert to a state of barbarism without incurring the contempt of other nations.

RUMANIA MUST REALIZE THIS IS TWENTIETH CENTURY

A severance of treaty relations seems to me to constitute the most effective step short of war that we can take to discharge the obligation we owe the persecuted minorities.

That ought to make Rumania realize that this is the twentieth century.

FOR FOREST RESERVE IN EACH STATE

Mr. Speaker, ladies, and gentlemen, in order to adopt a comprehensive policy of reforestation, the effect of which would be, first, to reduce the dangers of disastrous floods and, second, to replenish the timber resources of our country, I introduced, on April 2, this year, a bill providing for the establishment of a national forest reserve in each State.

FORESTS BEST BINDERS OF SOIL AND BEST RESERVOIRS OF WATER

The Mississippi flood, with the tremendous toll it has taken of life and property, will not have been a completely unmixed evil if as a result of the huge loss our people would see the need of adopting a national reforestation and conservation policy.

While the danger of floods resulting from heavy, long-continued rains, or the rapid melting of masses of snow, could not altogether be removed by reforestation, it is conceded by all students of the subject that forests are better binders of the soil and better surface reservoirs of water than any other form of vegetation on the face of the earth.

The 160,000,000 acres of actual or potential forest land draining into the Mississippi can render substantial service in the prevention of floods in the valley. And 14,000,000 acres of agricultural soil that are carried away each year as a result of the denuded forests in that region could be preserved by adopting a sound forestation policy.

WE HAVE IMMENSELY REDUCED OUR FOREST LAND

Besides the flood-control advantage of forestation, our denuded forest land tells a vivid and tragic story of the recklessness with which our natural resources have been wasted to enrich a few at the expense of the rest of the people.

Continental United States originally contained 822,000,000 acres of forest land.

We have permitted by expansion of settlements and cultivation, the operation of timber-using resources, and the waste caused by American carelessness as to fires and insect pests, the reduction of this vast area to 138,000,000 acres of forest.

One of the worst features of the situation is the unbalanced geographical distribution of the standing timber that remains, three-fourths of the forest land being located east of Great Plateau.

DO WE WANT A CHINAFIED UNITED STATES?

The remaining softwood saw timber is disappearing eight and one-half times as fast as new growth is replacing it, and our hardwood saw timber is disappearing approximately three and one-half times as fast as it is being replaced.

A Chinafied United States—barren of forests and brooks, but subject to periodic inundations—confront us.

Let us halt the policy of destruction and begin to undo the damage by passing the bill I have introduced.

SO-CALLED "ESPIONAGE ACT" STILL ON STATUTE BOOKS

Mr. Speaker, ladies and gentlemen, I presented to the House, on February 20 this year, a bill providing for the repeal of the so-called "espionage act," which act, in spite of

its name, has nothing to do with espionage. The law was enacted shortly after the United States entered the World War for the purpose of preventing any criticism of the origin or conduct of the war.

The impression prevails that the draconic war law which made it a crime punishable by 20 years in the penitentiary to criticize the war policies of the Wilson administration has been repealed along with all other war measures. That is an error. The so-called espionage act is still on the statute books and is automatically in force the moment our country gets into war with any other.

CITIZEN MIGHT FIND HIMSELF IN PENITENTIARY

The danger of the law would become very real should any administration continue to pursue imperialistic policies in Mexico, Nicaragua, or any other place.

If intervention in some foreign country should ripen into an official declaration of war—a citizen would find himself silenced under penalty of a 20-year penitentiary term if he expressed sentiments not in accord with those of the administration.

DEMOCRATS REVIVED LAW AGAINST WHICH THEY HAD FOUGHT

The so-called espionage act was the most outrageous measure ever passed in our country.

Its nearest approach was the alien and sedition act in 1798, of which it is an almost verbatim copy in many respects. That old act resulted in the wiping-out of the Federalist Party and in the birth of the Democratic Party, as a protest organization against the Federalists. And it is almost tragi-comic that a Democratic administration revived the vicious law.

ONLY DEMOCRATIC VERSION MUCH WORSE

Moreover there is this difference between the espionage law and the law of 1798:

In the alien and sedition act the maximum penalty was a fine of $2,000 and imprisonment for 2 years, while the espionage law provides a penalty of $10,000 fine and 20 years imprisonment. And in the old law the truth of a statement was admitted as a defense, while under the present espionage law the greater the truth the harder the punishment.

NO CITIZEN FOUND GUILTY OF ESPIONAGE

Under the espionage act 2,000 men and women who dared to speak and write the truth as they saw it—a right guaranteed to them by the Constitution—were sentenced to prison terms ranging up to 20 years. Not a single citizen, however, was found guilty of espionage.

NO SUCH ACT IN CIVIL WAR

The law was defended on the ground of war emergency. But Abraham Lincoln waged a war far more vital to the Nation's existence—and with sentiment divided everywhere, including the North—and fought out mainly within 100 miles of Washington—without an espionage act.

THIS IS THE TIME TO REPEAL IT

The only purpose in retaining the law on the statute books is to assure the ruling class that they can plunge this Nation into war whenever the protection of their investments abroad may require it.

Anyone objecting will be put behind bars immediately.

This is the time to demand that the law be repealed.

FOR THE PURPOSE OF CALLING A CONSTITUTIONAL CONVENTION

Mr. Speaker, ladies, and gentlemen, I have proposed an amendment to the Federal Constitution providing that Congress may call a constitutional convention for the purpose of revising our Federal Charter.

WAS A POLITICAL CLOAK TO FIT A BABY NATION

The necessity of rewriting our Constitution must appeal to all who can visualize the tremendous changes—political, economic, and social—which have come over the Nation since the present Constitution was adopted in 1789, and who understand that a constitution that was adequate to the needs of 1789 can no more suit the needs of 1928 than a garment made to fit a child can fit an adult.

IT WAS AN ENTIRELY DIFFERENT COUNTRY

When the present Constitution was adopted a great part of the country was still covered with a vast primeval forest.

The largest city, Philadelphia, had about 30,000 inhabitants. There were only a few towns which had a population of from 2,000 to 5,000.

Manufacturing in the United States was then in its childhood, most of it was in Philadelphia. The use of steam and electricity was unknown.

Corporations in the present sense were unknown; a corporation then meant a city or a township. There were no railroads, no telegraphs, no telephones.

Public schools did not exist, and schools of any kind were few and far between.

THE WISEST OF MEN COULD NOT HAVE FORESEEN PRESENT CONDITIONS

The Constitution made at that time, when the population was 2,500,000, mainly pioneer farmers with a fringe of merchants in the small coast towns, was suited more or less to those conditions.

Even then, however, it was considered by many a miserable piece of patchwork, that had to be amended 10 times before the colonies agreed to ratify it.

But the wisest of men could not have foreseen in 1789, when this was a little frontier country, the political and economic conditions of 1928. No less than 19 patches have been placed on our political cloak, but these patches have failed to make it fit modern conditions.

DESIGNED TO THWART THE WILL OF COMMON HERD

I know that nothing offends and antagonizes the "vested interests" more than a criticism of the Constitution. That has become particularly true since our country embarked upon its imperialistic ventures.

They know that the present Constitution was designed by the wealthy class of that day—the speculators of scrip and big landowners, and their representatives—with a view to preventing the people from exercising their political influence. For many years only those who had a certain amount of wealth could vote.

Only one-sixth of the people had the voting franchise at the time the Constitution was ratified—and most of them did not vote.

The worst features of a monarchy were included in the office of the President, who has more legislative power than two-thirds of both Houses of Congress, besides immense executive and administrative powers.

Everything was designed for the purpose of making it easy to defeat the will of the common people.

OUR CONSTITUTION BROKE DOWN AT EVERY TEST

The defenders of the Constitution—and they include many who do not even know its contents—always attribute this country's rise to power to the Constitution. They claim it stood the test.

If our country has prospered, this was due to our colonial conditions, our virgin soil, our inexhaustible resources, and our immense immigration, which gave to the United States the cheapest and most intelligent labor of the rest of the world. It was not due to our Constitution. And the country did not become great and powerful on account of the Constitution. On the contrary, whenever the Constitution was subjected to a test, as in 1860 and 1917, it failed.

SOCIAL WELFARE LEGISLATION NOW ALMOST IMPOSSIBLE

We must make the Constitution more flexible, so that it can be changed by a majority vote of all the people. We would deny to the Supreme Court power to pass upon the constitutionality of acts of Congress.

We would make possible the enactment of child welfare, minimum wage, and other social welfare legislation, which is almost impossible under the present Constitution.

MY MISSION IN THIS LEGISLATIVE BODY

Mr. Speaker, ladies and gentlemen, I realize that standing alone I can not pass any of this legislation. But as a matter of fact, neither can the Democrats, of whom there are a great many more, pass any legislation they propose. And, for that matter, most of the Republican Members can not.

All I can do is to function as an interpreter. I can try to show to the people, most of whom know absolutely nothing about socialism or socialist theory, what the socialists would do if they had the power.

This function I consider exceedingly useful in view of the economic trend in our country and the rapidly growing concentration of wealth, on one hand, and the decline of the independence of the farmer and the workingman, on the other.

THIS IS NOT DEMOCRACY

Let us think it over. What did it profit to restrict the prerogatives of Kings and the privileges of nobles of the past through long struggles and violent revolutions as long as the privileges of wealth remain intact?

Distributing votes and concentrating wealth did not fulfill the promises of democracy.

A handful of men in our country have the power for weal or for woe—political, financial, social—greater than the power of millions of people combined.

Call this state of things whatever you will, but do not call it democracy. Claim for it what advantage you please, but do not claim that such a "democracy" is advantageous to the masses.

WE MUST SOLVE PROBLEM OF DISTRIBUTION IF REPUBLIC IS TO SURVIVE

The principle which should guide a democratic government—the principle which should guide every honest government—is

the principle of subordinating the individual to the general welfare, and that principle requires a broad application.

If a man is not allowed to steal a loaf of bread from others to satisfy his hunger, then a man ought not to be allowed to steal a million loaves from others and steal them every day to satisfy his greed.

We have solved the problem of production; we must solve the problem of distribution or our civilization will break down.

In short, our present so-called democracy can not defend its very name against the encroachment of plutocracy. And, what is worse, the pseudodemocracy can not defend its very existence on the ground of equity, or morality, or even of expediency—unless it becomes social democracy. Only then a real republic, "res publica," will become possible and will endure. [Applause.]

Mr. KINDRED. Mr. Chairman, will the gentleman yield?

Mr. BERGER. Yes.

Mr. KINDRED. Going back to the gentleman's bill which provides for the federalization of education and the control and supervision of our public-school system, while theoretically the idea appeals to the gentleman, does not the gentleman think that in the last analysis such a standardization and bureaucratization of our public-school system would prove disappointing and mischievous and violative of the rights of the States?

Mr. BERGER. I brought out very plainly that my bill does not require and does not propose to have Federal supervision of education in any way. All we do in my bill is to give the States a certain sum of money which the State must duplicate if it accepts the proposition, and the State is to use it according to its own discretion.

Mr. KINDRED. Does not that bureaucratize the schools?

Mr. BERGER. Suppose New York State gets $500,000 on condition that New York should also spend $500,000 to combat illiteracy in any way New York pleases——

Mr. KINDRED. But when the Government spends money it supervises it and supervises the system of spending it.

Mr. BERGER. It supervises it only to the extent of seeing that New York State puts up the same amount of money. I brought it out plainly that the matter rests with the State entirely.

Mr. KINDRED. But there would be an interfering, would there not?

Mr. BERGER. Not at all, except that we would see to it that the State spent the money for education and not for anything else, as for instance, a capitol building, or any other thing that has nothing to do with education.

Mr. KINDRED. I thought the gentleman was opposed to the whole system of bureaucratization?

Mr. BERGER. As far as I am concerned I believe our national administration is getting top-heavy. I believe there is too much bureaucracy in Washington. Look at the number of bureaus we have. There is a great tendency on the part of bureaus to arrogate power that belongs to the people of the respective States. I agree with the gentleman from New York to that extent. My bill, if adopted, however, would be a blessing, because it would not necessitate the creation of any new bureau but it would stimulate the fight on illiteracy. I believe New York has also quite a number of illiterates.

Mr. KINDRED. Not a very great number.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield?

Mr. BERGER. Yes.

Mr. SCHAFER. During the gentleman's investigation of the Power Trust, and I agree that this investigation is a good thing, did he not find that the North American Co. was a part of the power and utility trust of the country?

Mr. BERGER. Yes.

Mr. SCHAFER. And does not the North American Co. have a great interest in the Milwaukee Electric Railway & Light Co.?

Mr. BERGER. I believe they own it.

Mr. SCHAFER. The gentleman stated that former socialists who were writing for the Power Trust were expelled from the Socialist Party?

Mr. BERGER. They were.

Mr. SCHAFER. Does the gentleman remember that the Milwaukee Electric Railway & Light Co., with the stand-pat papers supporting that company and the leaders of the gentleman's party and the Milwaukee Leader, the Socialist paper, were all of them on the same band wagon on behalf of the "service at cost" proposition?

Mr. BERGER. I do not remember any band wagon, and I am one of the leaders.

Mr. SCHAFER. Did the North American Co. and the Milwaukee Electric Railway & Light Co. turn Socialist when they were advocating the same principles that the Socialist paper and leaders were advocating?

Mr. BERGER. Oh, I am afraid the gentleman does not understand the question. He does not understand what socialism is, else he would not say that the North American Co. would ever advocate socialism.

Mr. SCHAFER. Then we must assume that the Socialists turned over to the Power Trust. They were both advocating the same principle, but were defeated by an overwhelming vote.

Mr. BERGER. The gentleman is a well-meaning man, but when he gets up to speak his logic fails him entirely. [Laughter.] He did not get the meaning of my speech. There is no more possibility of the North American Power Co. and the Milwaukee Railway & Light Co. turning Socialist than there is of the gentleman himself wanting to turn Socialist.

Mr. SCHAFER. How comes it that the gentleman's paper and the Socialist leaders were advocating the same principle as the North American Power Trust and Milwaukee Electric Railway & Light Co?

Mr. BERGER. The gentleman does not know anything about it. He does not know what he is talking about. However, in any event when a corporation has an honest case or an honest cause, the Socialist would have to do justice to that corporation.

Mr. SCHAFER. That is a good answer to offer when you can not explain the unholy alliance between the Socialist Party and the North American Power Trust.

Mr. BERGER. There has never been a holy or unholy alliance on the part of the Socialist Party with the North American Power Trust and the Milwaukee Electric Railway & Light Co. [Applause.]

OKANOGAN IRRIGATION PROJECT

Mr. SMITH. Mr. Speaker, I ask unanimous consent for the present consideration of the bill S. 1661.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

A bill (S. 1661) to authorize the Secretary of the Interior to transfer the Okanogan project, in the State of Washington, to the Okanogan irrigation district upon payment of charges stated.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Reserving the right to object, Mr. Speaker—which I do not expect to do—this is the bill to which I objected once or twice on the Consent Calendar, for the transfer of the Okanogan project. I was very reluctant to see that bill pass, because it might serve as a precedent for others. But there is an emergency that must be met in some way. I think that it is perhaps possible that the Secretary of the Interior might have been able to work it out in some other way, but I can not see any other way that Congress can adopt to work it out. I have suggested to the gentleman from Idaho one or two amendments, so that in the event of the default under the terms now given there will be no discretion in the department about taking back the property involved and shutting off the water. I understand these amendments are in the bill.

Mr. SMITH. Yes. Those amendments are in the bill.

Mr. CRAMTON. I am not able now to suggest anything further. With those amendments in, I hope the bill will pass.

Mr. CHINDBLOM. What is the proposed legislation?

Mr. SMITH. The bill proposes to turn over the Okanogan project in the State of Washington to the irrigation district, and save to the reclamation fund the overhead expense of superintending the operation and maintenance, and collecting funds from the farmers to reimburse that fund for this service.

Mr. CRAMTON. If the gentleman will permit, it is a compromise settlement. It is a reclamation project which has been a financial failure, so far as the original contracts are concerned, and this proposes and authorizes a compromise settlement.

Mr. CHINDBLOM. This turns the property over to their organization?

Mr. CRAMTON. Yes.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to contract with the Okanogan irrigation district for the transfer of the control of the Okanogan project, in the State of Washington, constructed pursuant to the act of June 17, 1902 (32 Stat. L. 388), and acts amendatory thereof or supplementary thereto, known as the reclamation law, upon the district agreeing to pay to the United States in discharge of all obligations the sum of $10,000 per annum for the period of 31 consecutive years, beginning with the year 1928. Upon such payments being completed, the said Secretary is authorized to convey to the

district all the right, title, and interest of the United States in and to said Okanogan project.

SEC. 2. The Secretary is authorized to assign to the district all claims that the United States now holds under contracts with water users and others owning land outside the boundaries of the said district, or owning land within the boundaries of said district but not consenting expressly or impliedly to the modifications in their water-right contracts necessary to conform to the terms of said proposed contract between the United States and the Okanogan irrigation district. During the irrigation season of 1928, prior to the execution of such contract with the Okanogan irrigation district, the district may, at its own expense, operate the canals and other works of the Okanogan project for the delivery of water to the water users thereunder, and during such irrigation season may deliver water regardless of the restrictions now imposed by the reclamation law relating to delinquency in payment of charges.

SEC. 3. The contract between the United States and the said district shall reserve to the United States the power, at the option of the Secretary of the Interior, to resume control of said project at any time when necessary to shut off water to enforce payment of the annual installments provided for in the first section hereof.

Mr. SMITH. Mr. Speaker, I offer an amendment. On page 2, after the figures "1928," insert the words "such installments to be due on December 1 of each year and bear interest at the rate of 6 per cent per annum after due."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 2, after the figures "1928," insert "such installments to be due on December 1 of each year and bear interest at the rate of 6 per cent per annum after due."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On page 2, line 25, after the word "when," insert "he may deem it."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was rejected.

Mr. SMITH. Mr. Speaker, I offer the following amendment: On page 2, line 24, strike out the words "at the option of the Secretary of the Interior."

The SPEAKER. The gentleman from Idaho offers an amendment, which the Clerk will report.

The Clerk read as follows:

Line 24, page 2, strike out "at the option of the Secretary of the Interior."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMITH. Mr. Speaker, I offer another amendment. At the end of the section insert: "The Secretary of the Interior is directed to resume control and shut off water to enforce payment whenever any such annual installment is not paid on or before March 1 after due."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH: On page 3, after line 2, insert: "The Secretary of the Interior is directed to resume control and shut off water to enforce payment whenever any such annual installment is not paid on or before March 1 after due."

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

CONSTRUCTION AT MILITARY POSTS

Mr. MORIN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 11134) to authorize appropriations for construction at military posts, and for other purposes, with Senate amendments, disagree to the Senate amendments and ask for a conference.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. MORIN, JAMES, and MCSWAIN.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER. The Chair designates the gentleman from Oregon [Mr. HAWLEY] to preside to-morrow at the memorial exercises for the late Representative CRUMPACKER.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. SABATH for the balance of the session, on account of illness.

ENFORCEMENT OF PROHIBITION

Mr. MEAD. Mr. Speaker, I ask unanimous consent to address the House for five minutes on a resolution which I introduced a few days ago.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for five minutes. Is there objection?

Mr. MEAD. Mr. Speaker, I trust in the course of my remarks no one will interpret my speech as being either a wet or a dry speech, for it is an appeal for the approval of a resolution which concerns the rights and protection of our citizens.

On May 12 I introduced a resolution (H. Res. 202) calling for the appointment of a special committee of five Members of the House to investigate the shooting of Jacob H. Hanson, of the city of Niagara Falls, N. Y., by a member of the United States Coast Guard assigned to the Buffalo district.

Since introducing the above-mentioned resolution I have made somewhat of a study of the use of firearms by agents of the Federal Government employed in the enforcement of the eighteenth amendment and the Volstead Act, and, while some of these cases were justifiable, many lives could be spared by exercising better judgment.

The numerous Federal agencies whose duty it is to enforce the law makes difficult, unless by legislative or Executive order, the issuing of safe and uniform regulations concerning the use of firearms by enforcement officers.

For illustration, and particularly on the Niagara frontier, where Mr. Hanson was shot, we have agents of the Prohibition Bureau, the Coast Guard, the border patrol, the customs service, and the Immigration Bureau, all engaged in patrolling bridges, ferries, highways, as well as the shores of the Niagara River and the Lakes.

In addition to these agencies we have the local police, the sheriff's force, and the State police, all sworn to protect the lives and property of our citizens, and with all these many legions of officials, officers, and agents human life is not safe on the public highways of the Nation. When such a condition exists it is time the representatives of our Government took action.

Nor is this attack on Mr. Hanson the only case of its kind on record. All over these United States hundreds of men have been killed in connection with the enforcement of the Volstead law, while thousands have been wounded.

The records of the Prohibition Bureau list the names of 126 persons, mostly citizens, who have been killed by prohibition officers from January 16, 1920, to May 15, 1928, while 49 prohibition and 2 narcotic officers have been killed during this same period.

IMMIGRATION BUREAU

The records of the Immigration Bureau disclose the names of 7 immigration officers killed and, while we have no record of the number killed by immigration officers, a conservative estimate would place the figure at approximately 100, mostly aliens, who were shot near the Mexican border.

CUSTOMS SERVICE

In the Customs Service the records include the names of 8 officers killed and 17 seriously wounded in gun fights or in pursuing persons alleged to be violating the prohibition law. Twenty-one persons have been killed and 6 seriously wounded by customs officers.

UNITED STATES COAST GUARD

The records of the United States Coast Guard disclose the names of 4 guardsmen killed, 3 seriously wounded, and 5 persons killed and 4 seriously wounded, some in gun battles and others while at sea by machine-gun fire, and so forth. Many others have been killed in automobile accidents, shipwrecks, and in other ways all of which can be charged to the enforcement of the prohibition law.

This great sacrifice of human life within our own border in attempting to enforce but one lone law is enough to warrant a most extensive study of this serious subject.

It can be greatly lessened by having the several departments of the Government issue strict orders condemning the use of firearms except in self-defense and for the protection of Government property; by turning over to the State authorities all those who disregard these orders; by granting the several States the police powers which the Constitution intended should be theirs; by modifying the Volstead law.

I am transmitting to the Rules Committee this report of killings which I received from the various department and bureau heads as an appeal for their approval of my resolution which, if adopted by the House, will create a committee to

investigate this matter to the end that the promiscuous use of deadly weapons shall cease and that human life will be protected on our highways. The use of guns by Federal agents should be limited to be used only for the protection of Federal property and in self-defense.

Mr. CRAMTON. Will the gentleman yield?

Mr. MEAD. At the end of my time I shall be pleased to yield to the gentleman.

In going through the records I found that not one of the agents of our Federal Government who were accused of killing our citizens has ever been found guilty of murder. The Federal Government, through its district attorneys, has placed the protecting shield of the Government around these men and they were not turned over to the local authorities for trial. In many instances the Federal attorney whose duty it is to represent the people represented the agents who were charged with the shooting, which in some cases was wholly unwarranted and unjustifiable.

I have the list before me of the agents and persons who were killed, but I shall not detain you by reading it; it is a very long list.

I will, however, include it with my remarks for the information of the Members of the House.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. MEAD. Mr. Speaker, I ask unanimous consent to proceed for two additional minutes.

Mr. CRAMTON. Reserving the right to object, I would like to make one short observation.

Mr. MEAD. If I am given time, I shall be very glad to yield to the gentleman.

The SPEAKER. Is there objection?

There was no objection.

Mr. CRAMTON. I may simply suggest that in order to be effective in the interest of law, the gentleman will need to join some sort of an effective pronouncement to the bootleggers and rum runners to see that they also discard their armament, which on the border waters includes armored vessels and automatics.

Mr. MEAD. Let me say to the gentleman that the specific case in which I am interested is the brutal shooting on the part of a Coast Guard man of the secretary of the Niagara Falls Lodge of Elks, a splendid gentleman, who was returning to his home after a meeting of his lodge, in violation of no law or ordinance or regulation, and without warning two guardsmen dressed like bandits pounced upon him on the public highway and shot him through the head, putting out his eyes, fracturing his skull, and perhaps fatally wounding this innocent citizen. It is cases like this that I am concerned with.

Mr. BLACK of New York. Will the gentleman yield?

Mr. MEAD. Yes; I yield to my colleague.

Mr. BLACK of New York. Has the gentleman ever heard of any bootleggers killing any citizen except with the poison they get from the Prohibition Bureau?

Mr. MEAD. I was one of the Members of Congress who tried to take the poison out of liquor, but, with my colleague, we failed in our effort when that legislation was before the House. I hope the Rules Committee will vote out this resolution, and in the interest of humanity I trust the House of Representatives will inform our Federal agents that, above and beyond the enforcement of the Volstead law, we hold the inalienable rights of our citizens supreme. The provisions of the Constitution which guarantees life, liberty, and happiness to our people antedate the Volstead Act. [Applause.]

List of persons killed or fatally injured by prohibition officers from the effective date of the national prohibition act, January 16, 1920, to May 15, 1928:

1920

Ernest E. Emily, West Forks, Wash.

1921

Horace Brown, Baltimore County, Md.
Robert Fuller, Knox County, Tenn.
Johnnie Garrett, Taylor County, Ga.
R. W. Hederly, Portland.
Bud Riley, Green County, Okla.
Louis Vokovich, Madison, Ill.

1922

Ward Adkins, Lincoln County, W. Va.
Lonnie Atwell, Huntington, W. Va.
Peeler Clayton, Austin, Tex.
Teddy Cox, Moore, Ark.
Joe Duncan, Spruce Pine Creek, Tenn.
Boe Fugate, Knott County, Ky.
Steve Isom, Letcher County, Ky.
Bruce Kirby, Jeff Davis County, Ga.
Arlett Kiser, Dickenson County, Va.
Chalmers McAlphine, Cleburne County, Ala.
Willie Nelson, Harpersville, Va.
Bruno Nistico, Syracuse, N. Y.
Joseph Sesqueria, Boston, Mass.
Francis Marion Smith, Nelson County, Ky.
Clarence Sturges, Learned, Miss.
Curtis Tidmore, Jefferson County, Ala.
John Wilson, Lauderdale County, Miss.
Julius Wurzer, Antigo, Wis.

1923

Harry Baker, Louisville, Ky.
Bob Ballard, Lexington, Ky.
Edgar Bunch, Ashland, Ky.
Smokey Cash, Sand Springs, Okla.
Jess Coffey, Muscadine, Ala.
Zategosa DeLeon, San Antonio, Tex.
Doughlas Dunham, Salisbury, N. C.
Harry Givens, Orlando, Fla.
Arthur Hood, Lunenburg County, Va.
James Jenkins, Charleston, S. C.
Posey Maddox, Fayette, Ala.
John Rinnberg, Belleville, Ill.
J. B. Smith, White Plains, Ga.
Jett Smith, White Plains, Ga.
Ike Strong, Harlan, Ky.
George Strong, Harlan, Ky.
Mrs. Ike Strong, Harlan, Ky.
Albert L. Swope, Butler County, Ohio.
T. Q. Wallace, Irvine, Ky.
Fredius Wilson, Galveston, Tex.
Peter Yancaukas, Philadelphia, Pa.

1924

Bradley Bowling, Yerkes, Ky.
Grover C. Bradley, Littleston, N. C.
James Cafano, Newark, N. J.
Ira Combs, Hazard, Ky.
W. D. Hicks, Galveston, Tex.
Philip Kalb, Lambertsville, Mich.
Bill Littrell, Virginia.
Ralph Marchese, New Orleans, La.
Guy Meadows, Hinton, W. Va.
Thomas Monteforti, Brooklyn, N. Y.
Elisha Northcutt, Anderson, Ind.
Alducci Sabatino, Wilmington, Del.
Sylvester Strictland, Vivian, La.
Ernest Twombley, DeKalb Junction, N. Y.
James S. White, Castella, Calif.

1925

Leslie Britt, Southampton County, Va.
Pres Brown, West Plains, Mo.
Joe W. Carter, Mississippi County, Ark.
Beckham Cecil, Beardstown, Ky.
George Clark, Whitley County, Ky.
Hiram Fee, Harlan County, Ky.
Marcus Ferrell, Raywick, Ky.
Francis Fontaine, Union County, S. Dak.
Houston Harris, Careyville, Fla.
Clarence Jones, Hot Springs, Ark.
John Kelly, Newport News, Va.
Bee Lilly, Beckley, W. Va.
Fred Mauney, Lenois, N. C.
Charles Mills, Monroe County, W. Va.
Dave M. Orr, Ora Grande, N. Mex.
J. G. Pittman, Charleston, S. C.
Filmore Sexton, Scott County, Tenn.
Jim Sneed, Roderfield, W. Va.
L. E. Storey, Cottonwood Corners, Ark.
Leon M. Sweat, Polk County, Fla.
Carl Thornes, Britton, Okla.
Bill Tilghman, Cromwell, Okla.
Albert R. Van Sickle, Laramie, Wyo.
Lawrence Wenger, Madonna, Md.

1926

Jose Alverdi, Reno, Nev.
Adam Ballinger, Greenville, N. C.
John Buongore, Havre de Grace, Md.
Jacob Carter, Jacksonville, Fla.
John Danley, Tazewell County, Va.
Stephen Kobalski, Detroit, Mich.
Henry Nestor, Ludlow, Ky.
William Risk, Teller County, Colo.
Frank Sears, Hopkins County, Ky.
Homer Studivant, Duvall County, Fla.

Rondo Wade, Owensboro, Ky.
J. B. Walling, Orange County, Tex.
Elvin Wilson, Mt. Sterling, Ky.

1927

J. A. Brinson, Miami, Fla.
Algie Carrier, Amite, La.
Lawton Carroll, Valdosta, Ga.
F. M. Ferguson, Huntington, W. Va.
Oliver Gill, Lake View, Miss.
Lewis Gregory, Graveltown, Ky.
James Thomas Hall, Elmore County, Ala.
Wade Hampton, Mobile County, Ala.
J. J. Howard, Madison County, Miss.
E. P. Ingmire, San Pedro, Calif.
Millard Jamerson, Pontotoc County, Miss.
Thomas Johnson, Pensacola, Fla.
James Lee, Detroit, Mich.
Mildred Lee, Detroit, Mich.
Walter Lorance, Coffee County, Tenn.
Cecil McClure, Cherokee County, N. C.
M. P. Merritt, Miami, Fla.
Burrell Morris, Berkeley, Calif.
William Niedermeier, Huron River, Mich.
Clyde Parrish, Miami, Fla.
Jeff Pitts, Wesson, Miss.
Alex Tidwell, Hardin County, Tenn.
Mack Turner, Mobile County, Ala.
Arnold Wise, McDowell County, W. Va.

1928

Elmer Fulton, Pikcher, Okla.
Charles P. Gundlacht, Leonardtown, Md.
Lee Prudman, Julius, Ark.
Douglas Smith, Louisville, Ky.

Federal prohibition and narcotic enforcement officers who have been killed or fatally injured while actually on raids from the effective date of the national prohibition act, January 16, 1920, to May 15, 1928:

PROHIBITION OFFICERS

Robert G. Anderson, Hammond, Ind.
Stafford E. Beckett, El Paso, Tex.
Charles Bintliff, Redfield, S. Dak.
James E. Bowdoin, Careyville, Ind.
Jacob P. Brandt, Perry, Fla.
Remus W. Buckner, Springville, Ala.
Atha Carter, Palisade, Nev.
D. S. Cleveland, Meridian, Miss.
William E. Collins, Vinton, La.
E. Guy Cole, Lexington, Ky.
M. M. Day, Welch, W. Va.
W. D. Dorsey, White County, Ga.

LIST OF PERSONS KILLED OR WOUNDED BY COAST GUARD

May 28, 1924: Daniel Conover, Atlantic City, smuggler, killed at Atlantic City. Refusal to heave to.

August 22, 1924: Antonio Pietro. Killed in a running fight. Was master of *Lynx II*. Off Seabright Station. A smuggler.

October 24, 1924: "Swampy" Joyce, a smuggler on the *K–13093*. Off New York. Refusal to heave to.

February 24, 1926: "Red" Shannon. Wounded fatally in Miami Bay. Attempting to run down Coast Guard boat.

July 16, 1926: L. E. Yott, a smuggler on the *1510–Q*. Refusal to stop (Lake Ontario).

March 14, 1927: E. H. Jones. Killed in a fight off Miami on the *V–15746*.

April 7, 1927: Charles Waite and a negro named "George." Killed in a fight on board a picket boat. Waite attempted to kill the crew of the Coast Guard vessel. Off Miami, Fla.

May 20, 1927: Norman Rice stated that he had been wounded in the arm while trying to run in contraband (near Buffalo, N. Y.). Wounded only. Origin of shot doubtful.

December 14, 1927: Alfred Raymond, a smuggler, wounded in right arm. (Marblehead Station, Lake Erie). Wounded only.

LIST OF COAST GUARD MEN KILLED OR WOUNDED

April 2, 1925: C. B. M. Carl Gustavson, of *CG–237*, killed at the wheel of his vessel while at sea by machine-gun fire; off Montauk Point, Long Island.

August 7, 1927: Boatswain Sanderlin, of *CG–249*, killed 35 miles off Florida coast.

August 7, 1927: Mo. M. M. 1c Victor Lamby, of *CG–249*, killed 35 miles off Florida coast.

August 7, 1927: Robert K. Webster, Secret Service operator, on *CG–249*, killed off coast of Florida.

August 7, 1927: Seaman J. Hollingsworth, of *CG–249*, desperately wounded, off coast of Florida.

December 14, 1927: J. T. Hagglove, B. M., picket boat *2372*, wounded in buttocks. Lake Erie.

April 20, 1928: Seaman H. A. Hutchenson, wounded in left leg (shot) on Fisher Island, Miami, Fla., in assault made by unknown negro and white man.

IMMIGRATION OFFICERS KILLED

Frank H. Clark, El Paso, Tex., December 13, 1924.
August D. De La Pena, Rio Grande City, Tex., August 3, 1925.
William W. McKee, Alambee Ranch, Tucson, Ariz., April 23, 1926.
Lon Parker, Huachuca Mountains, Ariz., July 25, 1926.
Thad Pippin, near El Paso, Tex., April 21, 1927.
Norman G. Ross, El Centro, Calif., February 10, 1927.
Franklin F. Wood, Detroit, Mich., December 15, 1927.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to proceed for three minutes on an entirely different subject, although this is tempting. [Laughter.]

The SPEAKER. The gentleman from Michigan asks unanimous consent to proceed for three minutes. Is there objection?

There was no objection.

REPRESENTATIVE NICHOLAS J. SINNOTT

Mr. CRAMTON. Mr. Speaker, the House is about to lose, by voluntary retirement to take up other important duties, the services of the gentleman from Oregon [Mr. SINNOTT]. He has had a distinguished career here—has performed unusually valuable service to his country. I believe, however, that time will show that nothing he has been able to do in the service of his country in this House will be of more lasting benefit than his friendship toward the development of the national parks. The National Park Association has recently issued a public statement of their appreciation of his services, which I will ask to have read in my time.

The Clerk read as follows:

NATIONAL PARKS ASSOCIATION,
Washington, D. C.

After nine years of distinguished service, NICHOLAS J. SINNOTT, of Oregon, has resigned his chairmanship of the Public Lands Committee of the House of Representatives to accept life appointment as judge in the United States Court of Claims. He will retain his place until the close of the present session, completing his fifteenth year in Congress.

As chairman of the Public Lands Committee, Judge SINNOTT has made a record equal to any of the men of great distinction and service to the Nation who have filled this most important position in past years, meeting the many difficult issues and trying situations of a period of clashing interests with unfailing tact, humor, justice, and decision. A man of national vision as became his position, he has been able also keenly to appreciate the local point of view.

More than to any other Member of Congress, to him the country is indebted for the preservation of national park status and standards during the years of the system's supreme trial. * * * His name will stand in the first rank of the shapers, upbuilders, and defenders of a system which, preserved in its integrity, posterity will recognize as one of the Nation's most valuable possessions of any kind.

[Applause.]

CIVIL SERVICE RETIREMENT LAW

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the Federal employees' retirement act.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. ZIHLMAN. Mr. Speaker, the civil service retirement law has been in operation since May, 1920. When the law was passed it was understood by all parties interested that it was far short of what it should be. Since that time there have been several minor amendments but the law is not yet as broad and comprehensive as we have a right to expect.

There is now pending before the House, on the calendar, two bills—H. R. 25 and S. 1727—which propose to amend the law to provide for a maximum annuity of twelve hundred dollars, or an average of something like eight hundred per annum—changing the divisor from 45 to 40.

Under the Senate bill there is an option of two years for each group—that is, employees who retire at 70 years of age would be allowed an option at 68, provided the employee had 30 years of service; those that retire at 65 on account of age would have an option at 63, and those that retire at 62 would be allowed to retire at 60.

The House bill (H. R. 25) provides for optional retirement at 60 years of age for all groups, which is the better plan, yet this plan is much more expensive than the Senate bill. The House committee has agreed to substitute the Senate bill for the House bill, and it should be brought up and passed.

There are more than 400,000 employees in the Government service that come within the purview of the law. There are now more than 14,000 on the retirement roll. Employees pay into the retirement and disability fund 3½ per cent of their salary, which amounts to around $28,000,000 annually. More than 6,000 of those retired have died, due for the most part to the advanced age of the employees when they have reached retirement.

There is now in the retirement and disability fund around $80,000,000, this fund having grown by leaps and bounds, beyond all expectations.

The Department of Labor has recently made a survey of all the principal retirement systems throughout the world, including many systems in the United States. This information has been submitted to the Civil Service Committee of the House and Senate, and shows plainly that our retirement law is very far behind in many respects to what many other systems provide.

I believe that every Member is in favor of this legislation, and the House should act on this matter without further delay. It is a most worthy measure, and I hope that the bill will be brought up and passed before the end of the session.

I have talked with representative leaders of the House, including members of the steering committee, and they advise me that the question of a special rule for consideration of this legislation will be taken up at a meeting of the Rules Committee to be held on next Tuesday, the 22d instant. I sincerely hope that the committee will give this meritorious legislation privileged status in the House and enable us to take favorable action and do justice to the thousands of Government employees who will be affected by the provisions of this bill.

PANAMA CANAL MEMORIAL

Mr. THATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the bill H. R. 13706.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. THATCHER. Mr. Speaker and Members of the House, I desire to call your attention to a bill which I have introduced, H. R. 13706, providing for the construction of a Panama Canal Memorial to commemorate the work of those who have aided in the construction of the Panama Canal.

The purposes of the bill are fully explained in the bill itself, and for this reason the measure is herewith set forth as follows:

A bill to provide for the construction of the Panama Canal Memorial

Be it enacted, etc., That a suitable memorial, to be known as the Panama Canal Memorial, be constructed in the Canal Zone in commemoration of the work and labors of all those who, and of all agencies which, in varying capacities and at various periods, aided in

the construction, or in bringing about the construction, of the Panama Canal, and of the works necessary or incident thereto.

SEC. 2. For the purpose of carrying out the provisions of this act there is hereby created a commission to be known as the Panama Canal Memorial Commission—hereinafter referred to as commission—to be composed of seven members, as follows: The chairman and the ranking minority member of the Senate committee on Interoceanic Canals, the chairman and the ranking minority member of the House Comittee on Interstate and Foreign Commerce, the Secretary of State, the Secretary of War, and one person to be selected by the President of the United States. If, for any reason, the chairman or the ranking minority member of either of said committees of Congress should fail or refuse to serve as member of the commission, the affected committee shall select another of its members to serve instead. All of the members of the commission, except the member selected by the President, shall serve without compensation; but they shall be reimbursed for their actual, necessary traveling and other expenses incurred by them in performing their duties hereunder. Notwithstanding the expiration—during the life of the commission—of any Congress, any Senator or Representative who is a member of the commission, if reelected, shall continue to serve on the commission until there is selected on the affected committee a successor to such Senator or Representative. The member of the commission to be selected by the President shall be well versed in the history of the Canal Zone, the Panama Canal, and the Isthmus of Panama; he shall serve at the pleasure of the President; he shall be the executive officer of the commission; and shall receive a salary to be fixed by the President, of not exceeding $10,000 a year, and his actual, necessary traveling expenses while engaged in the performance of his duties, together with reasonable expenses for living quarters while engaged in the performance of his duties in the Canal Zone. In case of any vacancy on the commission, the same shall be filled in the same manner as in the original selection. The commission shall designate one of its members as its chairman, and shall also have the power to select a secretary of the commission and to fix his compensation.

SEC. 3. It shall be the duty of the commission to make or to cause to be made, plans, designs, and specifications for a comprehensive and suitable memorial for the purpose herein indicated, which memorial shall be in the form of a building or structure of appropriate design, and containing a hall or auditorium adequate for the holding therein of meetings, conventions, and gatherings of civic, patriotic, and international character, including Pan American congresses. Such memorial may be appropriately adorned and embellished with statues, sculpture, tablets, carvings, paintings, drawings, and frescoes of commemorative character, or historic design, and with depictions of events incident to the history of the Panama Canal, including the French, as well as the American period, and of the Panama Railroad and the Isthmian region. There shall also be provided in such memorial structure space for the placing therein of archives, histories, records, maps, charts, and models relating to the construction and operation of the Panama Canal, the Panama Railroad, and the discovery, settlement, and occupation of said Isthmian region. Said memorial structure shall be placed on a site in the Canal Zone to be furnished by the United States or the Panama Railroad Company without charge upon the appropriations herein authorized; and said site shall be selected by the commission, subject to the approval hereinafter indicated. The grounds of the memorial and the approaches thereto shall be treated so as to enhance the artistic effect of the whole.

The commission shall also secure estimates of the cost of the construction of the memorial and the furnishing of same, and the treatment thereof, and of the grounds and approaches; and, so soon as may be practicable, the commission shall report and submit to the President and to Congress such plans, designs, and specifications, together with its recommendation of a site, and such estimates of cost, not to exceed in the aggregate sum, $2,500,000. Thereupon, if and when such plans, designs, and specifications, together with such recommendation of site, and such estimates of cost, shall be approved by the President and Congress, the construction of the memorial and of the works incident thereto, under the appropriations which may be made therefor, shall begin, and shall proceed with all diligence to completion under the supervision and direction of the commission.

SEC. 4. In the performance of the duties herein imposed the commission shall have the power and authority, within the limits of appropriations provided, to (a) employ personal services in the District of Columbia, in the Canal Zone, and elsewhere, including a chief architect, artists, architects, engineers, and assistants, and other professional and nonprofessional services, notwithstanding the civil service laws and regulations, and to fix the compensation of such persons, notwithstanding the provisions of the classification act of 1923, as amended; (b) to purchase any plans, designs, specifications, material, equipment, and accessories as may be deemed necessary or essential; (c) to enter into all contracts and arrangements necessary for the construction of the memorial and of the various features thereof, after the plans, specifications, designs, site, and estimates of cost therefor have been approved as aforesaid; and (d) to avail itself of the services and advice of the Commission of Fine Arts created by the act of May 17, 1910.

SEC. 5. The commission shall also make a study of the subject of the names and designations of the important points and features of the Panama Canal and the Canal Zone, and shall make to the President and Congress such recommendations thereon, or touching any matter related to the matter of memorialization herein provided for, as it may deem appropriate or desirable.

SEC. 6. Such appropriations and contract authorizations as may be required for carrying out the purposes of this act, within the aforesaid limit of $2,500,000, are hereby authorized; and the appropriations made in pursuance hereof shall be disbursed by the disbursing officer of the War Department, under the direction of the commission.

SEC. 7. Upon the completion of the memorial and the works incident thereto, and upon the final settlement of the accounts in connection therewith, the commission shall cease to exist. The books and accounts of the commission, and of all others who may handle any of the funds relative to the work herein authorized, shall at all times be open to the examination of the Comptroller General.

SEC. 8. Upon its completion the memorial, the grounds thereof, and the approaches thereto shall be cared for and maintained as are other public structures, grounds, and ways in the Canal Zone.

SEC. 9. In order that the commission may begin the performance of its duties hereunder there is hereby authorized to be appropriated, out of any funds in the Treasury not otherwise appropriated, the same to become immediately available, the sum of $250,000.

From the provisions of the bill it will be noted that the work of citizens of the United States who aided in the construction, or in bringing about the construction of the great Isthmian waterway, will receive, in the very nature of the case, major consideration in the proposed memorial; yet, the very valuable contribution made by the French in beginning and carrying on, for years, the construction of the canal, under insuperable difficulties; and the aid and cooperation of many prominent Panamanian officials and citizens—especially in the earlier stages of the American undertaking—should also receive appropriate recognition. Furthermore, the importance of the Panama Railroad as a contributing factor of success in the canal work should be recognized in some adequate way in any monument of the indicated character. Hence, the provisions of the bill are sufficient to permit fitting recognition of all persons and agencies entitled, in justice and in fact, to commemorative recognition in the proposed memorial. The commission created by the bill will be expected to formulate, after mature consideration, plans which will cover the various features appealing for commemorative treatment, and which, in just and discriminating manner, can provide the proper emphasis and distinctions involved.

In the accomplishment of the Isthmian enterprise, the greatest industrial endeavor the earth has ever known, and in which so many able statesmen, engineers, sanitarians, and civilians of our own and other countries played such an important and indispensable part, it would hardly seem fair to single out a few of the eminent contributors to the success of the work and omit any commemoration of the invaluable contributions of all others. A great memorial of the character authorized by the bill would avoid any narrow or piecemeal treatment of the subject, and would insure broad, generous, fair, and adequate recognition for all concerned.

The structure authorized would constitute a collective memorial to "all those who, and of all agencies which"—in the language of the bill—"in varying capacities and at various periods, aided in the construction, or in bringing about the construction, of the Panama Canal, and of the works necessary or incident thereto."

This would seem to be the only way to treat the subject of commemoration in a just and adequate manner. Manifestly there are not enough names of important features of the canal to meet all the requirements of commemoration. Moreover, Mr. Speaker, I very much doubt the wisdom of changing the historic and traditional names of the canal and the Canal Zone for commemorative purposes, even if there were a sufficient number of these names for such purposes. The nomenclature of the canal and the Canal Zone is woven into the very fabric of the history of the canal, the Canal Zone, and the Isthmus itself; and it is known throughout the civilized world. Any change in it would be, therefore, confusing, at home and abroad, both now and in the years to come.

The work of those whose services have been of a commanding character, can be sufficiently stressed in the matter of memorialization by means of statuary, sculpture, tablets, and the like. The work of groups and agencies in relation to the canal enterprise can be commemorated by appropriate panels, bas-reliefs, and group designs and depictions. In this connection I would call especial attention to the indispensable contributions to the success of the canal work made by thousands of laborers who,

beginning with the construction of the Panama Railroad in the period from 1849 to 1855, and closing with the completion of the canal itself, in 1914, in one form or another, literally gave their lives to the "cause," and who constitute the unnumbered and nameless dead of the Isthmus. To-day their graves, because of their lack of identity, are those of the "unknown" industrial soldiers of this unparalleled achievement of history.

The commemoration of the labors of these lowly, unnamed workers presents a subject worthy of the highest dramatic art. Let us memorialize their work as well as that of the eminent and highly skilled whose names and achievements have been specifically incorporated into the history of the canal.

In an undertaking of such vast import as was the construction of the Panama Canal there was glory enough for all, and in any endeavor to commemorate the toil and efforts of those who, in whatever form, made their contributions toward the success of this undertaking, there should be no invidious distinctions. In the proposed memorial and in its treatment, due appraisal may be made touching the value of the contribution of each, and comparative values determined.

"The land divided, the world united," has been the motto of the American Panama Canal enterprise. The proposed memorial would constitute a further appeal, I believe, though in an incidental way, for peace and good will among the nations. Planned and constructed so as to constitute a great work of art as well as a great work of memorialization, giving due recognition to the various factors contributing to the success of the Isthmian undertaking, regardless of race or nation, the effect would, I am sure, be most fortunate from every standpoint.

The Panama Canal has more than justified every hope and desire indulged by our people during the period of its construction. From a purely commercial standpoint—aside from its incalculable military value—it has been a splendid success, its operation paying the heaviest dividends on the three hundred and seventy-five millions of outlay involved in its construction. Beginning with the building of the Panama Railroad—one of the greatest agencies utilized in the canal work—and coming on down through the period of the French effort, 1880 to 1904; thence extending through the early days of the American work on the canal, 1904 to 1907–8, when, under the sanitary genius of Gorgas and his associates, the Isthmian plague spot was redeemed and rendered wholesome and habitable, a terrific toll of death was exacted of the hosts who participated in these Isthmian labors.

Commencing with the discovery of the Isthmian shores by Columbus, following with the discovery of the Pacific Ocean by Balboa; thence descending through the centuries of colonization and occupation by the Spanish, on through the days of Panama Railroad construction and the discovery of gold in California, with the resulting trans-Isthmian travel; thence through the years of the French effort, down to the final hour of American success and the uniting of the two great oceans—the Isthmus of Panama has had an intensely dramatic and interesting history. In view of all this, in view of the commercial success of the canal, as well as in view of the wisdom and justice of commemorating in an impressive and adequate manner the work of all those whose toil and sacrifice, in whatsoever form, made possible the success of the greatest engineering feat of the ages, it would seem that our great and powerful Nation should now erect in the Canal Zone, on some appropriate site, a great memorial structure of the character authorized in this measure. It is believed that at last the time is ripe therefor and that the American people will approve the action of Congress in enacting the necessary legislation involved.

Because of the importance and magnitude of the memorial project, it has been deemed wise for Congress and the President to approve the plans for the proposed memorial to be evolved by the commission, and the bill so provides.

For the reason, Mr. Speaker, that the present session is about to close, the bill will have to go over until next session for hearings thereon and for consideration. In order more effectively to place the matter before the Congress and the country at large I have thus presented it.

REPEAL OF THE EIGHTEENTH AMENDMENT

Mr. IGOE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on House Resolution 155.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. IGOE. Mr. Speaker and Members of the House, in behalf of joint resolution (H. J. Res. 155) introduced by me before this House on January 10, 1928, calling for action toward the repeal of the eighteenth amendment to the Constitution, and its futile but alleged enforcement appendage, the Volstead Act, I desire again to sound the warning that this Congress in years to come will be branded as down-right traitorous if it fails to obey a foremost duty and deal forthright and honestly with the curse of prohibition. No other scourge so vitally affects the welfare of our people, the institutions of our country, and the very foundations of our Government. Various sections of our land have suffered from disaster in recent years, notably the Mississippi Valley from the flood that wrung the hearts of all our people and brought all to the fore as soldiers of relief. But this tormenting terror of unenforceable, crime-creating, graft-breeding, murder-inciting, life-destroying prohibition is one that scars every city, town, and hamlet with its trail of moral and physical destruction.

There are those fanatics of aridness who believe that the Volstead Act and the prohibition amendment are so invested with morality that opposition to them is immoral. But such reason-bereft zealots, measured by the blackness of the crime and graft horrors of almost a decade of prohibition that does not and never can prohibit, must be dismissed as beset with the madness of lunacy. Those who find that such fanaticism pays, as it does many, in dirty dollars, must be credited with the cunning of wolves. Their dead or distorted brains will not register the truth as to national conditions, whether in town or country, or else they deliberately find such uncompromising attitude coins graft dollars. If of the former class, they are due for a cataclysmic awakening or the junk heap of the smallest of minorities; if of the latter, their grafted dollars—of the same breed but fouler than the graft of the bootlegger who scoffs at the law—are to turn to so many serpents.

PROHIBITION THE ENEMY OF TEMPERANCE

I give place to no one in my sincere desire for true temperance throughout our Nation. I believe that the vast majority of our people are for temperance and are eager to support and to obey laws that will promote it. Business, too, desires temperance. Business has become too big, too complex, to tolerate anything but temperance. The church also pleads for that temperance which will stamp out the crime, the graft, the horror of prohibition that can never prohibit. But these fanatics of Volsteadism are the very instruments of the devil in their efforts to block true temperance and its beneficences.

The aborted, saneless slant of the dry fanatic is the fruit of intolerance, and intolerance is the devil's own tool. A glance back through the ages, and we find history's highway strewn with the wrecks of great and cultured democracies and republics. The decadence that finally overwhelmed them is clearly marked in each case. It invariably started with a centralization of power, out of which grew the impulse of intolerance—the attempt of the state, or government, or dictatorial cliques to interfere in the personal and inalienable rights of human beings with respect to their home life and social relations. Then the people, resenting unpopular laws or mandates, were thrown into jails and deprived of their properties and liberties in a veritable reign of terror. But this stage, invariably, was followed quickly by general rebellion against, and contempt for, practically all laws, good or bad, with the usual accompanying moral breakdown; and in the end came collapse and dissolution of the state or government.

You can discover parallels to present threatening conditions in the United States in the decline of these various great democracies and republics of the past. Every student of the representative or democratic system of government knows that general statutory laws are not enforceable if they invade rights that by nature are not properly subject to sumptuary legislation. The laws against murder, theft, arson, and mayhem are enforceable because the people who delegate the law-making power universally and eagerly support such mandates. Outside that general realm of fundamental protection by law, every attempt at invasion of the inalienable rights of mankind, such as what it shall eat for dinner or what it shall wear on week days or what church it shall attend, for 2,000 years has evoked resistance, violence, disrespect for authority, and general lawbreaking; and, if persisted in, revolution and decay of the state and society, or a sweeping alteration of the provocative conditions.

Walpole, to cite one instance, laid down the rule many generations ago that Parliament could pass laws which the English people were not bound to respect because they violated the Englishman's right to be secure in his domicile.

PROHIBITION'S ALLY IS INTOLERANCE

Now, I hold no brief for any brewing or distilling organization. I am moved to enter this determined protest because the evils and terrors of prohibition have been vividly and positively proved by eight years of bitter experience. I speak because I am sincerely alarmed by the demoralization, crime, and corruption that Volsteadism is producing on every hand to the detriment of our people, our Government, and our country. I am

genuinely alarmed because of the frightful evils it has injected into the social, business, and political life of my home city, Chicago. And its effects have been the same in every other city, town, and hamlet.

You have heard of Chicago during past months, chiefly as to but one red-lettered phase of its activities. So has the whole world. Its beauty, its creation of new buildings, its encouragement of art and literature, its position as the very heart of the industrial and merchantile life of our Nation have been thrust aside. For what? To talk of its bombs, its bullets, its crime, its murders. We are not as bad as we are painted.

But that assertion does not alter the picture of Chicago that has been hung up for the world to view. What is the basis for that picture? To what is its every reeking red color due? To prohibition that never can prohibit! Its crime and its bombs, just as in the case of many other American cities, have sprung from prohibition! Its murders, as are the majority of killings in other American cities, are the fruit of Volsteadism—the result of the competition of gangs for the control of bootlegging, and the consequent involvement of officialdom in the graft for the protection which these law-breaking, law-defying, crime-dealing elements seek! Root out Volsteadism and prohibition, and you will rid not only Chicago but our national life, of this demoralization, law defiance, crime, graft, and corruption!

And what is the keystone of this crime and corruption? It is the intolerance of the fanatical minority that contends, in the face of eight red years of bloodshed and moral decay, that personal liberty shall be enchained because its blinded eyes can not see, its atrophied brain can not register, or because its dirty pockets get its share of the swag, whatever its form! This ferocious beast of intolerance—this determination to make the social habits of all conform to the narrow standards of fanatically minded even if allegedly well-meaning snoopers—has brought upon us a demoralization that promises only further degradation and destruction unless checked now.

PROHIBITION'S TOLL OF DEATHS

Deaths and crimes of violence, flowing out of poisoned alcoholic beverages whose tide continues to rise and never to fall, constantly are increasing under Volsteadism. Figures may be tiresome, but they talk volumes, nevertheless. In the last national survey announced by the Moderation League (Inc.) it was shown that in the 534 places recorded for the years 1920 to 1926 arrests for drunkenness increased 136 per cent in the latter year over 1920, the first year of national prohibition. The total in 1926 was 711,889. The directorate and membership of this organization included such Americans as Elihu Root, Austen G. Fox, Kermit Roosevelt, Dr. Joseph A. Blake, Newcomb Carlton, president of the Western Union Telegraph Co.; William Barclay Parsons, Henry S. Pritchett, president of the Carnegie Foundation for the Advancement of Teaching; William C. Redfield, former Secretary of Commerce; and James Speyer, banker. Surely such men will not be classed by dry fanatics, although probably the Great Creator can not know in His omnipotence to what lengths an Anti-Saloon Leaguer will go, as enemies of the public welfare. And this record covered but 534 of our thousands of cities and towns!

The number of deaths due to poison liquor, the universal distillation and brew of Volsteadism, is mounting steadily year after year. The fanatical drys chant hymns of praise of the "holy" eighteenth amendment and the "sacred" Volstead Act, but their intolerant machinations are filling up the cemeteries. In Chicago and Cook County the coroner's reports show that in 1927 there were 433 deaths due to alcoholism, along with 161 homicides and deaths by accident clearly due to Volstead alcohol. This total of 594 in that single county of Illinois is the ghastly record of 12 months of the Anti-Saloon League's brand of prohibition. The death rate from alcoholism in this my home county thus has increased 718 per cent since the enactment of the Volstead Act.

And what of other cities? Well, in New York City chronic alcoholism caused the death of 770 persons during 1927, making the rate the highest in 18 years. The total back in 1920 was 98. And so it goes, from one end of the country to the other Even over in Finland, where prohibition is having its hypocritical garments torn off, there were 87,191 persons arrested for drunkenness in 1927, including 2,516 women, out of a total population of 3,600,000. Helsingfors alone had an increase of 14 per cent. So prohibition works the world around. In our country, too, illegitimacy has trebled. These are not pleasant things to discuss, but they spell the situation we must face.

We no longer can play the "human-ostrich" rôle and hide our heads in the sand. The general disrespect for the eighteenth amendment and the Volstead Act has extended to practically all laws, until we have become a Nation of hypocrites and scoffers. Respect for constituted authority daily is becoming more feeble. The church has suffered. Colleges and schools have fallen under the baneful influence. Stability is deserting the very foundations of American institutions. All because of the unreasonable attempt to regulate our habits by law, to "make us good" by statute, to enforce a nonenforceable piece of resentment-provoking, sumptuary legislation.

PROHIBITION ENDANGERS OUR YOUTH

Every father and mother knows the danger that has been brought to our boys and girls in our schools. The aftermath of the World War brought, as is the natural legacy of war, a craving for greater liberty, particularly among the younger generation. But this was accentuated and perverted by Volsteadism. What has been the result? First, the older people quite naturally, denying to the Government the moral right to interfere in their personal habits, refuse to give to this nefarious law that obedience which invariably is accorded sound legislation. Men and women of exemplary character do not hesitate to violate this law daily in their business, social, and home life, because they do not feel that they are committing any crime by such determined indifference. They are actuated, in fact, by an echo of that spirit that caused the American Revolution.

These same American men and women can travel to Canada, to Mexico, to Cuba, to the countries of Europe, and there enjoy their beer and ale, and any stronger beverages desired, with the foremost educators, statesmen, churchmen, and the best of society's representatives in those countries. Such drinking, however temperately, becomes a crime only back home! Here only do the snoopers snoop! Further, when you enact a law under which a rich man can get what he wants and a poor man can not, merely because the rich man is rich, you are extending an invitation to the growth of the reddest phase of radicalism. Your prohibition that never can prohibit has but put a sky-high price on poisonous liquor. It has provided, at the same time, possibilities of grafting in hundreds of millions of dollars, by affording opportunities for official protection to the criminals who profit enormously from these conditions and who do not hesitate to resort to murder or any phase of crime in order to establish their monopolies and who are determined to supply at all costs, in view of the profits yielded, the natural appetites of those who desire to buy.

Our young people, keen and alert, see what a mess we have made of this whole matter. They follow the course of the elder scofflaws. But with them, to whom the glamour of life has not yet been dimmed, there is a peculiar psychology that combines the innate aspiration for personal liberty with the spirit of adventure. In former days our boys and girls never dreamed, as a class, of patronizing places where alcoholic beverages were dispensed. But Volsteadism of to-day, having given birth to an enormous traffic in illicit and poisonous "hip" liquors, shrouded as it is by the secrecy that shields its patrons and promoted by the tremendous money returns it make possible, naturally intrigues, attracts, and so often traps them.

The "hot" youth of to-day, following, perhaps, his parent's example, knows he, too, can conceal poisonous liquor "on the hip." It is held a "smart" thing to do. It smacks of adventure. He deduces that it gives him "class." He goes calling with his hip flask. The spirit of adventure goes with him and is communicated to his young girl friends. And with the liquor on his hip goes demoralization and a smashing of discretion—and the story is completed. This is not due to inherent badness. It has adult example. It has prohibition instigation. It is due largely to the secrecy that screens the escapades and to that innate spirit of adventure that is keen to challenge Volsteadean intolerance.

PATRIOTISM WAS PROHIBITION'S MASK

No one can deny that the eighteenth amendment and the Volstead Act got into our national life in the guise of patriotism. Our tens of millions of people, aflame with patriotic determination to win the World War, approved war-time prohibition firm in the belief that it was to be merely an agency for temporary conservation of grain resources to bring victory the quicker. There was raised, too, a great outcry against the breweries, and the charge was echoed that 80 per cent of the stock in all breweries was owned by Germans or people of German descent. Thus hate, the most dreadful enemy of mankind since the world began, entered into this matter, and the cry of "help end the war at any cost" became so loud that no legislator dared oppose any measure, no matter what it might be, if it was promulgated as a war measure. This particular psychology continued long enough after the armistice was signed, or was so cleverly perverted by prohibition schemers, for the same impulse to carry ratification through the necessary State legislatures.

What happened? While we all were working to help end the war and our finest young men were fighting and dying on

the battle fields of Europe the Anti-Saloon League and its allies, who shouted patriotism and preached for everyone to help win the war, but whose crafty leaders worked only for prohibition at healthy salaries, played politics with the Members of Congress, but not with the aroused people of the United States, with the one object of making war-time prohibition a permanency after the war. That is what was going on!

As soon as the armistice was signed President Wilson sought to end the war-time prohibition ban and to have Congress restore the country to pre-war conditions in so far as prohibition was concerned. But did prohibition's sponsors, who had simulated patriotism as their motive, assent to this? No; the paid dry leaders, with the aid of their millions of dollars and their political code of forcing compliance or ruin upon legislators—the same means and tactics they continue to apply to unworthy and spineless public officials to-day—obtained sufficient votes to defeat any repeal of war-time prohibition, and meantime had offered the eighteenth amendment to our Constitution, which took away the rights of the States in this matter and transferred that power to Congress. This was ratified by employment of the same threats and boodle on January 16, 1919, the Volstead alleged enforcement act was appended, and the trick was done.

President Wilson vetoed this Volstead measure, but Congress, obedient to its Anti-Saloon League masters, passed the bill over his veto. Whatever prejudiced critics may say, President Woodrow Wilson proved himself a stanch believer in the rights of the individual, and he fully realized that these acts were taking away the rights of the American people.

PROHIBITION PRODUCT OF DUPLICITY

In the rush of the aftermath of the cessation of war, little popular attention was paid to the eighteenth amendment. I am no proponent for the old-time saloon. Its delinquencies are upon its own head. But I do know, and the unprejudiced person must so admit, that the people generally believed that, even with the ratification of the eighteenth amendment, provision was to be made by Congress for those who desired to have alcoholic beverages in their homes. I know that hosts of representatives of the people, whether in Congress or in the various State legislatures, believed the same when they voted to ratify that amendment. In fact, that was the impression craftily held out by the dry forces at that time.

Why, even so-called "bone-dry" Kansas back in the old days, where even then prohibition was a failure, had no law preventing people having liquor in their homes. And of six States that went dry by vote of their people in 1916 and 1918—Arizona, Colorado, Montana, Oregon, Utah, and Washington—practically all made no penalty for possession of liquor in homes, or made provisions privileging citizens to send out of the State and have liquor sent to their homes. These six States, by the way, have about 4.2 per cent of the population of the United States.

In any event, the average legislator, whether State or National, voted for ratification of the eighteenth amendment, never dreaming that he was signing away his right and that of his people, to "life, liberty, and the pursuit of happiness," as guaranteed by our Constitution. As a matter of fact, the vast majority believed that, with our boys and the Allies victorious and war's upheavals subsiding, we would readily rewrite the regulations of prohibitoin to meet the wishes of the great majority—that, at the uttermost, those States desiring to remain dry could do so, and those contrary-minded could act accordingly. We were confident we would retain our proud position as a free people.

"Free people!" We found ourselves in bondage. We then fully realized how a group of professional "reformers" and fanatics took advantage of the people while our Nation was in the war, secured a strangle hold on the public's supposed servants, and forced these legislators to do their bidding. The mass of the American people had no voice in the whole proceeding, and that is why the aggressive protest and dissatisfaction over prohibition is climaxing. We are in the shackles of the Anti-Saloon League, its fanatics, and its hirelings who usually vote "dry" and live "wet," and who profit from its millions of bribing dollars! I declare here that the Anti-Saloon League is the foremost ally of bootlegging, with its crime, murder, graft, and governmental demoralization. It is a partner in the bullets, the bombs, and the lawbreaking of the bootlegging gangs!

KILLINGS MARK ATTEMPTED ENFORCEMENT

And what of the billions that our Federal Government has expended in the vain effort to enforce this utterly unenforceable Volsteadism? The record written is blood, bribery, and official malfeasance, in addition to the lavish waste of money. It is a record of rottenness. Prohibition agents have become killers second only to the bootleggers murdering among themselves in the contest to control the flow of poisonous booze. I could cite killings by prohibition agents from Michigan to Florida, but of these nauseous chapters the Nation is all too familiar.

The innocent citizen all too often has been the victim of the irresponsible Government snooper. A recent report listed 13 prohibition agents being harbored at one time from unbiased State justice by the Government. Charged with murder or manslaughter, these "hair-trigger" snoopers were being withheld from prosecution in State courts by the convenient interference of Federal courts at the request of prohibition bureaucrats. The rule with our prohibition so-called enforcement outfit is evidently "kill first and investigate afterwards."

The type of men employed as prohibition agents is a crying scandal and an American shame. Of the whole gang, exactly three-fourths of them could not pass an ordinary civil-service examination. This vast majority proved that as a class they were illiterate, know nothing, conscienceless boobs. As a distinguished Member of the Senate has pointed out, they probably would have passed the examination if the questions—these few are offhand, as I have not his perfect roster of queries before me—had been somewhat like these:

How many times a month should a bootlegger be "shaken down"?
What should be the average "shake down" of the average "soft-drink parlor"?
Can you buy a "nightcap" in a haberdashery?
Should all wine be classed as "sacrilegious wine"?
Do you believe a murder a day makes snooping pay?
Do you believe that a snooper's tin badge permits you to murder at pleasure, or is there a closed season?

But the type of the human parasite that seeks enlistment in the prohibition force is too well known to merit extended comment. The majority seem to seek snooping jobs because they are "on the make." They see the opportunities for graft. As measured by their literacy in the civil-service test mentioned, the majority volunteer from the undesirable element. Moronic minds are to be found among them. One was apprehended the other day for attacking a 9-year-old girl. The decent American abhors such a job. He will not seek it. The men of the United States Army do not want to be dragged into this spying. The Coast Guard men, who are being hauled into this service, detest it, as do the men of our Navy. The operations of enforcement agents, in short, have been marked by a trail of blood, graft, and lawlessness. To that shameful record has been added the improper use of public funds in the planting of made-to-order "speak-easies," deliberately planned to induce law breaking and literally manufacturing victims for these snoopers. The Bridge Whist Club, in New York City, for the creation of which Government funds to the extent of $44,886 were spent, still yields an odoriferous memory and stands as a vile example of the web-spinning, trap-setting tactics of prohibition and its Government agents who can not enforce it.

THE "OHIO GANG" AND PROHIBITION

And what of the minority that has applauded such lawlessness and high-handed methods of impossible enforcement? First and foremost stands that organization whose operations soar to the sky—the Anti-Saloon League. Born in Ohio, it aptly is branded with memories of the "Ohio gang" that left its scars of corruption and graft upon one Federal administrative term. The "Ohio gang" was a hard-drinking, poker-playing outfit that bowed to the Anti-Saloon League, twin product of its State, because of political policy, but otherwise it was out for what it could grab. When the "Ohio gang" moved to Washington and the "little green house on K Street" was opened, the Anti-Saloon League also moved its congressional and administration-control forces to Washington. It is this league which has fought so desperately to prevent any popular referendum on prohibition.

Our Nation well knows the products of the "Ohio gang"—its oil scandals, its scandals of the surplus Army goods, of the Standard Aircraft case, of the American Metals case, of Daugherty, of Jesse Smith, of Charles Forbes, of Fall, of Sinclair, and of hosts of others. Out of its shadows even have come flashes of Will Hays, former chairman of the Republican National Committee, peddling Harry Sinclair's Liberty bonds from the Continental Trading Co. in a covert effort to cover over the stains of oil on the Grand Oil Party's "dough bag."

It has truly been said that these scandals, which ruined the reputation of a government, were under the patronage of the Anti-Saloon League. Through all its noisomeness the Anti-Saloon League, with its control of government, was complaisant. The league then, as now, held that a good government is one that makes sumptuary regulation paramount; that executes abuses of search and seizure; that encourages overthrow of citizenship's rights; that surrenders utterly to Volsteadism's

tyranny. Rascals in politics, as then was demonstrated, can deliver themselves to the league in so far as their official power is concerned, and thus gain immunity at its hands for their outrages against public probity and governmental honor. I affirm that it was more than mere coincidence that the movement of this league, aspiring constantly as it is to be our supergovernment, and the political corruption of the "Ohio gang" were timed as they were in their invasion of Washington, our National Capital.

THE ANTI-SALOON LEAGUE'S $70,000,000

It is imperative, if honest government is to exist, to expose the scandals of oil and its queer millions of profits of the mysterious Continental Trading Co., but what of the tens of millions of dollars that have been gathered and even more mysteriously expended by the Anti-Saloon League? This organization, to which rights of citizenship mean nothing, has collected its tens of millions from its dupes and fanatical followers, and there never has been any public accounting of its enormous funds or the avenues of their expenditure.

As nearly as experts of investigation have been able to estimate, the Anti-Saloon League's collections throughout the years from 1883 to 1926, inclusive, aggregated the staggering total of more than $67,500,000. With its harvest during the past year, the total must be around $70,000,000. It hides its money-grabbing desperately, however, and but a few, with these not even fully informed, handle its dollars. Measures should be taken to force this organization, which assumes to control the Government of our Nation and the governments of our States, to come out in the sunlight of publicity with complete statements as to where its swag comes from and where it goes.

And now this Anti-Saloon League is seeking $10,000,000 more! What for? Is it planning a gigantic crusade of corruption in connection with the coming presidential campaign? Neither of the major parties will have in the hands of its national committee any sum near that. The league talks of needing that monster amount for expenditure "within the next five years." That is camouflage. It knows the people are aroused, and it hopes to keep on top in this year's contest by the sheer force of dollars! It eagerly takes its dollars, too, from whoever tenders them. What of that supposedly sainted merchant who handed over $500,000, and then was exposed by the courts of New York State, upon action brought by his wife, as having contributed to the delinquency of a minor, as maintaining a "love-nest" for his victims, and as having liquor in this illicit nook? His contribution was made at the meeting proposing this staggering $10,000,000 war-chest. Did the Anti-Saloon League turn back his filthy dollars? No. It has made itself all the more detestable by its vain effort to set up fruitless excuses for hanging on desperately to this half million.

LEAGUE'S DOLLARS SPREADING CORRUPTION

What have the Anti-Saloon League's unaccounted-for millions been expended for? We are finding that out, despite its armor of secrecy. The Anti-Saloon League set itself up as the custodian of public morals. It established a single standard by which public men had to acquire merit in its eyes, or its money was used to hound them out of office. It required only that a person holding or seeking public office deliver himself to the league as for prohibition, and no other question was asked. With its single standard, the league took no account of its minion's political morals or public or private conduct. Rascality thus found a ready cloak under which to hide its corruption and evil. Unless a man surrendered and complied with its mandate, the league used its money—and plans to use it again in the same way—to ruin a public man and destroy his character. If the political crook was professedly dry, when it came to his vote and official action, he was held up as spotless by this conscienceless league, and he even was permitted to profit from its dollars.

The "Ohio gang's" nauseous record proved that it was not necessary to be personally dry. Delivery for the league in public was all that was required. The league thus encouraged the development of unbounded rascality. It provided the mask of false morality to cover any evil. This single standard of the league protected even Len Small and covered Frank L. Smith blanketwise out in Illinois.

The latter's misconduct, his financial relations with the public utilities which he controlled as chairman of the Illinois Commerce Commission, had proved him unfit for an office of trust and responsibility. Did that matter to the self-haloed Anti-Saloon League? No. It had the chance to support even another dry candidate of admitted character and ability. But it supported Frank L. Smith because it thought Smith could win. He did get the votes, but the United States Senate kicked him off its doorstep. That opportunism of the league revealed its utter indifference to decency. The league again thus admitted that what public men do is immaterial so long as they deliver themselves and their votes to its vile mastery for its pretended enforcement of one solitary law!

Its game was revealed in Indiana, too, where the Rev. E. S. Shumaker and D. C. Stephenson, as cooperating bosses of the league and the Ku-Klux Klan, respectively, ruled tyrannically for a time. The league cared not for the clamping down of tyrannous and abusive laws on citizens so long as its paid agents enforced support of the single law of prohibition. But Shumaker, by his impudence inspired by league dollars and presumed power, ran into a sentence for contempt of the Supreme Court of Indiana, and Stephenson was sent to the penitentiary for life for murder—for the murder of a defenseless woman. The league's superintendent in New York State, William H. Anderson, was convicted of third-degree forgery in connection with his handling of money collections. Its director in New Jersey was convicted of libeling judges because they did not interpret the law as this would-be supergovernment body desired. Out in Kansas, funds collected by its superintendent there, it was revealed, were paid to a judge of the State supreme court and to a state's attorney general.

These and other offenses have been without scruple. Court decisions and upright judges have been mocked and libeled. Laws that violate every human right have been pushed through subsidized State legislatures. It is rule or ruin with the Anti-Saloon League. Cases noted—and the list could be extended for many columns—are typical of the outrages in national and State administration against the decencies of government and public life, against the rights of citizens and the principles of American society, of the stains upon American honor and reputation, all of which are the fruits of Volsteadism and the operations of its prime promoter, the Anti-Saloon League. Is it to be wondered at that the league clings with the tenacity of a drowning man to the $500,000 dumped in by Sebastian S. Kresge, even after a separation trial revealed that this donor's life was besmirched in the very particulars in which these pretended moralists of the Anti-Saloon League propose to regulate American citizenship? How many more of his tribe are in its masked ranks?

VOLSTEADISM HURTS LABOR AND BUSINESS

But I say with assurance that the forces of Volsteadism are disintegrating. They are finding it more and more difficult to fool the people. They have harped on the contention that prohibition has bettered our economic and industrial life. They point to increased deposits in our savings banks. That falsity was swallowed only by the careless. But now our people realize that with the close of the World War, and thus practically coincident with the inauguration of national prohibition, there was such an economic and industrial upheaval in this country as the world never before had experienced.

It was this readjustment forced by new conditions that sent wages in the United States to the highest levels known in any country on the face of the globe. Did prohibition accomplish that? Bosh! Did prohibition make this country the custodian of the bulk of the whole world's supply of gold? Piffle! Prohibition had nothing to do with it, nor with the fact that wages now three to five times those paid in antewar and preprohibition days accounts for increased savings and better living conditions our Nation over. That result ensued despite prohibition, as a matter of truth, and prohibition is the dire factor that has interfered with the adjustment of war debts. It is needless to deal at length with this phase of the problem. But it may be repeated that business to-day, big and complex as it is, stands for true temperance as against fanatical prohibition.

There is, however, one feature of Volsteadism affecting national business that is not always pointed out. Recently the National Bank of Commerce of New York issued a special bulletin stressing the imperative need of alcohol in modern American business. Its analysis proved that alcohol is one of the indispensable raw materials of American industry to-day. It pointed out that Germany's attainment of the front rank in chemistry a decade or so ago was due to its government's liability as to industrial alcohol. Synthetic industrial materials are being created in greater number constantly. You do not even need lumber to build a home. This carefully compiled bulletin affirmed flatly that "Alcohol is necessary to any real development of the chemical industry." It proved that science, technology, and economics are suffering, due to Volsteadism and its blind fanatics, because of its hampering the supply, quality, and distribution of industrial alcohol.

Gen. James G. Harbord, head of the Radio Corporation of America, has pointed out that the crowding of Federal court dockets with liquor cases has resulted in voiding the rights of many inventors, and discouraged research because patent rights are not enforced or even adjudicated. At a recent convention of the Finance Companies' Association, it was declared by its general counsel that ruthless, rash, and unjust seizure of auto-

mobiles by prohibition agents constitutes a serious danger to business. I am advised of the case of a Chicago manufacturer of mirrors who was compelled to resort to legal injunction in order to obtain a supply of industrial alcohol which is absolutely necessary in his business.

So national prohibition even has business by the throat. The prohibition czars of our Government arbitrarily decree reductions of alcohol production, the total arbitrary decrease for the last year having been 5,000,000 to 10,000,000 gallons. These decrees are not scientifically based on probable business needs, but are promulgated merely on the basis of how much these dictators believe is being diverted for beverages purposes. Talk about communism! If that is not the essence of communism, I know not what is. It is that sort of thing which always has paralyzed governmental undertakings. The economic world well may laugh at this effort to budget industry in this mighty Nation of ours. The quantity of any material is absolutely not subject to guessing forecast, because it varies from day to day with the ebb and flow of business.

PROHIBITION NOT PART OF CHRISTIANITY

But Volsteadism is slipping badly. It is but the true reaction of human nature at its best that it should. The Volstead fanatic would have us believe that it is sinful to take a drink. Where in the name of Heaven does he find ground for such attitude? In touching on this angle of the problem, I wish to deal reverently with one phase that often is but lightly dwelt upon. This Nation was founded upon the very doctrines set forth by the Holy Bible. The spirit of that book permeates the Declaration of Independence and the bill of rights. It dominates the Constitution of the United States—until we reach that eighteenth amendment. The latter violates that spirit, just as it directly opposes all that has been written before relative to life, liberty, and the pursuit of happiness.

Just laws are written into all statute books with the avowed purpose of prevailing against, or forbidding, evil and sin. I contend that the eighteenth amendment in no event whatsoever properly has a place in the Constitution, for under no interpretation under the sun is it anything more than a mere police regulation. But, aside from that, if prohibition is a just law, it must be shown that drinking temperately is in itself sinful. But no attestation to that end is found in the Holy Bible. Drunkenness, which we all abhor, but which Volsteadism constantly is increasing, is forbidden. But nowhere in the pages of the Bible is temperate drinking held to be sinful. If temperate drinking is sinful why did the greatest figure the history of our world has ever known, the Christ, the founder of our faith, partake of drink?

I contend that no true Christian who claims to follow the teachings of the Christ can be a prohibitionist without denying the Christ he professes to follow. Among the first of the miracles was His turning of water into wine at the marriage feast of Cana in Galilee. But some fanatics insist that was unfermented wine—that it did not have time to ferment. That contention is to deny the efficacy of the miracles. The divine power that turned water into wine easly could have aged the wine also. And, in proof that this was so, the gospel of St. John (2:10) records that the governor of the feast said unto the bridegroom:

> Every man at the beginning doth set forth good wine; and when men have well drunk, then that which is worse: but thou hast kept the good wine until now.

Can we imagine such a wedding feast in this day? Prohibition agents would be breaking in when the wine was served, probably without a search warrant as our law requires, and perhaps firing revolvers promiscuously and wounding or killing some of the guests!

CHRISTIANITY TEACHES TRUE TEMPERANCE

Again inveighing against those who could be won neither by the manners of John the Baptist nor of Himself, the Divine Redeemer said, as recorded in the gospel of St. Luke (7:33–34):

> For John the Baptist came neither eating bread nor drinking wine; and ye say, He hath a devil. The Son of man is come eating and drinking; and ye say, Behold a gluttonous man, a winebibber, a friend of publicans and sinners.

There must have been fanatics and hypocrites in those days who would have made prize members of the Anti-Saloon League.

We know that the Apostles, except for one who remains branded as the vilest betrayer and traitor in history, followed the example and wishes of the Christ. So we always recall Paul's advice to Timothy in his first epistle (5:23):

> Drink no longer water, but use a little wine for thy stomach's sake and thine often infirmities.

It was Solomon the Wise, son of David, whom the drys are so prone to quote as to one declaration, who said (Proverbs, 31:6):

> Give strong drink unto him that is ready to perish, and wine to those that be of heavy hearts.

And yet the Anti-Saloon League vengefully sought to crucify the fearless attorney general of Indiana, the official who broke the Shumaker régimé, because he honestly admitted that he had obtained some good whisky for medicinal purposes when a member of his family lay very ill—and who asserted he would do the same thing again in like circumstances.

So, from the New Testament or the Old, citations can be made in great number utterly disproving that temperate drinking is sinful. Why, in the Second Book of Samuel (6:19) we find it written of David himself, after he had laid low the blustering Goliath of Gath:

> And he dealt among all the people, even among the whole multitude of Israel, as well to the women as men, to everyone a cake of bread, and a good piece of flesh, and a flagon of wine.

A David will arise among us one of these days to cast the fatal stone that shall lay low Anti-Saloon Leagueism for all time.

Volstead fanatics hold up the false impression that all must drink liquors to excess if they are again made available legally. That temperance and personal liberty are upheld by the Bible is shown by that story of the old-fashioned party recorded in the Book of Esther (1:7–8) about 519 B. C., with King Ahasuerus as host:

> And they gave them drink in vessels of gold (the vessels being diverse one from another), and royal wine in abundance, according to the bounty of the king. And the drinking was according to law; none did compel, for so the king had appointed to all the officers of his house, that they should do according to every man's pleasure.

But Solomon, so often quoted in one particular by the drys, did utter these words (Proverbs, 6:16–19):

> These six things doth the Lord hate; yea, seven are an abomination unto him:
>
> A proud look, a lying tongue, and hands that shed innocent blood,
>
> A heart that deviseth wicked imaginations, feet that be swift in running to mischief,
>
> A false witness that speaketh lies, and he that soweth discord among brethren.

Let the Anti-Saloon Leaguers and the prohibition fanatics measure themselves by those seven things that are pronounced hateful to God!

HONORED AMERICANS OPPOSED PROHIBITION

But to come down to recent generations. History tells us that it was not puritanism and fanaticism that won victory in our Revolution, built up our country, and placed our Nation upon firm foundations. It was not prohibitionists who won the Civil War and determined that our country should not be divided. To quote those who have gone before us is to bring the adjuration of those whom the whole world ever will respect for their wisdom. It was the martyred Abraham Lincoln who said:

> Prohibition will work great injury to the cause of temperance. It is a species of intemperance within itself, for it goes beyond the bounds of reason, in that it attempts to control a man's appetite by legislation and makes a crime out of things that are not crimes. A prohibition law strikes a blow at the very principles on which our Government was founded.

Hosts of patriots who contributed to America's greatness could be quoted, but time does not afford. I do wish to call attention to one statement that was prophetic of what has occurred. Speaking in Plymouth Church, Brooklyn, on December 3, 1882, Henry Ward Beecher drew this intimate picture of human nature when he said:

> In America a law with no popular public sentiment behind it, or with no active good behind it, is like a gun with no powder in it. Next comes the question of the right of the law to determine whether a man shall or shall not drink. On that subject I am in favor of men not drinking—unless you tell them that they shall not drink. And so, if any man or any community were to say to me, "You shan't drink wine when you think it best," I would say, "I will," with no other reason but to show that I am a free man. But if my physician should say to me, "It is not wholesome, it is mischievous for you," appealing to my reason and judgment, then I would say, "It is no matter; I will not."
>
> If men should undertake to hold a rod over my head, and should say, "We will expose you to the contempt of the community and to disgrace if you drink wine," I would say, "I do not care for the community; in a thing which concerns me the community shall not touch me, as I in the things which concern the whole community have no right to touch them!"

I hold, therefore, that there is a personal liberty in this matter, a domain that must not be invaded by sarcasms, nor by sundry obvious influences brought to bear upon me. Leave to every man his personal and individual liberty. Diminish his temptation by persuasion, by good reasons, and by kindly influence, but not by authority—not by coercion.

There is a prophecy in those words that has been frightfully fulfilled. Law-abiding citizens of the best class have been turned into lawbreakers by prohibition. Bootleggers have become rich selling poisonous booze unlawfully. Thousands have been blinded, paralyzed, or rendered insane, even if they escaped the cemetery, by vile liquor. Even our Government, to please the Volstead fanatics, puts poison in the alcohol which has caused the deaths of hosts of people. But recently a Kansas City mother presented to the Senate a claim for $200,000 for the death of her son due to the drinking of poisoned alcohol. Her petition now is in the hands of the Committee on Claims of that body. Charges have been made on this floor repeatedly that the Government thus is a party to murder. But prohibition officials refuse to discontinue use of poisons, on the ground that other denaturants have proved unsatisfactory. And the Anti-Saloon League threateningly demands that stand. This mother, as quoted in the newspapers, expressed her true object thus:

What I want to do is to stop murder by the Government. I didn't place a price of $200,000 on my boy. I wouldn't have taken a million dollars for him.

PHYSICIANS ARE OPPOSED TO PROHIBITION

But, to return to Henry Ward Beecher's prophetic reading of human nature, the great cause of temperance that he and others of his day had fostered by teaching the evils of intemperance and of prohibition has been all but destroyed by Volsteadian fanaticism. There is no such thing as temperance throughout the land to-day. Prohibition promotes excesses. If true temperance is to be restored, a halt to existing and increasingly demoralizing conditions must be called at once.

I should like at this point to note a statement made by Dr. Charles A. L. Reed, former president of the American Medical Association, in addressing the American Public Health Association. He said:

In a republic it is dangerous to talk about the fetish of the Constitution. But it is being made a fetish by Volsteadians. No constitutional provision nor any laws enacted thereunder that violate the fundamental law of human well-being ever have been or ever ought to be observed by an independent people. Alcohol is a normal constituent of brain tissue. It is like the gas of your motor, an energizer. When it is exhausted, it must be replaced.

Here is a medical man of highest standing who frankly affirms, and who knows, that the human brain needs alcohol in temperate quantities. Of course, the Anti-Saloon League probably will deny that. It's a wonder that gang has not sought to stop the whole metabolism of the human body by enacting a law to that effect! However, practically everybody knows that our bodies are laboratories manufacturing alcohol. When a man gets it no other way, he eats a good deal of sugar, or candy, and the sugar turns into alcohol in his body. No wonder candy has become so popular under prohibition. The Anti-Saloon League should rush in and stop its manufacture!

And what alcohol does in energizing the brain is shown by the history of the races using alcohol and those not using it. I can see why a Buddhist, a Mohammedan, or a follower of Confucius might be a prohibitionist, for their religions teach prohibition. But what of them? Of the nations noted for abstinence from alcohol not one has reached the position of even a second-class power. Some may say that Turkey is coming somewhat to the fore. Perhaps. But it is doing so by casting off its old living habits along with the fez and the yashmak. There are 100,000 white British soldiers in India, and these, plus the lawmakers of Great Britain 7,000 miles away, hold beneath their thumbs and rule 300,000,000 water-drinking Asiatics. That's where the Anti-Saloon League should expend its energies—in Asia. It might rule India's millions, provided, of course, that Great Britain, as it probably would, did not expel its schemers and fanatics forthright. However, that's another reason why these fanatics never will succeed in supergoverning these United States. Our people are not of the breed, patient and long-suffering as they have been for some years, who will stand for such watery, hypocritical domination!

CHURCH AFFIRMS PROHIBITION'S FAILURE

And I repeat, I can understand how the followers of certain religions can be prohibitionists. But I contend that no true Christian claiming to follow the teachings of the Christ can be a prohibitionist without denying the Christ he professes to follow. So much for Volsteadism and the Anti-Saloon League and their claims as to religious authority! Further, religious denominations and churchmen who heretofore have been inclined to let them have their way, as opposed to true temperance, daily are adding their voices to this challenge, as I shall show.

But a few months ago Bishop H. T. Partridge, of Kansas City, bishop of the Episcopal Church in western Missouri, declared that prohibition has resulted in an era of pocket flasks, and that the United States soon will have to face modification of the Volstead Act or some other solution of the "temperance problem."

"Fermented wine," he asserted, "is a God-given gift—a divine symbol of joy—and to bar it by human legislation is a violation of the Christian principle of citizenship. If a man wants a glass of beer, drinking it moderately, there is no reason in the world why he should not have it."

He might have added that to bar fermented wine by human legislation would mean to attempt to alter the very processes of nature, as devised by the Great Creator, by a puny statute. However, following that statement, failure of prohibition was attested by an official poll of the American clergy of the Protestant Episcopal Church. A tabulation of the vote showed the following results on the questions presented:

Is prohibition a success in your locality? Yes, 445; no, 745.

Have we had this law long enough for a fair trial? Yes, 950; no, 621.

Regardless of one's attitude toward the use of liquor, do you believe a prohibition law offers the best solution of the problem of intemperance? Yes, 624; no, 1,138.

Should the Volstead Act be modified? Yes, 1,032; no, 592.

Should the eighteenth amendment be repealed? Yes, 825; no, 793.

The Protestant Episcopal Church is officially in favor of law observance—

Said the Rev. Charles A. Livingston, chairman of the publicity committee of the National Church Temperance Society, in making public these results—

But our survey shows that the clergy as individuals are not in favor of the Volstead law. The answers from the South and West average the same as those from the East. They do not want the saloons, but in the interest of morality they believe that prohibition ought to go. Beer has been taken away and distilled poison put in its place. When prohibition has been given time to demonstrate what a fallacy it is, its elimination will be easy as well as lasting. The disgust with the law was never so much in evidence as it is now, and it is not confined to any particular section of the country, but it is nation-wide.

There is no compromise in that statement. Following another announcement as to this questionnaire but a few weeks ago, when 1,305 clergymen had voted "no" as against 501 voting "yes" on the question of whether prohibition was a success in their respective localities, Doctor Livingston said:

The majority favor modification of the Volstead Act with some form of Government control, as in Quebec. In addition to the answer on postal cards, hundreds of letters have been received from bishops and rectors in every State in the Union. An analysis of these reveals the vast majority hold that prohibition is wrong in principle and contrary to Scripture. They contend that even if 100 per cent of enforcement could be obtained prohibition still would be a failure.

REPEAL WILL PROVIDE EFFECTIVE RELIEF

Now, why do I demand repeal of the eighteenth amendment and of its Volstead Act appendage? The fanatics of Volsteadism uplift their hands in assumed holy horror. But I contend that the right of repeal is as sacred as is the right of enactment. There is naught but commendableness in the organization of citizens for the purpose of bringing about, by legal means, the modification or repeal of any law which those citizens consider unwise, inexpedient, unscientific, or unenforceable. It is the right of the free citizen to advocate the enactment of any law based on elementary morality, or the repeal or modification of any existing law, and to associate himself with others in that effort. That position and right has been most forcibly expressed by that patriotic citizen, that efficient executive, that champion of personal liberty, the Governor of the State of New York—the Hon. Alfred E. Smith. It is the right of the people, as he has so untiringly and emphatically contended, to organize to oppose any law and any part of the Constitution with which they are not in sympathy. That is the very base of free speech and of our constitutional guaranties.

The best that Congress and the State legislatures could do in a legal way under the eighteenth amendment to relieve existing conditions would be to permit an alcoholic content just below the intoxicating point. The problem of the "intoxicating point" still is a moot question. But let us grant even the exaggerated claims of the Volstead fanatics. The intoxicating

point for beer, then, may be somewhere between 2 and 3 per cent alcohol by volume. Wine never contains less than 9 per cent alcohol by volume. If under 9 per cent it turns to vinegar. Therefore, with the eighteenth amendment prohibiting "intoxicating beverages," wine might be held always an intoxicating beverage. Under the eighteenth amendment's restrictions it would be impossible, in that case, for Congress or any State legislature, to legalize the manufacture, sale, and transportation of wine. That is the fact of the matter. Let us be frank about it.

In this connection, I wish to quote a few statements uttered by Senator EDGE, of New Jersey, who is regarded as the author of the initial so-called "beer and wine" bill—a proposal introduced several times in varying forms because the Judiciary Committee repeatedly shelved such projected measures. Senator EDGE is not of my political faith, but he spoke for the liberals of his political fold. One of his assertions was: "If I had the power I would amend the eighteenth amendment to provide for a reasonable distribution of hard-spirit beverages, not through the medium of saloons, which, however, have not ceased under present restrictions, or through drug stores, but under governmental supervision and surrounded by every possible safeguard."

EVEN EDGE SAYS AMEND THE CONSTITUTION

Again Senator EDGE stated:

I frankly admit in advance no complete relief is possible without amending the Constitution. As I have repeatedly stated, the power of Congress is necessarily confined within the terms of the Constitution—the eighteenth amendment. If we go too far, the Supreme Court would undo our work.

Another declaration by Senator EDGE was:

While convinced the American people can be trusted not to abuse modification in any parallel degree to the existing violation of the Volstead act, it will nevertheless be seen that I have refrained from suggesting the legalizing of so termed "light wines." I would favor such an amendment did I believe it would stand the test. I can not conceive a wine that would not necessarily contain more alcohol than 8 per cent, and I feel that would be determined by the court a violation of the eighteenth amendment. * * * Therefore, as much as it is to be desired, combining "light wines and beer" is in my judgment an uncertain proceeding. Two and seventy-five one-hundredths per cent beer can clearly be permitted by statute. At least no one can assert with knowledge that it would be unconstitutional. The legality of wine is at the best questionable.

It was Senator EDGE, by the way, now a proponent of repeal, who voiced the whole story of opposition to prohibition in these words:

The individual man, when he stands upon his plain right, will not down. His house is his castle and his life is his own. What service and obedience he owes to those in authority he renders as he should. He stands, if need be, alone and single-handed against the law; behind him, as his inspiration, he has a thousand years of the tradition of individual liberty. There is a spirit in him that kings have never conquered, that parliaments have never compelled, that the scourge has never beaten out, and that fire has never consumed.

BORAH ADMITS FEAR OF REPEAL

Even that distinguished Republican Senator from Idaho, who is beset with the peculiar hallucination that he can remove the stain of oil from his "grand oil party" by passing the hat for contributions to repay Harry Sinclair for the bonds which the latter gave Will Hays to peddle to meet a Republican organization deficit, has admitted that repeal is the true objective for those who oppose prohibition and its fanaticism. He has confessed:

The American people will never get the intoxicants—

He is the sort who think anything other than absolute dryness, which has been proved impossible, is intoxicating—

that some of them think they want, by puttering around with so-called amendments to or modifications of the national prohibition act, commonly called the Volstead Act.

The Constitution of the United States stands between them and any modification of the Volstead Act that would give them intoxicants. Any claim that such modifications would give them what they seek is a mockery as hollow as it is unconstitutional. I know of no way that we can legislate for intoxicants so long as the Constitution remains as it is. In a single sentence, if there is going to be any change in the prohibition policy, program, or legislation, there must first be a change in the Constitution.

That's frankness, isn't it? None of his dry associates, including the schemers of the Anti-Saloon League, ever have shown quite such candor. It gets further from the viewpoint of anti-Volsteadism than the Senator will get in wiping the oil stains off his party's machine by his hat-passing and hurdy-gurdy soliciting. It adds proof, however, that if we are to end the lawlessness and crime of prohibition and make progress toward the reorientation of personal liberty and true temperance we must wipe the slate clean by repeal, create new national legislation, or vest such power in the various States for individual action.

WORLD WAR VETERANS DEMAND ACTION

Veterans of the World War have expressed themselves, as they should. They were foremost among those double-crossed by the Anti-Saloon League and the fanatics of prohibition. They were offering their lives while the paid agents of Volsteadism were putting over their game. In the heat of war excitement, when our people were buying bonds to send billions to Europe and our finest young men were marching down to be herded on transports, prohibition went through with a bang. And its fanatics made it good and tight while they were about it, as we have seen. It all was done in war's semihysteria, and the veterans now controlled by the prohibition law had no chance whatsoever to vote on this vile thing, or even to have a voice in it. Had they been infants in the cradle, but a fortnight old, they could have had no more to say about this particular law which now controls their mode of living. But they know, as the people now realize, that bootleg whisky, which sometimes makes you blind, sometimes kills you, and always poisons, is not to be tolerated in our proud country.

Edward E. Spafford, national commander of the American Legion, has put it this way:

No government can exist which does not enforce its laws, or which resorts to a breach of the fundamental principles of liberty in order to enforce a law which has not the sanction of the best thought of the community. Inasmuch as the strength of any law rests upon the strength of the governed, it should have the unqualified consent of the people.

If the will of the people is for the retention of the eighteenth amendment and of the Volstead Act every effort of the Government should be bent toward their enforcement. Gangsters should be reformed or annihilated; the man who lends his property or countenance to illict acts should be ostracized from the society of law-abiding citizens. If, on the other hand, these provisions have not the approval of our citizenry they should not remain a dead letter which permits people to scoff at our institutions, but should be removed from our public records.

THREE COURSES OPEN TO THE PEOPLE

In the circumstances, it has been pointed out that there are three courses open to our people. We can drift along, as we are doing, into nullification to the point where juries will convict in no case, and where everybody who wants to make a living by bootlegging can do so, with crime and lawlessness and disrespect for all law constantly increasing. As an alternative, we can bring about the amending of the eighteenth amendment, as well as the Volstead Act, in a legal way. Those who urge this course have proposed among other means the so-called "Buck plan," sponsored by Dr. F. W. Buck, of the present Federal Dispensary-Tax Reduction Tax League, as far back as 1914.

This plan would amend the eighteenth amendment by substituting a comma for the period after the first section of the amendment and adding the words, "excepting the Government." Proposed coordinate amendment of the Volstead law would permit the Government to license breweries, wineries, and distilleries to manufacture pure liquors, under Government supervision and inspection, for sale under Government control, and permit no liquors to be bottled until they have been properly aged in wood. Provision would be made for the Government to establish dispensaries on the basis of not more than one in cities up to 50,000 population, and in like ratio in larger cities, with postmasters acting as dispensing agents in towns and country districts. Penalties would restrict consumption to homes or specifically designated places.

The third, and final, course of procedure is to repeal the eighteenth amendment and the Volstead Act utterly, and this is the course I advocate. Then proper provision can be made for Government control, supervision, inspection and sale. Thus we would build anew, and not potter around with the amending of existing provisions in the Constitution or the statutes now bearing upon this vital problem. Let us abolish the unsatisfactory mess and start anew.

NATION'S LAWYERS ADVISE REPEAL

This demand for utter repeal is finding favor among the foremost associations of lawyers, just as it has been approved by various business organizations and religious denominations.

Conscientious lawyers, I believe, have been able to gauge better than citizens who are not lawyers the fearful effects of forcing prohibition upon unwilling citizens and communities, of its inevitable breeding of disrespect for all law, of its creation of intolerable congestion of our courts, of its substitution of immense graft for the taxes alcoholic beverages formerly paid to the State, and of prohibition's evils distracting political attention from vital issues of domestic and foreign policies.

There is deep significance in resolutions recently adopted by bar associations of New York City and Philadelphia. The Law Association of Philadelphia directed most emphatically the attention of all other bar associations, city, county, and State, to the evils resulting from the Volstead Act and the eighteenth amendment. The Association of the Bar of the City of New York, after several meetings and a final closed session, adopted a resolution by a three to one vote declaring that the prohibition amendment and the Federal enforcement law based upon it—

should be repealed, and the whole subject of prohibition be remitted to the sole regulation of the several States.

This is the most sweeping antiprohibition resolution yet adopted anywhere by a powerful bar association; and the argument in its favor, as summarized in the preamble, included the categorical affirmation that the eighteenth amendment is inconsistent with the spirit of the rest of the Federal Constitution and violative of the bill of rights. Politicians may prefer evasion and shuffling, but such emphatic action is indicative that the day of settlement is at hand.

Action must be had to remedy conditions. Lawbreaking in this country, inspired by contempt for the constitutional prohibition provision, is as widespread as bootleg whisky. The "perfectly respectable" citizen who would instantly and remorselessly jail a man for breaking the law against stealing an overcoat boasts his skill in breaking the prohibition law, and invites his friends to share in the results of his lawbreaking. The people resent the action of the Federal Government in trying to dictate every detail of their lives. They are tired of having Federal officers tell them what they shall drink, what they shall eat, where they can play, and even where they can fish. Our Government, by this dictatorial paternalism, is forcing our people into lawlessness and whetting their minds for anarchy. They resent snoopers spying on their every action, and protest against being dictated to in any way that may wreck their happiness.

PROHIBITION PROMOTES GRAFT AND BRIBERY

Bribery is everywhere as part of the law-breaking spirit of the day. The bootleggers bribe governmental officials for protection and immunity, and then our Federal Government exacts as income tax without shame its share of the bootleggers' profits from this infernal, corrupting traffic. Various cases now are pending in the Federal courts aimed to force certain ringleaders of bootlegging to pay up proper income taxes on their unlawful profits. Such a situation should be a national reproach. It makes our Government literally the financial partner of the booze peddler.

Hijackers in turn prey upon the bootleggers. Many are killed, but there is no "squealing," for that would mean more summary deaths. Kidnapping in various cities has been reduced to a fine art, the victims usually being high-powered bootleggers, who thus are made to divide their profits among the less successful or smaller fry of their "profession." Crime is an organized business, and a gigantic wholesale business at that. In one little county down in southwestern Illinois a former police magistrate recently confessed that he had aided a group of officials in squeezing $150,000 in graft from local bootleggers within a very brief period.

In one great city profits from bootlegging and beer running, not counting in hijacking robberies and such subsidiary profits, are conservatively estimated as running as high as $70,000,000 a year. Every modern means is utilized in these operations—machine guns, motor cars, power boats, flying machines, and even submarines. All along the Canadian and Mexican borders rum running is rampant.

The entire United States Army, multiplied many times, could not adequately patrol those borders and keep out forbidden alcohol. Superbootleggers, keeping in the background, finance wholesale operations through "perfectly respectable" financial institutions that exact terrific rates of interest for this financing of crime. A few years ago we would have thought of organized crime and bobbed-hair girl bandits as distorted dreams. But to-day, in this great and powerful country, we find that prohibition has made them realities.

PROHIBITION COSTS BILLIONS IN TAXES

A noted financial publication, after months of careful survey, recently estimated the cost of prohibition at $2,077,000,000 annually. Why, that is like reading the tax rolls of States, counties, cities, and the Federal Government combined! Try to contemplate the billions that prohibition has cost the Government in excise taxes! And the people are crying for tax reduction and tax relief. If we had true temperance in this country, with the manufacture and sale of pure alcoholic beverages supervised and controlled by our Government, the profit would be sufficient to permit us to reduce individual taxes to the minimum. We could reduce our monster national debt as we pleased. We could facilitate the wiping out of war debts, because prohibition would not interfere with foreign trade that is necessary to effectively aid our debtors to pay up.

The farmer is crying for help. Stamp out prohibition and the farmer will find a market for his grain crops. Prices will be stabilized, and they will be thriving prices, too. He can blame the Anti-Saloon League and its fanatics for the loss of his markets in the lean years he has experienced. An authority affirms that even modification of the Volstead Act, which would allow the brewing of beer alone, would result in 10,000,000 acres of land being used for the growth of barley.

And what has all this staggering financial loss to all the people had to balance it? Nothing but crime, graft, and lawlessness in such degree as never before could have been imagined. The liquor-enforcement division of the Department of Justice last December gave out figures showing that since the enactment of prohibition the Federal courts alone had imposed fines aggregating more than $42,000,000 and jail sentences totaling more than 22,500 years. At the close of the fiscal year in June, 1927—the Government never is up to date with its statistics—there had been 223,507 convictions. Yet all the effort and expenditure, all the convictions, all the activities of armies of prosecutors and snoopers had not made a perceptible dent in the constantly increasing bootlegging, with its growing horrors of law-breaking, graft, deaths, and red-handed crime!

About the same time figures were given out in Toronto showing that 11,000,000 Americans had visited Canada between January 1 and September 30, last year, and spent an estimated $100,000,000. And what of the Americans who visited Mexico, Cuba, Europe, and other liberal segments of the world, and of their additional tens of millions of expenditures? What is to be done in the face of all this?

THE LEGAL INDICTMENT OF PROHIBITION

In these circumstances prohibition stands indicted on more counts than any criminal ever arraigned. I am presenting this formal indictment in rather legal verbiage. Its counts, as drawn, have been approved by some of the most distinguished of American lawyers. Here are the charges that stand against prohibition, its fanaticism, and its harvest of evil and sin:

First. The eighteenth amendment is inconsistent with the spirit and purpose of the Constitution of the United States and in derogation of the liberties of citizens and of the rights of the States as guaranteed by the first 10 amendments thereto.

Second. The eighteenth amendment and the laws purporting to be enacted in pursuance thereof have proven a source of confusion and hindrance in the interpretation and administration of the entire body of the law, and impaired respect for law in general.

Third. Violation and disregard of it has been, and is, participated in, or connived at, by all grades of society and by public servants intrusted with its enforcement.

Fourth. The eighteenth amendment and the statutes, orders, and regulations purporting to be adopted thereunder, and the abuses practiced in the alleged enforcement thereof, have brought about conditions of crime, fraud, corruption, and lawlessness in such proportions and to such extent as to inculcate a general lack of respect and downright contempt of law.

Fifth. These conditions and abuses pervade the Government and every branch of our social, political, industrial, and religious life, and have become a serious detriment to the welfare and moral health of the country, and a peril to stability of government.

Sixth. In its alleged enforcement unlawful searches and seizures have been resorted to generally the country over.

Seventh. It has been the medium of disturbing time-honored international relations.

Eighth. It has embarrassed, obstructed, and impaired foreign trade. Through it the Federal Government has extended its activities into affairs which under the Constitution were guaranteed local to State governments and immune from Federal interference.

Ninth. It has stimulated in the Federal Government and its authorities extensions and arrogations of influence moving toward consolidated Federal democracy with unlimited power, hostile to the spirit of our Federal Republic, with its defined and limited powers.

Tenth. It has lowered the Government in the esteem of the people until it is the subject of world-wide ridicule and scorn.

Eleventh. It has stimulated the spirit of aggression in the Federal Government until it is seriously proposed to extend the Federal judiciary system and confer upon commissioners magisterial powers and authority to punish, imprison, and fine in the States without trial by jury.

Twelfth. An amendment which by its own terms is limited in its applicability to alcohol for beverage purposes is by the courts construed as authority to limit or proscribe alcohol for medicinal and trade use.

Thirteenth. With remote responsibility for the character of appointees under it, criminals of low degree have been intrusted with its administration, and have ruthlessly slain citizens and had protection of the Government.

Fourteenth. Under it our governmental system is being so insidiously poisoned as seriously to impair its efficiency, if not to endanger its continued existence.

Fifteenth. It has evoked demand for relief and correction from leaders of thought in religious life.

Sixteenth. The promised good has not materialized, but instead thereof the evils aforesaid have resulted and are growing steadily worse.

REPEAL IN TOTO IS DEMANDED

Gentlemen and ladies of the House, on this indictment the crime-engendering, corruption-breeding, manhood-destroying, youth-endangering, graft-promoting, government-threatening eighteenth amendment, along with its impotent so-called enforcement provision, the Volstead Act, should be repealed utterly.

I ask your support of my resolution to this end. A forest fire is fought by every human being residing in the sector where it rages. A national war grounded in justice brings every loyal citizen to action. Our country is truly in danger because of this intolerant, malignant prohibition. Respect of all law is threatened by Volsteadian fanaticism. Let us clean the slate! Repeal this amendment and its accompanying act, and create new legislation that shall blot out utterly, for the welfare of our Government and of all our people, the terrors and blood of prohibition. We must act. Our people so demand. Let us have absolute repeal. If we fail, the oncoming generations will not. But they will brand us as traitors to our Nation, its homes, its industry, its life.

CHINA

Mr. BLACK of New York. Mr. Speaker, I ask unanimous consent to proceed for eight minutes on the subject of China.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for eight minutes. Is there objection?

There was no objection.

Mr. BLACK of New York. Mr. Speaker, pending operations in China present clear proof that we should have a policy with a world perspective. To consider that the present bedevilment of China by Japan is of no American concern is childish.

We have many practical reasons for interest. First of all, there is the nine-power treaty, to which we are a party. Then must be thought of our trade relations with China. If we sign a treaty with foreign powers, we expect them to have all the sanction of law. If Japan intends a permanent occupation of Shantung or even of Manchuria, the Japanese violate a solemn treaty made with us. We of Congress do not know the terms of assurances the State Department has received from Japan in this regard. The Congress and the people should be informed.

A Japanese army in Shantung argues for permanent occupation. This was the aim of Japan at Versailles, but under the leadership of this country the Japanese surrendered such designs in the treaties negotiated at Washington.

The Chinese have as much right to national independence as any other people. Probably no revolutionary movement has promised as much for world progress as the program of the Koumingtang. It is highly progressive, promising political advancement modeled on our institutions. The reactionary imperialism of Japan should not defeat this forward step that indicates, if adopted, that over 800,000,000 of God's children will advance. China will either be a free nation contributing to world improvement, or a subject of Japan, more backward than heretofore.

Our country established the original contacts of Japan with occidental civilization. Also we have, under the inspiration of John Hay, insisted on the sovereignty of China and equal trading rights for all powers.

We have thus been friendly with both countries—and we owe to ourselves as well as to them to help China get its place in the sun.

We have been recognizing the provincial government of Peking as the Government of the China Republic. The Cantonese control much of China—and their program of constitutional reforms has the support of the Chinese, even beyond those within the military sphere of Gen. Chiang Kai-shek.

I have introduced a resolution providing that it is the sense of the House that this country recognize the Nationalist Party as the government of China. We are to-day recognizing the Pekin Government that is only a government of the Province of Pechili. It is almost entirely repudiated by the Chinese people. I would like to see our Government become realistic. I would have it the first to take advantage of cooperating with the party responsible for national progress in China by giving diplomatic courtesy to the agents the Nationalists send here. I believe that this country should receive these men with all diplomatic courtesy. It is my idea that if we want to help them progress we should recognize the progressive party in China that has become the de facto government and should be considered because of its program and because of its reception by the Chinese people as the de jure government.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. BLACK of New York. Yes.

Mr. CHINDBLOM. The gentleman realizes that while he may offer a fine expression of opinion he is encroaching on the prerogatives of the President.

Mr. BLACK of New York. We have a Foreign Affairs Committee in this House and they are here for some purpose, and Congress should have something to say about its foreign affairs. [Applause.]

ORDER OF BUSINESS

Mr. CHINDBLOM. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. The gentleman from Illinois asks unanimous consent to proceed for three minutes. Is there objection?

There was no objection.

Mr. CHINDBLOM. Mr. Speaker, I presume on Monday the consideration of the Consent Calendar will begin at the first bill on that calendar. We are, however, approaching the end of the session. There are a great many bills on the calendar which will never be reached unless we begin to take up the calendar from the beginning and go through to the end. I express the hope that while we do begin on Monday with the consideration of the first bill thereafter when the calendar receives attention we may proceed until all the bills are ultimately called before adjournment.

Mr. CRAMTON. That would be the natural course, because Monday is consent day, and any later action for a call of the calendar will be a special occasion, and it would be natural to do what the gentleman suggests.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred to the appropriate committee, as follows:

S. J. Res. 156. Joint resolution to stay proceedings for the condemnation of squares 727 and 728 in the District of Columbia; to the Committee on Public Buildings and Grounds.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 457. An act to create a board of local inspectors, Steamboat Inspection Service, at Hoquiam, Wash.;

H. R. 6104. An act to amend sections 57 and 61 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909;

H. R. 11479. An act to reserve certain lands on the public domain in Valencia County, N. Mex., for the use and benefit of the Acoma Pueblo Indians;

H. R. 13511. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; and

H. R. 12632. An act to provide for the eradication or control of the European corn borer.

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 3793. An act authorizing the St. Croix Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Croix River near Grantsburg, Wis.;

S. 4345. An act authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Kansas City, Kans.;

S. 4357. An act authorizing Henry Horsey, Winfield Scott, A. L. Ballegoin, and Frank Schee, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Des Moines River at or near Croton, Iowa; and

S. 4381. An act authorizing H. A. Rinder, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebr.

BILL PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, a bill of the following title:

H. R. 11133. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1929, and for other purposes.

ADJOURNMENT

And then, on motion of Mr. MAPES (at 4 o'clock p. m.), the House adjourned until to-morrow, Sunday, May 20, 1928, at 2 o'clock p. m.

COMMITTEE HEARING

Mr. TILSON submitted the following notice of a committee hearing scheduled for Monday, May 21, 1928, as reported to the floor leader by the clerk of the committee:

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To regulate the distribution and promotion of commissioned officers of the line of the Navy (H. R. 13683).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

532. A letter from the Comptroller General, transmitting supplemental report of claims for compensating persons who suffered property damage or personal injury due to the explosions of the naval ammunition depot, Lake Denmark, N. J., July 10, 1926 (H. Doc. No. 310); to the Committee on Claims and ordered to be printed.

533. A letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Skagit River, Wash. (H. Doc. No. 311); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

534. A letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Stilaguamish River, Wash. (H. Doc. No. 312); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. ELLIOTT: Committee on Public Buildings and Grounds. H. R. 13665. A bill to provide a building for the Supreme Court of the United States; with amendment (Rept. No. 1773). Referred to the Committee of the Whole House on the state of the Union.

Mr. SCHNEIDER: Committee on Immigration and Naturalization. H. R. 13793. A bill relating to records of arrival of certain immigrants, and for other purposes; with amendment (Rept. No. 1774). Referred to the Committee of the Whole House on the state of the Union.

Mr. BEERS: Committee on the District of Columbia. H. R. 7341. A bill to authorize the payment of additional compensation to the assistants to the engineer commissioner of the District of Columbia; without amendment (Rept. No. 1775). Referred to the Committee of the Whole House on the state of the Union.

Mr. BEERS: Committee on the District of Columbia. H. R. 7342. A bill to fix the salaries of the members of the Board of Commissioners of the District of Columbia; without amendment (Rept. No. 1776). Referred to the Committee of the Whole House on the state of the Union.

Mr. HALL of Indiana: Committee on the District of Columbia. H. R. 8300. A bill to provide for the acquisition, improvement, equipment, management, operation, maintenance, and disposition of a civil air field and any appurtenances, inclusive of repairs, lighting and communication systems, and all structures of any kind deemed necessary and useful in connection therewith; with amendment (Rept. No. 1777). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 13447. A bill authorizing and directing the Secretary of Agriculture to establish and maintain a dairy and livestock experiment and demonstration station for the South at or near Lewisburg, Tenn.; without amendment (Rept. No. 1778). Referred to the Committee of the Whole House on the state of the Union.

Mr. BUTLER: Committee on Naval Affairs. H. R. 13884. A bill to authorize the Secretary of the Navy to proceed with the construction of certain public works, and for other purposes; without amendment (Rept. No. 1779). Referred to the Committee of the Whole House on the state of the Union.

Mr. LAMPERT: Committee on the District of Columbia. S. 4126. An act authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved, and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances; with amendment (Rept. No. 1780). Referred to the Committee of the Whole House on the state of the Union.

Mr. SPROUL of Kansas: Committee on Indian Affairs. H. R. 10372. A bill regulating Indian allotments disposed of by will; without amendment (Rept. No. 1781). Referred to the House Calendar.

Mr. DREWRY: Committee on Naval Affairs. H. R. 13876. A bill to authorize the construction of barracks and mess hall for enlisted men at the naval training station, Hampton Roads, Va.; with amendment (Rept. No. 1785). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. UNDERHILL: Committee on Claims. S. 363. An act for the relief of Louise M. Cambouri; without amendment (Rept. 1760). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. S. 443. An act for the relief of Larry M. Temple; without amendment (Rept. 1761). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. S. 513. An act for the relief of the Hottum-Kennedy Dry Dock Co., of Memphis, Tenn.; without amendment (Rept. No. 1762). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. S. 1645. An act for reimbursement of W. H. Talbert; without amendment (Rept. No. 1763). Referred to the Committee of the Whole House.

Mrs. LANGLEY: Committee on Claims. H. R. 4609. A bill for the relief of M. L. Willis; without amendment (Rept. No. 1764.) Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 7392. A bill for the relief of John I. Fitzgerald; without amendment (Rept. No. 1765.) Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 9716. A bill to pay Charles H. Salley, of Salley, S. C., for costs, disbursements, and commission as administrator of the estate of Jim Woodward, deceased; without amendment (Rept. No. 1766). Referred to the Committee of the Whole House.

Mr. LEAVITT: Committee on Claims. H. R. 9862. A bill for the relief of M. T. Nilan; with amendment (Rept. No. 1767). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 10045. A bill for the relief of Robert S. Ament; with amendment (Rept. No. 1768). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 11500. A bill for the relief of Ella Mae Rinks; with amendment (Rept. No. 1769). Referred to the Committee of the Whole House.

Mr. CELLER: Committee on Claims. H. R. 11510. A bill for the relief of Montana State College; with amendment (Rept. No. 1770). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 12612. A bill for the relief of E. W. Gillespie; with amendment (Rept. No. 1771). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 13498. A bill for the relief of Clarence P. Smith; with amendment (Rept. No. 1772). Referred to the Committee of the Whole House.

Mr. IRWIN: Committee on Claims. S. 3314. An act for the relief of John J. Fitzgerald; with amendment (Rept. No. 1782). Referred to the Committee of the Whole House.

Mr. IRWIN: Committee on Claims. S. 3931. An act for the relief of Augusta Cornog; with amendment (Rept No. 1783). Referred to the Committee of the Whole House.

Mr. IRWIN: Committee on Claims. H. R. 2492. A bill to extend the benefits of the employers' liability act of September

7, 1916, to John L. Jenifer, a former employee of the Government Printing Office, Washington, D. C.; with amendment (Rept. No. 1784). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (H. R. 13801) for the relief of John Bowie, and the same was referred to the Committee on War Claims.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MICHENER: A bill (H. R. 13899) authorizing the Secretary of the Interior to issue patents for lands held under color of title; to the Committee on the Public Lands.

By Mr. WELCH of California: A bill (H. R. 13900) to exclude certain citizens of the Philippine Islands from the United States; to the Committee on Immigration and Naturalization.

By Mr. RATHBONE: A bill (H. R. 13901) to provide for the establishment of a national employment system and for cooperation with the States in the promotion of such system, and to regulate the expenditure of moneys that shall be appropriated for such purposes; to the Committee on the Judiciary.

By Mr. FRENCH: A bill (H. R. 13902) to provide for the examination and commitment of persons charged with crime in the District of Columbia who are alleged to be insane; to the Committee on the District of Columbia.

By Mr. BERGER: Joint resolution (H. J. Res. 314) directing the President of the United States to call an international conference for the purpose of revising the terms of the treaty of Versailles, the terms of the reparation agreements entered into thereunder, and to rewrite the Versailles treaty in accordance with the terms upon which the German people laid down their arms; to the Committee on Foreign Affairs.

By Mr. SMITH: Resolution (H. Res. 215) relative to the installation of an amplifying system in the House of Representatives; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRAND of Ohio: A bill (H. R. 13903) granting an increase of pension to Orpha A. Kilgore; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13904) granting an increase of pension to Talitha J. Todhunter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13905) granting an increase of pension to Emma C. Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13906) granting an increase of pension to Lydia D. Porter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13907) granting an increase of pension to Nettie Bay; to the Committee on Invalid Pensions.

By Mr. COCHRAN of Pennsylvania: A bill (H. R. 13908) to correct the military record of Claude L. Ryhal; to the Committee on Military Affairs.

By Mr. COHEN: A bill (H. R. 13909) granting a pension to William H. Bruns; to the Committee on Pensions.

By Mr. CRAIL: A bill (H. R. 13910) granting an increase of pension to Leona Healey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13911) granting an increase of pension to Adwilda Vinyard; to the Committee on Invalid Pensions.

By Mr. ELLIOTT: A bill (H. R. 13912) granting an increase of pension to Roy Smith; to the Committee on Pensions.

By Mr. W. T. FITZGERALD: A bill (H. R. 13913) granting a pension to Benjamin F. Yazel; to the Committee on Invalid Pensions.

By Mr. FREEMAN: A bill (H. R. 13914) granting a pension to Margaret S. Spelman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13915) granting an increase of pension to Anna C. Raud; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13916) granting an increase of pension to Emily J. Williams; to the Committee on Invalid Pensions.

By Mr. HARE: A bill (H. R. 13917) to compensate Arthur Ashley Burn, sr., for the loss and death of his son, Arthur A. Burn, jr.; to the Committee on War Claims.

By Mr. KNUTSON: A bill (H. R. 13918) granting a pension to Angeline Woolsey; to the Committee on Pensions.

By Mr. MORGAN: A bill (H. R. 13919) granting a pension to Margaret Kilkenney; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13920) granting an increase of pension to Sarah B. Woodruff; to the Committee on Invalid Pensions.

By Mr. MORROW: A bill (H. R. 13921) for the relief of Arch L. Gregg; to the Committee on Claims.

By Mr. MURPHY: A bill (H. R. 13922) granting a pension to Emma C. Fryer; to the Committee on Invalid Pensions.

By Mr. SPEAKS: A bill (H. R. 13923) granting a pension to Bessie Puckett; to the Committee on Pensions.

Also, a bill (H. R. 13924) granting an increase of pension to Sarah O. Acheson; to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 13925) granting a pension to Rhoda Dixon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13926) granting an increase of pension to Celestia A. Finks; to the Committee on Invalid Pensions.

By Mr. WRIGHT: A bill (H. R. 13927) for the relief of Virgil Leon; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7719. By Mr. BEERS: Memorial from members of the Woman's Christian Temperance Union, in Juniata County, favoring the passage of the Jones-Stalker bill; to the Committee on the District of Columbia.

7720. By Mr. FITZPATRICK: Petition of David T. Lamond, treasurer Lee & Simmons (Inc.), protesting against the passage of the Vinson bill, known as the cotton futures trade act; to the Committee on Agriculture.

7721. By Mr. KIESS: Petition of Avis Union, Woman's Christian Temperance Union, of Avis, Pa., favoring the passage of the Lankford Sunday rest bill (H. R. 78); to the Committee on the District of Columbia.

7722. By Mr. KINDRED: Resolution of the Long Island Chamber of Commerce (Inc.), urging the United States Board of Engineers for Rivers and Harbors, in behalf of the committee on ports and waterways of the Long Island Chamber of Commerce, to approve of the recommendations for the improvement of Manhasset Bay made by the district engineer and the division engineer now before said Board of Engineers for Rivers and Harbors; to the Committee on Rivers and Harbors.

7723. By Mr. O'CONNELL: Petition of Lee & Simmons, New York City, opposing the passage of the Vinson bill (H. R. 13646) and the Smith bill (S. 4411); to the Committee on Agriculture.

7724. Also, petition of the New York Board of Trade and Transportation, New York City, opposing the passage of House bill 13646, the Vinson cotton futures act; to the Committee on Agriculture.

7725. Also, petition of the national council of the Steuben Society of America, New York City, favoring the passage of the Shipstead bill (S. 1481); to the Committee on Immigration and Naturalization.

7726. Also, petition of the Bricklayers, Masons, and Plasterers International Union of America, Washington, D. C., favoring the passage of the Bacon bill (H. R. 11141), providing for employment of resident workers on Federal contracts; to the Committee on Labor.

7727. By Mr. QUAYLE: Petition of the New York Board of Trade and Transportation of New York City, opposing the passage of House bill 13646, entitled "The cotton futures trading act"; to the Committee on Agriculture.

7728. Also, petition of the Bayway Terminal, of New York City, protesting against the passage of House bill 13646, entitled "Cotton futures trading act," as damaging to their interests; to the Committee on Agriculture.

7729. Also, petition of the American Fluoride Corporation, of New York City, favoring legislation which has for its object the investment of the Post Office Department with discretion in the mailing of merchandise now classed with the poisons; to the Committee on the Post Office and Post Roads.

7730. Also, petition of Lee & Simmons, of New York City, opposing the passage of House bill 13646 and Senate bill 4411, entitled "The cotton futures trading act"; to the Committee on Agriculture.

7731. Also, petition of national council of the Steuben Society of America, New York City, favoring the passage of the Shipstead bill (S. 1481); to the Committee on Immigration and Naturalization.

7732. Also, petition of Bricklayers, Masons, and Plasterers International Union of America, Washington, D. C., favoring the passage of House bill 11141, providing for employment of resident workers on Federal contracts; to the Committee on Labor.

HOUSE OF REPRESENTATIVES

SUNDAY, *May 20, 1928*

The House met at 2 o'clock p. m. and was called to order by Mr. HAWLEY, Speaker tempore.

The Rev. Dr. F. C. Reynolds, pastor of the Wesley Methodist Episcopal Church, offered the following prayer:

Our Heavenly Father, in whom we live, and move, and have our being; Who gives us life, and breath, and all things; help us to get at this hour a vision of Thy greatness, to realize that the universe is Thy creation, and it is Thy home; and we being the children of the loving Heavenly Father, the universe is our home. And as in our home we can not get lost, we can not get beyond the care of the home, so when we pass out into the boundless universe through the gates of death we do not go beyond the care of Him who is the source of infinite life and infinite love. In this vision of Thy goodness and greatness may we abolish the foolish fear of death. For death can have no meaning other than that it is the narrow gate to the larger life, the open portal through which we pass from this realm of pent up limitations to that of boundless possibilities.

So, our Father, we come then, not as those for whom the life beyond the grave is wrapped in impenetrable darkness; but as those who know Him who has brought life and immortality to light; and hence we have gathered here for a memorial service, not a service of mourning. These coworkers and friends who knew our brother in the exacting service of his country consider it proper and altogether fitting to assemble here, the place of so much of his service for the common good, to call to remembrance some of the deeds which have advanced the good of our country, and some of the expressions of his sterling character. The flesh must meet its mortal fate; but the spirit will never see death. And the things of the spirit have no alliance with death. So his words and his deeds are the product of his spirit; and they are spirit and they are life; and their influence can not die. Manifest Thy presence in our midst as we recall the services of this useful life. We ask in the name of our Lord. Amen.

The SPEAKER pro tempore. Without objection, the reading of the Journal of the proceedings of yesterday will be deferred.

There was no objection.

MEMORIAL EXERCISES FOR THE LATE REPRESENTATIVE M. E. CRUMPACKER

The SPEAKER pro tempore. The Clerk will report the special order.

The Clerk read as follows:

Ordered, That Sunday, May 20, 1928, at 2 o'clock p. m., be set apart for memorial exercises in commemoration of the life, services, and character of the late Hon M. E. CRUMPACKER, former Representative from the third district of Oregon.

Mr. SINNOTT. Mr. Speaker, I present a resolution and ask for its consideration.

The SPEAKER pro tempore. The gentleman from Oregon presents a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 216

Resolved, That the business of the House be now suspended, that opportunity may be given for tribute to the memory of Hon. M. E. CRUMPACKER, late a Member of this House from the State of Oregon.

Resolved, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of these exercises, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was unanimously agreed to.

Mr. SINNOTT. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks in the RECORD.

The SPEAKER pro tempore. The gentleman from Oregon asks that all Members may be given unanimous consent to extend their remarks in the RECORD on the subject of to-day's memorial. Is there objection?

There was no objection.

Mr. TILSON. Mr. Speaker, the going into the unknown beyond of any colleague with whom we serve and associate here on the floor of this House is always an occasion for solemn thought as well as sadness over our loss. When the departed colleague has lived to a normally ripe age, and especially if he has had opportunity to round out a full measure of service here, the blow of his taking is to some extent softened. It is peculiarly sad, however, when a man so young, so full of life, hope, and promise as our departed friend CRUMPACKER is taken from us with his work only begun. It is sadder still that the fatal malady which took him was not one of the usual bodily ills of which we sometimes think we know something, but was the kind of malady of which we can understand so little, that lays hold upon the higher and nobler side of our being and makes reason topple from its throne.

No one ever came to Congress with brighter prospects of a career of distinguished public service than did MAURICE E. CRUMPACKER. He came in the prime of mature young manhood, of antecedents well known on account of notable public service, with unusually fine scholastic training, with a personality of the rarest charm. He made friends readily, quickly, and in great numbers. Surely no one within the short period of time he served here could have hoped to be more successful in this regard.

It has been one of the privileges I have enjoyed during my service here to have younger members early in their service come to me for help and advice in making a fair start in their work. Sometimes it is in connection with some question relating to parliamentary procedure, but more often as to a sympathetic older brother for the benefit of longer experience as to the kind of work by which they may best serve. CRUMPACKER came to me early and quite naturally because I was one of a comparatively small number of members who had served in Congress with his father. His genial and winsome personality attracted me at once and from that time onward I was genuinely interested in him and in the possibilities of his congressional career.

In June, 1927, about a month before his death, I arrived in Seattle returning from a trip to the Orient. CRUMPACKER met me at the dock and most earnestly urged me to pay him a visit at his home in Portland. A few days later he came back to Seattle with an automobile, and with him I had the privilege of seeing advantageously some of that rich and favored region lying between Seattle and Portland. Best of all it gave me an opportunity to learn more of the man CRUMPACKER himself. My previous favorable impressions of him were more than confirmed. He talked out his heart to me, his hopes, his ambitions, what he planned to do and how he meant to set about it. Everything he said was tinged with hope and high ideals. He thought I could help him and most gladly I promised to do so.

It was my further privilege to visit for three days in his home just outside of Portland and it has never fallen to my lot to be more graciously or more hospitably entertained. His home life was happy and truly beautiful. An air of refined dignity and culture pervaded the home, and with it all a genuineness of cordiality that left no doubt as to the sincerity of the welcome extended.

Service during a single term in Congress does not as a rule give time for anyone, however able or fortunate he may be, to make a record of great individual deeds accomplished. He does well who joins with others in helping to make a record of useful joint service as a responsible member of the body to which he belongs. Even a single term here, however, is enough to give unmistakable evidence of what may be expected if opportunity for continued service be given. Measured by this standard, CRUMPACKER ranked high among the newer Members from whom those who observe the capacity of Members as they come, expected much in the future. His high resolve, coupled with his fine ability and charming personality, augured well for a career of distinction and great usefulness. His tragic going shocked and saddened us all beyond the power of words to adequately express.

Mr. WOOD. Mr. Speaker, it has been said by one of the old philosophers that "whom the gods love die young." How apropos that old saying is to the subject of this memorial, MAURICE E. CRUMPACKER. The gods loved him; everybody loved him who knew him. He died young. He died too young. He died when hope was the most buoyant, when promise was the brightest.

It was my good fortune not only to know him, but to enjoy the friendship of his father and mother, both of whom were remarkable characters. For 16 years Edgar D. Crumpacker represented the district which I have the honor to represent in this House, and while he was here he made for himself a name that will long endure. MAURICE CRUMPACKER'S mother was one of the strongest characters that I think I ever knew. She early impressed that strength of character upon her associates when she came to Washington, and in pursuance of it she was made the first president of the Congressional Club, and after her husband departed from official life here she

was given the extraordinary honor of a life membership in that organization.

Never will I forget the last time I ever saw her. It was during the campaign of 1924. I had made the trip across Ohio, across Indiana, and part way across the State of Illinois with the Coolidge caravan that came from the old home town in the East, on its way to the Pacific. It was the practice and custom throughout that entire pilgramage for some of the ladies representing the political organization of the various communities at which we stopped to meet the caravan just outside the city or town which it was approaching, when a flag presentation would be made. Just outside the city of Valparaiso we were met by a delegation of women led by Mrs. Crumpacker, and there was some time spent in public speaking. She made the speech of acceptance.

It was the consensus of opinion entertained by everybody that the speech made by Mrs. Crumpacker was the greatest of all that had been delivered throughout this entire route. Her son MAURICE had just then been nominated for a seat in this House, and with all the anxiety and love of a mother she expressed her deepest feelings to me, on her great desire for the success of her boy. She passed away some months before her son, and it was well that it was so.

Her grief would have been too great to bear had she been here, and better still, she was over on the other side to welcome him. Let us hope that in his passing he found the golden key admitting him to her presence in the palace of eternity.

Mr. JOHNSON of Washington. Mr. Speaker and my colleagues, as a neighbor and as a friend I wish to pay a brief tribute to the late Representative MAURICE E. CRUMPACKER. The district which he represented, Multnomah County and the important northwest city of Portland, Oreg., lies across the Columbia River from the district which I have the honor to represent, hence Mr. CRUMPACKER and myself had many interests in common. He was interested in everything pertaining to the Northwest, and on the only occasion when we were in opposition on a piece of legislation affecting the district he represented and the district represented by me, his opposition was of the fairest order, and nothing occurred to breach our friendship. I had the honor to be acquainted with Representative Edgar D. Crumpacker, the father of Representative MAURICE CRUMPACKER, who was a Representative from Indiana for eight terms, and a man of character, power, and influence.

We all hoped that young CRUMPACKER would have as long a service, or longer, in the House as his father had, and in passing I might say that I have served the same length of time that the elder Crumpacker served, and so have my colleague Representative WOOD, and my colleague Representative SINNOTT, and in that space of time I believe the third district of Oregon has been represented by six different Representatives. To my way of thinking, that is not for the best interests either of the Nation or the district. Usually it takes much time to make real advance in this great body. MAURICE CRUMPACKER was one of the exceptions. His advance was rapid.

When Representative MAURICE CRUMPACKER went to the Pacific Northwest in 1912 to find himself a home and to begin the practice of law, he stopped for a time in Tacoma, Wash., the largest city in the third congressional district, and took part that fall in the Republican campaign in that State. A little later he settled in Oregon at Portland.

The rapid rise of the young Congressman from Portland who came to the Sixty-ninth Congress was a result of the quickness with which he made his mark and the ability with which he extended his acquaintance, as well as his ability to grasp quickly all parliamentary situations.

I had the pleasure the first fall he was here of attending a Gridiron dinner, where I heard him, disguised with three other Members of Congress as strolling minstrels, sing his famous song, "Rolling to the Sea." This was a negro crooning song and rendered by CRUMPACKER in low monotones; the effect was both thrilling and moving.

This was an old Kentucky song, picked up and arranged by John Vance, and sung by Vance and CRUMPACKER years ago at the University of Michigan. The words and music are by Robert Howard Russell, and lately these have been copyrighted by Mrs. Vance. There are two or three versions of this song, but as sung by CRUMPACKER it was as follows:

ROLLIN' TO THE SEA

Once I owned a little cabin on de ole Missippi sho',
Whar I used to sit wif Phyl-lis, ob evnins by de do'h.
And I would have my banjo, she the baby on her knee,
And we watched de river rolling, rolling, rollin' to the sea.

Sometimes the good ole Massa, wiv Missus on his arm,
Would come clean down to de cabin do'h to look about the farm;
And I would pick the banjo, while old Massa'd pat his knee,
And we'd watch the river rolling, rolling, rollin' to the sea.

But I'll never see ole Massa nor ole Missus any mo'
For they have gone forever from de ole Missippi sho',
And the weeds are growin' rank now whar de cabin used to be,
And we watched de river rolling, rolling, rollin' to the sea.

But now I'se got a little farm, wiv chillun ob my own,
And I wouldn't swap my chances wiv a king upon his th'one,
But sometimes in de evenin' I think I'd like to be—
Whar we watched the river rolling, rolling, rollin' to the sea.

My friends, I sometimes think, as I knew the father's strength of character and the strength of body and power of mind of young CRUMPACKER, sane in every way, ambitious and energetic, that perhaps those rare mental attributes that give us poetry, genius, and song swept him, alas, ahead of his time "a rollin' to the sea; a rollin' to eternity."

Mr. KORELL. Mr. Speaker, the richest possessions that a person may acquire in this world are the confidence, respect, and esteem of one's friends and acquaintances. My predecessor, MAURICE EDGAR CRUMPACKER, had all of these. His name is written high upon the honor roll of Oregon's distinguished dead; his memory is enshrined in the hearts of the people of the third Oregon district, which he ably represented in the Sixty-ninth Congress of the United States.

The story of MAURICE EDGAR CRUMPACKER'S life and accomplishments has been fully and most beautifully recounted to you in the very eloquent tributes that have been paid his memory here this afternoon by my distinguished colleagues. Indeed, his character and achievements have been so ably presented by them that there appears to be but little remaining for me to add to what has been already so well and fittingly said. However, this occasion is one of such a nature that I can not forego the opportunity that it affords of saying: In the passing of MAURICE EDGAR CRUMPACKER, Oregon mourns the loss of a man of fine character, of a friendly jovial nature, and a man of broad human sympathy. His heart was full of love and charity for his fellow men. In turn, he was as I have remarked, greatly respected, esteemed, and honored by all.

In the words of Carlyle—

It can be said of him, when he departed he took a man's life with him.

MAURICE EDGAR CRUMPACKER was tolerant, kindly, and cordial to the many with whom he came in contact. And now his cheery voice is stilled. His smile is gone. His labors are over. He lives no longer, but his memory, his spirit, and his influence for good abide and will endure. The world is better for his having been here.

MAURICE EDGAR CRUMPACKER has been laid to rest in the bosom of Oregon on a bank of the beautiful Willamette River, where whispering firs and perfumed flowers softly croon:

Love shall stand guard for thee,
Friends without number,
Bereaved and disconsolate over thee weep;
Sweet be thy dreams,
Untroubled thy slumbers;
Tranquilly, peacefully, restfully sleep.

Mr. Speaker, as one of those who enjoyed the pleasure of MAURICE EDGAR CRUMPACKER'S personal acquaintance and knew the sunshine, good will, warmth, and cheerfulness that always radiated from his wonderful personality, I grieve with his family, his friends, and his fellow citizens at his untimely departure.

Let all of us who mourn his loss find consolation in the immortal lines of him who sang—

I gaze on him and say: He is not dead,
But sleeps, and soon he will arise and take
Me by the hand. I know he will awake
And smile on me as he did yesterday;
And he will have some gentle word to say,
Some kindly deed to do; for loving thought
Was warp and woof of which his life was wrought.
He is not dead. Such souls forever live
In boundless measure of the love they give.

Mr. ALDRICH. It was not until he came to the House of Representatives that I grew to know MAURICE EDGAR CRUMPACKER intimately, although I first met him many years before when he was in the Harvard Law School. Born in Indiana he spent a part of his youth in Washington and finished his

education at the University of Michigan and the Harvard Law School. Wherever he went the influence of his delightful personality was felt. In college he was popular and a leader in athletics and when he came East to study law he rapidly made a host of friends among his fellow students, and occupied a prominent position in the school. He had the faculty of succeeding in everything he undertook.

After graduation CRUMPACKER again went West, this time to Oregon, where he took up the practice of law. You have already heard from the preceding speakers of the position he occupied in the hearts of the people of that State. I know of no greater tribute that they could have paid him than the increased majority by which they returned him to Congress for his second term. They appreciated his worth and had confidence in his ability and integrity.

I have rarely known a man who made friends so rapidly. He had not been long in Congress before his former associates in Boston requested him to speak at one of their most important banquets upon the political problems of the day. The ovation he received on this occasion was an indication of how real and lasting was the admiration of his former schoolmates.

As I have said, I did not have the pleasure of seeing much of MAURICE CRUMPACKER until he came to Congress; but coming in closer contact with him, my feeling toward him rapidly developed into one of real affection. It was easy to understand why he was so universally beloved. His genial manner and kindly disposition brought pleasure and happiness to many. These characteristics made an impression upon all who knew him, both young and old, and of whatever walk in life.

Mr. CRUMPACKER's father, the Hon. Edgar Dean Crumpacker, had a long and distinguished career in this House, and there was every indication that had he lived longer his son would have attained the same eminence. MAURICE CRUMPACKER was a strong and vigorous American, conservative without being reactionary. Possessing a keen mind and great force of character, he applied himself industriously to the study of national affairs and was frequently consulted upon questions before Congress, especially those pertaining to the welfare of his part of the country. He led a useful, patriotic life, and it is a great sorrow to us all that he was not spared to enjoy the brilliant future that lay before him.

It is sad to see any of our colleagues taken from our midst. We grieve for those who have served their country through a long and distinguished career and have reached a venerable age, but the loss of a younger Member, endowed with intelligence, sound judgment, love of country, and integrity, before the country has an opportunity to fully appreciate his value as a statesman seems an almost greater calamity.

Mr. LONGWORTH. The gentleman from Oregon, Mr. CRUMPACKER! Many a time during his comparatively short service in the House of Representatives it was my pleasure as Speaker to call that name when the Member from the third Oregon district asked recognition in the performance of his legislative duties. A hundred times I have heard it acclaimed both within and without the Capitol. From the day he arrived in Washington as a newly elected Member of Congress his popularity was instantaneous. I have known nothing to compare with it. In all my service here I can recall no other Member who so quickly achieved a reputation amounting to genuine fame as did this young man from Oregon.

Yet, primarily, he was not CRUMPACKER of Oregon. He was CRUMPACKER of Indiana, as was his father before him. Crumpacker, the elder, was for many years a Representative from the tenth district of Indiana. It was my pleasure to have served with him for, I believe, 10 years on the Ways and Means Committee, so I may say with some authority that he was in those days recognized as a leader among strong men like Cannon, Clark, Payne, Dalzell, Grosvenor, and Underwood, than which there could be no more convincing evidence that he was a statesman of parts and capacity.

His son, MAURICE, at that time was a schoolboy here in Washington, forming probably many of those contacts which stood him in such good stead when he returned here as a man and a Congressman in his own right.

Certain it was, I think, that his association with his father and with the eminent men with whom he was so intimately connected helped CRUMPACKER the younger to familiarize himself with the devious ways of parliamentary procedure and to knock off some of the rough corners of those legislative obstacles which seem almost insuperable to the average new Member.

Knowing his father as well as I did I think I must have seen MAURICE as a schoolboy, but the first time I recall meeting him was in the winter of 1925, soon after his election when he strode into my office, with that breezy manner of his, and told me that he had come on from Oregon to assure me of his support in my candidacy for Speaker. From that day on our friendship ripened increasingly up to the last.

After he left Washington as a schoolboy his training was such as to admirably fit him for his chosen profession, that of the law, which brought him to Oregon. He graduated at the University of Michigan, with a respectable record as a scholar and with that of an athlete of the first rank. From there he went to Cambridge and graduated at the Harvard Law School. The fact that I had been honored with a degree of doctor of laws conferred by the University of Michigan about the time I first knew him, and was a graduate of Harvard and had spent some time in the law school, brought us into even closer terms of intimacy.

During the months he spent here in the short session before that in which he took the oath of office he exhibited a personality so compelling, and an ability and grasp of public affairs so apparent, that he was appointed at the regular session upon a major committee, that on rivers and harbors—an honor infrequently achieved by any Member at the beginning of his service. As a member of that committee, and as a legislator generally, his industry was indefatigable. His services to his constituency were such that many a man who, I was told during my visit to Portland last summer, had looked upon him rather askance at the time of his first candidacy as more or less of an alien, was loud in his praise of CRUMPACKER as one of the best Representatives his district had ever had.

Most of us here to-day, I venture to believe, are thinking of our late friend not so much as a statesman but as a man and a companion. His flashing, friendly smile—his warm, pleasant voice—his booming, infectious laugh—made of him a unique personality. With a wit and a musical ability amounting almost to genius, he was everywhere in constant demand, and he gave of his gifts to his friends as generously as he gave to his constituents his willingness to toil. Who among us who was here on the day of adjournment of the last session, as the Speaker's gavel fell and partisan rancor gave place to hilarity and good will, and political opponents became in a moment brothers in arms, will forget the time our friend, in response to clamorous demands from all parts of this Hall, sang the song that no man will ever again sing as he sang it—"Rollin' to the Sea!"

Of the end I dare not trust myself to speak. A soldier who had well and bravely served his country; a man of infinite courage and physical prowess; a Representative in Congress at an age when most men are starting a political career—no one could have had brighter prospects. Practically assured of service to his constituency so long as it should please him, with probably even higher place in prospect; a family whom he adored and by whom he was adored—he seemed to have everything to make life worth living. Yet his most intimate friends had known for many years that while he had his almost Olympian heights, he had his depths also. While at most times he was on the top of the wave, at some times the undertow carried him off his feet. Black moments had to be lived through. There was a limit.

His wife and three fine, sturdy young sons survive him. They loved him. They are proud of him. But in only greater degree than we, his colleagues here solemnly assembled to do honor to his memory.

Mr. SINNOTT. Mr. Speaker, a beautiful custom of Congress calls us together to-day. We are met in solemn assembly to discharge a sad, sweet duty to our departed colleague.

There is no flock howso'er watched and tended
But one dead lamb is there;
There is no fireside howso'er defended
But has one vacant chair.

We are gathered around that vacant chair in one of the sweetest of Oregon's families, in the family of MAURICE EDGAR CRUMPACKER—the vacant chair was his.

We are here to treasure his memory.

I did not know him personally until after his election. When he arrived in Washington we soon became warm friends. We often consulted together on matters relating to our respective districts and to the State at large. I thus got to know him intimately. He was a congenial companion. He was a "human-hearted man."

Few Members of only one-term service made such an impression on the Members as he made.

His charming personality and social graces captivated his colleagues and won him recognition not usually accorded a new Member.

His district had many big and difficult problems to solve. These he handled with great skill and tact. He was a deep

student of the wants and problems of his district. He sought and obtained, amid much rivalry and competition, a position on the River and Harbor Committee, so that he might serve the interests of the city of Portland, one of the great harbors of our country, whose principal interest lay in the improvement of the channel to the sea. On this committee his service for Portland was marked and will ever keep his memory green. His aim and ambition was to secure a 35-foot channel to the sea. This he kept continually before his colleagues on the committee with great perseverance, and while he did not during his lifetime realize this ambition, his good work has borne fruit in this Congress, for the River and Harbor Committee, of which he was a member, a few weeks ago voted favorably to adopt the channel improvement for which he fought so valiantly. Much posthumous fame and honor belong to our departed friend for this accomplishment, for this realization of Portland's ambition for a 35-foot channel to the sea.

Another great problem engrossed his tireless energy on behalf of his district and the State, that was the Longview bridge controversy. This he handled with rare tact, diplomacy, and parliamentary skill. Seldom is a new Member confronted with a problem of such magnitude involving his district as confronted MAURICE CRUMPACKER in the Longview bridge controversy. The city of Portland believed that the first proposed bridge would exclude or hamper a large part of its seagoing commerce. The city looked to our deceased friend to protect its interest in the House; it looked not in vain. We all remember his vigilance and constant attendance in the House, his repeated parliamentary objections, as a result of which he held up the bill during an entire session of Congress. The final result was that the original bridge plans were greatly modified in the height of the bridge and in other particulars for the better protection of the harbor of the city of Portland.

His efforts in these two matters alone—the 35-foot channel and the bridge controversy—justified his election to Congress and would have insured his reelection for many terms had he lived.

In the death of MAURICE CRUMPACKER my State has lost an able representative, one who had a real career ahead of him at the National Capital. When I think of our warm personal relations "a thousand memories call," that only a Tennyson "In memoriam" could voice.

I mourn over his passing. I grieve the day—

Which brings no more a welcome guest
To enrich the threshold of the night
With showered largess of delight
In dance and song and game and jest.

MAURICE was the "welcome guest." The "welcome guest" has gone. We met again at eve; he was not there.

Then echolike our voices rang;
We sung, tho' every eye was dim,
A merry song we sang with him
Last year; impetuously we sang.

We ceased; a gentler feeling crept
Upon us; surely rest is meet.
"They rest," we said, "their sleep is sweet,"
And silence followed, and we wept.

I ask to have inserted at the end of my remarks editorial tributes from the Portland Oregonian and Journal of July 26, 1927:

[From the Morning Oregonian, July 26, 1927]

MAURICE E. CRUMPACKER

The surprising death of MAURICE CRUMPACKER at 41 adds another to the impressive list of young men in Oregon who have been summoned suddenly from the scenes of active and useful life. Within a short time there have been Chauncey Bishop, Earl Kilpatrick, Leroy Fields, E. L. Devereaux, John W. Cochran, Clifford Brown, and now the promising and useful Member of Congress from the third Oregon district. It is not a great while ago that Mr. CRUMPACKER's predecessor, Clifton McArthur, a robust and colorful personality, who had gone far in the confidence of the public and in the esteem of his friends, was called away.

A week ago Mr. CRUMPACKER was happy in the entertainment at Portland of his friend and patron, Speaker LONGWORTH. Now this splendid young man lies dead in a distant city. "And man's life is no more than to say 'One'."

Mr. CRUMPACKER had served a single term in Congress, and had been reelected. He was at the opening of a real career, for he had been received at Washington with unusual favor both by his colleagues and by the dominant circle which has so large a voice in proceedings. The qualities which so soon made the way easy for him at the Nation's capital had long been recognized at home—a vivid and likable nature, an adaptability for politics, an intelligent understanding of public affairs, a knowledge of the methods of legislation, and an acquaintance with the leaders of the Nation acquired during his boyhood at Washington. It is remembered that he was almost alone in the Longview bridge fight, so important to his constituents, though he had the powerful aid of the Speaker. But in that memorable contest he showed his quality, and it stood the test.

It is not needful to say much of the events leading up to the strange and mysterious tragedy which ended his life. It is evident that he had somehow been plunged into the depths of melancholy and in a moment of aberration had sought the solace of suicide. It is all most deplorable and shocking. It is well to remember that during a too short life MAURICE CRUMPACKER spread along the way much of the joy that sprang from his abounding vitality and unfailing good temper; that he attached many friends to him with hooks of steel; that he was a man of worth and achievement; and that the passing of such a one leaves a void. Nothing better can be said of anyone than that he left an agreeable memory.

[From the Portland Journal, July 26, 1927]

FATE

Fate moves sometimes in strange and fickle rôles. It seldom works in wilder mood than in ringing down the curtain on the life of Congressman MAURICE CRUMPACKER.

In life, few men were as full of hope and optimism. His sunny nature was rich in generous and gentle qualities that made him welcome in every circle. He cherished no enmities, remembered no grudges. He counted life as a day of laughter with little or no room for tears. Those who knew him best looked on him as almost the last man in the world to whom tragedy could come.

Ahead of him was an unusual public career. After a successful term in Congress, he was newly elected to another. With his charming personal qualities, his popular reception in Washington, his undoubted powers for public service, his expanding congeniality among the folks at home, his gentle relations with all who had ever come under the charm of his personality, there was every assurance that he could have remained indefinitely in useful public service.

His family and social life were all that man could ask. In his home were three lovely children and a wife of delightful personality and charming presence. She was Miss Cully Cook, daughter of Cully Miller Cook and granddaughter of John F. Miller, important and prominent member of one of the oldest and best known pioneer Oregon families. And around his home were social relations to encourage and stimulate and fill any man with hope, happiness, and promise.

And to all this has come Sunday's tragedy and sorrow and finis. Fate is inexorable and strange. The sunlight of yesterday is the mystery of to-day. A career that was full of ecstacy and promise is a broken column now.

Many people are shocked and grieved. They will know no more the warmth and sunshine and greeting of a nature that harbored no ill will, that bore no grievance, that spread no gloom. And because the reports from San Francisco are conflicting and all the circumstances so unusual, a melancholy story goes into the record and the curtain rings down on the career of MAURICE CRUMPACKER.

If we don't understand, it is no reason for surprise. We know little about life, know comparatively little about what is around and about us. There is ether—it is one of the mysteries of the universe. And there is the raindrop—in one of its atoms the electrons revolve trillions of time in a second around a common center, they say, whence, how little we know even about a raindrop.

Mr. SINNOTT assumed the chair as Speaker pro tempore.

Mr. HAWLEY. Mr. Speaker, Hon. MAURICE E. CRUMPACKER, a Representative from the State of Oregon, was born in Valparaiso, Ind., on December 19, 1886; he was the son of Edgar Dean Crumpacker, who served for many years as a Member of this House from the State of Indiana; he received his degree of bachelor of arts from the University of Michigan in 1909 and graduated in law from Harvard in 1912. He went to Oregon in 1912 and was admitted to the practice of law. During the World War he served as captain in the Third Oregon Division for 16 months. He was elected to Congress in 1924, and was reelected in 1926.

In Congress, Mr. CRUMPACKER had attained unusual recognition. His genial personality and evident fitness and preparation for legislative work quickly won a large circle of friends among his colleagues. He was warmly loved, here and in Oregon. He lost his life in San Francisco on July 24, 1927. He is survived by his wife and three small sons.

In his untimely death the State of Oregon lost the services of a man of great ability and fidelity to the public welfare, and the country a young statesman of the greatest promise. His gen-

eral education, legal training, and natural aptitude for public affairs were an excellent foundation for the fame he was steadily attaining. He readily won and maintained the confidence of his associates. Forceful in speech, sound in judgment, capable in analysis, and careful in ascertaining information, he had the great attributes of a destined leader.

He was born a warrior in behalf of causes that are just. He forced the battle for the public interests he served so well. He was a member of that select army of soldiers of the common good.

His service during the World War was distinguished by his successful accomplishment of the work to which he was assigned and for which he was specially fitted. Men loved to follow him. He died undefeated.

In this our public sorrow we pause to express our sincere sympathy to the wife and mother and three sons of our late colleague, to whom his sudden death was the greatest bereavement. Mrs. Crumpacker was a good comrade to her husband, and to her faithful association and wise counsel he owed a great debt. Who can measure the depth of a wife's sorrow or what words indicate her feeling of immeasurable loss. In his memory his young sons have an invaluable heritage.

I knew him well. He was my friend. I watched his career with every hope and confidence that he was a coming man. He was growing in mind, in character, in ability, in wisdom. I have an unshakable confidence in the immortality of the soul, and I shall renew in the best of all worlds an association with him that had grown dear to me.

On July 29, 1927, in the City of Roses, a great assemblage of the notable and outstanding men and women of Oregon and of other States met in Trinity Episcopal Church to pay to him a last great tribute. The hushed stillness was eloquent of sorrow and regret. Roses, beautiful roses, in thousands, strove by their fragrance to impress upon a saddened people the kindliness and lovable nature and character of the man who had brought cheer and happiness to so many. In a life all too short he had spread along his pathway of life much of the joy that springs from an abounding vitality and unfailing good temper.

Such men as he are the hope of the Republic. He still lives and will be long remembered by a grateful people.

Mr. HAWLEY resumed the chair.

ADJOURNMENT

The SPEAKER pro tempore. In accordance with the resolution previously adopted, and as a particular mark of respect to the memory of the deceased, the House stands adjourned until to-morrow at 12 o'clock.

Accordingly (at 2 o'clock and 55 minutes p. m.) the House adjourned until to-morrow, Monday, May 21, 1928, at 12 o'clock noon.

SENATE

MONDAY, *May 21, 1928*

(Legislative day of Thursday, May 3, 1928)

The Senate reassembled at 10 a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Asburst	Fletcher	McMaster	Shipstead
Barkley	George	McNary	Shortridge
Bayard	Gerry	Mayfield	Simmons
Bingham	Gillett	Metcalf	Smith
Black	Glass	Moses	Smoot
Blaine	Goff	Neely	Steck
Blease	Greene	Norbeck	Stephens
Borah	Hale	Norris	Swanson
Brookhart	Harris	Nye	Thomas
Broussard	Harrison	Oddie	Tydings
Bruce	Hawes	Overman	Tyson
Capper	Hayden	Phipps	Vandenberg
Caraway	Howell	Pine	Wagner
Couzens	Johnson	Ransdell	Walsh, Mass.
Curtis	Kendrick	Reed, Mo.	Walsh, Mont.
Cutting	Keyes	Reed, Pa.	Warren
Dale	King	Robinson, Ark.	Waterman
Deneen	La Follette	Robinson, Ind.	Watson
Fill	Locher	Sackett	Wheeler
Edge	McKellar	Schall	
Edwards	McLean	Sheppard	

Mr. CURTIS. I desire to announce the necessary absence of the Senator from Oregon [Mr. STEIWER] on business of the Senate.

Mr. BAYARD. I was requested to announce that the Senator from New Mexico [Mr. BRATTON] is necessarily detained from the Senate in attendance upon the committee investigating presidential campaign expenditures.

The PRESIDENT pro tempore. Eighty-two Senators having answered to their names, a quorum is present. The bill is in Committee of the Whole and open to amendment.

MUSCLE SHOALS (S. DOC. NO. 118)

Mr. McNARY submitted the following report, which was ordered to lie on the table and to be printed:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the title of the joint resolution and agree to the same:

That the Senate recede from its disagreement to the amendment of the House to the text of the joint resolution and agree to the same with an amendment as follows:

In lieu of the language put in by the House, insert the following:

"That for the purpose of maintaining and operating the properties now owned by the United States in the vicinity of Muscle Shoals, Ala., in the interest of the national defense and for agricultural and industrial development, and to aid navigation and the control of destructive flood waters in the Tennessee River and Mississippi River Basins, there is hereby created a body corporate by the name of the "Muscle Shoals Corporation of the United States" (hereinafter referred to as the corporation). The board of directors first appointed shall be deemed the incorporators and the incorporation shall be held to have been effected from the date of the first meeting of the board. This act may be cited as the "Muscle Shoals act of 1928."

"SEC. 2. (a) The board of directors of the corporation (hereinafter referred to as the board) shall be composed of three members, not more than two of whom shall be members of the same political party, to be appointed by the President, by and with the advice and consent of the Senate. The board shall organize by electing a chairman, vice chairman, and other officers, agents, and employees, and shall proceed to carry out the provisions of this act.

"(b) The terms of office of the members first taking office after the approval of this act shall expire as designated by the President at the time of nomination, one at the end of the second year, one at the end of the fourth year, and one at the end of the sixth year, after the date of approval of this act. A successor to a member of the board shall be appointed in the same manner as the original members and shall have a term of office expiring six years from the date of the expiration of the term for which his predecessor was appointed.

"(c) Any member appointed to fill a vacancy in the board occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

"(d) Vacancies in the board so long as there shall be two members in office shall not impair the powers of the board to execute the functions of the corporation, and two of the members in office shall constitute a quorum for the transaction of the business of the board.

"(e) Each of the members of the board shall be a citizen of the United States, and shall receive compensation at the rate of $50 per day for each day that he shall be actually engaged in the performance of the duties vested in the board, to be paid by the corporation as current expenses, not to exceed, however, 150 days for the first year after the date of the approval of this act, and not to exceed 100 days in any year thereafter. Members of the board shall be reimbursed by the corporation for actual expenses (including traveling and subsistence expenses) incurred by them while in the performance of the duties vested in the board by this act.

"(f) No director shall have any financial interest in any public-utility corporation engaged in the business of distributing and selling power to the public nor in any corporation engaged in the manufacture, selling, or distribution of fixed nitrogen, or any ingredients thereof, nor shall any member have any interest in any business that may be adversely affected by the success of the Muscle Shoals project as a producer of concentrated fertilizers.

"(g) The board shall direct the exercise of all the powers of the corporation.

"(h) All members of the board shall be persons that profess a belief in the feasibility and wisdom, having in view the national defense and the encouragement of interstate commerce, of producing fixed nitrogen under this act of such kinds and at such prices as to induce the reasonable expectation that the farmers will buy said products, and that by reason thereof the corporation may be a self-sustaining and continuing success.

"SEC. 3. (a) The chief executive officer of the corporation shall be a general manager, who shall be responsible to the board for the efficient conduct of the business of the corporation. The board shall appoint the general manager, and shall select a man for such appointment who has demonstrated his capacity as a business executive. The general manager shall be appointed to hold office for 10 years, but he may be removed by the board for cause, and his term of office shall end upon repeal of this act, or by amendment thereof expressly providing for the termination of his office. Should the office of general manager become vacant for any reason, the board shall appoint his successor as herein provided.

"(b) The general manager shall appoint, with the advice and consent of the board, two assistant managers who shall be responsible to him, and through him, to the board. One of the assistant managers shall be a man possessed of knowledge, training, and experience to render him competent and expert in the production of fixed nitrogen. The other assistant manager shall be a man trained and experienced in the field of production and distribution of hydroelectric power. The general manager may at any time, for cause, remove any assistant manager, and appoint his successor as above provided. He shall immediately thereafter make a report of such action to the board, giving in detail the reason therefor. He shall employ, with the approval of the board, all other agents, clerks, attorneys, employees, and laborers.

"(c) The combined salaries of the general manager and the assistant managers shall not exceed the sum of $50,000 per annum, to be apportioned and fixed by the board.

"SEC. 4. Except as otherwise specifically provided in this act, the corporation—

"(a) Shall have succession in its corporate name.

"(b) May sue and be sued in its corporate name, but only for the enforcement of contracts and the defense of property.

"(c) May adopt and use a corporate seal, which shall be judicially noticed.

"(d) May make contracts, but only as herein authorized.

"(e) May adopt, amend, and repeal by-laws.

"(f) May purchase or lease and hold such personal property as it deems necessary or convenient in the transaction of its business, and may dispose of any such personal property held by it.

"(g) May appoint such officers, employees, attorneys, and agents as are necessary for the transaction of its business, fix their compensation, define generally their duties, require bonds of them and fix the penalties thereof, and dismiss at pleasure any such officer, employee, attorney, or agent, and provide a system of organization to fix responsibility and promote efficiency.

"(h) The board shall require that the general manager and the two assistant managers, the secretary and the treasurer, the bookkeeper or bookkeepers, and such other administrative and executive officers as the board may see fit to include, shall execute and file before entering upon their several offices good and sufficient surety bonds, in such amount and with such surety as the board shall approve.

"(i) Shall have all such powers as may be necessary or appropriate for the exercise of the powers herein specifically conferred upon the corporation, including the right to exercise the power of eminent domain.

"SEC. 5. The board is hereby authorized and directed—

"(a) To operate existing plants, to construct, maintain, and operate experimental or production plants at or near Muscle Shoals for the manufacture, distribution, and sale of fertilizer or any of the ingredients comprising fertilizer, or any of the by-products of the same;

"(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program;

"(c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce;

"(d) To cooperate with National, State, district, or county experimental stations or demonstration farms, for the use of new forms of fertilizer or fertilizer practices during the initial or experimental period of their introduction.

"(e) Whenever the board determines that it is commercially feasible to produce any such fertilizer, it shall be produced, and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this act.

"(f) The board shall commence the manufacture of fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen for fertilizer provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practicable for use by farmers in application to soil and crops. The board is authorized and directed to utilize nitrate plant No. 2 for experiments in the production of fixed nitrogen, to determine whether it is or is not commercially feasible to produce fixed nitrogen by such plant.

"(g) Under the authority of this act, the board may donate not exceeding 1 per cent of the total product of the plant or plants operated by it to be fairly and equitably distributed through the agency of county demonstration agents, agricultural colleges, or otherwise as the board may direct for experimentation, education, and introduction of the use of such products in cooperation with practical farmers so as to obtain information as to the value, effect, and best methods of use of same.

"(h) The board is authorized to make alterations, modifications, or improvements in existing plants and facilities and to construct and operate new plants and facilities in order to effectuate properly the provisions of this act.

"(i) To establish, maintain, and operate laboratories and experimental plants, and to undertake experiments for the purpose of enabling the corporation to furnish nitrogen products for military and agricultural purposes in the most economical manner and at the highest standard of efficiency.

"(j) The board shall have power to request the assistance and advice of any officer, agent, or employee of any executive department or of an independent office of the United States, to enable the corporation the better to carry out its powers successfully, and the President shall, if in his opinion the public interest, service, and economy so require, direct that such assistance, advice, and service be rendered to the corporation, and any individual that may be by the President directed to render such assistance, advice, and service shall be thereafter subject to the orders, rules, and regulations of the board and of the general manager.

"(k) Upon the requisition of the Secretary of War or the Secretary of the Navy to manufacture for and sell at cost to the United States explosives or their nitrogenous content.

"(l) Upon the requisition of the Secretary of War the corporation shall allot and deliver without charge to the War Department so much power as shall be necessary in the judgment of said department for use in operation of all locks, lifts, or other facilities in aid of navigation.

"(m) To produce, distribute, and sell electric power, as herein particularly specified.

"(n) No products of the corporation shall be sold for use outside of the United States, her Territories and possessions, except to the United States Government for the use of its Army and Navy or to its allies in case of war.

"SEC. 6. In order to enable the corporation to exercise the powers vested in it by this act—

"(a) The exclusive use, possession, and control of the United States nitrate plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings connected therewith, all tools and machinery, equipment, accessories, and materials belonging thereto, and all laboratories and plants used as auxiliaries thereto; the fixed-nitrogen research laboratory, the Waco limestone quarry, in Alabama, and Dam No. 2, located at Muscle Shoals, its power house, and all hydroelectric and operating appurtenances (except the locks), and all machinery, lands, and buildings in connection therewith, and all appurtenances thereof are hereby intrusted to the corporation for the purposes of this act.

"(b) The President of the United States is authorized to provide for the transfer to the corporation of the use, possession, and control of such other real or personal property of the United States as he may from time to time deem necessary and proper for the purposes of the corporation as herein stated.

"SEC. 7. (a) The corporation shall maintain its principal office in the immediate vicinity of Muscle Shoals, Ala. The corporation shall be held to be an inhabitant and resident of the northern judicial district of Alabama within the meaning of the laws of the United States relating to venue of civil suits.

"(b) The corporation shall at all times maintain complete and accurate books of accounts.

"SEC. 8. (a) The board shall file with the President and with the Congress, in December of each year, a financial statement and a complete report as to the business of the corporation covering the preceding fiscal year. This report shall include the total number of employees and the names, salaries, and duties of those receiving compensation at the rate of more than $2,500 a year.

"(b) The board shall require a careful and scrutinizing audit and accounting by the General Accounting Office during each governmental fiscal year of operation under this act, and said audit shall be open to inspection to the public at all times and copies thereof shall be filed in the principal office of the Muscle Shoals Corporation at Muscle Shoals in the State of Alabama. Once during each fiscal year the President of the United States shall have power, and it shall be his duty, upon the written request of at least two members of the board, to appoint a firm of certified public accountants of his own choice and selection which shall have free and open access to all books, accounts, plants, warehouses, offices, and all other places, and records, belonging to or under the control of or used by the corporation in connection with the business authorized by this act. And the expenses of such audit so directed by the President shall be paid by the board and charged as part of the operating expenses of the corporation.

"SEC. 9. The board is hereby empowered and authorized to sell the surplus power not used in fertilizer operations and for operation of locks and other works generated at said steam plant and said dam to States, counties, municipalities, corporations, partnerships, or individuals, according to the policies hereinafter set forth, and to carry out said authority the board is authorized to enter into contracts for such sale for a term not exceeding 10 years and in the sale of such current by the board it shall give preference to States, counties, or municipalities purchasing said current for distribution to citizens and customers.

"SEC. 10. It is hereby declared to be the policy of the Government to distribute the surplus power generated at Muscle Shoals equitably among the States within transmission distance of Muscle Shoals.

"SEC. 11. In order to place the board upon a fair basis for making such contracts and for receiving bids for the sale of such power it is hereby expressly authorized, either from appropriations made by Congress or from funds secured from the sale of such power, to construct, lease, or authorize the construction of transmission lines within transmission distance in any direction from said Dam No. 2 and said steam plant: *Provided*, That if any State, county, municipality, or other public or cooperative organization of citizens or farmers, not organized or doing business for profit, but for the purpose of supplying electricity to its own citizens or members, or any two or more of such municipalities or organizations, shall construct or agree to construct a transmission line to Muscle Shoals, the board is hereby authorized and directed to contract with such State, county, municipality or other organization, or two or more of them for the sale of electricity for a term not exceeding 15 years, and in any such case the board shall give to such State, county, municipality, or other organization ample time to fully comply with any local law now in existence or hereafter enacted providing for the necessary legal authority for such State, county, municipality, or other organization to contract with the board for such power: *And provided further*, That any surplus power not so sold as above provided to States, counties, municipalities, or other said organizations, before the board shall sell the same to any person or corporation engaged in the distribution and resale of electricity for profit, it shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission; and in case of any such sale if an amount is charged the ultimate consumer which is in excess of the price so deemed to be just, reasonable, and fair by the Federal Power Commission, the contract for such sale between the board and such distributor of electricity shall be declared null and void and the same shall be canceled by the board.

"SEC. 12. The net proceeds derived by the board from the sale of power and any of the products manufactured by the corporation, after deducting the cost of operation, maintenance, depreciation, and an amount deemed by the board as necessary to withhold as operating capital, shall be paid into the Treasury of the United States at the end of each calendar year.

"SEC. 13. That the Secretary of War is hereby empowered and directed to complete Dam No. 2 at Muscle Shoals, Ala., and the steam plant at nitrate plant No. 2, in the vicinity of Muscle Shoals, by installing in Dam No. 2 the additional power units according to the plans and specifications of said dam, and the additional power unit in the steam plant at nitrate plant No. 2: *Provided*, That the Secretary of War shall not install the additional power unit in said steam plant until, after investigation, he shall be satisfied that the foundation of said steam plant is sufficiently stable or has been made sufficiently stable to sustain the additional weight made necessary by such installation.

"SEC. 14. It is hereby declared to be the policy of the Government to utilize the Muscle Shoals properties for fertilizer purposes in time of peace.

"SEC. 15. The Secretary of War is hereby authorized, with appropriations hereafter to be made available by the Congress, to construct, either directly or by contract to the lowest responsible bidder, after due advertisement, a dam in and across Clinch River in the State of Tennessee, which has by long usage become known and designated as the Cove Creek Dam, according to the latest and most approved designs of the Chief of Engineers, including its power house and hydroelectric installations and equipment for the generation of at least 200,000 horsepower, in order that the waters of the said Clinch River may be impounded and stored above said dam for the purpose of increasing and regulating the flow of the Clinch River and the Tennessee River below, so that the maximum amount of primary power may be developed at Dam No. 2 and at any and all other dams below the said Cove Creek Dam.

"SEC. 16. In order to enable and empower the Secretary of War to carry out the authority hereby conferred, in the most economical and efficient manner, he is hereby authorized and empowered in the exercise of the powers of national defense in aid of navigation, and in the control of the flood waters of the Tennessee and Mississippi Rivers, constituting channels of interstate commerce, to exercise the right of eminent domain and to condemn all lands, easements, rights of way, and other area necessary in order to obtain a site for said Cove Creek Dam, and the flowage rights for the reservoir of water above said dam and to negotiate and conclude contracts with States, counties, municipalities, and all State agencies and with railroads, railroad corporations, common carriers, and all public utility commissions and any other person, firm, or corporation, for the relocation of railroad tracks, highways, highway bridges, mills, ferries, electric-light plants, and any and all other properties, enterprises, and projects whose removal may be necessary in order to carry out the provisions of this act. When said Cove Creek Dam and transportation facilities and power house shall have been completed, the possession, use, and control thereof shall be intrusted to the corporation for use and operation in connection with the general Muscle Shoals project and to promote flood control and navigation in the Tennessee River, and in the Clinch River.

"SEC. 17. The corporation as an instrumentality and agency of the Government of the United States for the purpose of executing its constitutional powers shall have access to the Patent Office of the United States for the purpose of studying, ascertaining, and copying all methods, formulæ, and scientific information (not including access to pending applications for patents) necessary to enable the corporation to use and employ the most efficacious and economical process for the production of fixed nitrogen, or any essential ingredient thereof, and any patentee whose patent rights may have been thus in any way copied, used, or employed, by the exercise of this authority by the corporation, shall have as the exclusive remedy a cause of action for any damages claimed to be instituted and prosecuted against the United States in the Court of Claims for the recovery of reasonable compensation, in accordance with the provisions of the act of June 25, 1910, as amended by the act of July 1, 1918 (title 35, sec. 68, United States Code), recoverable on a royalty basis in proportion to the entire volume of fixed nitrogen or essential ingredients manufactured by the corporation by the use and employment of such patent rights, and if said patent rights shall have contributed in a fractional part to the production of the entire volume, said compensation shall be proportionately allowed, and it shall be competent for the corporation to contract with any patentee in advance upon said basis, or to settle for any claim for such amount as to said corporation shall appear to be reasonable, fair, and just. The Commissioner of Patents shall furnish to the corporation, at its request and without payment of fees, copies of documents on file in his office.

"SEC. 18. The Government of the United States hereby reserves the right, in case of war, or national emergency declared by Congress, to take possession of all or any part of the property described or referred to in this act for the purpose of manufacturing explosives or for other war purposes; but, if this right is exercised by the Government, it shall pay the reasonable and fair damages that may be suffered by any party whose contract, for the purchase of electric power or fixed nitrogen or its ingredients, is thereby violated after the amount of the damages have been fixed by the United States Court of Claims in proceedings instituted and conducted for that purpose under rules prescribed by the court.

"SEC. 19. (a) All general penal statutes relating to the larceny, embezzlement, conversion, or to the improper handling, retention, use, or disposal of public moneys or property of the United States, shall apply to the moneys and property of the corporation and to moneys and properties of the United States intrusted to the corporation.

"(b) Any person who, with intent to defraud the corporation, or to deceive any director or officer of the corporation or any officer or employee of the United States (1) makes any false entry in any book of the corporation, or (2) makes any false report or statement for the corporation, shall, upon conviction thereof, be fined not more than $10,000 or imprisoned not more than five years, or both.

"(c) Any person who shall receive any compensation, rebate, or reward, or shall enter into any conspiracy, collusion, or agreement, express or implied, with intent to defraud the corporation or wrongfully and unlawfully to defeat its purposes, shall, on conviction thereof, be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 20. In order that the board may not be delayed in carrying out the program authorized herein the sum of $10,000,000 is hereby authorized to be appropriated for that purpose from the Treasury of the United States, of which not to exceed $2,000,000 shall be made available with which to begin construction of Cove Creek Dam during the calendar year 1929.

"SEC. 21. That all appropriations necessary to carry out the provisions of this act are hereby authorized.

"SEC. 22. That all acts or parts of acts in conflict herewith are hereby repealed.

"SEC. 23. That this act shall take effect immediately.

"SEC. 24. The right to alter, amend, or repeal this act is hereby expressly declared and reserved."

And the House agree to the same.

CHAS. L. MCNARY,
G. W. NORRIS,
E. D. SMITH,
Managers on the part of the Senate.

JOHN M. MORIN,
W. FRANK JAMES,
B. CARROLL REECE,
PERCY E. QUIN,
WILLIAM C. WRIGHT,
Managers on the part of the House.

TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. REED of Missouri obtained the floor.

Mr. THOMAS. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Oklahoma?

Mr. REED of Missouri. I yield.

Mr. THOMAS. Mr. President, if I may have the attention of the chairman of the committee, I will call his attention to section 203. This section relates to the net income of life-insurance companies. There is one provision in said section that is possibly susceptible to a dual construction.

The section provides, among other things, for example, that life-insurance companies owning office buildings on land owned by such company in fee may charge the expenses against the revenues derived from such building, but in the event a life-insurance company should own an office building on land leased, even on a long-term lease—99 years, for example—such life-insurance company might be denied the privilege of charging the expenses, including rent paid on such leased land, against the gross income derived from the operation of such building, and in order to provide that, for the purpose of taxation, office buildings owned by life-insurance companies on leased land shall be accorded the same privileges for taxation purposes as buildings located on land owned in fee by such companies, I have prepared the following interpretative amendment:

Page 239, line 5, insert the following: "(15) The term 'real estate owned,' as used in section 203 (a) (6) and section 203 (b), includes leaseholds and improvements thereon, and this is declaratory of the meaning of the same words used in the corresponding sections of prior acts."

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Utah?

Mr. REED of Missouri. I yield.

Mr. SMOOT. I hope that the Senator will not press his amendment. In so far as the proposed amendment includes long-term leases, the effect of which is for all practical purposes the same as ownership, I believe that the amendment is unnecessary. I do not think that the term "real estate owned," as used in the present law, requires absolute strict legal ownership. As to short-time leases, however, I can not agree with the policy proposed by the amendment. Under the circumstances I believe the present law should stand. I think the Senator knows that is the position taken by the committee.

The PRESIDENT pro tempore. The Chair understands the Senator from Oklahoma to have offered his amendment and the Senator from Missouri [Mr. REED] to have yielded to him for that purpose.

Mr. THOMAS. Mr. President, with the statement just made by the chairman of the Committee on Finance, I shall not offer the amendment, his statement being satisfactory.

Mr. REED of Missouri. Mr. President, I have had printed an amendment which I concluded, upon examination, needed some clarification and change. I now offer in lieu of the amendment heretofore printed the following amendment, which has been printed for the use of the Senate.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Missouri will be read for the information of the Senate.

The Chief Clerk read the proposed amendment, as follows:

On page 245, after line 13, insert the following:

"TITLE VI—AGRICULTURAL EXPORT DEBENTURES

"SEC. 801. EXPORT DEBENTURES.

"(a) Agricultural commodity: The term 'Agricultural commodity,' as used in this section, includes all agricultural, horticultural, viticultural, and dairy commodities and products, all livestock and products thereof, all products of poultry and bee raising, all nuts and edible products of forestry, and all other commodities not specifically mentioned herein which are produced on farms within the United States, and the processed or manufactured products of such commodities.

"(b) On and after the 1st day of July next after the approval of this act the Secretary of Agriculture shall issue an export debenture to any person exporting from the United States to any foreign country and not previously exported an agricultural commodity in either the original or processed condition in an amount equal to 25 per cent of the average price of such product paid to the farmer as ascertained or estimated and certified by the Secretary of Agriculture under such regulations as the Secretary of Agriculture may prescribe: *Provided*, That the total quantity of such exportation so valued shall amount to $3,000 or more and be exported in one vessel.

"(c) Said debentures shall be transferable by delivery and the Secretary of the Treasury shall receive such debentures at their face value in payment of all import duties.

"SEC. 802. ADMINISTRATIVE AND PENALTY PROVISIONS.

"(a) Preparation of debentures: The Secretary of Agriculture shall prepare and issue, or cause to be prepared and issued, all export debentures, and shall prescribe the terms and conditions in respect of export debentures. The Secretary is authorized to have such debentures prepared in the Bureau of Engraving and Printing.

"(b) Obligations of United States for penal purposes: Export debentures issued under the authority of this title shall be obligations of the United States within the definition in section 147 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, as amended.

"(c) Fraud: Any person who shall make any false statement for the purpose of fraudulently procuring, or shall attempt in any manner fraudulently to procure, the issuance or acceptance of any export debenture, whether for the benefit of such person or of any other person, shall be fined not more than $2,000, or imprisoned not more than one year, or both.

"SEC. 803. APPROPRIATION.

"For the expenses in the administration of the functions vested in the Secretary of the Treasury by this title there is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $200,000, to be available for such expenses incurred prior to July 1, 1929."

Mr. REED of Missouri addressed the Senate. After having spoken for some time—

Mr. LA FOLLETTE. Mr. President, will the Senator yield to me for the purpose of suggesting the absence of a quorum?

Mr. REED of Missouri. I yield to the Senator.

Mr. LA FOLLETTE. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. COUZENS in the chair). The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McMaster	Shipstead
Barkley	George	McNary	Shortridge
Bayard	Gerry	Mayfield	Simmons
Bingham	Gillett	Metcalf	Smith
Black	Glass	Moses	Smoot
Blaine	Goff	Neely	Steck
Blease	Greene	Norbeck	Stephens
Borah	Hale	Norris	Swanson
Brookhart	Harris	Nye	Thomas
Broussard	Harrison	Oddie	Tydings
Bruce	Hawes	Overman	Tyson
Capper	Hayden	Phipps	Vandenberg
Caraway	Howell	Pine	Wagner
Couzens	Johnson	Ransdell	Walsh, Mass.
Curtis	Kendrick	Reed, Mo.	Walsh, Mont.
Cutting	Keyes	Reed, Pa.	Warren
Dale	King	Robinson, Ark.	Waterman
Deneen	La Follette	Robinson, Ind.	Watson
Dill	Locher	Sackett	Wheeler
Edge	McKellar	Schall	
Edwards	McLean	Sheppard	

Mr. DILL. I desire to announce that my colleague [Mr. JONES] is absent on account of illness, and I would like to have this announcement stand for the rest of this session. He will be unable to be present.

The PRESIDING OFFICER. Eighty-two Senators having answered to their names, there is a quorum present. The Senator from Missouri will proceed.

Mr. REED of Missouri resumed his speech, and after having spoken for some time—

Mr. SWANSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Virginia?

Mr. REED of Missouri. I yield.

Mr. SWANSON. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum is suggested. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McMaster	Sheppard
Barkley	George	McNary	Shipstead
Bayard	Gerry	Mayfield	Shortridge
Bingham	Gillett	Metcalf	Simmons
Black	Glass	Moses	Smith
Blaine	Goff	Neely	Smoot
Blease	Greene	Norbeck	Steck
Borah	Hale	Norris	Stephens
Brookhart	Harris	Nye	Swanson
Broussard	Harrison	Oddie	Thomas
Bruce	Hawes	Overman	Tydings
Capper	Hayden	Phipps	Tyson
Caraway	Howell	Pine	Vandenberg
Couzens	Johnson	Pittman	Wagner
Curtis	Kendrick	Ransdell	Walsh, Mass.
Cutting	Keyes	Reed, Mo.	Walsh, Mont.
Dale	King	Reed, Pa.	Warren
Deneen	La Follette	Robinson, Ark.	Waterman
Dill	Locher	Robinson, Ind.	Watson
Edge	McKellar	Sackett	Wheeler
Edwards	McLean	Schall	

The PRESIDENT pro tempore. Eighty-three Senators having answered to their names, a quorum is present. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, transmitted to the Senate the resolution (H. Res. 216) adopted by the House as a tribute to the memory of Hon. M. E. CRUMPACKER, late a Representative from the State of Oregon.

The message announced that the House had passed the bill (S. 1661) to authorize the Secretary of the Interior to transfer the Okanogan project, in the State of Washington, to the Okanogan irrigation district upon payment of charges stated, with amendment, in which it requested the concurrence of the Senate.

The message announced that the House had passed the bill (S. 4448) to amend section 4 of the act entitled "An act to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes," approved May 10, 1928, with an amendment, in which it requested the concurrence of the Senate.

LANDS OF THE FIVE CIVILIZED TRIBES

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 4448) to amend section 4 of the act entitled "An act to extend the period of restrictions in land of certain members of the Five Civilized Tribes, and for other purposes," approved May 10, 1928, which was, on page 1, line 6, after the word "numbered," to insert "360."

Mr. THOMAS. I move that the Senate concur in the amendment of the House.

The motion was agreed to.

OKANOGAN PROJECT, WASHINGTON

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 1661) to authorize the Secretary of the Interior to transfer the Okanogan project, in the State of Washington, to the Okanogan irrigation district upon payment of charges stated, which were, on page 2, line 3, after figures "1928," to insert "such installments to be due on December 1 of each year and bear interest at the rate of 6 per cent per annum after due"; on page 2, line 25, to strike out "at the option of the Secretary of the Interior"; and on page 3, after line 3, to insert "The Secretary of the Interior is directed to resume control and shut off water to enforce payment whenever any such annual installment is not paid on or before March 1 after due."

Mr. DILL. I move that the Senate concur in the House amendments.

The motion was agreed to.

TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. BRUCE. Mr. President, I submit an amendment to the pending bill, which I ask may be printed and lie on the table.

The PRESIDENT pro tempore. The amendment will be printed and lie on the table.

Mr. REED of Missouri. Mr. President, I have offered the following amendment.

(The amendment as afterwards modified being as follows:)

On page 245, after line 13, insert:

"TITLE VI.—AGRICULTURAL EXPORT DEBENTURES

"SEC. 801. EXPORT DEBENTURES.

"(a) Agricultural commodity: The term 'Agricultural commodity,' as used in this section, includes all agricultural, horticultural, viticultural, and dairy commodities and products, all livestock and products thereof, all products of poultry and bee raising, all nuts and edible products of forestry, and all other commodities not specifically mentioned herein which are produced on farms within the United States, and the processed or manufactured products of such commodities.

"(b) On and after the 1st day of July next, after the approval of this act, the Secretary of Agriculture shall issue an export debenture to any person exporting from the United States to any foreign country and not previously exported an agricultural commodity in either the original or processed condition in an amount equal to 25 per cent of the average price of such product received by the producer during the preceding six months as ascertained or estimated and certified by the Secretary of Agriculture under such regulations as the Secretary of Agriculture may prescribe: *Provided*, That the total quantity of such exportation so valued shall amount to $3,000 or more and be exported in one vessel.

"(c) Said debentures shall be transferable by delivery and the Secretary of the Treasury shall receive such debentures at their face value in payment of all import duties, except duties on agricultural commodities as herein defined.

"SEC. 802. ADMINISTRATIVE AND PENALTY PROVISIONS.

"(a) Preparation of debentures: The Secretary of Agriculture shall prepare and issue, or cause to be prepared and issued, all export debentures, and shall prescribe the terms and conditions in respect of export debentures. The Secretary is authorized to have such debentures prepared in the Bureau of Engraving and Printing.

"(b) Obligations of the United States for penal purposes: Export debentures issued under the authority of this title shall be obligations of the United States within the definition in section 147 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, as amended.

"(c) Fraud: Any person who shall make any false statement for the purpose of fraudulently procuring, or shall attempt in any manner fraudulently to procure, the issuance or acceptance of any export debenture, whether for the benefit of such person or of any other person, shall be fined not more than $2,000, or imprisoned not more than one year, or both.

"SEC. 803. APPROPRIATIONS.

"For expenses in the administration of the functions vested in the Secretary of the Treasury by this title there is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $200,000 to be available for such expenses incurred prior to July 1, 1929."

To the amendment I invite the serious attention of the Senate. For more than two years Congress has wrestled with the problem of farm relief. It recently passed the McNary-

Haugen bill. That bill was supported by many Senators who gravely doubted both its practicability and its constitutionality. Nevertheless, these Members gave it support because of the widespread farm distress.

We are now informed that the bill will probably be vetoed. If that should occur, the amendment I have offered will nevertheless bring independent relief. If the bill is not vetoed the amendment will strengthen its provisions. The amendment is not in derogation of but supplementary to the bill.

The principles embraced in the amendment have been discussed by many organizations, by economists and by tariff reformers. It is chiefly opposed by the extreme advocates of a very high tariff.

I regret the fact that the members of the Finance Committee have in advance committed themselves against all amendments which in any manner involve tariff rates. With all due respect, I affirm such an agreement should never have been made. However, I do not at this time want to engage in criticism of the committee.

That the farmer is in sore distress is beyond dispute. The special farm census shows that between 1920 and 1925 the value of farm lands shrank from $63,000,000,000 to $47,000,000,000—a loss of $16,000,000,000. Including the losses in other farm values the shrinkage amounts to $30,000,000,000.

The shrinkage still goes on. The Agricultural Department estimates that in 1926 there was a further decline of 4 per cent on all farm values, and further states that there has been a constant decline in farm values for the past 15 years aggregating 20 per cent.

Accompanying this disastrous decline in farm values and intimately associated therewith, is bank failures. During the Harding-Coolidge administration there were 3,785 such failures. Of that number 452 were national banks; 2,800 of the failures occurred in the 12 leading agricultural States. But these figures are misleading because they do not include the great number of banks which being on the verge of failure escaped publicity through consolidation with other banking institutions. The immediate point, however, is the vast number of banks which failed were in the agricultural States, the failures being largely due to the shrinkage in farm values.

Agriculture is sick. It has been sick a long time. The condition is not acute, it is chronic. He who seeks to cure a disease ought to ascertain (1) the condition of the patient; (2) the cause of the disorder; and (3) to endeavor to eradicate that cause.

In this instance we know the condition of the farmer. That question requires no further examination. When we look for the cause, we can not find it in any temporary condition, because the trouble has existed for many years, and the cause must have preceded the condition.

I confidently assert that the cause can be found in the fact that for more than 60 years the farmer has been compelled to buy upon a high price level and to sell upon a low price level. That condition does not spring from the operation of natural conditions or economic laws. It is artificial. It was created and has been maintained by the statutes enacted by Congress. Until that cause is removed there can never be any permanent relief for agricultural depression.

No business can long survive where its proprietor must buy upon a high price level whilst he is compelled to sell upon a low, low level. The gap between these two price levels is the gap of bankruptcy through which the farmer has been and is being forced. That gap, I repeat, was created by law. The repeal of the law will remove the cause.

Prior to the Civil War, agriculture was in a flourishing condition. The farmer boasted of his independence. His toil was great, but his reward was certain. Then, as now, the farmer exported a large percentage of his products to Europe where he competed in the markets of the world. Likewise, the manufacturer competed with the same world markets. The price level was the same for all classes of people. Agriculture purchased at the same level upon which it sold. The natural laws of supply and demand governed in the prices of all commodities, whether of the factory or the farm. Here was a condition of equality and of justice. Under it the farmer had the same opportunity as the manufacturer.

The Civil War produced taxes of every kind. Among these were import taxes upon manufactured goods. The manufacturers were relieved of foreign competition and by combinations raised the price of their products. Thus, the foundations for many great American fortunes were laid.

But the farmer was not an importer. He was an exporter. He, therefore, received no benefit from the tariff. He was still obliged to sell upon the level of world markets, whilst he was forced to buy upon the high level fixed by American manufacturers.

At the conclusion of the Civil War the remission of war taxes began. But the manufacturers demanded the retention of the import taxes. They claimed that American manufacturing was in its infancy, and that it could not, therefore, withstand competition with the established industries of Europe. They protested that if they were protected for a few years they would be strong enough to maintain themselves in competition with the world. They admitted that they were selling their goods at a higher level than European producers. They asserted, however, that such condition was merely temporary—that their industries would soon become so firmly established that the tariff would no longer be needed. They promised that home competition would soon reduce their prices to the European level.

The youngest of these concerns is over 75 years of age. They have become the most powerful industrial organizations on earth. They do not compete, they combine. They are establishing branches in Europe, and yet they insist upon more protection and support than they claimed during the days of their pretended infancy.

They told us that they chiefly wanted the tariff as a protection of American labor from competition with the pauper labor of other lands. Nevertheless, for more than 30 years, whilst holding out this pretense of friendship for labor, they systematically imported hordes of paupers, bound into semi-slavery by villainous contracts, to take the places and beat down the wages of American labor. They continued this policy until Congress passed a law making it a misdemeanor to import contract labor. I remark here that labor has never received any substantial relief except that which it has acquired through organization and the operation of economic conditions.

(c) They told the farmer they would produce for him a great "home market" which would speedily absorb his entire surplus production. For six decades the farmer has awaited the development of that market. It has not come. Moreover, the possible day of its attainment has been indefinitely postponed by the enactment of laws limiting the growth of the population of the country by greatly restricting immigration.

Thus for more than 60 years the farmer has been compelled to buy in a market artificially advanced by law, but during the entire time he has been compelled to sell upon the lower market levels of Europe. The high level of the market in which he purchases and the low level in which he is forced to sell are the two millstones between which he has been ground. He will never receive any substantial and permanent relief until that condition is changed. Its change does not involve the violation of an economic law. It can be accomplished by the restoration of that law.

In a word, Congress has but to repeal the unjust law which has resulted in the despoliation of the farmer and he is at once placed in a condition to compete successfully both at home and abroad.

The disadvantages under which the farmer struggled for 60 years were sufficiently onerous and burdensome, but they were rendered intolerable by circumstances attending the late World War. In this instance the farmer was not robbed under any rule of law justly applied. He was made the victim of a usurped and arbitrary power. I intend to discuss this phase of the question with absolute frankness. My only regret is that I must call names in order to fix responsibilities.

This is what happened: In 1914 when the clash of arms began in Europe, prices of all kinds rapidly advanced. The farmer along with all other classes of people participated in the benefits. For the first time the farmer found the European market demanding more than he could produce. The European market was the lever which raised prices here. Naturally this was so, because the great demand of the war-engaged countries was food.

April 6, 1917, we entered the war. There was an increased demand both at home and abroad for all kinds of products. Wages rose with marvelous rapidity. Prices everywhere doubled and quadrupled. The excess demands of the European market for foodstuffs was now accentuated by the imperative demand for food supplies for our own armies.

If there had been no interference, the farmer would have shared these increased prices along with all other producers and with labor. All would have bought and all would have sold at the war level of prices.

Such an equality of opportunity was destroyed by the act of one man. I refer to the present Secretary of Commerce, Mr. Herbert C. Hoover. I am warranted in bringing his name into this discussion not only in the interest of the truth of history but also because recently Mr. Hoover's press bureau has tried to shift the responsibility for the forced reduction of the price of farm products from his own shoulders to those of President Wilson. He has flooded the State of Indiana with expensive advertisements so charging.

Here is one which appeared in the Indianapolis Star of April 27, 1928. The heavy headlines read:

How the price of wheat was fixed. Government records prove that the fair price commission named by President Wilson fixed wheat prices. Herbert Hoover had no part in this action.

The assertions of the headlines are elaborated in the text.

Every such assertion is in the teeth of the truth. And the truth was known to Mr. Hoover when the advertisement was printed.

Upon the contrary, it was Hoover who took control of the market for American farm products, and by the misuse of the powers granted him as Food Administrator compelled the sale of all farm products at the fixed price and by combination with the allied governments gave to them the benefit of this reduced price.

I shall undertake to show:

First. That for 20 years Hoover had lived in Great Britain; that his home was established in London; that substantially all his adult life's work was in the service, management, and organization of British interests.

Second. That prior to his return to the United States on May 3, 1917, Hoover had for 20 years spent no substantial part of his time in this country.

Third. That in politics he had never in 20 years, if, indeed, ever before that time, voted in the United States or in any material way identified himself with any American political party. And that, when asked in Great Britain what his politics were, he described himself "as a Liberal"—that is, a member of a British political party.

I may add that after his return here his politics were so uncertain that he ran in seven States as a Democrat and shortly thereafter loomed on the horizon in the guise of a Republican.

Fourth. That immediately before returning to the United States, Hoover had been so intimately associated with the British Government that he had been tendered the position of director of munitions.

Fifth. That before coming to the United States Hoover had devised a plan to enable Great Britain and her allies to control the prices of American farm products, and that this scheme had actually been employed to the injury of the American farmer.

Sixth. I shall show that the said scheme involved the creation of a combination of the allied governments to completely monopolize the buying and distribution of foodstuffs for their respective countries and to thus force down, fix, and control prices.

Seventh. The plan aforesaid was to be accomplished by the allied governments agreeing:

(a) To take over all imported farm products and to distribute the same.

(b) To fix the price they would pay.

(c) To set up a single buying agency, financed by countless millions of Government money.

That agency was to control the market against foreign sellers and neutral buyers by accumulating a four months' supply and thus keeping out of the market until prices broke. And if they did not break prices, they were then to "dump" huge quantities on the market, beat down prices, and rebuy at the reduced level.

The foregoing scheme, advised by Hoover, was actually in operation and had been used against the American producer before we entered the war and before Hoover came to the United States. Its whole purpose was to get for the allied governments American and other grains at the lowest level to which prices could be forced.

The concern created was known as the Wheat Export Co. and was dominated by Great Britain.

When 27 days after we declared war Hoover came to this country he brought the foregoing plan with him. He proposed now to make the scheme "air-tight" by inducing the United States to enter the combination, back it with our Government's unlimited money and power, fix a price for wheat and other farm products, and compel the acceptance of that price by seizing control of the entire domestic market and by prohibiting all exports, except through an American agency which he was to control and which was to be articulated with the British Wheat Export Co. he had helped create.

If the foregoing scheme could be legally adopted, Hr. Hoover would secure for Great Britain and her allies American products at prices agreeable to them, and all our farmers "might go hang."

Finally, when Congress refused to give authority to fix prices for farm products or to authorize a combination of the Allies to fix prices, Mr. Hoover carried out his plan to the letter by the abuse of the licensing power and other powers granted for entirely different purposes, including contracts made with the foreign Wheat Export Co.

I proceed in due order to prove all of the foregoing propositions.

HOOVER'S ANTECEDENTS AND ENVIRONMENT

In order to appreciate Mr. Hoover's action in reducing the prices of American farm products it is necessary to consider his antecedents and his environment, because they help disclose the purpose and plan he had in his mind when he came to the United States to take charge of our food resources.

In Who's Who of 1914–15, it is related he was "born in Iowa in 1874; graduated from the Stanford University, California, in 1895"; that he was employed as assistant manager of mines in New Mexico in 1896.

That substantially terminates his American activities.

Within one year after his graduation, he went to Australia in the employ of Berwick, Moreing & Co., and Hannan's Brown Hill Mine Co. In 1898 he was the manager of the Sons of Gwalia & E. Murchison mines in Australia. In 1899 he was chief engineer of the Chinese Imperial Bureau of Mines. In 1900 he was engaged in the Boxer disturbances and was the representative of the British bondholders in the construction of Ching Wang Tow Harbor. In 1901 he was general manager of the Chinese Engineering & Mining Co., a British concern. From 1902–1913 he was associated as a partner with the Berwick, Moreing & Co., mine operators of London. He was also a director of the Zinc Corporation (Ltd.), the Kyshtim Corporation (Ltd.), Tanalky Corporation (Ltd.), Granville Mining Co. (Ltd.), Oroya Exploration Co. (Ltd.), Chinese Engineering & Mining Co. (Ltd.), Russo-Asiatic Corporation (Ltd.), and General Petroleum Co. All of the above companies except the petroleum company were British concerns.

He was also fellow of the Royal Geographical Society, a member of British clubs, and had his home in London, known as Red House, Morton Street. He maintained offices in London and for a time at 71 Broadway, New York.

The Mining Manual of 1917, an English publication, states that the object of the Chinese Engineering & Mining Co. was "to remove the competition and work in unison with the Lanchow Mining Co., owning collieries," and so forth. That is to say, he was engaged in the business of suppressing competition.

It appears, therefore, that he left this country at the age of 23, within a year after his graduation, and that he was absent substantially all of the time for 20 years. During that period he is described by one of his eulogists, Mr. Irwin, as an "entrepreneur," the nearest equivalent of which is "promoter."

Shortly after arriving in this country to take charge of our farming population he testified before a committee of the House:

Now, as to the problems in this country, I feel myself very much of a stranger in my own country, as I have been away since the war began.

But he had been away much longer than that.

The same eulogist, Mr. Irwin, in an article in the Saturday Evening Post of June 23, 1917, declares:

Hoover always maintained a loyal interest in Stanford University, which institution made him a trustee.

And adds:

Hoover, traveling from London to San Francisco via the fastest trans-Atlantic steamer and the Overland Limited, always made the meeting of the board.

The same eulogist, Mr. Irwin, declares that Mr. Hoover connected himself with a London partnership, and that there followed 10 years in which Hoover's activities reached every corner of the globe. He was interested in Australia, China, Peru, California, Mexico, Alaska, South Africa, Burma, and Belgium. One of the firms for which he was executive head was mining in Borneo, where American superintendents and foremen ruled over a working force of "head hunters." He further states:

A Russian nobleman had a principality rich in coal and iron. He wanted it developed * * *. Hoover's company was not only running the mines but the farms of that estate.

He adds:

His house in Kensington—a country mansion of the eighteenth century, its walled garden now surrounded by the shops and flats of High Street and that vicinity—gathered mightily entertaining dinner parties, the industrial knights errant of the world, crossing through the in-

dustrial capital of the world on their way between California and the East Indies, Afghanistan and New York, Johannesburg and Alaska.

When Mr. Hoover was interrogated before a Senate committee as to his actual residence in America, he was so evasive that the best that can be said is that his residence here appeared to be more mythical than real.

Now, note this pregnant sentence by the same eulogist regarding Mr. Hoover:

When asked in England to define his political opinions, he called himself a Liberal and let it go at that.

Observe, he was asked in England what his politics were. He did not reply that he was an American Republican or an American Democrat. He described himself as a Liberal. That is, an adherent to a British political party.

Referring to the time of our entrance into the war, Mr. Irwin proceeds:

But more and more his own country drew him.

He quotes Mr. Hoover as saying:

I want to get into the big game at home, not the money game either, and not exactly the political game, but the big game and the real game somewhere.

And then he adds:

The Government had been watching him, and especially that "quiet gentleman" who looks around for the President.

That "quiet gentleman," of course, was Mr. House.

* * * The fact is, as I think Hoover well knew, that if the American Government did not call on him our allies would. Already two important posts in the civilian conduct of the war had been offered him by the British. But to "go British" openly—

Note, now, this—

* * * in those days of our neutrality would have wrecked the commission [the Belgian Relief]. Not only would it have taken away the head of the work, but it would have proved to the German militarist mind that the commission was not neutral; that its agents were simply "a hundred allied spies."

Further on the same eulogist declares that Hoover was offered the job of munitions manager for Great Britain, and that—

Mr. Hoover could probably have been made Sir Herbert Hoover by the British Government.

The consideration of these facts can leave no doubt that Mr. Hoover had to all intents and purposes abandoned the United States as his home; that he had permanently established himself in England, and only wanted to come to this country after we got into the war, because he thought "the big game was here."

My information is that Lord Balfour recommended Hoover to Mr. House, and, to quote Mr. Irwin, "that quiet gentleman" recommended him to President Wilson.

I have not the slightest doubt as to what was the real object of his mission here. For at about the same time Great Britain sent Lord Northcliffe to the United States to purchase an immense quantity of copper. Lord Northcliffe came like a British gentleman—put his cards on the table, and protested that the price of our copper was too high, and asked our Government to compel the copper producers to sell it to England at a reduced price.

At the same time Great Britain needed copper she was in still greater need of breadstuffs. And Herbert Hoover came.

The result of his work, as I shall show, was to secure for Great Britain the products of American farms at a price which he (Hoover) dictated.

Let us see what his relations to the British Government were touching the question of foodstuffs, and what his policies were with reference to the control of prices.

I shall quote no witness except the eulogists of Mr. Hoover and Mr. Hoover himself, chiefly the latter.

Referring to his operations *prior* to coming to this country, his eulogist, Mr. Poole, in an article printed in the Saturday Evening Post of May 26, 1917, details that the price of beans was advancing in the market. And then referring to the commission for the relief of Belgium (which was absolutely controlled by Mr. Hoover), states:

But as to purchasing supplies, there were big men on the C. R. B. who needed no expert advice. They knew all the tricks of the business. When the price of beans began to rise they bought 1,000 tons of beans and threw them back in one lot on the market. Down went prices. * * * So again and again did that same 1,000 tons of beans hammer down prices and save the day. The same was true wherever they went. In food and in shoes and clothing, repeatedly, through expert advice of business men as shrewd as themselves, they went into the market and bought at cost and often below it.

This, in plain parlance, was "rigging" the market. It was done by Mr. Hoover's organizations against the American producer. Such was the policy he had been pursuing *prior* to coming to America.

The truth is further established by the recital in the New York American of July 16, 1917, of substantially the same facts, where it is shown that by these market manipulations Hoover made an immense sum of money, which, it was claimed, went to the benefit of Belgium.

That "rigging" of the market as against the interests of American farmers took place *before* we had entered the war. It was in the interest of Great Britain, because Belgium was in fact at that time the ward of the British.

April 6, 1917, the United States declared war.

May 3, 1917, Mr. Hoover arrived in New York from Great Britain.

May 4, 1917, Hoover opened his office in Washington and began busying himself with the question of food control.

May 7 and 8, 1917, Hoover appeared before a committee of the House of Representatives and presented his plans for food control.

Testifying before the committee of the Senate he stated that the Belgian Relief Commission—

was not a charity, but a great economic engine—

That—

it had cost us to date externally about $350,000,000, and it has cost us internally another $250,000,000.

He must have meant here by "us," Great Britain and France, because the Belgian relief had not cost America anything like the sums named.

He adds:

I have had the privilege of a very close association with the food controllers in France and England, with whom I have had to work in cooperation, and, in fact, without any feeling of vanity about it, as we initiated food control before anyone else in Europe. We have had more or less to pioneer a number of economic factors in food control, and therefore they have sought our views and experience on great numbers of occasions, not only there but in Germany as well; and the consequence is, because of that association, we had a very close insight into the food-control measures in Germany, England, France, and have ourselves taken advantage of such experience as they have given.

July 11, 1917, Mr. Hoover wrote a letter to the President which discloses the fact that a combination among the Allies to control wheat prices had been made and which I think, in connection with what I have just read, clearly discloses the fact that he advised the organization of the European combination to control prices.

After stating that that combination controlled between 80 and 90 per cent of the wheat buying for the Allies but that there were independent buyers in the market, he states:

Now, before we can move one step in this country to remedy price conditions, protect our own consumers, protect them from extravagant prices and speculation, we have got to induce them (the allied governments) to get that buying, at least commodity by commodity, all into one hand in order that we may have one hand to deal with.

The plan I proposed was that we should create in that particular a small board which for lack of a better name we would call the food strategy board, the members of the board to be chosen by the food controllers of each country.

It seems plain that the language "the plan I proposed was that we should create, etc." referred to a proposal Hoover had made to the Allies. But I pass that point, as it is immaterial whether he had proposed the plan to the Allies or not. Certain it is, he was eager to adopt the plan in this country and to have our food controllers coordinate with the European food control organization for the purpose of keeping down prices.

In his letter to the President he discusses the high prices which exist. He first asserts—

That there is a combination among the allied powers and that the American producer is at the mercy of that combination.

But with his usual fatality of contradiction, a little later in the same letter, he admits that the combination of allied powers has not been able to control the market, and complains that the speculators have run the market up to extraordinarily high prices. He follows this by the declaration that we must organize in this country a similar price control to protect our consumers against extravagant prices. I quote his language:

During recent months the allied governments have consolidated their buying into one hand in order that they might relieve the burden of speculation from their own consumers, and as the restricted exports to neutrals are but a minor item, the export price, if not controlled, is subject to the will of the allied buyer, so that in a great measure the American producer is left to that buyer's judgment and is without voice.

We must, therefore, expect a glut in our exterior terminals during a considerable period. * * * Moreover, the consolidation of practically all foreign buying in the hands of the allied buyer has further tended to diminish the resources of capital available. * * *

Every person acquainted with the facts knows that there was no danger of a "glut" in our market. All the neutral countries were clamoring for food supplies. The demand from aboard could not be satisfied. May wheat then commanded more than $3 per bushel. The market was full of men anxious to buy wheat. This is admitted by Mr. Hoover in the sentence I am about to quote. It is found in singular and extravagant contradiction with the statement of Mr. Hoover I have just quoted:

One of the prime causes for the extraordinarily high prices in this country has been the competitive bidding between the Allies and between different branches of the one ally in these markets for foodstuffs.

A little later he says:

The wheat has now been consolidated into an international body called the "wheat executive." It controls, I estimate roughly, about 80 or 90 per cent of the wheat buying for the Allies. There are still, however, four bodies buying independently in competition with the wheat executive. In the fats I calculated there are 14 different organs competing in this market for fats on behalf of the Allies.

HOOVER ADVOCATES GRAIN CONTROL AND LOWERING OF PRICES IN COMBINATION WITH ALLIES

In the same letter to President Wilson he uses this language:

The board * * * would simply plan the origin of the food supplies for the European allies as between all of the different sources and would determine its distribution as between the different allies, and once it had made its determination it would hand the actual operation from the European allied point of view over to functions like the wheat executive to purchase that wheat and distribute it.

Now, that was the plan which Hoover had worked out and had suggested to England and her allies. Pursuant to that plan they had consolidated their buying in order to keep down prices. They were not only to buy by one agent, but they were to distribute the foods. Thus, according to the Hoover plan, they could control the price to be paid in this market.

Now, notice the suggestion he makes to President Wilson as to the procedure to be had here, as a complement to the allied combination he had proposed and which he states had been created—

We on this side need to set up, obviously, some organization for food control in order that we may deal with that particular situation among others. Now, just in passing, in setting up an implement of that kind among the Allies, we will have set up a dangerous implement for our own country unless we participate in its control. I might point out to you that if any of you gentlemen or myself held that position of the single buying agent with a four-months' supply of wheat behind us, as they will have, or other cereals when their harvest comes in, we could probably drop the price of wheat in this country to 75 cents a bushel.

Let us get this all in plain English. Hoover had suggested a single buyer for our European allies to enable them to largely control our market, but he asserts they could not entirely control because there were speculators—neutral countries—in the market. He therefore suggests that we should set up a food organization here to cooperate with and become a part of the European organization and, in conjunction with it, to control and hold down prices.

He declares that such an organization with four-months' supply back of it would be powerful enough so that it could drop the price of wheat to 75 cents a bushel.

It is as clear as day that the thought in his mind was that our food controller and the food controllers of our allies were to fix and hold down the price of wheat and other farm products for the benefit of the consumer.

If our exports were controlled by this combination, the wheat and the other farm products of this country could only be shipped out in accordance with the regulations of the combination, for that combination, according to Hoover's plan, was not only to do all of the buying, but it was to allocate the foods to different countries.

Elsewhere in his testimony Mr. Hoover states that the Governments of Great Britain and France were the purchasers of wheat and other farm products, disposing of them under governmental regulation. The "consumer," therefore, of all our exported farm products was, under the Hoover plan, to be the Governments of Great Britain and of France, but chiefly of Great Britain.

The proposition in a nutshell was to combine with the Allies to reduce the price of our farm products to them. Nothing can be clearer.

Mr. Hoover also had in mind that the control thus exercised should reduce the price in our own market. I repeat his exact language:

Now, before we can move one step in this country to remedy price conditions, protect our own consumers, protect them from extravagant prices and speculation, we have got to induce them to get that buying * * * all into one hand.

That is to say, he desired that as food controller he should have the right to fix the purchase price, and the object in fixing it was to reduce the price to the consumer. As Hoover stated, to "protect the consumer against extravagant prices."

There can not be the slightest doubt but that such was his purpose.

Testifying before the Agricultural Committee on May 8, 1917, he stated that Europe's source of supply had been largely cut off; that the winter wheat crop had largely failed (Rec. p. 374); that the Allies in Europe had been reduced to minimum bread rations (Rec. 375). He sums up:

If we could get everything we could hope for from every quarter of the globe, we would have a shortage of somewhere near the probable of from one-fifth to a quarter of what they need to maintain the present ration, and that ration is a pretty drastic ration. In other words, what I am trying to make clear to you is that we are not going to be able to prevent some privation. It is a physical impossibility.

The CHAIRMAN. You think their ration is approaching the minimum?

Mr. HOOVER. I think it is.

The CHAIRMAN. The amount they mete out daily to their people?

Mr. HOOVER. So that there are two or three complications from our point of view. One of them obviously is that in support of the Allies we should make every possible effort to repress consumption, and on the other side we should set up adequate machinery to see that this great vacuum does not put prices in this country to a point which creates trenrendous embarrassment to our people. If we allow the normal course of commerce to run loose, those people in clamorous desire for food will buy this market mad in this situation. (Rec. p. 376.)

The situation then presented is this: Mr. Hoover claims (1) that the President fixed prices, and that he had nothing to do with it. Yet he appeared before Congress advocating the fixation of prices and combination with the Allies to bring that about. Further, he wrote the President to the same effect.

(2) He now claims that he held up prices for the benefit of the farmers.

But (3) in testifying before the committee, he distinctly stated that "prices must be kept down or they would run wild," and he was then demanding power to arbitrarily fix that price.

All this is made plainer by certain questions I asked him concerning the letter from which I have quoted. (See pages 40 and 41, Part I, hearings of Committee on Agriculture and Forestry, 1917):

Senator REED. I understand you to say there ought to be a plan by which the food for the Allies should be purchased through some agency cooperating with our Government?

Mr. HOOVER. Yes.

Senator REED. What would be the object of that, please?

Mr. HOOVER. The object of this is primarily to stop rival bidding by the different allies and their agents in all markets.

Senator REED. Has that taken place in the past?

Mr. HOOVER. To an enormous extent.

Senator REED. Did that take place when wheat rose to the great price that it did in May?

Mr. HOOVER. There was rival buying of wheat and flour by different agencies of the Allies at that very moment.

Senator REED. As a matter of fact, they are supposed to have purchased and held throughout the year something over 100,000,000 bushels; is not that true?

Mr. HOOVER. I do not know the details of their operations.

Senator REED. But you do know their biddings or buyings were very large?

Mr. HOOVER. Yes, sir.

Senator REED. And you do say you desire the power now to have the purchases for the Allies made through one common agency in order to stop that great element of speculation?

Mr. HOOVER. Yes, sir.

Senator REED. And you think that is very necessary and very essential?

Mr. HOOVER. I do.

Senator REED. Would you include in that the sale of all wheat and other grains that you propose to control that go to neutral countries?

Mr. HOOVER. I think it will be necessary to control neutral buying.

Senator REED. Then your proposition is to put into the hands of this agency all export business.

Mr. HOOVER. In wheat, at least.

Senator REED. There is no doubt, is there, Mr. Hoover, about the fact that the Allies have it within their own power to purchase through one common agency at the present time?

Mr. HOOVER. They have now arranged one common agency.

* * * * * * *

Senator REED. That agency is already in voluntary cooperation with your committee, is it not?

Mr. HOOVER. No; we have no arrangements with them whatever; until we have some legal position we can not enter into any arrangement.

It will be remembered that Mr. Hoover had practically assumed the position of Food Administrator before any law had been passed creating such office. Accordingly, his last answer indicates that he had not yet effected the combinations with the European countries simply because he did not yet have legal authority to make such an arrangement, but his testimonly also clearly shows his intent to make the arrangement when the authority should be granted.

I quote further from his testimony:

Senator REED. It was, as I understood you to say, the buying of the Allies, bidding against each other in the markets of this country, that was one of the great forces in running up prices to what we regarded as extortionate?

Mr. HOOVER. That was one of the forces.

Senator REED. And if we could eliminate that feature entirely from our markets it would go a long way toward stabilizing prices, would it not?

Mr. HOOVER. It would if the implement were carefully handled. * * *

Senator REED. * * * It was because the Allies were buying in such large quantities and because they had practically an unlimited power of consumption that they were able to so seriously affect our markets. That is the case, is it not?

Mr. HOOVER. That is one of the factors; but always bear in mind that the speculative elements in this country, knowing the situation in Europe, and knowing the intention of the Allies to acquire grain, themselves entered upon this situation and boosted the price even against the Allies.

Senator REED. Certainly; the Allies bid against the local speculator and the local speculator against the Allies?

Mr. HOOVER. And they all bid against our millers.

No candid man can read this testimony without understanding fully that before Mr. Hoover came to this country he had advised the Allies to have one purchasing and distributing agency, and had advised that agency to get behind it a large supply of wheat and other farm products, so that it could stay off the market and thus force down prices to the producer, and that such an organization had actually been created.

It, however, found itself confronted by the fact that it could not entirely control the market. There were buyers referred to by Hoover as speculators in the market; and Hoover complained that these buyers had produced a high price for wheat, notwithstanding the European combination which he had advised. He therefore sought to have this Government create a single buying agency, and that agency was to be articulated with and become a part of the European combination. This combination was to be so powerful that it could, as Mr. Hoover stated, force the price of wheat to the producer to 75 cents, if it so desired.

Let it be remembered that before any food control bill had been passed Hoover had assumed many of the powers he afterwards exercised. The Wheat Export Co. had been set up. Because of that fact the market was disorganized. On July 13, 1917, fourteen grain firms in St. Louis wired Hoover that the hands of the millers and country dealers and farmers were tied, that serious diaffection among the farmers was certain, and a complete disruption of the grain trade probable. They asked for information. Hoover wired them:

It is reported in New York that the Wheat Export Co. (the Allied purchasing company, have announced their willingness to buy some wheat, basis $1.80 St. Louis and Chicago, and $1.75 Kansas City. * * * I am powerless to act at all until Congress grants some authority.

Already that powerful organization, supported as it was by the activities of Hoover, controlled the prices of export wheat and disrupted the market, whereupon Hoover comes forward with a suggestion that it will purchase wheat at the prices just referred to.

This was the organization which was created or at least advised by Hoover. The Wheat Export Co. was the buyer for all the Allies. Hoover's telegram was a hint to the trade to accept the terms offered. It also shows, in connection with the testimony I have quoted, the kind of action he thereafter expected to take.

Let us observe the next step.

Hoover was at the time awaiting the enactment of the law creating a food controller. He was concerned about that bill, and he sought to put into it the power to fix prices. Of this there can be no doubt, as witness the following excerpts from his testimony.

HOOVER DEMANDS THE POWER TO FIX PRICES

Before the same Agricultural Committee he discussed European regulations. He stated that Europe had tried both the minimum and maximum price regulations; that the minimum price was possible if backed by the Government; that the maximum price regulation had proven a total failure (p. 377).

He, however, stated:

There was a third alternative—a fixed price.

And declares that in dealing with the Belgium situation—

we took neither a minimum nor maximum, but we took a fixed price (p. 378).

He states:

If we could apply our Belgian plan to America, it would work like this with an application to our institutions: We would arrive at a price for wheat * * * in this manner: We would say that the average price of wheat for 10 years of the pre-war period was so much; that the increased cost of production due to various factors is so much; that increased cost of agricultural implements, labor, etc.; that a further percentage in the nature of an increased profit in order to stimulate production, and we might arrive at, say, $1.50 a bushel. I have not worked it out in my mind, because this is a matter that requires very careful consideration and advice.

We would also be faced at that moment with another very important problem, and that is that the price of every cereal has got to be determined at the same moment; that otherwise we would have the substitution of one cereal for the other.

* * * * * * *

Having arrived at a price for wheat—for discussion, say, $1.50 a bushel—my idea would be to call the elevator owners of this country together and say that 95 per cent of the wheat in the country passes through the elevators: "We wish you to pay $1.50 for this wheat; that the Government, through the banks or otherwise, will arrange to loan to you the money necessary to pay that $1.50 a bushel and thereby relieve you of the necessity of going to the Chicago option market to protect yourselves." You know as well as I do the course of commerce in this country is for the elevator to buy the wheat from the farmer and sell an option to one of the produce exchanges, and at that point originates the speculation in American grain. There is created the document on which is built the whole complication. If, on the other hand, the elevator is not allowed to sell an option against the grain that he has bought, we have stopped the whole possibility—in fact, the whole existence of the produce exchange is gone.

Now, we shall call the millers together and say that "the elevators have this wheat at a basic price from the farmers; they are adding to that a legitimate charge, which we agree upon, for storage, grading, etc., and you are getting this wheat at a fixed price; but we want you to mill a straight flour—not necessarily any faddist idea, but a straight flour—and to agree upon a fixed charge for so doing, so that the people—the consumers—will get their flour at practically a flat price, with some variations for transportation." If you would follow through $1.50 wheat—and I may say incidentally that I have been told * * * that the farmers of this country probably did not average for the 1916 harvest more than $1.30 or $1.40 a bushel; and the price of flour to-day is $13 a barrel. If you would follow $1.50 wheat through the scale I give you and make allowances for the elevators, mills, and transportation, you probably would arrive at somewhere near $6.50 or $7 for flour. In other words, there lies the protection of the consumer and at the same time the protection and inducement to the farmer and the elimination of speculation; and here lies also the solution of other problems, that certain excess of production is available for export (pp. 379–380).

He goes on to state:

We know what our quantities are; the flow can be controlled through the elevators. We can regulate its monthly or periodic dispatch to the Allies; we can say to the railroads: "You have a given amount to meet the transportation which they are sending. You may place that grain in the elevators at seaboard." And your Allies may come and

they must take from those elevators the first thing that is in the elevator. * * *

To follow wheat a little further, it must be our desire to increase our exports as much as we legitimately can. One object of arriving at a "straight flour" is to get as large a proportion of wheat as is possible from a practical point of view, and thereby make a certain saving; and, further than that, we might make a mixed flour, particularly with barley (p. 380).

The food control bill was before the Senate, and Hoover wrote a letter to the author of the bill, Congressman Lever, in which he criticized the bill because it did not contain the power to fix prices, and stated:

A fixed price is the only positive, absolute method of eliminating speculation. (P. 401, hearings before House Committee on Agriculture on Lever bill, 1917.)

That is, he proposed to make it impossible for the farmer to sell on an open market and to get that market price.

Hoover was wedded to this scheme of control and to the doctrine of the absolute fixation of a specific price, as further appears from his testimony:

Senator SMITH of Georgia. You are not advising any guarantee or minimum?

Mr. HOOVER. I am not advising any guarantee at all.

Senator SMITH of Georgia. You are advising direct control of food production?

Mr. HOOVER. Yes; and if necessary, to buy it and fix a price.

Senator SMITH of Georgia. You would utilize all existing agencies?

Mr. HOOVER. Yes, sir.

The CHAIRMAN. Now, Mr. Hoover, with reference to the fixed price, you would have a provision that the consumer and seller could appeal to the courts for a higher price?

Mr. HOOVER. I believe we could arrange that.

The CHAIRMAN. Would not that be necessary? Can you take private property for public use without due compensation?

Mr. HOOVER. I understand the Government has all powers of defense by requisition——

The CHAIRMAN. Not without paying a due price.

* * * * * * * *

Mr. HOOVER. * * * I tried to make it clear that both the minimum and the maximum were incorrect from an economic and practical point of view, but that a fixed price, a definite price, at which the stuff was purchased throughout the whole year and backed by the Government, was the only practicable solution. (Hearings, Committee on Agriculture and Forestry of the Senate, 1917, pp. 414–415.)

In view of this advocacy by Mr. Hoover of a fixed price to be forced by the Government, it is astounding to find him pretending he had nothing to do with the fixation of prices.

All this brings us to an understanding of the purposes Mr. Hoover had in his heart. He desired to have written in the bill the power to fix an arbitrary price for all farm products. He had advised our European Allies to have one buying agency; he desired our Government to adopt a similar control and articulate that control with our Allies in order to absolutely and effectively shut out all possible outside buying.

But Congress did not agree with Mr. Hoover. It declined to grant him the power he demanded. On the contrary, Congress, against his advice and protest, established a guaranteed minimum price which it proposed to pay to the farmer for the crops of 1918 no matter how low the market price might be.

The reason for this action was that it was recognized and proclaimed "that food would win the war." It was recognized that America must produce vast quantities of farm products, particularly wheat. It was also conceded that if production was so stimulated and if the war should come to a sudden close the farmer might be forced to sell his surplus wheat at a tremendous loss.

Hence, it was proposed to protect the farmer against this loss by guaranteeing him that his prices would not go below a certain figure.

In order to determine what might be a fair price to guarantee to the farmer as the minimum, President Wilson assembled a voluntary board. It was without any authority of law whatsoever. It was merely advisory.

The board did not agree with Mr. Hoover that either 75 cents or $1.50 would be a fair price for wheat. It reached the conclusion that the Government ought to guarantee a price of $2.20 a bushel for the 1917 crop. But that was to be merely a guaranteed minimum.

Neither did it agree with Mr. Hoover on his scheme of a fixed price. It did two things: (1) It guaranteed the farmer that the price for his wheat for 1918 would not go below $2. The bill did not pass until August. Nearly all of the farmers' wheat crop of 1917 had been marketed, and it was considered in view of the high world prices that a legal guarantee for that year was not necessary. (2) But lest it should be in the future at any time necessary, Congress empowered the President to raise the guaranty minimum whenever such action appeared advisable.

The language of the law is as follows:

That whenever the President shall find that an emergency exists requiring stimulation of the production of wheat, etc. * * * he is authorized * * * to give public notice of what is a reasonable guaranteed price, in order to assure such producers a reasonable profit. * * * Thereupon, the Government of the United States hereby guarantees every producer of wheat * * * a price not less than the guaranteed price therefor as fixed pursuant to this section. * * * The guaranteed prices for the several standard grades of wheat for the crop of 1918 shall be * * * not less than $2 per bushel at the principal interior primary markets. This guaranty shall not be dependent upon the action of the President under the first part of this section, but is hereby made absolute and shall be binding until May 1, 1919. (Sec. 14, ch. 53, act of Congress, August 10, 1917.)

The language itself makes it clear that the price named in the law was not a fixed price, was not a maximum price, but was a guaranteed minimum. This was fully threshed out on the floor of the Senate. (See vol. 55, Pt. VI, CONGRESSIONAL RECORD, pp. 5875–5878, 5915–5916.)

HOOVER USES LICENSING POWER TO FIX PRICES

But the bill did contain a provision under which the grain dealers and the millers and certain other business institutions could not operate without obtaining a license issuable and revocable by Mr. Hoover.

At that time I knew from Mr. Hoover's testimony that he wanted to fix an arbitrary price for farm products. I warned the country that he would use the licensing power so as to compel the purchasers of grain to pay a price dictated by him.

I knew (1) that Mr. Hoover had approved the organization of the English wheat-export company for the purpose of controlling prices paid in our export market, and that he had advised an organization here to cooperate with the British company; (2) that before coming here he had been using large sums of money and making heavy purchases and sales to beat down or "rig" the market, and that the bill he was then advocating placed under his control $150,000,000 which could be used for a similar purpose; (3) that the bill contained a provision that grain dealers and millers could only operate under a license which was issuable and revocable at the pleasure of Mr. Hoover; (4) I distinctly called attention to the fact that this power of licensing made Hoover the absolute dictator of prices. I then said:

Again, Mr. President, if the powers conveyed by this bill are employed, it will deprive the farmer of the last vestige of a free market in which to sell what he produces. At the same time he will be compelled to buy in a market where war prices prevail.

The result indicated springs from the fact that the embargo law and the enforcement thereof, together with the action of the allied governments, have already placed the control of all wheat exports in the Wheat Export Co. That company is, in fact, a syndicate or corporation comprised of English concerns. Thus, to-day, an English company exercises a complete monopolistic control over America's foreign grain markets. It therefore has the power to fix the price of every bushel of wheat raised on American farms which is sent abroad.

Let it not be forgotten that Mr. Hoover counseled, aided, and abetted the organization of this English monopoly. The fact I have hitherto charged. The proof I have hitherto produced from Mr. Hoover's own testimony. The fact will not be here denied. I challenge denial at this time. There are none to stand forth and dispute the truth of my assertion.

Having thus taken away the farmer's foreign market, the food dictator is by this bill granted authority and power to seize and control the domestic market.

By employing the licensing provision he may bring all the mills, elevators, and grain exchanges within his control. On top of this he is furnished with $150,000,000 of Government money for the express purpose of going into the market and controlling prices. Indeed, it is no longer concealed, although the fact was for a long time disputed, that the food dictator, acting in conjunction with the English Wheat Export Co., will be able to arbitrarily fix the price of every bushel of grain raised upon the farms of America.

The farmer is, therefore, dependent for the price of his grain crop upon the will of one man. As that man shall dictate, the 45,000,000 people engaged in agriculture in the United States may be blessed with prosperity or reduced to bankruptcy. * * *

It was for the purpose of protecting the farmer against injustice by a food dictator that we have contended for a price guaranteed by the law. We believed this necessary as an act of justice and also because the farmer, appalled by the fact that the price of his wheat is to be arbitrarily dictated by one man, in all probability will reduce

his acreage. We sought and obtained a legislative guaranty of $2 per bushel on this year's crop. We believed that good prices this year would result in a larger crop next year. (CONGRESSIONAL RECORD, vol. 55, Pt. VI, p. 5922.)

HOOVER PROCEEDS TO FIX THE PRICE

Notwithstanding the fact that Congress had rejected Hoover's proposition for a fixed price; notwithstanding the fact that Congress insisted upon the Government guaranteeing the farmer that his wheat would not go below $2 a bushel, and, as the RECORD discloses, that it was the intention of Congress to allow the farmer to receive any price above $2 which the markets of the world would pay; notwithstanding the fact that it was strenuously asserted that Mr. Hoover would not employ the licensing power to fix prices, this is what actually occurred:

Mr. Hoover proceeded to carry out the plan he had recommended and which had been rejected by Congress. He did this by the grossest abuse of the licensing power.

All grain dealers and millers were required to take out a license. The grain dealer was then flatly informed that he must pay the fixed price of $2.20 a bushel for the highest grade of wheat, with a sliding scale applicable to lower grades. He was told that if he paid any more or any less, his license would be revoked, which, of course, meant the destruction of his business. In turn the miller was ordered to buy all of his grain through the grain dealers and to pay the grain dealer what he had paid the farmer plus a small differential allowed the grain dealer for profit.

This, of course, took away from the farmer the opportunity to sell his wheat at all in the domestic market, except at the so-called fair price dictated by Hoover. Any violation of Hoover's orders by any grain dealer or any miller meant the destruction of his business through the revocation of his license.

In a word, it completely cornered the domestic market. Indeed, this order was at first so sweeping that a miller was not allowed to buy grain hauled directly to his mill by the farmer in his wagon or truck.

There remained, therefore, only the export market. But this had already been partially plugged by the organization of the Export Grain Co., which was a combination of British and other allied powers.

The job, however, was completed, and the foreign market absolutely closed by the organization of the United States Food Administration Grain Corporation, with a capital of $50,000,000 of Government money. Hoover was chairman of the board of directors.

This organization divided the country into 14 zones and placed a Government buyer in each zone. These buyers all paid the so-called fair price. No wheat could be shipped out of the country except through this Hoover organization.

The Hoover organization—United States Food Administration Grain Corporation—at once entered into an agreement with the British organization—the Wheat Export Co.—by which it would purchase all wheat delivered at the seaboard by the Hoover administration at the "fair price." At the same time arrangements were made to absolutely fix an unvarying price for wheat by carrying the control from the miller to the baker.

All this is substantially admitted in the official report of the Food Administration Grain Corporation of October 19, 1917. At page 12 of said report it is stated:

> In the purchase of the wheat the Food Administration acts purely in a merchant capacity, buying wheat at the interior terminals and reselling on one hand to the millers for domestic consumption and on the other hand for export purposes. To make sure that its operations will be conducted without loss, the Food Administration has secured assurances from the Allies that they will purchase all wheat delivered to our seaboard and placed at their disposal at the "fair price." * * * Under this contract, therefore, it can not sustain any loss in its transactions. To cover its cost of operation, the Food Administration adds 1 per cent to the cost of wheat at the interior terminals when it sells, and if this 1 per cent should be found unequal to the costs of storage, insurance, and administration, it will be adjusted to a point which will cover those costs without profit.
>
> The policies and plans were unanimously indorsed by a representative body of terminal elevator and grain dealers assembled in Washington August 15, 1917, and also by a body of 700 terminal and country dealers in convention at Buffalo September 24, 1917.

That was a fine bunch to meet and fix the price of the farmers' wheat.

Here, then, is the bold, plain admission and assertion that Hoover through the organization of which he was the head and through acting in conjunction with the foreign interests had completely and absolutely cornered and controlled the market and had absolutely and completely fixed the price of every bushel of grain raised in the United States.

Yet Mr. Hoover has the temerity to now assert that he did not fix prices. I repeat that when President Wilson assembled an advisory board to express its opinion as to what would be a fair price to be paid the farmer the opinion of that board was without any force or effect whatever. But when Mr. Hoover, by the devices aforesaid, took possession of the market and ordered every buyer upon pain of being put out of business to pay a certain price and when he combined with foreign interests to close the export market he then and there fixed the price of wheat and other grains. His attempt to evade this responsibility is ridiculous in the face of the plain-written record. His attempt to place the blame upon the President is contemptible.

From the time Hoover effected these combinations the farmer, in so far as prices were concerned, was as completely under his control as was a Russian serf in the days of Peter the Great.

But we are also confronted by the statement that Mr. Hoover held up the price of grain for the farmers. How he can claim that he did not fix prices and at the same time claim that he held up prices is beyond the comprehension of the ordinary mind and is another absurdity and contradiction. If he had nothing to do with fixing prices, how did he maintain prices? He could have held up prices only because he had power to fix prices, a power usurped, it is true, but power. A man can not in the same breath claim that he did not fix prices at all and that he did fix prices and fix them at a high level.

Statements of that kind have been made time and again by Mr. Hoover, or at least by his advocates, who are so close to him as to make him responsible.

I could encumber the record with further quotations, but enough has been said. I shall now proceed to demonstrate that Hoover's manipulation resulted in—

(a) Destroying the farmers' free market.

(b) Forcing the farmer to sell far below the war level of prices, while he was at the same time compelled to buy at the war level.

HOOVER DID REDUCE THE FARMERS' PRICES

Certain facts stand out in bold relief:

(1) On May 11, 1917, before Hoover's operations began, the price of wheat had gone so high that the Chicago Board of Trade met and compelled the settlement of all outstanding futures at $3.18.

May 16, 1917, Hoover assembled certain grain dealers at Washington, and at his request they submitted a tentative outline of a plan of control. Under that plan the Government would control—

> the transportation of foodstuffs, fix a price for wheat and maintain it for the entire crop year without change, control the distribution of the available supply of wheat, and control the storage facilities of elevators. (Government Control of Prices, by Paul Willard Garrett, of the War Trade Board, p. 63.)

That was the identical plan which Hoover had four days previously advocated before the committees of Congress. It goes without saying that he merely had his plan indorsed by the grain dealers whom he assembled at Washington.

Bear in mind that at that time no law had been enacted guaranteeing prices.

May 19, 1917, Hoover was "named" by the President as Food Administrator, although no law had yet been passed creating that office.

Nearly three months later, and on August 10, 1917, the food control bill, which had been pending since the 1st of May, was passed. That bill guaranteed the farmer a minimum price for the wheat crop of 1918, but it did not guarantee the price for the 1917 crop. That crop had already commanded as high as $3.18 per bushel.

August 10, 1917, Mr. Hoover was formally appointed Food Administrator.

August 14, 1917, the President announced the appointment of a committee to determine a fair price at which wheat should be purchased by the Government.

August 30, 1917, the committee recommended that the Government should pay $2.20 a bushel for No. 1 Northern spring wheat at Chicago, with differentials for other grades and terminals. (Garrett, p. 63.)

It is true that the President states that "Hoover had taken no part in the deliberations of the committee on whose recommendation I determine the Government's fair price," but it will be observed that the recommendation of the President was for a fixation of a fair price at which the Government would buy. If acted upon by the President under the general powers given him by the bill, it would amount to a Government-guaranteed minimum price of $2.20 per bushel for the 1917 crop, just as the

food administration bill had guaranteed the price of $2 minimum for the 1918 crop which was yet to be planted.

So that it is not true that this board or the President fixed the price for wheat. The board simply recommended to the Government that it should pay in the market at least $2.20 for the wheat it purchased. Of course, it was contemplated that the Government would purchase enough to maintain the wheat as high as $2.20.

While Mr. Hoover disclaims having sat with this committee and helped fix prices, it is interesting to note that Mr. Hoover, in his announcement of appointment, uses this language:

> With a view to determining a fair price the President has approved the appointment of a committee to be selected from representatives of the producing sections and consuming elements in the community. The committee will be assembled under the chairmanship of President Garfield, of Williams College, and it will be the duty of this committee to determine the fair price for the 1917 harvest.
>
> Upon the determination of this fair basis it is the intention of the Food Administration to use every authority given it under the bill and the control of exports to effect the universality of this fair basis throughout the whole of the 1917 harvest year without change or fluctuation.

What reasonable man can doubt that Mr. Hoover suggested the appointment of this committee; that he knew all about it, for he was able before it was assembled to tell who would be the chairman? Moreover, he clearly states that when this committee has made its finding as to the fair price for 1917, he proposes to use all his powers to enforce that price, "without change or fluctuation."

Bear in mind that the finding of this board had no legal effect or force whatever. If there had been nothing but the finding of the board, the farmer could have sold his wheat upon the market and at World War prices. It was not the finding of the board that $2.20 was a fair price for the Government to purchase at which fixed the price of wheat. That price was fixed when Hoover employed his power to issue and revoke licenses and to control exports. Until Hoover acted, the market was open to the farmer. After he had acted, the farmer could only receive the price Mr. Hoover allowed him to receive.

But Mr. Hoover did come here with the idea of a fixed price in his mind, all of which I have shown or will show, and he proposed to force that price upon the farmers. I quote from Garrett:

> Upon the announcement of the price of $2.20, the Food Administration affirmed its intention "to use every authority given it under the food control act and the control of exports to effect the universality of this fair basis throughout the whole of the 1917 harvest year without change or fluctuation."
>
> The announced policy of the Food Administration makes evident the difference in point of view of the legislative and executive branches of the Government. Congress provided a minimum price for the 1918 wheat crop; the Food Administration adopted a definite "fair price" for the 1917 crop. The one was not to be effective for nearly a year, or until July 1, 1918; the other (the Food Adminstration price) was effective from its announcement. (Garrett, p. 64.)

The market price for wheat in neutral countries during the war ran from $3 to $3.50, to $4.50 and to $5 a bushel in many instances. If there had been no price forced by Hoover, a forced levy, then the farmer would have been able to sell upon that world market. He would have been allowed to sell upon the market on which our manufacturers sold. He would have been able to sell upon the same market that Great Britain sold.

There is another bit of evidence, conclusive, final, binding, and that can not be disturbed. The Grain Export Corporation gave to our allies the full benefit of this price forced upon our American farmers.

Great Britain got what she wanted—a reduced price on American farm products. Nevertheless, the American Grain Corporation turned into the Federal Treasury $70,000,000 of profits. That profit accrued in part from the 1 per cent which it charged to cover expenses and probably part of it rose from the sales to neutrals.

Beyond all question, if there had been no regulation, if the tides of trade had flowed freely, if the farmer had been allowed to get the price which the wheat would have brought if it had not been interfered with, the farmer of this country during the period when this condition existed would have had probably more than a billion dollars more money in his pocket than he was permitted to have.

To sum it all up, Mr. Hoover came here with a plan to reduce the price of American foodstuffs by fixing an arbitrary and unvarying price.

He gave the benefit of that reduction to England and her allies. That is to say, he forced down the price of American farm products for the benefit of England, France, and Belgium, but chiefly the advantage flowed to England.

Mr. BROUSSARD. Mr. President, will the Senator yield?

Mr. REED of Missouri. I yield.

Mr. BROUSSARD. I was waiting to see if the Senator would refer to the surplus of over $10,000,000 which the Sugar Export Corporation turned over to the Treasury.

Mr. REED of Missouri. Mr. President, I had not intended to discuss the sugar proposition. It is more intricate, but, I believe, presents a chapter as black as the wheat proposition.

Mr. Hoover and his cohorts fixed an arbitrary price of 5½ cents, I believe, to the Cuban planter or mill owner, and that sugar was brought to this country and underwent no other expense except refining, and yet we sometimes paid 28 cents for sugar.

But, coming back to the wheat proposition—and what is true of wheat is true of cattle and of meats, for they were regulated in a somewhat similar manner—this is the picture presented: During the war the price of the principal farm products were held down by this arbitrary process; and during the war, therefore, the farmer had to buy at world prices, and he had to sell at a fixed and arbitrary price far below world-price levels.

The inevitable consequence was that when the war was over the farmer did not have in his bank a considerable sum of money to tide him over the evil days which every man understood would come. The manufacturer had the opportunity to accumulate, for he had received very high prices. The merchant had the same chance, for the goods that were on his shelves when the war began had been bought at low prices and had enhanced in value. Vast fortunes were accumulated in that and other ways. But the farmer had no such opportunity. He wore a Hoover ball and chain. In the race for wealth he had to drag that along with him.

When the war ended it was anticipated that there would be a slump in prices. That slump occurred for the farmer just as soon as Europe was able to temporarily replenish its bread baskets. Then the farmer was compelled to sell to a bankrupt people. And upon that market only partially recovered he is still compelled to sell in competition with the entire world.

Not so with the manufacturer. He had enjoyed during the war the highest war prices both at home and abroad. He now came before the Committee on Finance of the Senate and demanded that the tariff be raised to a point never before even suggested by any rational man. I heard certain manufacturers or their representatives declare that it was their purpose to maintain the war level of prices upon manufactured goods. I heard some of them in substance say—for we had then gone through an election—"We won this election, and we propose to have the rewards."

A bill was passed in accordance with that demand, and that bill raising the tariff upon all goods shipped into this country, plus the combinations, agreements, or understandings that were effected by the manufacturers of the country, resulted in maintaining substantially the war level of prices upon manufactured goods.

The farmer pays to-day for his agricultural implements almost twice the prices he paid in 1913. He, and indeed all of the people, pay for all classes of manufactured goods substantially 50 per cent more than they were obliged to pay in 1913. The suit of clothes your tailor made for $55 in 1913, if you were fortunate enough to be able to buy tailor-made goods, costs you to-day $100 or $125. The hand-me-down or ready-made goods have, if quality is considered, increased in price in the same proportion. The shoes on your feet, which now cost you ten or twelve dollars a pair, in 1913 could have been bought for five or six dollars, and were exactly the same kind of shoes.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Utah?

Mr. REED of Missouri. I yield.

Mr. SMOOT. The Senator does not claim that the tariff has brought that about, does he?

Mr. REED of Missouri. Yes, I do; and I know what the Senator is going to say—that the tariff has been taken off shoes.

Mr. SMOOT. There is no tariff on shoes at all, and the whole amount of wool in a suit of clothes would not amount to $2.

Mr. REED of Missouri. I know that argument.

Mr. SMOOT. It is true.

Mr. REED of Missouri. I have heard that argument until I am disgusted. You come and say, "We have to have a law to keep prices up," and when you get it and prices stay up you say the law had nothing to do with it.

Mr. SMOOT. The tariff did not.

Mr. REED of Missouri. The tariff affects many things not named in the tariff. When you raise the general standard of prices, things that are not included in the tariff are carried along. We all know that. I am not going to be led aside from the theme of my discourse. I heard the testimony given. The tariff was raised to enable the maintenance of the war level of prices, and the war level of prices has been substantially maintained from that day to this good hour. It worked.

The farmers have to buy clothing, as well as machinery; they have to buy everything that the ordinary person needs in the way of necessities; they do not buy many luxuries. So that when the war was over, by law we forced the farmer—and everybody else, too, but I am speaking particularly of the farmer now—to buy on this high level. We did it by statute, and then there were the illegal combinations and conspiracies that have fattened and battened and gone untouched for eight years under a finer protectorate by this administration than was ever had by the bootleggers' organization from the officials of Chicago—that kind of protection which consists in saying: "Run your illegal business and we will not see it provided you contribute at the right time."

What happened to the farmer's other market? What is happening to it—the market where he sells? There he must sell on the world level. If he carries over there $10,000 worth of wheat and wants to bring back $10,000 worth of goods purchased in the market where he sold, when he gets to this country he is met by the tariff collector, who exacts so high a tribute that when it is added to the price he paid in Europe, the total cost is just a little greater than the price in the domestic market. For the American trusts and combinations have so skillfully arranged their prices that they are just a few cents lower than the foreign price plus the tariff.

Thus you deny the farmer the right to purchase in the market where he is compelled to sell. You do it by law. You have been doing it for more than 60 years. Two generations of farmers have been subjected to that kind of illegal and infamous oppression. I say illegal although worked out through the processes of law, for the wrongful use of the law is in a sense illegal.

Mr. President, ruin stares the farmer in the face and political rebellion is impending. A political rebellion is the only argument that has ever aroused a responsive sentiment in the soul of the Republican Party. Accordingly, we find the managers of that party looking about for expedients which they hope will allay the storm and lull the farming population into the sleep of confidence until after the next election.

Mr. President, I have no doubt many of the men who have undertaken certain of the remedies which have been proposed have done so in good faith. I have no doubt that some of the adherents to the theory of the high tariff imagine that they can make some of their plans work. But the fact is the emergency is here. I have referred to one of these causes.

But another condition was created by the Government. I refer to the sudden and improvident deflation of the currency. The responsibility for that deflation must rest upon the Republican Party, and in that responsibility Mr. Hoover must share.

I digress for a moment in order to state the facts.

The Republican Party in its platform of 1920 demanded "the deflation of credit and currency." That started the ball rolling. On August 21, 1920, at Minneapolis, Minn., Mr. Hoover added his sanction and distinguished approval. He there declared that "deflation is necessary to reduce prices."

So the deflation occurred. Not gradually, not prudently, but so suddenly as to destroy values and produce widespread suffering. The farmers, stock raisers, country bankers, country merchants, and all classes of borrowers were driven into bankruptcy.

Consider the farmer's and stockman's condition. They borrowed money to buy cattle; they purchased these cattle upon a high-price level. Suddenly the currency is deflated. Credits are stopped; they seek to dispose of their produce and find the prices fixed by the bankrupt market of Europe. Their notes are coming due; they can not pay. The country banks fail, and so the evil spreads.

The economic law has established a low market abroad. In that market the farmer must sell. The tariff has established a high market at home. In that market the farmer must buy. On top of this there is a forced restriction of credits, and the farmer, being the borrower, finds himself the victim of a money scarcity created by the Government.

It is therefore not to be wondered that those who have produced and still insist upon perpetuating these conditions have sought by various devices to placate the farmer. About four years ago they suddenly admitted that the tariff did raise prices. They then asserted, "We are going to give the farmer the same benefits of high tariff prices which we have heretofore given to the manufacturer." This they proposed to do by placing a tariff on farm products, wholly ignoring the fact that the tariff only operates upon articles imported into the country and that it can have no effect upon articles which are exported in large quantities.

It is too plain for argument that when we produce a surplus of any article which must be sold abroad, that there can be no considerable amounts of that product imported into the country. It follows, therefore, that a tariff tax levied upon importations of that which we do not import will have no material effect upon our domestic prices.

We export 1 bushel out of every 5 we raise. No wheat is imported into the country, except small amounts which are used for mixture with the domestic grain or which come here for milling or which are brought through the United States because of shipping facilities.

Nevertheless, I heard the former distinguished Senator from North Dakota, Mr. McCumber, from this floor solemnly argue that a tariff of 25 cents a bushel upon wheat imported into the United States would raise the price of the entire domestic crop to the level at which it had sold three months previously. Three months previously it had sold for something like $1.50 more than the then market price. It, of course, follows that before Senator McCumber was right when he asserted that a 25 per cent tariff would raise the price in our market $1.50, that the Canadian farmer, and, indeed, the farmers of all the world, could ship their wheat here, pay the 25 per cent duty, and secure $1.50 more than the then market price.

The statement was absurd. Nevertheless, the bill was put through Congress, and the farmer was told that his troubles were at an end.

The absurdity to which I refer applies generally to all farm products which are produced materially beyond the demands of the home market. It may be that the tariff has the effect of conferring some benefits upon the wool growers, although that is doubtful. In view of the fact that we consume much more sugar than we produce, a tariff upon sugar has in it an element of protection to the home producer, but that additional tax is collected from the consumer.

The argument that a tariff upon farm products (of which we produce a surplus which must be marketed abroad) will bring the farmer the same benefits the tariff brings to the manufacturer, who, absent the tariff, would be compelled to compete with the foreign manufacturer, is a solecism and a subterfuge. The promise will turn to ashes upon the lips of those who make it. It will give no substantial relief. Those who bring forward the proposition and who advocate it are too intelligent to believe in the truth of their own pronouncements.

The cold truth is that the management of the Republican Party is so wedded to the tariff and so thoroughly under the control of the tariff barons that they are willing to continue the exactions now levied upon the farmer by the protected manufacturer and to resort to any scheme, device, or trick to deceive the farmer into voting for the continuance of high-protective policies.

According to information I have, there was recently a meeting in New York of a number of great capitalists. They were all opposed to the various farm relief bills before Congress. But when the discussion waxed warm they were silenced by the statements of one of the greatest bankers of the world, who said:

> Gentlemen, we might as well face the issue; we have got either to consent to the passage of the McNary-Haugen bill or a similar bill, and thus placate the farmers, or we shall have to yield our tariff.

I cast no aspersions upon the authors of the McNary-Haugen bill. There are many provisions of that bill the wisdom of which I doubt, but I would, nevertheless, support, because I am willing to have them tried. The part of that bill against which I protest is the so-called equalization fee.

The equalization fee is nothing more nor less than a forced levy. It is a forced tribute exacted by authority and collected by force of the Government. It is taken from every farmer of the United States who has anything to sell, and it is taken without his authority or consent. It is a scheme by which part of the farmer's property is taken away from him by the powers of government and turned over to a bureau to administer as that bureau may deem best. To that extent it puts the farmer under guardianship. It takes his property without due process of law. It is unconstitutional. I have not the slightest doubt it will be declared by the courts to be unconstitutional.

The result, therefore, of enacting the bill is to postpone the day when practical relief, such as I have proposed, may be inaugurated.

However, Mr. President, there is one way in which we can in accordance with economic law give some measure of relief to the farmer. That can be accomplished by simply removing the artificial incubus or burden which we have placed upon him.

We can accomplish that by nullifying those provisions of the law which deny him the opportunity to buy in the market where he must sell his surplus. We can by the repeal of that law relieve him from the tariff exactions under which he now suffers.

Such a plan will bring relief. All those plans that propose to relieve the farmer by enacting tariffs against imports which are not imported will end in failure.

Accordingly I have prepared the amendment I am now discussing. It does not embrace merely my idea, but is the result of the meeting of many minds.

In a word, the amendment proposes that when the farmers export their products they may receive a debenture equal to 25 per cent of the products exported. The debenture may be used by them or their assigns in paying tariff duties upon anything imported into this country.

If the amendment shall be accepted, the great cooperative farming organizations which are supposed to be created by the McNary-Haugen bill, and some of which already exist, may, through their agencies, if they desire, export directly to Europe, receive a debenture equal to 25 per cent of the value of the commodities they ship abroad, and may buy in Europe whatsoever goods they desire to buy and pay the duty upon them with the 25 per cent debentures.

The result will be that wheat sold at $1 a bushel here upon the market, with a 25 per cent debenture added to it in Europe, will be in effect worth substantially $1.25 a bushel to the farmer.

The debenture is assignable, so that if the farm organization does not itself see fit to import it can sell the debenture to a regular importer, and by the sale of the debenture it can put into its treasury the amount received for that debenture, and the debentures ought to be worth substantially their face.

But the benefits of this amendment are not limited to those who see fit to join farm organizations. Any exporter may receive them; and they are to be issued by the Secretary of Agriculture whenever $3,000 worth, or more, of a farm product is sent abroad in one shipment. The amount of $3,000 is named merely to simplify the execution of the law.

Let me say to all those who want farm relief that this amendment affords direct, positive, certain, and immediate relief. If a debenture, which has a definite value, is issued whenever wheat, cattle, or hogs or their products are exported, a European suction will be created and the price in the domestic market will advance. Thus general and immediate benefit to the farmers of the country will result. No economic law is violated; but there is avoided as to the farmer the burden of the present tariff law.

Mr. President, I know of nothing else that will bring a direct benefit. Those who are wedded to the tariff, those who will not touch it, those who regard it as sacred will continue to vote for it and persist in telling the farmer they want to benefit him. At the same time they must recognize the fact that they are responsible for the high prices which the farmer must pay and they are responsible for the fact that they maintain those high prices upon him in the markets where he must buy and yet deny to him any part of the benefits of the tariff.

Sirs, the farmer was lulled to sleep for many years by the claim that we would create a home market that would absorb all his products; that we would invite to our shores millions of people to constitute a new consuming public. While that was an argument without merit to start with, whatever possibility there was of any kind of benefit flowing from it has now been denied.

We have said to the teeming populations of Europe, "You can not come"; so how is the enlarged home market to be created? It can not be created except by the natural birth rate, and children are born on the farms just as fast as they are born in the cities. The home-market fake has been exploded by the recent immigration law. I am not here to argue the merits of that law; I simply speak of it as a condition that has been created.

We then have the spectacle of about half the people of the United States who are dependent upon agriculture compelled to buy in a market that has been artificially raised and which pools, trusts, and combinations have aided in raising, and we have, upon the other hand, a constant plucking of the vast agricultural population for the benefit of a few engaged in other industries.

I do not know, Mr. President, what fate this amendment will suffer at the hands of the Senate, but I thank those Senators who have paid me the compliment of their attention, and I am ready to submit the amendment when others shall have discussed it.

Mr. KING. Mr. President, will the Senator permit an interruption?

Mr. REED of Missouri. I have concluded.

Mr. KING. I should like to ask the Senator a question for information.

Mr. REED of Missouri. Very well.

Mr. KING. I have unfortunately been compelled to attend the Judiciary Committee and another committee this morning and I have been denied the benefit of the able address of the Senator. For information, I should like to know if the debenture of 25 per cent, which is to be paid under the amendment on exports, may be utilized for any other purpose than the discharge of obligations due under the tariff?

Mr. REED of Missouri. That is all.

Mr. KING. The debenture provided for may be used by anybody?

Mr. REED of Missouri. They may be assigned.

Mr. KING. They may be used by anybody who is importing goods, whether agricultural or manufactured goods?

Mr. REED of Missouri. Yes.

Mr. SMOOT. In other words, I will say to my colleague, the amendment of the Senator from Missouri, if adopted, would result in a reduction of customs receipts of about $300,000,000 a year.

Mr. KING. Our customs receipts are approximately $600,000,000 a year.

Mr. SMOOT. Yes.

Mr. KING. If 25 per cent only were deducted it would mean but one-fourth of $600,000,000.

Mr. SMOOT. But there are over $2,000,000,000 worth of farm products, and 25 per cent of that amount could be applied to the payment of customs duties upon any commodity; so that the reduction in customs receipts would be at least $300,000,000.

Mr. KING. Our exports in 1919 were approximately between seven billion and eight billion dollars. They are not so great now as they were then and, of course, a considerable portion of our exports are agricultural products. I do not have in my memory just now the exports for the calendar year 1927 which might come within the category of agricultural products, but they aggregated approximately $2,000,000,000.

Mr. SMOOT. A little over $2,000,000,000.

FEDERAL LAND BANK, COLUMBIA, S. C.

Mr. BLEASE. Mr. President, I was necessarily absent from the Senate last week when the Committee on Banking and Currency submitted its report upon a resolution which I had introduced requesting an investigation of the Federal land bank at Columbia, S. C. I also have a resolution pending before another committee asking for an investigation of the entire Federal land bank system.

I shall not take the time of the Senate at this time to discuss this report, but wish to request the publication in the RECORD of an article appearing in the current Farmer's National Magazine, and to make a few remarks and refer to some letters which I have received.

The PRESIDING OFFICER (Mr. WATERMAN in the chair). Without objection, the article will be published in the RECORD.

The article is as follows:

[Extract from article appearing in current Farmers' National Magazine]

WHITEWASH AND SMOTHERING PROCESS ADOPTED BY SENATE COMMITTEE ON BANKING AND CURRENCY—SENATOR NORBECK AND "FOUR HORSEMEN" WORK HAND AND GLOVE WITH MELLON-MEYER POLITICAL BANK GANG

When the Senate Committee on Banking and Currency held a secret session many weeks after the original resolution to investigate the condition of the Columbia (S. C.) Land Bank has been filed, and after several secret conferences, and voted to whitewash and smother this investigation, much needed as it is, they not only did not keep faith with the American people and the thousands of farmers who hold capital stock in that particular land bank but other thousands of farmers whose property is now jeopardized via the liability feature of the farm loan act as a result of what has taken place in the Columbia Land Bank, and the acknowledged neglect of its officers, as per statement of Farm Loan Commissioner Meyer. They also slapped Senator COLE L. BLEASE in the face by not extending to him the senatorial courtesy of an investigation into the condition of a bank situated and operating in his own State. In a similar case, having to do with the condition of a bank in Texas, with even less evidence of irregularities and political crookedness, the same committee quickly

adopted the resolution, and the investigation is now going on. Why not a similar treatment of the South Carolina bank? Answer: Whitewash!

SECRET DECISIONS ARRIVED AT IN SECRET MANNER—WHY NOT USUAL OPEN AND ABOVE BOARD COMMITTEE SESSION?

On Saturday, May 5, the committee held a secret session, at which 9 of 15 members were present, and the whitewash prepared whereby it was hoped to save the face of Andrew W. Mellon's land bank wrecking crew from exposure in the gross mismanagement of the affairs of that farmer-owned but politically manipulated banking institution. Four Senators—BROOKHART, FLETCHER, FRAZIER, and PINE—as was to be expected—voted to investigate the bank. The reactionaries present—GLASS, SACKETT, PHIPPS, and the chairman, NORBECK, and one Senator whose name was not released (probably the fellow who delivered and prepared the whitewash) voted "nay."

MILLION DOLLAR LOSS DOES NOT CALL FOR INVESTIGATION

After the bank's political gangsters were directly responsible for the loss to the Federal Treasury, according to the testimony of Senator NORBECK on the floor of the Senate, May 9, 1928, "The Government must bear a loss of over $1,000,000," and in view of the fact that this bank, according to the statement issued by the Federal Farm Loan Bureau of the Treasury, as of February 29, 1928, had charged off as a loss, farm lands upon which its officials had loaned money, the gigantic sum of $1,708,807.21, and was carrying at the time to suspense account, more than 90 days old, delinquent installments due of $249,824.41, and much other evidence which any Senate committee could have considered and acted upon, in face of this evidence, the committee voted to smother the investigation. For a fire-eating "farm reliever"—NORBECK—to have been responsible for having issued to the world this whitewashing, committee-smothering campaign is a jest which will make thousands of farmers of his State laugh out of the wrong side of their mouths when said NORBECK again taps on their door for votes. For NORBECK has become, in the short time he has been vested with the chairmanship of this important committee, a real circus performer, and has performed not one but many a political contortion, compared with the position he formerly occupied when he was going to move both heaven and earth to have the Federal Government immediately put into force his half-baked plans to "relieve" the farmer. The fact that the present Federal farm loan system is now approaching a national scandal, and that it is infested from top to bottom by as heartless and inexperienced a gang of political plunderers as ever pillaged a financial institution, probably does not seem strange to the Senator, who comes from a State where they made such a grand success of their State-operated land banks that it soon became necessary for the State legislature to stop issuance of all bonds and draw heavily upon the State treasury to repay to bondholders the enormous losses which had been run up by the inexperienced political bankers. Because this was the way they did it out in South Dakota only a short time ago, NORBECK probably thinks that it is the right way to do it all over the United States, for by his failure, nay, his willful neglect, to have the Federal farm loan system now investigated, he is hastening the day when the same thing may happen in the case of these Federal political banks.

SOUTH DAKOTA WAS STUNG BY POLITICAL LAND BANKS

NORBECK knows full well what may be expected of political plunderers when they once get hold of a banking institution. If he doubts it, he need not go abroad from his own home State, where the taxpayers are still paying heavy taxes to repay for those political shortcomings of the political land banks. It would seem, however, aside from paying a courtesy to a United States Senator in meeting his request for an investigation of conditions within his own State, that the fact that South Dakota had her fingers burned so severely so recently, NORBECK would have voted in favor of a full investigation. What possible facts did they have to hide down there in South Carolina, if everything is as pure and spotless in that land bank as NORBECK testified? If things are all right, who do NORBECK, GLASS, SACKETT, PHIPPS, and the unknown hero of the committee fear to have all the people everywhere have all the facts?

SOUTH CAROLINA NOT SATISFIED

It is not strange that the people of South Carolina, despite the statement made by NORBECK about their protecting political ringleaders, urge that the Federal land bank which is there to serve them—and is not serving them satisfactorily—be investigated. They live in South Carolina; they should know better than a Senator out in South Dakota, 2,000 miles away, could possibly know, unless Senator NORBECK is ready to acknowledge that his decision was a hand-me-down, ready-made, prepared by Andrew W. Mellon and Eugene Meyer, and he did not need to have any facts upon which to smother the investigation. The fact that NORBECK is still able to protect under his wings the political plunderers in the Federal farm-loan system, after the experience in his own State, testifies that he apparently does not care what happens to this system so long as he and the other politicians can come out every few years, make a bow to the farmers (whom they do not serve), and get enough votes to get back in again. By their action these politicians on the Senate Banking and Currency Committee have testified that they do not give a tinker's damn for the American farmer, but that they are imbued with a righteous indignation whenever anyone suggests the investigation of political plunderers, whose own filed statement, issued and distributed by the United States Treasury, acknowledges them to be far short from being safe men with whom to longer leave the affairs of the land bank at Columbia.

MEYER TESTIFIES NEED OF INVESTIGATION

The testimony of Eugene Meyer, Federal farm loan commissioner, in his communication to the committee which NORBECK heads and which voted to whitewash this land bank's uncertain dealings, would have fully justified the fullest investigation. Meyer wrote: "Of course, some responsibility attaches to the management of the Columbia bank for these occurrences, particularly as to its failure more successfully to checkmate the conspirators."

Confronted with a new cropping season and another year of marketing, NORBECK and the "four horsemen" who vote with him are willing to permit that land bank, under the same management, to again run up enormous losses, which the Federal Treasury must repay; this, after the man charged under the farm loan act for the supervision of the system testified that the officers of the Columbia bank were far short in performing their duties.

If there is anyone, anywhere, who can beat the action of the Senate Committee on Banking and Currency, after this sort of testimony had been introduced, in voting to whitewash the Columbia Land Bank case, they will need to get up very early in the morning.

WHAT ABOUT CALIFORNIA FEDERAL LAND BANK?

The members of the same committee have long since been conversant with conditions in other land banks which political plunderers are now pillaging and which the present Farm Loan Board is not stopping. There is, for example, the Spokane Federal Land Bank, now in the hands of a receiver, and no one knows how deep into the "red" that bank is nor of the enormous liabilities that the political receiver's committee may run up for farmers all over the United States to pay. There is the Federal land bank at Berkeley, Calif., headed by a president who is under the most severe of criticism, and which the Farm Bureau Federation of California has repeatedly requested the Senate to investigate.

REPUBLICAN "PULL" TOO STRONG FOR INVESTIGATION

It has been demonstrated that, if you are the blackest sort of a criminal but you have the right kind of a "pull" with the present Coolidge administration, you can get away with even murder, as men have fully demonstrated in the past few years. There is Harry Sinclair, whom to put in jail, as he should surely be, not one administration official has lifted a hand; in fact, there is plenty of evidence that the administration leaders were working behind the scenes to call off the hound dogs that would give Sinclair his just prison term as the greatest corruptionist of the age.

Now, the president of the Berkeley Federal Land Bank happens to have a strong "pull" with the same Coolidge crew. A brief recital of the case may prove illuminating, as showing the urgent need of the fullest possible investigation of the entire Federal farm-loan system, and the casting out of criminal politicians who now hold high office in the banking system.

The president is Willard D. Ellis, and shortly after the farmer-owners were given the opportunity of voting(?) for district land-bank officers (hand picked by the Farm Loan Board), the farmers of California put in one of their own men, George H. Sawyer. Soon Mr. Sawyer discovered some very strange business being carried on by this bank, and he set about holding a little investigation of his own.

MALFEASANCE IN OFFICE IS CHARGE

Mr. Sawyer's first charge against President Ellis applies to certain of the funds of the Federal land bank and intermediate credit bank which Ellis used for his own benefit, contrary to the farm loan act. Evidence of this is available now, as for many months past.

The second charge made by Mr. Sawyer is that Ellis connived at violations of the law in the appointment and the employment of appraisers, contrary to the provisions of section 10 of the farm loan act. Evidence of this charge is available, as for many months past.

The third charge made by Mr. Sawyer against Ellis is that Ellis collected from the Federal Land Bank of Berkeley for automobile mileage more than the rate fixed by the bank and collected from the bank the expenses of a trip to Utah for other than bank purposes. This, also, contrary to the farm loan act. Evidence to substantiate this serious charge has been available for many months.

The fourth charge Mr. Sawyer made against Ellis has to do with the fact that Ellis offered for approval of the Farm Loan Board for the issuance of bonds a loan in an amount which Ellis knew or should have known was the result of a forgery. This act is contrary to three different sections of the farm loan act and is so serious that Ellis may be sent to prison for a long term of years as well as subjected to pay a heavy fine. The evidence has been available for many, many months.

The fifth charge Mr. Sawyer made against Ellis is that Ellis had knowledge at the inception of the investigation of the defalcation of James J. Burke June 13–September 15, 1924, that Fred G. Shaw, then assistant treasurer of the land bank, had been guilty of embezzlement and falsification of the books of the bank and willfully failed to inform the Farm Loan Board examiners of the facts and permitted Shaw to remain as an employee of the bank until June 16, 1925, in the same capacity as before discovery, with ample opportunity for further falsification of the books and only restricted opportunities for further embezzlement. These are charges considered alone, and without respect to the many other charges Mr. Sawyer filed against Ellis, to be so serious as to blast all faith in the Federal land bank system. Crooks not only known to be in possession of the books and money of the bank, but actually protected by the officials in charge of the bank. Such is political banking as carried under the Mellonized régimé. Evidence to substantiate these charges has been available for many, many months.

BANK CHARGED WITH MISMANAGEMENT BY FARM BUREAU

The Berkeley Federal Land Bank has also been charged with a series of mismanagement charges by the officials of the California Farm Bureau Federation, and the Mellonized political plunderers have not only side-stepped but evaded every demand for action to remedy this serious situation. A brief synopsis of these charges may be of interest:

"First charge: In many cases loans are refused on the best security, while in many other cases loans are made on almost worthless security.

"Second charge. Cooperative farm organizations obtain loans only through political influence or pressure and not on merit.

"Third charge. Good loans are frequently withheld to protect the interest of local commercial banks charging from 8 to 10 per cent interest.

"Fourth charge. President Ellis neglects and refuses to carry out the orders of the board of directors of the land bank.

"Fifth charge. President Ellis ignores requests of the farm-loan associations and bars local directors from access to the bank's records. (Remember, the capital stock of this bank is owned by these associations. This is Mellonized efficiency for you—refusing the owners the right to inspect the bank which they fully own, but which Mellonized politicians fully pillage.)

"Sixth charge. Land bank loans are not properly considered by the directors.

"Seventh and eighth charges. Included in malfeasance charges.

"Ninth charge. President Ellis has deliberately caused the employment of appraisers in an illegitimate manner and in such a way as to bring the bank into disrepute.

"Tenth charge. President Ellis willfully depreciated the character and standing of his fellow directors."

FARM LOAN BOARD KEEPS ON LID

Ellis made a long and detailed answer to these grave charges. But—and here's the interesting feature of the whole California land-bank crookedness—to whom did Ellis file that answer to the serious charges? To the Farm Loan Board, with whom he is also accused, with substantial evidence to support it, that he likewise previously filed with fraudulent applications for fraudulent bond issues!

NORBECK ASKS FARM LOAN BOARD TO INVESTIGATE ITS OWN ACTION

Senator NORBECK and his "four horsemen" submitted the Blease resolution for investigation to the same Farm Loan Board for their advice and consent to go ahead. The board has kept the lid on the Berkeley land-bank charges, and from that day to this has continued to stand back of President Ellis, though he is considered shady and is accepted only with gravest suspicion by the farmers of his own land-bank district. We assume that Senator NORBECK, having had such wide experience in the political land-banking methods of his own South Dakota, would consider the Berkeley case only a "political game," as he does that at Columbia, S. C., and that he would work with the Farm Loan Board—not with the American farmers and American people—to bring to light any certain charges which now exist against the officers of the Berkeley land bank and the Farm Loan Board with reference to the very serious charges which Mr. George H. Sawyer has filed, together with evidence to substantiate same.

Remember, Mr. Sawyer is a director at large of the Berkeley Federal Land Bank, elected by the farmer-owners of that bank to serve a district which comprises California, Utah, and Arizona. Also, remember that Ellis has been planted in Berkeley by the political manipulators of the Farm Loan Board under the "pure and holy hand" of Andrew W. Mellon, of Pepper-Vare repute in Pennsylvania, and that these politicians are now, as for many months past, keeping the lid over the Berkeley Federal Land Bank charges of corruption and crookedness.

WHAT DOES THE SENATE FEAR?

Why does Senator NORBECK and his "four horsemen" fear an investigation of the condition of the Columbia Land Bank? What secret facts have they available that they need to hold a secret conference to arrive at a secret decision with reference to the proposed investigation of that bank, that they need to hold their session behind locked doors and only give out such misleading facts as to the decision arrived at at that secret conference, such as alluding to the fact that "It was practically unanimous in feeling that there was not sufficient evidence to justify an investigation," whereas the truth was that the committee vote was 5 in favor of whitewash and 4 for an honest investigation? Surely there was no sinister political influence used in this alleged consideration of the subject. Oh, no! The five were only carrying out the orders they had received from Mellon and Meyer.

Also, people will please note the date upon which this secret conference was held, remembering that the Senate Committee on Banking and Currency had kept the resolution and its consideration to investigate the Columbia Land Bank carefully smothered, surrounded by greatest secrecy, ever since Senator BLEASE offered his resolution last February; not until two days prior to the Democratic State primary in South Carolina, or on Saturday, May 5, 1928, did the committee get around to hold its final secret session. That permitted the politically minded "four horsemen" and Senator NORBECK to issue a news item that "Senator BLEASE loses" in due season for the South Carolina newspapers to carry the news to the people of that State prior to the primary voting and thus, they hoped, we assume, that the action of their secret conference would have a telling decision upon the result of the South Carolina election. Surely had Senator NORBECK and his "four horsemen" wished to have played cheap politics with respect to this entire matter, they could not have selected a better time to have held their secret meeting and to have released the news of their action. They may disclaim this as much as they wish. "People back home" do not trust men who thus treat serious financial matters which result in the United States Treasury forking over to political bank manipulators anywhere from $1,000,000 to $2,000,000. The people of South Carolina voted for Senator BLEASE in face of secret, untruthful statement issued by committee.

NO FACTS FOR OWNERS OR PEOPLE

There have been no substantial facts released by anyone with respect to the financial condition of three Federal land banks now under fire—Columbia, Berkeley, and Spokane (in hands of a receiver)—and there will not be if we depend upon men of the type of Senator NORBECK, who "return to their home farmers" and belch forth fire when speaking to farmers as to "how worried" they are about them and their dire need, but who, when down at Washington, where they might serve the interests of all farmers, particularly the 500,000 farmers who have had their land bank stock stolen by the Coolidge-Mellon crew, are served up with a secret committee meeting which adopts as their own decision that made by Mellon-Meyer et al.

MELLON WITHHOLDS ANNUAL REPORT OF FARM LOAN BOARD

To this date, although Mellon proclaims that "there is no such serious situation in the Federal farm loan system as has been charged by Senator BLEASE," Mellon withholds his annual report to Congress on the condition of the entire system (because he fears to have the facts released while Congress is in session, as he did last year), and no one has been furnished with any statement regarding the condition of the three Federal land banks which are known to have suffered serious financial losses, nor have we had facts regarding that other land bank which made an assessment of 100 per cent against its stockholders. Only Mellon could advise a waiting world that "there is no such serious condition." Only Senator NORBECK and his "four horsemen" could be so foolish as to swallow it.

The United States Senate has justified its existence in the past eight years by rendering the fullest investigation of crookedness in high places; never in its entire history has whitewash or smothering processes caused the American people to have faith in it nor its leaders.

The Republican Party will pay at the polls their debt for the manner in which they have handled Teapot Dome, political farm loan, etc. They may be satisfied—the people "back home" (who have been robbed) are not.

SENATE MAY YET ACT

It is not too late for the Senate to take action looking toward a searching, nation-wide, much-needed investigation of the entire Federal farm loan system, and to seek out the truth regarding the political manipulations as carried on by the Mellonized political appointees, who now fully dominate that which the American farmer owns.

There is now before the Senate Committee to Audit and Control the Contingent Expenses of the Senate a resolution which, adopted, would secure this much-needed, long-prolonged investigation and do away completely with the whitewashing and smothering processes which have characterized the attitude of the Senate toward the Federal farm loan system ever since it was instituted. From the personnel of this committee we are assured in advance of an honest consideration of the evidence which is now up for their consideration. The chairman of the committee is Senator CHARLES S. DENEEN, who just recently licked as vicious a political gang as ever invaded this country; Senator DAVID I. WALSH, who not long since licked the Coolidge-Butler political crew in their home field, Massachusetts, and who is known for his honest, fearless method of dealing with legislative subjects; Senator T. H. CARAWAY, of Arkansas, is rated as a friend of the farmer. The two other members have often been listed as reactionaries. Senator FESS, of Ohio, who is to be keynoter at Kansas City, will probably not

wish to have any part of the Coolidge administration investigated, while Senator FRANK L. GREENE, of Coolidge's own Vermont, may be counted to oppose investigation of anything that Cal has named men to administer; that is taken for granted, irrespective of the evidence at hand. Therefore, we have three fearless Senators to count upon, as against two rock-ribbed administration Senators, and the country may anticipate that the charges now before the committee will receive careful and just consideration; that none of the NORBECK "secret sessions," with resultant tainted political pronouncements, will emanate from this committee.

GRAVE EVIDENCE TO BE CONSIDERED

Grave evidence is now known to be on file for the consideration of Senator DENEEN'S committee. There is the report, comprehensive and nation-wide in scope, prepared for the American Farm Bureau Federation's farm-loan investigation committee, by Mrs. Gertrude Mathews Shelby, expert in cooperative loan banking; there is the résumé, prepared by Mr. Xeno W. Putnam, of Harmonsburg, Pa., charging several Federal land-bank officials, with the knowledge and consent of the Farm Loan Board, of extortion, contrary to the fundamental farm loan act, in foreclosure of mortgages; the charging of commission in excess of the legal percentage, and of hiding from the stockholding owners of farm-loan associations of facts respecting their stock dividends. Then comes the charges against D. J. Coughlin, Lobdell's right-hand political manipulator, who, acting as national farm loan association examiner (?), accepted from Lobdell, as did those dressmakers, money for doing certain things in Lobdell's fiscal (pistol) agent office. Lobdell, former farm loan commissioner, who voted himself into a $25,000 job, and who is now, as for months past, been engaged in milking the farmers, through their land banks, has been shown to have used farm money to play the Wall Street market. The committee may give this illegal subject their consideration. Then there are the cases of the Columbia, Barkeley, and Spokane Federal Land Banks, and some other secrets, soon to become scandals, with regard to other land banks, and the more than fifty-odd joint-stock land banks, to be considered.

GIVE US A REAL, ALL-SEARCHING INVESTIGATION

Considered, all in all, it would seem that this committee, supported by the Senate, should give to the American people and the hundreds of thousands of farmers whose money is now at stake a real, searching investigation.

If, as "Andy" says, everything is satisfactory, there is not the slightest fear of an investigation on the part of anyone; on the other hand, if there be crookedness which anyone wishes to smother, we should have the investigation at the earliest possible moment.

And if everything is satisfactory, if there be no irregularities, why is it that Mellon, Meyer, and all their political appointees so forcefully fight an investigation? Why do they withhold for more than five months the annual report of the farm-loan system? These facts, considered alone, justify the most searching investigation. They are hiding substantial facts, as they have for months. Bring them out to light! Let us know!

Give us the investigation now!

Mr. BLEASE. I wish to submit, in addition to the written testimony which I have offered these two committees, two living witnesses who now sit in this gallery. I wired them and asked them to come here; and if the Senate will give them 15 minutes each, or if either of these committees or both of them will give them 15 minutes each, they will prove to the satisfaction of any unbiased man that there has been corruption of the worst kind in the bank at Columbia, S. C.

These two men, who now sit within a few feet of me in this gallery, were officers of a bank doing business with that bank. They were in these transactions. They know all about them from the very beginning up to date, and they are here ready to testify before the Committee on Banking and Currency. They are here, ready to testify before the other committee that has the other resolution. They are here ready to testify, if the Senate will allow it, before the Senate; and had I known before I went to my home last week that it was possible to obtain the testimony of these two men, I would have long since offered them to these two committees and to the Senate. Of course, however, I did not have any idea that men who are connected with this bank, men who are in it, men who know all about these transactions from the day the first paper was signed up to date, would come before a committee of the Senate and lay bare the entire transaction from its infancy.

I now offer to the Senate that testimony in the person of these two gentlemen, and request the Senator who is chairman of the committee to give them an opportunity to appear before that committee.

I have some other valuable information.

Mr. KING. Mr. President, will the Senator yield?

Mr. BLEASE. With pleasure.

Mr. KING. I am asking for information. As I understand the position of the Senator, it is that the Federal land bank at South Carolina was so manipulated by some of its officials that great losses occurred?

Mr. BLEASE. I am going to submit their report in just a minute.

Mr. KING. That they acted corruptly and fraudulently?

Mr. BLEASE. Yes, sir.

Mr. KING. And, as I understand the position of the Senator, that those in control of the farm-loan bank system have refused to make a proper investigation with a view to determining who are the culprits, with a view to seeing that they are punished. Is that the position of the Senator?

Mr. BLEASE. That is exactly correct; and what investigation they have made they have hidden, under the instructions of one Andrew W. Mellon, who knows of the thievery, and is particeps criminis to it, if he is the Secretary of the Treasury of the United States.

Mr. KING. What reason is assigned by either the House Committee or the Senate Committee on Banking and Currency?

Mr. BLEASE. The chairman of the committee gives a rigmarole that if any man will read he will admit himself is enough to demand an investigation, and I use the word "rigmarole" with contempt.

Mr. President, here is the report of this bank, published in the South Carolina newspapers. This one came from the Columbia Record, right where this bank is located. A good baseball player could throw a baseball from this bank to the Columbia Record office. They admit here a deficit of $915,356.14, and they further admit that they have charged off 1,500 mortgages as dead loss. They also put in this report interest collected but not yet earned from the farmers of South Carolina—interest which they have collected from them that the bank itself admits is not yet earned—of $102,908.14; and I ask that this be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

TREASURY DEPARTMENT,
FEDERAL FARM LOAN BUREAU.

(District No. 3)

Report of condition of the Federal Intermediate Credit Bank of Columbia, S. C., as of the close of business on May 5, 1928

ASSETS

		Amount
Direct loans		$715,000.00
Rediscounts		6,677,694.81
Other bonds, securities, etc		24,640.00
Deposits with banks		267,673.17
Cash		200.00
Accrued interest on loans and rediscounts		244.97
Accrued interest on securities		1,421.08
Furniture and fixtures		9,344.50
Prepaid expense		4,254.60
Capital stock callable from United States Treasury		2,000,000.00
Other assets (describe):		
Real estate	$212,828.80	
Auto equipment	1,605.00	
Accounts receivable	572.84	
Farm account	43,467.09	
		258,473.73
Deficit		915,356.14
Total assets		10,874,303.00

LIABILITIES

Capital stock subscribed ($3,000,000 issued, $2,000,000 unissued)	5,000,000.00
Interest collected—not earned	102,908.14
Debentures outstanding	4,950,000.00
Notes rediscounted	680,000.00
Accrued interest on outstanding debentures	31,327.79
Accrued interest on bills payable	20.96
Other liabilities (describe), accounts payable	110,046.11
Total liabilities	10,874,303.00

STATE OF SOUTH CAROLINA,
County of Richland, ss:

I, Henry S. Cohen, treasurer of the above-named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief.

HENRY S. COHEN, *Treasurer.*

Correct—attest:

HOWARD C. ARNOLD, *Director.*
W. F. STEVENS, *Director.*
L. S. GUION, *Director.*

Subscribed and sworn to before me this 14th day of May, 1928.

O. D. ADAIR,
Notary Public, South Carolina.

Mr. BLEASE. I have been informed recently that Mr. Meyer wished to resign before he got into some more difficulty in this situation, and that Andrew W. Mellon said to him, "No; stick until the fight is over."

Now I want to call the attention of the Senate to another matter.

The solicitor of this circuit down there in which this Beaufort stuff took place, it was reported to me, was employed by this intermediate credit bank. I wired him:

Are you now or have you been on the pay roll of the Intermediate Credit Bank of Columbia, S. C., and have you been conferring with them as such attorney in reference to Beaufort Bank cases? It is so reported, and I would be glad to have your version of the matter.

He writes back:

I have represented the Federal intermediate credit bank at Columbia in various matters during the past several years, but I am not on their pay roll, cases placed by them with me being charged for as handled on a fee basis.

The United States district attorney of South Carolina in that district made the statement, so I have been informed, that he received instructions to hand out indictments against certain people whether he could convict them or not; to endeavor to get true bills and hold them over their heads in order to discredit them in court. I wired him:

WASHINGTON, D. C., *May 20, 1928.*

Hon. J. D. E. MEYER,
United States District Attorney, Charleston, S. C.:

Did you tell party that you were requested or instructed to indict Horne Richardson and others whether you had any case or not so as to keep down investigation or for any other purpose? Party offers affidavit that you told him that, or words to that effect, and that you said you did not wish to do so, but would have to, and that you were told you might not get convictions but may be get true bills, which would serve immediate purpose.

COLE L. BLEASE.

To that I have received no answer.

Mr. ASHURST. When was that telegram sent?

Mr. BLEASE. May 20.

Mr. President, there is the attorney of the circuit admitting that he has been in the employ of the intermediate credit bank. There is the district attorney not answering a telegram charging him directly with bringing indictments against people for the purpose of discrediting their testimony. Do the Senate committee feel that that kind of stuff needs investigation, or do they feel that because Andrew W. Mellon knows that he has thieves working under him, and is trying to protect them, he is superior to them, and can say to them in the Senate what they shall or shall not do in regard to legislation?

I have some letters here, Mr. President, which I ask to have printed in the RECORD. One is from the vice president of the Merchants & Farmers Bank at Marietta, Ga. Another is from Hon. Robert A. Gilbert, an attorney of Atlanta, Ga. Another one is from Mr. W. R. Eve, jr., of Beaufort, S. C. Another one if from Albany, Ga., from Mr. T. J. Stewart. Another long one is from Charlotte, N. C., from William S. Fisher.

The PRESIDING OFFICER. Without objection, the letters will be printed in the RECORD.

The letters are as follows:

MERCHANTS & FARMERS BANK,
Marietta, Ga., May 7, 1928.

Hon. COLE L. BLEASE,
Washington, D. C.

DEAR SENATOR: While I am not one of your immediate constituents, I feel that you represent me in common with all the other citizens of all the States. I know that you must have quite a number of matters pertaining to your own State that take a great deal of your time, but I feel that you will pardon a little presumption on my part in taking up the matter I am about to discuss, for, as a public proposition, it reaches your own State.

Again I have selected you to write to about this matter because you seem to have nerve enough to inquire into the affairs of institutions controlled by those in power and influence. Coming down to the point, I have been reading of your effort to get some definite information about the Federal banks, and especially the Columbia Land Bank.

About 18 months ago I obtained a loan from that bank in the regular way of obtaining land loans, and, under their terms, I was compelled, as others are, to take a certain amount of their 6 per cent interest-bearing stock, interest payable semiannually. To be exact, I took $500 of this stock.

They collect my installment payment promptly, but they never send me any dividends or interest on my stock. I can not afford to default on my payments and call for a credit on account of interest they owe me as I would get into litigation, so I pay the graduated notes promptly as they come due, but I get back no interest on my stock, which should be paid me twice each year. I have written them, but they don't even reply.

I was discussing the situation with another borrower lately, and he tells me that there are any number of borrowers within a short distance from Marietta who are situated just as I am; who got loans and bought stock, but who have not received a single dividend or interest payment on their stock for quite a while. Since you have the matter of Federal loan banks under investigation I wish you to do me and others similarly situated the kindness of finding out why this particular land bank does not pay the interest on its stock.

I am sorry to disturb you, but I decided that you were the best situated of any of the Senators to get this information. For this service, allow me to thank you in advance, and should an opportunity present itself I will gladly reciprocate the favor.

Very respectfully,

R. A. HILL.

ATLANTA, GA., *May 10, 1928.*

Hon. COLE L. BLEASE,
United States Senate, Washington, D. C.

DEAR SIR: I note through the daily newspapers and CONGRESSIONAL RECORD your demand for an investigation of the Federal intermediate bank at Columbia, S. C., and the unfavorable report of the committee.

I have been investigating the cause of the failure of the Farmers & Merchants Bank of Girard, Ga., and during my investigation I found that among the liabilities of the latter bank was charged more than $8,000 securities held by the Federal intermediate bank; these securities are in addition to a bond given to secure the incurred liabilities of the cashier of the Farmers & Merchants Bank, this additional security is in the hands of the Federal intermediate bank illegally. However, the additional security is being collected, and politics have restrained me from getting the securities for the benefit of the depositors. I wish, therefore, that you would include this matter that is deserving of a thorough investigation.

Yours very truly,

WM. H. MCGUINN,
Attorney at Law, 216 Wynn-Claughton Building, Atlanta, Ga.

BEAUFORT, S. C., *May 12, 1928.*

Hon. COLE L. BLEASE,
United States Senate, Washington, D. C.

DEAR SENATOR: Am glad to offer my services in your proposed investigation of the Federal Intermediate Credit Bank of Columbia, S. C., in connection with their treatment of the Beaufort County farmers.

I know some facts that will at least show gross carelessness and mismanagement on the part of officers of the Federal intermediate credit bank.

When will the hearing probably take place? Not only the Beaufort people but other citizens of the State appreciate what you are doing in this matter.

Yours very truly,

W. R. EVE, Jr.

ALBANY, GA., *May 12, 1928.*

Hon. COLE BLEASE,
United States Senate, Washington, D. C.

MY DEAR SENATOR: Have noted with interest your bills or interest as to the Federal loan banks, particularly of Columbia, S. C. It is hoped that with your usual ways of doing you will "keep at it," for with an experience we have had, and can get up others, it is nothing but a usurious institution rather than an aid to farmers, and it is included also in the items of our hypocricy as to farmers' aid. We seem to take on a lot of things to give jobs and fees.

If you need any detail of this, will give you an item or items of county agent, representative of this outfit, who every time he came to see his supposed prospective borrowers it was fees, etc., plus more fees, expenses, and such.

In one case, as an auditor (I may have destroyed the papers), but I figured that a widow would have to pay (instead of 5 per cent) about 36 per cent first year, and no year from calculation would be less than 14 per cent. Of course, they did not call it interest, but fees—legal, and God knows what.

More power to you, and best wishes.

Very cordially,

T. J. STEWART.

CHARLOTTE, N. C., *May 17, 1928.*

Hon. COLE BLEASE,
United States Senate, Washington, D. C.

MY DEAR SENATOR: There appeared in the Winston-Salem (N. C.) daily paper, the week of May 12, the following:

"Blease inquiry bill is rejected, Washington, U. S."

The Blease amendment, which provides for a senatorial inquiry into the Federal land bank at Columbia, S. C., was rejected by the Senate Banking and Currency Committee to-day.

The "inquiry" should not stop at the Federal Land Bank of Columbia, S. C., but should extend by all means to the Federal Land Bank of Springfield, Mass. Knowing that the farm question is one of the vital questions that our country has to solve, and believing the general public should be and is desirous of having it solved, but with justice and

equity to the farmer, who is the backbone of the whole country, as well as to the public. I am writing to you hoping for information from you which will help me with my case with the Federal Land Bank of Springfield, Mass. I am one of the farmers who was persecuted and completely ruined by the infamous lying reports made by the man who was assistant to the president of this bank. On the strength of these false reports the bank brought foreclosure proceedings against me without one minute's notice or any demand for their money. This farm contained 280 acres. The bank's original loan was $4,200; at time of foreclosure action it was around $3,900. Their appraised value was $12,150 without timber, valued at $6,000 or $7,000. As collateral security the bank held fire-insurance policy on buildings for $3,410. The interest and principal was always paid before date due and taxes at a time satisfactory to the bank and Broome County treasurer. This farm is in New York State.

After the bank had impaired my credit and reputation in that section my family prevailed upon me to sell the farm. In April, 1924, I sold it for $12,000, without dairy, but before deal was closed the bank by their damnable action on August 13, 1924, forced me to settle with the bank in order to close the deal, which was closed in September, 1924. The bank's attorney at Binghamton, N. Y., told me if the judge had been in the city at the time he would have asked for a receiver. Now, if you are familiar with the terms of the Federal land-bank mortgage, you will see that in that case I would have had to either move off or pay rent for use of my own farm.

I wish to make one request, and that is that you treat me with the same courtesy and consideration that you do the bank. If you send my letter to the bank, send their reply to me.

Is it any wonder that the farmer is leaving the farm—the number of abandoned farms is appalling—when they get such treatment at the hands of the agents of their own Government. Mr. Thompson, of Federal land bank at Springfield, Mass., wrote me that my loan had been treated as all such loans were treated. I replied, "God help the farmer who has any such dealings with the Federal land bank." I have positive proof for every assertion I make.

In an address made by J. H. Quisenberry, of Louisa County, Va., as a guest of the Rotary Club, of Hampton, Va., Mr. Quisenberry said:

"That the Government has taken over $18,000,000 worth of farms in the country, due to the conditions in agricultural pursuits."

I would like to ask just who is responsible for this state of affairs? Is it through the management of the Federal land bank; if so, are they justified in so possessing them? It is a fact that the President of one of the Federal land banks admitted to me that it was a very difficult matter to manage their affairs with the farmers at so long a range. That being the case, should the farmer be held responsible for their failure to properly manage their business?

Trusting to hear from you at your earliest convenience,

I am, yours very truly,

WILLIAM S. FISHER,
Route 5, Charlotte, N. C., care of R. H. Ovenden.

P. S.—Inclosed find copy data I send as reference.

Mr. BLEASE. There is one letter, Mr. President, that I want to read to the Senate, and call the attention of the Senator from South Dakota to it:

AMERICAN-NEWS,
Aberdeen, S. Dak., May 14, 1928.

Hon. COLE BLEASE,
Senate Chamber, Washington, D. C.

DEAR SIR: It begins to look as if your persistence will be the means of giving the country some very valuable information regarding the management and the method of operating our Federal land banks.

Your progress is being marked by some very interesting disclosures. For some time those who reside in the farming regions have been anxious to get the facts about the land banks.

It is encouraging to see some one make what looks like a determined effort along this line.

Permit me to offer you my congratulations and sincere hope that you succeed.

Yours very truly,

C. D. KIMBALL, *Editor.*

That is from the home State of the chairman of this committee. I should like to call the Senate's attention to these letters. They are from men of character, men of honor, men of means, men who have had transactions with this bank. One gentleman states there, the vice president of one of these banks, that they forced him or some one, in order to get a loan, to take $500 of stock in this bank. They promised him that if he would take $500 of stock they would pay him interest on his stock, and gave him the dates when they would pay it. Not one dollar has he received, and yet he has been forced to pay the interest and the amounts when due on his note, which should have been credited with this interest. They are holding the stock, refusing to pay him any interest, and at the same time forcing him, under the whip handle of a mortgage, to pay every dollar that is due by him to this bank. I ask the Senate if that looks like it ought to be investigated.

Senators talk about the oil cases. That is in the past. The Senator from Missouri was talking this morning about the price of sugar. That was during war time. Here is something that is going on to-day, right this minute, before this country, and is going on every day.

Mr. Eugene Meyer—I want you to read that, Senators—says, in the last words of his report:

Of course, responsibility attaches to the management of the Columbia Bank for these occurrences.

This is not what I say, Mr. President; this is in the report of the chairman of the committee, Senator NORBECK's report, on the back page of it. Read it. He admits this conspiracy; he uses that word. He admits this rascality. He admits that they have tried to remedy it by turning a few people out of the bank. They turned them out, yes. I suppose they were following the precedent the United States Senate set when English was before the Senate for his misdoings and rascality. Instead of trying him at this bar and disgracing him, you pardoned him, so to speak, said that if he would resign you would withdraw your charges. He did resign. Now Mr. Eugene Meyer is following your example. When a thief is caught in one of your banks he pardons him by letting him resign. That is very fine. People can not get away from that. As I started to say, why not let the people of this country know the truth? Why conceal it, if these land banks are doing what these letters, these affidavits, and these two men sitting here who helped do it say? There they sit, they helped to do it, they say they helped to do it; and yet your committee says there is nothing to it.

Mr. President, I do not like to take the time of the Senate on this matter, but I have no other way to get to the people of this country. The people of America are the judges, they are the jury, after all, that is going to pass on this question, and I am putting all this matter into the RECORD in order that the people may see what the Senate did, and that the oil investigation is not the only thing in this country that ought to be taken up and attended to.

Mr. President, why refuse this investigation? I ask that one more time in all sincerity, why refuse it? The Attorney General of the United States claims that he has made some investigation, but he refuses to let anybody see his report. The Treasury Department admits the same thing, although they ignored it for a long time, it will be remembered. Mr. Mellon said he would pay no attention to it, but he did pay attention to it. Mr. Meyer said he would not pay any attention to it, but he did.

Why? Because these letters and this information I have put into the CONGRESSIONAL RECORD got so hot under them that they decided they had better try to put a little water on it, and they got the Senator from South Dakota to be the water toter. There is the editor of the only paper they have in the State, it is said—I do not know whether that is true or not—condemning him for it, and saying this investigation should be made, even out there in the Senator's own State. If you will read that article I had printed in the RECORD, you will see some more about what people out there said about the distinguished Senator, who claims to be such a great friend to the farmer. They burn him up. If you do not believe it, read the article. It may be I will have to read it myself between now and Saturday night; I do not know.

That is all I care to say on the bank matter this morning, Mr. President. I merely wanted to get these things into the RECORD and offer these two gentlemen here to this committee. Let them take their own chances. They are willing to testify. If Mr. Sargent wants to indict them when they have finished, that is his business. There they sit. If the paid attorney of the bank in South Carolina wants to have them indicted, that is his business. If the district attorney wants to have them indicted, there they sit. They say they were parties to this entire transaction. They are sitting right there, ready to come before the Senate, ready to go before any committee the Senate has, and prove the stealing and the rascality. That is what I offer.

THE NEGRO

Now, one other matter, not with regard to the bank. I want to congratulate the country we call Australia. I have an article from the Evening Star of May 11 about the Reverend Doctor Johnson, the head of this "nigger" college up here, and I have another article right under it from the London Times, which I ask the clerk to read in order that the Senate may know that Australia has done more than America has done in banishing "negroes," as they call them, but "niggers," as we call them in the South.

The PRESIDING OFFICER. The clerk will read.

The legislative clerk read as follows:

[From the Evening Star, Washington, D. C., Friday, May 11, 1928]

ASKS FOR JUSTICE ON RACIAL LINES—PATIENCE WITH YELLOW AND BLACK PEOPLES URGED BY MATSUDAIRA

CLEVELAND, OHIO, May 11.—Pleas for understanding and patience with the yellow race and justice for the black peoples have been added to peace endeavors of the centennial conference of the American Peace Society, which closes to-night.

Tsunee Matsudaira, Japanese ambassador to the United States, opened yesterday's sessions with an airing and justification of Japan's conflict with the Chinese Nationalist troops in Shantung. The program ended with an indictment of white civilization by Dr. Mordecai Johnson, president of Howard University, a negro institution at Washington.

PLEADS FOR PATIENCE

Dr. David Yui, representative of the Chinese to the Washington arms conference, pleaded for patience of the western world while China settles her difficulties. He listened attentively while the Japanese ambassador defended Japan's policy, but made no comment on the Shantung situation.

Doctor Johnson said his race faced the alternative of following Soviet Russia if the white man did not deal justly with the Negro.

JAPANESE AMBASSADOR'S VIEWS

The Japanese ambassador said his country has been forced to protect its nationals in Chinese territory and that his Government would withdraw its troops from Shantung as soon as order was restored.

Doctor Yui explained that China is undergoing a revolution to achieve unification, honest government, elimination of unequal treaties, improvement of the economical and social life, and a higher moral standard of living.

[From the London Times, March 29, 1928]

NEGRO ENTERTAINERS IN AUSTRALIA—CABINET PROHIBITION OF FUTURE ENTRY

(From our own correspondent)

CANBERRA, March 28.—After revelations of the disgraceful conduct of five young women and five American negro vaudeville performers at a flat in Melbourne last Sunday, prompt action has been taken by the home and territories department to return the negroes to the United States by the first ship available, which leaves Sydney on Saturday. In consequence of this incident the cabinet has decided that in future negro entertainers will be prohibited from entering the Commonwealth. This prohibition can be enforced without the passage of fresh legislation.

Negro entertainers have been permitted to enter Australia under contract for terms of from three to six months, but when they have not conformed with the laws of the Commonwealth the home and territories department has had the power to cancel the remainder of the term. A great many negro vaudeville entertainers have been entering Australia during the last few years. Recently the Musicians' Union protested to Mr. Bruce, the Prime Minister, against the entry of an increasing number of negro jazz players.

Mr. BLEASE. Mr. President, I call the Senate's attention to the fact that there is a bill on the calendar to endeavor to make constitutional an appropriation to a negro college. Congress has for several years been making this appropriation, when every Senator on the floor, and those off the floor, too, as far as that is concerned, know that it is unconstitutional. They know they have not the right to take the money of the American taxpayers and give it to a college, it does not make any difference whether it is a white college or what kind of a college it is. They have no right to take the private taxpayer's money and give it to that institution. But what says the president of the institution? That if you do not treat him right the negroes are going to follow the example of Russia. There it is. That is the kind of a leader you are paying a very large salary to, and paying his expenses to go around over this country and make speeches to the Negro race advising them—if you do not give them this money, if you do not treat them as you should treat them—to follow the example of the Russians.

Do you think the white people of this country indorse any such talk as that? Do you think the taxpayers of the American Nation indorse it? I will tell you what brought it about. It was the order issued the other day by Herbert Hoover, this Englishman, this man who, I have been informed, was forced on the Democratic administration by England. They did not want him, but England demanded that this Englishman by adoption be given control of the food in this country during the war, and some of the Republicans now are talking about nominating that man for President of the United States, a man who would commit the crimes that have been charged against him to-day and proven, a man who is in favor of making young white girls use the same water-closets as negro men, making young while girls sit by them day by day. If there was nothing else, Mr. President, a negro would be offensive because of his natural human smell. You can take a negro and take a tub of the hottest water you can get him into, and use all the soap you can use, then take him out and cover him with cologne, and in five minutes he will smell just as offensive as he did before you washed him, because it is human nature, and he could not get rid of the odor. Then this man, who wants to be President of the United States of America, this Englishman, wants to make white girls associate on equal terms with negroes.

Look at Australia. They run them out. This young man at the desk just read in our hearing an article from the London Times stating that a company of negroes went over there, some of them danced with some white girls, and the next day they hurled them out of there. Yet here is a man in the Cabinet, supposed to be white—only in skin; I do not suppose he claims to be otherwise, certainly not in principle—who wants to make our white girls of America associate with the negroes on equal terms.

Mr. President, it is a shame, it is a disgrace, and I am glad that there are some leading Republicans at least who are fighting his nomination, and I will have to see it and to know it positively before I will believe that men at whom I am looking now will ever submit, if they can possibly prevent it, to allowing that man to be the nominee of the Republican Party. I have been told to say nothing about it, to let them nominate him, that he is the easiest man the Democrats could get to defeat. But I do not want the Republican Party to disgrace itself and disgrace the country by nominating any such man, whether we can beat him easily or not.

Mr. President, coming back to the darkey, Mr. Hoover's order is what has led up to all this trouble. Here is the president of this college that you are supporting, paying a big salary to him out of the taxpayers' money, and he is following up that order. He is following the example sent to him by his boss, going around over the country preaching that kind of doctrine. I do not know what you people in the North mean. I know what we mean in the South, and I know how we are going to regulate it. I do not worry about it. I have seen too much of it to worry about it. I know what will happen. If that negro ever comes into South Carolina and makes a speech like that, he will come out—oh, yes; he will come out, and he will never bother us any more after he gets out. But I object to the money of the northern and southern people being taken to pay the expenses of that fellow. I object to you taking money out of the Treasury of the United States to keep up this institution for him to run to put that kind of stuff into the heads of the negroes of the country.

I wish also to offer for the RECORD some telegrams which I have received in reference to a certain feature in the pending bill. These telegrams were sent to me by doctors in my State, men of the highest character and standing. They are in protest against the increased tax on narcotics contemplated in the bill. One of the telegrams is signed by the president of the South Carolina Medical College. Others are signed by other distinguished doctors of my State, who are men, as I have just said, of the highest honor and character.

I will ask, then, that they be printed as an exhibit to my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit A.)

SOUTH CAROLINA

Mr. BLEASE. Mr. President, the other day when I was absent the senior Senator from Maryland [Mr. BRUCE] had a good deal to say about my State. I do not expect to take up the time of the Senate to reply to those statements. South Carolina stands for herself. I understand there was a good deal said about the churches and church people. I just want to read a little article taken from Church Work, published at Anderson, S. C., on Sunday, April 1, 1928:

METHODIST STATISTICS

Methodists of South Carolina gained over 2,000 members and advanced over $300,000 in their regular church contributions last year. They also added greatly to the strength of their educational institutions. In the last two years over $600,000 has been added to the property and endowments of Methodist colleges of South Carolina.

In some detail the figures for the year 1927 will be of general interest, and the facts given are drawn from the recently published annual minutes of the South Carolina and upper South Carolina conferences.

The main statistical items of interest are as follows:

Total membership	139,979
Joined by vows	5,874
Adults baptized	2,762
Infants baptized	2,270
Number of churches	817

Women's missionary societies	459
Members	13,417
Raised	$131,986
Epworth Leagues	426
Members	13,125
Raised	$18,178
Sunday schools	753
Enrolled	106,893
Raised	$215,843
Paid presiding elders	$51,371
Paid pastors	$505,675
Paid district work	$8,742
Paid conference work	$127,432
Paid general church work	$72,170
Total for all purposes	$1,863,848
Value of churches	$7,214,000
Value of parsonages	1,223,326
Value of other property	215,908
Value of schools	2,715,781
Value of orphanage	705,000
Value of printing plant	60,000
Value of district parsonages	157,500
Total	12,284,515

I also wish to read from the same paper, of date May 13, 1928, this being a Methodist paper:

INCREASE IN CHURCH MEMBERSHIP

The total increase in our church membership in the United States for 1927 has been 29,699. The membership in other countries is not included in this reckoning. The conferences with an increase of more than 2,000 are: Florida, 5,280; Alabama, 3,215; north Alabama, 3,253; western North Carolina, 3,185; Mississippi, 2,949; northwest Texas, 2,771; Virginia, 2,209; north Georgia, 2,001; Louisiana, 2,044.

Mr. President, those figures have been tabulated by Mr. Curtis C. Little, and will be published in the forthcoming 1928 year book of which he is the editor. This is copied in this paper from the National Christian Advocate.

It does not seem to me, from reading those figures as to the one church, that the South is in such a bad condition as some people would have us think. If the other churches have received as many new members and if they have expended as large amounts in college work and other Christian church work as this church has, it seems to me that we should be given credit at least with having people who obey the laws, people who love their God, and people who worship Him.

Something was said, I believe, about the stills captured in South Carolina. I do not believe there is any question about that. They capture them in every State. United States officers in Maryland murdered a man recently like they shot this young chap up at Niagara Falls. A United States judge sat on the bench with as plain a case of murder ever proven in a courthouse, and directed a verdict of not guilty and let that man walk out of the courthouse free and untrammeled. I would like to know the State in the Union that has not got whisky in it. One thing that helps bring about the existing condition is the conduct that is going on right here in the city of Washington. The Senate encourages it, the House of Representatives encourages it, Calvin Coolidge is encouraging it, the police department of Washington is encouraging it, thereby encouraging violation of the prohibition law all over the country, and I am going to prove it.

The CONGRESSIONAL RECORD of January 14, 1928, shows that I read about women driving around this city at a speed of upward of 40 miles an hour, which aroused the ire of the very distinguished Senator who now occupies the chair of the Presiding Officer (Mr. WATERMAN in the chair). A little further on I read an article from the Washington Times of January 13 about a 14-year old boy driving over the city and killing a young man. His father, the British Ambassador, took him to New York, put him on a boat, and sent him out of the country. If that had been an American boy he would have been put in jail, but being this Englishman's son, it was deemed almost a compliment to let him run over an American woman.

Then I read another article from the Washington Star entitled "Attack on judiciary features court bill—prisoner refuses to pay fine after conviction on traffic charge." Then another article in which Traffic Director Harland called attention to the case involving the British ambassador's son. Further on in the RECORD of January 14 I read another article referring to the same case. Boys and girls are openly drinking in cafes and clubs in Washington and there is no objection to it whatever.

Mr. President, I am told that at nearly every big reception given in Washington whisky is served on the table or else there is a room set aside somewhere where the guests are invited to drink. They drink liquor at all the embassies. They bring it in from their countries, and what does the American Nation do about it? What do you do about it? When an Englishman or a Jap brings in liquor and it is landed at Baltimore you actually send a United States truck over there with United States soldiers to haul it over here for them. Yet you talk about the South and about a few stills. The people say it is all right to let these embassies drink, that it is all right to let these big people have their receptions and their whisky and wine. But I say it is not all right unless you allow it to other men. When your boys and girls go to these places and see them drinking whisky and wine and see them violating the law, when they see their fathers and mothers doing it, too, they do not think it is wrong in them to do the same thing.

There is another reason why it should not be allowed. It forces men to participate in it who do not want to do it. Some man who keeps up with this business of society is giving a reception. He has been at the other homes and they have served whisky and wine there, so they expect to find it at his home, and he serves it, whether he wants to serve it or not, because society forces him to serve it.

Let us clean off our own doorstep first. Let us clean off the fireplaces in the North and in the East. Let us clean off the fireplaces in the District of Columbia before we go to South Carolina and talk about a few stills found out in the backwoods there. Yes; they tear them up, although I am not so sure that they always do. Sometimes I have an idea that they burn what is supposed to be a still, but, as a matter of fact, they simply move the real still four or five hundred yards farther back in the swamp, take a little money in their left hand and a bottle of liquor in their right hand, and go to town and report "another still destroyed."

Here is an article from the Washington Post of January 20, 1928, headed "Three former soldiers get 37 years in jail." I want you Senators to listen to this. When I read it I wished that I could have been the governor to pardon those poor devils, like I used to do in South Carolina:

THREE FORMER SOLDIERS GET 37 YEARS IN JAIL—WALTER REED MEN SENTENCED FOR THEFT OF COAT, HAT, AND 90 CENTS

Thomas A. Richards, 23; Frank E. McKay, 21; and Kenneth B. Metcalf, 22, former soldiers from Walter Reed Hospital, were sentenced to serve a total of 37 years in prison yesterday by Chief Justice McCoy, in criminal court, on a charge of robbery which involved only 90 cents, an overcoat, and a hat. Richards and McKay will serve 13 years each and Metcalf will serve 11 years. They were charged with holding up Edgar H. Reid, 1215 Geranium Street NW., near his home, on October 20, at midnight, with a pistol and a blackjack. They took his overcoat and hat and then went through his pockets, but found only 90 cents.

Think of it, now. A few years ago we were singing all over the country, "Keep the home fires burning." Everybody stood up and said, "No matter who these young men are, they have on the American uniform. Take them home to dinner with you." They did, and in some cases they were sorry. Eight or nine months afterwards they were still sorrier. Take them home and dine them and entertain them when they were heroes, but when they came back it was a different story. I do not uphold them in stealing, but there is no use putting three poor devils in jail for 37 years for stealing an old, wornout hat, a cheap overcoat, and 90 cents.

Then I read another article into the RECORD on January 14 last. This relates to an incident that happened on October 28 of last year:

POLICEMAN ACCUSES ITALIAN CHARGÉ OF RECKLESS DRIVING

The commissioners yesterday filed with the Secretary of State a complaint against Alberto Marchetti, counselor to the Italian embassy and acting chargé d'affaires in the absence of Ambassador Nibole Giacomo de Martino, inclosing a report by Motorcycle Policeman R. N. White, of the thirteenth precinct, charging the diplomat with speeding at 60 miles an hour or more and reckless driving at 1.30 a. m. Sunday.

Patrolman White, in his official report, said:

"About 1.30 a. m. October 23, 1927, while standing on Georgia Avenue, opposite Walter Reed Hospital, my attention was attracted to an auto coming south on Georgia Avenue NW. at a very fast rate of speed. There had just been an accident at this point, and about 20 people had gathered in the street. When I heard this machine coming at such a rate of speed I stepped into the roadway and tried to stop it by waving my hands, but the operator paid no attention to me and passed through the crowd at what I judge to be 60 miles an hour or faster.

"I jumped on my motor and gave chase for 11 blocks and caught up within one block of this car, when it slowed down to turn into Colorado Avenue. I paced this car from this point at 50 miles an hour and could not gain on it for three blocks. I then moved up on it and stopped it between Kennedy Street and Sixteenth Street. I asked the driver for his permit, which he showed me, as well as an identification card from the State Department, showing he was Alberto Marchetti,

from the Italian embassy. He was driving a roadster bearing a District of Columbia license tag.

"Apparently this man had been drinking, and, in my opinion, was a reckless driver and a menace to the public safety."

Marchetti yesterday admitted that he had been driving fast, but said, in extenuation, that it was late at night and the streets were deserted. He said Parolman White had told him he was going 45 miles an hour instead of 60 or more.

Nothing was done with him; he was turned loose, Mr. President. Why? Because he was an Italian. If he had been an American boy they would have done to him as they did to a Senator's son the other day, whom they arrested for reckless driving. They did not spare him because his father sat here in the Senate. There is not a Senator in this country who is entitled to as much consideration as a nasty, stinking, dirty little Italian automobile driver. They dragged the Senator's son into court; they humiliated his father; they humiliated his mother; they humiliated his family by fining him so much money or telling him they would put him in jail. That is the reason people are losing respect for law; that is the reason people of the country, the common people, who, God knows, are the best people, have so little respect for and are paying so little attention to the law.

I repeat, the boy to whom I have referred was dragged into court and fined or threatened with jail, but the automobile chauffeur, because he happens to be attached to an embassy, can fill up on mean liquor, get drunk, and dash out into the street to kill anybody he wants to, and that is all right. That is not in the South, either; that is north of the Potomac River, right here in Washington.

I repeat, clean up Washington before you talk about South Carolina; when you get Washington cleaned up, we will have our State also cleaned up. Not only should the "blind tigers" in this city be cleaned up but there should be cleaned up some other things that I might mention, which are a stench in the nostrils of every decent white woman in the country.

Mr. President, I have some other instances here, but I shall not take the time of the Senate to cite them. These few examples are enough. I kept these because I thought that possibly the day would come when somebody would have something to say in reference to conditions elsewhere than in this very city, the Capital of the United States, in the shadow of the dome of this Capitol and in the shadow of the White House of this Nation, where men are sworn to enforce the law and to obey it. Does not Calvin Coolidge know that this is going on? Of course, he knows it. Does not the police force of this city know it? Every man in the city of Washington knows it. Who is trying to stop it? Not a soul.

As I said here the other day, a short time ago a negro committed a most horrible and beastly crime here. Has he been captured? No. If he had been in the South would he have been captured? He would have been; and that is not all that would have happened to him either. We protect our white women and we are going to continue to protect them; we are going to keep them from being injured and harmed, if we can, and when a man does injure or harm one of them he is going to pay the penalty. It is not so, however, in this city; it is not so in some of the other places that I know of. I do not expect to call names, though I could.

I could paint the crime situation in Chicago, for instance; I could paint the crime situation in New York; I could paint the crime situation in some of the other great cities of this country, but I do not care to do it. The fact that crimes are committed in other places does not justify people in my State committing them, but a mere reference to conditions elsewhere certainly ought to be sufficient to keep Senators on this floor from attacking the State from which I come when we can show records such as I have read this morning.

Some South Carolinians drink liquor; you do not have to go all the way to South Carolina to find some South Carolinians who take a drink, but at the same time, I suppose, as I said a few moments ago, while we have stills we are no worse than other people. Why hold us up to public attention?

I will tell you what to do, Mr. President. Tell the official at the head of the Prohibition Department that instead of sending thugs and thieves and bribe takers into South Carolina to enforce the law to send honest people, men who will not take bribes from "blind tigers."

A man told me at home the other day, when I said, "It is a wonder that they had not got you before now, boy," "I got the law bought." He told me that on Friday last, right on the streets of Columbia. I said, "How have you got the law bought?" And he named the man that he was paying the money to. He said he had immunity. That is the kind of officers that have been sent down there in my section of the country to enforce the law. They seize a man's automobile, take the best parts of it off, and put them on their automobile, take the old, worn-out car into town, and sell it; they seize his liquor, take it to their rooms, and sell it instead of turning it in as they ought to do.

They always find somebody to buy it, because what they seize in that way is pretty good liquor, coming from Florida or going down from Baltimore, as a good deal of it does go. Yet, South Carolina gets "cussed" for drinking Baltimore liquor. These are some of the things we should correct. Let us get the mote out of our own eyes before we begin to call attention to the mote in the other fellow's eyes.

South Carolinians were here and fighting for America long before some other States were known to be on earth and South Carolina is 100 per cent American.

EXHIBIT A

CHARLESTON, S. C., *May 18, 1928.*

Senator COLEMAN L. BLEASE,

United States Senate, Washington, D. C.:

The Medical Society of South Carolina, Charleston County, in a resolution passed at its regular meeting on May 8, wishes to protest against the increase in the narcotic tax which is contemplated by a bill now before the Senate. We have been instructed by the society to request that you use your influence to prevent its passage. The members of this society feel that it is unfair to require the medical profession to pay for the enforcement of a law which is purported to be for the common good. We desire to urge that you vigorously protest against the passage of this bill.

HENRY P. JACKSON, *President.*
WILLIAM ATMAR SMITH, Secretary.

CHARLESTON, S. C., *May 18, 1928.*

Senator COLEMAN L. BLEASE,

United States Senate, Washington, D. C.:

As members of the Medical Society of South Carolina, we ask that you prevent, if possible, the passage of bill to increase narcotic tax on physicians. It is unfair and discriminating and should not be passed.

A. J. BUIST, M. D.
EDWARD RUTHLEDGE, M. D.

CHARLESTON, S. C., *May 18, 1928.*

Senator COLEMAN L. BLEASE,

United States Senate, Washington, D. C.:

We, the undersigned members of the Medical Society of South Carolina, desire to call your attention to the bill now before the Senate by which it is proposed to increase the narcotic tax. We feel that it is an unfair discrimination, especially when a reduction in general taxation has been made in all other departments. You are urged to lend your best efforts in the prevention of the passage of this bill.

ROBERT WILSON, M. D.
R. W. CATHCART, M. D.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the bill (S. 3867) to provide for the extension of the time of certain mining leases of the coal and asphalt deposits in the segregated mineral land of the Choctaw and Chickasaw Nations, and to permit an extension of time to the purchasers of the coal and asphalt deposits within the segregated mineral lands of the said nations to complete payments of the purchase price, and for other purposes.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 6518) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services"; requested a conference with the Senate on the disagreeing votes of the two thereon; and that Mr. LEHLBACH, Mr. GIBSON, Mr. MANLOVE, Mr. JEFFERS, and Mr. CELLER were appointed managers on the part of the House at the conference.

SALARIES IN THE CIVIL SERVICE

The PRESIDING OFFICER (Mr. WATERMAN in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 6518) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services," and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. DALE. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and

that the conferees on the part of the Senate be appointed by the Chair.

The motion was agreed to; and the Presiding Officer appointed Mr. DALE, Mr. BROOKHART, Mr. BLAINE, Mr. MCKELLAR, and Mr. GEORGE conferees on the part of the Senate.

HON. HERBERT HOOVER

Mr. NORBECK. Mr. President, I ask unanimous consent to insert in the RECORD an editorial entitled "Facts voters should know," from Wallaces' Farmer of May 18.

The Senator from Kentucky [Mr. SACKETT] recently delivered a labored argument to this body in an attempt to show reasons why the farmers of the Corn Belt ought to feel grateful to Mr. Hoover for what his Food Administration did to them in connection with the marketing of their hogs during the war. Scarcely a day passes, however, that does not bring to light every evidence that the Corn Belt farmers do not take the same view of Mr. Hoover's war record on agriculture as given by the Senator from Kentucky, nor do they accept the ingenious excuses which Mr. Hoover's propaganda factory is so busily engaged in turning out for him. One of the recent and most effective exposures of the falsity of this Hoover propaganda appears in the May 18 issue of Wallaces' Farmer, published in the heart of the Corn Belt, at Des Moines, Iowa.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Wallaces' Farmer, May 18, 1928]

FACTS VOTERS SHOULD KNOW

The work of the Food Administration during the war is worth recalling as an example of the course that Federal action takes in regard to the farm when the policies are laid down by people who are primarily interested in cheap food for the industrial population. This is especially worth recalling now, when the country is about to decide again what sort of men and what kind of politics it wants for the coming four years.

To speak bluntly, the Federal Government lived up to its contracts with the manufacturers during the war and fell down in its contracts with the farmers. The attitude of those responsible is particularly revealed in their astonishment that farmers should expect anything better than a deal like this.

This point of view can be defended by advocates of an increasing industrialization of the country on the ground that the important thing is to get cheap food, and that the welfare of the farmer is always to be made a secondary consideration. This is understandable and honest, even though it may be shortsighted. It is much more aggravating to farmers when this straightforward plan of argument is not taken and when the attempt is made to indicate that the breaking of the war contracts with the farmer and the holding down of food prices was in some way a step taken for the benefit of agriculture. Of course, farmers still have some votes, and if they can be soothed into forgetfulness of their grievances every four years the job of soothing them expertly is bound to pay fairly high dividends in the political field.

The present campaign to perform this quadrennial job is being undertaken by a number of people. One of the most recent is Senator SACKETT, of Kentucky, who explained the other day in the Senate just how the Food Administration and Mr. Hoover had helped the hog farmer during the war. Among other things, Senator SACKETT said:

"In October, 1918, the approaching armistice caused a rapid fall in the price of corn, and as a result the price of hogs to the farmer under the formula adopted threatened to fall below a just amount. The advisory board immediately recommended that the minimum should be raised to $17.50, more than 120 per cent above pre-war prices, and Mr. Hoover again negotiated this protection."

So far as this statement goes, there is no question about one point. Hog prices did hit the toboggan in October of 1918. The Hoover apologist insists that this happened because the people knew that the war was about over and were reducing purchases on that account. The farm groups have a different theory.

In considering the Hoover position, it might be well to ask how many people in the world in early October of 1918, when hogs were dropping from $19.50 to $15.85, thought that the war was speedily approaching its close. At that time we were still sending troops overseas as fast as we could ship them. The military opinion was that the Germans were being forced back to a new line, and that the big finishing campaign would come in the summer of 1919.

It might also be noted that the prevailing opinion at the time was that when the war did end the needs of the people in the war area and the disintegration of agriculture there would make necessary continued economies in the use of food and continued efforts by farmers to turn out large crops.

That there was no general expectation of a speedy close to the war is perhaps best illustrated by the action of Congress, which, in late September, put through an emergency agricultural appropriation act for stimulating agricultural production, and at the end tacked onto it a rider providing for national war-time prohibition from July 1, 1919, until the peace treaty should be signed. The opinion of Congress quite evidently was that the war had yet a year or two to go, and that it was necessary to use every effort to keep up the supplies of food for the United States and the allied nations. This pretty well disposes of the argument that it was the approach of the armistice that brought about the slump in hog prices in October. Yet the slump occurred. What other factor was present that might have caused the drop?

During the late summer there had been rumors that the Food Administration was not going to stand by its promise of a 13 to 1 ratio for hogs. In the late summer of 1918 Herbert Hoover was abroad, and in August the British food administration reduced its maximum price on American bacon by $12 a hundred. On September 25 a meeting of Food Administration officials was held, and a statement was issued which clearly indicated that the basis agreed upon the winter before was to be abandoned and the farmers who had increased their pork production on the strength of the Government guaranty were to be left out in the cold.

It took a few days for this news to get out to the country. As soon as it did get to the farmers hogs began to be sent to market in increasing numbers. Without Government backing for a higher price buyers began to bid down and the slump noted above occurred. In the meantime the various farm organizations were holding indignation meetings, and as a result of this pressure another meeting was held by the Food Administration, in which Mr. Hoover, while refusing to stand by the original contract, did agree that there would be a minimum of $17.50 established. This was considerably less than had been promised the farmer, but it was also somewhat more than appeared to be likely in case the Food Administration stuck to the program indicated by the statement made at the meeting on September 25.

In this, as in all similar affairs during the career of the Food Administration, the original program was based on the desire of Hoover and his associates to get cheap food for the industrial population, and this program was modified so as to show any degree of justice to the farmer only after considerable pressure had been brought to bear by farm organizations. In the fall of 1917, when the Government was calling for increased pork production, the Food Administration only very reluctantly agreed to the 13 to 1 ratio. After the hogs were produced and on the market an attempt was made to crawl out of the agreement. Increasing pressure by farm organizations resulted in a compromise which gave the farmers less than they were promised but somewhat more than the Food Administration seemed inclined to give them.

One somewhat amusing argument in this connection is the attempt to show that the price of hogs under Food Administration control was markedly higher than when that control was removed. These arguments echo a 1920 statement of Mr. Hoover, which said: "It can also be noted that the average price of hogs for the year October 1, 1918, to October 1, 1919, was very close to $19 a hundred, and it represents the full ratio in all the prominent corn and hog States. The farmer realized fully $2.50 per hundred more than he has realized this season (1920) in an unassured market."

In commenting on this statement at the time it was made Henry C. Wallace said: "This is typically Hooveresque. The impression is given that he controlled the market from October 1, 1918, to October 1, 1919, and therefore made good his promise, notwithstanding all the criticism which had been made. What are the facts?

"Mr. Hoover did not control the market during 1919. His control ended about March 1, 1919. From October 1, 1918, to March 1, 1919, while Mr. Hoover was controlling the market, the average price of hogs at Chicago was $17.64 per hundred. From March 1, 1919, to September, 1919, when Mr. Hoover had no control over the market, the average price of hogs was $19.27 per hundred; and yet Mr. Hoover calmly claims credit for these higher prices which followed immediately after his control ceased."

The point of the whole discussion is that the Federal administration and the folks in charge of food control did not feel the same responsibility in regard to giving farmers a fair deal that they did in regard to giving a fair deal to the manufacturers of other products essential for war purposes. That attitude may be defended on the ground that the job in hand was to win the war and that any injustice performed in the process was a minor matter. It can also be defended on the ground that the chief end of Government policy should be to provide cheap food, regardless of what happens to agriculture. Perhaps still stronger as a motive was the feeling on the part of the Food Administration that while manufacturers would not turn out goods for the carrying on of the war until they had a legally enforceable contract in their pockets, farmers would be willing to produce to the limit with only a few words of encouragement and promises which could be repudiated without bringing on suits for breach of contract.

These are views which will not find much sympathy in farm territory, but they may have an appeal in other quarters. To the farmer the irritating thing about the present situation is that the Food Administration people, after having got credit for holding down prices and getting cheap food, are now attempting to curry favor on the other side of the fence by asserting that the sole aim of the Food Administration was to protect the farmer and keep farm prices high. There must be something wrong with one story or the other.

Facts are facts, and when the voters of the country know the real truth of the story they are not likely to be enthusiastic about casting

ballots for Mr. Hoover. The spirit of fair play is still abroad in the land. No one who fairly analyzes the facts of the dealings of the Food Administration with the farmer during the war can come to any other conclusion than that the farmer has a right to feel that he was unjustly dealt with.

TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

The PRESIDING OFFICER (Mr. McNARY in the chair). The question is on the amendment of the Senator from Missouri [Mr. REED].

Mr. ASHURST. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	McLean	Schall
Barkley	Fletcher	McMaster	Sheppard
Bayard	George	McNary	Shipstead
Bingham	Gerry	Mayfield	Shortridge
Black	Gillett	Metcalf	Simmons
Blaine	Glass	Moses	Smith
Blease	Goff	Neely	Smoot
Borah	Greene	Norbeck	Steck
Brookhart	Hale	Norris	Stephens
Broussard	Harris	Nye	Swanson
Bruce	Harrison	Oddie	Thomas
Capper	Hawes	Overman	Tydings
Caraway	Hayden	Phipps	Tyson
Couzens	Howell	Pine	Vandenberg
Curtis	Johnson	Pittman	Wagner
Cutting	Kendrick	Ransdell	Walsh, Mass.
Dale	Keyes	Reed, Mo.	Walsh, Mont.
Deneen	King	Reed, Pa.	Warren
Dill	La Follette	Robinson, Ark.	Waterman
Edge	Locher	Robinson, Ind.	Watson
Edwards	McKellar	Sackett	Wheeler

The PRESIDING OFFICER. Eighty-four Senators have answered to their names. There is a quorum present. The question is on the amendment proposed by the Senator from Missouri [Mr. REED].

Mr. SIMMONS. Mr. President, I do not rise for the purpose of discussing the amendment offered by the Senator from Missouri. Undoubtedly much can be said for it, and, perhaps, much can be said against it. The minority members of the Finance Committee were and are exceedingly anxious that there should be a tax reduction bill passed and approved by the President at this session of Congress, and, having that as their main objective, it was the understanding reached on the part of the minority members of the committee at the time the bill was reported out of the committee that we would oppose riders upon this bill, especially riders relating to the tariff, because we believed that if the bill were loaded down with such riders it would almost certainly incur a veto at the White House.

A second meeting of the minority members of that committee was assembled rather hurriedly, I think Saturday morning, or it may have been Friday evening—I do not now definitely remember which—and we discussed this matter, and again decided that if we were to have tax reduction at this session it would be necessary not to load down the bill with riders, especially such as we knew would meet the disapproval of the President. We did not feel, and do not feel now, that the President is particularly anxious to sign a tax reduction bill. The attitude of the administration has not seemed to us to be favorable to legislation of that character at this session; and we did not wish, and do not now wish, to give the administration any excuse for denying the people what they are entitled to with reference to the return of money that has been collected from them by taxation in excess of the requirements of the Government.

I wished to make this statement because I think the Senate is entitled to have it; and I do not make it in opposition to the Senator's amendment, because I think his amendment is a very important one. I think it is one that ought to have very serious consideration—much more serious than can be given to it under present circumstances and conditions. If the Senator shall offer it subsequently with a view to attaching it to some tariff legislation that may be sent to us from the House when we have time to consider it, I for one shall be disposed to give it very thorough and conscientious study.

Mr. REED of Missouri. Mr. President, in order to clarify the amendment, I will take the liberty of perfecting it.

The PRESIDING OFFICER. The Senator has that right.

Mr. REED of Missouri. On page 2, in line 1, after the word "farms"—it was not in the copy that was read—insert "within the United States."

On page 2, lines 9 and 10, strike out the words "paid to the farmer" and insert "received by the producer during the preceding six months."

On page 2, line 17, after "duties," insert a comma and the words "except duties on agricultural commodities as herein defined."

The PRESIDING OFFICER. The amendment will be modified as requested by the Senator.

Mr. REED of Missouri. The modifications merely clarify the purpose of the proposition.

The amendment of Mr. REED of Missouri, as modified, reads as follows:

On page 245, after line 13, insert:

"TITLE VI—AGRICULTURAL EXPORT DEBENTURES

"SEC. 801. EXPORT DEBENTURES.

"(a) Agricultural commodity: The term 'Agricultural commodity,' as used in this section, includes all agricultural, horticultural, viticultural, and dairy commodities and products, all livestock and products thereof, all products of poultry and bee raising, all nuts and edible products of forestry, and all other commodities not specifically mentioned herein which are produced on farms within the United States and the processed or manufactured products of such commodities.

"(b) On and after the 1st day of July next after the approval of this act the Secretary of Agriculture shall issue an export debenture to any person exporting from the United States to any foreign country and not previously exported an agricultural commodity in either the original or processed condition in an amount equal to 25 per cent of the average price of such product received by the producer during the preceding six months as ascertained or estimated and certified by the Secretary of Agriculture under such regulations as the Secretary of Agriculture may prescribe: *Provided*, That the total quantity of such exportation so valued shall amount to $3,000 or more and be exported in one vessel.

"(c) Said debentures shall be transferable by delivery and the Secretary of the Treasury shall receive such debentures at their face value in payment of all import duties, except duties on agricultural commodities as herein defined.

"SEC. 802. ADMINISTRATIVE AND PENALTY PROVISIONS.

"(a) Preparation of debentures: The Secretary of Agriculture shall prepare and issue, or cause to be prepared and issued, all export debentures, and shall prescribe the terms and conditions in respect of export debentures. The Secretary is authorized to have such debentures prepared in the Bureau of Engraving and Printing.

"(b) Obligations of United States for penal purposes: Export debentures issued under the authority of this title shall be obligations of the United States within the definition in section 147 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, as amended.

"(c) Fraud: Any person who shall make any false statement for the purpose of fraudulently procuring, or shall attempt in any manner fraudulently to procure, the issuance or acceptance of any export debenture, whether for the benefit of such person or of any other person, shall be fined not more than $2,000, or imprisoned not more than one year, or both.

"SEC. 803. APPROPRIATION.

"For expenses in the administration of the functions vested in the Secretary of the Treasury by this title there is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $200,000 to be available for such expenses incurred prior to July 1, 1929."

Mr. BORAH. Mr. President, there may be a valid objection to this amendment on the ground that it would embarrass the tax bill; but that does not disburb one who is not particularly anxious about the tax bill. I have not from the beginning been particularly interested in tax reduction, and am not now.

I am going to vote for this amendment because I do not want to vote against the principle. I believe that there is much in the debenture proposition in the interest of agriculture. I vote for it with some degree of hesitancy, however, because it seems to me that the amendment is not ample and sufficient to deal with the subject in its entirety. In other words, it is a matter of such moment and there are so many different phases of it to meet in the way of legislation that it is rather difficult to meet it by an amendment; but as I look at the amendment it indorses the principle which I favor, and I shall vote for it.

Mr. NORRIS. Mr. President, I desire to occupy the attention of the Senate for only a few minutes in discussing the pending amendment.

There is now in the hands of the President the so-called McNary-Haugen bill, having for its chief object the same thing that would be accomplished by the adoption of this amendment if it should work. I have for some time given attention to the principle involved in this amendment. The Committee on Agriculture and Forestry at the time I was its chairman had a hearing on a bill that was introduced in which this principle was involved, known as the debenture plan. Later on a great farm organization, the National Grange, approved this plan. At the beginning of this session of Congress the representatives of the

grange discussed the debenture plan, I presume, with nearly all of the Senators; at least, I have discussed it with them at considerable length and have examined quite a number of the bills that have been introduced to carry it out.

I doubted at the beginning of this session the wisdom of again passing the McNary-Haugen bill and submitting it to the same man who had once vetoed it. I think I started in with the consideration of the debenture plan being opposed to it; but after the failure that we have had, not only from vetoes but in other respects, in the various bills that we have tried for the last six or seven years to pass and enact into law for the benefit of agriculture I reached the conclusion that I was justified and Congress would be justified in taking quite a number of chances in passing any legislation that would have any show of bringing about such relief.

I listened to-day to the Senator from Missouri [Mr. REED] when he described the condition of the farmers of the United States who must buy on a market with a protective wall around it and sell in the free-trade market of the world. I agree with that. I think it is conceded by practically all those both in and out of Congress who have studied the agricultural situation that the farmer is entitled to some remedy. Up to this time he has not been able to get it, first by the failure in either the Senate or the House of what was believed by some to be a remedy; and, second, by the veto of the bill when it was finally passed through both Houses. So I reached the conclusion shortly after the beginning of the session that I was going to support and would be justified in supporting the debenture plan.

Most of those, however, who were anxious to bring about relief for the farmer decided that they wanted to try the McNary-Haugen bill again; and, as far as I was concerned—I think I was in a minority—I had favored that bill before and, of course, put nothing in the way of its passage again, and supported it again.

That bill is now before the President. I do not know what its fate is going to be; but it does seem to me that those of us who have supported the McNary-Haugen bill would be inconsistent if we voted for this amendment while that bill is still pending. That is the main reason why I am going to vote against this amendment. It does seem to me that it ought to have a little more consideration than it can have in the form of an amendment, although I have reached the conclusion that if those who are opposed to remedial legislation for the farmer continue to obstruct and continue to defeat farm legislation that has been enacted on the theory of giving the farmer the benefit of the protective tariff the farmers of America will be justified in tearing down the citadel of the protective tariff. Either the farmer must be given the benefit of protective laws, or those who get the benefit of them to the disadvantage of the farmer must surrender the advantage that they have. Much as I should dislike it, I believe we would be justified in passing some bill involving the same principle that is involved in this amendment; and, as far as I am concerned, I feel disposed to do what little I can to bring that about.

I do not, however, believe that we are consistent if we are doing both of them at once. Whether it was a mistake to start in with the McNary-Haugen bill again after the President had once vetoed it or whether it was not a mistake, that was done, anyway. It was not according to my advice that it was done, because I thought we had fair reason to presume that the President would again veto it; and I realized that the McNary-Haugen bill had two sides to it. I have never been one of those who have criticized those who are opposed to it; but I realized also that there were a good many things about it that were difficult, somewhat experimental, and that the machinery provided for carrying out that scheme was more or less complex and must be complex. I have never agreed, however, with those who said they would support the McNary-Haugen bill if we took out the equalization fee.

In my judgment, when we take the equalization fee out of the plan known as the McNary-Haugen plan we have taken out its life. There is not anything left of it; and without the equalization fee it must be a failure. It can not even start. The theory may be all wrong. I have supported it, however, and as far as I know I have supported practically every proposition in support of American agriculture. About some of them I had some doubts. There are some things about the McNary-Haugen bill, with its complex machinery, that we may have to modify when it is put to practical application. It may not work.

For instance, I doubt whether it can be worked on some prepared products like meat. I do think it will work as to wheat and corn and such products as that, and that it can be made to work.

I myself would not like to have the Government start in on the debenture arrangement. Yet I may be wrong about it. It is a simple way to handle the matter, and I do not believe there is any doubt about its effect on farm prices. But I believe the President of the United States, who is a very high protectionist, and others here and elsewhere who are very high protectionists, much higher than I am, ought to remember that we can not permanently go on with a high protective tariff that protects everybody but the farmer, and I believe that the farmer, as a matter of self-defense, if for no other reason, as a matter of common justice, when he is defeated in efforts he makes to get relief from a protective tariff, will be justified in seeing that nobody else gets the benefit of it, and that we are all put on the same level.

I intended to say only that I am going to vote against this amendment, not alone because I am opposed to it, but because of the conditions that exist now, and under which we must necessarily act.

Mr. BROOKHART. Mr. President, I desire to say a few words upon this amendment, and to point out some reasons why I do not reach the same conclusion the Senator from Nebraska has reached. I do not think it would be inconsistent with our position on the McNary-Haugen bill to vote for this amendment, and I do not think it will put the President in an inconsistent position, whatever may be his action upon that bill. The President can sign the McNary-Haugen bill, or at least can permit it to become a law without his signature, without changing in any degree from the position he has taken heretofore. He has said the equalization fee is unconstitutional. The Congress has twice said it is constitutional. That has raised a plain conflict of opinion between the legislative and the executive departments. Neither the Congress nor the President has the power finally to determine that question.

The only tribunal in this country that can finally settle that argument is the Supreme Court of the United States. Therefore the President can say, if he so elects, consistent with the theory he has followed heretofore, that he will let this bill become a law, and let the only tribunal having jurisdiction finally decide that question. If the President is sustained and the equalization fee rejected by the court, the remainder of the bill is what the President has been asking for substantially. If his opinion is sustained by the court, he will have succeeded in getting a bill almost exactly as he wanted it, although I have understood he might have signed a bill carrying a larger appropriation for loans than $400,000,000. I do not know whether that is true or not.

If the equalization fee is sustained, then the responsibility for it is upon the farmers and upon the Congress who have provided it. So upon the theory that the President may sign the McNary-Haugen bill, or may permit it to become a law, it would not be inconsistent to pass this amendment up to him, or for him to veto it. If this amendment of the Senator from Missouri shall be adopted, it will take something like $300,000,000 of the tariff revenues to carry it out. Three hundred million dollars is the tariff reduction the Democratic side has been asking all along. They would get it here, then, for the benefit of the farmers. If the McNary-Haugen bill is signed, it will take all that and a little more to carry out the provisions of that bill. So the President would be in a position to veto this tax bill if this amendment were on it providing he decided to sign the McNary-Haugen bill. If he decided to veto the McNary-Haugen bill, I think, then, it is very proper that the next and what I believe myself is the better remedy should also be put up to him for his consideration at this session.

What are the provisions of this measure? Agricultural products in the United States since 1920 have amounted to about $12,000,000,000 annually; that is, what the farmers have produced, all that they have used, and all that they have sold since 1920. One-tenth of that is exported, or about $1,200,000,000. Hence this amendment would mean about $300,000,000 of debentures issued upon those exports, and, of course, they would then be used in the payment of the tariff revenue. That would take this $300,000,000, and I think it would have the effect, as the Senator from Nebraska [Mr. NORRIS] has said, of raising the prices of all agricultural production by that 25 per cent. It would add, then, $4,000,000,000 to the value of that $12,000,000,000 which they are producing, and that would mean an immediate relief. It would come directly out of the tariff itself. Four billion dollars added, while it is not enough, would be something near the prosperity line for agriculture, which is enjoyed by the average of the other industries of the United States.

Therefore, Mr. President, for these reasons I think it is perfectly consistent for anyone who voted for the McNary-Haugen bill to vote for this amendment. If we had more time, I would

be perfectly willing to wait and see what the result is as to the veto of the McNary-Haugen bill, but everybody is urging an adjournment, and there is no time for such consideration. Therefore I am ready at this time to vote for the amendment.

Mr. BRUCE. Mr. President, I can not see that, so far as practical consequences are concerned, there is any difference between the working principle of the pending amendment and that of the McNary-Haugen bill. As I see it, the purpose of both measures is to create abundance, so to speak, by first creating scarcity. As a rule, the object of all economic enterprises and arrangements, as we all know, is to foster abundance; that is to say, to produce in a larger measure for the benefit of the human race valuable goods and commodities of one sort or another; but both this amendment and the McNary-Haugen bill, so far as I have any insight into them, propose as their modus operandi to inflate domestic prices of agricultural commodities by first creating domestic scarcity.

Under the provisions of the McNary-Haugen bill the board created by that bill has a large revolving fund at its command, and it takes that fund and goes out into the market and buys up enough wheat, or enough corn, or enough pork, or enough of any other agricultural commodity artificially to swell the domestic price that consumers of every sort, including the farmer himself, pay for the commodity in question. I can not see how the Senator from Missouri, after refusing to give his approval to the McNary-Haugen bill, can possibly give his approval to this amendment. He reminds me of the giant mentioned by Rabelais, who, as I remember, swallowed without difficulty several windmills, and then was choked to death by a piece of butter.

The object of this amendment is to stimulate exportation by a bounty to such an extent as to create the same domestic scarcity as respects a commodity that the McNary-Haugen bill seeks to create by having a Federal board purchase large quantities of a commodity for export.

Mr. REED of Missouri. Mr. President, will the Senator yield?

Mr. BRUCE. I yield.

Mr. REED of Missouri. I think the Senator will agree with me that the effect of the present tariff law is to raise prices of all articles covered by the tariff. That condition now confronts us in this country. I suppose the Senator will agree with me that that is the effect?

Mr. BRUCE. Yes.

Mr. REED of Missouri. I will agree with the Senator that the right remedy, if we could apply it, would be a general reduction of the tariff. I think the Senator will agree with me in that.

Mr. BRUCE. I agree; so far as existing duties are exorbitant.

Mr. REED of Missouri. Because the present tariff stimulates prices upon a part of the goods consumed by the American people. I will agree with the Senator that there would be a tendency in the proposition I have introduced to raise prices upon the goods we ship abroad.

Mr. BRUCE. Not only those we ship abroad, if I may say so to the Senator, but those that remain at home. That is the point.

Mr. REED of Missouri. I was about to say that; it would have a tendency to stimulate the prices at home.

Mr. BRUCE. Yes.

Mr. REED of Missouri. So long as we have a law which we can not get rid of—the Senator and I can not get rid of it by ourselves—which raises the prices of the things which the farmer and everybody else has to buy, and we now bring forward a proposal which gives some opportunity to escape the burdens of that law by that class of people who are the exporters, why is that not a step to afford relief, even though it be not the particular method we would like to have employed?

Mr. BRUCE. What I was pointing out—indeed, I was intending to confine myself to that—was the way in which this amendment would work. It resolves itself into nothing but an export bounty.

Mr. REED of Missouri. I do not think so. It relieves from the burdens of a law a class of people who now export; that is all. It gives them a chance to buy in the market where they sell. That privilege may not be extended to others. The justification of it is that the benefits of this will flow to those people who are forced to depend upon European prices for the value of all they produce. It is not a bounty; it is a relief from a burden, an artificial burden put on by law, not a burden which exists in nature.

Mr. BRUCE. After all, of course, only a comparatively small part of our agricultural produce is exported.

Mr. REED of Missouri. And this will affect the domestic price; I concede that.

Mr. BRUCE. Of course, it will. The Senator is bound to concede it. The inevitable effect of the amendment would be enormously to stimulate the export of farm products and to create domestic scarcity and especially, of course, to increase or inflate the prices of domestic commodities.

Mr. REED of Missouri. If we stimulate the price at the present time of the goods made in this country by machinery and by hand in mills, why should we not stimulate the price of other products?

Mr. BRUCE. As I understood it, the Senator wanted to get rid of that feature of our economic life. The very thing he has been inveighing against has been the excessive tariff duties exacted by the manufacturer.

Mr. REED of Missouri. Will the Senator pardon a further interruption? I assure him I am not trying to be nagging about this at all, as the Senator knows.

Mr. BRUCE. I understand. I yield.

Mr. REED of Missouri. If we can not do that, but if we can equalize the produce or remove a part of the onerous conditions by allowing the exporter of the farm products to reach a price level approximately like that exacted under the existing law, why is not that just? If we permit the original law to be unjust, if it continues to exist, why is it not just to equalize the burden? I did not say it, but my objection to the McNary-Haugen bill was the equalization fee, which I believe to be unconstitutional.

Mr. BRUCE. I think that the equalization fee provided by the McNary-Haugen bill is absolutely unconstitutional. I have never heard any lawyer in the Senate express any other opinion so far as I recall at this moment. No; I am mistaken. I do know of several Members of the Senate of good professional standing who have expressed the opposite opinion, but certainly some of the most conspicuously able lawyers in the Senate have differed with them. The Senator from Idaho [Mr. BORAH] is one. The former Senator from Wisconsin, Mr. Lenroot, who was here a short time ago, is another. The Senator from Montana [Mr. WALSH] is another, and the distinguished Senator from Missouri [Mr. REED] is another.

Mr. REED of Missouri. I say it is unconstitutional.

Mr. BRUCE. Of course, the Senator says that, and so did these other very able lawyers to whom I have referred. But, after all, now that I am attempting to explode fallacies, I think that a fallacy of the most pronounced description underlies the whole equalization idea. The impression seems to be that it is something that will come out of the pocket of the farmer; something which would cause the farmer to make a pecuniary sacrifice. There is nothing whatever in that suggestion. If the McNary-Haugen bill worked, it would operate a sufficient degree of inflation not only to cover the reasonable price that the farmer might be supposed to be entitled to, but to cover the equalization fee besides.

Mr. REED of Missouri. Yes; if it worked.

Mr. BRUCE. But I do not think it would work. Nor do I think the amendment which the Senator from Missouri is proposing would work when it comes to that, and it seems to me we might as well dismiss from our thought altogether the idea that the equalization fee would impose any burden of any kind on the farmer. If it did, then it would be plainly unconstitutional, in my judgment.

I think the only result of the amendment offered by the Senator from Missouri and the only result of the McNary-Haugen bill would be to make life harder for everybody in this country, the farmer included. The farmer himself has to buy farm products of all sorts on a tremendous scale. The dairy interest in the country, for instance, which is about the only farm interest that is truly profitable, has to buy cereals and feedstuffs of all sorts. If the effect of the McNary-Haugen bill or the Senator's amendment were to increase the prices for cereals and foodstuffs, the man who would suffer the greatest loss would be the dairy farmers.

Mr. REED of Missouri. Then the Senator's idea is that the cheaper farmer products are, the better it is for the farmer, and that every rise in farm products that might occur would be to his detriment.

Mr. BRUCE. Not at all, but I do not think that in the long run anyone, farmer or otherwise, is benefited by any legislative device of any kind that rests upon a purely artificial basis; that is to say, upon a basis that is created by human ingenuity rather than by the great economic laws, which after all control the economic world.

Mr. REED of Missouri. If the Senator will pardon me further, the economic law, if permitted to work, would mean that every farmer in the United States could sell wherever he chose and buy wherever he chose, without penalty. An artificial law, a man-made law, imposes upon the things that he buys a burden of taxation. I propose to take that artificial

law out so far as the farmer is concerned, and let the good old economic law proceed by letting the farmer buy where he wills. I am trying to get back to the Senator's position of economic regulation, and I would like to apply that principle to everyone, but I can not apply it everywhere because we would not get any votes in the Senate except a few on the Democratic side.

Mr. BRUCE. It seems to me that the Senator is simply trying to bring the agricultural situation to the same artificial level as industrial products.

Mr. REED of Missouri. No; I am trying to permit the American farmer who raises 10,000 bushels of wheat, for instance, to have the right to carry that over to Europe, sell it, and, if he wants to buy in that open market of the world, to buy and bring his purchase home with him, without any man standing to collect a tribute from him for bringing it home. I am trying to get the economic law into full force and effect.

Mr. HOWELL. Mr. President, there can be no question that through legislation we have measurably affected the distribution of wealth in this country. That is the purpose of the tariff. That has been the purpose of the Esch-Cummins law so far as the railroads are concerned. By legislation we have fixed, not alone, maximum rates which the railroads can charge, but also minimum rates. In other words, the maximum is the minimum. What was the purpose? It was to afford the railroads more money than they could collect without that legislation. The legislation has been effective, because, we all know, since 1920 the railroads have been more prosperous than ever before in their history.

We have affected the distribution of wealth so far as manufacturers are concerned. We have affected the distribution of wealth so far as the railroads are concerned. We have done this in connection with other industries and human activities of the country. All that the farmer has been asking is that he shall have equal consideration. In asking this and in suggesting the methods proposed the farmer has not been uneconomic in his position. From time immemorial society has largely determined the distribution of wealth. It has been different in different ages. It has been different in the various countries, and may be still more different in the United States if we determine to make it so. Therefore, in asking that something of this kind shall be done for the farmer we are merely seeking justice, equality of treatment.

We have been considering two courses of procedure in this connection. One is by providing for an increase in the returns to the farmer for all of his production, that which is consumed at home and that which is shipped abroad. The other course is to provide for an increase in the returns to the farmer merely for that portion which is consumed at home. The line of demarcation between these two methods is the line of demarcation between this proposal and the McNary-Haugen bill.

Mr. GLASS. Mr. President——

The PRESIDING OFFICER (Mr. JOHNSON in the chair). Does the Senator from Nebraska yield to the Senator from Virginia?

Mr. HOWELL. I yield.

Mr. GLASS. Is there not a third way of relief? The farmers numerically are predominant in the country. It is their privilege and should be their duty to elect a Congress that would prescribe special privilege, to elect a Congress that would not legislate to the disadvantage of the farmer. So far from doing that, the farmers insist on electing Congresses that impose special privileges, and special privileges that have almost bankrupted the industry of farming. Why do they not correct the evil at the source instead of pyramiding it here?

Mr. HOWELL. It is true that at one time in the country the agriculturalists were in the ascendancy so far as numbers are concerned, but that was years ago. To-day, out of our population of 120,000,000, there are probably not more than 28,000,000 farmers and their dependents. So far as their being in the majority, they are in a decided minority. If agriculturists were in the majority, and that majority understood the problem as the farmer does to-day, there undoubtedly would be a change in his condition. A change would have come long before this. But, Mr. President, the situation is as it is. It is my view, as previously stated here in the Senate, that the major portion of the people of the country are up on economic stilts while the farmer is down on the ground. What are we going to do about it? Are we to allow the major portion to remain on stilts and consign the farmer permanently to the ground? If we want to equalize the situation there are only two ways in which it can be accomplished. One is by pulling the stilts from under the other fellow or by putting stilts under the farmer. I ask the Senator if he thinks it is possible to pull the stilts from under the other fellow?

Mr. GLASS. It would be possible if the farmers of the country would get together and elect a Congress that would pull the stilts out.

Mr. HOWELL. We have 120,000,000 population, and of that population the farmers, including their dependents, constitute probably but 28,000,000. How can they pull out the stilts from under the other fellow?

Mr. GLASS. There is no manner of doubt that if those Members of the other House of Congress and of the Senate of the United States who assume to speak here as the representatives of the farmers would do it, they could pull the stilts out so quickly that it would make the Senator's head swim.

Mr. McMASTER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from South Dakota?

Mr. HOWELL. I yield.

Mr. McMASTER. May I ask the Senator from Virginia if he will join in voting for an amendment to the tax bill doing that very thing? It is not too late to do it now.

Mr. GLASS. But this is not a tariff bill. This is a revenue bill.

Mr. McMASTER. Yes; it is a revenue bill.

Mr. GLASS. Yes. If the Senator will offer an amendment to this bill providing for a revision of the tariff schedules from beginning to end, he will find nearly every Democrat voting for the proposition.

Mr. McMASTER. We have been told here repeatedly on the floor that Senators on the other side of the Chamber would refuse to support a tariff amendment to the tax reduction bill at this session.

Mr. GLASS. Not if it should be a real comprehensive tariff amendment; but we have not as yet had any real tariff amendment; we have merely had piecemeal propositions presented.

Mr. McMASTER. A statement was made a few days ago to the effect that the Senators on the other side of the Chamber were opposed to any tariff amendments to the tax bill.

Mr. GLASS. The Senator knows perfectly well that he could not be induced to vote for a complete revision of the tariff now.

Mr. McMASTER. The Senator is badly mistaken; he does not even know what he is talking about.

Mr. GLASS. I know what the Senator is talking about, and I know pretty well how he would vote, too.

Mr. McMASTER. When did I refuse to vote for a proposition of that kind?

Mr. GLASS. The Senator has not presented an amendment of that kind. He has refrained from doing so.

Mr. WATSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Indiana?

Mr. HOWELL. I yield.

Mr. WATSON. After all, my friend from Virginia knows just as well as does my friend from South Dakota that it is utterly futile to talk about preparing a tariff revision bill now.

Mr. GLASS. Of course, I know that.

Mr. WATSON. Certainly the Senator knows that.

Mr. GLASS. Certainly I know that.

Mr. WATSON. The Senate could not prepare a tariff bill and get it through the House, in the first place.

Mr. GLASS. I am opposed to doing it piecemeal as has been attempted here.

Mr. WATSON. Certainly.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. HOWELL. I yield.

Mr. SIMMONS. I want to say that while I suppose what we call the progressive element of the Republican Party would vote with the Democratic Members in favor of a tariff that would be to the advantage of the farmers, when it comes to voting with the Democrats to reduce the duty upon the products of our factories and our mills there would be quite a difference between the Democratic view and the view of the progressives on the other side of the Chamber.

There is no such thing, in my judgment, as bringing together the Democratic Party and the progressive element of the Republican Party upon a thoroughgoing, wholesale reduction of the tariff. What we want now is a tax reduction bill, and we do not wish to load it down with amendments that we know will invoke a veto at the White House. That much for that.

I want to repeat that the amendment introduced by the Senator from Missouri is a very broad one. It is one that

I think has some merit in it. It is one, however, that has got to be thoroughly considered and worked out in such a way that I think we have not the time now to work it out.

We export from this country more than half of all the cotton we produce. Suppose a debenture should be given of 25 per cent upon the value of that cotton, and that debenture could be used for the purpose of paying the duty upon any commodity that might be imported into the country; suppose that the enormous sum which would be represented by 25 per cent of the value of the cotton exports should fall into the hands of manipulators who desired to import peanuts into this country, we will say, which, because of the duty, can not now be profitably imported, and the manipulators should use the debentures for the purpose of paying the duty on those peanuts, and thereby enable them to be brought into this country without having to pay any duty at all. We might extend that illustration to other products——

Mr. REED of Missouri. Mr. President——

Mr. SIMMONS. Just a moment, if the Senator please. We might extend that to other products. Take an agricultural product that now has no duty imposed at all upon it; suppose that debentures are given, and as a result a scarcity is produced in this country, and the price is advanced, does anybody doubt that there would be at once an overwhelming importation of that product to this country from other countries?

Mr. REED of Missouri. Mr. President, if the Senator from Nebraska and the Senator from North Carolina will permit me, I desire to say that that is taken care of in a modification which I have offered perfecting this amendment, which the Senator has not seen.

Mr. SIMMONS. Probably I have not seen the modification of the amendment to which the Senator from Missouri refers.

Mr. REED of Missouri. I will read the amendment as now modified. It is as follows:

(c) Said debentures shall be transferable by delivery and the Secretary of the Treasury shall receive such debentures at their face value in payment of all import duties, except duties on agricultural commodities as herein defined.

The definition covers all agricultural products either in their natural or processed condition. So that nobody under this amendment as it now stands could import a single agricultural commodity without paying the duty. That answers the question.

Mr. TYDINGS. Would that include canned goods?

Mr. REED of Missouri. Yes; it would include all agricultural products either in their natural or processed condition.

Mr. HOWELL. Mr. President, the answer to the suggestion that we amend this revenue bill so as to afford relief to the farmer is in accord with what is usually said to the farmer, "We can not do it this way." That statement has been made over and over again, so that the farmer's hope has been deferred time and time again. I believe the time to act is when the opportunity is presented, and if a hundred per cent can not be obtained, then to take 50 per cent—25 per cent, if necessary, and go after the remainder at a later time.

Mr. SIMMONS. Mr. President, the suggestion of the Senator does not answer my inquiry.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. HOWELL. I yield.

Mr. SIMMONS. Suppose I have an enormous fund in my hands represented by debentures issued upon the exportation of cotton; can I or can I not under the amendment proposed use that fund to pay the duty on such products as I spoke of, peanuts—to illustrate—wheat, or anything else that may come in?

Mr. HOWELL. As I understand, under the amendment to the amendment proposed by the Senator from Missouri agricultural products are excluded from the operation of the original amendment. However, the trouble with the amendment as amended is that it is not an orderly relief measure and might be highly destructive to certain industries at any time.

Mr. SIMMONS. Do I understand that the amendment of the Senator from Missouri—I may not have understood it when he read it a little while ago—provides that the debentures can not be used to pay the duty upon any agricultural product imported into this country?

Mr. REED of Missouri. Yes; either in its natural or processed condition.

Mr. SIMMONS. The debentures can only be used, then, to pay the duty upon manufactured products and not of agricultural products either in their natural or processed state?

Mr. REED of Missouri. They can be used to pay the duty on anything except agricultural products either in their natural or processed condition. They are excepted.

Mr. SIMMONS. Then I wish to ask another question. Suppose that is so; but suppose that the inducement that, as a result of the rebate or export debenture or refund or bounty, or whatever it may be called, provided for in the amendment of 25 per cent of the value of the product, there is an overexportation bringing about an extreme scarcity in the domestic market; does the Senator doubt that that scarcity would be readily supplied from abroad and that the price of the product at home would again be reduced?

Mr. HOWELL. The suggestion which the Senator makes brings us to this fact.

Mr. SIMMONS. Take wheat, for instance.

Mr. HOWELL. The higher the price the larger the debentures will be. If wheat is a dollar a bushel, the debenture would amount to 25 cents a bushel. Suppose the price increases to $2, then the debenture would jump to 50 cents a bushel. It must be evident, therefore, that there will be some point where the system would break down. That is the trouble with this plan. In my opinion it will not work out satisfactorily and might be destructive to particular industries. Therefore it has seemed to me from the beginning, so far as the debenture plan is concerned—any of the plans which have been proposed—that it would have greater opposition from those who believe in a high protective tariff than would a reduction of the tariff itself.

Mr. REED of Missouri. The Senator supported the McNary-Haugen bill, did he not?

Mr. HOWELL. I did.

Mr. REED of Missouri. It would have the same stimulating effect; that is the purpose of the bill, is it not?

Mr. HOWELL. The difference is that the stimulating effect of the Senator's amendment would apply to the entire product of any crop grown in this country; that would tend to increase production. The effect of the McNary-Haugen bill would be merely to increase the price upon that portion of domestic agricultural products consumed in this country, leaving the farmer to take what he can get for his surplus.

Mr. REED of Missouri. That is to say, it is proposed in the McNary-Haugen bill to increase the price to the American people and not to anybody else.

Mr. HOWELL. The purpose of the McNary-Haugen bill may be stated thus: Inasmuch as the farmer must pay a United States price for the manufactured articles he buys, he shall receive a corresponding United States price for the products which he has to sell, but only to the extent of the consumption of his products in the United States.

Mr. REED of Missouri. And out of that price he must make up the losses upon that which he sends abroad.

Mr. HOWELL. No.

Mr. REED of Missouri. Yes; that is your equalization fee.

Mr. HOWELL. Under the McNary-Haugen bill he would receive a United States price for all of his product, and the equalization fee is merely that which he would pay back—a repayment equivalent to the increase in price upon that portion of his product which is shipped abroad.

Mr. REED of Missouri. Exactly.

Mr. HOWELL. For instance, let me make this plain:

In 1926, of all the wheat we raised, 80 per cent was consumed in this country, and 20 per cent was shipped abroad. In other words, out of every 5 bushels of grain produced, 4 bushels were consumed at home, and 1 was shipped abroad. Under the McNary-Haugen bill we would enable the farmer to receive a United States price for the whole 5 bushels.

Mr. REED of Missouri. Yes.

Mr. HOWELL. Then, as 1 bushel was shipped abroad, we would make him pay back the increase in price that he had received for the 1 bushel shipped abroad.

Mr. REED of Missouri. I understand that; but the effect of the McNary-Haugen bill, then, is to raise the price on all wheat. That is true; is it not?

Mr. HOWELL. To raise the price on all wheat consumed in this country.

Mr. REED of Missouri. But it raises the price on all wheat. That is the first step. Part of it is sold abroad at less than that price, and that is made up out of the equalization fee. We understand that.

Mr. HOWELL. In other words, the farmer would get the world price for that portion which is shipped abroad, a United States price for that portion domestically consumed.

Mr. REED of Missouri. Yes, sir; but the effect is to raise the price.

Mr. HOWELL. That is the purpose of the bill so far as domestic consumption is concerned.

Mr. REED of Missouri. The Senator's objection to this amendment is that it raises the price, and therefore will pro-

mote too much production. If raising the price by this method will promote too much production, why will not raising the price by the other method do exactly the same thing?

Mr. HOWELL. Mr. President, all that the farmer can expect of the American people is that the American people shall pay a United States price for that portion of his crops which they consume. That is all the McNary-Haugen bill proposes to do for the farmer; and the farmer can not justly expect that anything more shall be done for him. If he obtains a United States price for that portion of his product which the American people consume, he can not complain if he raises twice as much, and, instead of exporting next year 1 bushel of wheat, he exports 4 bushels of wheat, and thus reduces the average price received for his crop, because he will have received justice at the hands of the American people, and that is all he is asking.

Mr. REED of Missouri. That is not the question I am discussing.

The Senator made the assertion a while ago that if the price of wheat were raised through this provision that I have put forward it would stimulate production, and there would be so much wheat produced after a little while that it would finally break down the whole system. If it would break down the whole system under this proposition, clearly it would break down the whole system under the other proposition, for in each case the price is raised, and each man will raise more wheat. You propose to benefit him; you propose to put a premium upon raising wheat. Every premium you put on the raising of wheat will stimulate, of course, the planting of wheat, and you have just exactly the same difficulty.

There is a natural check on this proposition. The farthest it could go would be to raise the price of wheat 25 per cent, because the only benefit the farmer gets is to bring in goods equal to 25 per cent of the goods he ships out.

Mr. HOWELL. If wheat were a dollar a bushel the day this amendment became effective the increase in the price of wheat might be 25 cents a bushel; but after wheat had increased 25 cents a bushel to $1.25, then the next debenture would be 25 per cent of $1.25 instead of $1 or 31¼ cents.

Mr. REED of Missouri. That is true.

Mr. HOWELL. So the debenture might rise still higher and wheat get up to $2, then the debenture would be 50 cents a bushel instead of 25 cents as at the beginning.

Mr. REED of Missouri. But it can never go to $2, because the 25 per cent that is to be received is not sufficient to carry that additional price. That is the answer to that. But if we have a law here to promote American manufacturers, and they can manufacture and sell in this country, and also sell abroad—and they do sell vast quantities abroad—having this market for the high price and the market abroad for their dumping ground, why is not the farmer entitled to the same benefit?

Let me say to the Senator that he has worked here earnestly and honestly for farm relief, and I have a great deal of respect for his opinion; but we have this situation to-day:

The McNary-Haugen bill, according to every bit of grapevine information we get, is going to be vetoed. If it is signed, this measure which I propose will make the enforcement of the equalization fee in it absolutely unnecessary, for it will at once bring the price of wheat that goes abroad up to the domestic level, which you may fix by the McNary-Haugen bill as high as you can expect to have it, and you will then have two measures that will work in harmony.

I am just as anxious as the Senator is to help the farmer out of a difficulty which has been created by statute. All that this bill amounts to is to say that so far as the tariff is concerned, and so far as the farmer has stuff to ship abroad, he shall be allowed to buy without being held up by manufacturers who extort under the tariff. That is all.

It is a practical proposition. Like the McNary-Haugen bill, it may have its difficulties; but I should be very sorry to see those who want to give real farm relief led aside by the arguments that have been produced here.

If the Senator will permit me to interrupt further in his time, we are told that this will prevent the signing of the tax reduction bill, and that some sort of an understanding was arrived at by the members of the Finance Committee that they would try to keep riders of this kind off the bill. There is no one who has any more respect for the ranking member of that committee on the Democratic side than I have; but we have waited here for some sort of a revenue measure for a long time. It is well known that during at least one or two sessions of Congress every effort to introduce a tariff reform bill in the House was throttled by the Committee on Rules. We have not had a tariff revision bill sent us since about the year 1922, as I recall. If we wait for that, we can wait forever, or until there is a revolution which puts the Democrats in control of the House.

We have here now a bill to which we can attach, if we want to attach it, a measure that will relieve the farmer to the extent of giving him a free market in which to buy as well as a free market in which to sell. I implore the Senator not to add the weight of his influence to the tariff barons of this country, who are the real people that ought to protest against this measure, and they are the people who will protest. If this measure were before Congress, you would find a string of their lobbyists here that would reach from the Capitol to the Senate Office Building. They would protest. Two or three great farm organizations have indorsed this plan.

It will not result in bringing in farm products from abroad, because they are excluded from its terms; and if our prices ever advance to a point where anyone abroad could afford to pay a tariff and still ship in farm products, he is confronted then by the tariff laws that have been passed, levying a heavy duty upon farm products. This gives your Nebraska farmer and my Missouri farmer a chance to take his wheat abroad, and buy whatever he wants to buy, and bring it back into this country, provided always that the 25 per cent will be sufficient to cover the tariff charges.

We may get into arguments about just how it will work, and just how much it will promote production, and what the effect of that increased production will be; but every argument that can be made against this amendment applies equally to the McNary-Haugen bill. If the price of wheat in this country were raised to $2 a bushel, there would be more wheat planted. There is bound to be, and the equalization fee will increase, because the loss will be greater on wheat sent abroad, until, if we are going into the imagination, we can imagine so much wheat sent abroad that the equalization fee will be sufficient to cut down the net price on the domestic product so that no benefit will come. That argument can be made both ways.

Mr. HOWELL. Mr. President, there is no question that the farmer, by greatly increasing his production, for instance, of wheat, might wipe out practically all of the benefits the McNary-Haugen bill could afford him. However, as I pointed out before, we nevertheless would be doing justice by the farmer, and only justice, if we provided that he should receive a United States price for that portion of his wheat, and that portion only, which is consumed in this country, inasmuch as he must pay a United States price for the things which he buys. If he increases his production to such an extent that he largely dilutes his possible benefits from this law, that is his fault.

Mr. REED of Missouri. So would it be his fault under the law I propose.

Mr. HOWELL. I recognize that the distinguished Senator from Missouri has been and is a friend of the farmer, and I also recognize the fact that one of the troubles that has confronted agriculture in its struggle for equality is just the situation that presents itself here now. We are not together upon measures for relief.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. HOWELL. I yield.

Mr. SIMMONS. Mr. President, I desire to say—and I thank the Senator for giving me the opportunity to say it in his time—that there is no Member of this body who has been more strongly in favor of what is called the McNary-Haugen bill than I have.

I have voted for it, and I have spoken for it every time it has been before the Senate; and it has been before the Senate and voted upon three separate times. I have given it my unqualified support. I have inveighed upon this floor time after time against the discriminations in the tariff laws against the farmer, and I have demanded legislation that would remove those discriminations, and put the farmers' products in the American market upon something like a parity with the products produced by the manufacturers of this country that are protected. I am ready to do that now. I am ready to do it at any time when it can be done effectively. But I believe that in legislation and in everything else we ought to act upon principles of practicability. We ought to consider the whole condition that surrounds us and determine what we can secure and what we can not secure.

The position of the minority Members must not be understood in this matter. If those who present these various tariff propositions as riders upon this bill can guarantee that the President will sign the bill with those riders upon it, he can get votes on this side of the Chamber, but it is as clear as daylight to me that the President will not sign the bill with those riders on it, and it is even clearer than daylight to me that if

the amendment of my good friend from Missouri is placed upon the bill it is not conceivable that the President would sign it.

Why do I say that? Evidently, if that proposition should be adopted and should work out as the Senator thinks it will and as it may, as probably the Senator from Nebraska thinks it will, it will directly take out of the Treasury of the United States at least $200,000,000, if not $300,000,000, because if these debentures are used for paying the duties upon dutiable articles of a manufactured character it will reduce the amount of revenue this Government will receive from customs duties, and that amount can not, in my judgment, fall below two hundred or three hundred million dollars. The President will know that. Does anybody think that the President would sign this tax bill if it would result in a reduction of not only $225,000,000, as it now provides, but in an additional reduction on account of the debenture proposition of $300,000,000 more?

If these amendments be added to this bill, what will happen? We will not get tax reduction, and we will not get farm relief; we will lose both. I want to have something as the result of these efforts we have made in order to relieve the taxpayers of the country of burdens which they ought not to be required to bear, of taxes which are in excess of what is necessary to pay the legitimate expenses of this Government.

I simply wanted to make my position clear.

Mr. HOWELL. Mr. President, I should not regard the defeat of the pending tax bill or its veto as an unmixed evil. It has been my conviction since I have had experience in business that there is one time to pay your debts, and that is when you have or can get the money. The Government is able to get money now, and therefore, in my opinion, we ought to keep on getting it and pay our tremendous war debt, so that if in the future anything shall confront this Nation comparable to that in the past we will be in a position to meet it. In addition, this bill, in my opinion, gives relief largely to those able to pay. Therefore, if this tax bill were defeated I should not shed tears on account thereof. So I do not see that there is any reason why this amendment should not be attached, so far as jeopardizing the measure is concerned.

The objection I have to this amendment is the fact that it provides no automatic check upon indiscriminate production. The McNary-Haugen bill provides such an automatic check through the equalization fee. I believe that if we are to adopt a measure that is to be permanently effective for the farmer, we must have some automatic check on indiscriminate production, otherwise the measure will be short lived.

In the second place, I believe that any measure we adopt ought to have a provision for the return of whatever is taken out of the Treasury in the way of losses, expenses, or bounties, if you please, for unless we have some such provision, as provided in the McNary-Haugen bill, it will be but a short time before Congress will fail to supply the necessary funds to maintain agricultural equality.

We must have something comparable to tariff legislation. The manufacturers' bounty is automatically collected and automatically distributed, and if we are to have anything similarly effective for the farmer, if it is to be effective and permanent, it must provide for financing itself without regular appropriations from the Treasury.

Mr. President, my view is that the tariff is nothing but a bounty. That was Hamilton's view. He preferred the bounty method of encouraging the manufacturer to the tariff.

It is not because I am not in sympathy with the purpose of the distinguished Senator from Missouri in offering this amendment that I hesitate in connection therewith but because I am determined that if we are to do for the farmer it shall be in a form that will be permanent, not merely temporary.

Mr. BLAINE. Mr. President, I do not know that I can add anything to the discussion on the amendment offered by the Senator from Missouri [Mr. REED], but it seems to me that this amendment is in effect supplemental to the McNary-Haugen bill. I am not going to trace the history of tariff legislation or the efforts that have been made to enact legislation that will bring substantial relief to the agricultural interests of this country. I am not going to take the time of this body to discuss the fundamental thing that is back of this type of legislation. If I understand the McNary-Haugen bill properly—and I claim on my own behalf that I know something about it—the purpose of that legislation is to take care of the surplus farm production. The bill creates the machinery, provides the method, by which the surplus shall be disposed of and the manner in which the farmer shall be compensated.

As I understand, that bill proposes to exact an equalization fee designed to take care of the losses on the sale of the surplus. The result will be that if a price is fixed for a commodity in the domestic market, the loss on that portion of the commodity sold in foreign commerce will be made up by deducting from the domestic price a certain part of that loss, and the balance of that loss will be covered by the increased domestic price to the consumer. That will be the result of the McNary-Haugen bill.

I supported the McNary-Haugen bill. I expect to vote for this amendment. If this amendment were a part of the McNary-Haugen bill it would in no way vitiate any of its provisions or destroy the policy of the McNary-Haugen bill. If this amendment were adopted there would never need be any equalization fee. The provisions of the bill for cooperative marketing would at once come into play, and they would be the great farm organizations that would engage in foreign commerce, and those cooperative organizations, instead of using an equalization fee to make up for losses, would effectively carry out the purposes and policy of the McNary-Haugen bill by accepting and operating under the debenture plan offered by the Senator from Missouri.

I think there is a better plan, and I say it with all modesty, of course, and that is the plan which I expect to present if the amendment now pending is not adopted. If the pending amendment is adopted I shall not offer the amendment which I have had printed. If the pending amendment is defeated, I propose then to present the reciprocal commodity trading plan as supplemental to the McNary-Haugen bill. But a vote for the pending amendment is not a vote inconsistent with a vote for the McNary-Haugen bill. A vote for the amendment which I shall propose will not be a vote inconsistent with a vote for the McNary-Haugen bill. Each amendment, both amendments, or either of the amendments, will be supplemental to the McNary-Haugen bill and would perfect that bill and as well take from it the possible objections which are entertained by many well-intentioned persons who earnestly and sincerely desire to aid agriculture. Therefore, I hope the pending amendment will be adopted.

Mr. REED of Missouri. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SACKETT in the chair). The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	McLean	Schall
Barkley	Fletcher	McMaster	Sheppard
Bayard	George	McNary	Shipstead
Bingham	Gerry	Mayfield	Shortridge
Black	Gillett	Metcalf	Simmons
Blaine	Glass	Moses	Smith
Blease	Goff	Neely	Smoot
Borah	Greene	Norbeck	Steck
Brookhart	Hale	Norris	Stephens
Broussard	Harris	Nye	Swanson
Bruce	Harrison	Oddie	Thomas
Capper	Hawes	Overman	Tydings
Caraway	Hayden	Phipps	Tyson
Couzens	Howell	Pine	Vandenberg
Curtis	Johnson	Pittman	Wagner
Cutting	Kendrick	Ransdell	Walsh, Mass.
Dale	Keyes	Reed, Mo.	Walsh, Mont.
Deneen	King	Reed, Pa.	Warren
Dill	La Follette	Robinson, Ark.	Waterman
Edge	Locher	Robinson, Ind.	Watson
Edwards	McKellar	Sackett	Wheeler

The PRESIDING OFFICER. Eighty-four Senators having answered to their names, a quorum is present. The question is upon the adoption of the amendment of the Senator from Missouri.

Mr. REED of Missouri. Mr. President, I have just a brief statement to make. I think we ought to have tax reduction, and I think we ought to pass a tax bill in accordance with the judgment of the Congress, freely and fairly exercised, without any fear of or regard for the possibility of a veto. It is highly obnoxious to our theory of government that the Congress should be told in advance by the Executive what it shall not do. It is a complete abandonment of the theory of our Government. The theory of our Government is that there shall be an independent legislative branch, which shall conduct its own business and do the things which it considers necessary for the welfare of the country.

The President has the right to send veto messages submitting his ideas, but when they have been submitted the Congress proceeds on its own motion and in its own right. When the Congress has so acted, it is the right of the President and his duty to approve or disapprove as he may consider the merits or demerits of the question demand action. But if we abandon that theory and if we have word sent here by direction or indirection, "If Congress dares to do this thing, I will veto the bill," or "If Congress dares to do that thing, I will veto the bill," we have the spectacle of one man sitting in a separate and independent department of the Government telling Congress exactly what it may and may not do. It is an intolerable proposition. Why not have the President write on a piece of paper exactly what he will permit us to do and then like a

spaniel go to heel and obey his order? I am not saying that President Coolidge has done this, but on every hand we hear the constantly reiterated statement, "The President will veto if we dare do this or dare do that." Let each branch of the Government take its own responsibility and answer to the American people for what it does.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. REED of Missouri. I yield.

Mr. TYDINGS. I merely desire to point out to the Senator that if we were to be susceptible to what the President might do or say the McNary-Haugen bill never would have passed, indeed never would have been introduced in this session of Congress.

Mr. REED of Missouri. That is very true. Further than that, we never get any official information, but somebody whispers around that they know the inner consciousness of the President; somebody speaks for him or somebody imagines for him. As has been well said by the Senator from Maryland, this body passed the McNary-Haugen bill and it was vetoed once, and we have been told for a year that it will be vetoed again. But the Congress passed it because it believed it ought to be passed, and if the President sees fit to veto it he must accept that responsibility. So when we are told that we ought not to take this action because of the fact that the President may veto the tax reduction bill, I have very little patience, indeed, with that kind of pronouncement.

The next suggestion to which I wish to call attention is the understanding of the committee that no tariff legislation would be permitted to be attached to this bill. Mr. President, I am about as good at keeping gentlemen's agreements as, I think, anybody can be; I have the greatest respect for the committee; I know the pressure under which it has been laboring; but it will not do to have the members of the committee foreclose the action of the Senate by an understanding of that kind, particularly in view of the fact that for six years we have waited for a tariff bill to come from the House of Representatives. I happen to know that many Members of the House of Representatives have at various times made the effort to have some kind of a modification of the tariff law, but the party in power in the House of Representatives has steadfastly refused to permit any such legislation to come to the Senate. The only way the Senate can inaugurate a movement for a change in any respect of the tariff is when we have a revenue bill of some kind before us. We have one here now. Not only myself but others have waited for two years for an opportunity to present a measure embracing the idea that is contained in this amendment. Now, I insist that we ought to vote upon the amendment on its merits, every Senator exercising his own judgment. We ought not to be deterred or coerced for one minute by the possibility of a veto.

We are told that if the amendment shall be adopted the President will veto the entire tax reduction bill. Well, sir, I say again, let him take the responsibility, if he desires to do it, but I say, in addition to that, that while we talk much about this "tax reduction bill," it will do the American people but a small amount of good. A large part of the reduction is upon pleasures where money is voluntarily expended. Another large slice comes off in the tax on automobiles. The tax on automobiles does not amount to 1 per cent of the tax that the money loaner levies through loaning money to people who can not make more than the first payment on the automobiles which they buy.

Then, we are told that the amendment will reduce the revenue. Well, if it reduces the revenue, let us see who will get every penny of that reduction. The farmer will get it all. It will give the farmer the opportunity to buy in the market where he sells, that is all; and if it shall reduce the revenue by $200,000,000, it will mean that the farmer can retain in his pocket $200,000,000 that he otherwise would have to expend, for he is the man who secures the benefit of the 25 per cent debenture.

We have been weeping rivers of tears over the farmer; we have seen Senators and Representatives stand upon their feet and proclaim their deathless love of the oppressed agriculturist; and we have seen them then turn around and vote to retain or to place a tariff on everything the farmer uses, thus increasing the price of everything that he has to purchase. Now, when it is proposed to allow the farmer to bring in goods in the market where he sells we are told the President may veto the bill. Well, let him veto it; let the farmers of the United States know in the next November election that he did veto it. I do not know whether he will veto it or not. It is a sound measure, and we must presume that he will not veto it; but, so far as I am concerned, I do not propose ever to change a vote that I want to cast because a single individual who occupies a position of power in another department of this Government says in advance, "I am opposed to it, and if you dare to pass it, I will veto it." I do not think the President said that; I think he is too polite to say it; but there are others here who assume to speak for him who are constantly saying it.

Mr. President, I submit the amendment, and I ask for the yeas and nays on it.

Mr. SMOOT. Let us have the yeas and nays on the amendment.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. I transfer that pair to the junior Senator from Utah [Mr. KING] and vote "nay."

Mr. WHEELER (when his name was called). On this question I have a pair with the senior Senator from Idaho [Mr. GOODING]. I transfer that pair to the Senator from Alabama [Mr. HEFLIN] and vote "yea."

The roll call was concluded.

Mr. TYSON (after having voted in the affirmative). I have a general pair with the Senator from West Virginia [Mr. GOFF]. At the time I voted I thought he was in the Chamber. I find he is absent. Therefore, not knowing how he would vote, I withdraw my vote.

Mr. RANSDELL (after having voted in the affirmative). I have a pair with the junior Senator from Maine [Mr. GOULD]. I understand he has not voted and, therefore, I withdraw my vote.

Mr. EDGE. I have a pair with the senior Senator from New York [Mr. COPELAND]. Not being positive how he would vote if present, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE]; and

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON].

The result was announced—yeas 23, nays 53, as follows:

YEAS—23

Ashurst	Caraway	Hayden	Sheppard
Black	Dill	Locher	Smith
Blaine	Fletcher	McMaster	Steck
Borah	George	Mayfield	Tydings
Brookhart	Harris	Neely	Wheeler
Capper	Hawes	Reed, Mo.	

NAYS—53

Barkley	Glass	Norris	Smoot
Bayard	Greene	Nye	Stephens
Bingham	Hale	Oddie	Swanson
Broussard	Harrison	Overman	Thomas
Bruce	Johnson	Phipps	Vandenberg
Couzens	Kendrick	Pine	Wagner
Curtis	Keyes	Reed, Pa.	Walsh, Mass.
Cutting	La Follette	Robinson, Ark.	Walsh, Mont.
Dale	McKellar	Robinson, Ind.	Warren
Deneen	McLean	Sackett	Waterman
Edwards	McNary	Schall	Watson
Fess	Metcalf	Shipstead	
Gerry	Moses	Shortridge	
Gillett	Norbeck	Simmons	

NOT VOTING—18

Blease	Frazier	Howell	Steiwer
Bratton	Goff	Jones	Trammell
Copeland	Gooding	King	Tyson
du Pont	Gould	Pittman	
Edge	Heflin	Ransdell	

So the amendment of Mr. REED of Missouri was rejected.

Mr. SMOOT. Mr. President, I express the hope that the Senate will remain in session now until this bill is disposed of, no matter how long it takes.

Mr. BLAINE. Mr. President, I desire to present, and, while I have the floor, to discuss, an amendment to the revenue bill. Debate during the discussion of the revenue bill has disclosed that certain bills will meet Executive disapproval.

This body has been told that the President will veto or disapprove of this or that type of legislation, or that he is opposed to some feature of a particular bill, and therefore will veto it. The newspapers have bruited that information about. It has been carried to this floor by word of mouth, and for what purpose?

I assume, as I have always been taught, that there are three departments of government—the executive, the legislative, and the judicial—each of which is supreme within its own field, and none of which should intrude into the field of any other department of government. The information conveyed to us, that the

President will veto particular legislation, of course, has its purpose.

I do not know whether or not the President has ever announced to anyone that he approves or disapproves of any particular measure. I do not know that any Member of this body or the House has any authority to convey to either House a message that the President will veto or disapprove of any particular measure. I have a right to assume, and I do assume, that the President has indicated to no one that he will approve or disapprove of particular measures. I have the right to assume, and I do assume, that the President is keeping within the terms of the Constitution, which provide that it is his duty to convey to Congress his views upon the state of the Union or any particular problem that he desires to submit to Congress.

There are only two ways by which that can be done under the Constitution—either the President may appear in person before Congress, or he may submit to Congress his recommendations in writing. If there is any other method being used than that provided by the Constitution, then the purpose is to intimidate, to bludgeon, to coerce Congress into yielding, to coerce Congress from the position it should have, that of an independent legislative body.

Congress should jealously and zealously guard its duties, responsibilities, and authority under the Constitution. The same rule applies to the Judiciary, and to the Executive; but when any one of the departments of Government undertakes to coerce another department of Government, that is a violation of our Constitution and a violation of the spirit and form of our Government. Any method that undertakes coercion is usurpation.

So I have the right to assume that the President has not indicated his approval or disapproval of any pending measure. I say, sir, that if he has, he has violated the duties of the high office in his charge. He has violated the spirit and letter of our Constitution; and that sort of thing, if it continues, in the end will undermine and destroy our republican system and our democratic form of government.

The only guaranty that stands between the people and an autocratic or arbitrary Executive is the Constitution. When that is violated, then is the beginning of the decay of our democracy.

Mr. President, the only body in which a revenue act can originate is the House of Representatives. The Constitution provides, however, that the Senate may offer amendments.

This, I understand, is the first time since the passage of the revenue or tariff bill of 1922 that the Senate has had an opportunity to perform its constitutional function—that is, to offer an amendment to a revenue bill.

I make this statement not in the form of an apology but as the assertion of a legislative right which should not be surrendered by the Senate. When the Senate of the United States surrenders its powers, it surrenders its duty; and when it surrenders its duty it violates the mandate of the people, for we occupy these seats as their right.

Mr. President, I direct attention to the amendment which I have offered. It is no new plan. It does not involve anything that is spectacular. It is economically sound. It provides for reciprocal trading in commodities.

It provides that dutiable articles which enter principally into the cost of farm operations shall be exempt from duty when imported from a foreign country into the United States when the value of those dutiable articles shall be $5,000 or more, and when the person, partnership, association, or corporation importing such articles shall export to a foreign country, within 30 days after the entry of the vessel making the importation, articles, raw or manufactured, wholly produced in the United States, or wholly produced and manufactured or processed in the United States, enumerated within certain paragraphs of the tariff act, and when those articles exported from the United States are equal to the dutiable articles admitted free from duty. To illustrate: If $5,000 worth of manufactured products enumerated under the schedule of imports attached to the bill be imported they shall come in free of duty, if the importer shall take back to a foreign country, by the same vessel, farm products, enumerated in the bill, of the same value as the imported articles.

Mr. SHORTRIDGE. That is the old doctrine of reciprocity, is it not?

Mr. BLAINE. It is reciprocal trade; it is not reciprocity within the terms of the reciprocity as related to Canada, which was passed, as I remember, in 1911. While I am on this subject, permit me to suggest that there is no similarity between the reciprocal commodity trading provisions of this amendment and the reciprocity legislation in connection with Canada. Under the act of 1911, identically like articles were permitted to enter the United States from Canada bearing a certain rate of duty, and the United States was permitted to export to Canada identically the same type of goods, of the same description, the same character, and at the same rate of duty that was charged the Canadians upon their imports into the United States of like articles, or commodities in kind.

The second provision of the Canadian reciprocity legislation was that the same articles, the same goods, the same commodities could be entered between Canada and the United States free of duty.

Reciprocity with Canada did not segregate or separate manufactured commodities from agricultural commodities, such as is proposed by this amendment. Therefore it was of no benefit to the United States. It did not provide for reciprocal trading among the countries of the world. It set up a special reciprocity between Canada and the United States with respect to the same commodities, raw or manufactured. So there is no similarity between this provision and the provisions relating to reciprocity with Canada, no analogy.

Mr. SHORTRIDGE. Mr. President, if the Senator will permit me, when I used the word "reciprocity" I did not refer to or intend to limit myself to the treaty with Canada.

Mr. BLAINE. I understand.

Mr. SHORTRIDGE. I had in mind the broader doctrine of reciprocity, as once advanced by certain American statesmen.

Mr. BLAINE. I understand. The Senator's reference merely called to my mind the Canadian situation, and I intended to make the distinction between the proposal I am now making and the reciprocity legislation of 1911. There is a vast difference between them.

Moreover, this plan does not involve any new machinery whatever. All the machinery of the tariff act relating to value, appraisal, inspection, invoices, examination of merchandise, transportation in bond, and warehousing of merchandise shall apply to imports; and such administrative provisions of existing law shall apply to exports, so far as they are applicable—and they are entirely applicable—to make this proposed legislation effective and easily administered, without creating any new board, without creating a single additional Federal office, except that there will be a necessity, it is true, for additional appraisers and additional clerks. But the machinery provided under the present law can be used with perfect ease in the administration of this proposition.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). Does the Senator from Wisconsin yield to the Senator from California?

Mr. BLAINE. I yield.

Mr. SHORTRIDGE. Has the Senator estimated how much revenue, if any, the Government would lose if his amendment should become a part of the law of the land?

Mr. BLAINE. Mr. President, I have not investigated. It would be entirely impractical to attempt an estimate. This amendment does not involve a question of revenue; it involves a question of reciprocal trading.

Mr. SHORTRIDGE. Certainly; but we would lose revenue, would we not?

Mr. BLAINE. We would lose revenue; yes. It was suggested that under the amendment offered by the Senator from Missouri [Mr. REED] there would be a loss in customs revenues of about $300,000,000 a year. This amendment is of a different character. The amendment suggested by the Senator from Missouri provided for a 25 per cent increase in price for agricultural products over the average for the preceding six months, as I understand, as they would be averaged by the Secretary of Agriculture. This does not include all manufactured articles, as the amendment proposed by the Senator from Missouri did. This affects those imported articles entering principally into the cost of farm operations, and we will lose the duty on such imported articles.

Mr. President, in order to save time and in order to make my discussion and remarks intelligible in the RECORD, I desire to have incorporated at this point the amendment I have offered, including the schedules attached to and printed with the amendment.

The PRESIDING OFFICER. Is there objection?

There being no objection, the amendment and schedules were ordered to be printed in the RECORD, as follows:

In order to prevent the suppression of commerce with foreign nations, and to promote reciprocal trading in commodities in foreign commerce, it is provided that—

SEC. —. (a) The articles which are included in paragraphs 27, 28, 64, 67 to 79, inclusive; 201, 203, 217, 236, 301 to 318, inclusive; 323, 326 to 333, inclusive; 340, 345, 361, 373, 374, 388, 401, 404, 405, 1005, 1007, 1018, 1415, and 1436 of Title I of the tariff act of September 21, 1922 (ch. 356, U. S. Stat. L., vol. 42, pt. 1), which are the dutiable

articles entering principally into the cost of farm operations, shall be admitted exempt from duty when imported from a foreign country into the United States upon the following conditions:

Such exemption from duty shall be allowed only when the aggregate value of such dutiable articles transported by the same vessel shall be $5,000 or more and when the person, partnership, association, or corporation importing these articles shall export to a foreign country, within 30 days after the entry of such vessel, articles, raw or manufactured, wholly produced in the United States or wholly produced and manufactured or processed in the United States, enumerated in paragraphs 501 to 503, inclusive; 601 to 603, inclusive; 701 to 780, inclusive; 1001, 1101, 1102, 1105, 1106, and 1560 of Titles I and II of the tariff act of September 21, 1922, of an aggregate value at least equal to that of the dutiable articles admitted free from duty.

(b) In the administration of the plan for reciprocal trading provided for in subsection (a) of this section the provisions of Title IV of the tariff act of September 21, 1922, shall apply with respect to imported articles, except when inconsistent with this act, and all of the provisions of said Title IV relating to value, appraisal, inspection, invoices, examination of merchandising, transportation in bond and warehousing of merchandise, shall apply to exports under this act, in so far as they are consistent with this act.

(c) A bond or a cash deposit equal in amount to the duty otherwise payable upon articles imported pursuant to subsection (a) shall be given to the collector of customs before they are admitted exempt from duty and such bond or cash deposit shall be forfeited and utilized for payment of the duty in the event that the importer shall fail to make the exports required by said section. The Secretary of the Treasury shall have power to make any necessary rules and regulations to carry out the provisions of this section.

Schedule of imports and exports embraced in the amendment to H. R. 1, proposed by Mr. Blaine (ch. 356, U. S. Stat., vol. 42, Pt. I)

IMPORTS

	Paragraph
Chemicals, oils, and paints:	
Coal-tar products, not medicinal; colors, dyes, etc	27
Coal-tar products; colors, dyes, photochemicals, medicinals, etc	28
Paris green and London purple	64

Carpet wools	1101
Other wools	1102
Waste, noils, etc	1105
Wool and hair, washed but not further advanced than roving	1106
Cotton:	
Cotton and cotton waste	1560

Mr. BLAINE. It will be observed, if a comparison is made with the revenue act of 1922, that there are only a few manufactured articles proposed to be imported into the United States free of duty which, under the present law, carry a duty higher than 30 per cent.

Some of them carry a maximum duty of 50 per cent. I am not going into the details of that; it is a matter of classification. The average rate, as I have been able to figure it, will range about 30 per cent ad valorem. We would lose in customs

receipts whatever that would amount to. No one could estimate the amount because no one knows or can anticipate how much in value of agricultural products may be exported in exchange for the manufactured products specified in the schedule attached to the proposed amendment.

Mr. President, the purposes of this proposed amendment are plain. It is unnecessary for me to discuss at length that the United States owns and holds one-third of all the gold of the world. We have over $3,300,000,000 in gold, while the total gold of the world is only $9,300,000,000, in round figures. Foreign countries, principally European countries, owe the United States war debts of something like $18,000,000,000. In addition to those loans there are private loans made to foreign countries, not to the governments alone, but as well to industries within those countries, of something like $14,000,000,000, of which $6,000,000,000 is loaned to the Central and South American countries. The other $8,000,000,000 has been loaned to European countries and their industries.

What was the result of those loans, and what will be the result as long as those loans are outstanding? Much of this $8,000,000,000 of loans—yes, much of this $14,000,000,000 of loans—made by private parties to foreign governments, and their industries, has remained in the United States in the purchase of manufactured products.

Foreign governments have been borrowers to a large extent, not for the purpose of capital account but for the purpose of purchasing manufactured products, machinery which they expected to and have established in their industries abroad, agricultural machinery, various types of machinery, all subject to rapid depreciation. That machinery will be outworn, will become obsolete, long before the loans are paid.

Therefore, Mr. President, there is no virtue in passing legislation that is going to increase the international financial difficulties. To pass that type of legislation is not going to relieve agriculture. These European countries have no gold with which to buy our agricultural products. The balance of trade is against them.

The only way by which agriculture can sell its surplus products is to take in exchange commodities which can be and are produced by these foreign countries. The purpose of my amendment is to permit of the reciprocal trading in commodities as between agricultural products produced in America and manufactured products of a certain class produced in foreign countries.

There is nothing unsound about that. There is nothing in it contrary to the opinion and judgment of the best economists of the world. I do not know where Europe may find the money with which to buy agricultural products under any other plan that may be devised in America. Certainly they have exhausted their credit. It is unbelievable that even private interests or private parties are going to dump more money into Europe and make more loans to industry in Europe unless there is some assurance of repayment of those loans. There can be no relief for agriculture until we break down the barriers set up against it. Tariff legislation does not afford any relief; I mean tariff legislation increasing the tariff. For every single dollar of benefit that the farmers get from the tariff duties on agricultural products they pay out $5 in increased cost of living and increased cost of operation of their farms. So if we are to aid agriculture in a sound and substantial manner, we must break down these barriers that have brought agriculture to its present depression.

The plan I have proposed takes no cash subsidy from the United States Treasury. It avoids equalization fees or taxes either upon producers or consumers. It does not ask consumers to submit to sales taxes to shield the wealthy from taking a share in the national program of agricultural encouragement. It requires, however, Federal action. The plan and purpose would assure for the producers increased prices without dipping into the Public Treasury and without taxing the farmer or taxing the consumer. It is not alone a farmer's relief measure. It is as well a consumer's relief measure.

I know that it may be said that we will depend upon the importer in our trade relations. I want to discuss that. We must assume that competition among importers would force them to bid for farm products as much above the world price as is the difference between the present tariff schedule and the difference that will exist if the amendment shall become a part of the law. In other words, they would pay an increased price for farm products equal to the amount of the decrease in the tariff duty.

Either that will happen or the importers will sell to the American farmer and the American consumer the imported articles at a reduction in price equal to the reduction in the tariff. It does not make any difference which method they pursue. I assume that it will work both ways—an increased price for agricultural products and commodities and a decreased price for those things that enter into the cost and expense of farming operations.

How those two factors will be divided I can not anticipate. The natural law of trade and commerce will determine that question. But we do know that if the importers refuse to pay to the American farmer an increased price for his commodity equal to the reduction in the tariff or refuse to grant to the farmers of the country the reduction in the cost of those things that go into the cost of operation of the farmer's business, then the cooperative organizations of the country, the farm cooperatives now existing and those to be organized, will set up their foreign agencies, and they will become the importers and the exporters, and thereby develop an American trade the like of which was never before known. It will be the greatest stimulant to foreign and domestic commerce that the mind can picture.

The American farm pools and cooperatives will establish their agencies in Europe and, I repeat, will become the exporters and the importers.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Utah?

Mr. BLAINE. I yield.

Mr. KING. In view of the appeals which have been made for 40 to 50 years to the agriculturists of the United States to support a wise and rational policy with reference to the tariff, and their persistent refusal to listen to reason and to economic formulae which have been accepted by scientific men and by practical men, why does the Senator believe that the farmers of the United States now have changed their minds and look with any less favor upon high tariff rates than they have in the past? The Senator knows that when President Taft argued in favor of reciprocity, much the same, perhaps, as the position of the Senator, he was not supported by the farmers of the United States.

The Senator knows that when former Senator Dolliver and former Senator La Follette and other Progressives argued in favor of a fair tariff, not a tariff that builded up a monoply, but a tariff that would help the farmer, the farmers rejected the pleas of those liberal-minded and progressive men and went back to the old reactionary views and have adhered to them pretty consistently ever since. Does the Senator believe that daylight has come into the murky darkness and that we are about to have some economic light to illumine the pathway of the Senate and the country in dealing with these economic questions?

Mr. BLAINE. I can not agree with the Senator's statement with respect to the view of agriculture. I have discussed the reference to the Canadian reciprocity legislation. I do not know whether the Senator was in the Chamber at the time.

Mr. KING. No; I was not.

Mr. BLAINE. I explained that that was not a reciprocity arrangement favorable to the American farmer because it admitted all farm commodities from Canada into the United States upon the same tariff rate as that upon which the same commodities entered into Canada. It was not a farm-relief measure. It was not in the interest of the farmer. That same act provided for the introduction of certain commodities into the United States free of duty. It also provided that the same commodities could be transported to Canada free of duty. Therefore it had no effect upon agriculture, except an injurious effect.

Mr. KING. Mr. President, will the Senator yield further?

Mr. BLAINE. I would prefer to finish my remarks in a consecutive manner. I am afraid I will prolong the debate and I want to conclude my remarks in just as short a time as possible, depending entirely upon the interruptions.

The PRESIDING OFFICER. The Senator declines to yield.

Mr. BLAINE. Mr. President, the farmers have not had any opportunity to vote upon questions of this kind. Other issues have been diverting their attention. The war came on. The problems of agriculture have changed. I do not believe that agriculture to-day is willing to accept the mandate of the industrial East if the tariff issue be properly presented.

It will be contended that my proposed amendment, if adopted, might work injuriously toward labor. I shall not discuss that question at length. The protective policy is no longer protection for the workingman. The present protective policy is a protective policy for the machine which has displaced human labor. Therefore, being a protective policy for the machine, it becomes at once single in its operation in protecting those who own our industrial plants.

I note that Mr. Robert P. Ellis, of Memphis, Tenn., vice president of the United States Chamber of Commerce, before the Illinois Manufacturers' Cost Association in Chicago, as reported in the Manufacturers News, said this:

From 1899 to 1925 the number of wage earners in the United States increased from 4,712,000 to 8,623,000—

Almost double; but now note what he further says:

But the value of the things they produced increased from $11,000,000,000 to the enormous amount of $62,000,000,000.

There was an increase in the number of wage earners about double, but their output increased sixfold. There was three times as great an increase in production as in the number of workers, which means that the machine is displacing the worker.

I now quote from a speech made on the floor of the Senate on March 27 by the distinguished senior Senator from Utah [Mr. SMOOT], another eminent authority on this question.

He describes this very condition of the machine displacing human labor in industry. He does not say so, but I conclude, and properly and logically so, that instead of the protective tariff being in the interest of the worker it is in the interest of the machine, which is owned by the industrialists of this country who control industry.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Utah?

Mr. BLAINE. I yield.

Mr. SMOOT. The Senator must know, however, that there are more laborers now employed, notwithstanding the improved machines used in the manufacture of products in the United States, than there have been for years and years past.

Mr. BLAINE. Oh, yes; I showed that the number of workers had doubled, but that their production had been multiplied by six.

Mr. SMOOT. The number of employees has increased and those employees are protected because of the fact that similar machines are being exported to England and many of them are being used in Germany and other countries, where they are operated at a lower wage scale than prevails in America. I think, in some instances, the foreign wage scale is about 25 per cent of the wage here, and consequently our workmen must have some protection.

Mr. BLAINE. I shall point out the labor cost element in the manufacture of commodities before I conclude.

The Senator from Utah said—and this illustrates the point I am making:

In one industry, for instance, a new machine has been installed to do the work formerly done by 12 men. Only four persons are needed to operate this device. Its effect on the industry in which it is used depends upon the individual employer who uses it.

The Senator goes on to say:

Another employer, however, using the same machine, employs four women to run it, and pays them 60 cents per thousand for the output they produce.

He concludes:

That is, he pays $2.40 for an output that formerly cost him $12 by the old hand method.

That is a ratio of 6 to 2 against labor; and industry, therefore, receives the benefits of our protective tariff policy. As time goes on, as invention increases, as mass production develops, as the efficiency of the machine develops, so the element of labor cost will be reduced accordingly. So there will be a continuous and ascending scale of benefits to industry and a constant descending scale to the worker. The tariff policy of to-day operates exactly in that manner.

I call attention to this situation: In 1909 in 746 cities of the United States the wage cost of producing $1,000 of commodities amounted to $165. That was almost 20 years ago. In 1919, in the same 746 cities for every $1,000 of products the wage factor was $170. That was about 10 years ago.

In 1925 the labor cost of producing $1,250 in commodities was only $126. Therefore, from 1919 to 1925 the relative wage cost declined from $170 for the production of $1,000 worth of commodities to $126 for the production of $1,250 worth of commodities. The present labor cost, therefore, is only about 10 per cent of the cost of the finished product.

I wish to refer to this condition just a little further, and the figures I quote in extenso are taken from the 1927 report of the Department of Labor, as follows:

Index numbers of wage earners in manufacturing industries, of population, of wage earners per 1,000 population, and of quantity of manufactured goods produced

Year	Wage earners in manufactures	Population	Wage earners per 1,000 population	Quantity manufactured	Quantity manufactured per wage earner
1919	100.0	100.0	100.0	100.0	100.0
1921	77.2	103.3	73.9	78.6	101.8
1923	97.5	106.4	90.7	120.2	123.3
1925	93.3	109.9	83.9	125.0	134.0

That demonstrates exactly the point I am endeavoring to impress upon the Senate, namely, that the output of manufactured articles has increased from the index number 100 in 1919 to 125 in 1925, the index number of wage earners has decreased, as I have shown, from 100 to 93.3 and the index number of the quantity manufactured per wage earner has increased from 100 to 134, thereby decreasing the labor cost of manufactured commodities.

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Missouri?

Mr. BLAINE. I yield.

Mr. REED of Missouri. I should like to have the privilege of suggesting the absence of a quorum, if that is agreeable to the Senator.

Mr. BLAINE. I should prefer to conclude.

Mr. REED of Missouri. Very well; I shall not make the point.

Mr. BLAINE. Mr. President, it seems unnecessary to proceed with any more facts or any more data in proof of my assertion. It must be recognized that the present efficiency of the machine has displaced labor. Therefore, the high protective tariff policy goes almost entirely toward the protection—not of human labor, but of the machine, of capital, of finance.

There has also been an attempt made to popularize the tariff as a benefit to agriculture. Those gentlemen who have not all their investments in agriculture, those gentlemen who have not any investment in agricultire excepting mortgages upon farms are not competent witnesses upon this question. I submit that there are some of us whose entire life savings are invested in active, operating agricultural development. What is the experience of those men? Go to the farmer in Wisconsin, go to the dairyman in Wisconsin, and ask him, and he will tell you what happened when the President, by Executive order, increased the tariff rate on butter from 8 to 12 cents a pound. He will tell you, as the fact was, that, instead of butter increasing 4 cents a pound, the price of butter to the farmer actually went down. I do not need to quote statistics to prove that to have been the case. The farmer knows it if others refuse to recognize it.

Mr. SMOOT. Mr. President, does the Senator think that that was on account of the increase in the tariff duties?

Mr. BLAINE. Those who claim that the tariff is such a great benefit to agriculture contend that there should have been an increase in the price of butter.

Mr. SMOOT. Had the market of the world stayed as it was there would have been an increase in the price of butter. I do not think the Senator can find any farm organization that would like to have the duty on butter removed; I have not heard of one.

Mr. REED of Missouri. Mr. President, may I interject at that point to say that it is an understood thing that if the tariff is raised and prices go up it must be attributed to the tariff, but if they go down it is always attributable to some other cause.

Mr. BLAINE. To the world market, for instance.

Mr. REED of Missouri. Yes; to the world's market.

Mr. BLAINE. I understand that perfectly.

Mr. President, let us examine the single question of butter. There was a tariff law enacted in 1913, as I understand, that provided a tariff duty of 2½ cents a pound on butter. I will ask the Senator from Utah if that is correct?

Mr. SMOOT. Yes; that was the Democratic tariff law of 1913.

Mr. BLAINE. The tariff act of 1913 imposed a duty of 2½ cents a pound on butter.

Mr. SMOOT. That is correct.

Mr. BLAINE. I have not the Agricultural Department statement prior to 1918, but I find that in 1918 the average wholesale price of butter on the Chicago market—and the Chicago market is the central market of the butter-producing States—was 50 cents.

In 1919 it was 58 cents.

In 1920 it was 58 cents.

That was under a 2½ cent tariff.

In 1921 it went down to 42 cents. They did not change the tariff in that time.

Mr. SMOOT. No; of course, they did not.

Mr. BLAINE. In 1922, six months of which was under the 8-cent tariff duty, butter went down to 39 cents.

In 1923 it went to 46 cents. It went back within 12 cents of what it was in 1920 under a 2½-cent rate. In 1923 it was bearing a specific duty of 8 cents a pound.

In 1926 it went down to 43 cents.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Utah?

Mr. BLAINE. I do.

Mr. SMOOT. Of course, those are the variations due to market conditions; but does the Senator know of a single farmers' organization that is not asking for an increase in the 8-cent rate to-day? The Senator from Minnesota [Mr. SHIPSTEAD] offered an amendment on Saturday, which was voted on, increasing the duty about 75 per cent; and I have seen all the recommendations of the farm organizations that come over my desk, and they are asking for an increase in the duty upon butter.

Mr. BLAINE. I am not discussing resolutions that have been passed by two or three people who usually get together and represent themselves to be representatives of the farmers. I have seen some of those gentlemen around the Capitol this winter. They are not the men who go out into the field and till the soil and go on the dairy farms and milk the cows. They are not the men who toil on the farms.

Mr. SMOOT. All I can say is that the local organizations all over this country have sent in petitions to the Finance Committee asking for an increase in the rate on butter. They also asked the President to increase the rate; and, as the Senator said, it was increased by Executive order.

Mr. BLAINE. I do not know what the representatives have done. I want to say that the farmers of this country never have had submitted to them in the last few years a tariff question, nor have they had an opportunity to pass upon it.

Mr. SMOOT. Do I understand the Senator's position now to be that he wants the rate of duty on butter reduced to 2½ cents?

Mr. BLAINE. I am not discussing that.

Mr. SMOOT. Why, certainly the Senator is.

Mr. BLAINE. I have endeavored to demonstrate—and I think conclusively—that the increased tariff on butter did not benefit the farmer a single dollar. I am going to tell you whom it benefited. I am getting to that.

Mr. SMOOT. I will say to the Senator that if he will take the same identical dates he has mentioned and compare the price of butter in the foreign markets, he will find the variation of prices to be approximately what it is in the figures he has already quoted.

Mr. BLAINE. I will tell you who is benefited by the tariff on butter and cheese and processed milk and other products from the farm. Let us analyze this just a little further.

The President's order was made on March 6, 1926, and became effective April 5, 1926, increasing the tariff on butter from 8 cents to 12 cents a pound. Butter immediately went down—that is, the price the farmer received—and it continued to go down until when? Until after the peak of butter production had been reached. After the time that peak had been reached until the production had been reduced materially, butter went up; and why? The price of butter goes down during the months when the farmers' production is greatest. It goes up when the storage and packing companies have the bulk of the butter and the farmers' production is small. Therefore all the benefits that flowed from the increase of 4 cents a pound on butter went to those who were able to monopolize the storage, the distribution, and the sale of butter to the consumer.

I will demonstrate that very clearly. If the Senator came from a dairy State, he would know that butter production begins the climb toward its peak in April.

Mr. SMOOT. Certainly.

Mr. BLAINE. It climbs through April, May, and June; and if the season is favorable for furnishing the proper succulent feed, the grasses, it runs into July, and sometimes even longer. Those months are the months when butter goes down in price, and those are the months when the farmer produces the larger portion of the entire year's production.

Mr. SMOOT. Yes; and the same thing happens in all parts of the world.

Mr. BLAINE. No; not at all. Foreign butter producers feed their dairy herds differently, and the seasons of production are not the same as in America. I am telling what happens in America to the American farmer.

Mr. SMOOT. It happens in all parts of the world; and if it were not for the tariff upon butter, the butter that went into storage in the storage houses would have been foreign butter; and we would be about where we were before we ever had any storage houses. Just as it is with eggs, so it is with butter.

Mr. BLAINE. I am afraid the Senator's mountain environment has not informed him about the flow of commerce in butter.

Mr. SMOOT. The Senator from Utah knows how butter is made and he knows that the statement just made by him is correct as to the production of butter. Everybody knows that; and, Mr. President, as I say, that is why the American producer makes butter or the farmer produces the cream that makes the butter. If it were not for the protective tariff of 12 cents now, and 8 cents before the present act, the people who run those cold-storage plants would have put not American butter but foreign butter in their plants; and what would the local people have done? They either would have had to meet the price or they could not have sold their butter.

Mr. BLAINE. No; the Senator is entirely mistaken in his analysis. The records contradict him.

Now let us see what happens in October, November, December, and January, and even in February and March at times.

The packers, the cold-storage people, and the warehouse people have been storing up the cheap butter bought from the farmers during their peak period of production. They control that absolutely. They have a corner on it, an absolute pool, a monopoly. The farmers, unable individually to break that monopoly, are helpless. Then what happens? The cost of butter went up in December, 1926, after the 4-cent tariff increase went into effect, to 53 cents a pound—butter that was purchased from the farmer in April, May, June, and July at 39 cents a pound—an increase to the consumer of 14 cents a pound on butter over the price paid to the farmer. By way of parenthesis I want to explain that when I have been talking about the price of butter to the farmer I mean the wholesale price. The farmer actually receives 2 cents a pound less than the wholesale price.

What makes up that 14 cents? Twelve cents of it is tariff. Four cents of that 12 cents is the increase of tariffs made by the order of the President. Not one single penny of that increase went into the pockets of the farmer. The power of the storage and packing companies to monopolize, to form great combinations, is made secure and profitable by excessive tariff rates. The increase in the cost of butter to the consumer is not reflected back to the farmer.

It is the same way with cheese. It is the same way with those products of milk that can be stored. It is the same way with all meat products that can be stored. It is the same way with poultry and eggs and all farm products that can be stored for a reasonable time. In the case of every single farm product that can be converted from the raw product to a processed product capable of storage all the way from 4 to 14 months, the tariff permits monopolies and combinations to receive the benefits of the high protective tariff. The farmers do not receive that benefit. The consumers are thereby injured to the extent that monopolies and combinations are able to demand those excessive prices of the consumers.

Now let us look at the foreign importation of butter just for a moment.

There are only three countries where there is any large amount of butter produced outside of the United States. One is Australia, one is New Zealand, and the other is Denmark. Practically all of their butter is handled either through a great cooperative movement exclusively under the control of the producers or through a great cooperative movement with assistance from the state.

That is the efficiency with which Denmark and New Zealand and Australia handle the disposition of their main agricultural products, and that is what we propose to do or what ought to be done, if we have the proper farm board, under the McNary-Haugen bill; and this amendment is supplemental to that bill. It in no way displaces it. It in no way interferes with it. As I said with reference to the amendment offered by the Senator from Missouri [Mr. REED], it would supplement the McNary-Haugen bill.

While I say it with all due respect to the Senator from Missouri, I believe that this amendment would permit the organization under the McNary-Haugen bill to operate more efficiently and scientifically. It would eliminate the equalization fee, and the amount of money appropriated for the revolving fund and for the loan fund under the McNary-Haugen bill would be sufficient to provide for these great cooperative organizations, for their packing, for their storage, for their ware-

housing of the formers' products, so that he might receive the average price of butter for the year instead of receiving the price that he must take when the peak of production reaches the apex, which is always the lowest price.

Under the present system we have the most maladjusted economic arrangement that could be conceived, wasteful, detrimental to the agricultural interests, detrimental to the consumer, and largely because we have built up a high-tariff wall that prevents any effective measure from being taken either by the producers of agricultural commodities or the consumers of those commodities. Privilege has developed with its trusts and monopolies protected and guarded by excessive tariffs until it has become the master of agriculture, and the consumer has become its slave.

Mr. President, there is not much use attacking the present economic situation which depresses agriculture unless we attack the evils at their very roots. We can continue to build up higher tariff walls, we can increase tariffs on butter, on cheese, on processed milk, on meat products; we can continue to increase the tariff on any agricultural commodity that is capable of storage, packing, or warehousing for a period of from 4 to 14 months, but we will not benefit the farmer by so doing. I repeat, you place in the hands of these monopolistic organizations, trusts, and combinations, through privilege, the power to determine the price the farmer will receive, and to dictate the cost to the consumer. The farmer does not and can not under the present economic conditions, when monopolies and combinations have been able to grow and to control, receive any benefit out of the excessive tariff.

Mr. President, I could not support the measure presented by my good friend from Washington [Mr. DILL]. The very same reasons and some additional reasons prevent it, and I am going just briefly to refer to them. Under the present tariff law logs bear a tariff rate of $1 per thousand feet, an anticonservation measure. Here at this session of Congress and at every session of Congress we have been appropriating and State legislatures have been appropriating millions and millions of dollars in order to reforest and restore our fast-disappearing forests and timber supply. Yet under the tariff act there is a duty imposed upon the shipment of logs into the United States of $1 per thousand. On the one hand we expend millions upon millions of dollars to reproduce trees and on the other hand we build up a tariff wall to prevent logs from trees of other countries flowing into the United States free of duty.

I could not support the proposition of levying a tariff upon shingles, multiplying the burden upon the consumer, as was said in the debate on the floor. There is another factor involved in that same problem which I am not going to discuss at great length. Take the amendment offered by my good friend the Senator from Minnesota [Mr. SHIPSTEAD]. I have discussed what in my opinion would be the effect of that kind of legislation.

I think it can be demonstrated, and I think I have demonstrated it, that the increases of tariff duties upon agricultural commodities under present economic conditions are helpful only to those who have the funds by which they can control and monopolize those products, store them, pack them, warehouse them, and hold them until they demand the highest price. They can demand that price, because you have placed between them and those who could import those products a differential that goes into the pockets of monopolies and combinations and not into the pockets of the men and women who produce those farm products.

Take, for instance, the amendment proposed to impose a duty upon hides. All livestock is sold upon the hoof, at a certain price per pound. If the price is 14 cents, that is the price for the hide, it is the price for the hoof, and it is the price for the meat. An imposition of a tariff duty on hides is not going to be reflected in an increased price to the farmer for his livestock. That will not be a factor in determining the amount the farmer will receive. It will be a factor, however, in increasing not only the cost of all leather goods used by the farmer and his family in their personal use, but in increasing the cost of manufactured articles into which leather enters, like harness, belts, and the multiplicity of uses of leather upon the farms of this country.

An excessive tariff duty on any farm commodity, I repeat, that is subject to packing, warehousing, and storage, is in the interest alone of those who can monopolize that line of business. Every tariff duty on the by-products of the farm is in the interest of those who manufacture or process those commodities. I think it is unnecessary to go further in presenting the soundness of the position I have taken.

Mr. President, I have some other pretty good authority, and it ought to appeal especially to the industrial East, it ought to appeal to the high protectionists, like the senior Senator from Utah. I am sure that Senators will not claim that the National Industrial Conference Board and the Chamber of Commerce of the United States are radical free traders. They are at least not radicals or bolsheviki or "reds." Perhaps some may think the Chamber of Commerce of the United States is getting pretty radical. I am going to read from their report for the benefit of the Senators from New England, and then let them go back to the chambers of commerce and charge them with being radical. This is what is said in their report on the trend of agriculture and the factors in depression. I quote from page 95 of their report, issued in 1927:

> There is little doubt that the steady extension of tariff protection to manufacturing industries, and particularly the increase in the tariff level in postwar years, has on the whole affected agriculture unfavorably in comparison with manufacturing industry.

Continuing:

> The increase in rates put into effect in postwar years, combined with the shift of the United States from a debtor to a creditor status, undoubtedly contributed to the depression in agriculture. * * * Like the increase in railroad rates, this raising of the tariff came at a time very inopportune to the farmer. An increase in the degree of protection, so far as it is real and not a mere raising of rates already completely protective, can not fail to have an adverse effect on some exporting industries, and in the case of the tariff act of 1922 it seems probable that agriculture bore the brunt of this readjustment.

I am not going to quote extensively from this, but I think I ought to include the following in my remarks:

> As our productive power has increased in certain branches of industry we have sold increasing quantities of these products abroad. But as we have raised a tariff wall against those foreign manufactured products which we could not produce as cheaply as foreign manufacturers, the ability of European markets to purchase American farm products has diminished.

They are right; there is no doubt about that. Even the Senators from New England will admit that.

> Since the war the difficulty of disposing of our surplus of farm products in foreign markets has been increased by the tremendous decline in purchasing power of the European nations, by their burden of internal indebtedness, and by their increasing indebtedness to the United States.

How are some of them going to pay?

Mr. SMOOT. Does the Senator think we ought to cancel our foreign debts?

Mr. BLAINE. Not at all.

Mr. SMOOT. The writer of the article——

Mr. BLAINE. They are discussing the tariff.

Mr. SMOOT. But they say we ought to forego the foreign debts.

Mr. BLAINE. Oh, no. I think we ought to exchange our agricultural commodities for some of their manufactured commodities and let them pay their debts. In that way debtor countries will pay the United States and we can retire our bonded indeb dness, relieve the farmer, and readjust our economic conditions along lines that are logical and reasonable.

I call attention to this:

> It is likely rather that, under conditions that prevail to-day, and for the reasons already stated, the principal effect of the protective tariff upon the American farmer is to restrict the market for those products of which he produces a surplus above domestic needs. Many of the more important industries upon which American prosperity depends and which have been built up by tariff protection are no longer dependent upon that protection.
>
> They can produce as cheaply as foreign nations and are able to sell abroad much more of their products than are imported.

Mr. President, I have not attempted to produce the array of testimony that is available, that can be produced, testimony which is conclusive that the present high protective rates on agricultural products constitute a fictitious protection for agriculture and make possible the exploitation of agriculture, make possible the security of trusts and monopolies which control to-day the markets for agricultural commodities; testimony showing that every agricultural commodity subject to storage, packing, and warehousing is in the grip of privilege, a grip which can be released only by taking out of their hands the instrument that has permitted them to weld the chains which to-day bind agriculture to its place of depression and if permitted to continue will find in this country a new slavery, in which system there will be no farm ownership by those who till the soil. The tendency toward operation by tenants is developing rapidly. Those tenants will become peasantry chained to the soil by a system of privilege devised only in the interest of those great combinations of wealth which control the markets

of the United States, and eventually, if permitted to continue, will control the markets of the world.

Mr. TYDINGS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Maryland?

Mr. BLAINE. I yield.

Mr. TYDINGS. I do not want to interrupt the continuity of the line of thought in the speech the Senator is making, but I thought perhaps the chairman of the Finance Committee could give us some idea as to when we will reach a final vote on the bill.

Mr. BLAINE. I want to grant the Senator all courtesy, but I do not want to start a triangular debate here. I am almost ready to yield the floor. If the Senator has a question to ask me while I am on the floor, I shall be glad to answer it.

Mr. TYDINGS. No, I have not.

Mr. BLAINE. Then I would prefer the Senator would await an opportunity to ask the chairman of the Finance Committee his question when I shall have concluded.

Mr. TYDINGS. Very well.

Mr. BLAINE. Mr. President, I hold in my hand a copy of the issue of May 8, 1928, of the Milwaukee Journal, a newspaper published in the city of Milwaukee, Wis., which goes to many farm homes of the people of my State.

I will ask that the clerk read an editorial from this paper on the question under debate, and upon the conclusion of the reading I yield the floor.

The PRESIDING OFFICER. Without objection, the clerk will read as requested.

The Chief Clerk read the editorial, as follows:

[From the Milwaukee Journal of May 8, 1928]

BLAINE'S TARIFF PROPOSAL

Senator BLAINE's tariff bill will be chiefly useful in making clear the farmer's disability under the tariff system of subsidy for manufacture. Tariff supporters profess willingness to do as much for the farmer as for any other class. They glibly put import duties upon farm products. But they know everybody knows duties don't work the way they work on manufactures.

So Mr. BLAINE proposes a little turn about for fair play. Duties are to be remitted on imports of things the farmer uses, but only to the amount that such imports are offset by an equal amount of export of farm products. There's a way to encourage export, which is the farmer's principal need, by just the same machinery that is used to make higher prices for manufactures sold in the home market. It's not price fixing; it's not Government in business. If it is not sound, it's not going to be pleasant for tariff boosters to say it isn't. What will they say?

Well, they won't like it. It would mean that imports come in easier; it would mean some sharing of the velvet that tariffs provide. And when you begin to share things all around, the chap who's been getting the lion's share will fight. For when he says the farmer would do as well as he does if he adopted business methods, he doesn't mean the business method of getting the Government to help him.

This isn't anything Government isn't already doing. Is there any difference between this thing that BLAINE proposes and what is already being done for the millers? If they pay duty on imported Canadian wheat, they get a rebate on that duty when they export the wheat as flour. And somehow it is always the Canadian-wheat flour that they export.

No, Mr. BLAINE's bill won't get far just now. But it raises a nasty question for the "protection" crowd. They've been so anxious for equality for the farmer. Not their fault if the tariff didn't enrich him as it enriched others. Well, here's a way to make it help him a little. You may now expect to hear that the plan is "unsound" and "thoroughly vicious."

Mr. TYDINGS. Mr. President, I do not want to appear to terminate the debate on any of these questions, but there are many of us wondering when we will approach the final vote on the bill. I know the Senator from Utah is not a mind reader and can only make a guess, but I thought he would be better qualified to make the guess than anyone else. Will it be to-night or will it be this afternoon?

Mr. SMOOT. I think it would be almost useless for me to make a guess. On last Saturday night it was stated that only an hour and a half would be required for discussion and disposal of the amendment of the Senator from Missouri [Mr. REED], but when we got to it to-day it took 5 hours and 20 minutes. I will say to the Senator, however, that there are very few amendments that I know of now which are going to require very much discussion, I believe, but, of course, I can not say positively. I hope to have the Senate remain in session to-night until we pass the bill.

Mr. TYDINGS. Does the Senator think there will be a final vote on the bill to-night or this afternoon?

Mr. SMOOT. I can not say. I hope we will be able to take the final vote before midnight.

Mr. TYDINGS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	George	McLean	Shipstead
Barkley	Gerry	McMaster	Shortridge
Bingham	Glass	McNary	Simmons
Black	Greene	Mayfield	Smith
Blaine	Hale	Metcalf	Smoot
Borah	Harris	Norbeck	Stephens
Brookhart	Harrison	Norris	Swanson
Broussard	Hawes	Nye	Tydings
Capper	Hayden	Oddie	Tyson
Caraway	Howell	Overman	Vandenberg
Couzens	Johnson	Phipps	Wagner
Curtis	Kendrick	Pine	Walsh, Mass.
Dale	Keyes	Reed, Mo.	Walsh, Mont.
Deneen	King	Robinson, Ind.	Warren
Dill	La Follette	Sackett	Waterman
Edge	Locher	Schall	Watson
Fletcher	McKellar	Sheppard	Wheeler

The VICE PRESIDENT. Sixty-eight Senators having answered to their names, a quorum is present. The question is on the amendment of the Senator from Wisconsin [Mr. BLAINE].

Mr. SHIPSTEAD. I ask for the yeas and nays.

Mr. REED of Missouri. Let us have the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. KING (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. GILLETT], who is necessarily detained from the Senate. I therefore withhold my vote.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES], who is unavoidably detained from the Senate. I transfer that pair to the senior Senator from Arkansas [Mr. ROBINSON] and vote "nay."

Mr. TYDINGS (when his name was called). Upon this vote I have a pair with the senior Senator from West Virginia [Mr. NEELY]. If he were present and I were permitted to vote, I should vote "nay" and he would vote "yea."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote on this question, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. WHEELER (when his name was called). I have a general pair with the Senator from Idaho [Mr. GOODING]. Not knowing how he would vote if present, I transfer my pair to the Senator from Alabama [Mr. HEFLIN] and vote "yea."

The roll call was concluded.

Mr. McKELLAR (after having voted in the negative). I note that the Senator from Ohio [Mr. FESS] is not in the Chamber. I have a pair with that Senator, but I understand that if present he would vote as I have voted, so I will allow my vote to stand.

Mr. SMITH. I have a pair with the senior Senator from Indiana [Mr. WATSON]. In his absence, I withhold my vote.

Mr. EDGE. I have a pair with the senior Senator from New York [Mr. COPELAND]. Being unable to obtain a transfer of that pair, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. GERRY. I wish to announce that the senior Senator from Iowa [Mr. STECK] is necessarily absent. If present, he would vote "yea."

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from Washington [Mr. JONES] with the Senator from Virginia [Mr. SWANSON];

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON]; and

The Senator from Pennsylvania [Mr. REED] with the Senator from Delaware [Mr. BAYARD].

The result was announced—yeas 11, nays 52, as follows:

YEAS—11

Blaine	Howell	Mayfield	Shipstead
Brookhart	La Follette	Reed, Mo.	Wheeler
Dill	McMaster	Sheppard	

NAYS—52

Ashurst	Fletcher	Locher	Sackett
Barkley	George	McKellar	Schall
Bingham	Gerry	McLean	Shortridge
Black	Glass	McNary	Simmons
Borah	Greene	Metcalf	Smoot
Broussard	Hale	Norbeck	Stephens
Capper	Harris	Norris	Swanson
Caraway	Harrison	Nye	Vandenberg
Couzens	Hawes	Oddie	Wagner
Curtis	Hayden	Overman	Walsh, Mass.
Cutting	Johnson	Phipps	Walsh, Mont.
Dale	Kendrick	Pine	Warren
Deneen	Keyes	Robinson, Ind.	Waterman

NOT VOTING—31

Bayard	Fess	King	Steck
Blease	Frazier	Moses	Steiwer
Bratton	Gillett	Neely	Thomas
Bruce	Goff	Pittman	Trammell
Copeland	Gooding	Ransdell	Tydings
du Pont	Gould	Reed, Pa.	Tyson
Edge	Heflin	Robinson, Ark.	Watson
Edwards	Jones	Smith	

So Mr. BLAINE's amendment was rejected.

Mr. BLACK. Mr. President, I wish to say with reference to the last amendment that I favor the principle contained in the amendment; I think it has a great deal of merit in it; but I voted against the amendment because I did not want to put it onto the revenue bill.

APPOINTMENTS AND DISMISSALS IN THE CIVIL SERVICE

The VICE PRESIDENT. In accordance with Senate resolution 154, agreed to May 19, 1928, the Chair appoints the Senator from Vermont [Mr. DALE], the Senator from Oklahoma [Mr. PINE], the Senator from Iowa [Mr. BROOKHART], the Senator from Alabama [Mr. HEFLIN], and the Senator from Georgia [Mr. GEORGE] members of the committee to investigate appointments and dismissals in the civil service since July 1, 1919.

CONSTRUCTION OF BATHING POOLS IN THE DISTRICT OF COLUMBIA (S. DOC. NO. 117)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the District of Columbia, fiscal year 1928, amounting to $20,000, for completing the construction of two bathing pools authorized by law, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

ESTABLISHMENT AND ENFORCEMENT OF NONCOTTON ZONES (S. DOC. NO. 119)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation, amounting to $5,000,000, for the Department of Agriculture, fiscal year 1928, to remain available until June 30, 1929, for establishing and enforcing noncotton zones for the eradication of the pink bollworm of cotton, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

EXPENSES, PERSONNEL CLASSIFICATION BOARD (S. DOC. NO. 120)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the Personnel Classification Board, fiscal year 1928, to remain available until June 30, 1929, amounting to $75,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

PUBLIC BUILDINGS AND PARKS OF THE NATIONAL CAPITAL (S. DOC. NO. 121)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the office of Public Buildings and Public Parks of the National Capital for the fiscal year 1929, in amount $68,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATES, WAR DEPARTMENT (S. DOC. NO. 122)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting two supplemental estimates of appropriations, for the fiscal years 1928 and 1929, for the War Department, amounting in all to $185,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

ASSESSOR'S OFFICE, DISTRICT OF COLUMBIA (S. DOC. NO. 123)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the Assessor's Office, District of Columbia, fiscal years 1928 and 1929, amounting to $15,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

PETITIONS AND MEMORIALS

Mr. KING presented a petition of sundry citizens (early settlers) of Cache County, Utah, praying for the passage of the so-called King bill, being the bill (S. 719) to amend the act approved March 3, 1927, entitled "An act granting pensions to certain soldiers who served in the Indian wars from 1817 to 1898, and for other purposes," which was referred to the Committee on Pensions.

Mr. WALSH of Massachusetts presented letters in the nature of petitions from Mrs. Kendall Emerson, president Young Women's Christian Association, Worcester, Mass.; from Edith M. Kritzer, acting executive secretary International Institute, Young Women's Christian Association, St. Paul, Minn.; and from the chairman committee on legislation of the Woman's Club of Orange, N. J.; a resolution signed by the officers of the Young Women's Christian Association of Tampa, Fla.; and petitions signed by sundry members of the Young Women's Christian Association, of Philadelphia, and the Federated Churchwomen of Milwaukee County, Wis., praying for the passage of Senate Joint Resolution 122, providing for the admission to this country of families of alien declarants, which were referred to the Committee on Immigration.

He also presented letters in the nature of memorials from the following organizations in the State of Massachusetts: Faculties of Smith College, Wheaton College, and Mount Holyoke College; Zion Evangelical Lutheran Church, North Plymouth; Park Memorial Baptist Church, Springfield; Eastham Farmers' Association (Inc.), North Eastham; Mona Bina Chapter, No. 178, Order of the Eastern Star, Malden; Evening Star Lodge, No. 102, Independent Order of Odd Fellows, North Grafton; Waban Lodge, No. 156, Independent Order of Odd Fellows, West Newton; Morning Star Lodge, No. 130, Independent Order of Odd Fellows, Milbury; New England Chapter, the Quartermaster Association, Boston Women's Auxiliary, Massachusetts State Firemen's Association, Winthrop; House of Mercy Hospital, Pittsfield; Haverhill Country Club, Haverhill; and the Bay State National Bank, Lawrence, praying for the defeat of Senate bill 1752, relative to return-address envelopes, which were referred to the Committee on Post Offices and Post Roads.

TARIFF PREFERENTIALS' EFFECT UPON AMERICAN PORTS

Mr. WALSH of Massachusetts. Mr. President, on May 3, 1928, the Senate adopted Senate Resolution 220, introduced by me, providing for an investigation to be made by the Secretary of State, the Secretary of Agriculture, the United States Shipping Board, and the Interstate Commerce Commission into the diversion of commerce from ports of the United States to Canadian ports. This resolution requests that a report be made to the Senate, with recommendations, at the beginning of the next regular session of the Seventieth Congress.

I have received a letter from one of the largest ship brokers and steamship agencies in Boston which relates the experience of this company prior to and since the adoption of the Canadian law, which makes the duty on goods moving by United States ports to Canada higher than goods moving from England to Canada direct. Since this Canadian law became effective, in 1927, this company has not received a pound of business destined to Canadian points from England, even though they have the same ocean service, or better.

The letter is such a helpful contribution to the subject under inquiry that I ask to be permitted to have it printed in the CONGRESSIONAL RECORD and request that it be referred by the Secretary of the Senate to the commission created under Senate Resolution 220.

There being no objection, the letter and accompanying tables were referred to the departments set forth in Senate Resolution 220, agreed to May 7, 1928, and ordered to be printed in the RECORD, as follows:

ROGERS & WEBB,
Boston, Mass., May 19, 1928.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

MY DEAR SENATOR: We are very pleased to note the interest you have taken in requesting Congress to investigate the conditions of trade which at the present time are being forced to and from Canadian ports to the detriment of United States ports, especially Boston and Portland, Me., as we believe this is a move in the right direction; and on our part wish to assure you of our cooperation and hope you will feel free to call upon us for any information or assistance we may render.

We call to your attention the attached statement, which covers a total of 1,197 tons of cargo which moved through Boston from England

via the Oriole Line steamers, which, as you know, are American-flag steamers owned by the United States Shipping Board. This cargo was destined to Canadian points via Boston and moved in 1926 or prior to the adoption of the Canadian law, which made the duty on goods moving via United States ports to Canada higher than goods moving from England to Canada direct. During 1927, at which time this Canadian law was in effect, we did not receive a pound of business to our knowledge, via Boston or Portland, Me., destined to Canadian points from England, even though we had the same ocean service or better. This shows you the results and the consequent loss of business by reason of the Canadian restrictions.

For your further information, under date of April 24 our agents in Liverpool cabled us that they were endeavoring to obtain a shipment of cast-iron pipes destined to Winnipeg, Canada, but by reason of the fact that the duty on this pipe would be assessed at $8 per ton if it moved via Boston as against $6 per ton if it moved via Canada we were unable to obtain the business, and Boston consequently lost this shipment.

We are also attaching hereto a statement covering four specific commodities, which show the duties assessed on business moving via the United States from England as well as the same duty when it moves through Canadian ports from England. In other words, the preferential duty governs via Canada and the general duty via the United States; and it would probably happen, as you will notice, no matter how low our ocean rate was, that on account of the high duty by reason of importing through the United States we could not hope to obtain the business.

We also wish to advise you that in years past we have handled a large number of Canadian cattle shipped through Boston for export to England, but on account of a law adopted by the Canadian or English Government we no longer carry any cattle through Boston to England.

We know also you have in mind the enormous amount of business originating in the United States which is exported through Canada, which is increasing year by year to a larger figure as well as the large increase of import business moving through Canada as against the United States ports destined to cities and towns located in the United States.

Very truly yours,

ROGERS & WEBB,
ARTHUR LANE,
Manager Traffic Department.

REPORTS OF COMMITTEES

Mr. TYSON, from the Committee on Military Affairs, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 3088) for the relief of Donald M. Davidson (Rept. No. 1247);

A bill (H. R. 6049) to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments (Rept. No. 1248);

A bill (H. R. 10702) for the relief of Elbert L. Cox (Rept. No. 1249); and

A bill (H. R. 12479) authorizing the sale of all of the interest and rights of the United States of America in the Columbia Arsenal property, situated in the ninth civil district of Maury County, Tenn., and providing that the net fund be deposited in the military post construction fund (Rept. No. 1250).

Mr. TYSON also, from the Committee on Military Affairs, to which was referred the bill (H. R. 1072) for the relief of George Adams, reported adversely thereon.

Mr. DILL, from the Committee on Interstate Commerce, to which was referred the bill (S. 668) amending section 1 of the interstate commerce act, reported it without amendment and submitted a report (No. 1251) thereon.

Mr. HOWELL, from the Committee on Claims, to which was referred the bill (S. 1958) for the relief of William J. Cocke, reported it with amendments and submitted a report (No. 1252) thereon.

Mr. WALSH of Montana, from the Committee on the Judiciary, to which was referred the bill (H. R. 6687) to change the title of the United States Court of Customs Appeals, and for other purposes, reported it with amendments.

Mr. ROBINSON of Indiana, from the Committee on the Judiciary, to which was referred the bill (S. 3453) to confer jurisdiction upon the Court of Claims to hear and determine the claim of Clara Percy, reported it without amendment.

Mr. BLAINE, from the Committee on the Judiciary, to which was referred the following bills, reported them each with an amendment:

A bill (S. 3433) to amend an act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," as amended; and

A bill (H. R. 11463) to fix the salaries of certain judges of the Territories and insular possessions of the United States.

Mr. LA FOLLETTE, from the Committee on Commerce, to which were referred the following joint resolutions, reported them each with amendments and submitted a report thereon as indicated:

Joint resolution (S. J. Res. 80) authorizing an appropriation for bank protection for the control of floods and the prevention of erosion of the Missouri River at and near the town of Niobrara, in the State of Nebraska (Rept. No. 1253); and

Joint resolution (S. J. Res. 91) authorizing an appropriation for bank protection for the control of floods and the prevention of erosion of the Missouri River at and near the town of Yankton, in the State of South Dakota.

MORSE DRY DOCK & REPAIR CO.

Mr. BAYARD, from the Committee on Claims, reported a resolution (S. Res. 241), which was read, considered, and agreed to, as follows:

Resolved, That the bill (S. 4156) entitled "A bill for the relief of the Morse Dry Dock & Repair Co.," now pending in the Senate, together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims in pursuance of the provisions of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; and the said court shall proceed with the same in accordance with the provisions of such act and report to the Senate in accordance therewith.

ENROLLED BILLS PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that this day that committee presented to the President of the United States the following enrolled bills:

S. 3793. An act authorizing the St. Croix Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Croix River near Grantsburg, Wis.;

S. 4345. An act authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Kansas City, Kans.;

S. 4357. An act authorizing Henry Horsey, Winfield Scott, A. L. Ballegoin, and Frank Schee, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Des Moines River at or near Croton, Iowa; and

S. 4381. An act authorizing H. A. Rinder, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebr.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WALSH of Massachusetts:

A bill (S. 4513) for the relief of Anne K. Clark; to the Committee on Claims.

By Mr. NYE (by request):

A bill (S. 4514) to authorize the Secretary of War to purchase certain property and real estate, to protect the interests of the United States, conveyed by the Charleston Industrial Corporation, of Charleston, W. Va., in trust to secure the pay-

ment of certain indebtedness due to the United States; to the Committee on Public Lands and Surveys.

By Mr. REED of Pennsylvania:

A bill (S. 4515) to increase allowances of flying cadets of the Air Corps; and

A bill (S. 4516) to authorize an appropriation for the construction of a building for a radio and communication center at Bolling Field, D. C.; to the Committee on Military Affairs.

By Mr. McNARY:

A bill (S. 4517) appropriating tribal funds of Indians residing on the Klamath Reservation, Oreg., to pay expenses of the general council and business committee, and for other purposes; to the Committee on Indian Affairs.

By Mr. RANSDELL:

A bill (S. 4518) to establish and operate a national institute of health, to create a system of fellowships in said institute, and to authorize the Government to accept donations for use in ascertaining the cause, prevention, and cure of disease affecting human beings, and for other purposes; to the Committee on Commerce.

By Mr. SHORTRIDGE:

A bill (S. 4519) for the relief of John M. Twomey; to the Committee on Military Affairs.

By Mr. EDGE:

A bill (S. 4520) to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended; to the Committee on Public Buildings and Grounds.

By Mr. CAPPER:

A bill (S. 4521) to provide, in the interest of public health, comfort, morals, safety, and welfare, for the discontinuance of the use as dwellings of buildings situated in the alleys of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. KEYES:

A bill (S. 4522) to provide for the enlarging of the Capitol Grounds; to the Committee on Public Buildings and Grounds.

By Mr. NORBECK:

A bill (S. 4523) to provide that transferors for collection of negotiable instruments shall be preferred creditors of national banks in certain cases; to the Committee on Banking and Currency.

By Mr. STEPHENS:

A bill (S. 4524) providing for the repairing, remodeling, enlarging, improving, or altering the Federal courthouse building at Aberdeen, Miss.; to the Committee on Appropriations.

By Mr. TYDINGS:

A bill (S. 4525) to direct The Adjutant General of the Army, the Bureau of Navigation, Navy Department, the Major General Commandant United States Marine Corps, and the commandant United States Coast Guard, in certain cases to transfer the statements of World War service to the State, Territory, District of Columbia, or insular possessions of the United States wherein true legal residence is shown, and to credit the service accordingly in the record and statistics of the World War; to the Committee on Military Affairs.

By Mr. HAWES:

A bill (S. 4526) granting an increase of pension to Susannah E. Tennison (with accompanying papers); to the Committee on Pensions.

By Mr. BARKLEY:

A bill (S. 4527) to authorize an appropriation for the American group of the Interparliamentary Union; to the Committee on Foreign Relations.

By Mr. PHIPPS:

A bill (S. 4528) authorizing the Secretary of the Interior to employ engineers and economists for consultation purposes on important reclamation work; to the Committee on Irrigation and Reclamation.

By Mr. GLASS:

A bill (S. 4529) to provide for the payment from and after January 1, 1930, of indemnity to owners of condemned tuberculous and paratuberculous animals; to the Committee on Agriculture and Forestry.

By Mr. NORBECK:

A joint resolution (S. J. Res. 158) for the appointment of O. W. Coursey, of South Dakota, as member of the Board of Managers of the National Home for Disabled Volunteer Soldiers; to the Committee on Military Affairs.

By Mr. EDGE:

A joint resolution (S. J. Res. 159) to provide for the striking of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century; to the Committee on Banking and Currency.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL

Mr. SHEPPARD submitted an amendment proposing to appropriate $5,000,000 to carry into effect the authorization contained in Senate Joint Resolution 129, for eradication of the pink bollworm, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. NORBECK submitted an amendment proposing to appropriate $75,000 to carry out the purposes of an act entitled "An act creating the Mount Rushmore National Memorial Commission and defining its purposes and powers," toward the one-half cost of the memorial and landscaping to be borne by the United States, etc., intended to be proposed by him to House bill 13873, the second deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BRUCE submitted an amendment proposing to appropriate $18,547.88 to pay the Charlestown Sand & Stone Co., of Elkton, Md., for additional freight charges and the increased cost of labor and material incurred by said company in the fulfillment of the requirements of the United States engineer office under contract of August 23, 1917, etc., intended to be proposed by him to House bill 13873, the second deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

CONSTRUCTION AT MILITARY POSTS

Mr. FLETCHER submitted a concurrent resolution (S. Con. Res. 20), which was read, considered, and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That the President of the United States be, and he is hereby, requested to return to the Senate the bill (S. 3752) to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926.

PRINTING OF EVIDENCE OF THE INVESTIGATION OF PUBLIC UTILITY CORPORATIONS

Mr. WALSH of Montana submitted the following resolution (S. Res. 240), which was referred to the Committee on Printing:

Resolved, That the Committee on Printing be, and it hereby is, directed to cause to be printed 1,000 copies of the evidence taken by the Federal Trade Commission pursuant to Senate Resolution 83.

RESPONSIBILITY FOR THE WORLD WAR

Mr. SHIPSTEAD submitted the following resolution (S. Res. 242), which was referred to the Committee on Foreign Relations:

Whereas article 231 of the treaty of Versailles declares as follows: "The allied and associated powers affirm, and Germany acknowledges, that Germany and its allies are guilty of having caused all losses and damages which the allied and associated governments and their nations suffered in consequence of the war, which was forced upon them by Germany and its allies"; and

Whereas said article was founded on a judicial opinion of the Entente Commission of Fifteen, appointed by the victors on February 25, 1919, "to determine the responsibility of the war and punishment therefore"; and

Whereas the American Government was a party to said judicial opinion, which was approved and signed by its two delegates on the said commission, namely, Robert Lansing, chairman of the commission, and James Brown Scott; and

Whereas such a judgment to have had any legal or moral authority should have been pronounced by an impartial tribunal after careful study of the evidence and hearing both sides; and

Whereas since the formation of the treaty of Versailles abundance of testimony has appeared from the archives of the allied as well as the central powers, and from other sources, showing that the said article 231 was based on hysteria, hypocrisy, and falsifications "forged in the fires of war"; and

Whereas distinguished historians and statesmen of the United States, Great Britain, Canada, Italy, Russia, France, and Serbia as well as Germany and Austria, have declared that the evidence now available is sufficient to warrant a just and reasonable attitude on the part of the victors, and a reconsideration of the judgment which they allege was manifestly unjust, violative of judicial principles, and legal procedure and a grave obstacle to international understanding; and

Whereas the establishment of the facts and the truth as to the origin of the war is vital to a reconciliation of the peoples of Europe and to their moral disarmament: Therefore be it

Resolved, That the Committee on Foreign Relations of the United States Senate be, and is hereby, respectfully requested to hold an inquiry

for the purpose of determining whether in view of the new evidence and other official material, the time is appropriate for the American Government, inspired by the sense of justice and fair play, to recommend to the allied powers either to amend this article without further delay, or to announce severally their intention to disregard it.

Otherwise, to propose to the allied powers that the question of the responsibility for the World War be submitted to a commission of neutrals.

MESSENGER TO SENATOR SCHALL

Mr. ROBINSON of Indiana submitted the following resolution (S. Res. 243), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That THOMAS D. SCHALL, a Member of the Senate, whose term expires March 4, 1931, be, and he is hereby, authorized to appoint a messenger to act as personal attendant, in lieu of the page heretofore appointed, as provided by Senate Resolution 42, adopted December 17, 1927, said messenger to be paid out of the contingent fund of the Senate at the rate of $100 per month.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed a bill (H. R. 13622) to amend and supplement the Code of the Laws of the United States of America, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 13622) to amend and supplement the Code of the Laws of the United States of America, was read twice by its title and referred to the Committee on the Judiciary.

MRS. BLATCH OBJECTS

Mr. WHEELER. Mr. President, I present a letter written to the editor of the New York Times and published in that journal from Mrs. Harriot Stanton Blatch, relating to the presidential candidacy of Herbert Hoover, which I ask may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MRS. BLATCH OBJECTS—REFUSES TO LET SILENCE BE TAKEN FOR CONSENT TO HOOVER CANDIDACY

TO THE EDITOR OF THE NEW YORK TIMES:

The New York State Hoover-for-President Committee gives the widest publicity to a statement that I favor Hoover for President, and so I trust that committee will bring to my bank any communication supposedly signed by me and submit it to the scrutiny of the bank tellers.

It is true I received the committee's letter and reply postcard, but both are on their way to the nearest pulp factory. I could have answered, "I am not a Republican," but silence was as easy as golden.

As the committee has publicly picked upon me to share the Hoover burden, I must openly decline the honor and give the reason for the faith that is in me.

I am one of the many American citizens who take very seriously the oil scandals, and I regard it as an affront to the common sense and decency of the entire body politic that any group of citizens should present as suitable candidate for office a man who sat years on end in the intimacy of Cabinet meetings with men involved and remained ignorant or silent about them.

Either Mr. Hoover knew or he did not know the character of his associates. If he knew, or even suspected the truth, he should have seized the opportunity to protect the Nation he had sworn to serve, and, indeed, to protect the political party he had adopted.

But perchance Mr. Hoover had not a doubt for a single moment of any coadjutor in the Cabinet through all those years. He may have wandered in a state of Elysian innocence. Is he not, then, too guileless to take the helm of the ship of state? His place, it seems to me, is in the home, at the fireside, in the chimney corner. Let him for his own good name and our safety play with little children, not with naughty men out in the rough-and-tumble world.

The country needs for President a man of courage who will act in face of danger, but will follow a doubt, cost what that pursuit may mean to his personal ambitions, until he unearths the facts. Mr. Hoover does not measure up to our need.

And his New York committee is as subtle and modest as he in urging his candidacy. From 111 women it chose only 2 names to blazon forth—"Stanton Blatch and Galli-Curci" (the order is theirs)—as supporters. One is a well-known progressive, the other a nonpolitical opera singer. I end with ire cooled by a hearty laugh.

HARRIOT STANTON BLATCH.

NEW YORK, *March 21, 1928*.

TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

The VICE PRESIDENT. The bill is still before the Senate as in Committee of the Whole and open to amendment.

Mr. HARRISON. Mr. President, the Senator from North Carolina [Mr. SIMMONS] has quite an important amendment to offer, but, in the meanwhile, I have been requested by the Senator from Indiana [Mr. WATSON] to offer the amendment which I send to the desk. It is with reference to the tax of $6 on retail druggists in connection with the sale of narcotics. The amendment seeks to reduce the tax from $6 to $3.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 205, at the beginning of line 3, it is proposed to strike out "$6" and in lieu thereof to insert "$3."

Mr. SMOOT. Mr. President, I hope that amendment will not be agreed to.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Mississippi.

Mr. HARRISON. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. SMITH (when his name was called). I have a pair with the senior Senator from Indiana [Mr. WATSON]. In his absence I withhold my vote.

Mr. TYSON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote on this question, I withhold my vote.

Mr. WHEELER (when his name was called). I have a general pair with the junior Senator from Idaho [Mr. GOODING]. Not knowing how he would vote on this question, I transfer that pair to the Senator from Alabama [Mr. HEFLIN] and vote "yea." I understand that if the Senator from Alabama were present he would vote "yea."

The roll call was concluded.

Mr. SWANSON. Making the same announcement and transfer as on the previous roll call, I vote "yea."

Mr. KING (after having voted in the affirmative). I have a general pair with the senior Senator from Massachusetts [Mr. GILLETT]. Not knowing how he would vote on this question, I am compelled to withdraw my vote.

Mr. MCKELLAR (after having voted in the affirmative). I have a pair with the senior Senator from Ohio [Mr. FESS]. I transfer that pair to the senior Senator from West Virginia [Mr. NEELEY], and will allow my vote to stand.

Mr. EDGE. I transfer my pair with the senior Senator from New York [Mr. COPELAND] to the junior Senator from Indiana [Mr. ROBINSON], and will vote. I vote "nay."

Mr. BROUSSARD (after having voted in the affirmative). I have a general pair with the senior Senator from New Hampshire [Mr. MOSES], who happens not to have voted. I transfer that pair to the junior Senator from Oklahoma [Mr. THOMAS], and will let my vote stand.

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from Pennsylvania [Mr. REED] with the Senator from Delaware [Mr. BAYARD];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL]; and

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON].

The result was announced—yeas 42, nays 22, as follows:

YEAS—42

Ashurst	Edwards	McKellar	Shipstead
Barkley	Fletcher	McMaster	Simmons
Black	Gerry	McNary	Stephens
Blaine	Glass	Mayfield	Swanson
Borah	Harris	Norris	Tydings
Brookhart	Harrison	Nye	Wagner
Broussard	Hawes	Oddie	Walsh, Mass.
Capper	Hayden	Overman	Walsh, Mont.
Caraway	Johnson	Pine	Wheeler
Dale	La Follette	Schall	
Dill	Locher	Sheppard	

NAYS—22

Bingham	George	McLean	Smoot
Couzens	Greene	Metcalf	Vandenberg
Curtis	Hale	Phipps	Warren
Cutting	Howell	Reed, Mo.	Waterman
Deneen	Kendrick	Sackett	
Edge	Keyes	Shortridge	

NOT VOTING—30

Bayard	Copeland	Gillett	Heflin
Blease	du Pont	Goff	Jones
Bratton	Fess	Gooding	King
Bruce	Frazier	Gould	Moses

Neely	Reed, Pa.	Steck	Tyson
Norbeck	Robinson, Ark.	Steiwer	Watson
Pittman	Robinson, Ind.	Thomas	
Ransdell	Smith	Trammell	

So Mr. HARRISON'S amendment was agreed to.

Mr. REED of Missouri. Mr. President, I desire to make a statement.

I voted against the amendment just adopted largely because this association of druggists has employed a lobbyist who hangs around the Capitol, and who constantly importunes people to vote in a certain way on certain bills.

If the druggists of America are going to be represented here, I suggest that they change their lobbyist. I am a little weary of being buttonholed every time I come through the corridors by some paid agent of some organization; and I think the gentlemen engaged in that ought to be driven from the Capitol.

I recognize the fact that any industry, any organization, any man as an individual has the right to appear before any committee of this body or of the House of Representatives and present his views touching any matter of legislation; but I resent the presence in the corridors of the Capitol of men who are earning their living as professional lobbyists, and of their constant importunity of Members for their votes. So far as I am concerned, when I am in any doubt regarding any question before the Senate and I am approached by one of those gentlemen, I always vote against the request he makes.

We have had a good deal of talk about lobbyists and about what ought to be done with them, and I confess I do not know how to handle the problem; but I do say it is time for the business organizations of this country to learn that legislation is not controlled, or at least it ought not to be controlled, by the presence of these paid individuals who approach Members of Congress with reference to various bills.

Mr. SHIPSTEAD. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 205, after line 10, it is proposed to insert:

SEC. 441. Instruments of agricultural cooperative associations exempt.

Section 801 of the revenue act of 1926 is amended by striking out the period at the end thereof and inserting a semicolon and the following:

"or stocks and bonds and other certificates of indebtedness issued by any farmers' or fruit growers', or like associations organized and operated on a cooperative basis for the purposes, and subject to the conditions, prescribed in paragraph (12) of section 231."

Mr. SMOOT. Mr. President, I have no objection to accepting the amendment, although I want to say to the Senator from Minnesota that I do not know just what effect it will have as to the revenue. I think it is very small; but I am perfectly willing to accept the amendment and let it go to conference.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Minnesota.

The amendment was agreed to.

Mr. SHIPSTEAD. I offer another amendment, which I send to the desk and ask to have stated.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 244, after line 18, it is proposed to insert the following new section:

SEC. 708–A. REORGANIZATION OF INTERNAL REVENUE FIELD SERVICE.

(a) The President is authorized to reorganize the field service engaged in the administration of the internal revenue laws, in such manner as he determines necessary for the efficient administration of the internal revenue laws, and in order that there will be at least one collection district in each State. In making such reorganization the President is authorized to abolish, consolidate, or create internal-revenue districts and offices, to assign any officer or employee, if he determines him qualified, to any office created or consolidated, and to do such other things as in his judgment may be necessary to effect such reorganization.

(b) Collectors of internal revenue and all officers and employees in the field service shall, after the date of the enactment of this act, be appointed by the Secretary of the Treasury, in accordance with the civil service laws and regulations.

Mr. SHIPSTEAD. Mr. President, the effect of this amendment would be to put internal-revenue collectors under the civil service.

I think that is all the explanation that is necessary.

Mr. SMOOT. Mr. President, I will make a brief statement as to this amendment.

The amendment was considered very carefully by the Joint Committee on Internal Revenue Taxation. I hope the internal-revenue field service can be reorganized some day, but I do not believe that the reorganization should be undertaken as yet. For example, before the reorganization is undertaken, I think a thorough study of the situation should be made, and every effort made to retain in the service competent officials who were not appointed subject to civil-service regulations. The amendment would very probably deprive a large number of persons now holding office of their positions.

As to the subject matter itself, I wish to say to the Senator that I am in full accord with it, as was the Joint Committee on Internal Revenue Taxation; but I do think it ought to be left until after that examination is made, so as not to deprive the Government of the services of some of the employees, the very best ones we have in the service, who could not pass the examination provided for in the Senator's amendment.

Mr. SHIPSTEAD. May I suggest to the Senator from Utah that if this amendment becomes a law, an examination would have to be made before the change is made.

Mr. SMOOT. I am perfectly aware of that. The question is this: What the Joint Committee on Internal Revenue Taxation has been doing for some time is to make a complete survey and study of the whole situation. I recognize that when that examination has been made there ought to be legislation, and I have not any doubt but that there will be; but up to the present time that examination is not complete, and I hope the Senator will not insist upon his amendment going into the bill at this time.

The VICE PRESIDENT. The question is on the amendment of the Senator from Minnesota.

The amendment was rejected.

Mr. MCMASTER. Mr. President, on behalf of my colleague [Mr. NORBECK], I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 206, after line 2, it is proposed to insert a new section, as follows:

SEC. 441. TAX ON CALL LOANS.

Schedule A of Title VIII of the revenue act of 1926 is amended by adding at the end thereof a new subdivision to read as follows:

"8. Call loans: Drafts, checks, promissory notes, or other evidences of indebtedness, payable at sight or on demand, evidencing a loan made by any person engaged in the business of making call loans, 5 cents if the face value is not more than $100, and for each $100, or fractional part thereof, of face value, 5 cents."

Mr. SMOOT. Mr. President, I call the Senator's attention to the fact that we have already voted on that amendment.

Mr. MCMASTER. That is true. I thought the bill had come out of the Committee of the Whole and was in the Senate. I withdraw the amendment.

Mr. WAGNER. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The clerk will read the amendment.

The CHIEF CLERK. On page 195, after line 26, insert the following new section:

SEC. —. TAX ON SALE OF TICKETS BY BROKERS.

(a) Paragraph (2) of subdivision (a) of section 500 of the revenue act of 1926 is amended to read as follows:

"(2) Upon tickets or cards of admission to theaters, operas, and other places of amusement, sold at news stands, hotels, and places other than the ticket offices of such theaters, operas, or other places of amusement, at not to exceed 75 cents in excess of the sum of the established price therefor at such ticket offices plus the amount of any tax imposed under paragraph (1), a tax equivalent to 5 per cent of the amount of such excess; and if sold for more than 75 cents in excess of the sum of such established price plus the amount of any tax imposed under paragraph (1), a tax equivalent to 50 per cent of the whole amount of such excess, such taxes to be returned and paid, in the manner and subject to the interest provided in section 502, by the person selling such tickets";

(b) Subdivision (a) of this section shall take effect on the expiration of 30 days after the enactment of this act.

Mr. SMOOT. Mr. President, this is the so-called scalper tax, and I have no objection to the amendment.

Mr. REED of Missouri. I would like to inquire why the scalper is to be allowed 75 cents on tickets.

Mr. WAGNER. A ticket agency now pays a tax of 5 per cent on the excess charge over the box-office price if the excess charge is 50 cents or less. The amendment I offered provides that it shall pay a tax of 5 per cent if the price the agency charges is 75 cents in advance of the ticket-office price.

Mr. REED of Missouri. Why not make the tax one that is practically prohibitive?

Mr. WAGNER. If the ticket agency charges more than 75 cents in excess of the theater ticket-office price for the ticket, it is required to pay to the Government a 50 per cent tax on the excess; so the penalty remains in the law as to any sum charged in excess of 75 cents on a ticket.

The VICE PRESIDENT. The question is on agreeing to the amendment.

On a division, the amendment was agreed to.

Mr. SIMMONS. Mr. President, I desire to offer the following amendment.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. On page 245, after line 1, to insert:

SEC. —. LIBERTY BOND SINKING FUND.

(a) Subdivision (a) of section 6 of the Victory Liberty loan act is amended by adding at the end of the first paragraph thereof a new sentence to read as follows: "In the fiscal year beginning July 1, 1928, and in each fiscal year thereafter, payments (whether in money or in other property) received during such year from foreign governments in respect of their obligations held by the United States, and the proceeds received during such year from the sale of any such obligations, shall first be applied against the appropriation made by this section for such year, and any excess shall be applied as otherwise provided by law."

(b) This section shall take effect on July 1, 1928.

Mr. SIMMONS. Mr. President, instead of making any extended remarks, I am going to send to the desk and ask to have read a statement which I have prepared.

The VICE PRESIDENT. The clerk will read the statement.

The Chief Clerk read as follows:

SINKING FUND

The Victory Liberty loan act, March 3, 1919, established the present sinking fund. This sinking fund law went into effect July 1, 1920.

A permanent appropriation, beginning with the fiscal year ending June 30, 1921, and annually thereafter, and lasting until the entire war debt has been liquidated, was made by this act. This appropriation was made up of an amount equal to 2½ per cent of the aggregate amount of bonds and notes issued under authority of the five Liberty loan acts and outstanding July 1, 1920, less an amount equal to the par of any obligations of foreign governments then held by the United States; together with the interest that would have been paid during the fiscal year for which the appropriation is made on the bonds and notes purchased, redeemed, or paid out of the sinking fund during that year, or in previous years.

This meant as follows:

Aggregate of these bonds and notes outstanding July 1, 1920	$19,581,201,450.00
Par of foreign obligations then held by United States	9,445,006,855.18
Sinking fund base	10,136,194,594.82
Annual appropriation of principal (2½ per cent)	253,404,864.87

This amount is increased each year by the interest that would have been paid on any bonds or notes, redeemed or bought on account of this fund during the year, or in previous years.

This act was later amended by an act approved March 2, 1923, so that the securities that are to be purchased from this fund shall include the following bonds and notes thereafter issued under any of the Liberty bond acts or Victory Liberty loan act, or under any of such acts as amended, for refunding purposes.

Under the law the Treasury goes into the market and buys any of these securities at an average price, fixed by the law, at not in excess of par and accrued interest.

When this became a law it was believed that the $10,136,194,594.82 base of the fund would be liquidated by July, 1945. The probabilities are that this will be accomplished nearly a year earlier.

The expenditures on account of this fund to June 30, 1927, are as follows:

1921	$261,250,250
1922	275,996,000
1923	284,018,800
1924	295,987,350
1925	306,308,400
1926	317,091,750
1927	333,528,400
Total of above	2,074,180,950

It is impossible to compute accurately in advance the annual expenditures on account of this fund because of the different interest rates borne and the different prices paid for securities purchased on account of the fund. It will, however, not be far from an average increase at compound interest of 3⅞ per cent. Upon this basis the annual requirements of the fund may be estimated as follows:

	Annual requirement	Amount to end of year
1928	$343,481,415	$2,417,662,365
1929	356,791,318	2,774,453,683
1930	370,616,984	3,145,070,667
1931	384,978,395	3,530,049,062
1932	399,896,304	3,929,945,366
1933	$415,392,285	$4,345,337,651
1934	431,488,737	4,776,826,388
1935	448,208,924	5,225,035,312
1936	465,577,020	5,690,612,332
1937	483,618,129	6,174,230,461
1938	502,358,334	6,676,588,795
1939	521,824,718	7,198,413,513
1940	542,045,426	7,740,458,939
1941	563,049,686	8,303,508,625
1942	584,867,863	8,888,376,488
1943	607,531,492	9,495,907,980
1944	631,073,336	10,126,981,316
1945	655,527,429	10,782,508,745
1946	680,929,116	11,463,437,861
1947	708,075,335	12,171,513,196
1948	734,723,580	12,906,236,776
1949	763,194,119	13,669,430,895
1950	792,767,891	14,462,198,786
1951	823,487,649	15,285,686,435
1952	855,397,793	16,141,084,228
1953	888,544,459	17,029,628,687

The total outstanding debt as of June 30, 1927, was as follows:

Interest bearing	$18,250,943,966
Noninterest bearing	244,523,065
Matured—interest ceased	14,707,235
Total gross debt	18,510,174,266

Of the interest-bearing debt, $16,130,539,350 consists of Liberty loan bonds and notes, and in bonds and notes issued in accordance with the five Liberty loan acts, or in refunding the same.

The sinking fund will have liquidated these securities by July 1, 1952, and for the fiscal year 1953 there will be available for tax reduction an amount equal to the last full payment of $855,397,793 into the fund.

However, the annual appropriation for this sinking fund is already over a third of a billion dollars annually and is increasing at such a rapid rate that it will soon seriously inconvenience the financial policy of the Government. This annual sum now collected solely by taxing the people will soon be a half billion dollars, and then three-fourths of a billion, a sum larger than our total ordinary receipts for any year prior to our entrance into the World War, and greater than our entire ordinary receipts for the fiscal years 1860 to 1865, both inclusive. If some way could be found to enable the heavy war taxation now in force to be reduced and yet liquidate our entire war debt within the next 22 years, this country will have accomplished a feat never before witnessed in history, the liquidation of a debt of approximately $20,000,000,000 principal, and more of interest, within 31 years.

This can readily be accomplished by crediting the entire payments on account of the indebtedness of foreign governments to the United States to the sinking fund. That is, leave the total annual payment on account of the sinking fund as now provided for by law, but reduce the amount to be collected by taxation and paid into this fund by about $150,000,000 a year or more. The result would be that our war debt would still be liquidated by June 30, 1950. Then taxes could be reduced fully $150,000,000 to $175,000,000 in addition to the Treasury estimate at once, and a final reduction made for the fiscal year 1953 and thereafter of over $850,000,000 additional. That is, the passing of one generation after the close of the World War will have witnessed the liquidation of the entire war debt and the restoration of a normal tax system.

Mr. SIMMONS. Mr. President, I wrote out the statement just read to save my strength and the time of the Senate.

I want to say, briefly, that at the present time the amount raised by taxation and annually appropriated to the sinking fund is fixed by law. It amounted last year to $333,000,000; this year to over $354,000,000. There is added to the sinking fund each year the interest that may accrue upon bonds that are purchased the previous year or that have been purchased in previous years with the sinking fund so appropriated.

Each year the sinking fund grows larger and larger by reason of this accretion of interest from bonds that have been purchased. That is to say, the Government still continues to pay interest upon the bond if it is bought out of the sinking fund, either with the principal or with the interest accretions of that fund.

Our war debt at present is some $17,000,000,000. This sinking fund is provided by Congress, and the enactment of the law creating it shows that it was the judgment of Congress that this much and no more should be applied to the discharge of the debt annually.

Under the Liberty loan act and the Victory loan act, the principal of the moneys received by the Government from our foreign debtors is required to be applied to the liquidation of our war debt and the paying off of those bonds. If this

amount, together with the interest also, is applied annually to the sinking fund, it will reduce the amount of money that must be raised by taxation to the extent of the annual payment, which now amounts to something between $160,000,000 and $200,000,000, and in that way the taxpayers of the country will be relieved of that much of the burden which is now required annually to be raised for sinking-fund purposes. The result will be that in 1952 our entire war indebtedness will have been liquidated and in the next succeeding year there will be $800,000,000 that can be used for the purpose of reducing taxation.

When that time comes war taxation will be a thing of the past, and the country will go upon a normal basis of taxation, and not until then. But we will get nearer that normal basis of taxation year by year if we cover into the sinking fund, as constituting a part of the money that must be raised by taxation, this amount received upon account of our foreign debt. Of course, it may be greater that $160,000,000; it may reach $200,000,000 or more, or it may grow less; no one can tell. But the proposition is that the money which we receive upon the payment of our loans to foreign governments shall be covered into the sinking fund, and to that extent annually relieve the taxpayers of the amount which under the law they would otherwise have to pay by an annual tax levy.

Mr. SWANSON. Mr. President, will the Senator yield?

Mr. SIMMONS. Certainly.

Mr. SWANSON. As I understand the proposition, it is that we will still pay the 2½ per cent, as required, into the sinking fund less what we would get from the foreign bondholders.

Mr. SIMMONS. That is exactly what it means. I do not want to enter into a lengthy discussion of the matter. I simply want the matter to be clearly presented in the RECORD. I feel that we ought not to be forced, as we are now being forced by the administration, to pay off this indebtedness with undue rapidity. We have been liberal toward our debtors. We have given them 62 years in which to pay what they owe us. If the Treasury shall continue present practices the debts will probably be paid off in 15 or 16 years. I think that under all the circumstances it is enough to require of this generation that they be paid off in 24 years. The annual appropriation on account of this fund is growing rapidly. Last year it grew about $25,000,000. Soon it will grow to $50,000,000 a year. The annual charge is now $354,000,000. In a few years it will pass the $500,000,000 mark. Before the end it will reach $800,000,000 a year. To raise this annual sum, together with the other amounts necessary to the operation of our growing country, will soon tax to the limit the ability of our Budget. If we do not meet this condition now it is inevitable that it must be met sooner or later.

We were tremendously burdened with taxation during the war. In addition to the enormous amount of bonds we issued, we raised by taxation an immense amount in one year—about $8,000,000,000. There was a national emergency then and we had to tax our people to the limit. That emergency has passed. It no longer exists. The people who hold those bonds are not demanding payment. They really do not want payment. But, Mr. President, contemporaneously with the passage of that national emergency calling for those high taxes which we imposed during the war and which we are pro tanto imposing still, there has grown up in the country an emergency with reference to taxation equal to that which confronted the United States during the period of the war.

The States, the counties, the municipalities, and all the subdivisions of the States have been forced to levy upon their people enormous taxation, not for the purpose of raising money to be uselessly and unprofitably expended. Those large sums have not been wastefully expended. They have been wisely expended. They have been expended because of the necessity of a situation, a situation created by modern conditions and inventions.

Millions of dollars have been issued in bonds by the various States for the purposes of education. Thousands of new schools have been built, necessitating thousands of trained teachers. The automobile, one of the greatest blessings to humanity in the last 50 or more years, could not be operated upon the old dirt roads. It was necessary to have hard-surfaced roads and to construct them at great cost. My State alone has issued over $100,000,000 in bonds for road construction. It has issued, for the improvement of our educational facilities, bonds in a very large sum, amounting in all probability to about $185,000,000 since the war. These heavy debts which the State has incurred are probably equaled by the indebtedness which the counties and municipalities have incurred. Probably the latter have been forced to incur even heavier indebtedness than the States. The result is that the taxes imposed upon the people by the States and the minor political subdivisions thereof for these necessary conveniences to take advantage of modern conditions have created a tax-emergency condition in the country at large equally as great as that which rested upon the Federal Government during the war. With these conditions in the States, it is not right that the Federal Government should levy upon the people any more taxes than are absolutely necessary to meet its just obligations. It will be entirely consistent with our history, consistent with our practices with reference to bond issues, if we shall postpone the total extinguishment of this debt for a few years.

I do not expect the proposal to prevail, but I have introduced the amendment hoping that we might get some support from the other side of the Chamber, but hoping, I am afraid, in vain. However, I have introduced it in order to call it to the attention of the country—the farmers, the bankers, the manufacturers, the financiers, and the commercial interests of the country—in order that they may give it serious consideration and instruct their representatives in Congress at some time in the near future to so adjust the law that the sinking fund, provided by the Congress for the payment of this debt, shall alone be used for that purpose, that other moneys coming into the Treasury shall be used for tax-reduction purposes.

The VICE PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from North Carolina.

Mr. HARRISON. I call for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. KING (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. GILLETT]. Not knowing how he would vote, if present, I withhold my vote. If permitted to vote I should vote "yea."

Mr. REED of Pennsylvania (when his name was called). I have a general pair with the Senator from Delaware [Mr. BAYARD]. I transfer that pair to the Senator from South Dakota [Mr. NORBECK], and vote "nay."

Mr. SMITH (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. I transfer that pair to the Senator from West Virginia [Mr. NEELY], and vote "yea."

Mr. SWANSON (when his name was called). I transfer my pair with the senior Senator from Washington [Mr. JONES] to the Senator from Iowa [Mr. STECK], and vote "yea."

Mr. TYSON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote on this question, I withhold my vote. If permitted to vote I should vote "yea."

Mr. WHEELER (when his name was called). Making the same announcement as previously as to my pair with the Senator from Idaho [Mr. GOODING] and its transfer, I vote "yea."

The roll call was concluded.

Mr. BINGHAM. I have a general pair with the junior Senator from Wyoming [Mr. KENDRICK]. Not knowing how he would vote, if present, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. EDGE (when his name was called). I transfer my pair with the Senator from New York [Mr. COPELAND] to the Senator from Idaho [Mr. BORAH], and vote "nay."

Mr. McMASTER. I wish to announce that my colleague the Senator from South Dakota [Mr. NORBECK] is unavoidably detained from the Senate. If present, he would vote "nay."

Mr. TYSON. I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Missouri [Mr. REED], and vote "yea."

Mr. KING. I announced a moment ago that I have a general pair with the senior Senator from Massachusetts [Mr. GILLETT]. I transfer that pair to the Senator from Arizona [Mr. HAYDEN], and vote "yea."

Mr. TYSON (after having voted in the affirmative). I see that the Senator from Missouri [Mr. REED], with whom I announced a pair, has now entered the Chamber, and I therefore withdraw my vote.

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON];

The Senator from Massachusetts [Mr. GILLETT] with the Senator from Utah [Mr. KING];

The Senator from New Jersey [Mr. EDGE] with the Senator from New York [Mr. COPELAND]; and

The Senator from Indiana [Mr. ROBINSON] with the Senator from Maryland [Mr. TYDINGS].

The result was announced—yeas 30, nays 36, as follows:

YEAS—30

Ashurst	Gerry	Overman	Thomas
Barkley	Glass	Pittman	Tyson
Black	Harris	Robinson, Ark.	Wagner
Broussard	Harrison	Sheppard	Walsh, Mass.
Caraway	Hawes	Simmons	Walsh, Mont.
Edwards	Locher	Smith	Wheeler
Fletcher	McKellar	Stephens	
George	Mayfield	Swanson	

NAYS—36

Blaine	Edge	McMaster	Reed, Pa.
Brookhart	Fess	McNary	Sackett
Capper	Greene	Metcalf	Schall
Couzens	Hale	Moses	Shipstead
Curtis	Howell	Norris	Shortridge
Cutting	Johnson	Nye	Smoot
Dale	Keyes	Oddie	Vandenberg
Deneen	La Follette	Phipps	Warren
Dill	McLean	Pine	Waterman

NOT VOTING—28

Bayard	du Pont	Heflin	Reed, Mo.
Bingham	Frazier	Jones	Robinson, Ind.
Blease	Gillett	Kendrick	Steck
Borah	Goff	King	Steiwer
Bratton	Gooding	Neely	Trammell
Bruce	Gould	Norbeck	Tydings
Copeland	Hayden	Ransdell	Watson

So Mr. SIMMONS's amendment was rejected.

Mr. ROBINSON of Arkansas. Mr. President, on behalf of myself and my colleague the junior Senator from Arkansas [Mr. CARAWAY], I propose an amendment relating to deductions on account of charitable gifts, and I call the attention of the Senator from Utah [Mr. SMOOT] to it.

Mr. EDGE. Let the amendment be stated.

The VICE PRESIDENT. The amendment proposed by the Senator from Arkansas will be stated.

The CHIEF CLERK. On page 27, line 7, after the word "individual," it is proposed to insert:

Provided, That the provisions of this subdivision shall be retroactively applied in computing income under the provisions of the revenue act of 1921.

Mr. SMOOT. I have no objection to the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ROBINSON of Arkansas. I ask leave to have inserted in the RECORD a letter addressed to me in full explanation of the amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 5, 1928.

Hon. JOE T. ROBINSON,
Senate Office Building, Washington, D. C.

DEAR SENATOR: A short time prior to his death Mr. William Buchanan, who died here in October, 1923, conveyed to trustees $1,000,000, to be known as the William Buchanan Foundation, to be used exclusively for charitable purposes. The trust instrument contains a provision inviting others to contribute to the trust fund.

After Mr. Buchanan's death and during the year 1923, his son, Mr. W. J. Buchanan, contributed $50,000 to the foundation and contributed a like sum in 1924. The 1921 act, in effect during the year 1923, provides:

"Section 214(a). In computing net income there shall be allowed as deductions:

"(11) Contributions or gifts made within the taxable year to or for the use of: (A) The United States, any State, Territory, or any political subdivision thereof, or the District of Columbia, for exclusively public purposes; (B) any corporation or community-chest fund or foundation organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, including posts of the American Legion or of the woman's auxiliary units thereof, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private stockholder or individual."

The revenue act of 1924 made a slight change in section 214, paragraph (10), subdivision (B) by inserting the words "or trust" after the word "corporation," so that it reads:

"Section 214 (A) in computing net income there shall be allowed as deductions:

"(10) Contributions or gifts made within the taxable year to or for the use of—

"(B) Any corporation or trust or community chest fund or foundation organized exclusively for religious, charitable, and other purposes."

The Bureau of Internal Revenue is now contending that since the contributions of $50,000 made by Mr. W. J. Buchanan during the year 1923 comes under the 1921 law, which does not authorize the deduction of contributions to any trust organized for religious and charitable purposes, that he can not deduct this sum from his income. The tax on the $50,000 is considerable, due to the fact that he is in rather high brackets. The bureau admits that the contribution of $50,000 made in 1924 is allowable as a deduction from income since the 1924 act authorizing contributions to charitable trusts such as the one created by Mr. William Buchanan.

In this situation I am wondering whether or not there is any possibility of having the Senate insert a provision in the revenue bill now pending before it that will relieve Mr. Buchanan from the payment of the tax on this contribution. Subdivision (2) of paragraph N of section 23 shown at the bottom of page 22 and the top of page 23 of the bill as it passed the House is identical with the 1924 law. I believe the controversy can be ended by inserting a proviso in this subdivision (2) so that it will read as follows:

"(2) Any corporation or trust or community chest fund or foundation organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, no part of the net earning of which inures to the benefit of any private shareholder or individual: *Provided*, The provisions of this subdivision 2 shall be retroactively applied in computing income under the provisions of the revenue act of 1921."

It seems to me that if the Senate committee understands the situation, it will readily agree to insert the provision I have indicated. It is apparent that a failure to insert the word "trust" after "corporation" in the 1921 act was an oversight. Certainly it was the intention of Congress to allow such contributions as deductions from income.

As it is my understanding that the Senate Finance Committee does not purpose to hold any public hearings, if you think proper I shall be very glad if you will hand this letter to Senator SMOOT for his consideration. If permissible or necessary, I should like to appear before the committee and explain the situation further.

Any assistance you may render will be greatly appreciated by both Mr. Buchanan and myself.

Sincerely yours,

A. L. BURFORD.

The VICE PRESIDENT. If there be no further amendments to be proposed, the bill will be reported to the Senate.

Mr. REED of Pennsylvania. Mr. President, before the bill goes out of the Committee of the Whole, I propose the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 243, after line 5, it is proposed to insert the following, as a new section:

SEC. —. DEFINITION OF THE TERM "MOTOR BOAT."

The term "motor boat," when used in the revenue laws, includes a yacht or pleasure boat, regardless of length or tonnage, owned by a resident of the United States or brought into the United States for sale or charter to a resident thereof, whether or not such yacht or boat is brought into the United States under its own power, but does not include an instrumentality of trade or commerce nor any such yacht or boat built, or for the building of which a contract was entered into, prior to December 1, 1927.

Mr. SMOOT. Mr. President, I have no objection to that amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. McMASTER. Mr. President, I should like to inquire of the Senator from Pennsylvania if this is a tariff amendment?

Mr. REED of Pennsylvania. Mr. President, I do not know whether it can be fairly called a tariff amendment or not, but it ought to be considered by the conferees in connection with the repeal of the tax on foreign-built yachts.

There is in the House bill an annual license tax on foreign-built yachts which, because of certain complications under the treaty with Germany, was stricken out by the Finance Committee. If it is to be stricken out, and if the present decision of the Supreme Court is to stand, that a yacht which enters our waters under its own power is not an article of commerce but an instrumentality of commerce, then, the conferees ought to be free somehow to define the term "instrumentality of commerce." In that sense, I presume it is fair to call the amendment a tariff amendment, but what we are trying to do is to accomplish the end on which we all agree, to continue the tax on foreign-built yachts and still not violate the treaty with Germany.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Pennsylvania.

The amendment was agreed to.

Mr. BARKLEY. Mr. President, a few days ago, while I was in attendance upon a special committee of the Senate, the provision in section 412 came up for consideration, and the Senator from Pennsylvania [Mr. REED], as I understand, offered an amendment to raise the exemption on club dues from $10 to $25.

The understanding at that time was that I might offer an amendment to that section, if I desired to do so.

Mr. REED of Pennsylvania. Mr. President, I think the Senator is mistaken when he says that I offered such an amendment.

Mr. BROOKHART. Mr. President, I will say that I offered that amendment on behalf of the Senator from North Dakota [Mr. FRAZIER].

Mr. BARKLEY. I beg pardon. I was informed that the Senator from Pennsylvania had offered it. At any rate, the exemption was raised from $10 to $25. I desire to offer an amendment to substitute $50 as the exemption instead of $25, which at that time was agreed to. I do not desire to discuss the amendment.

Mr. SMOOT. Mr. President, the adoption of that amendment will reduce the revenue by several million dollars.

The VICE PRESIDENT. Without objection, the vote by which the amendment on page 196, in line 9, striking out "$10" and inserting "$25" was agreed to will be reconsidered. The amendment of the Senator from Kentucky will be stated.

The CHIEF CLERK. On page 196, line 9, after the words "excess of," it is proposed to strike out "$10" and insert "$50."

The VICE PRESIDENT. The question is on agreeing to the amendment. [Putting the question.] The Chair is in doubt.

Mr. BARKLEY. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. BINGHAM (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. KENDRICK]. Not knowing how he would vote, I withhold my vote.

Mr. SMITH (when his name was called). Announcing my pair as before, I withhold my vote.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. Not knowing how he would vote, I withhold my vote.

Mr. TYSON (when his name was called). I have a pair with the Senator from West Virginia [Mr. GOFF]. I transfer that pair to the senior Senator from New York [Mr. COPELAND], and will vote. I vote "yea."

Mr. WHEELER (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. KING. I have a general pair with the senior Senator from Massachusetts [Mr. GILLETT]. I transfer that pair to the senior Senator from West Virginia [Mr. NEELY], and will vote. I vote "yea."

Mr. REED of Pennsylvania (after having voted in the negative). I have a general pair with the Senator from Delaware [Mr. BAYARD]. I transfer that pair to the Senator from Idaho [Mr. BORAH], and will allow my vote to stand.

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON]; and

The Senator from Indiana [Mr. ROBINSON] with the Senator from Maryland [Mr. TYDINGS].

The result was announced—yeas 29, nays 38, as follows:

YEAS—29

Ashurst	Glass	McKellar	Tyson
Barkley	Harris	Mayfield	Wagner
Black	Harrison	Overman	Walsh, Mass.
Broussard	Hawes	Reed, Mo.	Walsh, Mont.
Dill	Hayden	Robinson, Ark.	Wheeler
Edwards	Kendrick	Sheppard	
Fletcher	King	Simmons	
Gerry	Locher	Thomas	

NAYS—38

Bingham	Edge	McMaster	Reed, Pa.
Blaine	Fess	McNary	Sackett
Brookhart	George	Metcalf	Schall
Capper	Greene	Moses	Shortridge
Caraway	Hale	Norbeck	Smoot
Curtis	Howell	Norris	Stephens
Couzens	Johnson	Nye	Vandenberg
Cutting	Keyes	Oddie	Waterman
Dale	La Follette	Phipps	
Deneen	McLean	Pine	

NOT VOTING—27

Bayard	Bratton	du Pont	Goff
Blease	Bruce	Frazier	Gooding
Borah	Copeland	Gillett	Gould
Heflin	Ransdell	Steck	Tydings
Jones	Robinson, Ind.	Steiwer	Warren
Neely	Shipstead	Swanson	Watson
Pittman	Smith	Trammell	

So Mr. BARKLEY's amendment was rejected.

The VICE PRESIDENT. The question recurs on the original amendment.

The amendment was agreed to.

Mr. SMOOT. Mr. President, I reserve the right for a vote when the bill reaches the Senate on the graduated tax on small corporations.

I ask unanimous consent that when the graduated tax on small corporations is acted upon in the Senate, if it is approved by the Senate, I may offer an amendment to it in the Senate, first as to foreign corporations, which under the law are taxable only on their gross income from sources within the United States; second, corporations entitled to the benefit of section 251, which corporations are also taxable only on their gross income from sources within the United States; and, third, corporations organized under the China trade act of 1922, which receive special privileges under the law. If, however, the amendment of the Senator from North Carolina is rejected, I shall not have to offer these amendments.

Mr. HARRISON. Mr. President, I ask unanimous consent also that if the Senate should reverse its action when the bill gets into the Senate I be permitted to offer an amendment which I have here.

The VICE PRESIDENT. Without objection, both requests are granted.

Mr. SMOOT. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 243, after line 5, it is proposed to insert:

SEC. —. REMISSION OR MITIGATION OF PENALTIES.

The provisions of law applicable to the remission or mitigation by the Secretary of the Treasury of forfeitures under the customs laws shall apply to forfeitures incurred or alleged to have been incurred, before or after the enactment of this act, under the internal revenue laws.

Mr. REED of Missouri. What does that mean?

Mr. LA FOLLETTE. Will the Senator explain that?

Mr. SMOOT. Yes; I will explain it in a very few words.

Sections 5292 and 5293 of the Revised Statutes formerly provided for the remission or mitigation of fines, penalties, or forfeitures under the customs, navigation, or internal revenue laws. These sections were superseded, so far as the customs and navigation laws were concerned, by certain administrative provisions of the tariff act of 1922, and sections 5292 and 5293 were thereupon repealed. The repeal, however, inadvertently deprived the Secretary of the Treasury of the power to remit or mitigate fines, penalties, or forfeitures incurred under the internal revenue laws, for such fines, penalties, or forfeitures were not covered by the new administrative provisions of the tariff act of 1922.

The effect of the proposed section is to make these new administrative provisions of the tariff act of 1922 applicable to the remission or mitigation of forfeitures under the internal revenue laws as well as under the customs and navigation laws. There was just one word left out. It was a mistake in the law.

Mr. SHIPSTEAD. Mr. President, may I ask the Senator from Utah a question?

Mr. SMOOT. Yes.

Mr. SHIPSTEAD. Is this a perfecting amendment to the tariff act of 1922?

Mr. SMOOT. No; it is an amendment to the internal revenue law that affected the tariff act of 1922.

Mr. SHIPSTEAD. Then it is tariff legislation?

Mr. SMOOT. No; it is not tariff legislation. The amendment to the revenue law, which is sections 5292 and 5293, covers both, I will say to the Senator; and this simply corrects the error made in the former act by which forfeitures were left out.

Mr. SHIPSTEAD. The Senator's conscience is perfectly clear, then, that this is not improper to put on a revenue bill because it refers to the tariff?

Mr. SMOOT. This has nothing to do with the tariff.

Mr. REED of Missouri. Mr. President, as I understand, this is a provision to enable the Secretary of the Treasury or his subordinates to roam at large and make reductions where they want to, play favorites where they see fit, and refuse to do it in other cases.

Mr. SMOOT. No; the Senator is mistaken.

Mr. REED of Missouri. That is about all there is to it. Of course it will go through.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. Mr. President, I send to the desk an amendment which is purely clerical.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 228, line 20, after the word "begun," it is proposed to strike out the remainder of the line and all of line 21, and in lieu thereof to insert the following:

before the expiration of two years after the making of such refund, or before May 1, 1928, whichever date is later.

Mr. LA FOLLETTE. I ask for an explanation of that amendment.

Mr. SMOOT. This amendment is necessary in order that suits already pending shall not be barred by the provisions now in the bill.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. Mr. President, I ask unanimous consent that the vote be reconsidered by which the committee amendment inserting lines 4 to 20, both inclusive, on page 215 was agreed to, and ask that the amendment be rejected.

The VICE PRESIDENT. Is there objection?

Mr. SMOOT. That is the amendment which refers to claims for refund for 1917–1921.

The VICE PRESIDENT. Is there objection?

Mr. FLETCHER. There is quite an amendment there that was agreed to.

Mr. McKELLAR. Mr. President, what is this about refunds?

Mr. SIMMONS. The Senator had better explain it.

Mr. SMOOT. This amendment opened up the statute where waivers were filed prior to January 1, 1928. It is a clerical error, I will say to the Senator.

Mr. FLETCHER. What is a clerical error? There is quite an amendment on that page. Does the Senator mean the whole thing?

Mr. SMOOT. Yes. We strike out the provision in regard to claims for refund for 1917–1921.

Mr. FLETCHER. You strike out section 508?

Mr. SMOOT. Section 508.

Mr. McKELLAR. Mr. President, may I ask whether that is an attempt to change the Supreme Court decision?

Mr. SMOOT. Not at all.

Mr. McKELLAR. It has nothing to do with that?

Mr. SMOOT. No.

Mr. McKELLAR. There is nothing of that sort in this bill?

Mr. SMOOT. No. That was stricken out.

Mr. REED of Missouri. What is it?

Mr. KING. I ask to have the amendment stated again.

The VICE PRESIDENT. The Secretary will restate the amendment.

The CHIEF CLERK. On page 215 the following was inserted:

SEC. 508. CLAIMS FOR REFUND FOR 1917–1921.

Section 284 of the revenue act of 1926 is amended by adding at the end thereof a new subdivision to read as follows:

"(i) If the taxpayer has prior to January 1, 1928, filed a valid and enforceable waiver of his right to have the income, war-profits or excess-profits taxes for the taxable years 1917, 1918, 1919, or 1920 determined and assessed within five years after the return was filed, or filed a valid and enforceable waiver of his right to have such taxes for the taxable year 1921 determined and assessed within four years after the return was filed, then such credit or refund relating to the taxes for the year in respect of which the waiver was filed shall be allowed or made if claim therefor is filed at any time prior to 90 days before the expiration of such waiver, or at any time before the expiration of one year after the waiver was filed, whichever date is earlier."

Mr. NORRIS. Is that a clerical error?

Mr. COUZENS. I ask the chairman of the committee to explain it; because, as I remember, there was some difficulty in getting the committee to agree to this amendment in the first place. Now, as I understand, the chairman does not want the committee amendment agreed to.

Mr. SMOOT. I will say to the Senator that this is the amendment about which there was a difference of opinion in the committee; and it was allowed to go into the bill, I think, just before we reported the bill for further consideration on the part of the experts. Now, the experts recommend that the amendment be rejected.

Mr. LA FOLLETTE. On what ground?

Mr. SMOOT. On the ground that a waiver should not open up a statute of limitations.

Mr. COUZENS. It opens up the statute against the taxpayer, but not against the Government? Is that the idea?

Mr. McKELLAR. That is what will be done if this amendment is stricken out. This is in the interest of the taxpayer, as I understand. If it is, it ought to remain in the bill.

Mr. COUZENS. No; that is not correct.

Mr. NORRIS. What is the object of a waiver, if it is not to obviate the statute of limitations?

Mr. McKELLAR. You would think that is the purpose of it. It ought not to be required unless it is.

Mr. COUZENS. As I understand, the provision that the committee put in recognized waivers in favor of both parties. Now, as I understand, the Senator wants that provision repealed, so that the waiver may not apply to both parties. In other words, if the taxpayer has filed a waiver to permit the Government to assess a tax or readjust an income tax, the Government has the right; but, if this is repealed, I understand that the taxpayer has not an equal right with the Government. That is my understanding.

Mr. SMOOT. From what I understand, a great many very improper waivers have been filed, and that was the basis of asking for this.

Mr. McKELLAR. The waivers were filed at the request of the Government. It was not done because the taxpayers wanted to do it, but because the Government insisted upon their doing it. By striking this out you want to take away the right that they have under the waiver. I do not think it ought to be changed. I think we ought to vote down any change here.

Mr. SMOOT. I will say to the Senator that they never had the right.

Mr. McKELLAR. This gives them the right, at any rate, and I do not think it ought to be done.

Mr. SMOOT. Let it be voted on.

Mr. NORRIS. Mr. President, I do not want to vote on this until I understand it. I am not satisfied with the explanation the Senator has made.

Mr. FLETCHER. The committee does not seem to understand it, either.

Mr. NORRIS. It looks this way to me: A taxpayer signs a waiver. The object of having him sign that waiver is to avoid the statute of limitations running in favor of the taxpayer against the Government. In other words, if he did not sign a waiver it would be necessary for the Government, in order to prevent the statute of limitations from running, to commence suit, to take action. If he does not sign a waiver at the request of the Government—and he does not sign it unless he is requested, of course—and there should be claims each way, in other words, if the statute, except for the waiver, would run against him, it ought also to be fair to run against the Government. If the object of striking out this provision is to permit a waiver to operate as against one of the parties and not against the other, then we ought not to strike it out.

Mr. McKELLAR. As I understand it, the Government under certain circumstances requires a waiver or they will put an arbitrary assessment against the taxpayer.

Mr. NORRIS. Of course.

Mr. McKELLAR. And therefore the taxpayer is forced to make the waiver.

Mr. NORRIS. The taxpayer is not forced to make the waiver; it is up to him to do it, and if he does not do it, the Government can take the necessary action. I am not finding fault with that. Sometimes it saves costs, and so on, and if both sides want to do the fair thing, there is no objection. But when a taxpayer signs a waiver and thus divests himself of the right to take advantage of the statute of limitations, the Government should not then be able to say in the same transaction, on other items, "This can not be allowed because the statute of limitations has run." What is sauce for the goose ought to be sauce for the gander.

Mr. SMOOT. I withdraw the amendment.

Mr. GLASS. Mr. President, two years ago an amendment was offered to the then pending tax bill to require that the amount of income taxes imposed by this title should be assessed within two years after the return was filed. Theretofore the requirement had been four years. It was proposed by the senior Senator from South Carolina [Mr. SMITH] to reduce the requirement to two years and thereafter acquit the taxpayer of his obligation to the Government within two years after filing his return. In other words, the Government could not go back more than two years upon a taxpayer after he had filed his return.

I had occasion to speak upon the proposition at the time, and urged the adoption of the amendment. It appealed to the judgment of the Senate to such an extent that the Senator from

Utah himself finally accepted the amendment, but when he went into conference he immediately yielded to the House conferees and then made the period three years.

I call attention to the fact that the exemptions from income tax altogether have grown progressively greater, and that if a proposition of that sort appealed to the Senate two years ago, it certainly should appeal to the chairman of the committee and to the Senate now. Therefore, I desire to move that on page 177, line 18, under the "General rule," we change the word "three" to "two" so as to read:

(a) General rule: The amount of income taxes imposed by this title shall be assessed within two years after the return was filed, and no proceeding in court without assessment for the collection of such taxes shall be begun after the expiration of such period.

Mr. SMOOT. Mr. President, the Senator's statement is absolutely correct. When we went into conference the House provision was four years and the Senate provision two years. We compromised on three years, just as the Senator has said. As far as I am concerned, I am perfectly willing to accept the amendment, and let it go to conference.

Mr. GLASS. I hope the Senator will stand for it in conference.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. FLETCHER. Mr. President, the Senate has decided to continue in effect the Federal estate law. Under the existing provision 20 per cent is for revenue and 80 per cent for coercion. I want to have inserted in the RECORD an article appearing in the Washington Times of May 10, 1928, which explains how this was brought about.

The VICE PRESIDENT. Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Times, Thursday, May 10, 1928]

INSURGENTS TO SUPPORT COOLIDGE TAX-CUT PLAN—INSURGENT TAX-CUT DEAL AIDS G. O. P. BILL

(By International News Service)

The insurgent bloc of the Senate has entered a "gentleman's agreement" to support every provision of the administration's $203,000,000 tax reduction bill in return for a pledge that the Federal estate tax will be retained, International News Service learned to-day.

The agreement will enable the administration to secure Senate approval of its own bill and defeat the Democratic plan for a $336,000,000 tax slash.

DEMOCRATS COLD

The agreement was entered only after the Democrats refused to make a similar alliance with the insurgents, according to a spokesman for the bloc. The insurgents, he added, even offered to support the Democrats on an amendment revising tariff rates, but the proposal was rejected.

The administration-insurgent alliance was negotiated by Senator JAMES COUZENS (Republican), of Michigan, the spokesman said. By this action COUZENS thus assured the Senate approval of a tax cut within the $212,000,000 limit fixed by his arch enemy, Secretary of the Treasury Andrew W. Mellon, while at the same time insuring defeat of Mellon's pet proposal for repeal of the estate tax.

The alliance was necessary to the administration plan, as the Senate now lines up with 47 Republicans, 46 Democrats, and 1 Farmer-Laborite. The insurgents swing from 10 to 14 votes at all times.

Mr. REED of Pennsylvania. Mr. President, I give notice that when the bill is in the Senate I will ask for a record vote on the amendment, which was defeated without a record vote Saturday, imposing upon stock fire-insurance companies the same obligations to pay income tax on capital gains as is imposed by the present law on mutual fire-insurance companies.

The VICE PRESIDENT. The amendment will have to be reoffered in the Senate.

Mr. REED of Pennsylvania. Yes, Mr. President; I understand. I expect again to offer that amendment. I shall not offer any amendment dealing with the tax on life-insurance companies, because that was decisively settled against me by a record vote of the Senate, but I doubt whether all of the Senate understood that a result of the action of the other day was to impose upon fire-insurance companies with a capital stock less taxation and a different and easier method of taxation than is imposed upon fire-insurance companies that are wholly mutual and owned by their policyholders. I do not believe that was the intention of the Senate, and therefore I will present the question again when the bill is in the Senate.

Mr. MCMASTER. Mr. President, I also desire to announce that the amendment which I offered on behalf of my colleague [Mr. NORBECK] for a tax on promissory notes in connection with brokers' loans, I desire to bring up in the Senate when the bill reaches the Senate. It was defeated without a record vote, and I shall ask when the bill reaches the Senate for a record vote upon it.

The VICE PRESIDENT. If there be no further amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate as amended.

The VICE PRESIDENT. The question is on concurring in the amendments made as in Committee of the Whole except those upon which separate votes are requested.

The amendments were concurred in.

Mr. SIMMONS. Mr. President, before the bill passes I want to congratulate the other side of the Chamber upon the fidelity with which the regulars and the progressives have carried out the contract and covenant by which it was agreed that they would support the committee amendments proposed by the majority and oppose those proposed by the minority. They have kept faith, the one with the other, and they are entitled, both the regulars and the progressives, to be congratulated upon the fact that they have stood by their contract.

Mr. SHIPSTEAD. Mr. President, on behalf of some Senators who were not here Saturday I ask unanimous consent that when the bill is reported to the Senate we may have a record vote on the agricultural amendment on which we voted last Saturday. Several Senators told me they were not here and would like to go on record upon the amendment.

The VICE PRESIDENT. It will be necessary to offer the amendment again in the Senate.

Mr. SHIPSTEAD. I intend to offer it.

The VICE PRESIDENT. The Secretary will state the first amendment on which a separate vote is desired.

The CHIEF CLERK. The first amendment reserved was that agreed to on the motion of the Senator from North Carolina [Mr. SIMMONS], on page 15, line 21, after "section 26," to insert a semicolon and the following:

but the tax under this subsection shall not exceed $1,350, plus the amount by which the net income in excess of such credits exceeds $15,000.

And in lieu of the provision stricken out by the committee, in the following words:

(b) Taxable income not more than $15,000: If the amount of the net income in excess of the credits provided in section 26 is not more the $15,000, then, in lieu of the rate prescribed in subsection (a), the rate shall be—

(1) Five per cent if such amount is not more than $7,000;

(2) Seven per cent if such amount is more than $7,000 and not more than $12,000;

(3) Nine per cent if such amount is more than $12,000, and not more than $15,000.

To insert in lieu:

(b) Taxable income not more than $15,000. If the amount of the net income in excess of the credits provided in section 26 is not more than $15,000, then in lieu of the rate prescribed in subsection (a) the rate shall be—

(1) Five per cent if such amount is not more than $7,000;

(2) Seven per cent if such amount is more than $7,000 and not more than $12,000; but the tax under this paragraph shall not exceed $350 plus the amount by which the net income in excess of such credits exceeds $7,000;

(3) Nine per cent if the amount of the net income in excess of the credits provided by section 26 is more than $12,000, and not more than $15,000; but the tax under this paragraph shall not exceed $840 plus the amount by which the net income in excess of such credits exceeds $12,000.

Mr. SMOOT. Mr. President, it is true that the Senate voted when the bill was in the Committee of the Whole a graduated corporation tax, but I thought it was a mistake then, and I am quite sure now it was a mistake, and I am going to ask the Senate for a separate vote upon that amendment.

Mr. SIMMONS. I understand that is the only vote the Senator has reserved?

The VICE PRESIDENT. The Senator from Nebraska has reserved a vote.

Mr. SMOOT. I want to call the attention of the Senate to just what that graduated tax will mean.

Mr. SIMMONS. I want to say to the Senator from Utah that we thoroughly discussed this matter while the bill was in Committee of the Whole, and I am perfectly willing that there should be another vote. If the Senator thinks that the vote then taken did not express the sentiment of the Senate, I am perfecly willing that there should be another vote without any further discussion.

Mr. SMOOT. I wanted to say merely a few words.

Mr. SIMMONS. That will just open up discussion of the matter. If the Senator is willing to take a vote, let us have a vote; we all understand the matter.

Mr. SMOOT. Mr. President, it will take but a few minutes.

Mr. SIMMONS. There will have to be a reply, and we will be held here. We have discussed this matter. The Senate understands what is involved. It is a mere question of whether the corporation-income tax should be graduated up to $25,000. We have discussed it thoroughly and I think everybody understands it. I am perfectly willing that we shall now vote without further discussion.

Mr. REED of Pennsylvania. Mr. President, no matter what agreement the Senator from Utah makes about this, I am going to talk for 5 or 10 minutes about it.

Mr. SIMMONS. I do not object to the Senator talking as long as he wants to, as far as that is concerned, but I suggested that probably we might vote upon this without further debate. The Senator from Utah has intimated that certain Senators probably were not here, or did not properly understand the matter. I suppose that by this time they are here and have been advised as to what it means. I think everybody is ready to vote.

Mr. SHORTRIDGE. Will the Senator from Utah state the proposition?

Mr. SMOOT. Just a moment.

Mr. HARRISON. Mr. President, the Senator from Utah knows that some of us have not discussed certain amendments, thinking perhaps we would get through with the bill before now. Everybody thoroughly understands the corporation-tax proposition. If the Senator discusses it, it is going to call for a reply, and we will go on and on and never get through with the bill.

Mr. SMOOT. There are some questions on this amendment that I really did not understand myself.

Mr. HARRISON. That is the reason why the Senator voted wrong.

Mr. SMOOT. The Senator may say that, but I am quite sure that there are some Senators on both sides of the Chamber who did not understand it.

Mr. SWANSON. Mr. President, I ask unanimous consent that all discussion on any amendment now offered to the bill, of any kind or character, shall be limited to five minutes.

Mr. COUZENS. I object.

Mr. SWANSON. I will make it 10 minutes.

The VICE PRESIDENT. Is there objection?

Mr. REED of Pennsylvania. May we have the request stated?

Mr. SWANSON. That all speeches on any amendment now pending or reserved shall be limited to 10 minutes.

Mr. CARAWAY. One Senator might occupy the entire 10 minutes.

Mr. SWANSON. No; I mean that each Senator shall be limited to 10 minutes. The procedure of the Senate under its rules enables us to delay business, because all bills and amendments are considered as in Committee of the Whole, requiring the same quorum and the same conditions and the same speeches. Then within a minute or five minutes we go into the Senate with the same quorum, the same conditions, and the same speeches to be made again. I serve notice that I am going to offer a rule to abolish this theory, so I will not have to sit here and listen to the same speeches a dozen times before we can vote.

Mr. SMOOT. I would like to have the Senator submit the request again for a five-minute limitation.

Mr. COUZENS. If the Senator from Virginia will explain in five minutes the graduated tax in comparison with the favors now received by small corporations, I would like to listen to his explanation, because I do not understand it.

Mr. SWANSON. Whether I understand it or not, I heard all the debate and I do not want to hear that debate over and over again. There has got to be a limitation to debate. The House decides without debate and we debate without deciding. There ought to be some harmony reached between the two bodies. I ask unanimous consent that no Senator shall speak longer than 10 minutes.

Mr. SMOOT. Make it five minutes.

Mr. REED of Pennsylvania. I object.

Mr. SWANSON. Ten minutes, then.

Mr. COUZENS. I object.

Mr. SWANSON. I will make it 15 minutes.

Mr. COUZENS. I object. The Senator will have to raise his bid.

The VICE PRESIDENT. Is there objection to the unanimous-consent request?

Mr. COUZENS. I object.

The VICE PRESIDENT. Objection is made. The Senator from Utah has the floor.

Mr. SMOOT. Mr. President, if the graduated tax on corporations as provided in the amendment of the Senator from North Carolina is agreed to, it simply means that all holding companies will be virtually relieved of taxation.

Mr. McMASTER. Will the Senator state that again?

Mr. SMOOT. All holding companies will be virtually relieved of taxation. For instance, here on the chart is shown a holding company. The instances shown on the chart are actual instances. Company No. 101 had a gross income of $140,249; expenses, $14,431; net profits, $125,818; dividends received—that is, the holding company receives the dividends—$115,865, making a net income of $9,953. The tax for 1926 was $1,074, and under the amendment of the Senator from North Carolina it would $348.

Take another actual case of holding company No. 105: Gross income, $1,669,134; expenses, $5,060; net profits, $1,664,074; dividends received, $1,660,710. The net income would be $3,364. The tax in 1926 was $184, and under the amendment proposed by the Senator from North Carolina would be $18. So I could go on down the list with nearly all the holding companies in the United States.

Under the amendment of the Senator from North Carolina this would be the curve [indicating on chart]. In other words, it would begin at the normal rate and run up to $10,000, then over $10,000 to $150,000 it would be the exact rate. Then it goes over; then it goes up; then it goes over again and up again. That is what the graduated tax means. It also means that each chain store in the United States could make an individual return, and all of the thousands and thousands of chain stores would fall under the 5 per cent bracket.

Mr. McMASTER. The statement is made that all of the chain stores of the country would supposedly incorporate and not have individual returns.

Mr. SMOOT. Yes.

Mr. McMASTER. Under the bill, as I understand it at the present time, they have an exemption of $3,000.

Mr. SMOOT. That is correct.

Mr. McMASTER. If these small chain stores have an annual income of, say, $5,000 apiece on the average, what is there to prevent them from incorporating at the present time and having an exemption of $3,000 and saving 60 per cent of all their taxation under the provision which the Senator has in the bill at the present time?

Mr. SMOOT. That can not be helped.

Mr. McMASTER. I am simply asking for information. What would prevent the chain stores from incorporating to-day under the bill as it is proposed to be passed, and under that incorporation save 60 per cent of all their taxes?

Mr. REED of Pennsylvania. There is nothing to prevent them from doing it. The trouble with the amendment we are now discussing is that it would make matters worse, because it would reduce the tax to 5 per cent on the $2,000, or the taxable income. In other words, it would bring the tax down to $100 on such a store, whereas under our plan the tax would be $250.

Mr. SWANSON. Mr. President, a point of order.

The VICE PRESIDENT. The Senator will state the point of order.

Mr. SWANSON. The Senator from Utah promised to talk not longer than five minutes, and the five minutes are up.

Mr. SMOOT. Very well; I will not say another word.

Mr. REED of Missouri. Mr. President, there is no point of order in the suggestion, because the statement of the Senator from Utah can not establish a rule of the Senate. I am looking at the figures on the chart on the wall, and would like to ask in good faith for some information. Is it true that a holding company can have a net profit of $1,664,000 and only pay $3,364 of tax?

Mr. SMOOT. Yes; because it is a holding company.

Mr. REED of Pennsylvania. It is worse than that, because the tax of the holding company under the present law is only $184, and the amendment submitted by the Senator from North Carolina would cut it down to $18.

Mr. REED of Missouri. Why do we not tax the holding company more?

Mr. SMOOT. Because of the fact that all the dividends have already been taxed 12½ per cent. The holding company holds that stock.

Mr. REED of Pennsylvania. Each of the subsidiary companies pays its tax on its earnings out of which these dividends are declared, so that that does not represent the entire tax which is realized from that group of companies.

Mr. President, I am only going to take a moment or two, but I do think it is important that the Senate should realize the burden of what is proposed to be done here. The amendment of the Senator from North Carolina proposes that if the earnings of a corporation are less than $7,000, then the tax on its whole taxable income shall be at the rate of 5 per cent. If its

earnings, however, should be more than $7,000 and less than $12,000, then the tax on all its earnings shall be at the rate of 7 per cent. That means that while a corporation with $6,900 income will pay 5 per cent on its taxable income, a corporation with, say, $7,500 income, a little bit the other side of the dividing line, will pay 7 per cent on its whole taxable income, which is a new principle in taxation for the United States. Always before we have taxed everybody the same amount on the first bracket of their income. The Senator will understand that if the amendment prevails, the tax on the first $7,000 of one's income will depend entirely on whether one has an additional income or not. That occasions the peculiar staggered lines on the diagram on the wall, which illustrates the tax rates in effect on the various incomes.

In order that the Senate may see that clearly, if the total income is $10,000—$3,000 exemption plus $7,000 taxable—then the tax rate is 3½ per cent on the aggregate of $10,000; in other words, $350. But should the corporation earn a couple of hundred dollars more, then its tax rate on its whole income immediately jumps practically to 5 per cent as a penalty for its earning a couple hundred dollars more.

One effect of that is going to be, as the Senator from Utah [Mr. SMOOT] pointed out, that wherever it is possible to resort to holding companies in order that the subsidiaries may pay the tax and exempt the parent it will be done. I can think of no more vivid illustration than the case of the oil companies which have their gasoline distributing stations scattered all over the country. A company can be incorporated in Delaware for something less than $200. That much is received in tax at each station, and if the plan of the Senator from North Carolina prevails——

Mr. McMASTER. Mr. President——

The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from South Dakota?

Mr. REED of Pennsylvania. I yield.

Mr. McMASTER. I am asking for information. Take all the little filling stations, thousands and thousands of them throughout the land, does the Senator claim that they can be incorporated as separate companies?

Mr. REED of Pennsylvania. Absolutely.

Mr. McMASTER. And so they can under the bill as the Senator proposes to give it to us, exempting $3,000 of their income. Everyone of those companies can be incorporated, and probably a large per cent of them could save 100 per cent of their tax.

Mr. SMOOT. They do not get any advantage whatever. They have to pay the 12½ per cent tax.

Mr. McMASTER. But if one company owns a thousand filling stations, it makes a vast difference whether that whole income is taxed or whether it incorporates those filling stations into separate companies, as they could do, or, as I understand it, as the Senator claims the tendency would be to do. Then why can they not do it to-day and save 100 per cent of their tax? I mean under the bill as the Senator proposes to have it passed, if it is the tendency of the companies to do that, why can they not do it after the bill is passed?

Mr. SMOOT. Because there is not enough to gain by it.

Mr. McMASTER. If the filling stations earn $3,000 a year, then they can incorporate separately and save the tax on that whole income of $3,000, which would be a saving of 100 per cent of their total tax.

Mr. REED of Pennsylvania. If filling stations did not earn more than $3,000 a year, they would close them up. They would not incorporate if that were their income.

Mr. SACKETT. Mr. President, may I ask the Senator from Pennsylvania what the tax would amount to on $3,000?

Mr. REED of Pennsylvania. The income tax on an income of $3,000?

Mr. SACKETT. Yes, if it was paid on the $3,000.

Mr. REED of Pennsylvania. It would be 12½ per cent, or $375.

Mr. SACKETT. It would cost nearly that much apiece to incorporate the companies and distribute that amount, and that is the reason probably why they have not done it.

Mr. McMASTER. If their income is only $6,000 or $7,000 a year, there would be no tendency to incorporate. How much more of a saving would they make on a $6,000 income?

Mr. SACKETT. It would be twice that amount.

Mr. McMASTER. No; not that, because it is not proposed to allow a 50 per cent exemption under the pending amendment. If 7 per cent of their taxes is exempted, under the $3,000 exemption they can incorporate and save a hundred per cent of their taxes.

Mr. SACKETT. They have not done it; that is the point.

Mr. McMASTER. They will not do it for a saving of $370 a year. Will they do if you add 7 per cent to that amount?

Mr. SACKETT. Probably; I think they will.

SEVERAL SENATORS. Vote!

Mr. SIMMONS. Mr. President——

Mr. REED of Pennsylvania. Mr. President, I have not finished; I have not surrendered the floor.

Mr. SIMMONS. I supposed by the calls for a vote that the Senator had finished.

Mr. REED of Pennsylvania; No; it was not I that called for a vote; it was Senators who do not desire to listen.

Let us take a typical case; that is the quickest way to settle the point raised by the Senator from South Dakota. Take a chain store or a filling station or some similar subsidiary and assume that it earns $10,000, under the bill as it comes from the Finance Committee the first $3,000 is exempt and the next $7,000 is taxed at 12½ per cent; that means a tax on $7,000 of income at 12½ per cent, or $875. That would be the tax if the bill should be passed as reported by the Finance Committee. If, however, the amendment of the Senator from North Carolina shall go into effect, here is what the tax will be: The first $3,000 is exempt, and as the income does not exceed $10,000, it is subject only to a tax of 5 per cent, and all that is taxable is the remainder over the $3,000 exemption; in other words, the tax will be $350 under the amendment of the Senator from North Carolina against $875 under the bill as reported by the Finance Committee. That is the difference. The Senator from South Dakota gets his answer there. That is the difference in the inducement—the difference between a tax of $875 and a tax of $350. It would not pay to incorporate.

Mr. McMASTER. No, Mr. President; that is not the difference in the inducement because they have a flat inducement of $375 to begin with. So the Senator must deduct that in making his calculations. What I mean is, for example, that chain stores have an exemption of $3,000 in paying their taxes if they incorporate. That makes $375 saving to begin with under the bill as reported; so that $375 must be deducted from the amount which the Senator has mentioned.

Mr. REED of Pennsylvania. That is right. Now I will show the Senate just what that means. If at the present time under the Finance Committee's bill each United Cigar Store shop were incorporated, and each Standard Oil filing station and each chain grocery store, they would save $375 as against an affiliated or consolidated return for the enterprise as a whole. There would be a saving of $375 per shop per year. Is that agreed?

Mr. McMASTER. That is agreed.

Mr. REED of Pennsylvania. Very well. If, on the other hand, the amendment of the Senator from North Carolina——

Mr. SWANSON. Mr. President, if the Senator will permit me, as I understand it, it is not the amendment of the Senator from North Carolina. It is the provision of the House bill as proposed to be amended. It is the House provision modified slightly.

Mr. SIMMONS. Let me explain.

Mr. REED of Pennsylvania. Mr. President, is there any profit in that? The House had this provision in its bill.

Mr. SWANSON. I wanted the Senate to understand that this provision was included practically in the bill as it passed the House of Representatives.

Mr. SIMMONS. Mr. President, I hope the Senator from Pennsylvania will allow me to state the facts about it.

Mr. REED of Pennsylvania. Certainly; I yield to the Senator from North Carolina.

Mr. SIMMONS. As the House passed the bill it provided for a graduated tax on the incomes of corporations whose earnings did not exceed $15,000. In the consideration of the Committee on Finance, Mr. Mills, representing the Treasury Department, insisted that the House provision was not just in that a corporation that had an income of $15,000 would have to pay a tax of 9 per cent, while a corporation that had an income of $15,001 would have to pay at the rate of 12½ per cent. He insisted that that injustice should be remedied. That was his only argument against the House provision. I recognize the force of that objection, as did other members of the committee recognize its force, and I referred it to the experts to try to reframe the House provision so as to keep the exact rates of the House bill, but to provide against this sudden increase from 9 per cent to 12½ per cent. They framed an amendment which they said carried out that idea with justice and equity.

I submitted that amendment to the chairman of the committee, and I understood that the chairman of the committee recognized that the changes made in the House bill by the experts accomplished the purpose of bringing about that equity to which Mr. Mills insisted the taxpayer was entitled.

Mr. SMOOT. The Senator's amendment is a better amendment than the House provision.

Mr. SIMMONS. The Senator says my amendment is better than the House provision. It is a better provision because it corrects a certain inequity that Mr. Mills pointed out; but, with the exception of that correction, my amendment is the same as the provision adopted by the House.

Mr. SMOOT. It proposes the same rates.

Mr. SIMMONS. It carries exactly the same rates.

Mr. REED of Pennsylvania. What are we quarreling about now, Mr. President?

Mr. SIMMONS. I wish merely to say in conclusion, and then I shall have nothing more to say about the matter, that one may take the surtax rates and figure out exactly the same results that the Senator contends were figured out in this case.

If certain combinations are permitted there are brought about inequities. If such combinations are not permitted then there are no inequities. The only question involved here is, Shall a corporation that receives an income of only $15,000 be entitled to a graduated rate; whether that income shall be realized by a holding company or by a corporation which is not a holding company, shall it be required to pay the full 12½ per cent or shall that corporation, whether it be a holding corporation or otherwise, be entitled to a lower rate, a graduated rate, instead of a flat rate? That is the only question that is involved in this controversy. Any scheme of taxation, whether it be that of an individual taxpayer or a corporate taxpayer, can be manipulated so as to show a great inequity. The question, however, in the last analysis, is the same with reference to corporations as it is with reference to individuals. We provide that an individual whose income is only $10,000 shall not pay the high rate that is paid by a man whose income is $100,000; and that a man whose income is $90,000 shall not pay the same rate as does a man whose income is a million dollars. That is all this amendment means, and nothing more.

Mr. COUZENS. Mr. President, will the Senator from North Carolina yield to me for a moment?

Mr. REED of Pennsylvania. I think it is I who have that privilege.

Mr. SIMMONS. Probably I have trespassed too long on the time of the Senator from Pennsylvania.

Mr. REED of Pennsylvania. I am glad to yield to the Senator from North Carolina at any time.

Mr. SIMMONS. I do not wish to say anything more, and I had not meant to say that much, because the Senator from Mississippi [Mr. HARRISON] has given very much more study to this question than have I. He is probably better informed about it than am I, and probably better able to explain the case.

Mr. REED of Pennsylvania. Mr. President, seriously I can explain this amendment in a very few minutes, if the Senate will permit me to do so.

Mr. SIMMONS. The Senator from Pennsylvania was trying to intimate that I had submitted an amendment here that brought about certain inequities; but I tell him that it is the same amendment that was before the Finance Committee, and Mr. Mills, representing the Secretary of the Treasury, appeared there and he did not criticise the House amendment in any respect, except in the particulars which I have recounted and which I have attempted to remedy and have remedied, as I understand, to the satisfaction of the chairman of the committee.

Mr. SMOOT. Oh, no, Mr. President.

Mr. REED of Pennsylvania. I beg the Senate to let me say just a word. The Senator from North Carolina did offer this amendment, and I have offended him by calling it the amendment of Senator SIMMONS. Now he disowns it, and I am glad and agree that it came from nowhere.

Mr. SIMMONS. I want to say that I would have voted for the House provision which the committee struck out but for the fact that it was suggested by Mr. Mills that the rates ought to be readjusted so as to bring about equity with reference to the taxpayers.

Mr. REED of Pennsylvania. I will take the blame for the amendment, if nobody else will do so.

Mr. SIMMONS. It is the House provision with an attempt to amend it so as to overcome an objection by the representative of the Treasury Department.

Mr. REED of Pennsylvania. Yes, Mr. President; that is all understood.

Mr. SIMMONS. That is all there is to it. It is the House provision slightly modified.

Mr. BINGHAM. Mr. President, will the Senator from Pennsylvania yield to me for a moment?

Mr. REED of Pennsylvania. I yield.

Mr. BINGHAM. I move that the Senate recess until 8.30 to give every Senator an opportunity to get something to eat.

Mr. SMOOT. No; let us finish the bill.

The VICE PRESIDENT. The question is on the motion of the Senator from Connecticut that the Senate take a recess until half past 8 o'clock.

The motion was rejected.

Mr. REED of Pennsylvania. Mr. President, what the Senate wants to know, if it is interested at all in this matter, is what this amendment is and what its effect, if adopted, will be. I grant all that has been said by the Senator from North Carolina [Mr. SIMMONS] about the advantage of lower tax rates on those whose incomes are smaller; Congress has determined that over and over again in our fixing taxes on individual incomes; but, Mr. President, if the taxpayer is able to go to the State capital of Delaware or the capital of any other State and create a lot of subsidiaries and divide his income among them, as if he went to a State capital and got a hundred children at once, and divided his income among the hundred children in order to obtain the advantage of the lower rates, I do not think we would all be so strongly in favor of that graduation of the rates on individual incomes.

Mr. SIMMONS. Mr. President, may I ask the Senator a question?

Mr. REED of Pennsylvania. Yes, Mr. President.

Mr. SIMMONS. Can not an individual taxpayer, by distributing his property among his children, accomplish the same result?

Mr. REED of Pennsylvania. He can; but not if his children pay it over to him as soon as they get it; and that is what subsidiary corporations do.

It will not take five minutes to explain this if one has a chance.

That is the whole vice of the thing, Mr. President. We are all in sympathy with the shopkeeper or the owner of the small business who wants for proper reasons to incorporate; and we are all of us ready enough to give him some advantage in taxation. The trouble with this amendment, however, is that it gives so great an advantage that the reward for doing so will be taken advantage of by all the big corporations who have these scattered stations, scattered shops, scattered chain stores, scattered distributing stations.

Now, let me show the Senator from South Dakota what I tried to show three-quarters of an hour ago—just what the comparative advantage is under the Finance Committee's bill and under the amendment that came from somewhere, which is now in the bill by the action of the Committee of the Whole. The Senator will readily agree with these figures.

If there were no exemption at all allowed, and if the Finance Committee's 12½ per cent rate went into effect, the tax on $10,000 income would be $1,250. That is what the rate would be if there were no exemptions whatever. The bill as it comes from the Finance Committee permits a deduction of $3,000 before calculating the taxable income. In other words, the tax imposed by the bill now before the Senate as it came from the Finance Committee was 12½ per cent on $7,000, or $875. That is to say, if the bill were to pass as the Finance Committee reported it out, there would be an advantage of $375 in incorporating one's subsidiaries. But the amendment that we are now discussing would make the tax on that $10,000 corporation only $350, so that the advantage by incorporating your subsidiaries would be $900 per year per station or per shop or per subsidiary.

Mr. McMASTER. That is, less $360.

Mr. REED of Pennsylvania. No; I beg the Senator's pardon.

Mr. McMASTER. Well, the Senator made a dogmatic statement there. The temptation now, of course, is to save that $900, less $360?

Mr. REED of Pennsylvania. Yes, Mr. President; that is what I tried to explain. Under the Finance Committee's bill you deduct your $3,000, and the tax is 12½ per cent on the remaining $7,000. That is $875; so that the saving by incorporating your subsidiaries is the difference between $875 and $1,250.

Mr. McMASTER. I dislike to annoy the Senator——

Mr. REED of Pennsylvania. The Senator does not annoy me in the least; I just want to get it right.

Mr. McMASTER. But the saving is, as the Senator says, $875 if they incorporate under the amendment as proposed by the Senator from North Carolina.

Mr. REED of Pennsylvania. No; it is $900.

Mr. McMASTER. Well, $900. That would be the saving?

Mr. REED of Pennsylvania. That would be their saving under his amendment.

Mr. McMASTER. Yes; if they incorporated. If this amendment was not agreed to, then their saving would be $375.

Mr. REED of Pennsylvania. Three hundred and seventy-five dollars.

Mr. McMASTER. Therefore there is between four and five hundred dollars of a temptation for them to incorporate. That is the idea I am trying to get across. Is that true or not?

Mr. REED of Pennsylvania. It is more than that. You more than double the temptation. The temptation now is to save $375 per shop. The temptation under this amendment would be $900 per shop, a difference of $525.

Mr. McMASTER. May I ask another question for information?

Mr. REED of Pennsylvania. Surely.

Mr. McMASTER. Granting that the statements made by the Senator from Pennsylvania are true, and granting——

Mr. REED of Pennsylvania. If they are not, let us correct them now, because I am sure they are.

Mr. McMASTER. Well, granting that they are—I do not know; I am not so sure; I think the Senator has generalized a good deal. I do not know that each chain store earns $10,000. I think that out in the rural districts they have many stores that earn a good deal less than that. I think there are certain stores of that nature that if they were incorporaed to-day under the law as proposed by the committee would save 100 per cent of their taxes. In certain instances I think that is true; but, nevertheless, outside of that, granting that every statement made by the Senator from Pennsylvania is true——

Mr. REED of Pennsylvania. They are all intended to be true. The Senator will certainly concede that.

Mr. McMASTER. But the Senator was conveying the idea that the earnings would average $10,000 or more for every little country store that might be incorporated. Outside of that, however, granting that those statements are true, I want to ask this question:

Suppose there was a tendency on the part of chain stores and other great institutions that operate these separate units by the thousands throughout the country to incorporate to avoid their taxes. Is it not possible to attach some amendment here to reach that sort of evasion? For example, if the stock of a great chain store is sold on the stock exchange, how will it incorporate as small stores—through the holding company?

Mr. REED of Pennsylvania. Easily.

Mr. McMASTER. May I ask the Senator as a lawyer, then, is there not some remedy to reach that sort of an evasion of taxes, and could it not be incorporated into the law?

Mr. REED of Pennsylvania. The remedy is not to make it worth their while to do it.

Let me illustrate to the Senator how this process occurs. It is perfectly simple.

The United Cigar Stores Co., we will suppose, owns a shop down here on the corner of Pennsylvania Avenue. It has leased that by the parent company, and the parent company pays the salaries and operates the shop. If we adopt this amendment, the United Cigar Stores Co. will at once incorporate a subsidiary. We will call it the Pennsylvania Avenue Cigar Store. The United Cigar Stores Co. will own all the stock except the qualifying shares. It will get all the earnings, all the dividends. It will manage the whole thing. The store will be as much a subsidiary as a corporation possibly can be, and yet it will become the taxpayer on the profits of that shop, and whatever dividends it pays to the parent United Cigar Stores Co. will be wholly free of tax in the hands of the latter, because of the fact that they have paid the corporation tax in the subsidiary. That is the way they will work it. I have seen it happen hundreds of times.

The same thing will be true with these gasoline stations; and when I suggested $10,000 as typical earnings, I do not know whether that is typical, or whether it ought to be $5,000 or $25,000, but the same principle applies right through. No matter what hypothesis you start on, you get a similar result.

Mr. FLETCHER. They still have an exemption of $3,000 under the Simmons amendment?

Mr. REED of Pennsylvania. Yes, Mr. President; the exemption remains the same under the Simmons amendment.

Mr. FLETCHER. So in all these branches, if their earnings do not exceed $3,000 net, there would be no advantage in incorporating?

Mr. REED of Pennsylvania. Oh, not a bit.

Take the little country shop whose earnings are $3,000 or less: There is no advantage under either amendment in incorporating. They are wholly tax free under either the Democratic amendment or the House amendment, whatever we want to call it, or under the bill as it comes from the Finance Committee. We are not helping the little fellow whose earnings are less than $3,000 any more by one measure than by the other, because both of them exempt him entirely.

I have nothing but the highest credit to pay to the motives of those Senators who have advocated this amendment. I know that they do it in all sincerity, to help the smaller, struggling corporations. My opposition to it comes not from any disagreement with that motive, but because of a feeling of absolute certainty that this well-intentioned amendment, if adopted, will be so shockingly abused that we will lose millions of dollars of taxes in the next couple of years, and will be forced to repeal it in the next Congress.

Mr. HARRISON. Mr. President, may I ask the Senator why the Actuary of the Treasury Department estimates a loss of $24,000,000, and yet the Senator thinks it will be millions on millions more?

Mr. REED of Pennsylvania. I do, Mr. President. I see no difficulty whatever in adjusting the affairs of every oil company, of every chain-store company, including these tobacco companies, and so fixing the intercompany prices that the profits of each subsidiary will be at the most profitable point, which is just about $10,000 per year. It is no trick at all to adjust the intercompany transactions so as to yield the particular profit that you want.

Mr. SIMMONS. Mr. President, may I suggest to the Senator that in all tax legislation we have had since the war began we have provided for these graduations with reference to the lower incomes. We provide it with reference to the surtax. We provide it with reference to the normal tax. I know that there are cases with reference to the individual income tax where persons with sinister motives have probably devised schemes by which the Treasury has been looted and deprived of its just revenues. I do not think the case of the corporate income tax presents any different situation from that which obtains with reference to the normal tax and the surtax of individuals. The Senator knows as well as I know that there are certain individuals who have so manipulated their affairs that they have been able to bring about a situation which was adverse to the payment of the just taxes that otherwise might be imposed upon them.

Mr. Rockefeller may have an income of a billion dollars a year; I do not know; but if he will divide his property among his children or among his friends he may reduce the tax that he would have to pay upon that billion dollars to a third or a fourth, even, of the amount of taxes he otherwise would have to pay. Is not the infirmity that the Senator has pointed out here to-day absolutely inherent in the system of taxation to which we have resorted and which we have provided with reference to individual taxes and to corporation taxes as well?

Is there not a striking analogy between our attempt to relieve those small corporations with small incomes and our attempt to relieve the individual taxpayers with small incomes from surtaxes and from normal taxes? And have there not been abuses such as the Senator is attempting to show here in the administration of the normal tax and the surtax on individuals, as well as the Senator is now trying to show that there are and will be with reference to the administration of the privilege that we have given to the small corporations in this amendment?

Mr. REED of Pennsylvania. Yes, Mr. President. The whole history of our tax legislation has been a battle of wits, an effort on the part of Congress to cope with these cases of legal evasion of taxes that Congress intended to impose. This seems to me to be a step backward in that way.

I have spoken in this way only because of a conviction that this well-intentioned exemption which the amendment plans would be taken advantage of by people whom we do not intend to benefit, and I believe it would be so much taken advantage of that we would be sorry we had passed it.

Mr. GLASS. Mr. President, may I ask the Senator from Pennsylvania if, aside from this particular amendment, he conceives it to be possible to adopt a graduated tax on corporations, just as we have adopted a graduated tax on individuals? Are the difficulties insuperable?

Mr. REED of Pennsylvania. Of course, it is possible, as a matter of draftsmanship, to do it, but I do not believe in the wisdom of it. I think it is wholly unjust to tax a corporation by the size of its income, and it will work out results that we do not mean.

The holder of one share of stock of the Pennsylvania Railroad, whose dividend on it is only $7 a year, is certainly as deserving as is the holder of all the stock of a corporation that makes $25,000 a year. Why we should give favors to one and not the other I do not see.

Mr. GLASS. Why should we do that as to individuals?

Mr. REED of Pennsylvania. That is the difference. The people we want to benefit are the individuals who are interested. We do not care about the corporation. We want the man of small income—the man, not the corporation—to get the advantage of our liberality.

Mr. GLASS. Corporations are made up of individuals.

Mr. REED of Pennsylvania. Of course, and we forget that when we treat them as entities for matters of taxation. Take the woman who has one share of Pennsylvania Railroad stock. We want to help her, certainly, as much as we want to help the man who owns all of the corporation that makes $25,000 a year; but we are working against her interest when we tax the Pennsylvania Railroad at a higher rate than we tax the other corporation. That is the trouble with graduated taxes on corporations.

Mr. GEORGE obtained the floor.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMOOT. I want to make a few remarks while the Senator from North Carolina is here. It will take me just a moment.

Mr. GEORGE. I yield.

Mr. SMOOT. The Senator is quite mistaken when he says that Mr. Ogden Mills favored a graduated tax.

Mr. SIMMONS. I did not state that.

Mr. REED of Pennsylvania. Mr. Mills has no vote. We are the people who have to carry the responsibility.

Mr. SMOOT. He was speaking for the Treasury Department.

Mr. SIMMONS. I did not understand Mr. Mills as favoring the graduated tax up to $15,000, but I did understand Mr. Mills as criticizing the fact that there would be a sudden jump which ought to be remedied if we should adopt that graduated scale.

Mr. SMOOT. This is what he said——

Mr. SIMMONS. I have no objection to the Senator reading what Mr. Mills said, but I know what he said. I know he opposed a graduated corporation income tax, but he pointed out that there were certain inequities and injustices in the rate. I sought to preserve the House provision and to remedy the inequities which Mr. Mills pointed out. That is all there is in that.

Mr. SMOOT. For the RECORD I just want to read this:

> The Treasury also desires to go on record as opposing the introduction of the principle of a graduated tax in the corporation field as provided for in the House bill. There is no sound justification for graduating the rate of tax on corporation income in accordance with the size of the income. We do so in the case of individuals because the incomes of individuals, generally speaking, are a fair measure of their ability to pay taxes. This, however, is not true of corporations unless there be taken into consideration the factor of capital invested in the business. There is no reason why if I invest a thousand dollars in a million-dollar corporation which only earns a 5 per cent profit the fruits of my investment should be reduced by 13½ per cent before I receive them, while if I invest the same thousand dollars in a fifty-thousand-dollar corporation, which earns a 20 per cent profit, the income is to be reduced by not more than 5, 7, or 9 per cent. The adoption of the principle of graduated taxes applied to corporations will inevitably lead back to the excess-profits tax which, impossible of administration, and generally discredited, was repealed in 1921.

Mr. SIMMONS. I want to say that when we proposed to graduate the normal tax on individuals the Treasury Department opposed that.

Mr. SMOOT. The very first bill we had contained provision for a graduated normal tax, and there never has been a proposition to change that graduation.

Mr. GEORGE. Mr. President, the Senator from Utah has read the argument of the Treasury Department, of Mr. Mills particularly, against the graduation of the tax on small corporations. It is a fact, is it not, that the Treasury Department recommended to the Ways and Means Committee only last fall that small corporations be given the right in certain circumstances to make returns as copartners rather than as corporations?

Mr. SMOOT. That, of course, would be quite different from the graduated tax.

Mr. GEORGE. That is true, is it not?

Mr. SMOOT. I think they did recommend that.

Mr. GEORGE. Yes.

Mr. SMOOT. Providing their income was less than a certain amount.

Mr. GEORGE. Without otherwise characterizing the argument advanced by the Treasury Department, I will say that it is worth little here. The argument advanced is that the large corporation may earn a small profit on its invested capital and the small corporation a large profit on its capital, and the Senator says that the principle of graduation as applied to corporations is without the slightest justification. If that is true, then the Treasury was entirely wrong when the department came to the Ways and Means Committee of the House and said that under certain circumstances a small corporation should be allowed to pay its income tax on the basis of a copartnership, and under the law applicable to a copartnership.

If the recommendation had been followed, corporations with incomes of $15,000 and less might have been given a rate of 2½ or 3 per cent, as against the rate of 12½ per cent in the Senate bill. You can not make any distinction in favor of the small corporations without recognizing basically the justice and equity of graduating the tax on the small corporations. When we let them make returns and pay as copartners they will pay at a much lower rate than 5 and 7 and 9 per cent on an income of $15,000 and less.

Mr. President, the small corporation is, in fact, in the majority of cases, nothing more than a copartnership, in that the energy, enterprise, and initiative of the men who own it and operate it constitute its chief asset, or at least an important asset. The income of the small corporation in equity may be considered as the income of a copartnership, because the individual element in the management and control of the corporation enters to so large an extent. The Treasury Department properly recognized that circumstance in proposing to the Ways and Means Committee of the House a provision permitting the option to the small corporation to make its return either as a copartnership or as a corporation.

The Senator from Pennsylvania has in effect said that if this amendment is agreed to, the large corporations—for instance, the large corporations owning chain stores—will split themselves up, so to speak, into small corporations in every town and in every village and city in which they operate.

Mr. President, it does not seem to me that that would result. That would be against the whole economic drift of the present time. But if it should result I submit that it might not be a serious matter, because, perhaps, we could then better handle those large combinations of capital disturbing us at this particular time. Already the Senate has passed a resolution directing the Federal Trade Commission to make an investigation of chain stores, those large corporations operating a series of stores throughout a State, or in several States, with their power to buy in large quantities and to sell at lower prices than the individual competitive enterprise.

We are taking notice of the problem, just as State legislatures have noticed the problem, and the Senator from Pennsylvania may be expressing an unfounded fear when he suggests or asserts that the chain-store corporations will cut themselves into local corporations and subject themselves to local control, subject themselves to the power of the local governments, merely for the sake of saving the difference between 9 per cent on an income of $12,000, let us say, and 12½ per cent, or 3½ per cent upon $12,000.

Mr. President, the fear is not well founded. The Senator from Pennsylvania no doubt entertains it, but the condition foreseen is not likely to happen. The large corporations will not think it worth while to create subsidiaries, to split themselves up, so to speak, and subject themselves to the jurisdiction of the local governments, because in the long run the possible gain will not prove equal to the risk incurred.

If the fear entertained by the Senator from Pennsylvania should prove to be well founded, the general welfare might well be promoted.

The great business combinations in the country can not as a rule split their businesses into several parts so as to take advantage of this provision, as suggested by the Senator. Only chain-store corporations or corporations operating chain stores could create subsidiaries in order to save the difference between the graduated rates and the flat rate of 12½ per cent. I do not believe the Treasury Department argument now made should greatly disturb the Senate, because the department has recognized that the smaller corporations were justly entitled to special consideration at the hands of the Congress in the pending measure.

Mr. WALSH of Massachusetts. Mr. President, the Senator from Georgia has pointed out the reason why the graduated tax on corporations' incomes is here. The history of the amendment begins with the recommendation of the Treasury Department suggesting that corporations having a net income of less than $25,000 should be given the privilege to make their tax returns as partners.

The Treasury Department gave us some figures which are very striking. The number of corporations which have a net income of over $25,000 is only about 8 per cent of all corporations, while those which have a net income of less than $25,000 are about 92 per cent. They show also that one-half of 1 per cent of all the corporations pay 50 per cent of all corporation taxes. Let us apply the figures to the pending question.

The House agreed to reduce the taxes upon corporations to the amount of $160,000,000. That means that 92 per cent of all the corporations shall have their taxes reduced $16,000,000,

and 8 per cent of all the corporations will get $144,000,000 of the $160,000,000.

Mr. SMOOT. Is not the Senator mistaken?

Mr. WALSH of Massachusetts. I understand that the reduction of 1 per cent, which the Finance Committee recommended and which has been adopted, will mean, if the plan goes through, a reduction to corporations of $82,000,000.

Mr. SMOOT. Yes; it is $82,000,000.

Mr. WALSH of Massachusetts. That is the only reduction corporations are to get under the plan proposed by the majority of the Finance Committee?

Mr. SMOOT. With the exception of the increase of exemption, $1,000 more than the present law, making it $3,000 instead of $2,000.

Mr. WALSH of Massachusetts. The rate fixed by the House would show a reduction of $160,000,000? The Senate rate makes it $82,000,000.

Mr. SMOOT. That is the way the House had it provided.

Mr. WALSH of Massachusetts. Let us take the Senator's figure. If the reduction is 1 per cent, the loss is $82,000,000. If it is 2 per cent, the loss is $160,000,000. Then 8 per cent of all the corporations that pay on incomes in excess of $25,000 will get 92 per cent of the reduction of $82,000,000. Because it seemed to be so unfair and so unjust, when we were reducing corporation taxes, that the corporation with an income of less than $25,000 got practically nothing from the reduction, the friends of the small corporation began to think up a plan to aid them.

The House rejected the proposal that the small corporations be permitted to make their returns as partners, and worked out the amendment carrying the graduated-tax plan on corporation incomes, commencing at 5 per cent and increasing the tax until the maximum of 11½ per cent was reached upon incomes in excess of $15,000.

This plan means that much more of the $82,000,000 will be distributed to the small corporations than if we maintain and hold the flat tax upon all corporations. That is all there is to the proposition. It is a method of trying to spread out this large distribution in reduction of corporation taxes so that those corporations which earn less than $25,000, which constitute 92 per cent of the total number of corporations in the country, shall have a larger share of the reduction.

There is another reason. An inequality has existed since 1922 against nonexcess-profits corporations. From that time to the present they have had to pay a 25 per cent increase in their tax bill. With the hope of removing that inequality, the graduated tax upon corporation incomes has since been often suggested.

Of course, the graduated-tax plan is not perfect any more than any individual-tax plan that is graduated is perfect. A graduated tax upon individuals is an imperfect plan. Individuals can escape taxation or have their taxes removed from one bracket to another simply by changing their securities and investing in tax-exempt securities, and undoubtedly some corporations will seek to employ some of the methods of evasion that have been pointed out. This can not be prevented. Justice, however, demands we remove the burdens unjustly placed on small corporations when we increased their tax since the World War from 10 to 12½ per cent. The Senator from Georgia [Mr. GEORGE] has made it very clear that in the long run, if what the Senator from Pennsylvania [Mr. REED] suggested might happen should happen, it will be a positive benefit for local communities and for State authorities to be able to get closer contact with the assets and liabilities of small corporations and tax and control them accordingly. Instead of there being grave danger, it seems to me the public interests will be greatly benefited by any tax proposal that will break up the big financial combines.

In any event, removing anticipated—and I believe exaggerated—fears and possibilities of evasion, no one can dispute the fact that under the House provision of the graduated tax upon corporations, every small corporation will receive a very substantial tax reduction as against the plan of the majority to continue the flat tax upon large and small corporations.

When we get down to a final analysis the question is whether, with conditions as they are, we are going to reduce now substantially the income on taxes upon the smaller corporations or whether we are going to continue a heavy-base flat tax upon all corporations. I hope the House provision will be retained in the bill and that we begin now to apply the principle of ability to pay to corporations as we have to individuals.

Mr. HARRISON. Mr. President, I apologize to the Senate for occupying even a few moments at this hour, but the situation confronting us is a peculiar one. The minority members have tried to assist the majority members in the passage of a revenue bill. We have refrained from lengthy discussion of amendments in order to save time and reach a vote. We have remained here and assisted in keeping a quorum present in order to expedite the passage of the revenue bill. The bill is now out of the Committee of the Whole and in the Senate and almost ready to be passed. We have gone on record as voting against various proposals touching the tariff question, which we ordinarily might favor in accordance with principles for which we have always stood. We did that with reference to the tariff amendments because we felt that their adoption might defeat tax reduction at this time.

I have reached that time in life where I concede to the other man that he is prompted by a conscientious opinion and that he is entitled to entertain a different view from that which I entertain. I do not find fault with him for that. Of course, there are some people who, if you do not agree with them, get mad; but I am not that kind.

I know there are Senators who have voted to put amendments on the bill which they believed would tend to defeat and prevent its passage. I believe, and I think it is the opinion of most of the members of the minority of the Finance Committee, that the inclusion of a tariff-revision provision in the bill would mean the doom of tax reduction at this time. I may be wrong, but I so believe. The Democrats are for tariff revision. We adopted a resolution asking the Ways and Means Committee of the House to report a tariff revision bill, but they have not done it. We have championed tax reduction here for more than two years and tried to bring it about, but without avail. I know that when there is a coalition between the so-called insurgent group on the other side of the Chamber and the Old Guard group they are going to prevail against us.

I appreciate now that the Senator from Utah [Mr. SMOOT] has brought about a new formation of the line, has re-formed the ranks, and that the revamped conditions over on the other side of the Chamber have aroused his hopes at least temporarily. He thinks he is going to strike out the graduated corporation tax amendment that was put in the bill by Democratic votes.

I never saw so much anxiety displayed about the small corporations as is now displayed by the Senator from Utah and the Senator from Pennsylvania [Mr. REED]. The only amendment we were able to put into the bill, practically speaking, was an amendment giving some relief to the small corporations of the country, those with a net income of $15,000 and less. Now, the Senator from Utah, after pleading with Senators on this side not to engage in further discussion but to pass the bill immediately and to hold down debate, seems to have changed his mind just as we have this one proposition left. The bill would have passed two hours ago, or an hour and a half ago, or an hour and twenty-nine minutes ago if the Senator had not shown his anxiety about this one proposal and risen in his place to discuss it.

Oh, the consternation when the Senator rose and said there were provisions in this amendment which he did not understand when it was previously under consideration, but that his eyes had been opened! He opposed it when it was before the Finance Committee of the Senate, he opposed it when it was before the Senate as in Committee of the Whole. He talked about it on the floor of the Senate when it was under discussion about two weeks ago and was adopted. He talked then like he knew something about it. This is the only time I ever heard the Senator from Utah acknowledge that he did not know what he was talking about at the time he talked. His eyes have now been opened and so he had his lieutenant, the Senator from Pennsylvania [Mr. REED], undertake to explain it by the chart on the wall. He was going to show us something we never heard of before. The mountain has labored and a mouse has been born!

What does the chart show? The Senator from Utah has on it four illustrations of some great corporations that would secure relief under the provisions of the amendment. He shows by his chart that corporation No. 101 had a net income of $9,953, that in 1926 it paid $1,074 under the present law, and that if the amendment adopted by the House, now known as the Simmons amendment, shall be agreed to it would pay but $348. It is simply a saving to that particular corporation of about $700, and yet he is on his feet now protesting about it.

We have had called to our attention illustration No. 105, which shows that under the present law a corporation pays a tax of $184, while under the Simmons amendment it would have to pay only $18. We have another illustration showing that under the present law a corporation which pays a tax of $1,165, under this amendment would pay $534. We are seeking by the amendment to give reductions. The Senator can point out the four cases to which he has referred, and about which there is nothing wrong, for they merely involve comparatively slight reductions, but, because holding companies may derive some

benefit, he wants to deny to thousands and tens of thousands of small corporations the reductions provided for in the Simmons amendment.

I submit that the House provision and the so-called Simmons amendment do not go as far as even the Secretary of the Treasury wanted to go. The Secretary, as was suggested by the Senator from Georgia [Mr. GEORGE] and as suggested the other day in my first speech on this subject, recommended to the House of Representatives a provision which would enable all corporations with a net income of not more than $25,000 to report as partnerships; in other words, they would not pay the 5 per cent on the first $7,000, the 7 per cent up to $12,000, the 9 per cent up to $15,000, as is proposed.

The Secretary of the Treasury realized that small corporations had not been fairly treated, and he recommended that they should be allowed to make their returns not as corporations subject to the corporation tax at all but as partnerships. Yet the Senator from Utah [Mr. SMOOT] and the Senator from Pennsylvania [Mr. REED] take issue with him for once and say, "Oh, this is all wrong, for benefit will accrue to big holding corporations which exist under our present laws, the organization of which we have been unable to find any way to prevent and which there is nothing in the bill to destroy." Because such corporations may get a reduction of $300 or $400 under the Simmons amendment they would deny to tens of thousands of small corporations the reductions provided by that amendment.

I submit, Mr. President, that those who want to vote to help the small corporations of the country will vote to retain the provision that was adopted in the House of Representatives as now proposed in modified form.

The only objection, as pointed out by the Senator from North Carolina, to it was that raised by the Undersecretary of the Treasury, Mr. Mills, who showed that under the House provision a corporation which had a net income of $15,001 would pay at the rate of 13½ per cent under the present law, or 12½ per cent under the pending bill, while the corporation that had an income of $15,000 would pay only at a rate of 9 per cent. There was a place where the spread was too large, where the discrepancy was too great. We have modified that provision so that the Senator from Utah says it is all right, so far as he is concerned. It is graduated just as the income tax and surtax are graduated. It is all right, and they can not pick a hole in it; but the distinguished Senator from Pennsylvania says that if he were a lawyer advising his client he could suggest some scheme whereby these intercity companies could adjust their affairs, get rid of a lot of taxes, and save millions of dollars.

I know that if anybody in the world could advise a corporation client how to beat the Government it would be lawyers with the ability of the distinguished Senator from Pennsylvania, and lawyers who would come from Pittsburgh, in Pennsylvania. However, the corporations which have been creating holding companies are going to continue to create them; but the fact that there are a few such companies which may save two or three hundred dollars each ought not to influence any Senator on the majority side who wants to grant some relief to the small corporations of the country, those with a net income of $15,000 and less, to cast a vote against accomplishing that result.

If we could break up the holding companies, if the chain stores and the Standard Oil Co. could be compelled to take out separate articles of incorporation in every State in which they do business, I would be glad of it. Then the States would obtain more taxes, and as resident corporations the companies would have to respond to the laws of those particular States.

They dare not do it; they will not do it. Court decisions and legislation have tried to compel certain big corporations to be broken up and segregated, but they have been unable to do it. No one can tell me that the Standard Oil Co. is going out and organize more corporations, as suggested by the Senator from Pennsylvania.

I submit, Mr. President, that this amendment, adopted in the Senate as in the Committee of the Whole by a close vote, with only about two or three Republican Senators voting with us, ought to be adopted and approved in the Senate. I am surprised that the Senator from Utah should want to deny to the small corporations this relief which the Senate by its action has once decided they should have.

The PRESIDING OFFICER. The question is on concurring in the amendment.

Mr. SMOOT and Mr. SIMMONS asked for the yeas and nays, and they were ordered.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON (when Mr. MCNARY's name was called). On this vote the Senator from Oregon [Mr. MCNARY] is paired with the Senator from Maryland [Mr. BRUCE]. If the Senator from Oregon were present, he would vote "nay."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. If he were present, he would vote "nay"; and if permitted to vote, I should vote "yea."

Mr. SIMMONS (when his name was called). I have a pair on this vote with the senior Senator from New Jersey [Mr. EDGE]. If he were present he would vote "nay," and if I were at liberty to vote I should vote "yea."

Mr. SMITH (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. In his absence I withhold my vote. If at liberty to vote, I should vote "yea."

Mr. SWANSON (when his name was called). I am paired with the senior Senator from Washington [Mr. JONES]. Not knowing how he would vote, if present, I withhold my vote. If permitted to vote I should vote "yea."

Mr. TYSON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote, I withhold my vote. If permitted to vote I should vote "yea."

The roll call was concluded.

Mr. SIMMONS. I transfer my pair with the Senator from New Jersey [Mr. EDGE] to the Senator from Iowa [Mr. STECK] and will vote. I vote "yea."

Mr. SWANSON. I transfer my pair with the senior Senator from Washington [Mr. JONES] to the senior Senator from Nevada [Mr. PITTMAN] and will vote. I vote "yea."

Mr. OVERMAN. I transfer my pair with the senior Senator from Wyoming [Mr. WARREN] to the senior Senator from Montana [Mr. WALSH], and will vote. I vote "yea."

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON];

The Senator from Massachusetts [Mr. GILLETT] with the Senator from Utah [Mr. KING];

Senator from Indiana [Mr. ROBINSON] with the Senator from Alabama [Mr. HEFLIN]; and

The Senator from South Dakota [Mr. NORBECK] with the Senator from New York [Mr. COPELAND].

The result was announced—yeas 34, nays 33, as follows:

YEAS—34

Ashurst	Fletcher	Locher	Simmons
Barkley	George	McKellar	Stephens
Bayard	Gerry	McMaster	Swanson
Black	Glass	Mayfield	Thomas
Blease	Harris	Neely	Tydings
Broussard	Harrison	Overman	Wagner
Caraway	Hawes	Reed, Mo.	Walsh, Mass.
Dill	Hayden	Robinson, Ark.	
Edwards	Kendrick	Sheppard	

NAYS—33

Bingham	Deneen	Metcalf	Schall
Blaine	Fess	Moses	Shipstead
Borah	Greene	Norris	Shortridge
Brookhart	Hale	Nye	Smoot
Capper	Howell	Oddie	Vandenberg
Couzens	Johnson	Phipps	Waterman
Curtis	Keyes	Pine	
Cutting	La Follette	Reed, Pa.	
Dale	McLean	Sackett	

NOT VOTING—27

Bratton	Goff	Norbeck	Trammell
Bruce	Gooding	Pittman	Tyson
Copeland	Gould	Ransdell	Walsh, Mont.
du Pont	Heflin	Robinson, Ind.	Warren
Edge	Jones	Smith	Watson
Frazier	King	Steck	Wheeler
Gillett	McNary	Steiwer	

So the amendment made as in Committee of the Whole was concurred in.

Mr. NYE subsequently said: Mr. President, in the interest of my colleague [Mr. FRAZIER], who is unavoidably absent, I should like to say that I had an understanding here—I think it was generally understood—that he was paired on this question with the junior Senator from South Carolina [Mr. BLEASE]. I should like to inquire at this time if the junior Senator from South Carolina voted upon the amendment just concurred in?

Mr. BLEASE. Mr. President, I understood that I was paired with the Senator in Committee of the Whole. I never authorized a pair in the Senate, and never expect to do it.

The VICE PRESIDENT. The Chair is informed that a separate vote is not desired upon the second amendment, dealing with publicity.

Mr. SMOOT. No; I do not care for that, Mr. President.

The VICE PRESIDENT. Without objection, the amendment is concurred in.

The bill is in the Senate and still open to amendment.

Mr. SMOOT. Mr. President, I had unanimous consent to offer an amendment on page 16, line 6, after the amendment already agreed to, to insert the paragraph which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. "Graduated tax on small corporations": On page 16, line 6, after the amendment already agreed to, it is proposed to insert the following new paragraph:

(c) Special classes of corporations: Notwithstanding the provisions of subsections (a) and (b) of this section, the rate of tax shall be 12½ per cent in the case of a foreign corporation, of a corporation organized under the China trade act, 1922, and of a corporation entitled to the benefits of section 251 by reason of deriving a large portion of its gross income from sources within a possession of the United States.

Mr. SMOOT. Mr. President, that amendment is to provide that the Simmons amendment, just agreed to by the Senate, relative to graduated tax on small corporations, shall not apply to the corporations named in this amendment.

Mr. SIMMONS. I have no objection to that.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. REED of Pennsylvania. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 146, at the end of line 10, insert "the sum of (A)" and in line 16, after "Commissioners," insert a comma and the following: "and (B) gain during the taxable year from the sale or other disposition of property."

On page 149, line 1, after "incurred," insert "as defined in subsection (b) (6) of this section" and after line 1, insert a new paragraph to read as follows:

(5) Losses sustained during the taxable year from the sale or other disposition of property.

On page 149, renumber paragraphs (6) to (9), inclusive.

Mr. REED of Pennsylvania. Mr. President, these are three amendments that go together. They are all part of the same idea. In brief, they are this:

At the present time, a mutual fire-insurance company or a mutual casualty company or a mutual marine-insurance company—not life insurance; this has nothing to do with life insurance—any mutual company has to pay a tax on the profits that it makes in dealing in stocks or bonds or real estate; but, as the law now stands, a fire-insurance company which has capital stock, and is owned by stockholders instead of policyholders, can deal in stocks and make a profit on the purchase and sale of them and pay no tax whatsoever on that profit. The same thing is true of a stock casualty company or a stock marine-insurance company.

I can imagine reasons why Congress would want to be more lenient to mutuals than to stock companies. I can not imagine, nor has anyone suggested, any reason why we should be more lenient with companies that are owned by stockholders than with companies that are owned by policyholders.

Mr. NORRIS. Mr. President, may I make an inquiry of the Senator?

Mr. REED of Pennsylvania. Certainly.

Mr. NORRIS. Is it right, then, to say that under existing law, without the Senator's amendment, we are more lenient to stock companies than to mutual companies?

Mr. REED of Pennsylvania. Absolutely.

Mr. NORRIS. If the amendment is agreed to, we put them on the same basis?

Mr. REED of Pennsylvania. We put them on the same basis.

I am not going to speak long about this matter, but let us have no doubt about it. As I said in the Committee of the Whole, if any rich man in America wants to avoid taxes to-day, the finest way that I know of to do it is to buy control of a little stock fire-insurance company and use that as his holding company, because he may gamble in bonds or stocks or lands as he pleases, and he does so absolutely tax free. Outside of the life-insurance companies—and the Senate settled that, so I am not going to discuss them—there is no other business corporation in America that can enjoy such profits without paying any tax upon them. I can see no defense for it. I think the only explanation for it is that it was an accident of legislation that Congress never fully understood.

The VICE PRESIDENT. Without objection, the vote will be taken on the amendments en bloc. The question is on the amendments of the Senator from Pennsylvania. [Putting the question.] The amendments are agreed to.

Mr. McMASTER. Mr. President, I desire, if it is in order, a vote on the amendment which I submitted.

The VICE PRESIDENT. Will the Senator send up the amendment?

Mr. McMASTER. I sent it up when the bill was in Committee of the Whole, to be called up when the bill came into the Senate. I offered the amendment on behalf of my colleague.

Mr. REED of Pennsylvania. Mr. President, a parliamentary inquiry: The amendments offered by myself were declared agreed to?

The VICE PRESIDENT. They were.

Mr. SIMMONS. What were those amendments?

Mr. REED of Pennsylvania. The ones about fire-insurance companies.

The CHIEF CLERK. The Senator from South Dakota [Mr. McMASTER], for his colleague [Mr. NORBECK], offers the following amendment:

On page 206, after line 2, insert a new section, as follows:

SEC. 441. TAX ON CALL LOANS.

Schedule A of Title VIII of the revenue act of 1926 is amended by adding at the end thereof a new subdivision to read as follows:

"8. Call loans: Drafts, checks, promissory notes, or other evidences of indebtedness, payable at sight or on demand, evidencing a loan made by any person engaged in the business of making call loans, 5 cents if the face value is not more than $100, and for each $100, or fractional part thereof, of face value, 5 cents."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from South Dakota on behalf of his colleague.

Mr. REED of Pennsylvania. Mr. President, a parliamentary inquiry: There is some misunderstanding as to whether the amendments which the Chair has declared to have been agreed to were the amendments offered by myself on pages 146 and 149 of the bill, relating to fire-insurance companies.

The VICE PRESIDENT. Those were the amendments that were agreed to.

Mr. NEELY. If those are the amendments that we just adopted, I move to reconsider the vote by which the amendments were adopted, because many Senators voted under a misapprehension as to the question on which they were actually voting.

The VICE PRESIDENT. The Senate has heard the motion of the Senator from West Virginia to reconsider the vote upon the amendments of the Senator from Pennsylvania.

Mr. REED of Pennsylvania. I ask for the yeas and nays on that Mr. President.

Mr. JOHNSON. Let the vote be reconsidered, and then vote on the amendments.

Mr. REED of Pennsylvania. The amendments were agreed to.

Mr. McMASTER. Mr. President, was there not a matter before the Senate before the motion was made by the Senator from West Virginia?

Mr. NEELY. Yes; but there was no roll call. Any Senator can make a motion to reconsider a vote by which an amendment was carried when there was not a roll call.

Mr. REED of Pennsylvania. Mr. President, I withdraw my request for the yeas and nays on the motion of the Senator from West Virginia, and agree that the vote on my amendments may be reconsidered.

The VICE PRESIDENT. The vote on the McMaster amendment should be taken first.

Mr. NEELY. I made no motion about the McMaster amendment. I was speaking of the amendments of the Senator from Pennsylvania.

Mr. HARRISON. I did not understand the Chair to announce that the amendments had been agreed to.

Mr. NEELY. Yes; he did.

The VICE PRESIDENT. The Chair announced that the Reed amendments had been agreed to on a viva voce vote.

Mr. HARRISON. I ask for a roll call on that proposition.

The VICE PRESIDENT. The amendment of the Senator from South Dakota is before the Senate.

Mr. HARRISON. Is the other a closed matter?

The VICE PRESIDENT. The other is a closed matter, except that the Senator from West Virginia has moved to reconsider the vote.

Mr. NEELY. That motion is still pending, is it not?

The VICE PRESIDENT. Yes. It will come up after the pending amendment is passed on.

Mr. SIMMONS. Mr. President, I desire to inquire whether this motion to reconsider, which the Senator from Pennsylvania has agreed shall be done, does not have precedence over the motion now presented by the Senator from South Dakota?

The VICE PRESIDENT. The motion does not have precedence over a vote on the amendment of the Senator from South Dakota.

Mr. SIMMONS. I understand that in the confusion which resulted here, the amendments offered by the Senator from Pennsylvania were adopted without anybody knowing what was being done.

Mr. CURTIS (and other Senators). Question!

The VICE PRESIDENT. The question is on the amendment of the Senator from South Dakota.

Mr. McMASTER. Mr. President, in view of the fact that this amendment was discussed in the Committee of the Whole, I am not going to detain the Senate, except with the statement that if this amendment is adopted, imposing a 5-cent tax upon each $100 of promissory notes which are given in the nature of brokers' loans, it will add $12,000,000 to the revenue of the country and to this tax bill; and I ask for the yeas and nays upon the amendment.

The yeas and nays were ordered.

The VICE PRESIDENT. The Secretary will call the roll.

Mr. DILL. Which amendment are we voting on?

The VICE PRESIDENT. The Secretary will restate the amendment.

The Chief Clerk restated the amendment offered by Mr. McMASTER on behalf of Mr. NORBECK.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. GILLETT (when his name was called). I am paired with the junior Senator from Utah [Mr. KING], and therefore withhold my vote.

Mr. OVERMAN (when his name was called). As I previously announced, I have a pair with the senior Senator from Wyoming [Mr. WARREN]. In his absence, I withhold my vote.

Mr. SIMMONS (when his name was called). I have a pair with the senior Senator from New Jersey [Mr. EDGE], who is absent. If he were present, I understand he would "yea." If I were permitted to vote, I would vote "nay."

Mr. SMITH (when his name was called). I have a pair with the senior Senator from Indiana [Mr. WATSON]. In his absence, I withhold my vote.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. In his absence, I withhold my vote. If I were permitted to vote, I would vote "nay."

Mr. TYSON (when his name was called). I have a pair with the senior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the senior Senator from Iowa [Mr. STECK], and vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON];

The Senator from Indiana [Mr. ROBINSON] with the Senator from Alabama [Mr. HEFLIN]; and

The Senator from South Dakota [Mr. NORBECK] with the Senator from New York [Mr. COPELAND].

The result was announced—yeas 18, nays 44, as follows:

YEAS—18

Black	Dill	McMaster	Sheppard
Blaine	Harris	Mayfield	Shipstead
Brookhart	Howell	Neely	Thomas
Couzens	Johnson	Norris	
Cutting	La Follette	Nye	

NAYS—44

Ashurst	Fess	Locher	Sackett
Barkley	Fletcher	McKellar	Schall
Bayard	George	McLean	Shortridge
Bingham	Gerry	Metcalf	Smoot
Broussard	Greene	Moses	Stephens
Capper	Hale	Oddie	Tydings
Caraway	Harrison	Phipps	Tyson
Curtis	Hawes	Pine	Vandenberg
Dale	Hayden	Reed, Mo.	Wagner
Deneen	Kendrick	Reed, Pa.	Walsh, Mass.
Edwards	Keyes	Robinson, Ark.	Waterman

NOT VOTING—32

Blease	Gillett	McNary	Steck
Borah	Glass	Norbeck	Steiwer
Bratton	Goff	Overman	Swanson
Bruce	Gooding	Pittman	Trammell
Copeland	Gould	Ransdell	Walsh, Mont.
du Pont	Heflin	Robinson, Ind.	Warren
Edge	Jones	Simmons	Watson
Frazier	King	Smith	Wheeler

So the amendment offered by Mr. McMASTER on behalf of Mr. NORBECK was rejected.

Mr. NEELY. Mr. President, I renew my motion to reconsider the vote by which the amendment offered by the Senator from Pennsylvania [Mr. REED] was agreed to.

Mr. REED of Pennsylvania. I am perfectly willing that the vote shall be reconsidered, but I ask for the yeas and nays on the amendment.

Mr. NEELY. Mr. President, I ask unanimous consent that the vote be reconsidered by which the amendment offered by the Senator from Pennsylvania [Mr. REED] relative to taxing insurance companies was agreed to.

Mr. REED of Pennsylvania. I have no objection.

The VICE PRESIDENT. Without objection the vote will be reconsidered, and the question is on agreeing to the amendment.

Mr. REED of Pennsylvania and Mr. NEELY asked for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. GILLETT (when his name was called). I have a pair with the junior Senator from Utah [Mr. KING]. In his absence I withhold my vote.

Mr. SIMMONS (when his name was called). I have a general pair with the senior Senator from New Jersey [Mr. EDGE], and in his absence I withhold my vote.

Mr. SMITH (when his name was called). Making the same announcement as to my pair as on the previous vote, I withhold my vote.

Mr. SWANSON (when his name was called). Making the same announcement as before as to my pair, I withhold my vote.

Mr. TYSON (when his name was called). I have a pair with the senior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote, I withhold my vote. If permitted to vote, I would vote "nay."

Mr. WARREN (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. OVERMAN]. I am not advised how that Senator would vote if present, and therefore I withhold my vote.

The roll call was concluded.

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON]; and

The Senator from Indiana [Mr. ROBINSON] with the Senator from Alabama [Mr. HEFLIN].

The result was announced—yeas 35, nays 27, as follows:

YEAS—35

Bayard	Cutting	Keyes	Sackett
Black	Dill	McMaster	Shipstead
Blaine	Fletcher	Metcalf	Shortridge
Borah	Gerry	Moses	Tydings
Brookhart	Harris	Norris	Vandenberg
Broussard	Hawes	Nye	Wagner
Capper	Howell	Oddie	Walsh, Mass.
Caraway	Johnson	Phipps	Waterman
Couzens	Kendrick	Reed, Pa.	

NAYS—27

Ashurst	Fess	La Follette	Robinson, Ark.
Barkley	George	Locher	Schall
Bingham	Glass	McKellar	Sheppard
Curtis	Greene	McLean	Smoot
Dale	Hale	Mayfield	Stephens
Deneen	Harrison	Neely	Thomas
Edwards	Hayden	Pine	

NOT VOTING—32

Blease	Goff	Overman	Steiwer
Bratton	Gooding	Pittman	Swanson
Bruce	Gould	Ransdell	Trammell
Copeland	Heflin	Reed, Mo.	Tyson
du Pont	Jones	Robinson, Ind.	Walsh, Mont.
Edge	King	Simmons	Warren
Frazier	McNary	Smith	Watson
Gillett	Norbeck	Steck	Wheeler

So the amendment of Mr. REED of Pennsylvania was agreed to.

Mr. McMASTER. Mr. President, I voted in the affirmative on the amendment in reference to the small corporation tax and therefore am permitted now to move a reconsideration of the vote by which the amendment was passed. My reason for making the motion is that I understand there was a misunderstanding in reference to a certain pair. I understand that the junior Senator from North Dakota [Mr. NYE] claims that the senior Senator from North Dakota [Mr. FRAZIER] had a pair. It is for the purpose of doing justice to the senior Senator from North Dakota, if he has been done an injustice, that I desire to make this motion.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. McMASTER. I yield.

Mr. ROBINSON of Arkansas. I suggest that the Senator withhold his statement and his motion until the Senator from South Carolina [Mr. BLEASE] shall have had an opportunity to make a statement. That Senator was on his feet addressing the Chair, but failed to get recognition. I make that suggestion to the Senator from South Dakota.

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from South Carolina?

Mr. McMASTER. I yield.

Mr. BLEASE. Mr. President, I rose when the Senator did, but the Chair happened to see him first. He being such a handsome man, I am not at all surprised.

When I went home last week I asked Mr. Halsey to get a pair for me on some measures that were strictly party measures. I do not pair on any other kind. I understood that it was to be a pair for the consideration of this particular bill in the Committee of the Whole. I did not authorize anybody to make that pair for me to apply after the bill had been reported to the Senate.

However, Mr. Halsey says he made the pair with Senator FRAZIER, and that he included in the pair the consideration of the bill after it had been reported to the Senate. I asked him if Mr. Loeffler so understood it, and after consulting him, Mr. Halsey said he did. Of course, that being the case, I should have refrained from voting.

Mr. McMASTER. Mr. President, I withdraw my motion.

Mr. BLEASE. It will be noted, Mr. President, that after Mr. Halsey made his statement to me, I did not vote on the other amendments. I ask unanimous consent that the vote be reconsidered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the vote is reconsidered. The question now is on agreeing to the amendment offered by the Senator from North Carolina, commencing on page 15, line 22.

Mr. HARRISON. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. FLETCHER. Mr. President, may we have the question stated? What is the exact question pending?

The VICE PRESIDENT. The question is, Shall the Senate concur in the amendment made as in Committee of the Whole, the amendment being the one submitted by the Senator from North Carolina [Mr. SIMMONS] relating to graduated income taxes.

The Chief Clerk proceeded to call the roll.

Mr. GILLETT (when his name was called). I repeat the announcement of my pair as on the previous vote.

Mr. SIMMONS (when his name was called). I have a pair upon this question with the Senator from New Jersey [Mr. EDGE]. I transfer that pair to the Senator from Iowa [Mr. STECK] and vote "yea."

Mr. SMITH (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. I transfer that pair to the Senator from Montana [Mr. WALSH] and vote "yea."

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washinton [Mr. JONES]. I transfer that pair to the senior Senator from Nevada [Mr. PITTMAN], and vote "yea."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote, I withhold my vote. If permitted to vote, I would vote "yea."

Mr. WARREN (when his name was called). I have a general pair, as I stated before, but I am unable to obtain a transfer. I therefore withhold my vote.

The roll call was concluded.

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from South Carolina [Mr. BLEASE];

The Senator from Idaho [Mr. GOODING] with the Senator from Montana [Mr. WHEELER];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from Oregon [Mr. STEIWER] with the Senator from New Mexico [Mr. BRATTON];

The Senator from South Dakota [Mr. NORBECK] with the Senator from New York [Mr. COPELAND];

The Senator from Indiana [Mr. ROBINSON] with the Senator from Alabama [Mr. HEFLIN]; and

The Senator from Oregon [Mr. McNARY] with the Senator from Maryland [Mr. BRUCE].

The roll call resulted—yeas 33, nays 33, as follows:

YEAS—33

Ashurst	George	McKellar	Stephens
Barkley	Gerry	McMaster	Swanson
Bayard	Glass	Mayfield	Thomas
Black	Harris	Neely	Tydings
Broussard	Harrison	Reed, Mo.	Wagner
Caraway	Hawes	Robinson, Ark.	Walsh, Mass.
Dill	Hayden	Sheppard	
Edwards	Kendrick	Simmons	
Fletcher	Locher	Smith	

NAYS—33

Bingham	Deneen	Metcalf	Schall
Blaine	Fess	Moses	Shipstead
Borah	Greene	Norris	Shortridge
Brookhart	Hale	Nye	Smoot
Capper	Howell	Oddie	Vandenberg
Couzens	Johnson	Phipps	Waterman
Curtis	Keyes	Pine	
Cutting	La Follette	Reed, Pa.	
Dale	McLean	Sackett	

NOT VOTING—28

Blease	Gillett	McNary	Steiwer
Bratton	Goff	Norbeck	Trammell
Bruce	Gooding	Overman	Tyson
Copeland	Gould	Pittman	Walsh, Mont.
du Pont	Heflin	Ransdell	Warren
Edge	Jones	Robinson, Ind.	Watson
Frazier	King	Steck	Wheeler

The VICE PRESIDENT. The Senate being equally divided, the Chair votes "nay," and the amendment is not agreed to.

Mr. GEORGE. Mr. President, I congratulate the Vice President on the fact that he has had an opportunity to break a tie vote, and that having had the opportunity he voted wrong. [Laughter.]

The VICE PRESIDENT. The bill is in the Senate and still open to amendment.

Mr. SMOOT. Mr. President, I would like to know what the situation is in relation to the graduated tax amendment?

The VICE PRESIDENT. The question now recurs on striking out the section as reported by the committee, which will be stated.

The CHIEF CLERK. The question is on the committee amendment to strike out, on page 15, lines 22 to 25, inclusive, and on page 16, lines 1 to 7, inclusive, as follows:

(b) Taxable income not more than $15,000: If the amount of the net income in excess of the credits provided in section 26 is not more than $15,000, then, in lieu of the rate prescribed in subsection (a), the rate shall be—

(1) Five per cent if such amount is not more than $7,000.

(2) Seven per cent if such amount is more than $7,000, and not more than $12,000.

(3) Nine per cent if such amount is more than $12,000, and not more than $15,000.

The amendment was agreed to.

Mr. BINGHAM. Mr. President, in accordance with the notice given when in Committee of the Whole, I offer the following amendment and ask that the clerk may read it.

The VICE PRESIDENT. The amendment will be read.

The CHIEF CLERK. The Senator from Connecticut offers the following amendment: On page 243, after line 5, insert a new section to read as follows:

SEC. —. INCOME FROM SOURCES WITHIN POSSESSIONS OF THE UNITED STATES—RETROACTIVE.

The provisions of section 262 of the revenue act of 1926 (relating to income from sources within possessions of the United States) shall be retroactively applied in computing income, war-profits, and excess-profits taxes for the taxable years 1918, 1919, and 1920.

Mr. BINGHAM. Mr. President, may I say in explanation that this is not the amendment which I originally offered. It is the amendment which was prepared by the Senator from

Utah [Mr. SMOOT] in conjunction with the Treasury Department and was offered by him when the bill was in Committee of the Whole. It takes care of those citizens about whom General Wood telegraphed some years ago asking that they be taken care of and who Secretary Mellon said should be protected.

The VICE PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Connecticut.

The amendment was rejected.

The VICE PRESIDENT. If there are no further amendments to be proposed, the question is, Shall the amendments be engrossed and the bill be read a third time?

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The VICE PRESIDENT. The question is, Shall the bill pass?

The bill was passed.

Mr. SMOOT. I move that the Senate insist upon its amendments, ask a conference with the House upon the bill and amendments, and that the Chair appoint the conferees upon the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. SMOOT, Mr. MCLEAN, Mr. CURTIS, Mr. SIMMONS, and Mr. GERRY conferees on the part of the Senate.

Mr. CURTIS. Mr. President, I ask to be excused from serving on the conference committee. We are nearing the end of the session and I am unusually busy. I would not have time to attend the conference on this bill and also on the deficiency appropriation bill.

Mr. SMOOT. I ask then, that the Senator from Pennsylvania [Mr. REED] be substituted for the Senator from Kansas.

The VICE PRESIDENT. Without objection the Senator from Kansas [Mr. CURTIS] is excused, and the Senator from Pennsylvania [Mr. REED] is named in his place.

Mr. SMOOT. I ask unanimous consent that the bill be printed with the Senate amendments numbered.

The VICE PRESIDENT. Without objection, it is so ordered.

SENATOR BURTON K. WHEELER

Mr. SHIPSTEAD. I ask unanimous consent to insert in the RECORD a letter written to Senator WHEELER indorsing his candidacy for reelection by Chester C. Davis, a Republican who was formerly head of the Agricultural Department of the State of Montana by appointment from former Gov. Joseph M. Dixon.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AGRICULTURAL SERVICE,
Washington, D. C., February 15, 1928.

Hon. BURTON K. WHEELER,
United States Senator, Senate Office Building, Washington, D. C.

DEAR SENATOR WHEELER: I note that the Senate Committee on Agriculture this morning voted to report the committee bill by Senator MCNARY and am glad that your membership on the committee enabled you to contribute to this action.

Because we come from the same State it has been suggested that I should be the one to write you on behalf of the farm groups with whom I am associated to express their great appreciation of your effective work not only in support of the agricultural legislative program which they sponsor but also against all legislation hostile to agricultural interests.

Since 1924, when the postwar fight for economic equality for agriculture first reached national consideration, the farm organizations most active in the fight here have recognized their obligation to those Members of Congress who have worked and voted consistently in the interest of the farmers.

A fair national policy toward agriculture is not a matter of partisan politics. Representatives of the farm organizations with whom you have cooperated here come from all parts of the United States. As individuals they have their own party affiliations, but on this matter of an agricultural program the party line has disappeared and an economic division has taken its place.

It is on behalf of these groups as well as personally that I am taking this opportunity to express our appreciation of what you have done and of what we are certain you will continue to do for the farmers of your State and of the Nation.

Yours very truly,

CHESTER C. DAVIS.

RECESS

Mr. CURTIS. I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and the Senate (at 9 o'clock and 15 minutes p. m.) took a recess until to-morrow, Tuesday, May 22, 1928, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

MONDAY, *May 21, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

We offer Thee our grateful word of prayer, our Father in Heaven, for love and mercy crown our existence each succeeding day. It is so marvelous that nothing can chill Thy divine care toward us. Night and day, day and night, Thou dost anticipate all our needs. Do Thou strengthen us with the cloudless sky of faith, and may there issue from our lives a song of praise as sweet as a vesper chime. As Thou dost give us our little day in this dear old wonderful world, any kindness that we may do, any burdens that we may lift, any paths that we may smooth, Oh, let us not neglect it. This day, so short and so soon gone, will be only a memory to-morrow. May we do ourselves no wrong. Keep us, hold us, bless us in the springtime of Thy eternal promise. Amen.

The Journals of the proceedings of Saturday, May 19, 1928, and Sunday, May 20, 1928, were read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate insists upon its amendments to the bill (H. R. 11134) entitled "An act to authorize appropriations for construction at military posts, and for other purposes," disagreed to by the House of Representatives, agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. REED of Pennsylvania, Mr. GREENE, and Mr. FLETCHER to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendment of the House of Representatives to the bill (S. 4401) entitled "An act authorizing Elmer J. Cook, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Bear Creek at or near Lovel Point, Baltimore County, Md."

The message further announced that the Senate had passed joint and concurrent resolutions of the following titles in which the concurrence of the House of Representatives was requested:

S. J. Res. 120. Joint resolution authorizing the Secretary of War to lease to the New Orleans Association of Commerce, New Orleans Quartermaster Intermediate Depot Unit No. 2;

S. J. Res. 155. Joint resolution authorizing the Secretary of War to receive for instruction at the United States Military Academy at West Point, Jose J. Jiminez, a citizen of Venezuela;

S. Con. Res. 11. Concurrent resolution to investigate the problem of the control of aircraft for seacoast defense; and

S. Con. Res. 20. Concurrent resolution requesting the President of the United States to return to the Senate the bill (S. 3752) to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926.

SENATE CONCURRENT RESOLUTION REFERRED

A concurrent resolution of the following title was taken from the Speaker's table and, under the rule, referred to the Rules Committee, as follows:

S. Con. Res. 11. Concurrent resolution to investigate the problem of the control of aircraft for seacoast defense.

COMPENSATION OF GOVERNMENT EMPLOYEES

Mr. LEHLBACH. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 6518, to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services," with Senate amendments thereto, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from New Jersey asks unanimous consent to take from the Speaker's table the bill H. R. 6518, the Welch bill, with Senate amendments thereto, disagreeing to the Senate amendments, and ask for a conference. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, reserving the right to object, will the gentleman state whether or not he has consulted with the ranking member of the Committee on the Civil Service, from which the bill comes?

Mr. LEHLBACH. Yes. This plan was announced in full committee, not only with the knowledge of the ranking member, but of every member. I just at this moment spoke with the

gentleman from Virginia [Mr. WOODRUM], who is present in the Chamber.

Mr. GARNER of Texas. Mr. Speaker, it would save colloquy and a question if gentlemen, when they make requests of this kind, would state that the committee had been consulted. I think it is nothing but fair to this side of the House for gentlemen making these requests to say that they have consulted with the Member who is in charge of the legislation.

Mr. LEHLBACH. He has been consulted with, and this course was outlined in committee, where the ranking member and everyone else were present.

Mr. GARNER of Texas. I am not complaining about it, but I do complain about the method of asking consent without making a statement of that kind.

The SPEAKER. Is there objection?

Mr. WOODRUM. Mr. Speaker, I reserve the right to object, and I shall not object, for the purpose of making a very brief statement. Along with some other Members of the House and of the committee, I feel that the Senate amendments have very materially helped the Welch bill as it passed the House. My own personal inclination would be to move to instruct the conferees to agree to the Senate amendments, if that motion were in order and I were recognized for that purpose. But I do not want to take a position that is antagonistic to the interests of the people who are interested in the legislation. The employees' organization through their head, Mr. Luther Steward, seems to be indorsing this plan of procedure. Personally I think it is a mistake. I think we should here and now agree to the Senate amendments and pass the bill, but I shall make no objection to the bill going to conference.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey.

There was no objection.

The SPEAKER appointed the following conferees: Mr. LEHLBACH, Mr. GIBSON, Mr. MANLOVE, Mr. JEFFERS, and Mr. CELLER.

MUSCLE SHOALS

Mr. MORIN. Mr. Speaker, I present a conference report upon Senate Joint Resolution 46, providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2, in the vicinity of Muscle Shoals, for the manufacture and distribution of fertilizer, and for other purposes, for printing under the rule, and ask unanimous consent that one of the conferees who has not yet signed the statement of the managers on the part of the House may be permitted to do so. The report has been signed.

The SPEAKER. Is there objection?

There was no objection.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the title of the joint resolution, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the text of the joint resolution, and agree to the same with an amendment as follows: In lieu of the language put in by the House insert the following:

"That for the purpose of maintaining and operating the properties now owned by the United States in the vicinity of Muscle Shoals, Ala., in the interest of the national defense and for agricultural and industrial development, and to aid navigation and the control of destructive flood waters in the Tennessee River and Mississippi River Basins, there is hereby created a body corporate by the name of the "Muscle Shoals Corporation of the United States" (hereinafter referred to as the corporation). The board of directors first appointed shall be deemed the incorporators and the incorporation shall be held to have been effected from the date of the first meeting of the board. This act may be cited as the "Muscle Shoals act of 1928."

"SEC. 2. (a) The board of directors of the corporation (hereinafter referred to as the board) shall be composed of three members, not more than two of whom shall be members of the same political party, to be appointed by the President, by and with the advice and consent of the Senate. The board shall organize by electing a chairman, vice chairman, and other officers, agents, and employees, and shall proceed to carry out the provisions of this act.

"(b) The terms of office of the members first taking office after the approval of this act shall expire as designated by the President at the time of nomination, one at the end of the second year, one at the end of the fourth year, and one at the end of the sixth year, after the date of approval of this act. A successor to a member of the board shall be appointed in the same manner as the original members and shall have a term of office expiring six years from the date of the expiration of the term for which his predecessor was appointed.

"(c) Any member appointed to fill a vacancy in the board occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

"(d) Vacancies in the board so long as there shall be two members in office shall not impair the powers of the board to execute the functions of the corporation, and two of the members in office shall constitute a quorum for the transaction of the business of the board.

"(e) Each of the members of the board shall be a citizen of the United States, and shall receive compensation at the rate of $50 per day for each day that he shall be actually engaged in the performance of the duties vested in the board, to be paid by the corporation as current expenses, not to exceed, however, 150 days for the first year after the date of the approval of this act, and not to exceed 100 days in any year thereafter. Members of the board shall be reimbursed by the corporation for actual expenses (including traveling and subsistence expenses) incurred by them while in the performance of the duties vested in the board by this act.

"(f) No director shall have any financial interest in any public-utility corporation engaged in the business of distributing and selling power to the public nor in any corporation engaged in the manufacture, selling, or distribution of fixed nitrogen, or any ingredients thereof, nor shall any member have any interest in any business that may be adversely affected by the success of the Muscle Shoals project as a producer of concentrated fertilizers.

"(g) The board shall direct the exercise of all the powers of the corporation.

"(h) All members of the board shall be persons that profess a belief in the feasibility and wisdom, having in view the national defense and the encouragement of interstate commerce, of producing fixed nitrogen under this act of such kinds and at such prices as to induce the reasonable expectation that the farmers will buy said products, and that by reason thereof the corporation may be a self-sustaining and continuing success.

"SEC. 3. (a) The chief executive officer of the corporation shall be a general manager, who shall be responsible to the board for the efficient conduct of the business of the corporation. The board shall appoint the general manager, and shall select a man for such appointment who has demonstrated his capacity as a business executive. The general manager shall be appointed to hold office for 10 years, but he may be removed by the board for cause, and his term of office shall end upon repeal of this act, or by amendment thereof expressly providing for the termination of his office. Should the office of general manager become vacant for any reason, the board shall appoint his successor as herein provided.

"(b) The general manager shall appoint, with the advice and consent of the board, two assistant managers who shall be responsible to him, and through him, to the board. One of the assistant managers shall be a man possessed of knowledge, training, and experience to render him competent and expert in the production of fixed nitrogen. The other assistant manager shall be a man trained and experienced in the field of production and distribution of hydroelectric power. The general manager may at any time, for cause, remove any assistant manager, and appoint his successor as above provided. He shall immediately thereafter make a report of such action to the board, giving in detail the reason therefor. He shall employ, with the approval of the board, all other agents, clerks, attorneys, employees, and laborers.

"(c) The combined salaries of the general manager and the assistant managers shall not exceed the sum of $50,000 per annum, to be apportioned and fixed by the board.

"SEC. 4. Except as otherwise specifically provided in this act, the corporation—

"(a) Shall have succession in its corporate name.

"(b) May sue and be sued in its corporate name, but only for the enforcement of contracts and the defense of property.

"(c) May adopt and use a corporate seal, which shall be judicially noticed.

"(d) May make contracts, but only as herein authorized.

"(e) May adopt, amend, and repeal by-laws.

"(f) May purchase or lease and hold such personal property as it deems necessary or convenient in the transaction of its business, and may dispose of any such personal property held by it.

"(g) May appoint such officers, employees, attorneys, and agents as are necessary for the transaction of its business, fix their compensation, define generally their duties, require bonds of them and fix the penalties thereof, and dismiss at pleasure any such officer, employee, attorney, or agent, and provide a system of organization to fix responsibility and promote efficiency.

"(h) The board shall require that the general manager and the two assistant managers, the secretary and the treasurer, the bookkeeper or bookkeepers, and such other administrative and executive officers as the board may see fit to include, shall execute and file before entering upon their several offices good and sufficient surety bonds, in such amount and with such surety as the board shall approve.

"(i) Shall have all such powers as may be necessary or appropriate for the exercise of the powers herein specifically conferred upon the corporation, including the right to exercise the power of eminent domain.

"SEC. 5. The board is hereby authorized and directed—

"(a) To operate existing plants, to construct, maintain, and operate experimental or production plants at or near Muscle Shoals for the manufacture, distribution, and sale of fertilizer or any of the ingredients comprising fertilizer, or any of the by-products of the same.

"(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program.

"(c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce.

"(d) To cooperate with National, State, district, or county experimental stations or demonstration farms for the use of new forms of fertilizer or fertilizer practices during the initial or experimental period of their introduction.

"(e) Whenever the board determines that it is commercially feasible to produce any such fertilizer, it shall be produced and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this act.

"(f) The board shall commence the manufacture of fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen for fertilizer provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops. The board is authorized and directed to utilize nitrate plant No. 2 for experiments in the production of fixed nitrogen, to determine whether it is or is not commercially feasible to produce fixed nitrogen by such plant.

"(g) Under the authority of this act, the board may donate not exceeding 1 per cent of the total product of the plant or plants operated by it to be fairly and equitably distributed through the agency of county demonstration agents, agricultural colleges, or otherwise as the board may direct for experimentation, education, and introduction of the use of such products in cooperation with practical farmers so as to obtain information as to the value, effect, and best methods of use of same.

"(h) The board is authorized to make alterations, modifications, or improvements in existing plants and facilities and to construct and operate new plants and facilities in order to effectuate properly the provisions of this act.

"(i) To establish, maintain, and operate laboratories and experimental plants, and to undertake experiments for the purpose of enabling the corporation to furnish nitrogen products for military and agricultural purposes in the most economical manner and at the highest standard of efficiency.

"(j) The board shall have power to request the assistance and advice of any officer, agent, or employee of any executive department or of any independent office of the United States, to enable the corporation the better to carry out its powers successfully, and the President shall, if in his opinion the public interest, service, and economy so require, direct that such assistance, advice, and service be rendered to the corporation, and any individual that may be by the President directed to render such assistance, advice, and service shall be thereafter subject to the orders, rules, and regulations of the board and of the general manager.

"(k) Upon the requisition of the Secretary of War or the Secretary of the Navy to manufacture for and sell at cost to the United States explosives or their nitrogenous content.

"(l) Upon the requisition of the Secretary of War the corporation shall allot and deliver without charge to the War Department so much power as shall be necessary in the judgment of said department for use in operation of all locks, lifts, or other facilities in aid of navigation.

"(m) To produce, distribute, and sell electric power, as herein particularly specified.

"(n) No products of the corporation shall be sold for use outside of the United States, her Territories and possessions, except to the United States Government for the use of its Army and Navy or to its allies in case of war.

"SEC. 6. In order to enable the corporation to exercise the powers vested in it by this act—

"(a) The exclusive use, possession, and control of the United States nitrate plants Nos. 1 and 2, located respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings connected therewith, all tools and machinery, equipment, accessories, and materials belonging thereto, and all laboratories and plants used as auxiliaries thereto; the fixed-nitrogen research laboratory, the Waco limestone quarry, in Alabama, and Dam No. 2, located at Muscle Shoals, its power house and all hydroelectric and operating appurtenances—except the locks—and all machinery, lands, and buildings in connection therewith, and all appurtenances thereof are hereby intrusted to the corporation for the purposes of this act.

"(b) The President of the United States is authorized to provide for the transfer to the corporation of the use, possession, and control of such other real or personal property of the United States as he may from time to time deem necessary and proper for the purposes of the corporation as herein stated.

"SEC. 7. (a) The corporation shall maintain its principal office in the immediate vicinity of Muscle Shoals, Ala. The corporation shall be held to be an inhabitant and resident of the northern judicial district of Alabama within the meaning of the laws of the United States relating to venue of civil suits.

"(b) The corporation shall at all times maintain complete and accurate books of accounts.

"SEC. 8. (a) The board shall file with the President and with the Congress, in December of each year, a financial statement and a complete report as to the business of the corporation covering the preceding fiscal year. This report shall include the total number of employees and the names, salaries, and duties of those receiving compensation at the rate of more than $2,500 a year.

"(b) The board shall require a careful and scrutinizing audit and accounting by the General Accounting Office during each governmental fiscal year of operation under this act, and said audit shall be open to inspection to the public at all times and copies thereof shall be filed in the principal office of the Muscle Shoals Corporation at Muscle Shoals in the State of Alabama. Once during each fiscal year the President of the United States shall have power, and it shall be his duty, upon the written request of at least two members of the board, to appoint a firm of certified public accountants of his own choice and selection which shall have free and open access to all books, accounts, plants, warehouses, offices, and all other places, and records, belonging to or under the control of or used by the corporation in connection with the business authorized by this act. And the expenses of such audit so directed by the President shall be paid by the board and charged as part of the operating expenses of the corporation.

"SEC. 9. The board is hereby empowered and authorized to sell the surplus power not used in fertilizer operations and for operation of locks and other works generated at said steam plant and said dam to States, counties, municipalities, corporations, partnerships, or individuals, according to the policies hereinafter set forth, and to carry out said authority the board is authorized to enter into contracts for such sale for a term not exceeding 10 years, and in the sale of such current by the board it shall give preference to States, counties, or municipalities purchasing said current for distribution to citizens and customers.

"SEC. 10. It is hereby declared to be the policy of the Government to distribute the surplus power generated at Muscle Shoals equitably among the States within transmission distance of Muscle Shoals.

"SEC. 11. In order to place the board upon a fair basis for making such contracts and for receiving bids for the sale of such power, it is hereby expressly authorized, either from appropriations made by Congress or from funds secured from the sale of such power, to construct, lease, or authorize the construction of transmission lines within transmission distance in any direction from said Dam No. 2 and said steam plant: *Provided*, That if any State, county, municipality, or other public or cooperative organization of citizens or farmers, not organized or doing business for profit, but for the purpose of supplying electricity to its own citizens or members, or any two or more of such municipalities or organizations, shall construct or agree to construct a transmission line to Muscle Shoals, the board is hereby authorized and directed to contract with such State, county, municipality, or other organization, or two or more of them, for the sale of electricity for a term not exceeding 15 years, and in any such case the board shall give to such State, county, municipality, or other organization ample time to fully comply with any local law now in existence or hereafter enacted providing for the necessary legal authority for such State, county, municipality, or other organization to contract with the board for such power: *And provided further*, That any surplus power not so sold as above provided to States, counties, municipalities, or other said organizations, before the board shall sell the same to any person or corporation engaged in the distribution and resale of electricity for profit, it shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission; and in case of any such sale if an amount is charged the ultimate consumer which is in excess of the price so deemed to be just, reasonable, and fair by the Federal Power Commission, the contract for such sale between the board and such distributor of electricity shall be declared null and void and the same shall be canceled by the board.

"SEC. 12. The net proceeds derived by the board from the sale of power and any of the products manufactured by the corporation, after deducting the cost of operation, maintenance, depreciation, and an amount deemed by the board as necessary to withhold as operating capital, shall be paid into the Treasury of the United States at the end of each calendar year.

"SEC. 13. The Secretary of War is hereby empowered and directed to complete Dam No. 2 at Muscle Shoals, Ala., and the steam plant at nitrate plant No. 2, in the vicinity of Muscle Shoals, by installing in Dam No. 2 the additional power units according to the plans and specifications of said dam, and the additional power unit in the steam plant at nitrate plant No. 2: *Provided*, That the Secretary of War shall not install the additional power unit in said steam plant until, after investigation, he shall be satisfied that the foundation of said steam plant is sufficiently stable or has been made sufficiently stable to sustain the additional weight made necessary by such installation.

"SEC. 14. It is hereby declared to be the policy of the Government to utilize the Muscle Shoals properties for fertilizer purposes in time of peace.

"SEC. 15. The Secretary of War is hereby authorized, with appropriations hereafter to be made available by the Congress, to construct, either directly or by contract to the lowest responsible bidder, after due advertisement, a dam in and across Clinch River in the State of Tennessee, which has by long usage become known and designated as the Cove Creek Dam, according to the latest and most approved designs of the Chief of Engineers, including its power house and hydroelectric installations and equipment for the generation of at least 200,000 horsepower, in order that the waters of the said Clinch River may be impounded and stored above said dam for the purpose of increasing and regulating the flow of the Clinch River and the Tennessee River below, so that the maximum amount of primary power may be developed at Dam No. 2 and at any and all other dams below the said Cove Creek Dam.

"SEC. 16. In order to enable and empower the Secretary of War to carry out the authority hereby conferred in the most economical and efficient manner, he is hereby authorized and empowered in the exercise of the powers of national defense in aid of navigation, and in the control of the flood waters of the Tennessee and Mississippi Rivers, constituting channels of interstate commerce, to exercise the right of eminent domain and to condemn all lands, easements, rights of way, and other area necessary in order to obtain a site for said Cove Creek Dam and the flowage rights for the reservoir of water above said dam and to negotiate and conclude contracts with States, counties, municipalities, and all State agencies, and with railroads, railroad corporations, common carriers, and all public-utility commissions and any other person, firm, or corporation for the relocation of railroad tracks, highways, highway bridges, mills, ferries, electric-light plants, and any and all other properties, enterprises, and projects whose removal may be necessary in order to carry out the provisions of this act. When said Cove Creek Dam and transportation facilities and power house shall have been completed, the possession, use, and control thereof shall be entrusted to the corporation for use and operation in connection with the general Muscle Shoals project and to promote flood control and navigation in the Tennessee River and in the Clinch River.

"SEC. 17. The corporation as an instrumentality and agency of the Government of the United States for the purpose of executing its constitutional powers shall have access to the Patent Office of the United States for the purpose of studying, ascertaining, and copying all methods, formulæ, and scientific information—not including access to pending applications for patents—necessary to enable the corporation to use and employ the most efficacious and economical process for the production of fixed nitrogen or any essential ingredient thereof, and any patentee whose patent rights may have been thus in any way copied, used, or employed by the exercise of this authority by the corporation shall have as the exclusive remedy a cause of action for any damages claimed to be instituted and prosecuted against the United States in the Court of Claims for the recovery of reasonable compensation, in accordance with the provisions of the act of June 25, 1910, as amended by the act of July 1, 1918 (title 35, sec. 68, U. S. C.), recoverable on a royalty basis in proportion to the entire volume of fixed nitrogen or essential ingredients manufactured by the corporation by the use and employment of such patent rights, and if said patent rights shall have contributed in a fractional part to the production of the entire volume, said compensation shall be proportionately allowed, and it shall be competent for the corporation to contract with any patentee in advance upon said basis, or to settle for any claim for such amount as to said corporation shall appear to be reasonable, fair, and just. The Commissioner of Patents shall furnish to the corporation, at its request and without payment of fees, copies of documents on file in his office.

"SEC. 18. The Government of the United States hereby reserves the right, in case of war, or national emergency declared by Congress, to take possession of all or any part of the property described or referred to in this act for the purpose of manufacturing explosives or for other war purposes; but, if this right is exercised by the Government, it shall pay the reasonable and fair damages that may be suffered by any party whose contract, for the purchase of electric power or fixed nitrogen or its ingredients, is thereby violated after the amount of the damages have been fixed by the United States Court of Claims in proceedings instituted and conducted for that purpose under rules prescribed by the court.

"SEC. 19. (a) All general penal statutes relating to the larceny, embezzlement, conversion, or to the improper handling, retention, use, or disposal of public moneys or property of the United States, shall apply to the moneys and property of the corporation and to moneys and properties of the United States intrusted to the corporation.

"(b) Any person who, with intent to defraud the corporation, or to deceive any director or officer of the corporation or any officer or employee of the United States (1) makes any false entry in any book of the corporation, or (2) makes any false report or statement for the corporation, shall, upon conviction thereof, be fined not more than $10,000 or imprisoned not more than five years, or both.

"(c) Any person who shall receive any compensation, rebate, or reward, or shall enter into any conspiracy, collusion, or agreement, express or implied, with intent to defraud the corporation or wrongfully and unlawfully to defeat its purposes, shall, on conviction thereof, be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 20. In order that the board may not be delayed in carrying out the program authorized herein the sum of $10,000,000 is hereby authorized to be appropriated for that purpose from the Treasury of the United States, of which not to exceed $2,000,000 shall be made available with which to begin construction of Cove Creek dam during the calendar year 1929.

"SEC. 21. That all appropriations necessary to carry out the provisions of this act are hereby authorized.

"SEC. 22. That all acts or parts of acts in conflict herewith are hereby repealed.

"SEC. 23. That this act shall take effect immediately.

"SEC. 24. The right to alter, amend, or repeal this act is hereby expressly declared and reserved."

And the House agree to the same.

JOHN M. MORIN,
W. FRANK JAMES,
B. CARROLL REECE,
PERCY E. QUIN,
WILLIAM C. WRIGHT,
Managers on the part of the House.

CHAS. L. MCNARY,
G. W. NORRIS,
E. D. SMITH,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, submit the following detailed statement in explanation of the effect of the action agreed upon and recommended in the conference report:

As amended by the House there were three major differences in the provisions of the resolution as it was passed by the Senate and as it was passed by the House. These were, first, whether the Government property at Muscle Shoals should be operated by the Secretary of War and Secretary of Agriculture or whether it should be operated by a Government corporation; second, whether Cove Creek Dam should be constructed; and third, what should be the character of the products to be manufactured. On the first two differences the Senate conferees receded completely, accepting the House language, while on the third difference the House conferees reached an agreement by a compromise that brings into conformity with the resolution as it passed the House the Senate provisions for the construction, operation, and maintenance of experimental plants at Muscle Shoals, the manufacture of nitrogen in such form as shall make it immediately available and practical for use by farmers in application to soil and crops, and to arrange with farmers and farm organizations for the practical use of the products of the plants at Muscle Shoals, as well as to cooperate with all existing agricultural experiment stations.

In short, the joint resolution as agreed to by your conferees provides for a Government corporation authorized and directed to conduct experiments in the production and use of nitrogenous products, to sell surplus electric power, and the Secretary of War is authorized to construct Cove Creek Dam for the benefit of navigation, flood control, and the generation of electric power.

An authorization for an appropriation of $10,000,000 is carried in the resolution, with a provision that not to exceed $2,000,000 of this amount is to be used to begin work at Cove Creek during the year 1929.

JOHN M. MORIN,
W. FRANK JAMES,
B. CARROLL REECE,
PERCY E. QUIN,
WILLIAM C. WRIGHT,
Managers on the part of the House.

Mr. UNDERHILL. Mr. Speaker, will the gentleman from Pennsylvania kindly tell us when he expects to call up the conference report?

Mr. MORIN. We can not take it up under the parliamentary procedure until the Senate has disposed of it.

MINERAL LAND OF CHOCTAW AND CHICKASAW NATIONS

Mr. LEAVITT. Mr. Speaker, by direction of the Committee on Indian Affairs, I call up the bill (S. 3867) to provide for the extension of the time of certain mining leases of the coal and asphalt deposits in the segregated mineral land of the Choctaw and Chickasaw Nations, and to permit an extension of time to the purchasers of the coal and asphalt deposits within the segregated mineral lands of the said nations to complete payments of the purchase price, and for other purposes, a similar House bill being on the House Calendar.

The SPEAKER. The gentleman from Montana calls up the bill S. 3867, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and hereby is, authorized, in his discretion and under such rules, regulations, terms, and conditions as he may prescribe, to extend to September 25, 1932, existing developed mining leases of the segregated coal and asphalt lands and deposits of the Choctaw and Chickasaw Nations which by their terms would expire prior to that date: *Provided*, That application is made by the owners of the leases for such extension of time: *And provided further*, That no lease shall be extended until the owner of such lease shall have paid all royalties due thereunder.

SEC. 2. That the act of Congress approved February 8, 1918 (40 Stat. L. 433), as amended and modified by the act of Congress approved February 22, 1921 (41 Stat. L. 1107), authorizing the sale of the leased and unleased coal and asphalt deposits in the segregated mineral land of the Choctaw and Chickasaw Nations, Oklahoma, be, and the same is hereby, amended and modified as follows:

"That the purchasers of any coal or asphalt deposits in the segregated mineral land of the Choctaw and Chickasaw Nations heretofore sold to them are hereby required to pay, within 60 days from the approval of this act, to the superintendent of the Five Civilized Tribes Agency, or such other official as the Secretary may designate, for the benefit of the Choctaw and Chickasaw Nations, all balances of principal and interest due from said purchasers on the purchase price: *Provided*, That in any case, upon application of the purchaser and showing made by him in support thereof, the Secretary of the Interior may, in his discretion and under such rules, regulations, terms, and conditions as he may prescribe, extend to such purchaser the time within which the purchaser may pay the balances of principal and interest due from him: *Provided, however*, That the time so allowed shall not in any case extend beyond the period of four years from the date of the approval of this act: *And provided further*, That said purchaser shall be required to pay in equal monthly installments, during the extended periods, the balances of principal and interest due from him: *Provided further*, That each purchaser, before allowing an extension, shall furnish the Secretary of the Interior security for payment of the amounts due under such extension, and upon application and showing made by said purchaser the Secretary of the Interior may allow such purchaser to pay said balances in quarterly or semiannual installments: *Provided further*, That upon failure of any purchaser to pay any installment within one month after the same becomes due under the terms of the time extension, the Secretary of the Interior is hereby authorized to and shall declare the sale of the coal and asphalt deposits forfeited and canceled in accordance with the terms and conditions under which the sale was made, and upon such forfeiture and cancellation all amounts paid by such purchaser, principal and interest, shall become the property of the tribes. It is herein further provided that when application is made by any purchaser for extension of time within which to make payment of deferred installments of the purchase price and interest thereon, and before action is taken thereon by the Secretary of the Interior under the provisions of this act, the governor of the Chickasaw Nation and the principal chief of the Choctaw Nation, or other legal representatives of said Indian nations, shall be notified thereof and afforded an opportunity to be heard or to file a written statement of their views in the case: *Provided*, That if any developed coal or asphalt lease shall expire and the owner of the lease shall not apply for the renewal thereof, or if the sale of any developed coal or asphalt lease shall be declared forfeited and canceled, the Secretary of the Interior is hereby authorized to take possession of said leased deposits and lease the same until September 25, 1932, or take whatever steps may be necessary to preserve and protect such property.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill was laid on the table.

EXTENSION OF REMARKS

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the dairying industry and to include some newspaper articles.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to extend his remarks in the RECORD on the dairying industry and to include some newspaper articles. Is there objection?

Mr. UNDERHILL. I do not object to his own remarks, but I do object to the newspaper articles.

Mr. GARNER of Texas. Right there, let me call the gentleman's attention to the fact that just a moment ago the gentleman from Iowa [Mr. COLE] did the same thing.

Mr. UNDERHILL. I was not here.

Mr. GARNER of Texas. Yes, you were; and the gentleman from Connecticut says you can get away with murder. [Laughter.] I suggest that the gentleman apply his rule to both sides.

Mr. UNDERHILL. Had the gentleman heard the application that was made by the gentleman from Iowa I think the gentleman would withdraw his inference that I have been unfair.

Mr. GARNER of Texas. I will; I think the gentleman tries to be consistent. But you have got to be on the alert if you hope to be consistent.

Mr. RANKIN. Reserving the right to object, Mr. Speaker, to the gentleman from Texas withdrawing his inference, I wish to suggest that the gentleman from Massachusetts was in the Chamber at the time the request of the gentleman from Iowa was made. I will withdraw my request to extend my remarks in the RECORD, but I can tell you now that some of the rest of us will watch this RECORD, too.

Mr. UNDERHILL. Thank you.

CONSENT CALENDAR

The SPEAKER. The Clerk will call the Consent Calendar.

GRANT OF CERTAIN LANDS TO NEW MEXICO

The first business on the Consent Calendar was the bill (H. R. 9207) granting to the State of New Mexico certain lands for reimbursement of the counties of Grant, Luna, Hidalgo, and Santa Fe, for interest paid on railroad-aid bonds, and for the payment of the principal of railroad-aid bonds issued by the town of Silver City, and to reimburse said town for interest paid on said bonds, and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that the bill be considered as read.

The SPEAKER. Is there objection?

Mr. LAGUARDIA. I object. That is the way to get the House quiet, by reading these bills.

The SPEAKER. The Clerk will proceed with the reading of the bill.

The Clerk read as follows:

Be it enacted, etc., That there is hereby granted to the State of New Mexico 400,000 acres of the surveyed nonmineral unappropriated, and unreserved public lands of the United States within said State, in trust, for the reimbursement of Grant, Luna, and Hidalgo Counties for interest paid by said counties on the bonds of Grant County, and for the reimbursement of Santa Fe County for interest paid by said county on the bonds of Santa Fe County, all of which said bonds were validated, approved, and confirmed by act of Congress of January 16, 1897 (29 Stat. 487); and also for the payment of the principal of the bonds issued by the town of Silver City and likewise validated by said act of January 16, 1897, and to reimburse said town of Silver City for interest paid by said town on said bonds: *Provided*, That if there shall remain any of the 400,000 acres of land so granted, or of the proceeds of the sale or lease thereof, or rents, issues, or profits therefrom, after the payment of said items and debt, such remainder of lands and the proceeds of sales thereof shall be added to and become a part of the permanent school fund of said State.

SEC. 2. That the said lands shall be selected in the same manner as provided for the selection of lands granted to the State of New Mexico by an act of the Congress of the United States approved June 20, 1910, entitled "An act to enable the people of New Mexico to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States," and such lands shall be leased and sold in such manner and under such limitations and restrictions as may hereafter be provided by legislative act of the State of New Mexico.

SEC. 3. Said State of New Mexico, through the State board of finance, shall determine the interest paid by said counties on said indebtedness, and the manner of liquidating the same, and likewise the amount of the principal due on the bonds issued by the town of Silver City, and the interest paid by said town and the manner of liquidating the same.

Mr. CRAMTON. Mr. Speaker, I offer an amendment.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Page 1, line 4, strike out the words "four hundred" and insert in lieu thereof the words "two hundred and fifty."

Mr. CRAMTON. Mr. Speaker, I will ask to have considered with that the same amendment on page 2, line 9.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 2, line 9, strike out the words "four hundred" and insert the words "two hundred and fifty."

Mr. CRAMTON. Mr. Speaker, in connection with that amendment, I would like to take this opportunity to express my appreciation of the cooperation of the gentleman from New Mexico [Mr. MORROW] in working out this legislation as well as other legislation of great importance to his State. The result that has been accomplished could not have been accomplished otherwise than by his broad and conscientious cooperation. [Applause.]

The bill in question is one that I had some hesitation about with respect to our obligations, but he has urged that we have some obligation, and inasmuch as the bill turns over a grant of land to his State which I believe will be helpful to the development of the State, and by reason of the very broad position the gentleman from New Mexico has taken on some other legislation in which we have been much interested, I am glad to support his bill.

I understand the amendment I have offered, while it has not been desired by the gentleman from New Mexico, will be accepted by him.

Mr. LAGUARDIA. Mr. Speaker, I appreciate the efforts by which the gentleman from Michigan [Mr. CRAMTON] is bringing about a compromise on this bill, but this situation which we are now seeking to rectify is proof of the hasty legislation of Congress, under the plea that it would not involve any expense to the Government. In 1907 Congress, for no reason at all, went out of its way to validate the issuance of bonds by Santa Fe County and Silver City, and I knew at that time the plea was made that the legislation involved no expense on the part of the Government. Here we are, many years later, confronted with the situation that we are morally bound to do something by reason of the act of 1907.

Mr. CRAMTON. My study convinces me that the action being taken on this bill is a very generous action on the part of the Federal Government. I am reconciled to it because the State of New Mexico, through its Representative, has been showing similar breadth of view with respect to other important pieces of legislation.

Mr. LAGUARDIA. We were assured that it would involve no expense to the Treasury.

Mr. MORROW. Mr. Speaker, I ask unanimous consent that the bill S. 2535 be substituted for the House bill 9207, and to accept the House amendment as offered to the Senate bill.

The SPEAKER. The gentleman from New Mexico asks unanimous consent to substitute the Senate bill for the House bill. Is there objection?

There was no objection.

Mr. CRAMTON. Then I offer as a substitute the Senate bill.

The SPEAKER. The Clerk will report the Senate bill.

The Clerk read as follows:

Be it enacted, etc., That there is hereby granted to the State of New Mexico 400,000 acres of the surveyed nonmineral, unappropriated, and unreserved public lands of the United States within said State, in trust, for the reimbursement of Grant, Luna, and Hidalgo Counties for interest paid by said counties on the bonds of Grant County, and for the reimbursement of Santa Fe County for interest paid by said county on the bonds of Santa Fe County, all of which said bonds were validated, approved, and confirmed by act of Congress of January 16, 1897 (29 Stat. 487); and also for the payment of the principal of the bonds issued by the town of Silver City and likewise validated by said act of January 16, 1897, and to reimburse said town of Silver City for interest paid by said town on said bonds: *Provided*, That if there shall remain any of the 400,000 acres of land so granted, or of the proceeds of the sale or lease thereof, or rents, issues, or profits therefrom, after the payment of said items and debt, such remainder of lands and the proceeds of sales thereof shall be added to and become a part of the permanent school fund of said State.

SEC. 2. That the said lands shall be selected in the same manner as provided for the selection of lands granted to the State of New Mexico by an Act of the Congress of the United States approved June 20, 1910, entitled "An act to enable the people of New Mexico to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States," and such lands shall be leased and sold in such manner and under such limitations and restrictions as are provided in the said act of June 20, 1910.

SEC. 3. Said State of New Mexico through its State board of finance shall determine the interest paid by said counties on said indebtedness, and the manner of liquidating the same, and likewise the amount of the principal due on the bonds issued by the town of Silver City, and the interest paid by said town and the manner of liquidating the same.

The SPEAKER. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 1, line 4, strike out the words "four hundred" and insert in lieu thereof the words "two hundred and fifty"; and on page 2, line 9, strike out the words "four hundred" and insert in lieu thereof the words "two hundred and fifty."

The amendment was agreed to.

Mr. MORROW. Mr. Speaker, I want to thank both gentlemen on the other side for their expressions and I desire to extend my remarks in the RECORD by inserting the report upon this bill.

The SPEAKER. Is there objection to the request of the gentleman from New Mexico?

Mr. HASTINGS. Mr. Speaker, were the House amendments incorporated in the Senate bill?

The SPEAKER. They were. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill was laid on the table.

Mr. MORROW. Mr. Speaker, this legislation is very important to four counties, namely, Santa Fe, Grant, Luna, and Hidalgo, and to the town of Silver City, N. Mex. The indebtedness of each one follows:

Grant County	$57,193.73
Luna County	25,758.07
Hidalgo County	22,748.20
Santa Fe County	88,552.00
Silver City	203,250.00
Total	397,502.00

The report clearly explains the entire transaction. The legislation clears up the situation which was attempted to be cleared up by the grant of land to the State of New Mexico under and by virtue of the enabling act of June 20, 1910 (36 Stat. 557), when 1,000,000 acres of land were provided to the State to be applied in the payment of the bonds and accrued interest issued by the then counties of Santa Fe and Grant. The town of Silver City was entirely overlooked. The proceeds after the paying of the bonds and the accrued interest thereon went to the common-school fund of the State. Under the compact with the State of New Mexico this fund could not be reached without amending the State constitution.

The legislation proposed is for the purpose of clearing up that situation. The House report is attached hereto:

[H. Rept. No. 890, 70th Cong., 1st sess.]

GRANTING CERTAIN LANDS TO NEW MEXICO

Mr. MORROW, from the Committee on the Public Lands, submitted the following report (to accompany H. R. 9207):

The Committee on the Public Lands, to whom was referred H. R. 9207, having considered the same, report thereon with a recommendation that it be passed without amendment.

In 1880 Santa Fe County, in the then Territory of New Mexico, issued bonds to the New Mexico & Southern Pacific Railroad Co. in the aid of the construction of a line from Lamy to Santa Fe; in 1887 said county issued bonds to the Texas, Santa Fe & Northern Railroad Co., in aid of the construction of a line from Santa Fe to Espanola.

In 1883 Grant County, in the then Territory of New Mexico, issued bonds to the Deming, Sierra Madre & Pacific Railroad Co., in the aid of the construction of a line from Deming to Silver City. In the same year the town of Silver City, the county seat of said Grant County, issued its bonds to the same railroad, in aid of the construction of the same line.

At approximately the same time the counties of Pima, Maricopa, Yavapai, and Coconino, in the then Territory of Arizona, voted bonds in the aid of railroad construction.

Thereafter, in the case of Lewis *v.* Pima County (155 U. S., p. 54), the Supreme Court of the United States unanimously held the bonds issued by Pima County to be void ab initio because issued contrary to the restrictions imposed upon the legislatures of Territories by Congress, and that such bonds created no obligation against the county. The Pima County bonds were in exactly the same legal position and status as the railroad bonds issued by the various counties in the Territory of New Mexico and by the town of Silver City. This decision was rendered in 1894.

By act of Congress of January 16, 1897 (29 Stat. 487), the bonds so issued by Santa Fe and Grant Counties and by the town of Silver City were validated, approved, and confirmed, and said counties and said town were required to assume and pay the principal and interest on said bonds.

In the act to enable the people of New Mexico and Arizona to form a constitution and State government and be admitted into the Union, approved June 20, 1910 (36 Stat. 557), a grant of land of 1,000,000 acres was made to the State of New Mexico "for the payment of the bonds and accrued interest thereon, issued by Grant and Santa Fe Counties, N. Mex., which said bonds were validated, approved, and confirmed by act of Congress of January 16, 1897."

When the enabling act was before the Senate for consideration, Senator Beveridge, in addressing the Senate on the report of the Senate committee, among other things, said:

"But the Senate committee agreed that there were certain bonds which the United States was morally obligated to pay. Those were the bonds of Yavapai and Maricopa Counties, in Arizona, and Santa Fe and Grant Counties, in New Mexico. In both of these cases bonds had been issued in the aid of a railroad. They had been illegally issued. The Supreme Court of the United States, when the case was taken there, said, by the unanimous opinion of the court, delivered by Mr. Justice Brown, in Lewis *v.* Pima County (155 U. S.), that it was 'too clear for argument' that the bonds were void ab initio.

"But whatever the reason was, Congress, after the Supreme Court had declared these bonds invalid, passed a law validating them. Upon that principle, I think, it was practically the unanimous opinion of members of the Committee on Territories that the United States should pay these bonds, because by reason of any act of Congress a moral obligation had been created."

By oversight the indebtedness of the town of Silver City was omitted from the provisions of the enabling act. The total of the sums paid by the said counties for interest, and the amount still due and owing by the town of Silver City, with interest to September 1, 1927, aggregate $397,502.

Luna County was carved out of Grant County in 1901; Hidalgo County was carved out of Grant County in 1920.

The District Court of the United States for the District of New Mexico held that no part of the proceeds of the congressional land grant could be used except for unpaid principal and interest; that the act was not a reimbursement act.

By the act of Congress approved June 5, 1920, the consent of Congress was granted to the State of New Mexico to apply any part of the proceeds of said grant theretofore made in the enabling act to reimburse said counties and town.

The Supreme Court of the State of New Mexico subsequently held, in the case of Bryant *v.* Board of Loan Commissioners of the State of New Mexico et al. (28 N. Mex., p. 319), that the act of the New Mexico Legislature of 1921, attempting to make the congressional act effective, was unconstitutional because, under the terms of the enabling act and the Constitution, a compact was formed with provision that it should not be changed thereafter, except by act of Congress, accepted through a constitutional amendment. Among other things, the court said:

"The result reached in this case operated as a great injustice upon Grant and Santa Fe Counties and the town of Silver City. The debts were invalid when contracted. Congress recognized this when it passed the enabling act, and recognized the moral obligation of the Government to pay these debts. Had it been advised that there was reimbursement to be made, it would doubtless have so provided, as it has since signified its assent thereto by the act of June 5, 1920."

The proposed act grants "surveyed, nonmineral, unappropriated, and unreserved" land to the State of New Mexico, in trust, with provision that it be selected, leased, and sold as provided in the original enabling act admitting said State into the Union. It also provides that the residue, if any there be after said municipalities have been fully reimbursed, shall be added to and become a part of the permanent school fund of said State.

The report of the Secretary of the Interior is attached hereto, as follows:

MARCH 5, 1928.

Hon. N. J. SINNOTT,
Chairman Committee on the Public Lands,
House of Representatives.

MY DEAR MR. SINNOTT: I have your request of February 17, 1928, for a report on H. R. 9207, in which it is proposed to grant 400,000 acres of land to the State of New Mexico in trust for the reimbursement of Grant, Luna, Hidalgo, and Santa Fe Counties, for interest paid on certain railroad bonds and for the payment of the principal of certain railroad bonds issued by the town of Silver City and to reimburse said town for the interest paid thereon.

This bill is similar to S. 380 of the Sixty-eighth Congress, and H. R. 210 of the Sixty-ninth Congress, upon which I submitted reports under dates of March 15, 1924, and January 13, 1926, respectively. The previous bills provided for a grant of 500,000 acres, while this bill provides for a grant of 400,000 acres.

This bill is identical with S. 2535, on which I submitted a report dated February 29, 1928.

I call attention to the grant of 1,000,000 acres in payment of these railroad bonds issued by Santa Fe and Grant Counties.

This grant of 1,000,000 acres has been fully satisfied by selections which have been approved and the lands certified to the State.

The history of this grant is, concisely, as follows: Bonds were issued by Santa Fe and Grant Counties, and by the town of Silver City, N. Mex., to aid in the construction of certain railroads, the first issue of such bonds being made by Santa Fe County in the year 1880.

In the case of similar bonds issued by Pima County, Ariz., it was held by the United States Supreme Court, October 29, 1894 (Lewis v. Pima County, 155 U. S. 54), that they had been illegally issued and created no obligation against the county which could be lawfully enforced. This decision was considered to establish the invalidity of all like bonds, and thereafter the counties in New Mexico refused to pay interest on the bonds or to recognize their validity.

By act of Congress approved January 16, 1897 (29 Stat. 487), the bonds issued by Santa Fe and Grant Counties, and by the town of Silver City were validated, it being provided by the act that nothing therein should be construed so as to make the Government of the United States liable or responsible for the payment of any of said bonds.

It was evidently by reason of this act of Congress validating such bonds, which otherwise the town and counties of New Mexico would not have been required to assume payment for, that Congress in the enabling act of June 20, 1910 (36 Stat. 557), made the grant to the State of New Mexico of 1,000,000 acres of land, it being provided that the proceeds of such lands should be applied to the "payment of the bonds and accrued interest thereon issued by Santa Fe and Grant Counties," and further provided that if there should remain any of the 1,000,000 acres of land so granted, or of the proceeds therefrom after the payment of said debts, such remainder of lands and the proceeds of the sales thereof should be added to and become a part of the permanent school fund of said State.

The counties of Luna and Hidalgo were afterwards carved out of Grant County, and these counties assumed their proportionate part of the debt of the parent county.

It appears that at the time of the passage of the act of June 20, 1910, no thought was given to the matter of the bonds that had been issued by the town of Silver City as separate and apart from the bonds issued by Grant County, and later the question arose as to the reimbursement for the interest that had already been paid.

By the act of Congress approved June 5, 1920, authority and consent were given to the State of New Mexico to apply any part of the proceeds of the 1,000,000-acre grant to the reimbursement of Grant, Luna, and Hidalgo Counties, and to Santa Fe County for the interest already paid upon these bonds, and also for the payment of the principal and interest of the bonds issued by the town of Silver City.

Inasmuch, however, as the provisions of the 1910 grant had been carried into the constitution of the State of New Mexico, it was held by the supreme court of that State that the 1920 act could not be effectuated without an amendment to the State constitution of New Mexico.

It was suggested in my reports on the similar bills of a prior Congress that before any further grant be made for the purpose the exact amount of interest paid be ascertained and the total amount of indebtedness of the town of Silver City, in order that a calculation might be made of the proper acreage to satisfy such reimbursements. There have been submitted by Senator BRATTON (1) a certified copy of the minutes of the meetings of the Board of Loan Commissioners of the State of New Mexico, of date August 19, 1921, determining the sums due the respective counties for interest paid by such counties, and the indebtedness of the town of Silver City for principal and interest, and (2) a certificate of the treasurer of Silver City under date of December 22, 1927, showing the total amount of indebtedness of the town of Silver City, with interest, to date September 21, 1927. From these reports the total amount of indebtedness for which reimbursement is sought is shown to be $397,502.

There were also submitted certificates of the treasurer and of the commissioner of public lands of the State of New Mexico, from which it is shown that in the month of September, 1925, there were sufficient moneys in the fund created by the sale and leasing of lands under the 1,000,000-acre grant made by the act of 1910 to pay the principal and accrued interest of the bonds issued by Santa Fe and Grant Counties, whereupon said bonds were retired with the moneys so accrued, since which date all proceeds from said land grant have been apportioned to the common school fund of the State of New Mexico. It is not shown what portion of the 1,000,000-acre grant had been sold by the State and the amounts remaining from which the proceeds are to be applied to common schools.

In connection with my report on S. 2535 the Director of the Bureau of the Budget advised that the proposed legislation would be in conflict with the financial program of the President.

Very truly yours,

HUBERT WORK.

BRIDGE ACROSS THE OHIO RIVER

The next business on the Consent Calendar was the bill (H. R. 11357) authorizing the State of Indiana to construct, maintain, and operate a toll bridge across the Ohio River at or near Evansville, Ind.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. ROWBOTTOM. Mr. Speaker, I ask unanimous consent that this bill may be temporarily passed over. There are some gentlemen on the way here from Evansville who are going to confer with the gentleman from Kentucky [Mr. KINCHELOE], and I would like to bring this bill up later in the afternoon.

The SPEAKER. The gentleman from Indiana asks unanimous consent that this bill may be temporarily passed over without prejudice. Is there objection?

Mr. COCHRAN of Missouri. Mr. Speaker, reserving the right to object, and I shall not object, I ask unanimous consent to proceed for five minutes on bridge legislation.

The SPEAKER. The Chair does not like to recognize gentlemen on consent day.

Mr. COCHRAN of Missouri. Mr. Speaker, I withdraw my request and my reservation of objection.

Mr. KINCHELOE. Mr. Speaker, reserving the right to object to the request of the gentleman from Indiana, I shall not object, with the understanding that the gentleman will not bring up the bill until he notifies the gentleman from Kentucky.

Mr. ROWBOTTOM. I will do that.

Mr. LINTHICUM. Mr. Speaker, reserving the right to object, I should like to ask the gentleman a question. Is it the intention of the State of Indiana to build a toll bridge?

Mr. ROWBOTTOM. They are issuing bonds, and as soon as the bonds are retired it becomes a free bridge.

Mr. LINTHICUM. If we build this bridge, will it make access to the Vice President's home any easier?

Mr. ROWBOTTOM. I could not tell the gentleman that.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

DESCHUTES PROJECT IN OREGON

Mr. SINNOTT. Mr. Speaker, I ask unanimous consent that the next bill on the calendar, S. 1186, to provide for the construction of the Deschutes project in Oregon, and for other purposes, be passed over without prejudice.

The SPEAKER. The gentleman from Oregon asks unanimous consent that Senate bill 1186, the next bill on the calendar, be passed over without prejudice. Is there objection?

There was no objection.

Mr. COCHRAN of Missouri. Mr. Speaker, I ask unanimous consent to proceed for five minutes.

The SPEAKER. Does the gentleman from Missouri desire to speak with reference to a bill on the calendar?

Mr. COCHRAN of Missouri. On bridge bills on the calendar, yes.

The SPEAKER. The Chair will recognize the gentleman. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COCHRAN of Missouri. Mr. Speaker and Members of the House, I realize all are anxious to expedite pending legislation and get home but I feel in the interest of the country I should add another chapter to the bridge situation.

I have checked up and find the Commitee on Interstate and Foreign Commerce has acted on 243 bridge bills during this session and 8 additional bills are pending in committee. Some of the measures provide for free bridges, others for railroad bridges, and the balance grant permission to corporations and private individuals to construct and operate toll bridges. This is evidence of the alarming situation which I have pointed out on several occasions.

I have received many letters on this subject which convince me of a nation-wide interest in the toll-bridge question. I have been exceedingly careful not to attack the integrity of any individual or corporation unless a thorough investigation warranted such action.

This morning a letter comes to me from Arkansas, containing a great deal of information relative to the Arkansas bridge situation, and also a clipping from a newspaper under a Little Rock date line of May 16, stating New York capitalists have acquired control of the toll bridge across the White River at De Valls Bluff, Prairie County, from a Mr. Kempner and a Mr. Lenon, of Little Rock, and the price realized was quoted as $500,000. This deal followed the sale of a $500,000 issue of first-mortgage bonds of the White River Bridge Corporation, a Delaware Corporation, of which Mr. Lenon is president and Mr. Kempner is the largest individual stockholder.

A man named Harry Bovay, whose name I have seen on numerous bridge bills, received the consent of Congress to construct this bridge, but the article says he is no longer connected with the corporation, evidence that he assigned the franchise. I am told Bovay requested some additional franchises, but certain Senators opposed his efforts and prevented the bills from being passed.

Now, here is the amazing feature. This toll bridge is on the Memphis-Little Rock Highway, and the charge is $1 per car to cross. The same cars that cross the private toll bridge also cross what is called the Harahan Viaduct, and this viaduct is operated by the State and the charge is 20 cents per car. At

20 cents per car, I am informed, the revenue is $30,000 per month, and the money is paying for the construction of a new viaduct.

Now, the article states the toll bridge cost $200,000 to construct, but we see where it sells for $500,000 to New York interests.

As I have stated before, I realize bridges are a public necessity, but I again emphasize my conviction that the Congress which makes the construction of these projects possible should in some way supervise the issuance of securities in connection therewith.

When I brought up this subject several months ago I was told by Members this was not feasible, but if the committee will learn just what the Water Power Commission is doing in this respect, in connection with applications for power sites, it will see it is feasible, and that Army engineers are assigned to the Water Power Commission to assist in making the necessary investigations.

I sincerely hope the Members will make some investigations in their localities during the vacation period of the toll-bridge situation, so that those of us who propose in the next session to demand a different form of bridge bills will have your assistance. [Applause.]

Mr. Speaker, I have telegraphed to Arkansas for permission to use the information I have, and I ask unanimous consent, if I receive that permission from the author of the communication, that I be permitted to publish it in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. DENISON. Mr. Speaker, I do not object to the gentleman's extending his own remarks, but I do object to printing newspaper articles on extraneous matters of that kind.

Mr. COCHRAN of Missouri. Mr. Speaker, I will withdraw the request if the gentleman from Illinois objects.

Mr. DENISON. I receive a lot of that stuff, and I could fill the CONGRESSIONAL RECORD full of it if I thought it was worth it.

THE CURTIS-REED BILL

Mr. MERRITT. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD on the Reed-Curtis education bill.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MERRITT. Mr. Speaker, the so-called Curtis-Reed bill, which is H. R. 7, covers a proposition which has been long before the country. It gained considerable impetus as a result of the World War, because in time of war all the forces of the Nation are necessarily centralized and put under control of the President as the Commander in Chief of the Nation.

The result of the war was to demonstrate to the Nation what wide results and in some ways what quick results could be brought about by this centralized application of the Nation's power, and many people interested in education and who are sincerely interested in its improvement conceived the idea that this improvement could be brought about more thoroughly and more rapidly by creating a department of education at Washington, which should at least be in touch with and should give information and advice to the entire educational system of the Union.

This movement is only one of many which began as a result of the war and which has resulted in increasing immensely the activities of the central Government, so that in many ways it affects and curtails the activities of States and communities through new agencies created or extended since the war. It is generally agreed by statesmen and students of the Constitution that as the country grows in extent and in population and wealth it is not less important, but more important, to keep in mind the underlying principles of the Constitution on which the Government of the country rests and which have proved so admirably adapted and adaptable to a Nation which has grown from a few scattered communities along the Atlantic seaboard into a Nation of continental extent and with a population of more than a hundred millions.

My objection to this bill is based on the underlying proposition that the Constitution of the United States reserves to the States all power not delegated to the United States, and to the people all personal liberty consistent with public order and with the rights of others.

In consequence of this policy the States and the various communities and inhabitants in general of the United States have been known for their independence, their initiative, and their adaptability to new and changed conditions.

At the other end of the line we might perhaps cite the inhabitants of imperial Germany before the war, who were controlled in all their activities, both in public and private. This is especially true of the German educational system which, while in a way efficient, inculcated in the minds of its children and so passed on to the minds of all its inhabitants historical untruths and an unmoral basis of life which went far toward producing the Great War. In other words, the schools were used as the best method of an imperial and warlike propaganda.

Now the public-school system of America, while it has been perhaps unduly lauded from the educational side, has been a tremendous instrument in unifying the various races who have come to this country.

And one reason why it has been so successful has been that the schools have been managed by the different States and communities in accordance with the local conditions, and they have been adapted to the needs of the particular classes of people which they have served.

It is, of course, true that school advantages in different parts of the country have not been equal and that in many parts of the country to-day they are not adequate, but the different communities have felt that the responsibility was theirs, and as time went on they have felt more and more the pressure of local public opinion and outside public opinion to improve their educational facilities and methods. In whatever improvement was made the community felt a direct pride and had an incentive for further improvement.

It is to hasten the improvement of these methods and, as some proponents of the bill say, to unify the educational system of the United States, that a United States department of education, with its head a member of the President's Cabinet, is proposed.

Before the Great War there was in the minds of many people the notion that it was only necessary to have any project undertaken by the Government, and especially by the National Government, to insure the success of the project and to insure that it would be managed with superhuman wisdom and efficiency. But after the unified Government control of the railways, which almost destroyed the efficiency of the service and which cost the Nation nearly two thousand millions of dollars, and after the unified Government management of the Shipping Board, people familiar with the facts have ceased to believe that there is any magic, unless it is bad magic, in having great systems which affect all the people managed by a central Government agency.

As to unifying the system of public education, the tendency, and probably the necessity, of every central Government agency is to formulate policies and rules governing the whole country. In a country of the continental extent of the United States, and with over a hundred millions of people, rules which may perhaps fit the people of Maine may not be at all suitable to the people of Oklahoma, nor will the rules suitable for the State of New York suit the conditions in Montana; but to a department official nothing is so sacred as a department rule, and standardization has a very attractive sound and is favored by all central departments.

But in educational matters standardization means an educational and mental strait-jacket and prevents progress. It is said by the proponents of the law that there is no intention to interfere with the local control of schools or educational matters. But the history of all Government departments and bureaus is that they tend to increase their jurisdiction and their operations and their staff of employees. Being convinced of their own good intentions and their own superior knowledge, they constantly tend to impose their ideas and their methods on all those who are under their jurisdiction. And as they extend their power and influence they, in turn, exert more and more influence on Congress, and so the system tends to expand year after year. It is certain that if such a department should be founded it would not be long before its influence would extend to every public school in the United States. It is easily conceivable that under sudden waves of excitement or of passion circumstances might occur under which we should have, not a little flare-up of intolerence or bigotry in a remote county in Tennessee, or in a State, as in Oregon, but one which affected the United States.

The fact that an official is a member of the President's Cabinet at once puts him into politics. The Cabinet is expected to support the policies of the President and the party in power and to perpetuate and extend them. The power of such a department for propaganda through the schools in the rising generation is beyond imagination, and, as above stated, was shown in its effect on the German Nation. The science of propaganda was brought to great efficiency during the war, and some interesting facts in this regard were brought out in the hearings of the Joint Committee on Printing in the Sixty-sixth Congress. It appeared that numberless publications of the

Government in every department had been used in a carefully worked up propaganda in favor of the adoption of the League of Nations. One of the most active was the present Bureau of Education which now is a bureau in the Department of the Interior. It had various publications, among them National School Service, which had a circulation of nearly 600,000 copies. Just as an example, this journal in an editorial stated:

Against the narrow and selfish type of nationalism the Great War has been fought and won.

Another Bureau of Education publication called School Life had the following:

One large result of the present peace conference should be an international league for education in democracy. The leadership which the new world will ask for is a leadership expert and effective, in sympathy with democratic ideals of work and with democratic ways of living. The leaders we ask for must have world outlook.

These quotations are not inserted as arguments for or against any position on the treaty, but merely to show how Government publications may be the vehicle for extensive propaganda and, moreover, for political or religious propaganda.

If the argument for centralization and efficiency and standardization is sound, then we should carry the argument to its logical conclusion, which would lead us to run all intrastate matters from the State capitols so that the mayors and municipal governments of the various cities would all be appointed from the central State authority, and we should have efficient and standardized State and town governments. I fancy, however, that scarcely anyone would desire to push the argument so far.

Everything worth while must be bought at some price. The price one must pay for a free and democratic form of government is a certain looseness and inefficiency in the Government. But the gain is that by participating in their own government in all directions citizens learn about its structure, become directly interested in its success, and develop their own characters and judgments.

By centralized administration all these good qualities become atrophied, and even if the central government remains honest it eventually becomes fixed and wooden and therefore inefficient.

If any one doubts that the scope of the Department of Education under the Curtis-Reed bill would be tremendous and would touch the community at every point he has only to read section 8 of the bill, which is as follows:

SEC. 8. (a) The department of education shall collect such statistics and facts as shall show the condition and progress of education in the several States and in foreign countries. In order to aid the people of the several States in establishing and maintaining more efficient schools and school systems, in devising better methods of organization, administration, and financing of education, in developing better types of school buildings and in providing for their use, in improving methods of teaching, and in developing more adequate curricula and courses of study, research shall be undertaken in (1) rural education; (2) elementary education; (3) secondary education; (4) higher education; (5) professional education; (6) physical education, including health education and recreation; (7) special education for the mentally and physically handicapped; (8) the training of teachers; (9) immigrant education; (10) adult education; and (11) such other fields as in the judgment of the secretary of education may require attention and study.

The reasons for the Curtis-Reed bill on the side of Americanization are also fallacious and are subject to precisely the same objections stated above.

Real Americanization can not be taught in books, and certainly can not be taught from any central authority. Each community must assimilate and Americanize its own inhabitants. One primary essential of any true Americanization is the fostering in every individual, along with a sense of independence, of a feeling of personal interest in and responsibility for his own environment and his own Government. Most of the present-day immigrants come from countries where they look upon the government as a power which imposes its will from without. And they must learn from experience gained in their own communities that, under our system, government is the will of the people expressed in orderly processes of the law. The Curtis-Reed bill and other bills like it will hinder this conception of Americanization and hinder any true Americanization of our population.

In short, if the people are to be educated and if the schools are to be a good influence, not only in the matter of the education of children but for the Government and for the interest of the people in their Government, the educational system of every State and every community must spring from the people themselves and not be imposed upon them or regulated by some agency outside of and above them.

BRIDGE ACROSS THE MISSISSIPPI RIVER

The next business on the Consent Calendar was the bill (S. 2449) to authorize the construction of a bridge across the Mississippi River at or near the city of Baton Rouge, in the parish of East Baton Rouge, and a point opposite thereto in the parish of West Baton Rouge, State of Louisiana.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. COLLINS. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. The gentleman from Mississippi asks unanimous consent that this bill may be passed over without prejudice. Is there objection?

There was no objection.

THOMAS A. EDISON

The next business on the Consent Calendar was House joint resolution (H. J. Res. 243) to provide for the coinage of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I would like to suggest to the gentleman from New Jersey the striking out of the second section of this resolution. I am sure there can be no opposition to the first section, providing for a gold medal to be awarded to Mr. Edison, but the advisability of adopting the second section, which provides for the striking of coins and giving them to somebody to sell, is doubtful, as that has proved very unsatisfactory in the past. With that understanding, I shall not object, and I shall offer an amendment striking out the whereas clauses and the second section.

Mr. CRAMTON. Mr. Speaker, if the gentleman will yield, I have been much in sympathy with this resolution. Edison's beginning was in my district, and naturally I am much in sympathy with it. I believe that the elimination of section 2 adds to the force of the tribute involved in the legislation.

Mr. LAGUARDIA. I think so, too. With that understanding, Mr. Speaker, I withdraw any objection.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The Clerk read the resolution, as follows:

Whereas Thomas A. Edison has demonstrated that inventive genius may be turned to a better and nobler purpose than the mere making of money, and has added more to the material elements of civilization, by his own inventions and what they have suggested to others, than any other one man in the history of the world; and

Whereas this Government under which Thomas A. Edison was born, and in which for more than a generation he has been an educational institution of the first rank, by arousing in the minds of young men some sense of the limitless possibilities of science when devoted to the service of man, has at no time seen fit to formally honor this one individual who has such a firm hold on the popular imagination as to force men to watch what he is doing and hear what he is saying: Therefore be it

Resolved, etc., That in recognition of the achievements of Thomas A. Edison, the Secretary of the Treasury is authorized and directed to cause to be struck and presented to Thomas A. Edison a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary of the Treasury. For such purpose there is authorized to be appropriated the sum of $1,000.

SEC. 2. The Secretary of the Treasury shall cause duplicates in bronze of such medal to be coined and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor), and the appropriations used for carrying out the provisions of this section shall be reimbursed out of the proceeds of such sale.

Mr. LAGUARDIA. Mr. Speaker, I offer an amendment to strike out section 2 of the bill.

Mr. VESTAL. Mr. Speaker, the gentleman from New Jersey [Mr. PERKINS] is not present this morning. I happen to be one of the members of the committee. I desire to say I think it has been really the wish of the committee in respect of all of these bills not to permit a bill to be reported from the committee authorizing coinage of any money. I have been opposed to all of them and I think it is perfectly all right that this section shall be stricken out.

Mr. LAGUARDIA. I thank the gentleman.

The SPEAKER. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 2, line 10, strike out all of section 2.

The amendment was agreed to.

The preamble was stricken out.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

A motion to reconsider was laid on the table.

AMENDMENTS OF COPYRIGHT ACTS

The next business on the Consent Calendar was the bill (H. R. 8913) to amend sections 27, 42, and 44 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I have here three proposed amendments. Two of the amendments provide added protection to copyright holders in having their copyrighted article or play used by moving pictures. I do not believe it is hardly fair to flash these amendments so suddenly, and if the gentleman would desire it I would be pleased to have the bill passed for the present without prejudice so that the gentleman may study the amendments.

Mr. VESTAL. Mr. Speaker, I ask unanimous consent that the bill may be passed over temporarily without prejudice.

Mr. BUSBY. Mr. Speaker, I object to the bill. I am on the committee, I know what the bill contains, and I am unalterably opposed to it and there is no use of having it passed over temporarily.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. BUSBY. I object.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BUSBY. I object, Mr. Speaker.

ALABAMA AND COUSHATTA INDIANS

The next business on the Consent Calendar was the bill (H. R. 5479) to provide for the purchase of land, livestock, and agricultural equipment for the Alabama and Coushatta Indians in Polk County, Tex., and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, since the purpose of the bill has been met, I move that the bill be indefinitely postponed, and in connection with this motion I would like to be heard.

Mr. BRIGGS. Will the gentleman just let the bill be passed over until action is taken on the deficiency bill in the Senate? I may state, Mr. Speaker, that the gentleman from Michigan and myself and others, including Representative LEAVITT, the able chairman of the House Committee on Indian Affairs, have reached an agreement with reference to these Indians whereby an appropriation was carried in the deficiency appropriation bill. The Indians are also to be put upon the status of other Indians and are to be given the same treatment. I am perfectly agreeable to the passing over of the bill.

Mr. Speaker, the Alabama and Coushatta Indians of Texas and those interested in them have struggled for recognition by the United States for many years. They have only received a small educational appropriation within the last 10 years and nothing before that time. In the Seminole War members of this tribe rendered splendid service to the great Andrew Jackson, leading the forces of the United States, and when he became President he made acknowledgment of that service in presenting a silver plate or collar inscribed:

From Andrew Jackson, President of the United States, to John Blount, his faithful guide in the Seminole War.

These Indians, with their present chief, Sun Kee, have almost become discouraged with their condition of helplessness in the face of adverse economic difficulties, but they will now look upon life with new hope and new resolution since the House of Representatives has recognized them in the deficiency appropriation bill, passed last Friday, as American Indians entitled to relief from their Government, and not only made an appropriation for them of $40,000 for the purchase of additional land, livestock, and agricultural equipment, being $35,000 for land and $5,000 for the other purposes, but has given assurance that these Indians will be accorded the treatment given other Indians at this time in the appropriations carried in the general appropriation bills.

It has given me deep satisfaction to have been able to present the cause of the Alabama and Coushatta Indians, and to have received the whole-hearted and generous support and encouragement which has been received from Mr. C. F. Fain, jr., of Livingston, Tex., who has not only been designated by the Indians as second chief but has also recently been named by the Governor of Texas as commissioner for these Indians. Commissioner Fain came to Washington with Chief Sun Kee and Chieftain Battiste and appeared before the House Committee on Indian Affairs with the chief and chieftain, in behalf of this measure, introduced by me for the relief of this tribe. All three, with myself, also conferred with the President and received an agreeable expression of interest in their plight.

The Polk County Chamber of Commerce and the citizenship generally of the county, as well as of a large part of the State of Texas generally, the press of Texas, the Texas Federation of Women's Clubs, and especially Mrs. Gertrude Cogdell, chairman of the division of Indian welfare of that organization, the General Federation of Women's Clubs and its legislative representative, Mrs. Kate Trentholm Abrams, as well as the Indian Rights Association and its representative, Mr. S. M. Brosius, the Reverend and Mrs. C. W. Chambers, missionaries to such Indians, and many others have also rendered splendid cooperation in bringing about the result attained.

When the Senate and the President shall have adopted the legislative relief mentioned, the Alabama and Coushatta Indians will be given an opportunity to continue to exist and to become self-sustaining and, with the other relief indicated, to again become members of the great family of American Indians.

Mr. DOWELL. Mr. Speaker, I make the point of order that it is not in order to move to postpone until the bill is before the House.

Mr. CRAMTON. Mr. Speaker, I withdraw the motion I made for indefinite postponement, and reserving the right to object I desire to supplement the remarks of the gentleman from Texas with reference to the action that has been taken for these Indians in the pending deficiency bill and I ask unanimous consent to revise and extend my remarks on this matter and in connection therewith to insert, perhaps, a letter or two from persons interested.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CRAMTON. Mr. Speaker, H. R. 5479, as introduced, was impossible from my point of view. It proposed an appropriation of $125,000 for these Indians, or over $2,000 for each head of family. That was quite out of reason. Further, there was a lack of any evidence of effective cooperation by the local community and the State of Texas. Also, it seemed to me desirable to have some definite offers of land before Congress committed the Government and more definite information as to the character of the available land.

My remarks in the House brought me considerable information, especially from Mr. C. F. Fain, who has given much time and effort to the helping of these Indians, and Mr. L. O. Jackson, secretary-manager of the Polk County Chamber of Commerce. I am sure that proper roads have been or will be provided and that agricultural instruction will be made available and that, generally speaking, the community and State will take a substantial interest.

I have given much weight to the statements given me by Mr. Fain as to prices and character of available land, and will turn that information over to the Bureau of Indian Affairs. I am satisfied that $30,000 to $35,000 will buy all the land we should buy for these Indians, and that $5,000 to $10,000 will take care of urgent present needs as to stock, tools, and so forth.

By the time this information was in hand, it was so late in the session that to await passage of H. R. 5479, introduced by the gentleman from Texas [Mr. BRIGGS], authorizing an appropriation, would have meant no appropriation until next December. It seemed to me desirable that what we are to do should be done now, and I therefore proposed to Mr. BRIGGS, the introducer of the bill, the inclusion of the following item in the deficiency bill:

Alabama and Coushatta Indians, Texas: For the purchase of land for, and industrial assistance to, the Alabama and Coushatta Indians in Polk County, Tex., including not less than $5,000 for the purchase of livestock and agricultural equipment for such Indians, fiscal years 1928 and 1929, $40,000, to be reimbursed to the United States under such rules and regulations as the Secretary of the Interior may prescribe: *Provided*, That title to any land purchased shall be taken in the name of the United States in trust for such Indians.

While Mr. BRIGGS was disappointed in not getting the full amount of $125,000, he recognized what the above appropriation of $40,000 would mean to these Indians and yielded to the situa-

tion. With his approval and that of the gentleman from Montana [Mr. LEAVITT], chairman of the Indian Affairs Committee, this item was put in the bill by the Committee on Appropriations, passed the House last Friday, and is now pending in the Senate. I have every reason to believe it will become law within a few days.

The advances for tools, stock, and so forth, are reimbursable in the same way as similar advances to other Indians, and it is my understanding with Mr. BRIGGS and Mr. LEAVITT that in future years the general appropriation for such advances will be made available to these Texas Indians as to others, as their needs may appear.

It is our understanding that this $40,000 item covers the situation, and H. R. 5479 will be abandoned if this $40,000 item becomes law.

Mr. LAGUARDIA. What happens to the bill?

Mr. BRIGGS. It will be passed over.

The SPEAKER. The gentleman from Texas asks unanimous consent that the bill may be passed over without prejudice. Is there objection?

Mr. LEAVITT. Mr. Speaker, I reserve the right to object only for the purpose of asking unanimous consent to insert a brief statement from the standpoint of the Committee on Indian Affairs with regard to this situation.

The SPEAKER. The gentleman from Montana [Mr. LEAVITT] asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. LEAVITT. Mr. Speaker, this bill, H. R. 5479, "To provide for the purchase of land, livestock, and agricultural equipment for the Alabama and Coushatta Indians in Polk County, Tex., and for other purposes," is being laid aside to-day because in the deficiency appropriations bill which passed the House last Saturday the purposes of this legislation were fully accomplished, making the passage of this measure now unnecessary. In fact, the action taken last Saturday is more advantageous to the Alabama and Coushatta Indians than would have been the passage of the bill now under discussion, because it provides an appropriation for the purchase of lands for these Indians to become available this summer, whereas the bill now before the House is an authorization for an appropriation and would probably pass the Senate too late for an actual appropriation to be included until next year.

Two representatives of the Alabama and Coushatta Indians, Chief Sun-Kee and Chieftain McOnico Battiste, came to Washington in connection with this legislation. They were accompanied by C. F. Fain, jr. It is my pleasure to state that no delegation presenting the cause of any tribe of Indians has made a more favorable impression for sincerity than did this delegation. The Indians presented a situation of need and gave a background of historic justice for the granting of their petition. Chief Sun-Kee wore a silver plate inscribed to show that it had been presented by President Andrew Jackson in return for friendship and loyalty on the part of the forefathers of these Indians, and that tradition has been maintained for a century. Legislation placing these Indians of Texas in exactly the same position as that enjoyed by other Indians is meritorious and well deserved.

I can not close without stating that the committee and myself were greatly impressed with the testimony and sincerity of Mr. Fain. He has been the one who has taken over the cause of these Indians and has carried it through to the point of a hearing before the Indian Affairs Committee and whose fealty to their interests has contributed to the success of this legislation in a way which could not have been spared.

Congressman BRIGGS has handled the matter here with energy and skill.

I go into this detail because I feel that the enactment of legislation for these Indians is one of the most worth-while steps in Indian legislation of this Congress. There has been full cooperation by the subcommittee of the Committee on Appropriations under the leadership of Mr. CRAMTON, and thus has been worked out a solution for one of the most appealing situations existing among the Indians of this country.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas that the bill be passed over without prejudice?

There was no objection.

ADJUSTMENT OF THE BOUNDARIES OF OLYMPIC NATIONAL FOREST, WASH.

The next bill on the Consent Calendar was the bill (H. R. 9297) authorizing the adjustment of the boundaries of the Olympic National Forest, Wash., and for other purposes.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That any lands within 6 miles of the exterior boundaries of the Olympic National Forest, Wash., not in Government ownership, which are found by the Secretary of Agriculture to be chiefly valuable for national-forest purposes, may be offered and title thereto acquired in exchange for national-forest land or timber under and in accordance with the provisions of the act of March 20, 1922 (42 Stat. 465), and acts amendatory thereto. Lands conveyed to the United States under this act shall, upon acceptance of title, become parts of the Olympic National Forest.

With the following committee amendments:

Page 1, line 3, strike out the words "6 miles of the exterior boundaries" and insert in lieu thereof "3 miles of the north and east boundaries and 12 miles of the south boundary."

Page 1, line 10, before the word "and," insert "section 485, title 16, Code of Laws of the United States."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

LASSEN VOLCANIC NATIONAL PARK, CALIF.

The next business on the Consent Calendar was the bill (H. R. 11406) to consolidate or acquire alienated lands in Lassen Volcanic National Park, State of California, by exchange.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

Mr. ENGLEBRIGHT. Mr. Speaker, I ask unanimous consent that the bill be stricken from the calendar.

There was no objection.

ROADS ON THE INDIAN RESERVATIONS

The next business on the Consent Calendar was the bill (S. 1145) to authorize an appropriation for roads on Indian reservations.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

Mr. CRAMTON. Reserving the right to object, and I do not expect to object, I have prepared an amendment to the bill which I have discussed with the gentleman from Montana [Mr. LEAVITT] chairman of the committee. He is in accord with it, and I give notice that I will offer that amendment. The nature of the amendment is to make it more certain that the appropriation involved will use Indian labor.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That an appropriation of $250,000 is hereby authorized, out of any money in the Treasury not otherwise appropriated, to be available until expended, for the survey, improvement, construction, and maintenance of Indian reservation roads not eligible to Government aid under the Federal highway act and for which no other appropriation is available, under such rules and regulations as may be prescribed by the Secretary of the Interior.

Mr. CRAMTON. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Strike out lines 4 and 5 and insert in lieu thereof the following: "Appropriations are hereby authorized out of any money in the Treasury not otherwise appropriated for material, equipment, supervision of engineering, employment of Indian labor in survey, improvements."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

PREFERENCES IN THE EMPLOYMENT OF LABOR

The next business on the Consent Calendar was the bill (H. R. 11141) to require contractors and subcontractors engaged on public works of the United States to give certain preferences in the employment of labor.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. BACON. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection?

Mr. CRAMTON. Reserving the right to object, and I do not intend to do so, I ask unanimous consent to revise and extend my remarks by inserting a statement by the general manager of the General Contractors of America with reference to this legislation.

Mr. LAGUARDIA. And I ask unanimous consent, Mr. Speaker, to put in a statement of the Bricklayers, Masons, and Plasterers' International Union of America.

The SPEAKER. Is there objection to the requests of the gentlemen from New York and Michigan?

There was no objection.

The matter referred to is as follows:

THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA (INC.),
Washington, D. C., May 17, 1928.

Hon. LOUIS C. CRAMTON,
House of Representatives, Washington, D. C.

MY DEAR SIR: Having noted your remarks on page 8736 of the CONGRESSIONAL RECORD relative to H. R. 11141, it occurred to us that you may be interested in an analysis of this bill, which we sent to the Interdepartmental Board of Contracts and Adjustments. As this analysis was not transmitted until May 1, it did not reach the board until after its meeting on April 27, when the subject was under discussion.

We do not feel that this bill is compatible with the best interests of the Government.

Very truly yours,

D. A. GARBER, *General Manager.*

MAY 1, 1928.

INTERDEPARTMENTAL BOARD OF
CONTRACTS AND ADJUSTMENTS,
Bureau of the Budget, Washington, D. C.

GENTLEMEN: Pursuant to your request, we are here transmitting a brief analysis of H. R. 11141, indicating its probable effect upon Government construction.

This act would establish a legal priority of employment for laborers and mechanics on Government construction in the following order:

(a) Persons who are citizens of both the United States and the State, Territory, or District in which the specific project is to be built, and who also have been honorably discharged from the naval or military forces.

(b) Persons who have this same requirement of citizenship, but have not served in the military or naval forces.

(c) Persons who are merely citizens of the United States.

(d) Aliens.

Under the proposed act contractors and subcontractors would be required to advertise and notify employment agencies of the mandatory preference prevailing on Federal construction before employing anyone to work on the project. Should they inadvertently or otherwise employ a nonresident of the State, when resident workmen qualified to perform the work are available, they would be guilty of violating the law. For violation of the law the penalty provided is $5 per day for each day that the nonresident workman or mechanic is employed contrary to the priority.

In view of the rapidity with which construction operations move, the great number of workmen who come and go on a single project and the difficulty of soliciting correct information from a man in need of work, it seems questionable whether such a law is practicable. Naturally the following questions arise:

1. In assembling a force of workmen, which must often be done quickly, how can a contractor ascertain whether a man is a citizen of the United States, a legal resident of the State, and an honorably discharged soldier or sailor? Accurate information can hardly be expected from a man in need of work. He probably will not feel such requirements should disbar him from securing employment.

2. If a man misrepresents his citizenship or other matters, is the contractor or subcontractor then required to pay a penalty for each day he is on the work?

3. Who would judge whether available workmen in the district are qualified for the specific work; and after such judgment is exercised, would the contractor be liable for penalty because of the opinion of an inspector?.

4. Why should subcontractors and general contractors be required to advertise and otherwise assume expense of giving publicity to a law, which is incompatible with usual and proper customs of conducting work?

5. Why should payment be held from a general contractor because some subcontractor, over whom he has practically no control with respect to labor matters, employs a workman contrary to the established priority?

These questions are addressed to the uncertainty, inconvenience, and liabilities which contractors bidding on Government work would have imposed upon them. Government work has already become unattractive to many responsible concerns, and it does not appear advisable to make them more so by the injection of disputes and delays, which would inevitably grow out of the proposed bill. Such conditions are peculiarly susceptible to acts of distortion against employers operating under penalty for delay in completion. These things, of course, pertain to the interests of contractors, but there are other matters which would seem even more directly to affect the interests of the Government.

If a contractor's key men or "handy men" are considered to be mechanics, then outside contractors might readily be precluded from competing for Government work in a specific district. They could not bring these men into the State and they can not always build up a new organization, drawn entirely from the locality of the project.

The tendency of the statute appears therefore to establish a wall around each district, which would preclude proper competition on Government work. Also it might result in a labor monopoly wherein the right of employment is denied to any workman who does not subscribe to the various arbitrary rules of the locality.

There does not seem to be any sound basis for reserving employment on Government work to those workmen who happen to live near the site selected for a Government project. The moneys which pay for such projects are provided by all of the taxpayers, and it seems improper that any citizen should be debarred from an opportunity to compete for or obtain employment, whether he is in business or offering his services as a workman.

Experience has almost invariably shown that legislation such as this, designed to eradicate local annoyances in the construction industry, has precipitated more serious conditions than those which it sought to remove.

Yours very truly,

D. A. GARBER, *General Manager.*

BRICKLAYERS, MASONS, AND PLASTERERS'
INTERNATIONAL UNION OF AMERICA,
Washington, D. C., May 18, 1928.

Hon. F. H. LAGUARDIA,
House of Representatives, Washington, D. C.

DEAR SIR: I am informed that the bill, known, I believe, as the Bacon bill (H. R. 11141), providing for employment of resident workers on Federal contracts, may be called up any day.

This bill, if I understand its provisions, is for the purpose of preventing the importation of cheap labor and alien labor for the performance of work on Government operations throughout the United States. That is a most laudable purpose. I feel certain that the measure will have your support, and I hope that is the case. I hope also that you will seek by all proper methods to bring about the passage of the bill.

Let me call your attention to a specific case in New York State. At West Point, where much work is being done and where much remains to be done, it is reported to us by our representatives that enlisted men are compelled to perform part of the work, while aliens, employed at low wages, are doing a great deal of the remainder of it. Manifestly this is not a proper condition to exist on any United States Government job; and it is particularly undesirable at such a place as West Point. Neither the enlisted men nor the aliens are qualified to do skilled work, and poor construction is the inevitable result.

Aliens are employed within the fortified and restricted area. At the same time representatives of our international union, who are loyal American citizens, can not enter that area either to see what are the conditions of work or talk to the men employed there. Of course, this is the doing of a military martinet, one Colonel Timberlake, but that does not minimize the seriousness of the situation.

In addition to this, it is reported to us that enlisted men are doing work on a polo field, which may or may not be Government work.

Another case in point is the Veterans' Hospital at Northport, Long Island, where the contractor, Algernon Blair, imported poorly paid colored workers from the South, with results that were naturally unsatisfactory from a structural standpoint, as well as every other standpoint. Contractor Blair was able to bid on the basis of low-paid imported labor against contractors paying the prevailing scale of wages of the locality in which the work was done.

To cite further instances at this time would be to repeat at too great length for this letter, but such cases have been and continue to be frequent and damaging to the interests of the workers and the people generally and to the Government itself. Moreover, if the Government stops the evil practice, it will greatly discourage that same practice on private work.

The point is that the Government and the contractors in these cases, as elsewhere, take full advantage of the present lack of safeguarding provisions of law. Workers are imported to the locality where work is to be done and resident mechanics are denied the employment that is justly theirs. Naturally the imported workers always come from a community where the wage rate is lower than it is in the community to which they are taken.

I do not know whether the bill now before Congress is so drawn as to correct the type of abuses to which I have particularly drawn your attention, but it ought to cover them. However, any measure that will prevent the shifting of workers so as to draw them always from the low-wage centers to the higher-wage centers so as to reduce wage rates, and that will give employment preference to resident citizens of the United States, is worthy of support, and, in behalf of our international union, with its membership spread throughout the country, I bespeak your support. It may interest you to know, if you are not already informed of it, that our organization does not take into membership those who have not at least secured their first papers. We stand for citizenship and employment for citizens first, a position which we believe is commendable.

There are employers everywhere who want the kind of conditions that are created by congestion of unemployed workers or workers employed at low wages. Some consistently preach the gospel of two men for every job, looking back to the condition that existed when the immigration doors were wide open. Those doors have been fairly tightly closed, but the evil of shipment from community to community for the purpose of driving down the standards of living still persists, with the United States Government, under present conditions, giving tacit encouragement to the practice. Whatever tends to stop this degrading practice will make for better citizenship.

Thanking you for your consideration of the thoughts here presented, I am, with deep respect,

Very truly yours,

WM. J. BOWEN, *President.*

RETIRED AND TRANSFERRED MEMBERS OF THE NAVAL RESERVE FORCE AND NAVAL RESERVE AND MARINE CORPS RESERVE

The next business on the Consent Calendar was the bill (H. R. 8537) for the relief of retired and transferred members of the Naval Reserve Force, Naval Reserve, and Marine Corps Reserve.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

Mr. SIMMONS. I object.

ADDITIONAL CIRCUIT JUDGE FOR THE SECOND JUDICIAL CIRCUIT

The next business on the Consent Calendar was the bill (H. R. 11139) for the appointment of an additional circuit judge for the second judicial circuit.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

Mr. O'CONNOR of New York, Mr. BLACK of New York, and Mr. LAGUARDIA objected.

RECLAMATION AND BENEFITS OF PLANNED RURAL DEVELOPMENT

The next business on the Consent Calendar was the bill (H. R. 8221) to authorize the creation of organized rural communities to demonstrate methods of reclamation and benefits of planned rural development.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

Mr. CRAMTON. I object.

Mr. CRISP. Will the gentleman withhold his objection for a moment?

Mr. CRAMTON. Yes.

Mr. CRISP. I am the author of the bill, and, of course, think it very meritorious. It has the support of practically all the southern Representatives and Members generally from the West. I realize the importance of the bill, and am frank to say that I did not have much hope of getting unanimous consent to consider it, but I have applied for a rule and was unable to obtain one, so there was nothing else for me to do but to place it on the calendar. I thoroughly understand and recognize the position of my friend from Michigan.

Mr. CRAMTON. Mr. Speaker, in view of the statement of the gentleman, I reserve the right to object to observe very briefly that, of course, I am sorry to object to a bill offered by the gentleman from Georgia [Mr. CRISP]. This is, however, an important bill that proposes to have the Government embark on an entirely new policy of taking money, not from the reclamation fund, or from any other special fund, but from the Treasury of the United States and going into certain States and using that money to develop farm lands therein.

Mr. CRISP. It extends the provisions of the Reclamation Service to some States of the South.

Mr. CRAMTON. But it is an entirely different proposition. The first investigation made was with the expectation that the Federal Government would use its skill in the Reclamation Service in investigating and supervising, but that the money was to be advanced by the States. The States involved are amply able to advance the money. When they got to the point where the Interior Department had investigated, then suddenly the gentlemen from the South came to the conclusion that they wanted money direct from the Federal Treasury. I do not want to take the time of going into the matter at length, but will say that if this bill should pass it would embark the Treasury on a program of development of farm lands that would apply to Michigan as well as Georgia, and would apply to every one of the 48 States, and I have no idea where it would end.

Mr. CRISP. In my judgment, if I can get the bill before the House for consideration, it is so meritorious that I think a majority of the House will pass the bill.

Mr. CRAMTON. There are great differences between this bill as to Georgia and other States and the reclamation policy as to the West. In the first place, the reclamation policy as to the West is carried on out of money received very largely from lands and mineral resources in those States, and in the next place, in the main, those States are undeveloped communities that have no funds available for their development. On the other hand, this bill proposes to take money from the Treasury without contribution from the resources of Georgia and the other States involved.

Mr. CRISP. Mr. Speaker, I do not subscribe to the doctrine that the lands or mineral resources of the Western States belong to the respective States. They are an asset of the United States Government, the same as the Treasury funds or any other property owned by the Government. This bill provides for a revolving fund, all of it to be paid back to the Government, the Government having title to the property to secure the repayment of the funds. I do not believe the United States will sustain any financial loss under it.

Mr. CRAMTON. Another suggestion I have is that the Southern States are developed communities and they have resources and could very well undertake this work themselves.

The SPEAKER. Is there objection?

Mr. CRAMTON. Mr. Speaker, I object.

RELIEF OF CERTAIN MEMBERS OF NAVY AND MARINE CORPS

The next business on the Consent Calendar was the bill (H. R. 8327) for the relief of certain members of the Navy and Marine Corps who were discharged because of misrepresentation of age.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, or benefits upon honorably discharged members of the military or naval forces of the United States, their widows and dependent children, a member of the Navy or Marine Corps who was enlisted between April 6, 1917, and November 11, 1918, both dates inclusive, and who was discharged for fraudulent enlistment on account of misrepresentation of his age, shall hereafter be held and considered to have been honorably discharged from the Navy or Marine Corps on the date of his actual separation therefrom if his service otherwise was such as would have entitled him to a discharge under honorable conditions. No back pay or allowances shall accrue by reason of the passage of this act. In any such case the Secretary of the Navy shall, upon request, grant to such individual or his widow a discharge certificate showing that such former member of the Navy or Marine Corps is held and considered to have been honorably discharged under the provisions of this act.

With the following committee amendment:

Page 2, line 7, after the word "widow," insert "or next of kin."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

POISONS IN THE MAIL

The next business on the Consent Calendar was the bill (H. R. 10441) to amend section 217 as amended, of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, is it not true that the Postmaster General for some years has been resisting the demand for the amendment of the law which the gentleman's bill will bring about?

Mr. KELLY. Mr. Speaker, it is true that the Postmaster General and the department for two years have objected to the form of bill which was before the Post Office Committee. The Postmaster General is strongly in favor of the bill in the form in which it is now before the House. It is entirely different from the bill which the committee refused to bring out in the last Congress.

Mr. LAGUARDIA. Whence does the demand come for the amendment of the law?

Mr. KELLY. It is largely from the agricultural organizations and from organizations manufacturing certain chemicals.

Mr. LAGUARDIA. I think the latter part of the gentleman's reply is accurate, and by that I do not mean to imply that the gentleman is himself giving us inaccurate information.

Mr. KELLY. Mr. Gray, of the Farm Bureau, urges the passage of this legislation. I trust the gentleman will permit it to go through. The committee has been very careful in refusing to give permission to send chemical poison through the mail without perfect protection as to containers.

Mr. LAGUARDIA. What is the necessity for the legislation?

Mr. KELLY. This is to remedy an inadvertance in the act passed in 1920.

Mr. LAGUARDIA. Oh, it was not an inadvertance. The Postmaster General said that he did not want the discretion.

Mr. KELLY. In 1920 the act by inadvertance left out the clause which provided that manufacturers may send to physicians.

Mr. LAGUARDIA. Mr. Speaker, I will ask to have it go over without prejudice.

Mr. KELLY. I hope the gentleman will not do that. It is advocated by the farm organizations and the chemical manufacturers.

Mr. SCHAFER. I ask for the regular order, Mr. Speaker.

The SPEAKER. The regular order is demanded.

IRRIGATION DAM ON THE GREYBULL RIVER, WYO.

The next business on the Consent Calendar was the bill (H. R. 10308) to investigate and determine the feasibility of the construction of an irrigation dam on the Greybull River, Wyo.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. I object.

The SPEAKER. Objection is heard. The Clerk will report the next bill.

IRRIGATION DAM ON THE BEAR RIVER, WYO.

The next business on the Consent Calendar was the bill (H. R. 10309) to investigate and determine the feasibility of the construction of an irrigation dam on the Bear River, Wyo.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. I object.

Mr. WINTER. Will the gentleman reserve his objection? I would like to ascertain if the gentleman from Michigan is maintaining a consistent position with reference to bills of this character? I call his attention to the fact that during this session of Congress we have passed similar bills, one on the Gila, introduced by Representative MORROW, of New Mexico. If the gentleman from Michigan can differentiate and explain his inconsistency I would be glad if he would do so.

Mr. CRAMTON. I can not explain any inconsistency because there is not any, but I can explain the differentiation. These bills are not necessary. There is just as much law now authorizing these things to be done as there would be if the bills were passed. If the gentleman insists that there is no money available I may say that these bills do not give the money, but there is a lump-sum appropriation given each year which could be used for that purpose. If the gentleman says that that money has already been allotted this year elsewhere, I reply that those funds can be used for these projects.

The committee in the case of the Gila River project took the position that there the local interests wanted to contribute half the cost, thus saving the reclamation fund that money. I had the bill marked for objection, but I felt it was proper to let the local interests contribute half the cost, under the circumstances, and that took it out from the operation of the general law.

Mr. WINTER. Did the gentleman submit an amendment on the New Mexico bill for that purpose?

Mr. CRAMTON. I do not know whether I submitted it or not, but I had an agreement with the gentlemen in charge of the bill that it would be submitted.

Mr. WINTER. Is the gentleman willing to accept an amendment of the same kind on this bill?

Mr. CRAMTON. The gentleman takes me by surprise. That might make a difference. But if the gentleman desires that, let us pass the bill over.

Mr. WINTER. I would like to have the two bills passed without prejudice.

Mr. CRAMTON. I do not care to lay it down as a general proposition that whenever they pay half locally we will authorize it, but it makes a great deal of difference.

Mr. WINTER. The gentleman does not wish to discriminate.

Mr. CRAMTON. No. If I did, it would be in favor of the gentleman from Wyoming.

Mr. WINTER. I ask unanimous consent, then, Mr. Speaker, that we pass over without prejudice the bills H. R. 10308 and H. R. 10309.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The SPEAKER. The Clerk will report the next bill.

PATENTS ISSUED TO PARTICIPANTS IN THE WORLD WAR

The next business on the Consent Calendar was the bill (H. R. 10435) providing for the extension of the time limitations under which patents were issued in the case of persons who served in the military or naval forces of the United States during the World War.

The title of the bill was read.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That any person who served honorably in the military or naval forces of the United States at any time between April 6, 1917, and November 11, 1918, both dates inclusive, and was subsequently honorably discharged, say within six months after the enactment of this act, upon payment of a fee of $20, make application to the Commissioner of Patents, comprising a verified statement, accompanied by supporting evidence of the following facts:

(A) That he is the inventor or discoverer of an invention or discovery for which a specified patent was granted prior to the 11th day of November, 1918, the original term of which remains unexpired at the time of the filing of the application.

(B) That between April 6, 1917, and November 11, 1918, and also at the time of the passage of this act, he held, by ownership or contract, a right in said invention or under said patent or to income by way of royalty or otherwise therefrom, whereby an extension of the term of said patent would benefit him.

(C) That between April 6, 1917, and November 11, 1918, he was not receiving from said patent an income, or that his income therefrom was reduced by his said service.

(D) That at the time of his induction into the service he was making diligent effort to exploit the invention covered by his patent.

(E) The names of all persons, firms, or corporations, if any, holding at the time of the passage of this act, by grant, transfer, license, or contract from him, any right or interest in the invention or discovery or under the patent, and their consent to the extension for which application is made, which shall be supported by an instrument, or instruments, executed by all such persons, firms, and corporations, evidencing their consent to such extension.

(F) The period of extension of the patent from the expiration of the original term thereof, for which he applies, which shall in no case exceed a further term of three times the length of his said service in the military or naval forces of the United States during the World War.

(G) That the licensee of a patent affected by this act shall automatically be granted an extension of said license for the period of the extension on the same terms and conditions as contained in said existing license, thereby creating an equitable adjustment of the benefits of this act.

(H) That such extension shall in no way affect the right of anyone who before the passage of this act was bona fide in possession of any rights in patents or applications for patents conflicting with the rights in any patents extended under this act, nor shall any extension granted under this act affect the right of anyone who was lawfully manufacturing before the passage of this act the invention covered by the extended patent.

SEC. 2. In the case of a veteran, as described in paragraph 1 of this act, who dies, or has died, or who becomes insane or unable to act, which veteran owned an interest as described in this act in said patent at the time of his death or at the time he was declared mentally incompetent or became unable to act before said extension is granted, such application may be filed or proceeded with by his legal representatives substantially as provided in section 4896 of the Revised Statutes of the United States, as amended, with respect to proceedings in such cases for obtaining a patent.

SEC. 3. On the filing of such application the Commissioner of Patents shall cause an examination thereof to be made, and if, on such examination, it shall appear that such application conforms, or by amendment or supplement is made to conform, to the requirements of section 1 of this act, the commissioner shall issue a certificate that the term of said patent is extended for the additional period for which application has been made as aforesaid, and shall cause notice of such extension to be published in the Official Gazette and marked upon copies of the patent for sale by the Patent Office, in such manner as the commissioner may determine.

SEC. 4. Thereupon said patent shall have the same force and effect in law as though it had been originally granted for 17 years plus the term of such extension: *Provided, however,* That in any action, at law or in equity, for infringement after the expiration of 17 years from the grant of the patent and during the period of such extension, the defendant may plead the general issue, and having given notice in writing to the plaintiff or his attorney 30 days before, may prove on trial that any of the statements of the application for extension required by section 1 of this act as not true in fact; and if any one or more of such statements shall be found untrue in fact, judgment shall be

rendered for the defendant, with costs: *Provided further,* That no person whose patent shall be extended under the provisions of this act shall be permitted to make any claim for damages against the United States for the period of the extension, and the rights of the United States shall remain in all respects as if these patents had not been extended.

With committee amendments as follows:

Page 1, line 6, strike out the word "say" and insert in lieu thereof the word "may."

Page 2, line 14, strike out the words "November 11, 1918" and insert in lieu thereof the words "July 2, 1921."

Page 3, line 8, strike out the words "during the World War" and insert in lieu thereof the words "between the date of April 6, 1917, and July 2, 1921, but exclusive of any reenlistment subsequent to November 11, 1918."

Page 3, line 16, strike out the word "affect" and insert in lieu thereof the word "impair."

Page 3, line 21, strike out the word "affect" and insert in lieu thereof the word "impair."

Page 4, line 7, after the word "States" insert "(United States Code, title 35, section 46)."
